Der Anmelder, der seinen Wohnsitz oder Sitz in einem Vertragsstaat hat, ist vorbehaltlich der Artikel 4 und 5 vor den Gerichten dieses Vertragsstaats zu verklagen.

Artikel 3

Wenn der Anmelder seinen Wohnsitz oder Sitz außerhalb der Vertragsstaaten hat und die Person, die den Anspruch auf Erteilung des europäischen Patents geltend macht, ihren Wohnsitz oder Sitz in einem Vertragsstaat hat, sind vorbehaltlich der Artikel 4 und 5 die Gerichte des letztgenannten Staats ausschließlich zuständig.

Artikel 4

Ist der Gegenstand der europäischen Patentanmeldung eine Erfindung eines Arbeitnehmers, so sind vorbehaltlich Artikel 5 für einen Rechtsstreit zwischen dem Arbeitnehmer und dem Arbeitgeber ausschließlich die Gerichte des Vertragsstaats zuständig, nach dessen Recht sich das Recht auf das europäische Patent gemäß Artikel 60 Absatz 1 Satz 2 des Übereinkommens bestimmt.

Section I
Jurisdiction

Article 1¹

(1) The courts of the Contracting States shall, in accordance with Articles 2 to 6, have jurisdiction to decide claims, against the applicant, to the right to the grant of a European patent in respect of one or more of the Contracting States designated in the European patent application.

(2) For the purposes of this Protocol, the term “courts” shall include authorities which, under the national law of a Contracting State, have jurisdiction to decide the claims referred to in paragraph 1. Any Contracting State shall notify the European Patent Office of the identity of any authority on which such a jurisdiction is conferred, and the European Patent Office shall inform the other Contracting States accordingly.

(3) For the purposes of this Protocol, the term “Contracting State” refers to a Contracting State which has not excluded application of this Protocol pursuant to Article 167 of the Convention.

Article 2

Subject to Articles 4 and 5, if an applicant for a European patent has his residence or principal place of business within one of the Contracting States, proceedings shall be brought against him in the courts of that Contracting State.

Article 3

Subject to Articles 4 and 5, if an applicant for a European patent has his residence or principal place of business outside the Contracting States, and if the party claiming the right to the grant of the European patent has his residence or principal place of business within one of the Contracting States, the courts of the latter State shall have exclusive jurisdiction.

Article 4

Subject to Article 5, if the subject-matter of a European patent application is the invention of an employee, the courts of the Contracting State, if any, whose law determines the right to the European patent pursuant to Article 60, paragraph 1, second sentence, of the Convention, shall have exclusive jurisdiction over proceedings between the employee and the employer.

¹ Siehe hierzu Entscheidung der Großen Beschwerdekammer G 3/92 (Anhang I).

¹ See decision of the Enlarged Board of Appeal G 3/92 (Annex I).

Section I
Compétence

*Article premier*¹

(1) Pour les actions intentées contre le titulaire d'une demande de brevet européen visant à faire valoir le droit à l'obtention du brevet européen pour un ou plusieurs des Etats contractants désignés dans la demande de brevet européen, la compétence des tribunaux des Etats contractants est déterminée conformément aux articles 2 à 6.

(2) Sont assimilées aux tribunaux, au sens du présent protocole, les autorités qui, selon la loi nationale d'un Etat contractant, sont compétentes pour statuer sur les actions visées au paragraphe 1. Les Etats contractants donnent connaissance à l'Office européen des brevets des autorités auxquelles est conférée une telle compétence ; l'Office européen des brevets en avise les autres Etats contractants.

(3) Au sens du présent protocole, on entend par Etats contractants ceux des Etats parties à la convention qui n'ont pas exclu l'application de ce protocole en vertu de l'article 167 de la convention.

Article 2

Sous réserve des articles 4 et 5, le titulaire d'une demande de brevet européen ayant son domicile ou son siège dans l'un des Etats contractants est attrait devant les juridictions dudit Etat contractant.

Article 3

Sous réserve des articles 4 et 5, lorsque le titulaire d'une demande de brevet européen n'a ni domicile ni siège dans aucun des Etats contractants, et lorsque la personne qui fait valoir le droit à l'obtention du brevet européen a son domicile ou son siège dans l'un des Etats contractants, les juridictions de ce dernier Etat sont seules compétentes.

Article 4

Si l'objet de la demande de brevet européen est une invention d'un employé, sont seules compétentes pour connaître des actions opposant l'employeur et l'employé, sous réserve de l'article 5, les juridictions de l'Etat contractant selon le droit duquel est déterminé le droit au brevet européen conformément à l'article 60, paragraphe 1, deuxième phrase de la convention.

ANERKENNUNGSPROTOKOLL
Artikel 1

PROTOCOL ON RECOGNITION
Article 1

PROTOCOLE SUR LA RECONNAISSANCE
Article premier

¹ Cf. la décision de la Grande Chambre de recours G 3/92 (Annexe I).

Artikel 5

(1) Haben die an einem Rechtsstreit über den Anspruch auf Erteilung eines europäischen Patents beteiligten Parteien durch eine schriftliche oder durch eine mündliche, schriftlich bestätigte Vereinbarung bestimmt, dass ein Gericht oder die Gerichte eines bestimmten Vertragsstaats über diesen Rechtsstreit entscheiden sollen, so sind dieses Gericht oder die Gerichte dieses Staats ausschließlich zuständig.

(2) Handelt es sich bei den Parteien um einen Arbeitnehmer und seinen Arbeitgeber, so ist Absatz 1 jedoch nur anzuwenden, soweit das für den Arbeitsvertrag maßgebliche nationale Recht eine solche Vereinbarung zulässt.

Artikel 6

In den nicht in den Artikeln 2 bis 4 und in Artikel 5 Absatz 1 geregelten Fällen sind die Gerichte der Bundesrepublik Deutschland ausschließlich zuständig.

Artikel 7

Die Gerichte der Vertragsstaaten, die mit Klagen nach Artikel 1 befasst werden, prüfen ihre Zuständigkeit nach den Artikeln 2 bis 6 von Amts wegen.

Artikel 8

(1) Werden bei Gerichten verschiedener Vertragsstaaten Klagen wegen desselben Anspruchs zwischen denselben Parteien anhängig gemacht, so hat sich das später angerufene Gericht von Amts wegen zu Gunsten des zuvor angerufenen Gerichts für unzuständig zu erklären.

(2) Das Gericht, das sich nach Absatz 1 für unzuständig zu erklären hätte, hat die Entscheidung bis zur rechtskräftigen Entscheidung des zuvor angerufenen Gerichts auszusetzen, wenn der Mangel der Zuständigkeit des anderen Gerichts geltend gemacht wird.

Abschnitt II

Anerkennung

Artikel 9²

(1) Die in einem Vertragsstaat ergangenen rechtskräftigen Entscheidungen über den Anspruch auf Erteilung eines europäischen Patents für einzelne oder alle in der europäischen Patentanmeldung benannte Vertragsstaaten werden vorbehaltlich Artikel 11 Absatz 2 in den anderen Vertragsstaaten anerkannt, ohne dass es hierfür eines besonderen Verfahrens bedarf.

Article 5

(1) If the parties to a dispute concerning the right to the grant of a European patent have concluded an agreement, either in writing or verbally with written confirmation, to the effect that a court or the courts of a particular Contracting State shall decide on such a dispute, the court or courts of that State shall have exclusive jurisdiction.

(2) However, if the parties are an employee and his employer, paragraph 1 shall only apply in so far as the national law governing the contract of employment allows the agreement in question.

Article 6

In cases where neither Articles 2 to 4 nor Article 5, paragraph 1, apply, the courts of the Federal Republic of Germany shall have exclusive jurisdiction.

Article 7

The courts of Contracting States before which claims referred to in Article 1 are brought shall of their own motion decide whether or not they have jurisdiction pursuant to Articles 2 to 6.

Article 8

(1) In the event of proceedings based on the same claim and between the same parties being brought before courts of different Contracting States, the court to which a later application is made shall of its own motion decline jurisdiction in favour of the court to which an earlier application was made.

(2) In the event of the jurisdiction of the court to which an earlier application is made being challenged, the court to which a later application is made shall stay the proceedings until the other court takes a final decision.

Section II

Recognition

Article 9²

(1) Subject to the provisions of Article 11, paragraph 2, final decisions given in any Contracting State on the right to the grant of a European patent in respect of one or more of the Contracting States designated in the European patent application shall be recognised without requiring a special procedure in the other Contracting States.

² Siehe hierzu Entscheidung der Großen Beschwerdekammer G 3/92 (Anhang I).

² See decision of the Enlarged Board of Appeal G 3/92 (Annex I).

Article 5

(1) Si, par une convention écrite ou par une convention verbale confirmée par écrit, les parties à un différend relatif au droit à l'obtention du brevet européen ont désigné un tribunal ou les tribunaux d'un Etat contractant particulier pour connaître de ce différend, le tribunal ou les tribunaux de cet Etat sont seuls compétents.

(2) Toutefois, si les parties sont un employé et son employeur, le paragraphe 1 n'est applicable que dans la mesure où le droit national qui régit le contrat de travail autorise une telle convention.

Article 6

Pour les cas où les articles 2 à 4 et l'article 5, paragraphe 1 ne s'appliquent pas, les juridictions de la République fédérale d'Allemagne sont seules compétentes.

Article 7

Les juridictions des Etats contractants saisies de l'une des actions visées à l'article premier vérifient d'office si elles sont compétentes conformément aux articles 2 à 6.

Article 8

(1) Lorsque des demandes ayant le même objet et la même cause sont formées entre les mêmes parties devant des juridictions d'Etats contractants différents, la juridiction saisie ultérieurement doit, même d'office, se dessaisir en faveur du tribunal premier saisi.

(2) La juridiction qui devrait se dessaisir en vertu du paragraphe 1 surseoit à statuer jusqu'à ce que la décision du tribunal premier saisi soit passée en force de chose jugée, si la compétence de ce dernier tribunal est contestée.

Section II

Reconnaissance

*Article 9*²

(1) Sous réserve des dispositions de l'article 11, paragraphe 2, les décisions passées en force de chose jugée rendues dans un Etat contractant, en ce qui concerne le droit à l'obtention du brevet européen pour un ou plusieurs Etats désignés dans la demande de brevet européen, sont reconnues dans les autres Etats contractants, sans qu'il soit nécessaire de recourir à aucune procédure.

² Cf. la décision de la Grande Chambre de recours G 3/92 (Annexe I).

ANERKENNUNGSPROTOKOLL

Artikel 5

PROTOCOL ON RECOGNITION

Article 5

PROTOCOLE SUR LA RECONNAISSANCE

Article 5

(2) Die Zuständigkeit des Gerichts, dessen Entscheidung anerkannt werden soll, und die Gesetzmäßigkeit dieser Entscheidung dürfen nicht nachgeprüft werden.

Artikel 10

Artikel 9 Absatz 1 ist nicht anzuwenden, wenn:

- a) der Anmelder, der sich auf die Klage nicht eingelassen hat, nachweist, dass ihm das diesen Rechtsstreit einleitende Schriftstück nicht ordnungsgemäß und nicht so rechtzeitig zugestellt worden ist, dass er sich verteidigen konnte;
- b) der Anmelder nachweist, dass die Entscheidung mit einer anderen Entscheidung unvereinbar ist, die zwischen denselben Parteien in einem Vertragsstaat auf eine Klage hin ergangen ist, die früher eingereicht wurde als die Klage, die zu der anzuerkennenden Entscheidung geführt hat.

Artikel 11

(1) Im Verhältnis der Vertragsstaaten zueinander haben die Vorschriften dieses Protokolls Vorrang vor widersprechenden Vorschriften anderer Abkommen, die die gerichtliche Zuständigkeit oder die Anerkennung von Entscheidungen regeln.

(2) Dieses Protokoll steht der Anwendung von Abkommen zwischen Vertragsstaaten und einem nicht durch das Protokoll gebundenen Staat nicht entgegen.

(2) The jurisdiction of the court whose decision is to be recognised and the validity of such decision may not be reviewed.

Article 10

Article 9, paragraph 1, shall not be applicable where:

- (a) an applicant for a European patent who has not contested a claim proves that the document initiating the proceedings was not notified to him regularly and sufficiently early for him to defend himself; or
- (b) an applicant proves that the decision is incompatible with another decision given in a Contracting State in proceedings between the same parties which were started before those in which the decision to be recognised was given.

Article 11

(1) In relations between any Contracting States the provisions of this Protocol shall prevail over any conflicting provisions of other agreements on jurisdiction or the recognition of judgments.

(2) This Protocol shall not affect the implementation of any agreement between a Contracting State and a State which is not bound by the Protocol.

(2) Il ne peut être procédé ni au contrôle de la compétence de la juridiction dont la décision doit être reconnue ni à la révision au fond de cette décision.

Article 10

L'article 9, paragraphe 1 n'est pas applicable lorsque :

a) le titulaire d'une demande de brevet européen qui a été attrait devant une juridiction et n'a pas comparu établit que l'acte introductif d'instance ne lui a pas été signifié régulièrement et en temps utile pour lui permettre de se défendre, ou

b) le titulaire d'une demande de brevet européen établit qu'une décision rendue dans un Etat contractant au terme d'une procédure opposant les mêmes parties et introduite antérieurement à celle qui a conduit à la décision dont la reconnaissance est demandée, est inconciliable avec cette dernière décision.

Article 11

(1) Dans les rapports entre Etats contractants, les dispositions du présent protocole priment les dispositions contraires d'autres conventions relatives à la compétence judiciaire ou à la reconnaissance des décisions.

(2) Le présent protocole ne fait pas obstacle à l'application d'un autre accord entre un Etat contractant et un Etat qui n'est pas lié par ce protocole.

ANERKENNUNGSPROTOKOLL
Artikel 10

PROTOCOL ON RECOGNITION
Article 10

PROTOCOLE SUR LA RECONNAISSANCE
Article 10

**PROTOKOLL
ÜBER DIE VORRECHTE UND IMMUNITÄTEN
DER EUROPÄISCHEN PATENTORGANISATION
(PROTOKOLL ÜBER VORRECHTE UND IMMUNITÄTEN)**

vom 5. Oktober 1973

**PROTOCOL
ON PRIVILEGES AND IMMUNITIES
OF THE EUROPEAN PATENT ORGANISATION
(PROTOCOL ON PRIVILEGES AND IMMUNITIES)**

of 5 October 1973

**PROTOCOLE
SUR LES PRIVILÈGES ET IMMUNITÉS
DE L'ORGANISATION EUROPÉENNE DES BREVETS
(PROTOCOLE SUR LES PRIVILÈGES ET IMMUNITÉS)**

du 5 octobre 1973

Artikel 1

(1) Die Räumlichkeiten der Organisation sind unverletzlich.

(2) Die Behörden der Staaten, in denen die Organisation Räumlichkeiten hat, dürfen diese Räumlichkeiten nur mit Zustimmung des Präsidenten des Europäischen Patentamts betreten. Bei Feuer oder einem anderen Unglück, das sofortige Schutzmaßnahmen erfordert, wird diese Zustimmung vermutet.

(3) Die Zustellung einer Klageschrift oder sonstiger Schriftstücke, die sich auf ein gegen die Organisation gerichtetes Verfahren beziehen, in den Räumlichkeiten der Organisation stellt keinen Bruch der Unverletzlichkeit dar.

Artikel 2

Die Archive der Organisation und alle Dokumente, die ihr gehören oder sich in ihrem Besitz befinden, sind unverletzlich.

Artikel 3

(1) Die Organisation genießt im Rahmen ihrer amtlichen Tätigkeit Immunität von der Gerichtsbarkeit und Vollstreckung mit Ausnahme folgender Fälle:

a) soweit die Organisation im Einzelfall ausdrücklich hierauf verzichtet;

b) im Fall eines von einem Dritten angestregten Zivilverfahrens wegen Schäden auf Grund eines Unfalls, der durch ein der Organisation gehörendes oder für sie betriebenes Motorfahrzeug verursacht wurde, oder im Fall eines Verstoßes gegen die Vorschriften über den Straßenverkehr, an dem dieses Fahrzeug beteiligt ist;

c) im Fall der Vollstreckung eines nach Artikel 23 ergangenen Schiedsspruchs.

(2) Das Eigentum und die sonstigen Vermögenswerte der Organisation genießen ohne Rücksicht darauf, wo sie sich befinden, Immunität von jeder Form der Beschlagnahme, Einziehung, Enteignung und Zwangsverwaltung.

(3) Das Eigentum und die sonstigen Vermögenswerte der Organisation genießen ebenfalls Immunität von jedem behördlichen Zwang oder jeder Maßnahme, die einem Urteil vorausgehen, es sei denn, dass dies im Zusammenhang mit der Verhinderung und gegebenenfalls der Untersuchung von Unfällen, an denen der Organisation gehörende oder für sie betriebene Motorfahrzeuge beteiligt sind, vorübergehend notwendig ist.

(4) Unter amtlicher Tätigkeit der Organisation im Sinn dieses Protokolls sind alle Tätigkeiten zu verstehen, die für ihre im Übereinkommen vorgesehene Verwaltungsarbeit und technische Arbeit unbedingt erforderlich sind.

Article 1

(1) The premises of the Organisation shall be inviolable.

(2) The authorities of the States in which the Organisation has its premises shall not enter those premises, except with the consent of the President of the European Patent Office. Such consent shall be assumed in case of fire or other disaster requiring prompt protective action.

(3) Service of process at the premises of the Organisation and of any other procedural instruments relating to a cause of action against the Organisation shall not constitute breach of inviolability.

Article 2

The archives of the Organisation and any documents belonging to or held by it shall be inviolable.

Article 3

(1) Within the scope of its official activities the Organisation shall have immunity from jurisdiction and execution, except

(a) to the extent that the Organisation shall have expressly waived such immunity in a particular case;

(b) in the case of a civil action brought by a third party for damage resulting from an accident caused by a motor vehicle belonging to, or operated on behalf of, the Organisation, or in respect of a motor traffic offence involving such a vehicle;

(c) in respect of the enforcement of an arbitration award made under Article 23.

(2) The property and assets of the Organisation, wherever situated, shall be immune from any form of requisition, confiscation, expropriation and sequestration.

(3) The property and assets of the Organisation shall also be immune from any form of administrative or provisional judicial constraint, except in so far as may be temporarily necessary in connection with the prevention of, and investigation into, accidents involving motor vehicles belonging to or operated on behalf of the Organisation.

(4) The official activities of the Organisation shall, for the purposes of this Protocol, be such as are strictly necessary for its administrative and technical operation, as set out in the Convention.

Article premier

- (1) Les locaux de l'Organisation sont inviolables.
- (2) Les autorités des Etats où l'Organisation a ses locaux ne peuvent pénétrer dans ces locaux qu'avec le consentement du Président de l'Office européen des brevets. Ce consentement est présumé acquis en cas d'incendie ou autre sinistre exigeant des mesures de protection immédiates.
- (3) La remise dans les locaux de l'Organisation de tous actes de procédure nécessités par une instance en justice concernant l'Organisation ne constitue pas une infraction à l'inviolabilité.

Article 2

Les archives de l'Organisation ainsi que tout document lui appartenant ou détenu par elle sont inviolables.

Article 3

- (1) Dans le cadre de ses activités officielles, l'Organisation bénéficie de l'immunité de juridiction et d'exécution sauf :
 - a) dans la mesure où l'Organisation aurait expressément renoncé à une telle immunité dans un cas particulier ;
 - b) en cas d'action civile intentée par un tiers pour les dommages résultant d'un accident causé par un véhicule automoteur appartenant à l'Organisation ou circulant pour son compte ou en cas d'infraction à la réglementation de la circulation automobile intéressant le véhicule précité ;
 - c) en cas d'exécution d'une sentence arbitrale rendue en application de l'article 23.
- (2) Les propriétés et biens de l'Organisation, quel que soit le lieu où ils se trouvent, bénéficient de l'immunité à l'égard de toute forme de réquisition, confiscation, expropriation et séquestre.
- (3) Les propriétés et biens de l'Organisation bénéficient également de l'immunité à l'égard de toute forme de contrainte administrative ou de mesure préalable à un jugement, sauf dans la mesure où le nécessitent temporairement la prévention des accidents mettant en cause des véhicules automoteurs appartenant à l'Organisation ou circulant pour le compte de celle-ci et les enquêtes auxquelles peuvent donner lieu lesdits accidents.
- (4) Au sens du présent protocole, les activités officielles de l'Organisation sont celles qui sont strictement nécessaires à son fonctionnement administratif et technique telles qu'elles résultent de la convention.

