With [Auto Shutdown Genius](#), you can automatically shutdown, power off, log off, lock workstation, hibernate, stand by or screen save your computers at schedule date and time, when the computer is idle or when excessive CPU usage.

[Auto Shutdown Genius](#) gives you different ways to schedule the shutdown events, such as daily, weekly, only once, the computer idle and CPU usage.

During the shutdown, it can clean up recycle bin, temporary files, IE cache, IE cookies, IE history and recent document list to improve system performance and protect your privacy.

The main program is a windows service. **It can be started without the user having to login to the machine and it won't die after the user logs off.** This feature is very useful and powerful for server manager and network administrator.