PROTOKOLL ÜBER VORRECHTE
UND IMMUNITÄTEN
Artikel 1

PROTOCOL ON PRIVILEGES AND IMMUNITIES
Article 1

PROTOCOLE SUR LES PRIVILÈGES
ET IMMUNITÉS
Article premier

Artikel 4

(1) Im Rahmen ihrer amtlichen Tätigkeit sind die Organisation, ihr Vermögen und ihre Einkünfte von jeder direkten Besteuerung befreit.

(2) Sind bei größeren Einkäufen, die von der Organisation getätigt werden und die für ihre amtliche Tätigkeit erforderlich sind, Steuern oder sonstige Abgaben im Preis enthalten, so werden in jedem Fall, in dem dies möglich ist, von den Vertragsstaaten geeignete Maßnahmen getroffen, um der Organisation den Betrag der Steuern oder sonstigen Abgaben dieser Art zu erlassen oder zu erstatten.

(3) Von Abgaben, die lediglich die Vergütung für Leistungen öffentlicher Versorgungsbetriebe darstellen, wird keine Befreiung gewährt.

Artikel 5

Die von der Organisation ein- oder ausgeführten Waren, die für deren amtliche Tätigkeit erforderlich sind, werden von Zöllen und sonstigen Abgaben bei der Ein- oder Ausfuhr - mit Ausnahme der Abgaben für Dienstleistungen - befreit sowie von allen Ein- und Ausfuhrverboten und -beschränkungen ausgenommen.

Artikel 6

Für Waren, die für den persönlichen Bedarf der Bediensteten des Europäischen Patentamts gekauft oder eingeführt werden, wird keine Befreiung nach den Artikeln 4 und 5 gewährt.

Artikel 7

(1) Die in den Artikeln 4 und 5 angeführten, der Organisation gehörenden Waren dürfen nur zu den Bedingungen verkauft oder veräußert werden, die von den Vertragsstaaten, welche die Befreiung gewährt haben, genehmigt sind.

(2) Der Waren- und Dienstleistungsverkehr zwischen den verschiedenen Dienstgebäuden der Organisation ist von Abgaben und Beschränkungen jeder Art befreit; gegebenenfalls treffen die Vertragsstaaten geeignete Maßnahmen, um solche Abgaben zu erlassen oder zu erstatten oder um solche Beschränkungen aufzuheben.

Artikel 8

Der Versand von Veröffentlichungen und sonstigem Informationsmaterial durch oder an die Organisation unterliegt keinen Beschränkungen.

Artikel 9

Die Vertragsstaaten räumen der Organisation die devisa-rechtlichen Befreiungen ein, die zur Ausübung ihrer amtlichen Tätigkeit erforderlich sind.

Article 4

(1) Within the scope of its official activities the Organisation and its property and income shall be exempt from all direct taxes.

(2) Where substantial purchases for the exercise of its official activities, and in the price of which taxes or duties are included, are made by the Organisation, appropriate measures shall, whenever possible, be taken by the Contracting States to remit or reimburse to the Organisation the amount of such taxes or duties.

(3) No exemption shall be accorded in respect of duties and taxes which are no more than charges for public utility services.

Article 5

Goods imported or exported by the Organisation for the exercise of its official activities shall be exempt from duties and charges on import or export other than fees or taxes representing services rendered, and from all prohibitions and restrictions on import or export.

Article 6

No exemption shall be granted under Articles 4 and 5 in respect of goods purchased or imported for the personal benefit of the employees of the European Patent Office.

Article 7

(1) Goods belonging to the Organisation which have been acquired or imported under Article 4 or Article 5 shall not be sold or given away except in accordance with conditions laid down by the Contracting States which have granted the exemptions.

(2) The transfer of goods and provision of services between the various buildings of the Organisation shall be exempt from charges or restrictions of any kind; where appropriate, the Contracting States shall take all the necessary measures to remit or reimburse the amount of such charges or to lift such restrictions.

Article 8

The transmission of publications and other information material by or to the Organisation shall not be restricted in any way.

Article 9

The Contracting States shall accord the Organisation the currency exemptions which are necessary for the exercise of its official activities.

Article 4

(1) Dans le cadre de ses activités officielles, l'Organisation, ses biens et revenus sont exonérés des impôts directs.

(2) Lorsque des achats importants sont faits par l'Organisation pour l'exercice de ses activités officielles, et dont le prix comprend des droits ou des taxes, des dispositions appropriées sont prises par les Etats contractants, chaque fois qu'il est possible, en vue de la remise ou du remboursement à l'Organisation du montant des droits et taxes de cette nature.

(3) Aucune exonération n'est accordée en ce qui concerne les impôts, taxes et droits qui ne constituent que la simple rémunération de services d'utilité publique.

Article 5

Les produits importés ou exportés par l'Organisation pour l'exercice de ses activités officielles sont exonérés des droits et taxes à l'importation ou à l'exportation, autres que les redevances ou impositions représentatives de services rendus, et exemptés de toutes prohibitions et restrictions à l'importation ou à l'exportation.

Article 6

Aucune exonération n'est accordée en vertu des articles 4 et 5 en ce qui concerne les achats ou importations de biens destinés aux besoins personnels des agents de l'Office européen des brevets.

Article 7

(1) Les biens appartenant à l'Organisation, acquis ou importés conformément à l'article 4 ou à l'article 5, ne peuvent être vendus ou cédés qu'aux conditions agréées par les Etats contractants qui ont accordé les exemptions.

(2) Les transferts de biens ou les prestations de services, réalisés entre les différents bâtiments de l'Organisation, ne sont soumis à aucune imposition ni restriction ; le cas échéant, les Etats contractants prennent les mesures appropriées en vue de la remise ou du remboursement du montant de telles impositions ou en vue de la levée de telles restrictions.

Article 8

La transmission de publications et d'autres matériels d'information par l'Organisation ou à celle-ci, n'est soumise à aucune restriction.

Article 9

Les Etats contractants accordent à l'Organisation les dispenses en matière de réglementation des changes qui seraient nécessaires pour l'exercice de ses activités officielles.

PROTOKOLL ÜBER VORRECHTE UND IMMUNITÄTEN

Artikel 4

PROTOCOL ON PRIVILEGES AND IMMUNITIES

Article 4

PROTOCOLE SUR LES PRIVILÈGES ET IMMUNITÉS

Article 4

Artikel 10

(1) Bei ihrem amtlichen Nachrichtenverkehr und bei der Übermittlung aller ihrer Schriftstücke genießt die Organisation in jedem Vertragsstaat die günstigste Behandlung, die dieser Staat einer anderen internationalen Organisation gewährt.

(2) Der amtliche Nachrichtenverkehr der Organisation, gleichviel mit welchem Nachrichtenmittel, unterliegt nicht der Zensur.

Artikel 11

Die Vertragsstaaten treffen geeignete Maßnahmen, um Einreise, Aufenthalt und Ausreise der Bediensteten des Europäischen Patentamts zu erleichtern.

Artikel 12

(1) Die Vertreter der Vertragsstaaten, deren Stellvertreter, Berater oder Sachverständige genießen während der Tagungen des Verwaltungsrats oder der Tagungen anderer vom Verwaltungsrat eingesetzter Organe sowie während der Reise zum und vom Tagungs-ort folgende Vorrechte und Immunitäten:

- a) Immunität von Festnahme oder Haft sowie von der Beschlagnahme ihres persönlichen Gepäcks, außer wenn sie auf frischer Tat erlappt werden;
- b) Immunität von der Gerichtsbarkeit, auch nach Beendigung ihres Auftrags, bezüglich der von ihnen in Ausübung ihres Amtes vorgenommenen Handlungen einschließlich ihrer schriftlichen und mündlichen Äußerungen; diese Immunität gilt jedoch nicht im Fall eines Verstoßes gegen die Vorschriften über den Straßenverkehr durch eine der genannten Personen und im Fall von Schäden, die durch ein Motorfahrzeug verursacht wurden, das einer dieser Personen gehört oder von einer solchen Person gesteuert wurde;
- c) Unverletzlichkeit aller ihrer amtlichen Schriftstücke und Urkunden;
- d) das Recht, Verschlüsselungen zu verwenden sowie Urkunden oder sonstige Schriftstücke durch Sonderkurier oder in versiegelten Behältern zu empfangen;
- e) Befreiung für sich und ihre Ehegatten von allen Einreisebeschränkungen und von der Meldepflicht für Ausländer;

Article 10

(1) With regard to its official communications and the transfer of all its documents, the Organisation shall in each Contracting State enjoy the most favourable treatment accorded by that State to any other international organisation.

(2) No censorship shall be applied to official communications of the Organisation by whatever means of communication.

Article 11

The Contracting States shall take all appropriate measures to facilitate the entry, stay and departure of the employees of the European Patent Office.

Article 12

(1) Representatives of Contracting States, alternate Representatives and their advisers or experts, if any, shall enjoy, while attending meetings of the Administrative Council and of any body established by it, and in the course of their journeys to and from the place of meeting, the following privileges and immunities:

- (a) immunity from arrest or detention and from seizure of their personal luggage, except when found committing, attempting to commit, or just having committed an offence;
- (b) immunity from jurisdiction, even after the termination of their mission, in respect of acts, including words written and spoken, done by them in the exercise of their functions; this immunity shall not apply, however, in the case of a motor traffic offence committed by one of the persons referred to above, nor in the case of damage caused by a motor vehicle belonging to or driven by such a person;
- (c) inviolability for all their official papers and documents;
- (d) the right to use codes and to receive documents or correspondence by special courier or sealed bag;
- (e) exemption for themselves and their spouses from all measures restricting entry and from aliens' registration formalities;

Article 10

(1) Pour ses communications officielles et le transfert de tous ses documents, l'Organisation bénéficie, dans chaque Etat contractant, du traitement le plus favorable accordé à toute autre organisation internationale par cet Etat.

(2) Aucune censure ne peut être exercée à l'égard des communications officielles de l'Organisation, quelle que soit la voie de communication utilisée.

Article 11

Les Etats contractants prennent les mesures utiles pour faciliter l'entrée, le séjour et le départ des agents de l'Office européen des brevets.

Article 12

(1) Les représentants des Etats contractants, leurs suppléants, leurs conseillers ou experts jouissent, lors des réunions du Conseil d'administration ou de tout organe institué par ledit Conseil ainsi qu'au cours de leurs voyages à destination ou en provenance du lieu de la réunion des privilèges et immunités suivants :

a) immunité d'arrestation ou de détention, ainsi que de saisie de leurs bagages personnels, sauf en cas de flagrant délit ;

b) immunité de juridiction, même après la fin de leur mission, pour les actes, y compris leurs écrits et leurs paroles, accomplis dans l'exercice de leurs fonctions ; cette immunité ne joue cependant pas dans le cas d'une infraction à la réglementation de la circulation des véhicules automoteurs, commise par une des personnes visées ci-dessus, ou dans le cas de dommages causés par un véhicule automoteur lui appartenant ou qu'elle conduit ;

c) inviolabilité pour tous leurs papiers et documents officiels ;

d) droit de faire usage de codes et de recevoir des documents ou de la correspondance par courrier spécial ou par valises scellées ;

e) exemption pour eux-mêmes et pour leurs conjoints de toute mesure limitant l'entrée et de toutes formalités d'enregistrement d'étrangers ;

PROTOKOLL ÜBER VORRECHTE
UND IMMUNITÄTEN

Artikel 10

PROTOCOL ON PRIVILEGES AND IMMUNITIES
Article 10

PROTOCOLE SUR LES PRIVILÈGES
ET IMMUNITÉS

Article 10

f) die gleichen Erleichterungen hinsichtlich der Währungs- und Devisenvorschriften wie die Vertreter ausländischer Regierungen mit vorübergehendem amtlichen Auftrag.

(2) Die Vorrechte und Immunitäten werden den in Absatz 1 genannten Personen nicht zu ihrem persönlichen Vorteil gewährt, sondern um ihre vollständige Unabhängigkeit bei der Ausübung ihres Amtes im Zusammenhang mit der Organisation zu gewährleisten. Ein Vertragsstaat hat deshalb die Pflicht, die Immunität in allen Fällen aufzuheben, in denen sie nach Auffassung dieses Staats verhindern würde, dass der Gerechtigkeit Genüge geschieht, und in denen sie ohne Beeinträchtigung der Zwecke aufgehoben werden kann, für die sie gewährt wurde.

Artikel 13

(1) Vorbehaltlich Artikel 6 steht der Präsident des Europäischen Patentamts im Genuss der Vorrechte und Immunitäten, die Diplomaten nach dem Wiener Übereinkommen über diplomatische Beziehungen vom 18. April 1961 eingeräumt werden.

(2) Die Immunität von der Gerichtsbarkeit gilt jedoch nicht im Fall eines Verstoßes des Präsidenten des Europäischen Patentamts gegen die Vorschriften über den Straßenverkehr oder im Fall eines Schadens, der durch ein ihm gehörendes oder von ihm gesteuertes Motorfahrzeug verursacht wurde.

Artikel 14

Die Bediensteten des Europäischen Patentamts

a) genießen auch nach ihrem Ausscheiden aus dem Dienst Immunität von der Gerichtsbarkeit hinsichtlich der von ihnen in Ausübung ihres Amtes vorgenommenen Handlungen einschließlich ihrer mündlichen und schriftlichen Äußerungen; diese Immunität gilt jedoch nicht im Fall eines Verstoßes gegen die Vorschriften über den Straßenverkehr durch einen Bediensteten des Europäischen Patentamts oder eines Schadens, der durch ein ihm gehörendes oder von ihm geführtes Motorfahrzeug verursacht wurde;

b) sind von jeder Verpflichtung zum Wehrdienst befreit;

c) genießen Unverletzlichkeit aller ihrer amtlichen Schriftstücke und Urkunden;

d) genießen in Bezug auf Einwanderungsbeschränkungen und die Meldepflicht der Ausländer dieselbe Erleichterung, die allgemein den Mitgliedern des Personals internationaler Organisationen gewährt wird; das Gleiche gilt für die in ihrem Haushalt lebenden Familienangehörigen;

e) genießen in Bezug auf Devisenvorschriften dieselben Vorrechte, die allgemein den Mitgliedern des Personals internationaler Organisationen gewährt werden;

(f) the same facilities in the matter of currency and exchange control as are accorded to the representatives of foreign Governments on temporary official missions.

(2) Privileges and immunities are accorded to the persons referred to in paragraph 1, not for their personal advantage but in order to ensure complete independence in the exercise of their functions in connection with the Organisation. Consequently, a Contracting State has the duty to waive the immunity in all cases where, in the opinion of that State, such immunity would impede the course of justice and where it can be waived without prejudicing the purposes for which it was accorded.

Article 13

(1) Subject to the provisions of Article 6, the President of the European Patent Office shall enjoy the privileges and immunities accorded to diplomatic agents under the Vienna Convention on Diplomatic Relations of 18 April 1961.

(2) However, immunity from jurisdiction shall not apply in the case of a motor traffic offence committed by the President of the European Patent Office or damage caused by a motor vehicle belonging to or driven by him.

Article 14

The employees of the European Patent Office:

(a) shall, even after their service has terminated, have immunity from jurisdiction in respect of acts, including words written and spoken, done in the exercise of their functions; this immunity shall not apply, however, in the case of a motor traffic offence committed by an employee of the European Patent Office, nor in the case of damage caused by a motor vehicle belonging to or driven by an employee;

(b) shall be exempt from all obligations in respect of military service;

(c) shall enjoy inviolability for all their official papers and documents;

(d) shall enjoy the same facilities as regards exemption from all measures restricting immigration and governing aliens' registration as are normally accorded to staff members of international organisations, as shall members of their families forming part of their household;

(e) shall enjoy the same privileges in respect of exchange regulations as are normally accorded to the staff members of international organisations;

f) mêmes facilités, en ce qui concerne les réglementations monétaires ou de change, que celles accordées aux représentants de gouvernements étrangers en mission officielle temporaire.

(2) Les privilèges et immunités sont accordés aux personnes visées au paragraphe premier, non à leur avantage personnel, mais dans le but d'assurer en toute indépendance l'exercice de leurs fonctions en rapport avec l'Organisation. Par conséquent, un Etat contractant a le devoir de lever l'immunité dans tous les cas où, à son avis, l'immunité entraverait l'action de la justice et où elle peut être levée sans compromettre les fins pour lesquelles elle a été accordée.

Article 13

(1) Sous réserve des dispositions de l'article 6, le Président de l'Office européen des brevets jouit des privilèges et immunités reconnus aux agents diplomatiques en vertu de la Convention de Vienne sur les relations diplomatiques du 18 avril 1961.

(2) Toutefois, l'immunité de juridiction ne joue pas dans le cas d'infraction à la réglementation en matière de circulation des véhicules automoteurs commise par le Président de l'Office européen des brevets ou de dommage causé par un véhicule automoteur lui appartenant ou qu'il conduit.

Article 14

Les agents de l'Office européen des brevets :

a) jouissent, même lorsqu'ils ont cessé d'exercer leurs fonctions, de l'immunité de juridiction pour les actes, y compris les paroles et écrits, accomplis dans l'exercice de leurs fonctions ; cette immunité ne joue cependant pas dans le cas d'infraction à la réglementation de la circulation des véhicules automoteurs, commise par un agent de l'Office, ou de dommage causé par un véhicule automoteur lui appartenant ou qu'il conduit ;

b) sont exempts de toute obligation relative au service militaire ;

c) jouissent de l'inviolabilité pour tous leurs papiers et documents officiels ;

d) jouissent, avec les membres de leur famille vivant à leur foyer, des mêmes exceptions aux dispositions limitant l'immigration et réglant l'enregistrement des étrangers, que celles généralement reconnues aux membres du personnel des organisations internationales ;

e) jouissent, en ce qui concerne les réglementations de change, des mêmes privilèges que ceux généralement reconnus aux membres du personnel des organisations internationales ;

PROTOKOLL ÜBER VORRECHTE UND IMMUNITÄTEN *Artikel 13*

PROTOCOL ON PRIVILEGES AND IMMUNITIES *Article 13*

PROTOCOLE SUR LES PRIVILÈGES ET IMMUNITÉS *Article 13*

f) genießen im Fall einer internationalen Krise dieselben Erleichterungen bei der Rückführung in ihren Heimatstaat wie die Diplomaten; das Gleiche gilt für die in ihrem Haushalt lebenden Familienangehörigen;

g) haben das Recht, ihre Wohnungseinrichtung und ihre persönlichen Gebrauchsgegenstände bei Antritt ihres Dienstes in dem betreffenden Staat zollfrei einzuführen und bei Beendigung ihres Dienstes in diesem Staat zollfrei wieder auszuführen, vorbehaltlich der Bedingungen, welche die Regierung des Staats, in dem dieses Recht ausgeübt wird, jeweils für erforderlich hält, und mit Ausnahme der Güter, die in diesem Staat erworben wurden und dort einem Ausfuhrverbot unterliegen.

Artikel 15

Sachverständige genießen bei der Ausübung ihrer Tätigkeit für die Organisation oder bei der Ausführung von Aufträgen für diese die nachstehenden Vorrechte und Immunitäten, soweit sie für die Ausübung ihrer Tätigkeiten notwendig sind, und zwar auch während der Reisen, die in Ausübung ihrer Tätigkeit oder zur Durchführung ihres Auftrags ausgeführt werden:

a) Immunität von der Gerichtsbarkeit hinsichtlich der von ihnen in Ausübung ihres Amtes vorgenommenen Handlungen einschließlich ihrer mündlichen und schriftlichen Äußerungen, außer im Fall eines Verstoßes gegen die Vorschriften über den Straßenverkehr durch einen Sachverständigen oder im Fall eines Schadens, der durch ein ihm gehörendes oder von ihm geführtes Motorfahrzeug verursacht wurde; die Sachverständigen genießen diese Immunität auch nach Beendigung ihrer Tätigkeit bei der Organisation;

b) Unverletzlichkeit aller ihrer amtlichen Schriftstücke und Urkunden;

c) die zur Überweisung ihrer Bezüge erforderlichen devisarechtlichen Befreiungen.

Artikel 16

(1) Die in den Artikeln 13 und 14 genannten Personen sind für die von der Organisation gezahlten Gehälter und Bezüge nach Maßgabe der Bedingungen und Regeln, die der Verwaltungsrat innerhalb eines Jahres nach Inkrafttreten des Übereinkommens festlegt, zu Gunsten der Organisation steuerpflichtig. Von diesem Zeitpunkt an sind diese Gehälter und Bezüge von der staatlichen Einkommensteuer befreit. Die Vertragsstaaten können jedoch die befreiten Gehälter und Bezüge bei der Festsetzung des auf Einkommen aus anderen Quellen zu erhebenden Steuerbetrags berücksichtigen.

(2) Absatz 1 ist auf Renten und Ruhegehälter, die von der Organisation an ehemalige Bedienstete des Europäischen Patentamts gezahlt werden, nicht anzuwenden.

(f) shall enjoy the same facilities as to repatriation as diplomatic agents in time of international crises, as shall the members of their families forming part of their household;

(g) shall have the right to import duty-free their furniture and personal effects at the time of first taking up their post in the State concerned and the right on the termination of their functions in that State to export free of duty their furniture and personal effects, subject to the conditions considered necessary by the Government of the State in whose territory the right is exercised and with the exception of property acquired in that State which is subject to an export prohibition therein.

Article 15

Experts performing functions on behalf of, or carrying out missions for, the Organisation shall enjoy the following privileges and immunities, to the extent that they are necessary for the carrying out of their functions, including during journeys made in carrying out their functions and in the course of such missions:

(a) immunity from jurisdiction in respect of acts done by them in the exercise of their functions, including words written or spoken, except in the case of a motor traffic offence committed by an expert or in the case of damage caused by a motor vehicle belonging to or driven by him; experts shall continue to enjoy this immunity after they have ceased to be employed by the Organisation;

(b) inviolability for all their official papers and documents;

(c) the exchange facilities necessary for the transfer of their remuneration.

Article 16

(1) The persons referred to in Articles 13 and 14 shall be subject to a tax for the benefit of the Organisation on salaries and emoluments paid by the Organisation, subject to the conditions and rules laid down by the Administrative Council within a period of one year from the date of the entry into force of the Convention. From the date on which this tax is applied, such salaries and emoluments shall be exempt from national income tax. The Contracting States may, however, take into account the salaries and emoluments thus exempt when assessing the amount of tax to be applied to income from other sources.

(2) Paragraph 1 shall not apply to pensions and annuities paid by the Organisation to the former employees of the European Patent Office.

f) jouissent, en période de crise internationale, ainsi que les membres de leur famille vivant à leur foyer, des mêmes facilités de rapatriement que les agents diplomatiques ;

g) jouissent du droit d'importer en franchise de douane leur mobilier et leurs effets personnels, à l'occasion de leur première installation dans l'Etat intéressé, et du droit, à la cessation de leurs fonctions dans ledit Etat, d'exporter en franchise leur mobilier et leurs effets personnels, sous réserve des conditions jugées nécessaires par le gouvernement de l'Etat sur le territoire duquel le droit est exercé et à l'exception des biens acquis dans cet Etat qui font l'objet, dans celui-ci, d'une prohibition d'exportation.

Article 15

Les experts exerçant des fonctions pour le compte de l'Organisation ou accomplissant des missions pour celle-ci, jouissent des privilèges et immunités ci-après dans la mesure où ils leur sont nécessaires pour l'exercice de leurs fonctions, y compris durant les voyages effectués dans l'exercice de leurs fonctions ou au cours de ces missions :

a) immunité de juridiction pour les actes accomplis dans l'exercice de leurs fonctions, y compris leurs paroles et écrits, sauf dans le cas d'infraction à la réglementation de la circulation des véhicules automoteurs commise par un expert ou de dommage causé par un véhicule automobile lui appartenant ou qu'il conduit ; les experts continueront à bénéficier de cette immunité après la cessation de leurs fonctions auprès de l'Organisation ;

b) inviolabilité pour tous leurs papiers et documents officiels ;

c) facilités de change nécessaires au transfert de leurs rémunérations.

Article 16

(1) Dans les conditions et selon les modalités que le Conseil d'administration fixe dans un délai d'un an à compter de l'entrée en vigueur de la convention, les personnes visées aux articles 13 et 14 seront soumises, au profit de l'Organisation, à un impôt sur les traitements et salaires qui leur sont versés par l'Organisation. A compter de cette date, ces traitements et salaires sont exempts de l'impôt national sur le revenu. Toutefois, les Etats contractants peuvent tenir compte de ces traitements et salaires pour le calcul de l'impôt payable sur les revenus provenant d'autres sources.

(2) Les dispositions du paragraphe premier ne s'appliquent pas aux pensions et retraites payées par l'Organisation aux anciens agents de l'Office européen des brevets.

PROTOKOLL ÜBER VORRECHTE UND IMMUNITÄTEN *Artikel 15*

PROTOCOL ON PRIVILEGES AND IMMUNITIES *Article 15*

PROTOCOLE SUR LES PRIVILÈGES ET IMMUNITÉS *Article 15*

Artikel 17

Der Verwaltungsrat bestimmt die Gruppen von Bediensteten, auf die Artikel 14 ganz oder teilweise und Artikel 16 anzuwenden sind, sowie die Gruppen von Sachverständigen, auf die Artikel 15 anzuwenden ist. Die Namen, Dienstbezeichnungen und Anschriften der zu diesen Gruppen gehörenden Bediensteten und Sachverständigen werden den Vertragsstaaten von Zeit zu Zeit mitgeteilt.

Artikel 18

Vorbehaltlich von Abkommen, die nach Artikel 25 mit den Vertragsstaaten geschlossen werden, sind die Organisation und die Bediensteten des Europäischen Patentamts von sämtlichen Pflichtbeiträgen an staatliche Sozialversicherungsträger befreit, sofern die Organisation ein eigenes Sozialversicherungssystem errichtet.

Artikel 19

(1) Die in diesem Protokoll vorgesehenen Vorrechte und Immunitäten sind nicht dazu bestimmt, den Bediensteten des Europäischen Patentamts oder den Sachverständigen, die für die Organisation oder in deren Auftrag tätig sind, persönliche Vorteile zu verschaffen. Sie sind lediglich zu dem Zweck vorgesehen, unter allen Umständen die ungehinderte Tätigkeit der Organisation und die vollständige Unabhängigkeit der Personen, denen sie gewährt werden, zu gewährleisten.

(2) Der Präsident des Europäischen Patentamts hat die Pflicht, eine Immunität aufzuheben, wenn sie nach seiner Ansicht verhindern würde, dass der Gerechtigkeit Genüge geschieht, und wenn sie ohne Beeinträchtigung der Interessen der Organisation aufgehoben werden kann. Aus den gleichen Gründen kann der Verwaltungsrat eine Immunität des Präsidenten aufheben.

Artikel 20

(1) Die Organisation wird jederzeit mit den zuständigen Behörden der Vertragsstaaten zusammenarbeiten, um die Rechtspflege zu erleichtern, die Einhaltung der Vorschriften über Sicherheit und Ordnung sowie über den Gesundheits- und Arbeitsschutz und ähnlicher staatlicher Rechtsvorschriften zu gewährleisten und jeden Missbrauch der in diesem Protokoll vorgesehenen Vorrechte, Immunitäten und Erleichterungen zu verhindern.

(2) Die Einzelheiten der in Absatz 1 genannten Zusammenarbeit können in den in Artikel 25 genannten Ergänzungsabkommen festgelegt werden.

Artikel 21

Jeder Vertragsstaat behält das Recht, alle im Interesse seiner Sicherheit notwendigen Vorsichtsmaßnahmen zu ergreifen.

Article 17

The Administrative Council shall decide the categories of employees to whom the provisions of Article 14, in whole or in part, and Article 16 shall apply and the categories of experts to whom the provisions of Article 15 shall apply. The names, titles and addresses of the employees and experts included in such categories shall be communicated from time to time to the Contracting States.

Article 18

In the event of the Organisation establishing its own social security scheme, the Organisation and the employees of the European Patent Office shall be exempt from all compulsory contributions to national social security schemes, subject to the agreements made with the Contracting States in accordance with the provisions of Article 25.

Article 19

(1) The privileges and immunities provided for in this Protocol are not designed to give to employees of the European Patent Office or experts performing functions for or on behalf of the Organisation personal advantage. They are provided solely to ensure, in all circumstances, the unimpeded functioning of the Organisation and the complete independence of the persons to whom they are accorded.

(2) The President of the European Patent Office has the duty to waive immunity where he considers that such immunity prevents the normal course of justice and that it is possible to dispense with such immunity without prejudicing the interests of the Organisation. The Administrative Council may waive immunity of the President for the same reasons.

Article 20

(1) The Organisation shall co-operate at all times with the competent authorities of the Contracting States in order to facilitate the proper administration of justice, to ensure the observance of police regulations and regulations concerning public health, labour inspection or other similar national legislation, and to prevent any abuse of the privileges, immunities and facilities provided for in this Protocol.

(2) The procedure of co-operation mentioned in paragraph 1 may be laid down in the complementary agreements referred to in Article 25.

Article 21

Each Contracting State retains the right to take all precautions necessary in the interests of its security.

Article 17

Le Conseil d'administration détermine les catégories d'agents auxquels s'appliquent les dispositions de l'article 14, en tout ou en partie, ainsi que les dispositions de l'article 16 et les catégories d'experts auxquels s'appliquent les dispositions de l'article 15. Les noms, qualités et adresses des agents et experts compris dans ces catégories sont communiquées périodiquement aux Etats contractants.

Article 18

L'Organisation et les agents de l'Office européen des brevets sont exempts de toutes contributions obligatoires à des organismes nationaux de prévoyance sociale, au cas où l'Organisation établirait son propre système de prévoyance sociale, sous réserve des accords à passer avec les Etats contractants, conformément aux dispositions de l'article 25.

Article 19

(1) Les privilèges et immunités prévus par le présent protocole ne sont pas établis en vue d'accorder aux agents de l'Office européen des brevets ou aux experts exerçant des fonctions au profit ou pour le compte de l'Organisation des avantages personnels. Ils sont institués uniquement afin d'assurer, en toutes circonstances, le libre fonctionnement de l'Organisation et la complète indépendance des personnes auxquelles ils sont accordés.

(2) Le Président de l'Office européen des brevets a le devoir de lever l'immunité lorsqu'il estime qu'elle empêche le jeu normal de la justice et qu'il est possible d'y renoncer sans porter atteinte aux intérêts de l'Organisation. Le Conseil d'administration peut, pour les mêmes raisons, lever l'une des immunités accordées au Président.

Article 20

(1) L'Organisation coopère en tout temps avec les autorités compétentes des Etats contractants, en vue de faciliter une bonne administration de la justice, d'assurer l'observation des règlements de police et de ceux concernant la santé publique et l'inspection du travail, ou autres lois nationales de nature analogue, et empêcher tout abus des privilèges, immunités et facilités prévus par le présent protocole.

(2) La procédure de coopération mentionnée au paragraphe premier pourra être précisée dans les accords complémentaires visés à l'article 25.

Article 21

Chaque Etat contractant conserve le droit de prendre toutes les mesures nécessaires dans l'intérêt de sa sécurité.

PROTOKOLL ÜBER VORRECHTE
UND IMMUNITÄTEN

Artikel 17

PROTOCOL ON PRIVILEGES AND IMMUNITIES
Article 17

PROTOCOLE SUR LES PRIVILÈGES
ET IMMUNITÉS

Article 17

Artikel 22

Ein Vertragsstaat ist nicht verpflichtet, die in den Artikeln 12, 13, 14 Buchstaben b, e und g sowie in Artikel 15 Buchstabe c bezeichneten Vorrechte und Immunitäten zu gewähren:

- a) seinen eigenen Staatsangehörigen;
- b) Personen, die bei Aufnahme ihrer Tätigkeit bei der Organisation ihren ständigen Wohnsitz in diesem Staat haben und nicht Bedienstete einer anderen zwischenstaatlichen Organisation sind, deren Personal in die Organisation übernommen wird.

Artikel 23

(1) Jeder Vertragsstaat kann einem internationalen Schiedsgericht jede Streitigkeit unterbreiten, die sich auf die Organisation oder einen Bediensteten oder Sachverständigen, der für die Organisation oder in deren Auftrag tätig ist, bezieht, soweit die Organisation oder die Bediensteten und Sachverständigen ein Vorrecht oder eine Immunität nach diesem Protokoll in Anspruch genommen haben und diese Immunität nicht aufgehoben worden ist.

(2) Hat ein Vertragsstaat die Absicht, eine Streitigkeit einem Schiedsgericht zu unterbreiten, so notifiziert er dies dem Präsidenten des Verwaltungsrats; dieser unterrichtet sofort jeden Vertragsstaat von der Notifikation.

(3) Das Verfahren nach Absatz 1 ist auf Streitigkeiten zwischen der Organisation und den Bediensteten oder Sachverständigen über das Statut oder die Beschäftigungsbedingungen oder, was die Bediensteten anbelangt, über die Versorgungsordnung nicht anzuwenden.

(4) Gegen den Spruch des Schiedsgerichts, der endgültig und für die Parteien bindend ist, kann ein Rechtsmittel nicht eingelegt werden. Im Fall einer Streitigkeit über Sinn und Tragweite des Schiedsspruchs obliegt es dem Schiedsgericht, den Spruch auf Antrag einer Partei auszulegen.

Artikel 24

(1) Das in Artikel 23 genannte Schiedsgericht besteht aus drei Mitgliedern; ein Schiedsrichter wird von dem Staat oder den Staaten, die Parteien des Schiedsverfahrens sind, ein weiterer vom Verwaltungsrat ernannt; diese beiden Schiedsrichter ernennen einen dritten Schiedsrichter, der als Obmann tätig wird.

(2) Die Schiedsrichter werden aus einem Verzeichnis ausgewählt, das höchstens sechs von jedem Vertragsstaat und sechs vom Verwaltungsrat benannte Schiedsrichter umfasst. Dieses Verzeichnis wird so bald wie möglich nach Inkrafttreten dieses Protokolls erstellt und in der Folge je nach Bedarf geändert.

Article 22

No Contracting State is obliged to extend the privileges and immunities referred to in Article 12, Article 13, Article 14, sub-paragraphs (b), (e) and (g), and Article 15, sub-paragraph (c), to:

- (a) its own nationals;
- (b) any person who at the time of taking up his functions with the Organisation has his permanent residence in that State and is not an employee of any other inter-governmental organisation whose staff is incorporated into the Organisation.

Article 23

(1) Any Contracting State may submit to an international arbitration tribunal any dispute concerning the Organisation or an employee of the European Patent Office or an expert performing functions for or on its behalf, in so far as the Organisation or the employees and experts have claimed a privilege or an immunity under this Protocol in circumstances where that immunity has not been waived.

(2) If a Contracting State intends to submit a dispute to arbitration, it shall notify the Chairman of the Administrative Council, who shall forthwith inform each Contracting State of such notification.

(3) The procedure laid down in paragraph 1 of this Article shall not apply to disputes between the Organisation and the employees or experts in respect of the Service Regulations or conditions of employment or, with regard to the employees, the Pension Scheme Regulations.

(4) No appeal shall lie against the award of the arbitration tribunal, which shall be final; it shall be binding on the parties. In case of dispute concerning the import or scope of the award, it shall be incumbent upon the arbitration tribunal to interpret it on request by either party.

Article 24

(1) The arbitration tribunal referred to in Article 23 shall consist of three members, one arbitrator nominated by the State or States party to the arbitration, one arbitrator nominated by the Administrative Council and a third arbitrator, who shall be the chairman, nominated by the said two arbitrators.

(2) The arbitrators shall be nominated from a panel comprising no more than six arbitrators appointed by each Contracting State and six arbitrators appointed by the Administrative Council. This panel shall be established as soon as possible after the Protocol enters into force and shall be revised each time this proves necessary.

Article 22

Aucun Etat contractant n'est tenu d'accorder les privilèges et immunités mentionnés aux articles 12, 13, 14 lettres b), e) et g), et 15 lettre c)

- a) à ses propres nationaux ;
- b) aux personnes qui, lors de leur entrée en fonctions auprès de l'Organisation, ont leur résidence permanente dans cet Etat et ne sont pas agents d'une autre organisation intergouvernementale dont le personnel est incorporé à l'Organisation.

Article 23

(1) Chaque Etat contractant peut soumettre à un Tribunal d'arbitrage international tout différend mettant en cause l'Organisation, ou les agents ou experts exerçant des fonctions au profit ou pour le compte de l'Organisation, dans la mesure où celle-ci, ces agents ou experts ont revendiqué un privilège ou une immunité en vertu du présent protocole, dans les cas où il n'a pas été renoncé à cette immunité.

(2) Si un Etat contractant a l'intention de soumettre un différend à l'arbitrage, il le notifie au président du Conseil d'administration qui informe immédiatement chaque Etat contractant de cette notification.

(3) La procédure prévue au paragraphe premier n'est pas applicable aux différends entre l'Organisation et les agents ou experts au sujet du statut ou des conditions d'emploi ainsi que, pour les agents, au sujet du règlement des pensions.

(4) La sentence du Tribunal d'arbitrage est définitive et sans recours ; les parties s'y conformeront. En cas de contestation sur le sens et la portée de la sentence, il appartient au Tribunal d'arbitrage de l'interpréter à la demande de toute partie.

Article 24

(1) Le Tribunal d'arbitrage prévu à l'article 23 est composé de trois membres, un arbitre nommé par l'Etat, ou les Etats, partie à l'arbitrage, un arbitre nommé par le Conseil d'administration et un troisième arbitre, qui assume la présidence, nommé par les deux premiers.

(2) Ces arbitres sont choisis sur une liste comprenant six arbitres au plus désignés par chaque Etat contractant et six arbitres désignés par le Conseil d'administration. Cette liste est établie dès que possible après l'entrée en vigueur du présent protocole et, par la suite, complétée, le cas échéant, en tant que de besoin.

PROTOKOLL ÜBER VORRECHTE
UND IMMUNITÄTEN

Artikel 22

PROTOCOL ON PRIVILEGES AND IMMUNITIES
Article 22

PROTOCOLE SUR LES PRIVILÈGES
ET IMMUNITÉS

Article 22

(3) Nimmt eine Partei innerhalb von drei Monaten nach der in Artikel 23 Absatz 2 genannten Notifizierung die in Absatz 1 vorgesehene Ernennung nicht vor, so wird der Schiedsrichter auf Antrag der anderen Partei vom Präsidenten des Internationalen Gerichtshofs aus dem Kreis der in dem Verzeichnis aufgeführten Personen bestimmt. Das Gleiche geschieht auf Antrag der zuerst handelnden Partei, wenn innerhalb eines Monats nach der Ernennung des zweiten Schiedsrichters die beiden ersten Schiedsrichter sich nicht über die Ernennung des dritten einigen können. Ist jedoch in diesen beiden Fällen der Präsident des Internationalen Gerichtshofs verhindert, die Wahl zu treffen, oder ist er Angehöriger eines an der Streitigkeit beteiligten Staats, so nimmt der Vizepräsident des Internationalen Gerichtshofs die erwähnten Ernennungen vor, sofern er nicht selbst Angehöriger eines an der Streitigkeit beteiligten Staats ist; im letztgenannten Fall obliegt es dem Mitglied des Internationalen Gerichtshofs, das nicht selbst Angehöriger eines an der Streitigkeit beteiligten Staats ist und das vom Präsidenten oder Vizepräsidenten ausgewählt worden ist, die Ernennung vorzunehmen. Ein Angehöriger des antragstellenden Staats kann nicht für den Posten des Schiedsrichters gewählt werden, dessen Ernennung dem Verwaltungsrat oblag, und eine auf Vorschlag des Verwaltungsrats in das Verzeichnis aufgenommene Person kann nicht für den Posten des Schiedsrichters gewählt werden, dessen Ernennung dem antragstellenden Staat oblag. Die diesen beiden Gruppen angehörenden Personen können auch nicht zum Obmann des Schiedsgerichts gewählt werden.

(4) Das Schiedsgericht gibt sich eine Verfahrensordnung.

Artikel 25

Die Organisation kann auf Beschluss des Verwaltungsrats mit einem oder mehreren Vertragsstaaten Ergänzungsabkommen zur Durchführung dieses Protokolls in ihren Beziehungen mit diesem Staat oder diesen Staaten sowie sonstige Vereinbarungen schließen, um eine wirksame Tätigkeit der Organisation und den Schutz ihrer Interessen zu gewährleisten.

(3) If, within three months from the date of the notification referred to in Article 23, paragraph 2, either party fails to make the nomination referred to in paragraph 1 above, the choice of the arbitrator shall, on request of the other party, be made by the President of the International Court of Justice from the persons included in the said panel. This shall also apply, when so requested by either party, if within one month from the date of appointment of the second arbitrator, the first two arbitrators are unable to agree on the nomination of the third arbitrator. However, if, in these two cases, the President of the International Court of Justice is prevented from making the choice, or if he is a national of one of the States parties to the dispute, the Vice-President of the International Court of Justice shall make the aforementioned appointments, provided that he himself is not a national of one of the States parties to the dispute; if such is the case, the member of the International Court of Justice who is not a national of one of the States parties to the dispute and who has been chosen by the President or Vice-President shall make the appointments. A national of the State applying for arbitration may not be chosen to fill the post of the arbitrator whose appointment devolves on the Administrative Council nor may a person included in the panel and appointed by the Administrative Council be chosen to fill the post of an arbitrator whose appointment devolves on the State which is the claimant. Nor may a person of either of these categories be chosen as chairman of the Tribunal.

(4) The arbitration tribunal shall draw up its own rules of procedure.

Article 25

The Organisation may, on a decision of the Administrative Council, conclude with one or more Contracting States complementary agreements to give effect to the provisions of this Protocol as regards such State or States, and other arrangements to ensure the efficient functioning of the Organisation and the safeguarding of its interests.

(3) Si, dans un délai de trois mois après la notification mentionnée à l'article 23, paragraphe 2, l'une des parties s'abstient de procéder à la nomination prévue au paragraphe premier, le choix de l'arbitre est effectué, sur la requête de l'autre partie, par le Président de la Cour Internationale de Justice parmi les personnes figurant sur ladite liste. Il en est de même, à la requête de la partie la plus diligente, lorsque, dans un délai d'un mois à compter de la nomination du deuxième arbitre, les deux premiers arbitres ne parviennent pas à s'entendre sur la nomination du troisième. Toutefois, dans ces deux cas, si le Président de la Cour Internationale de Justice est empêché d'effectuer le choix ou s'il est ressortissant de l'un des Etats parties au différend, le Vice-Président de la Cour Internationale procède aux nominations susvisées, à moins qu'il ne soit lui-même ressortissant de l'un des Etats parties au différend : dans cette dernière hypothèse il appartient au membre de la Cour Internationale, qui n'est pas lui-même ressortissant de l'un des Etats parties au différend et qui a été choisi par le Président ou le Vice-Président, de procéder aux nominations. Un ressortissant de l'Etat demandeur ne peut être choisi pour occuper le siège de l'arbitre dont la nomination incombait au Conseil d'administration, ni une personne inscrite sur la liste par désignation du Conseil d'administration choisie pour occuper le siège de l'arbitre dont la nomination incombait à l'Etat demandeur. Les personnes appartenant à ces deux catégories ne peuvent pas davantage être choisies pour assumer la présidence du Tribunal.

(4) Le Tribunal d'arbitrage établit ses règles de procédure.

Article 25

L'Organisation peut, sur décision du Conseil d'administration conclure, avec un ou plusieurs Etats contractants, des accords complémentaires en vue de l'exécution des dispositions du présent protocole, en ce qui concerne ce ou ces Etats, ainsi que d'autres arrangements en vue d'assurer le bon fonctionnement de l'Organisation et la sauvegarde de ses intérêts.

PROTOKOLL ÜBER VORRECHTE UND IMMUNITÄTEN *Artikel 25*

PROTOCOL ON PRIVILEGES AND IMMUNITIES *Article 25*

PROTOCOLE SUR LES PRIVILÈGES ET IMMUNITÉS *Article 25*

**PROTOKOLL ÜBER DEN PERSONALBESTAND DES
EUROPÄISCHEN PATENTAMTS IN DEN HAAG
(PERSONALSTANDSPROTOKOLL)**

vom 29. November 2000

**PROTOCOL ON THE STAFF COMPLEMENT
OF THE EUROPEAN PATENT OFFICE AT THE HAGUE
(PROTOCOL ON THE STAFF COMPLEMENT)**

of 29 November 2000

**PROTOCOLE SUR LES EFFECTIFS
DE L'OFFICE EUROPEEN DES BREVETS A LA HAYE
(PROTOCOLE SUR LES EFFECTIFS)**

du 29 novembre 2000

Die Europäische Patentorganisation gewährleistet, dass der Anteil der Planstellen des Europäischen Patentamts, der nach dem Organisations- und Stellenplan für das Jahr 2000 auf den Dienstort Den Haag entfällt, im Wesentlichen unverändert bleibt. Eine Änderung der Zahl der auf den Dienstort Den Haag entfallenden Planstellen, die im Interesse des guten Funktionierens des Europäischen Patentamts erforderlich wird und eine Abweichung von dem oben genannten Anteil um mehr als zehn Prozent zur Folge hat, bedarf eines Beschlusses des Verwaltungsrats der Organisation auf Vorschlag des Präsidenten des Europäischen Patentamts nach Konsultation mit den Regierungen der Bundesrepublik Deutschland und des Königreichs der Niederlande.¹

The European Patent Organisation shall ensure that the proportion of European Patent Office posts assigned to the duty station at The Hague as defined under the 2000 establishment plan and table of posts remains substantially unchanged. Any change in the number of posts assigned to the duty station at The Hague resulting in a deviation of more than ten per cent of that proportion, which proves necessary for the proper functioning of the European Patent Office, shall be subject to a decision by the Administrative Council of the Organisation on a proposal from the President of the European Patent Office after consultation with the Governments of the Federal Republic of Germany and the Kingdom of the Netherlands.¹

¹ In das Europäische Patentübereinkommen als dessen Bestandteil aufgenommen durch die Akte zur Revision des Europäischen Patentübereinkommens vom 29.11.2000 und vorläufig anwendbar ab 29.11.2000 (ABI. EPA 2001, Sonderausgabe Nr. 4).

¹ Annexed to the European Patent Convention as an integral part thereof by the Act revising the European Patent Convention of 29.11.2000 and provisionally applicable as of 29.11.2000 (OJ EPO 2001, Special edition No. 4).

L'Organisation européenne des brevets garantit que la proportion des emplois de l'Office européen des brevets assignée au département de La Haye, telle que définie dans l'organigramme des emplois et le tableau des effectifs pour l'an 2000, demeure pour l'essentiel inchangée. Toute modification du nombre des emplois assignés au département de La Haye se traduisant par un écart de plus de dix pour cent par rapport à cette proportion, qui se révèle nécessaire pour assurer le bon fonctionnement de l'Office européen des brevets, requiert une décision du Conseil d'administration de l'Organisation, prise sur proposition du Président de l'Office européen des brevets, après consultation des gouvernements de la République fédérale d'Allemagne et du Royaume des Pays-Bas.¹

DER VERWALTUNGSRAT DER EUROPÄISCHEN
PATENTORGANISATION -

GESTÜTZT auf das Europäische Patentübereinkommen, insbesondere auf Artikel 33 Absatz 2 Buchstabe d -

GIBT SICH HIERMIT FOLGENDE GEBÜHREN-
ORDNUNG:

Artikel 1

Allgemeines

Nach den Vorschriften dieser Gebührenordnung werden erhoben:

a) die gemäß dem Übereinkommen und seiner Ausführungsordnung an das Europäische Patentamt (nachstehend Amt genannt) zu entrichtenden Gebühren sowie die Gebühren und Auslagen, die der Präsident des Amts auf Grund des Artikels 3 Absatz 1 festsetzt;

b) die Gebühren und Auslagen nach dem Vertrag über die internationale Zusammenarbeit auf dem Gebiet des Patentwesens (PCT), deren Höhe vom Amt festgesetzt werden kann.

Artikel 2¹

Im Übereinkommen und seiner Ausführungsordnung vorgesehene Gebühren

Die nach Artikel 1 an das Amt zu entrichtenden Gebühren werden wie folgt festgesetzt:

EUR

- | | |
|--|-----|
| 1. Anmeldegebühr (Artikel 78 Absatz 2), nationale Grundgebühr (Regel 106 Buchstabe a), wenn | |
| - die europäische Patentanmeldung oder, im Falle einer internationalen Anmeldung, das Formblatt für den Eintritt in die europäische Phase (E-PA Form 1200) online eingereicht wird | 95 |
| - die europäische Patentanmeldung oder, im Falle einer internationalen Anmeldung, das Formblatt für den Eintritt in die europäische Phase (E-PA Form 1200) auf Papier eingereicht wird | 170 |

THE ADMINISTRATIVE COUNCIL OF THE
EUROPEAN PATENT ORGANISATION,

HAVING REGARD to the European Patent Convention and in particular Article 33, paragraph 2(d), thereof,

HAS ADOPTED THE FOLLOWING RULES RELATING
TO FEES:

Article 1

General

The following shall be levied in accordance with the provisions contained in these Rules:

(a) fees due to be paid to the European Patent Office (hereinafter referred to as the Office) as provided for in the Convention and in the Implementing Regulations and the fees and costs which the President of the Office lays down pursuant to Article 3, paragraph 1;

(b) fees and costs pursuant to the Patent Cooperation Treaty (hereinafter referred to as the PCT), the amounts of which may be fixed by the Office.

Article 2¹

Fees provided for in the Convention and in the Implementing Regulations

The fees due to be paid to the Office under Article 1 shall be as follows:

EUR

- | | |
|---|-----|
| 1. Filing fee (Article 78, paragraph 2); national basic fee (Rule 106(a)) where | |
| - the European patent application or, in the case of an international application, the form for entry into the European phase (EPO Form 1200) is filed online | 95 |
| - the European patent application or, in the case of an international application, the form for entry into the European phase (EPO Form 1200) is filed on paper | 170 |

¹ Zuletzt geändert durch den Beschluss des Verwaltungsrats vom 15.12.2005, Tag des Inkrafttretens: 01.04.2006 (ABI. EPA 2006, 8 ff.).

¹ Last amended by decision of the Administrative Council of 15.12.2005, date of entry into force: 01.04.2006 (OJ EPO 2006, 8 ff.).

LE CONSEIL D'ADMINISTRATION DE L'ORGANISATION EUROPÉENNE DES BREVETS,

VU la Convention sur le brevet européen et notamment son article 33, paragraphe 2, lettre d),

ARRÊTE LE RÈGLEMENT RELATIF AUX TAXES SUIVANT :

Article premier

Disposition générale

Sont perçues conformément aux dispositions du présent règlement :

- a) les taxes à payer à l'Office européen des brevets, ci-après dénommé l'Office, en vertu de la Convention et de son règlement d'exécution, ainsi que les taxes et frais que le Président de l'Office fixe en vertu de l'article 3, paragraphe 1,
- b) les taxes et frais au titre du Traité de coopération en matière de brevets (PCT) dont l'Office peut fixer le montant.

Article 2¹

Taxes prévues dans la Convention et dans son règlement d'exécution

Les taxes à payer à l'Office en vertu de l'article premier sont fixées comme suit :

EUR

- | | |
|---|-----|
| 1. Taxe de dépôt (article 78, paragraphe 2) ; taxe nationale de base (règle 106, lettre a)) lorsque | |
| - la demande de brevet européen ou, dans le cas d'une demande internationale, le formulaire d'entrée dans la phase européenne (formulaire OEB 1200) est déposé en ligne | 95 |
| - la demande de brevet européen ou, dans le cas d'une demande internationale, le formulaire d'entrée dans la phase européenne (formulaire OEB 1200) est déposé sur papier | 170 |

¹ Modifié en dernier lieu par la décision du Conseil d'administration en date du 15.12.2005, date d'entrée en vigueur : 01.04.2006 (JO OEB 2006, 8 s.).

RULES RELATING TO FEES
Article 3

RÈGLEMENT RELATIF AUX TAXES
Article 3

Article 3

Taxes, frais et tarifs fixés par le Président de l'Office

(1) Le Président de l'Office fixe le montant des taxes d'administration prévues dans le règlement d'exécution ainsi que le montant des taxes et frais à payer pour toute prestation de service assurée par l'Office, autre que celles visées à l'article 2.

⁵ Cf. la décision du Conseil d'administration du 11.10.2000 portant réduction de cette taxe pour les ressortissants de certains pays (JO OEB 2000, 446).

(2) Der Präsident des Amtes setzt ferner die Verkaufspreise der in den Artikeln 93, 98, 103 und 129 des Übereinkommens genannten Veröffentlichungen fest.

(3)⁶ Die in Artikel 2 vorgesehenen und die nach Absatz 1 festgesetzten Gebühren und Auslagen werden im Amtsblatt des Europäischen Patentamts veröffentlicht.

Artikel 4

Fälligkeit der Gebühren

(1) Gebühren, deren Fälligkeit sich nicht aus den Vorschriften des Übereinkommens oder des PCT oder der dazugehörigen Ausführungsordnungen ergibt, werden mit dem Eingang des Antrags auf Vornahme der gebührenpflichtigen Amtshandlung fällig.

(2) Der Präsident des Amtes kann davon absehen, Amtshandlungen im Sinn des Absatzes 1 von der vorherigen Zahlung der entsprechenden Gebühr abhängig zu machen.

Artikel 5⁷

Entrichtung der Gebühren

(1) Die an das Amt zu zahlenden Gebühren sind in Euro zu entrichten:

- a) durch Einzahlung oder Überweisung auf ein Bankkonto des Amtes,
- b) durch Einzahlung oder Überweisung auf ein Postscheckkonto des Amtes, oder
- c) durch Übergabe oder Übersendung von Schecks, die an die Order des Amtes lauten.

(2)⁸ Der Präsident des Amtes kann zulassen, dass die Gebühren auf andere Art als in Absatz 1 vorgesehen entrichtet werden.

Artikel 6⁹

(gestrichen)

(2) He shall also lay down the prices of the publications referred to in Articles 93, 98, 103 and 129 of the Convention.

(3)⁶ The amounts of the fees provided for in Article 2 and of the fees and costs laid down in accordance with paragraph 1 shall be published in the Official Journal of the European Patent Office.

Article 4

Due date for fees

(1) Fees in respect of which the due date is not specified in the provisions of the Convention or of the PCT or of the Implementing Regulations thereto shall be due on the date of receipt of the request for the service incurring the fee concerned.

(2) The President of the Office may decide not to make services within the meaning of paragraph 1 dependent upon the advance payment of the corresponding fee.

Article 5⁷

Payment of fees

(1) The fees due to the Office shall be paid in euro:

- (a) by payment or transfer to a bank account held by the Office,
- (b) by payment or transfer to a Giro account held by the Office, or
- (c) by delivery or remittance of cheques made payable to the Office.

(2)⁸ The President of the Office may allow other methods of paying fees than those set out in paragraph 1.

Article 6⁹

(deleted)

⁶ Geändert durch Beschluss des Verwaltungsrats vom 13.12.1994, in Kraft getreten am 01.06.1995 (ABI. EPA 1995, 9 ff.).

⁷ Zuletzt geändert durch Beschluss des Verwaltungsrats vom 28.06.2001, in Kraft getreten am 01.01.2002 (ABI. EPA 2001, 377).

⁸ Siehe hierzu die Vorschriften über das laufende Konto in der ab 1. Januar 2005 geltenden Fassung (Beilage Nr. 2 zum ABI. EPA 1/2005).

⁹ Gestrichen durch Beschluss des Verwaltungsrats vom 28.06.2001, in Kraft getreten am 01.01.2002 (ABI. EPA 2001, 377).

⁶ Amended by decision of the Administrative Council of 13.12.1994 which entered into force on 01.06.1995 (OJ EPO 1995, 9 ff.).

⁷ Last amended by decision of the Administrative Council of 28.06.2001 which entered into force on 01.01.2002 (OJ EPO 2001, 377).

⁸ See the Arrangements for deposit accounts valid as of 1 January 2005 (Suppl. No. 2 to OJ EPO 1/2005).

⁹ Deleted by decision of the Administrative Council of 28.06.2001 which entered into force on 01.01.2002 (OJ EPO 2001, 377).

(2) Il fixe également les tarifs de vente des publications visées aux articles 93, 98, 103 et 129 de la Convention.

(3)⁶ Les montants des taxes prévues à l'article 2 et des taxes et frais visés au paragraphe 1 sont publiés au Journal officiel de l'Office européen des brevets.

Exigibilité des taxes

(1) Les taxes dont la date d'exigibilité ne découle pas des dispositions de la Convention, du PCT et de leurs règlements d'exécution sont exigibles à compter du dépôt de la demande d'exécution de la prestation de service assujettie à une taxe.

(2) Le Président de l'Office peut ne pas soumettre la prestation de service visée au paragraphe 1 au paiement préalable de la taxe y afférente.

*Article 5*⁷

Paie ment des taxes

(1) Les taxes à payer à l'Office doivent être acquittées en euro :

a) par versement ou virement à un compte bancaire de l'Office,

b) par versement ou virement à un compte de chèques postaux de l'Office, ou

c) par remise ou envoi de chèques établis à l'ordre de l'Office.

(2)⁸ Le Président de l'Office peut autoriser le paiement des taxes par d'autres moyens que ceux prévus au paragraphe 1.

*Article 6*⁹

(supprimé)

⁶ Modifié par décision du Conseil d'administration en date du 13.12.1994, entrée en vigueur le 01.06.1995 (JO OEB 1995, 9 s.).

⁷ Modifié en dernier lieu par décision du Conseil d'administration en date du 28.06.2001, entrée en vigueur le 01.01.2002 (JO OEB 2001, 377).

⁸ Cf. la réglementation applicable aux comptes courants - version applicable à partir du 1^{er} janvier 2005 - (Suppl. n° 2 au JO OEB 1/2005).

⁹ Supprimé par décision du Conseil d'administration en date du 28.06.2001, entrée en vigueur le 01.01.2002 (JO OEB 2001, 377).

Artikel 7

Angaben über die Zahlung

(1)¹⁰ Jede Zahlung muss den Einzahler bezeichnen und die notwendigen Angaben enthalten, die es dem Amt ermöglichen, den Zweck der Zahlung ohne Weiteres zu erkennen.

(2) Ist der Zweck der Zahlung nicht ohne Weiteres erkennbar, so fordert das Amt den Einzahler auf, innerhalb einer vom Amt zu bestimmenden Frist diesen Zweck schriftlich mitzuteilen. Kommt der Einzahler der Aufforderung nicht rechtzeitig nach, so gilt die Zahlung als nicht erfolgt.

Artikel 8¹¹

Maßgebender Zahlungstag

(1) Als Tag des Eingangs einer Zahlung beim Amt gilt:

a) im Fall des Artikels 5 Absatz 1 Buchstaben a und b der Tag, an dem der eingezahlte oder überwiesene Betrag auf einem Bank- oder Postscheckkonto des Amts tatsächlich gutgeschrieben wird;

b) im Fall des Artikels 5 Absatz 1 Buchstabe c der Tag, an dem der Scheck beim Amt eingeht, sofern dieser Scheck eingelöst wird.

(2) Lässt der Präsident des Amts gemäß Artikel 5 Absatz 2 zu, dass die Gebühren auf andere Art als in Artikel 5 Absatz 1 vorgesehen entrichtet werden, so bestimmt er auch den Tag, an dem diese Zahlung als eingegangen gilt.

(3)¹² Gilt eine Gebührenzahlung gemäß den Absätzen 1 und 2 erst nach Ablauf der Frist als eingegangen, innerhalb der sie hätte erfolgen müssen, so gilt diese Frist als eingehalten, wenn dem Amt nachgewiesen wird, dass der Einzahler

a) innerhalb der Frist, in der die Zahlung hätte erfolgen müssen, in einem Vertragsstaat:

i) die Zahlung des Betrags bei einem Bankinstitut oder Postamt veranlasst hat oder

Article 7

Particulars concerning payments

(1)¹⁰ Every payment must indicate the name of the person making the payment and must contain the necessary particulars to enable the Office to establish immediately the purpose of the payment.

(2) If the purpose of the payment cannot immediately be established, the Office shall require the person making the payment to notify it in writing of this purpose within such period as it may specify. If he does not comply with this request in due time the payment shall be considered not to have been made.

Article 8¹¹

Date to be considered as the date on which payment is made

(1) The date on which any payment shall be considered to have been made to the Office shall be as follows:

(a) in the cases referred to in Article 5, paragraph 1(a) and (b): the date on which the amount of the payment or of the transfer is actually entered in a bank account or a Giro account held by the Office;

(b) in the case referred to in Article 5, paragraph 1(c): the date of receipt of the cheque at the Office, provided that the cheque is met.

(2) Where the President of the Office allows, in accordance with the provisions of Article 5, paragraph 2, other methods of paying fees than those set out in Article 5, paragraph 1, he shall also lay down the date on which such payments shall be considered to have been made.

(3)¹² Where, under the provisions of paragraphs 1 and 2, payment of a fee is not considered to have been made until after the expiry of the period in which it should have been made, it shall be considered that this period has been observed if evidence is provided to the Office that the person who made the payment

(a) fulfilled one of the following conditions in a Contracting State within the period within which the payment should have been made:

(i) he effected the payment through a banking establishment or a post office;

¹⁰ Siehe hierzu Rechtsauskunft Nr. 6/91 rev. (Anhang II).

¹¹ Zuletzt geändert durch Beschluss des Verwaltungsrats vom 28.06.2001, in Kraft getreten am 03.01.2002 (ABl. EPA 2001, 378 ff.).

¹² Siehe hierzu Rechtsauskunft Nr. 6/91 rev. (Anhang II).

¹⁰ See Legal advice No. 6/91 rev. (Annex II).

¹¹ Last amended by decision of the Administrative Council of 28.06.2001 which entered into force on 03.01.2002 (OJ EPO 2001, 378 ff.).

¹² See Legal advice No. 6/91 rev. (Annex II).

Article 7

Données concernant le paiement

(1)¹⁰ Tout paiement doit comporter l'indication du nom de la personne qui l'effectue ainsi que les données nécessaires pour permettre à l'Office d'identifier facilement l'objet du paiement.

(2) Si l'objet du paiement n'est pas facilement identifiable, l'Office invite, dans un délai qu'il détermine, la personne qui a effectué le paiement à communiquer cet objet par écrit. Si elle ne donne pas suite à cette invitation en temps utile, le paiement est considéré comme nul et non avenue.

Article 8¹¹

Date à laquelle le paiement est réputé effectué

(1) La date à laquelle tout paiement est réputé effectué auprès de l'Office est fixée comme suit :

a) dans les cas visés à l'article 5, paragraphe 1, lettres a) et b) : date à laquelle le montant du versement ou du virement est effectivement porté au crédit d'un compte bancaire ou d'un compte de chèques postaux de l'Office ;

b) dans le cas visé à l'article 5, paragraphe 1, lettre c) : date de réception du chèque par l'Office sous réserve de l'encaissement de ce chèque.

(2) Lorsque le Président de l'Office autorise, conformément aux dispositions de l'article 5, paragraphe 2, le paiement des taxes par d'autres moyens que ceux prévus au paragraphe 1 dudit article, il fixe également la date à laquelle ce paiement est réputé effectué.

(3)¹² Lorsque, en vertu des dispositions des paragraphes 1 et 2, le paiement d'une taxe n'est réputé effectué qu'après l'expiration du délai dans lequel il aurait dû intervenir, ce délai est considéré comme respecté si la preuve est apportée à l'Office que la personne qui a effectué le paiement

a) a rempli dans un Etat contractant pendant le délai dans lequel le paiement aurait dû intervenir l'une des conditions ci-après :

i) avoir effectué le paiement auprès d'un établissement bancaire ou d'un bureau de poste ;

GEBÜHRENORDNUNG

Artikel 7

RULES RELATING TO FEES

Article 7

RÈGLEMENT RELATIF AUX TAXES

Article 7

¹⁰ Cf. le renseignement juridique n° 6/91 rév. (Annexe II).

¹¹ Modifié en dernier lieu par décision du Conseil d'administration en date du 28.06.2001, entrée en vigueur le 03.01.2002 (JO OEB 2001, 378 s.).

¹² Cf. le renseignement juridique n° 6/91 rév. (Annexe II).

ii) einen Auftrag zur Überweisung des zu entrichtenden Betrags einem Bankinstitut oder Postscheckamt formgerecht erteilt hat oder

iii) einem Postamt einen an das Amt gerichteten Brief übergeben hat, in dem ein dem Artikel 5 Absatz 1 Buchstabe c entsprechender Scheck enthalten ist, sofern dieser Scheck eingelöst wird, und

b) eine Zuschlagsgebühr in Höhe von 10 % der betreffenden Gebühr oder Gebühren, höchstens jedoch EUR 150 entrichtet hat; die Zuschlagsgebühr wird nicht erhoben, wenn eine Handlung nach Buchstabe a spätestens zehn Tage vor Ablauf der Zahlungsfrist vorgenommen worden ist.

(4) Das Amt kann den Einzahler auffordern, innerhalb einer vom Amt zu bestimmenden Frist den Nachweis über den Zeitpunkt der Vornahme einer der Handlungen nach Absatz 3 Buchstabe a zu erbringen und gegebenenfalls die Zuschlagsgebühr nach Absatz 3 Buchstabe b zu entrichten. Kommt der Einzahler dieser Aufforderung nicht nach, ist der Nachweis ungenügend oder wird die angeforderte Zuschlagsgebühr nicht rechtzeitig entrichtet, so gilt die Zahlungsfrist als ver säumt.

Artikel 9

Nicht ausreichender Gebührenbetrag

(1) Eine Zahlungsfrist gilt grundsätzlich nur dann als eingehalten, wenn der volle Gebührenbetrag rechtzeitig gezahlt worden ist. Ist nicht die volle Gebühr entrichtet worden, so wird der gezahlte Betrag nach dem Fristablauf zurückerstattet. Das Amt kann jedoch, soweit die laufende Frist es erlaubt, dem Einzahler die Gelegenheit geben, den fehlenden Betrag nachzuzahlen. Es kann ferner, wenn dies der Billigkeit entspricht, geringfügige Fehlbeträge der zu entrichtenden Gebühr ohne Rechtsnachteil für den Einzahler unberücksichtigt lassen.

(2) Wurden im Antrag auf Erteilung des europäischen Patents mehr als ein Vertragsstaat gemäß Artikel 79 Absatz 1 des Übereinkommens benannt und reicht der gezahlte Betrag nicht für alle Benennungsgebühren aus, so wird er entsprechend den Angaben verwendet, die der Anmelder bei der Zahlung macht. Hat er bei der Zahlung keine solchen Angaben gemacht, so gelten diese Gebühren nur für so viele Benennungen als entrichtet, als der gezahlte Betrag entsprechend der Reihenfolge, in der die Vertragsstaaten benannt sind, ausreicht.

(ii) he duly gave an order to a banking establishment or a post office to transfer the amount of the payment;

(iii) he despatched at a post office a letter bearing the address of the Office and containing a cheque within the meaning of Article 5, paragraph 1(c), provided that the cheque is met, and

(b) paid a surcharge of 10% on the relevant fee or fees, but not exceeding EUR 150; no surcharge is payable if a condition according to sub-paragraph (a) has been fulfilled not later than ten days before the expiry of the period for payment.

(4) The Office may request the person who made the payment to produce evidence as to the date on which a condition according to paragraph 3(a) was fulfilled and, where required, pay the surcharge referred to in paragraph 3(b), within a period to be specified by it. If he fails to comply with this request or if the evidence is insufficient, or if the required surcharge is not paid in due time, the period for payment shall be considered not to have been observed.

Article 9

Insufficiency of the amount paid

(1) A time limit for payment shall in principle be deemed to have been observed only if the full amount of the fee has been paid in due time. If the fee is not paid in full, the amount which has been paid shall be refunded after the period for payment has expired. The Office may, however, in so far as this is possible within the time remaining before the end of the period, give the person making the payment the opportunity to pay the amount lacking. It may also, where this is considered justified, overlook any small amounts lacking without prejudice to the rights of the person making the payment.

(2) Where the request for grant of a European patent designates more than one Contracting State in accordance with Article 79, paragraph 1, of the Convention, and the amount paid is insufficient to cover all the designation fees, the amount paid shall be applied according to the specifications made by the applicant at the time of payment. If the applicant makes no such specifications at the time of payment, these fees shall be deemed to be paid only for as many designations as are covered by the amount paid and in the order in which the Contracting States are designated in the request.

ii) avoir donné un ordre de virement, en bonne et due forme, du montant du paiement à un établissement bancaire ou à un bureau de chèques postaux ;

iii) avoir déposé dans un bureau de poste une lettre portant l'adresse de l'Office et contenant un chèque visé à l'article 5, paragraphe 1, lettre c), sous réserve de l'encaissement de ce chèque, et

b) a acquitté une surtaxe d'un montant égal à 10 % de la ou des taxes dues, mais n'excédant pas 150 EUR ; aucune surtaxe n'est due si l'une des conditions visées à la lettre a) a été remplie au plus tard dix jours avant l'expiration du délai de paiement.

(4) L'Office peut inviter la personne qui a effectué le paiement à apporter la preuve de la date à laquelle l'une des conditions visées au paragraphe 3, lettre a) a été remplie et, le cas échéant, à acquitter la surtaxe visée au paragraphe 3, lettre b), dans un délai qu'il lui impartit. S'il n'est pas donné suite à cette invitation ou si la preuve apportée n'est pas suffisante, ou encore si la surtaxe requise n'est pas acquittée en temps utile, le délai de paiement est considéré comme n'ayant pas été respecté.

Article 9

Paiement insuffisant du montant de la taxe

(1) Un délai de paiement n'est, en principe, considéré comme respecté que si la totalité du montant de la taxe a été payée dans le délai prévu. Si la totalité de la taxe n'a pas été payée, le montant déjà versé est remboursé après expiration du délai. Toutefois, l'Office peut, pour autant que le délai en cours le permette, donner à la personne qui a effectué le paiement la possibilité de verser ultérieurement le complément. En outre, si cela paraît justifié, l'Office peut ne pas tenir compte des parties minimales non encore payées de la taxe, sans qu'il en résulte pour autant une perte de droits pour la personne qui a effectué le paiement.

(2) Si, dans la requête en délivrance du brevet européen, il est désigné plus d'un Etat contractant au sens de l'article 79, paragraphe 1 de la Convention, et si le montant payé ne suffit pas à couvrir toutes les taxes de désignation, ce montant est utilisé conformément aux indications données par le demandeur lors du paiement. Si le demandeur n'a pas donné d'indication lors du paiement, ces taxes ne sont considérées comme acquittées que pour le nombre de désignations pour lequel le montant payé est suffisant, et ce dans l'ordre où les Etats contractants sont désignés dans la requête.

GEBÜHRENORDNUNG

Artikel 9

RULES RELATING TO FEES

Article 9

RÈGLEMENT RELATIF AUX TAXES

Article 9

Artikel 10¹³

Rückerstattung von Recherchegebühren

(1) Die für eine europäische oder eine ergänzende europäische Recherche entrichtete Recherchegebühr wird in voller Höhe zurückerstattet, wenn die europäische Patentanmeldung zu einem Zeitpunkt zurückgenommen oder zurückgewiesen wird oder als zurückgenommen gilt, in dem das Amt mit der Erstellung des Recherchenberichts noch nicht begonnen hat.

(2)¹⁴ Wird der europäische Recherchenbericht auf einen früheren Recherchenbericht gestützt, den das Amt für eine Patentanmeldung, deren Priorität beansprucht wird, oder für eine frühere Anmeldung im Sinn des Artikels 76 oder der Regel 15 des Übereinkommens erstellt hat, so erstattet das Amt gemäß einem Beschluss seines Präsidenten dem Anmelder einen Betrag zurück, dessen Höhe von der Art der früheren Recherche und dem Umfang abhängt, in dem sich das Amt bei der Durchführung der späteren Recherche auf den früheren Recherchenbericht stützen kann.

Artikel 10a¹⁵

Rückerstattung der Gebühr für ein technisches Gutachten

Die Gebühr für ein technisches Gutachten nach Artikel 25 des Übereinkommens wird zu 75 % zurückerstattet, wenn das Ersuchen um das Gutachten zurückgenommen wird, bevor das Amt mit seiner Erstellung begonnen hat.

Artikel 10b¹⁶

Rückerstattung der Prüfungsgebühr

Die Prüfungsgebühr nach Artikel 94 Absatz 2 des Übereinkommens wird

a) in voller Höhe zurückerstattet, wenn die europäische Patentanmeldung zurückgenommen oder zurückgewiesen wird oder als zurückgenommen gilt, bevor die Anmeldung in die Zuständigkeit der Prüfungsabteilungen übergegangen ist;

Article 10¹³

Refund of search fees

(1) The search fee paid for a European or supplementary European search shall be fully refunded if the European patent application is withdrawn or refused or deemed to be withdrawn at a time when the Office has not yet begun to draw up the search report.

(2)¹⁴ Where the European search report is based on an earlier search report prepared by the Office on an application whose priority is claimed or an earlier application within the meaning of Article 76 of the Convention or an original application within the meaning of Rule 15 of the Convention, the Office shall refund to the applicant, in accordance with a decision of its President, an amount which shall depend on the type of earlier search and the extent to which the Office benefits from the earlier search report when carrying out the subsequent search.

Article 10a¹⁵

Refund of the fee for a technical opinion

An amount of 75% of the fee for a technical opinion under Article 25 of the Convention shall be refunded if the request for a technical opinion is withdrawn at a time when the Office has not yet begun to draw up the technical opinion.

Article 10b¹⁶

Refund of examination fee

The examination fee provided for in Article 94, paragraph 2, of the Convention shall be refunded:

(a) in full if the European patent application is withdrawn, refused or deemed to be withdrawn before the Examining Divisions have assumed responsibility;

¹³ Zuletzt geändert durch Beschluss des Verwaltungsrats vom 09.12.2004, in Kraft getreten am 01.07.2005 (ABl. EPA 2005, 5 ff.).

¹⁴ Siehe hierzu den Beschluss des Präsidenten des EPA über die Rückerstattung von Recherchegebühren vom 01.01.2006 (ABl. EPA 2006, 83 f.), spätere im ABl. *Article 10*¹³

Remboursement des taxes de recherche

(1) La taxe de recherche acquittée pour une recherche européenne ou une recherche européenne complémentaire est remboursée intégralement si la demande de brevet européen est retirée ou rejetée ou si elle est réputée retirée avant que l'Office n'ait commencé à établir le rapport de recherche.

(2)¹⁴ Lorsque le rapport de recherche européenne est basé sur un rapport de recherche antérieure établi par l'Office pour une demande de brevet dont la priorité est revendiquée ou pour une demande initiale au sens de l'article 76 ou de la règle 15 de la Convention, l'Office rembourse au demandeur, conformément à une décision du Président de l'Office, un montant qui est déterminé en fonction du type de recherche antérieure et selon le profit que l'Office peut tirer du rapport de recherche antérieure lorsqu'il effectue la recherche ultérieure.

*Article 10bis*¹⁵

Remboursement de la redevance pour la délivrance d'un avis technique

La redevance pour la délivrance d'un avis technique conformément à l'article 25 de la Convention est remboursée à 75 % si la demande d'avis technique est retirée avant que l'Office n'ait commencé à établir cet avis.

*Article 10ter*¹⁶

Remboursement de la taxe d'examen

La taxe d'examen prévue à l'article 94, paragraphe 2 de la Convention est remboursée :

a) intégralement si la demande de brevet européen est retirée ou rejetée ou si elle est réputée retirée avant que les divisions d'examen ne soient devenues compétentes ;

¹³ Modifié en dernier lieu par décision du Conseil d'administration en date du 09.12.2004, entrée en vigueur le 01.07.2005 (JO OEB 2005, 5 s.).

Article 10

b) zu 75 % zurückerstattet, wenn die europäische Patentanmeldung zu einem Zeitpunkt zurückgenommen oder zurückgewiesen wird oder als zurückgenommen gilt, zu dem die Anmeldung bereits in die Zuständigkeit der Prüfungsabteilungen übergegangen ist, die Sachprüfung jedoch noch nicht begonnen hat.

*Artikel 10c*¹⁷

Rückerstattung von Bagatellbeträgen

Zu viel gezahlte Gebührenbeträge werden nicht zurückerstattet, wenn es sich um Bagatellbeträge handelt und der Verfahrensbeteiligte eine Rückerstattung nicht ausdrücklich beantragt hat. Der Präsident des Amts bestimmt, bis zu welcher Höhe ein Betrag als Bagatellbetrag anzusehen ist.¹⁸

*Artikel 10d*¹⁹

Rückerstattung der Gebühr für die internationale vorläufige Prüfung

Hat der Anmelder während der internationalen vorläufigen Prüfung weder eine eingehende vorläufige Prüfung verlangt, noch Änderungen nach Artikel 19 oder 34 Absatz 2 PCT eingereicht, noch sonstige Gegenvorstellungen erhoben, so werden zwei Drittel der für die internationale vorläufige Prüfung entrichteten Gebühr zurückerstattet. Der Präsident des Amts bestimmt die Einzelheiten der Rückerstattung.

*Artikel 11*²⁰

Beschwerdefähige Kostenfestsetzungsentscheidungen

Entscheidungen über die Festsetzung des Betrags der Kosten des Einspruchsverfahrens sind gemäß Artikel 106 Absatz 5 des Übereinkommens beschwerdefähig, wenn der Betrag die Beschwerdegebühr übersteigt.

Artikel 12

Gebührenermäßigung

(1) Die in Regel 6 Absatz 3 des Übereinkommens vorgesehene Ermäßigung beträgt 20 % der Anmeldegebühr, der Prüfungsgebühr, der Einspruchsgebühr und der Beschwerdegebühr.

(b) at a rate of 75% if the European patent application is withdrawn, refused or deemed to be withdrawn after the Examining Divisions have assumed responsibility but before substantive examination has begun.

*Article 10c*¹⁷

Refund of insignificant amounts

Where too large a sum is paid to cover a fee, the excess shall not be refunded if the amount is insignificant and the party concerned has not expressly requested a refund. The President of the Office shall determine what constitutes an insignificant amount.¹⁸

*Article 10d*¹⁹

Refund of fee for international preliminary examination

If the applicant, during international preliminary examination, has not asked for a detailed preliminary examination or has not filed any amendments under Article 19 or 34(2) PCT or any other arguments, two thirds of the fee paid for international preliminary examination shall be refunded. The details of the refund shall be determined by the President of the Office.

*Article 11*²⁰

Decisions fixing costs which are subject to appeal

In accordance with Article 106, paragraph 5, of the Convention, decisions fixing the amount of costs of opposition proceedings may be appealed if the amount is in excess of the fee for appeal.

Article 12

Reduction of fees

(1) The reduction laid down in Rule 6, paragraph 3, of the Convention shall be 20% of the filing fee, examination fee, opposition fee and fee for appeal.

¹⁷ Eingefügt durch Beschluss des Verwaltungsrats vom 07.12.1990, in Kraft getreten am 03.01.1991 (ABI. EPA 1991, 11 ff.).

RÈGLEMENT RELATIF AUX TAXES
Article 10quater

*Article 10quater*¹⁷

Remboursement de montants insignifiants

Si la somme versée pour une taxe est supérieure au montant de celle-ci, la différence n'est pas remboursée lorsqu'elle est insignifiante et que la partie à la procédure concernée ne demande pas expressément à être remboursée. Le Président de l'Office détermine jusqu'à quel montant la différence constatée est considérée comme insignifiante.¹⁸

*Article 10quinquies*¹⁹

Remboursement de la taxe d'examen préliminaire international

Si le demandeur, au cours de l'examen préliminaire international, n'a pas demandé d'examen préliminaire détaillé ni produit de modifications conformément à l'article 19 ou 34(2) PCT ou tout autre moyen, deux tiers de la taxe acquittée pour l'examen préliminaire international sont remboursés. Le Président de l'Office détermine les modalités du remboursement.

*Article 11*²⁰

Décisions susceptibles de recours en matière de fixation des frais

Les décisions relatives à la fixation des frais de la procédure d'opposition sont susceptibles de recours conformément à l'article 106, paragraphe 5 de la Convention si le montant des frais dépasse le montant de la taxe de recours.

Article 12

Réduction du montant des taxes

(1) La réduction prévue à la règle 6, paragraphe 3 de la Convention s'élève à 20 % de la taxe de dépôt, de la taxe d'examen, de la taxe d'opposition et de la taxe de recours.

¹⁷ Inséré par décision du Conseil d'administration en date du 07.12.1990, entrée en vigueur le 03.01.1991 (JO OEB 1991, 11 s.).

¹⁸ Cf. la décision du Président de l'OEB du 06.09.2001, concernant l'application du règlement relatif aux taxes... (JO OEB 2001, 521 s.).

(2)²¹ Die in Regel 107 Absatz 2 des Übereinkommens vorgesehene Ermäßigung beträgt 50 % der Prüfungsgebühr. Die Ermäßigung wird nicht gewährt, wenn das Amt als mit der internationalen vorläufigen Prüfung beauftragte Behörde die für die vorläufige Prüfung entrichtete Gebühr nach Artikel 10d zurückerstattet hat.

*Artikel 13*²²

Übermittlung der Abschrift

Der Präsident des Europäischen Patentamts übermittelt allen Unterzeichnerstaaten des Übereinkommens sowie den Staaten, die diesem beitreten, eine beglaubigte Abschrift dieser Gebührenordnung.

*Artikel 14*²³

Inkrafttreten

Diese Gebührenordnung tritt am 20. Oktober 1977 in Kraft.

GESCHEHEN zu München am 20. Oktober 1977.

(2)²¹ The reduction laid down in Rule 107, paragraph 2, of the Convention shall be 50% of the examination fee. The reduction shall not be granted if the Office as an International Preliminary Examining Authority has refunded the fee paid for preliminary examination under Article 10d.

*Article 13*²²

Notification

The President of the European Patent Office shall forward a certified copy of these Rules to all the signatory States to the Convention and to the States which accede thereto.

*Article 14*²³

Entry into force

These Rules shall enter into force on 20 October 1977.

DONE at Munich, 20 October 1977.

²¹ Zuletzt geändert durch Beschluss des Verwaltungsrats vom 18.10.2001, in Kraft getreten am 03.01.2002 (ABl. EPA 2001, 492 f.).

²² Die Nummerierung der Artikel 13 und 14 wurde geändert durch Beschluss des Verwaltungsrats vom 07.12.1990, in Kraft getreten am 03.01.1991 (ABl. EPA 1991, 11 ff.). Der Text der Artikel 13 und 14 entspricht dem Text der früheren Artikel 14 und 15, da der frühere Artikel 13 gestrichen wurde.

²³ Die Nummerierung der Artikel 13 und 14 wurde geändert durch Beschluss des Verwaltungsrats vom 07.12.1990, in Kraft getreten am 03.01.1991 (ABl. EPA 1991, 11 ff.). Der Text der Artikel 13 und 14 entspricht dem Text der früheren Artikel 14 und 15, da der frühere Artikel 13 gestrichen wurde.

²¹ Last amended by decisions of the Administrative Council of 18.10.2001, which entered into force on 03.01.2002 (OJ EPO 2001, 492 ff).

²² The numbers of Articles 13 and 14 were changed by decision of the Administrative Council of 07.12.1990 which entered into force on 03.01.1991 (OJ EPO 1991, 11 ff). The wording of Articles 13 and 14 corresponds to former Articles 14 and 15 as the former Article 13 has been deleted.

²³ The numbers of Articles 13 and 14 were changed by decision of the Administrative Council of 07.12.1990 which entered into force on 03.01.1991 (OJ EPO 1991, 11 ff). The wording of Articles 13 and 14 corresponds to former Articles 14 and 15 as the former Article 13 has been deleted.

(2)²¹ La réduction prévue à la règle 107, paragraphe 2 de la Convention s'élève à 50 % de la taxe d'examen. Il n'est pas octroyé de réduction lorsque l'Office agissant en qualité d'administration chargée de l'examen préliminaire international a remboursé la taxe acquittée pour l'examen préliminaire conformément à l'article 10quinquies.

*Article 13*²²

Communication

Le Président de l'Office européen des brevets communique à tous les Etats signataires de la Convention ainsi qu'aux Etats qui y adhèrent une copie certifiée conforme du présent règlement.

*Article 14*²³

Entrée en vigueur

Le présent règlement entre en vigueur le 20 octobre 1977.

FAIT A MUNICH, le 20 octobre 1977.

Annex II

Legal advice from the EPO in brief

Annexe II

Tableau récapitulatif des renseignements juridiques communiqués par l'OEB

Übersicht über die Rechtsauskünfte des EPA

Nr.	ABI. EPA	Titel	Bemerkungen
1/79			Aufgehoben (siehe ABI. EPA 1998, 359)
2/79			Aufgehoben (siehe ABI. EPA 1998, 359)
3/85 rev.	1985, 347	Anspruchsgebühren - Mehrere Sätze von Patentansprüchen	Die Grundsätze der Rechtsauskunft gelten weiterhin; zu berücksichtigen sind die Änderungen der Regeln 31 und 51 EPÜ (siehe auch Bemerkung zu Rechtsauskunft Nr. 4/80)
4/80	1980, 48	Zeitpunkt der Vorlage eines getrennten Satzes von Patentansprüchen für Österreich	Siehe hierzu die Entscheidung G 7/93 (ABI. EPA 1994, 775: Punkt 2.5 der Gründe)
5/93 rev.	1993, 229	Berechnung von zusammengesetzten Fristen	
6/91 rev.	1991, 573	Entrichtung der Gebühren Rückerstattung von Gebühren oder Geldbeträgen	
7/80			Aufgehoben (siehe ABI. EPA 1998, 359)
8/80	1981, 6	Zurücknahme der europäischen Patentanmeldung	Siehe hierzu u. a. die Entscheidungen J 6/86 (ABI. EPA 1988, 124); J 15/86 (ABI. EPA 1988, 417); J 7/87 (ABI. EPA 1988, 422); J 11/87 (ABI. EPA 1988, 367)
9/81			Aufgehoben (siehe ABI. EPA 1998, 359)
10/92 rev.	1992, 662	Verbindung einer europäischen Patentanmeldung mit einer Euro-PCT-Anmeldung - Rückerstattung der Prüfungsgebühr	Derzeit sind alle EPÜ-Vertragsstaaten auch PCT-Vertragsstaaten; die Grundsätze der Rechtsauskunft gelten für "Altfälle" sowie in Zukunft für Anmeldungen, in denen europäische Vertragsstaaten benannt werden, für die der PCT nicht in Kraft ist
11/82	1982, 57	Widerruf des Patents im Einspruchsverfahren	Betrifft den Widerruf auf Veranlassung des Patentinhabers; siehe auch die Entscheidungen T 73/84 (ABI. EPA 1985, 241) und T 186/84 (ABI. EPA 1986, 79)
12/82			Aufgehoben (siehe ABI. EPA 1998, 359)
13/82	1982, 196	Weiterbehandlung der europäischen Patentanmeldung	
14/83			Aufgehoben (siehe ABI. EPA 2002, 161)
15/05 rev. 2	2005, 357	Hilfsanträge im Prüfungs- und Einspruchsverfahren	

Übersicht über die Rechtsauskünfte des EPA

Nr.	ABI. EPA	Titel	Bemerkungen
16/85	1985, 141	Antrag auf Entscheidung nach Feststellung eines Rechtsverlusts	Betrifft das Prüfungsverfahren; für das Einspruchsverfahren siehe die Entscheidung G 1/90 (ABI. EPA 1991, 275)
17/90	1990, 260	Maßgebliche Fassung des erteilten Patents bei fehlerhaftem Druck der europäischen Patentschrift	
18/92			Aufgehoben (siehe ABI. EPA 2002, 259)
19/99	1999, 296	Einreichung einer Übersetzung der früheren Anmeldung oder einer Erklärung nach Regel 38 (4) EPÜ	Rechtsgrundlage der "Erklärung" ist nunmehr Regel 38 (5) EPÜ (ABI. EPA 1999, 660)

Legal advice from the EPO in brief

No.	OJ EPO	Title	Comments
1/79			Cancelled (see OJ EPO 1998, 359).
2/79			Cancelled (see OJ EPO 1998, 359).
3/85 rev.	1985, 347	Claims fees - multiple sets of claims	The principles remain the same, but the amendments to Rules 31 and 51 EPC should be borne in mind (see also comment re Legal Advice No. 4/80).
4/80	1980, 48	Period for submitting a separate set of claims for Austria	See decision G 7/93 (OJ EPO 1994, 775: point 2.5 Reasons).
5/93 rev.	1993, 229	Calculation of aggregate time limits	
6/91 rev.	1991, 573	Payment of fees Refunds of fees or other sums	
7/80			Cancelled (see OJ EPO 1998, 359).
8/80	1981, 6	Withdrawal of a European patent application	See decisions J 6/86 (OJ EPO 1988, 124); J 15/86 (OJ EPO 1988, 417); J 7/87 (OJ EPO 1988, 422); J 11/87 (OJ EPO 1988, 367).
9/81			Cancelled (see OJ EPO 1998, 359).
10/92 rev.	1992, 662	Consolidation of a European patent application with a Euro-PCT-application - Refund of the examination fee	At present all EPC Contracting States are also PCT Contracting States. The principles apply to cases predating this state of affairs and to future applications designating European Contracting States for which the PCT is not in force.
11/82	1982, 57	Revocation of the European patent during opposition proceedings	Relates to revocation at the request of the patent proprietor. See also decision T 73/84 (OJ EPO 1985, 241) and T 186/84 (OJ EPO 1986, 79).
12/82			Cancelled (see OJ EPO 1998, 359).
13/82	1982, 196	Further processing of the European patent application	
14/83			Cancelled (see OJ EPO 2002, 161).
15/05 rev. 2	2005, 357	Auxiliary requests in examination and opposition proceedings	
16/85	1985, 141	Request for a decision after the noting of loss of rights	Relates to the examination proceedings. For the opposition procedure see decision G 1/90 (OJ EPO 1991, 275).

Legal advice from the EPO in brief

No.	OJ EPO	Title	Comments
17/90	1990, 260	Authentic text of a granted patent when the specification contains misprints	
18/92			Cancelled (see OJ EPO 2002, 259).
19/99	1999, 296	Filing of a translation of the previous application or a declaration under Rule 38(4) EPC	The legal basis of the "declaration" is now Rule 38(5) EPC (OJ EPO 1999, 660).

Tableau récapitulatif des renseignements juridiques communiqués par l'OEB

N°	JO OEB	Titre	Observations
1/79			Annulé (cf. JO OEB 1998, 359).
2/79			Annulé (cf. JO OEB 1998, 359).
3/85 rév.	1985, 347	Taxes de revendication - Plusieurs jeux de revendications	Les principes énoncés dans ce renseignement sont toujours valables. Il y a lieu de tenir compte des modifications apportées aux règles 31 et 51 CBE (voir aussi observations sur le renseignement juridique n° 4/80).
4/80	1980, 48	Moment où doit être présentée la série distincte de revendications pour l'Autriche	Voir à ce propos la décision G 7/93 (JO OEB 1994, 775 : point 2.5 des motifs).
5/93 rév.	1993, 229	Calcul des délais composés	
6/91 rév.	1991, 573	Paiement des taxes Remboursement de taxes ou d'autres montants	
7/80			Annulé (cf. JO OEB 1998, 359).
8/80	1981, 6	Retrait de la demande de brevet européen	Voir aussi les décisions J 6/86 (JO OEB 1988, 124) ; J 15/86 (JO OEB 1988, 417) ; J 7/87 (JO OEB 1988, 422) ; J 11/87 (JO OEB 1988, 367).
9/81			Annulé (cf. JO OEB 1998, 359).
10/92 rév.	1992, 662	Jonction d'une demande de brevet européen et d'une demande euro-PCT - Remboursement de la taxe d'examen	Actuellement, tous les Etats parties à la CBE sont également parties au PCT. Les principes énoncés dans ce renseignement juridique valent pour les « anciens cas » et aussi, à l'avenir, pour les demandes désignant des Etats contractants à l'égard desquels le PCT n'est pas en vigueur.
11/82	1982, 57	Révocation du brevet au cours de la procédure d'opposition	Concerne la révocation du brevet à l'initiative du titulaire du brevet. Voir aussi les décisions T 73/84 (JO OEB 1985, 241) et T 186/84 (JO OEB 1986, 79).
12/82			Annulé (cf. JO OEB 1998, 359).
13/82	1982, 196	Poursuite de la procédure de la demande de brevet	
14/83			Annulé (cf. JO OEB 2002, 161).

Tableau récapitulatif des renseignements juridiques communiqués par l'OEB

N°	JO OEB	Titre	Observations
15/05 rév. 2	2005, 357	Requêtes subsidiaires dans la procédure d'examen et la procédure d'opposition	
16/85	1985, 141	Requête en décision après constatation de la perte d'un droit	Concerne la procédure d'examen; pour la procédure d'opposition, voir la décision G 1/90 (JO OEB 1991, 275).
17/90	1990, 260	Texte du brevet délivré, faisant foi en cas d'impression défectueuse du fascicule du brevet européen	
18/92			Annulé (cf. JO OEB 2002, 259).
19/99	1999, 296 et 571	Production d'une traduction de la demande antérieure ou présentation d'une déclaration conformément à la règle 38(4) CBE	La règle 38(5) CBE constitue à présent la base juridique de la "déclaration" (JO OEB 1999, 660).

**Council Regulation (EC) No 40/94
of 20 December 1993
on the Community trade mark**

COUNCIL REGULATION (EC) No 40/94 of 20 December 1993 on the Community trade mark

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 235 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

Whereas it is desirable to promote throughout the Community a harmonious development of economic activities and a continuous and balanced expansion by completing an internal market which functions properly and offers conditions which are similar to those obtaining in a national market; whereas in order to create a market of this kind and make it increasingly a single market, not only must be barriers to free movement of goods and services be removed and arrangements be instituted which ensure that competition is not distorted, but, in addition, legal conditions must be created which enable undertakings to adapt their activities to the scale of the Community, whether in manufacturing and distributing goods or in providing services; whereas for those purposes, trade marks enabling the products and services of undertakings to be distinguished by identical means throughout the entire Community, regardless of frontiers, should feature amongst the legal instruments which undertakings have at their disposal;

Whereas action by the Community would appear to be necessary for the purpose of attaining the Community's said objectives; whereas such action involves the creation of Community arrangements for trade marks whereby undertakings can by means of one procedural system obtain Community trade marks to which uniform protection is given and which produce their effects throughout the entire area of the Community; whereas the principle of the unitary character of the Community trade mark thus stated will apply unless otherwise provided for in this Regulation;

Whereas the barrier of territoriality of the rights conferred on proprietors of trade marks by the laws of the Member States cannot be removed by approximation of laws; whereas in order to open up unrestricted economic activity in the whole of the common market for the benefit of undertakings, trade marks need to be created which are governed by a uniform Community law directly applicable in all Member States;

Whereas since the Treaty has not provided the specific powers to establish such a legal instrument, Article 235 of the Treaty should be applied;

Whereas the Community law relating to trade marks nevertheless does not replace the laws of the Member States on trade marks; whereas it would not in fact appear to be justified to require undertakings to apply for registration of their trade marks as Community trade marks; whereas national trade marks continue to be necessary for those undertakings which do not want protection of their trade marks at Community level;

Whereas the rights in a Community trade mark may not be obtained otherwise than by registration, and registration is to be refused in particular if the trade mark is not distinctive, if it is unlawful or if it conflicts with earlier rights;

Whereas the protection afforded by a Community trade mark, the function of which is in particular to guarantee the trade mark as an indication of origin, is absolute in the case of identity between

the mark and the sign and the goods or services; whereas the protection applies also in cases of similarity between the mark and the sign and the goods or services; whereas an interpretation should be given of the concept of similarity in relation to the likelihood of confusion; whereas the likelihood of confusion, the appreciation of which depends on numerous elements and, in particular, on the recognition of the trade mark on the market, the association which can be made with the used or registered sign, the degree of similarity between the trade mark and the sign and between the goods or services identified, constitutes the specific condition for such protection;

Whereas it follows from the principle of free flow of goods that the proprietor of a Community trade mark must not be entitled to prohibit its use by a third party in relation to goods which have been put into circulation in the Community, under the trade mark, by him or with his consent, save where there exist legitimate reasons for the proprietor to oppose further commercialization of the goods;

Whereas there is no justification for protecting Community trade marks or, as against them, any trade mark which has been registered before them, except where the trade marks are actually used;

Whereas a Community trade mark is to be regarded as an object of property which exists separately from the undertakings whose goods or services are designated by it; whereas accordingly, it must be capable of being transferred, subject to the overriding need to prevent the public being misled as a result of the transfer. It must also be capable of being charged as security in favour of a third party and of being the subject matter of licences;

Whereas administrative measures are necessary at Community level for implementing in relation to every trade mark the trade mark law created by this Regulation; whereas it is therefore essential, while retaining the Community's existing institutional structure and balance of powers, to establish an Office for Harmonization in the Internal Market (trade marks and designs) which is independent in relation to technical matters and has legal, administrative and financial autonomy; whereas to this end it is necessary and appropriate that it should be a body of the Community having legal personality and exercising the implementing powers which are conferred on it by this Regulation, and that it should operate within the framework of Community law without detracting from the competencies exercised by the Community institutions;

Whereas it is necessary to ensure that parties who are affected by decisions made by the Office are protected by the law in a manner which is suited to the special character of trade mark law; whereas to that end provision is made for an appeal to lie from decisions of the examiners and of the various divisions of the Office; whereas if the department whose decision is contested does not rectify its decision it is to remit the appeal to a Board of Appeal of the Office, which is to decide on it; whereas decisions of the Boards of Appeal are, in turn, amenable to actions before the Court of Justice of the European Communities, which has jurisdiction to annul or to alter the contested decision;

Whereas under Council Decision 88/591/ECSC, EEC, Euratom of 24 October 1988 establishing a Court of First Instance of the European Communities (4), as amended by Decision 93/350/Euratom, ECSC, EEC of 8 June 1993 (5), that Court shall exercise at the first instance the jurisdiction conferred on the Court of Justice by the Treaties establishing the Communities - with particular regard to appeals lodged under the second subparagraph of Article 173 of the EC Treaty - and by the acts adopted in implementation thereof, save as otherwise provided in an act setting up a body governed by Community law; whereas the jurisdiction which this Regulation confers on the Court of Justice to cancel and reform decisions of the appeal courts shall accordingly be exercised at the first instance by the Court in accordance with the above Decision;

Whereas in order to strengthen the protection of Community trade marks the Member States should

designate, having regard to their own national system, as limited a number as possible of national courts of first and second instance having jurisdiction in matters of infringement and validity of Community trade marks;

Whereas decisions regarding the validity and infringement of Community trade marks must have effect and cover the entire area of the Community, as this is the only way of preventing inconsistent decisions on the part of the courts and the Office and of ensuring that the unitary character of Community trade marks is not undermined; whereas the rules contained in the Brussels Convention of Jurisdiction and the Enforcement of Judgments in Civil and Commercial Matters will apply to all actions at law relating to Community trade marks, save where this Regulation derogates from those rules;

Whereas contradictory judgments should be avoided in actions which involve the same acts and the same parties and which are brought on the basis of a Community trade mark and parallel national trade marks; whereas for this purpose, when the actions are brought in the same Member State, the way in which this is to be achieved is a matter for national procedural rules, which are not prejudiced by this Regulation, whilst when the actions are brought in different Member States, provisions modelled on the rules on *lis pendens* and related actions of the abovementioned Brussels Convention appear appropriate;

Whereas in order to guarantee the full autonomy and independence of the Office, it is considered necessary to grant it an autonomous budget whose revenue comes principally from fees paid by the users of the system; whereas however, the Community budgetary procedure remains applicable as far as any subsidies chargeable to general budget of the European Communities are concerned; whereas moreover, the auditing of accounts should be undertaken by the Court of Auditors;

Whereas implementing measures are required for the Regulation's application, particularly as regards the adoption and amendment of fees regulations and an Implementing Regulation; whereas such measures should be adopted by the Commission, assisted by a Committee composed of representatives of the Member States, in accordance with the procedural rules laid down in Article 2, procedure III(b), of Council Decisions 87/373/EEC of 13 July 1987 laying down the procedures for the exercise of implementing powers conferred on the Commission (6),

HAS ADOPTED THIS REGULATION:

TITLE I GENERAL PROVISIONS

Article 1

Community trade mark

1. A trade mark for goods or services which is registered in accordance with the conditions contained in this Regulation and in the manner herein provided is hereinafter referred to as a 'Community trade mark'.
2. A Community trade mark shall have a unitary character. It shall have equal effect throughout the Community: it shall not be registered, transferred or surrendered or be the subject of a decision revoking the rights of the proprietor or declaring it invalid, nor shall its use be prohibited, save in respect of the whole Community. This principle shall apply unless otherwise provided in this Regulation.

Article 2

Office

An Office for Harmonization in the Internal Market (trade marks and designs), hereinafter referred to as 'the Office', is hereby established.

Article 3

Capacity to act

For the purpose of implementing this Regulation, companies or firms and other legal bodies shall be regarded as legal persons if, under the terms of the law governing them, they have the capacity in their own name to have rights and obligations of all kinds, to make contracts or accomplish other legal acts and to sue and be sued.

TITLE II THE LAW RELATING TO TRADE MARKS

SECTION 1

DEFINITION OF A COMMUNITY TRADE MARK OBTAINING A COMMUNITY TRADE MARK

Article 4

Signs of which a Community trade mark may consist

A Community trade mark may consist of any signs capable of being represented graphically, particularly words, including personal names, designs, letters, numerals, the shape of goods or of their packaging, provided that such signs are capable of distinguishing the goods or services of one undertaking from those of other undertakings.

Article 5

Persons who can be proprietors of Community trade marks

1. The following natural or legal persons, including authorities established under public law, may be proprietors of Community trade marks:

- (a) nationals of the Member States; or
- (b) nationals of other States which are parties to the Paris Convention for the protection of industrial property, hereinafter referred to as 'the Paris Convention'; or
- (c) nationals of States which are not parties to the Paris Convention who are domiciled or have their seat or who have real and effective industrial or commercial establishments within the territory of the Community or of a State which is party to the Paris Convention; or
- (d) nationals, other than those referred to under subparagraph (c), of any State which is not party to the Paris Convention and which, according to published findings, accords to nationals of

all the Member States the same protection for trade marks as it accords to its own nationals and, if nationals of the Member States are required to prove registration in the country of origin, recognizes the registration of Community trade marks as such proof.

2. With respect to the application of paragraph 1, stateless persons as defined by Article 1 of the Convention relating to the Status of Stateless Persons signed at New York on 28 September 1954, and refugees as defined by Article 1 of the Convention relating to the Status of Refugees signed at Geneva on 28 July 1951 and modified by the Protocol relating to the Status of Refugees signed at New York on 31 January 1967, shall be regarded as nationals of the country in which they have their habitual residence.

3. Persons who are nationals of a State covered by paragraph 1 (d) must prove that the trade mark for which an application for a Community trade mark has been submitted is registered in the State of origin, unless, according to published findings, the trade marks of nationals of the Member States are registered in the State of origin in question without proof of prior registration as a Community trade mark or as a national trade mark in a Member State.

Article 6

Means whereby a Community trade mark is obtained

A Community trade mark shall be obtained by registration.

Article 7

Absolute grounds for refusal

1. The following shall not be registered:

- (a) signs which do not conform to the requirements of Article 4;
- (b) trade marks which are devoid of any distinctive character;
- (c) trade marks which consist exclusively of signs or indications which may serve, in trade, to designate the kind, quality, quantity, intended purpose, value, geographical origin or the time of production of the goods or of rendering of the service, or other characteristics of the goods or service;
- (d) trade marks which consist exclusively of signs or indications which have become customary in the current language or in the bona fide and established practices of the trade;
- (e) signs which consist exclusively of:
 - (i) the shape which results from the nature of the goods themselves; or
 - (ii) the shape of goods which is necessary to obtain a technical result; or
 - (iii) the shape which gives substantial value to the goods;
- (f) trade marks which are contrary to public policy or to accepted principles of morality;
- (g) trade marks which are of such a nature as to deceive the public, for instance as to the nature, quality or geographical origin of the goods or service;
- (h) trade marks which have not been authorized by the competent authorities and are to be refused

pursuant to Article 6ter of the Paris Convention;

(i) trade marks which include badges, emblems or escutcheons other than those covered by Article 6ter of the Paris Convention and which are of particular public interest, unless the consent of the appropriate authorities to their registration has been given.

2. Paragraph 1 shall apply notwithstanding that the grounds of non-registrability obtain in only part of the Community.

3. Paragraph 1 (b), (c) and (d) shall not apply if the trade mark has become distinctive in relation to the goods or services for which registration is requested in consequence of the use which has been made of it.

Article 8

Relative grounds for refusal

1. Upon opposition by the proprietor of an earlier trade mark, the trade mark applied for shall not be registered:

- (a) if it is identical with the earlier trade mark and the goods or services for which registration is applied for are identical with the goods or services for which the earlier trade mark is protected;
- (b) if because of its identity with or similarity to the earlier trade mark and the identity or similarity of the goods or services covered by the trade marks there exists a likelihood of confusion on the part of the public in the territory in which the earlier trade mark is protected; the likelihood of confusion includes the likelihood of association with the earlier trade mark.

2. for the purposes of paragraph 1, 'Earlier trade marks` means:

- (a) trade marks of the following kinds with a date of application for registration which is earlier than the date of application for registration of the Community trade mark, taking account, where appropriate, of the priorities claimed in respect of those trade marks:
 - (i) Community trade marks;
 - (ii) trade marks registered in a Member State, or, in the case of Belgium, the Netherlands or Luxembourg, at the Benelux Trade Mark Office;
 - (iii) trade marks registered under international arrangements which have effect in a Member State;
- (b) applications for the trade marks referred to in subparagraph (a), subject to their registration;
- (c) trade marks which, on the date of application for registration of the Community trade mark, or, where appropriate, of the priority claimed in respect of the application for registration of the Community trade mark, are well known in a Member State, in the sense in which the words 'well known` are used in Article 6 bis of the Paris Convention.

3. Upon opposition by the proprietor of the trade mark, a trade mark shall not be registered where an agent or representative of the proprietor of the trade mark applies for registration thereof in his own name without the proprietor's consent, unless the agent or representative justifies his action.

4. Upon opposition by the proprietor of a non-registered trade mark or of another sign used in the course of trade of more than mere local significance, the trade mark applied for shall not be registered where and to the extent that, pursuant to the law of the Member State governing that

sign,

- (a) rights to that sign were acquired prior to the date of application for registration of the Community trade mark, or the date of the priority claimed for the application for registration of the Community trade mark;
- (b) that sign confers on its proprietor the right to prohibit the use of a subsequent trade mark.

5. Furthermore, upon opposition by the proprietor of an earlier trade mark within the meaning of paragraph 2, the trade mark applied for shall not be registered where it is identical with or similar to the earlier trade mark and is to be registered for goods or services which are not similar to those for which the earlier trade mark is registered, where in the case of an earlier Community trade mark the trade mark has a reputation in the Community and, in the case of an earlier national trade mark, the trade mark has a reputation in the Member State concerned and where the use without due cause of the trade mark applied for would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the earlier trade mark.

SECTION 2

EFFECTS OF COMMUNITY TRADE MARKS

Article 9

Rights conferred by a Community trade mark

1. A Community trade mark shall confer on the proprietor exclusive rights therein. The proprietor shall be entitled to prevent all third parties not having his consent from using in the course of trade:

- (a) any sign which is identical with the Community trade mark in relation to goods or services which are identical with those for which the Community trade mark is registered;
- (b) any sign where, because of its identity with or similarity to the Community trade mark and the identity or similarity of the goods or services covered by the Community trade mark and the sign, there exists a likelihood of confusion on the part of the public; the likelihood of confusion includes the likelihood of association between the sign and the trade mark;
- (c) any sign which is identical with or similar to the Community trade mark in relation to goods or services which are not similar to those for which the Community trade mark is registered, where the latter has a reputation in the Community and where use of that sign without due cause takes unfair advantage of, or is detrimental to, the distinctive character or the repute of the Community trade mark.

2. The following, inter alia, may be prohibited under paragraph 1:

- (a) affixing the sign to the goods or to the packaging thereof;
- (b) offering the goods, putting them on the market or stocking them for these purposes under that sign, or offering or supplying services thereunder;
- (c) importing or exporting the goods under that sign;
- (d) using the sign on business papers and in advertising.

3. The rights conferred by a Community trade mark shall prevail against third parties from the date of publication of registration of the trade mark. Reasonable compensation may, however, be

claimed in respect of matters arising after the date of publication of a Community trade mark application, which matters would, after publication of the registration of the trade mark, be prohibited by virtue of that publication. The court seized of the case may not decide upon the merits of the case until the registration has been published.

Article 10

Reproduction of Community trade marks in dictionaries

If the reproduction of a Community trade mark in a dictionary, encyclopaedia or similar reference work gives the impression that it constitutes the generic name of the goods or services for which the trade mark is registered, the publisher of the work shall, at the request of the proprietor of the Community trade mark, ensure that the reproduction of the trade mark at the latest in the next edition of the publication is accompanied by an indication that it is a registered trade mark.

Article 11

Prohibition on the use of a Community trade mark registered in the name of an agent or representative

Where a Community trade mark is registered in the name of the agent or representative of a person who is the proprietor of that trade mark, without the proprietor's authorization, the latter shall be entitled to oppose the use of his mark by his agent or representative if he has not authorized such use, unless the agent or representative justifies his action.

Article 12

Limitation of the effects of a Community trade mark

A Community trade mark shall not entitle the proprietor to prohibit a third party from using in the course of trade:

- (a) his own name or address;
- (b) indications concerning the kind, quality, quantity, intended purpose, value, geographical origin, the time of production of the goods or of rendering of the service, or other characteristics of the goods or service;
- (c) the trade mark where it is necessary to indicate the intended purpose of a product or service, in particular as accessories or spare parts,

provided he uses them in accordance with honest practices in industrial or commercial matters.

Article 13

Exhaustion of the rights conferred by a Community trade mark

1. A Community trade mark shall not entitle the proprietor to prohibit its use in relation to goods which have been put on the market in the Community under that trade mark by the proprietor or with

his consent.

2. Paragraph 1 shall not apply where there exist legitimate reasons for the proprietor to oppose further commercialization of the goods, especially where the condition of the goods is changed or impaired after they have been put on the market.

Article 14

Complementary application of national law relating to infringement

1. The effects of Community trade marks shall be governed solely by the provisions of this Regulation. In other respects, infringement of a Community trade mark shall be governed by the national law relating to infringement of a national trade mark in accordance with the provisions of Title X.

2. This Regulation shall not prevent actions concerning a Community trade mark being brought under the law of Member States relating in particular to civil liability and unfair competition.

3. The rules of procedure to be applied shall be determined in accordance with the provisions of Title X.

SECTION 3

USE OF COMMUNITY TRADE MARKS

Article 15

Use of Community trade marks

1. If, within a period of five years following registration, the proprietor has not put the Community trade mark to genuine use in the Community in connection with the goods or services in respect of which it is registered, or if such use has been suspended during an uninterrupted period of five years, the Community trade mark shall be subject to the sanctions provided for in this Regulation, unless there are proper reasons for non-use.

2. The following shall also constitute use within the meaning of paragraph 1:

- (a) use of the Community trade mark in a form differing in elements which do not alter the distinctive character of the mark in the form in which it was registered;
- (b) affixing of the Community trade mark to goods or to the packaging thereof in the Community solely for export purposes.

3. Use of the Community trade mark with the consent of the proprietor shall be deemed to constitute use by the proprietor.

SECTION 4

COMMUNITY TRADE MARKS AS OBJECTS OF PROPERTY

Article 16

Dealing with Community trade marks as national trade marks

1. Unless Articles 17 to 24 provide otherwise, a Community trade mark as an object of property shall be dealt with in its entirety, and for the whole area of the Community, as a national trade mark registered in the Member State in which, according to the Register of Community trade marks,

- (a) the proprietor has his seat or his domicile on the relevant date; or
- (b) where subparagraph (a) does not apply, the proprietor has an establishment on the relevant date.

2. In cases which are not provided for by paragraph 1, the Member State referred to in that paragraph shall be the Member State in which the seat of the Office is situated.

3. If two or more persons are mentioned in the Register of Community trade marks as joint proprietors, paragraph 1 shall apply to the joint proprietor first mentioned; failing this, it shall apply to the subsequent joint proprietors in the order in which they are mentioned. Where paragraph 1 does not apply to any of the joint proprietors, paragraph 2 shall apply.

Article 17

Transfer

1. A Community trade mark may be transferred, separately from any transfer of the undertaking, in respect of some or all of the goods or services for which it is registered.

2. A transfer of the whole of the undertaking shall include the transfer of the Community trade mark except where, in accordance with the law governing the transfer, there is agreement to the contrary or circumstances clearly dictate otherwise. This provision shall apply to the contractual obligation to transfer the undertaking.

3. Without prejudice to paragraph 2, an assignment of the Community trade mark shall be made in writing and shall require the signature of the parties to the contract, except when it is a result of a judgment; otherwise it shall be void.

4. Where it is clear from the transfer documents that because of the transfer the Community trade mark is likely to mislead the public concerning the nature, quality or geographical origin of the goods or services in respect of which it is registered, the Office shall not register the transfer unless the successor agrees to limit registration of the Community trade mark to goods or services in respect of which it is not likely to mislead.

5. On request of one of the parties a transfer shall be entered in the Register and published.

6. As long as the transfer has not been entered in the Register, the successor in title may not invoke the rights arising from the registration of the Community trade mark.

7. Where there are time limits to be observed vis-à-vis the Office, the successor in title may make the corresponding statements to the Office once the request for registration of the transfer has been received by the Office.

8. All documents which require notification to the proprietor of the Community trade mark in accordance with Article 77 shall be addressed to the person registered as proprietor.

Article 18

Transfer of a trade mark registered in the name of an agent

Where a Community trade mark is registered in the name of the agent or representative of a person who is the proprietor of that trade mark, without the proprietor's authorization, the latter shall be entitled to demand the assignment in his favour of the said registration, unless such agent or representative justifies his action.

Article 19

Rights in rem

1. A Community trade mark may, independently of the undertaking, be given as security or be the subject of rights in rem.
2. On request of one of the parties, rights mentioned in paragraph 1 shall be entered in the Register and published.

Article 20

Levy of execution

1. A Community trade mark may be levied in execution.
2. As regards the procedure for levy of execution in respect of a Community trade mark, the courts and authorities of the Member States determined in accordance with Article 16 shall have exclusive jurisdiction.
3. On request of one the parties, levy of execution shall be entered in the Register and published.

Article 21

Bankruptcy or like proceedings

1. Until such time as common rules for the Member States in this field enter into force, the only Member State in which a Community trade mark may be involved in bankruptcy or like proceedings shall be that in which such proceedings are first brought within the meaning of national law or of conventions applicable in this field.
2. Where a Community trade mark is involved in bankruptcy or like proceedings, on request of the competent national authority an entry to this effect shall be made in the Register and published.

Article 22

Licensing

1. A Community trade mark may be licensed for some or all of the goods or services for which it is registered and for the whole or part of the Community. A licence may be exclusive or non-exclusive.
2. The proprietor of a Community trade mark may invoke the rights conferred by that trade mark against a licensee who contravenes any provision in his licensing contract with regard to its duration,

the form covered by the registration in which the trade mark may be used, the scope of the goods or services for which the licence is granted, the territory in which the trade mark may be affixed, or the quality of the goods manufactured or of the services provided by the licensee.

3. Without prejudice to the provisions of the licensing contract, the licensee may bring proceedings for infringement of a Community trade mark only if its proprietor consents thereto. However, the holder of an exclusive licence may bring such proceedings if the proprietor of the trade mark, after formal notice, does not himself bring infringement proceedings within an appropriate period.

4. A licensee shall, for the purpose of obtaining compensation for damage suffered by him, be entitled to intervene in infringement proceedings brought by the proprietor of the Community trade mark.

5. On request of one of the parties the grant or transfer of a licence in respect of a Community trade mark shall be entered in the Register and published.

Article 23

Effects vis-à-vis third parties

1. Legal acts referred to in Article 17, 19 and 22 concerning a Community trade mark shall only have effects vis-à-vis third parties in all the Member States after entry in the Register. Nevertheless, such an act, before it is so entered, shall have effect vis-à-vis third parties who have acquired rights in the trade mark after the date of that act but who knew of the act at the date on which the rights were acquired.

2. Paragraph 1 shall not apply in the case of a person who acquires the Community trade mark or a right concerning the Community trade mark by way of transfer of the whole of the undertaking or by any other universal succession.

3. The effects vis-à-vis third parties of the legal acts referred to in Article 20 shall be governed by the law of the Member State determined in accordance with Article 16.

4. Until such time as common rules for the Member States in the field of bankruptcy enter into force, the effects vis-à-vis third parties of bankruptcy or like proceedings shall be governed by the law of the Member State in which such proceedings are first brought within the meaning of national law or of conventions applicable in this field.

Article 24

The application for a Community trade mark as an object of property

Articles 16 to 23 shall apply to applications for Community trade marks.

TITLE III APPLICATION FOR COMMUNITY TRADE MARKS

SECTION 1

FILING OF APPLICATIONS AND THE CONDITIONS WHICH GOVERN THEM

Article 25

Filing of applications

1. An application for a Community trade mark shall be filed, at the choice of the applicant,
 - (a) at the Office; or
 - (b) at the central industrial property office of a Member State or at the Benelux Trade Mark Office. An application filed in this way shall have the same effect as if it had been filed on the same date at the Office.
2. Where the application is filed at the central industrial property office of a Member State or at the Benelux Trade Mark Office, that office shall take all steps to forward the application to the Office within two weeks after filing. It may charge the applicant a fee which shall not exceed the administrative costs of receiving and forwarding the application.
3. Applications referred to in paragraph 2 which reach the Office more than one month after filing shall be deemed withdrawn.
4. Ten years after the entry into force of this Regulation, the Commission shall draw up a report on the operation of the system of filing applications for Community trade marks, together with any proposals for modifying this system.

Article 26

Conditions with which applications must comply

1. An application for a Community trade mark shall contain:
 - (a) a request for the registration of a Community trade mark;
 - (b) information identifying the applicant;
 - (c) a list of the goods or services in respect of which the registration is requested;
 - (d) a representation of the trade mark.
2. The application for a Community trade mark shall be subject to the payment of the application fee and, when appropriate, of one or more class fees.
3. An application for a Community trade mark must comply with the conditions laid down in the implementing Regulation referred to in Article 140.

Article 27

Date of filing

The date of filing of a Community trade mark application shall be the date on which documents containing the information specified in Article 26 (1) are filed with the Office by the applicant or, if the application has been filed with the central office of a Member State or with the Benelux Trade Mark Office, with that office, subject to payment of the application fee within a period of one month of filing the abovementioned documents.

Article 28

Classification

Goods and services in respect of which Community trade marks are applied for shall be classified in conformity with the system of classification specified in the Implementing Regulation.

SECTION 2

PRIORITY

Article 29

Right of priority

1. A person who has duly filed an application for a trade mark in or for any State party to the Paris Convention, or his successors in title, shall enjoy, for the purpose of filing a Community trade mark application for the same trade mark in respect of goods or services which are identical with or contained within those for which the application has been filed, a right of priority during a period of six months from the date of filing of the first application.
2. Every filing that is equivalent to a regular national filing under the national law of the State where it was made or under bilateral or multilateral agreements shall be recognized as giving rise to a right of priority.
3. By a regular national filing is meant any filing that is sufficient to establish the date on which the application was filed, whatever may be the outcome of the application.
4. A subsequent application for a trade mark which was the subject of a previous first application in respect of the same goods or services, and which is filed in or in respect of the same State shall be considered as the first application for the purposes of determining priority, provided that, at the date of filing of the subsequent application, the previous application has been withdrawn, abandoned or refused, without being open to public inspection and without leaving any rights outstanding, and has not served as a basis for claiming a right of priority. The previous application may not thereafter serve as a basis for claiming a right of priority.
5. If the first filing has been made in a State which is not a party to the Paris Convention, paragraphs 1 to 4 shall apply only in so far as that State, according to published findings, grants, on the basis of a first filing made at the Office and subject to conditions equivalent to those laid down in this Regulation, a right of priority having equivalent effect.

Article 30

Claiming priority

An applicant desiring to take advantage of the priority of a previous application shall file a declaration of priority and a copy of the previous application. If the language of the latter is not one of the languages of the Office, the applicant shall file a translation of the previous application in one of those languages.

Article 31

Effect of priority right

The right of priority shall have the effect that the date of priority shall count as the date of filing of the Community trade mark application for the purposes of establishing which rights take precedence.

Article 32

Equivalence of Community filing with national filing

A Community trade mark application which has been accorded a date of filing shall, in the Member States, be equivalent to a regular national filing, where appropriate with the priority claimed for the Community trade mark application.

SECTION 3

EXHIBITION PRIORITY

Article 33

Exhibition priority

1. If an applicant for a Community trade mark has displayed goods or services under the mark applied for, at an official or officially recognized international exhibition falling within the terms of the Convention on International Exhibitions signed at Paris on 22 November 1928 and last revised on 30 November 1972, he may, if he files the application within a period of six months from the date of the first display of the goods or services under the mark applied for, claim a right of priority from that date within the meaning of Article 31.
2. An applicant who wishes to claim priority pursuant to paragraph 1 must file evidence of the display of goods or services under the mark applied for under the conditions laid down in the Implementing Regulation.
3. An exhibition priority granted in a Member State or in a third country does not extend the period of priority laid down in Article 29.

SECTION 4

CLAIMING THE SENIORITY OF A NATIONAL TRADE MARK

Article 34

Claiming the seniority of a national trade mark

1. The proprietor of an earlier trade mark registered in a Member State, including a trade mark registered in the Benelux countries, or registered under international arrangements having effect in a Member State, who applies for an identical trade mark for registration as a Community trade

mark for goods or services which are identical with or contained within those for which the earlier trade mark has been registered, may claim for the Community trade mark the seniority of the earlier trade mark in respect of the Member State in or for which it is registered.

2. Seniority shall have the sole effect under this Regulation that, where the proprietor of the Community trade mark surrenders the earlier trade mark or allows it to lapse, he shall be deemed to continue to have the same rights as he would have had if the earlier trade mark had continued to be registered.

3. The seniority claimed for the Community trade mark shall lapse if the earlier trade mark the seniority of which is claimed is declared to have been revoked or to be invalid or if it is surrendered prior to the registration of the Community trade mark.

Article 35

Claiming seniority after registration of the Community trade mark

1. The proprietor of a Community trade mark who is the proprietor of an earlier identical trade mark registered in a Member State, including a trade mark registered in the Benelux countries, or of a trade mark registered under international arrangements having effect in a Member State, for identical goods or services, may claim the seniority of the earlier trade mark in respect of the Member State in or for which it is registered.

2. Article 34 (2) and (3) shall apply.

TITLE IV REGISTRATION PROCEDURE

SECTION 1

EXAMINATION OF APPLICATIONS

Article 36

Examination of the conditions of filing

1. The Office shall examine whether:

- (a) the Community trade mark application satisfies the requirements for the accordance of a date of filing in accordance with Article 27;
- (b) the Community trade mark application complies with the conditions laid down in the Implementing Regulation;
- (c) where appropriate, the class fees have been paid within the prescribed period.

2. Where the Community trade mark application does not satisfy the requirements referred to in paragraph 1, the Office shall request the applicant to remedy the deficiencies or the default on payment within the prescribed period.

3. If the deficiencies or the default on payment established pursuant to paragraph 1 (a) are not remedied within this period, the application shall not be dealt with as a Community trade mark application. If the applicant complies with the Office's request, the Office shall accord as the date of filing of the application the date on which the deficiencies or the default on payment established are remedied.

4. If the deficiencies established pursuant to paragraph 1 (b) are not remedied within the prescribed period, the Office shall refuse the application.
5. If the default on payment established pursuant to paragraph 1 (c) is not remedied within the prescribed period, the application shall be deemed to be withdrawn unless it is clear which categories of goods or services the amount paid is intended to cover.
6. Failure to satisfy the requirements concerning the claim to priority shall result in loss of the right of priority for the application.
7. Failure to satisfy the requirements concerning the claiming of seniority of a national trade mark shall result in loss of that right for the application.

Article 37

Examination of the conditions relating to the entitlement of the proprietor

1. Where, pursuant to Article 5, the applicant may not be the proprietor of a Community trade mark, the application shall be refused.
2. The application may not be refused before the applicant has been given the opportunity to withdraw his application or submit his observations.

Article 38

Examination as to absolute grounds for refusal

1. Where, under Article 7, a trade mark is ineligible for registration in respect of some or all of the goods or services covered by the Community trade mark application, the application shall be refused as regards those goods or services.
2. Where the trade mark contains an element which is not distinctive, and where the inclusion of said element in the trade mark could give rise to doubts as to the scope of protection of the trade mark, the Office may request, as a condition for registration of said trade mark, that the applicant state that he disclaims any exclusive right to such element. Any disclaimer shall be published together with the application or the registration of the Community trade mark, as the case may be.
3. The application shall not be refused before the applicant has been allowed the opportunity of withdrawing or amending the application or of submitting his observations.

SECTION 2

SEARCH

Article 39

Search

1. Once the Office has accorded a date of filing to a Community trade mark application and has established that the applicant satisfies the conditions referred to in Article 5, it shall draw

up a Community search report citing those earlier Community trade marks or Community trade mark applications discovered which may be invoked under Article 8 against the registration of the Community trade mark applied for.

2. As soon as a Community trade mark application has been accorded a date of filing, the Office shall transmit a copy thereof to the central industrial property office of each Member State which has informed the Office of its decision to operate a search in its own register of trade marks in respect of Community trade mark applications.

3. Each of the central industrial property offices referred to in paragraph 2 shall communicate to the Office within three months as from the date on which it received the Community trade mark application a search report which shall either cite those earlier national trade marks or trade mark applications discovered which may be invoked under Article 8 against the registration of the Community trade mark applied for, or state that the search has revealed no such rights.

4. An amount shall be paid by the Office to each central industrial property office for each search report provided by that office in accordance with paragraph 3. The amount, which shall be the same for each office, shall be fixed by the Budget Committee by means of a decision adopted by a majority of three-quarters of the representatives of the Member States.

5. The Office shall transmit without delay to the applicant for the Community trade mark the Community search report and the national search reports received within the time limit laid down in paragraph 3.

6. Upon publication of the Community trade mark application, which may not take place before the expiry of a period of one month as from the date on which the Office transmits the search reports to the applicant, the Office shall inform the proprietors of any earlier Community trade marks or Community trade mark applications cited in the Community search report of the publication of the Community trade mark application.

7. The Commission shall, five years after the opening of the Office for the filing of applications, submit to the Council a report on the operation of the system of searching resulting from this Article, including the payments made to Member States under paragraph 4, and, if necessary, appropriate proposals for amending this Regulation with a view to adapting the system of searching on the basis of the experience gained and bearing in mind developments in searching techniques.

SECTION 3

PUBLICATION OF THE APPLICATION

Article 40

Publication of the application

1. If the conditions which the application for a Community trade mark must satisfy have been fulfilled and if the period referred to in Article 39 (6) has expired, the application shall be published to the extent that it has not been refused pursuant to Articles 37 and 38.

2. Where, after publication, the application is refused under Articles 37 and 38, the decision that it has been refused shall be published upon becoming final.

SECTION 4

OBSERVATIONS BY THIRD PARTIES AND OPPOSITION

Article 41

Observations by third parties

1. Following the publication of the Community trade mark application, any natural or legal person and any group or body representing manufacturers, producers, suppliers of services, traders or consumers may submit to the Office written observations, explaining on which grounds under Article 7, in particular, the trade mark shall not be registered ex officio. They shall not be parties to the proceedings before the Office.
2. The observations referred to in paragraph 1 shall be communicated to the applicant who may comment on them.

Article 42

Opposition

1. Within a period of three months following the publication of a Community trade mark application, notice of opposition to registration of the trade mark may be given on the grounds that it may not be registered under Article 8:
 - (a) by the proprietors of earlier trade marks referred to in Article 8 (2) as well as licensees authorized by the proprietors of those trade marks, in respect of Article 8 (1) and (5);
 - (b) by the proprietors of trade marks referred to in Article 8 (3);
 - (c) by the proprietors of earlier marks or signs referred to in Article 8 (4) and by persons authorized under the relevant national law to exercise these rights.
2. Notice of opposition to registration of the trade mark may also be given, subject to the conditions laid down in paragraph 1, in the event of the publication of an amended application in accordance with the second sentence of Article 44 (2).
3. Opposition must be expressed in writing and must specify the grounds on which it is made. It shall not be treated as duly entered until the opposition fee has been paid. Within a period fixed by the Office, the opponent may submit in support of his case facts, evidence and arguments.

Article 43

Examination of opposition

1. In the examination of the opposition the Office shall invite the parties, as often as necessary, to file observations, within a period set them by the Office, on communications from the other parties or issued by itself.
2. If the applicant so requests, the proprietor of an earlier Community trade mark who has given notice of opposition shall furnish proof that, during the period of five years preceding the date of publication of the Community trade mark application, the earlier Community trade mark has been put to genuine use in the Community in connection with the goods or services in respect of which it is registered and which he cites as justification for his opposition, or that there are proper

reasons for non-use, provided the earlier Community trade mark has at that date been registered for not less than five years. In the absence of proof to this effect, the opposition shall be rejected. If the earlier Community trade mark has been used in relation to part only of the goods or services for which it is registered it shall, for the purposes of the examination of the opposition, be deemed to be registered in respect only of that part of the goods or services.

3. Paragraph 2 shall apply to earlier national trade marks referred to in Article 8 (2) (a), by substituting use in the Member State in which the earlier national trade mark is protected for use in the Community.

4. The Office may, if it thinks fit, invite the parties to make a friendly settlement.

5. If examination of the opposition reveals that the trade mark may not be registered in respect of some or all of the goods or services for which the Community trade mark application has been made, the application shall be refused in respect of those goods or services. Otherwise the opposition shall be rejected.

6. The decision refusing the application shall be published upon becoming final.

SECTION 5

WITHDRAWAL, RESTRICTION AND AMENDMENT OF THE APPLICATION

Article 44

Withdrawal, restriction and amendment of the application

1. The applicant may at any time withdraw his Community trade mark application or restrict the list of goods or services contained therein. Where the application has already been published, the withdrawal or restriction shall also be published.

2. In other respects, a Community trade mark application may be amended, upon request of the applicant, only by correcting the name and address of the applicant, errors of wording or of copying, or obvious mistakes, provided that such correction does not substantially change the trade mark or extend the list of goods or services. Where the amendments affect the representation of the trade mark or the list of goods or services and are made after publication of the application, the trade mark application shall be published as amended.

SECTION 6

REGISTRATION

Article 45

Registration

Where an application meets the requirements of this Regulation and where no notice of opposition has been given within the period referred to in Article 42 (1) or where opposition has been rejected by a definitive decision, the trade mark shall be registered as a Community trade mark, provided that the registration fee has been paid within the period prescribed. If the fee is not paid within this period the application shall be deemed to be withdrawn.

TITLE V DURATION, RENEWAL AND ALTERATION OF COMMUNITY TRADE MARKS

Article 46

Duration of registration

Community trade marks shall be registered for a period of ten years from the date of filing of the application. Registration may be renewed in accordance with Article 47 for further periods of ten years.

Article 47

Renewal

1. Registration of the Community trade mark shall be renewed at the request of the proprietor of the trade mark or any person expressly authorized by him, provided that the fees have been paid.
2. The Office shall inform the proprietor of the Community trade mark, and any person having a registered right in respect of the Community trade mark, of the expiry of the registration in good time before the said expiry. Failure to give such information shall not involve the responsibility of the Office.
3. The request for renewal shall be submitted within a period of six months ending on the last day of the month in which protection ends. The fees shall also be paid within this period. Failing this, the request may be submitted and the fees paid within a further period of six months following the day referred to in the first sentence, provided that an additional fee is paid within this further period.
4. Where the request is submitted or the fees paid in respect of only some of the goods or services for which the Community trade mark is registered, registration shall be renewed for those goods or services only.
5. Renewal shall take effect from the day following the date on which the existing registration expires. The renewal shall be registered.

Article 48

Alteration

1. The Community trade mark shall not be altered in the register during the period of registration or on renewal thereof.
2. Nevertheless, where the Community trade mark includes the name and address of the proprietor, any alteration thereof not substantially affecting the identity of the trade mark as originally registered may be registered at the request of the proprietor.
3. The publication of the registration of the alteration shall contain a representation of the Community trade mark as altered. Third parties whose rights may be affected by the alteration may challenge the registration thereof within a period of three months following publication.

TITLE VI SURRENDER, REVOCATION AND INVALIDITY

SECTION 1

SURRENDER

Article 49

Surrender

1. A Community trade mark may be surrendered in respect of some or all of the goods or services for which it is registered.
2. The surrender shall be declared to the Office in writing by the proprietor of the trade mark. It shall not have effect until it has been entered in the Register.
3. Surrender shall be entered only with the agreement of the proprietor of a right entered in the Register. If a licence has been registered, surrender shall only be entered in the Register if the proprietor of the trade mark proves that he has informed the licensee of his intention to surrender; this entry shall be made on expiry of the period prescribed by the Implementing Regulation.

SECTION 2

GROUNDS FOR REVOCATION

Article 50

Grounds for revocation

1. The rights of the proprietor of the Community trade mark shall be declared to be revoked on application to the Office or on the basis of a counterclaim in infringement proceedings:
 - (a) if, within a continuous period of five years, the trade mark has not been put to genuine use in the Community in connection with the goods or services in respect of which it is registered, and there are no proper reasons for non-use; however, no person may claim that the proprietor's rights in a Community trade mark should be revoked where, during the interval between expiry of the five-year period and filing of the application or counterclaim, genuine use of the trade mark has been started or resumed; the commencement or resumption of use within a period of three months preceding the filing of the application or counterclaim which began at the earliest on expiry of the continuous period of five years of non-use shall, however, be disregarded where preparations for the commencement or resumption occur only after the proprietor becomes aware that the application or counterclaim may be filed;
 - (b) if, in consequence of acts or inactivity of the proprietor, the trade mark has become the common name in the trade for a product or service in respect of which it is registered;
 - (c) if, in consequence of the use made of it by the proprietor of the trade mark or with his consent in respect of the goods or services for which it is registered, the trade mark is liable to mislead the public, particularly as to the nature, quality or geographical origin of those goods or services;
 - (d) if the proprietor of the trade mark no longer satisfies the conditions laid down by Article 5.
2. Where the grounds for revocation of rights exist in respect of only some of the goods or services for which the Community trade mark is registered, the rights of the proprietor shall be declared to be revoked in respect of those goods or services only.

SECTION 3

GROUNDS FOR INVALIDITY

Article 51

Absolute grounds for invalidity

1. A Community trade mark shall be declared invalid on application to the Office or on the basis of a counterclaim in infringement proceedings,

- (a) where the Community trade mark has been registered in breach of the provisions of Article 5 or of Article 7;
- (b) where the applicant was acting in bad faith when he filed the application for the trade mark.

2. Where the Community trade mark has been registered in breach of the provisions of Article 7 (1) (b), (c) or (d), it may nevertheless not be declared invalid if, in consequence of the use which has been made of it, it has after registration acquired a distinctive character in relation to the goods or services for which it is registered.

3. Where the ground for invalidity exists in respect of only some of the goods or services for which the Community trade mark is registered, the trade mark shall be declared invalid as regards those goods or services only.

Article 52

Relative grounds for invalidity

1. A Community trade mark shall be declared invalid on application to the Office or on the basis of a counterclaim in infringement proceedings:

- (a) where there is an earlier trade mark as referred to in Article 8 (2) and the conditions set out in paragraph 1 or paragraph 5 of that Article are fulfilled;
- (b) where there is a trade mark as referred to in Article 8 (3) and the conditions set out in that paragraph are fulfilled;
- (c) where there is an earlier right as referred to in Article 8 (4) and the conditions set out in that paragraph are fulfilled.

2. A Community trade mark shall also be declared invalid on application to the Office or on the basis of a counterclaim in infringement proceedings where the use of such trade mark may be prohibited pursuant to the national law governing the protection of any other earlier right in particular:

- (a) a right to a name;
- (b) a right of personal portrayal;
- (c) a copyright;
- (d) an industrial property right.

3. A Community trade mark may not be declared invalid where the proprietor of a right referred to in paragraphs 1 or 2 consents expressly to the registration of the Community trade mark before

submission of the application for a declaration of invalidity or the counterclaim.

4. Where the proprietor of one of the rights referred to in paragraphs 1 or 2 has previously applied for a declaration that a Community trade mark is invalid or made a counterclaim in infringement proceedings, he may not submit a new application for a declaration of invalidity or lodge a counterclaim on the basis of another of the said rights which he could have invoked in support of his first application or counterclaim.

5. Article 51 (3) shall apply.

Article 53

Limitation in consequence of acquiescence

1. Where the proprietor of a Community trade mark has acquiesced, for a period of five successive years, in the use of a later Community trade mark in the Community while being aware of such use, he shall no longer be entitled on the basis of the earlier trade mark either to apply for a declaration that the later trade mark is invalid or to oppose the use of the later trade mark in respect of the goods or services for which the later trade mark has been used, unless registration of the later Community trade mark was applied for in bad faith.

2. Where the proprietor of an earlier national trade mark as referred to in Article 8 (2) or of another earlier sign referred to in Article 8 (4) has acquiesced, for a period of five successive years, in the use of a later Community trade mark in the Member State in which the earlier trade mark or the other earlier sign is protected while being aware of such use, he shall no longer be entitled on the basis of the earlier trade mark or of the other earlier sign either to apply for a declaration that the later trade mark is invalid or to oppose the use of the later trade mark in respect of the goods or services for which the later trade mark has been used, unless registration of the later Community trade mark was applied for in bad faith.

3. In the cases referred to in paragraphs 1 and 2, the proprietor of a later Community trade mark shall not be entitled to oppose the use of the earlier right, even though that right may no longer be invoked against the later Community trade mark.

SECTION 4

CONSEQUENCES OF REVOCATION AND INVALIDITY

Article 54

Consequences of revocation and invalidity

1. The Community trade mark shall be deemed not to have had, as from the date of the application for revocation or of the counterclaim, the effects specified in this Regulation, to the extent that the rights of the proprietor have been revoked. An earlier date, on which one of the grounds for revocation occurred, may be fixed in the decision at the request of one of the parties.

2. The Community trade mark shall be deemed not to have had, as from the outset, the effects specified in this Regulation, to the extent that the trade mark has been declared invalid.

3. Subject to the national provisions relating either to claims for compensation for damage caused by negligence or lack of good faith on the part of the proprietor of the trade mark, or to unjust

enrichment, the retroactive effect of revocation or invalidity of the trade mark shall not affect:

- (a) any decision on infringement which has acquired the authority of a final decision and been enforced prior to the revocation or invalidity decision;
- (b) any contract concluded prior to the revocation or invalidity decision, in so far as it has been performed before that decision; however, repayment, to an extent justified by the circumstances, of sums paid under the relevant contract, may be claimed on grounds of equity.

SECTION 5

PROCEEDINGS IN THE OFFICE IN RELATION TO REVOCATION OR INVALIDITY

Article 55

Application for revocation or for a declaration of invalidity

1. An application for revocation of the rights of the proprietor of a Community trade mark or for a declaration that the trade mark is invalid may be submitted to the Office:

- (a) where Articles 50 and 51 apply, by any natural or legal person and any group or body set up for the purpose of representing the interests of manufacturers, producers, suppliers of services, traders or consumers, which under the terms of the law governing it has the capacity in its own name to sue and be sued;
- (b) where Article 52 (1) applies, by the persons referred to in Article 42 (1);
- (c) where Article 52 (2) applies, by the owners of the earlier rights referred to in that provision or by the persons who are entitled under the law of the Member State concerned to exercise the rights in question.

2. The application shall be filed in a written reasoned statement. It shall not be deemed to have been filed until the fee has been paid.

3. An application for revocation or for a declaration of invalidity shall be inadmissible if an application relating to the same subject matter and cause of action, and involving the same parties, has been adjudicated on by a court in a Member State and has acquired the authority of a final decision.

Article 56

Examination of the application

1. In the examination of the application for revocation of rights or for a declaration of invalidity, the Office shall invite the parties, as often as necessary, to file observations, within a period to be fixed by the Office, on communications from the other parties or issued by itself.

2. If the proprietor of the Community trade mark so requests, the proprietor of an earlier Community trade mark, being a party to the invalidity proceedings, shall furnish proof that, during the period of five years preceding the date of the application for a declaration of invalidity, the earlier Community trade mark has been put to genuine use in the Community in connection with the goods or services in respect of which it is registered and which he cites as justification for his application, or that there are proper reasons for non-use, provided the earlier Community trade mark has at

that date been registered for non-use, provided the earlier Community trade mark has at that date been registered for not less than five years. If, at the date on which the Community trade mark application was published, the earlier Community trade mark had been registered for not less than five years, the proprietor of the earlier Community trade mark shall furnish proof that, in addition, the conditions contained in Article 43 (2) were satisfied at that date. In the absence of proof to this effect the application for a declaration of invalidity shall be rejected. If the earlier Community trade mark has been used in relation to part only of the goods or services for which it is registered it shall, for the purpose of the examination of the application for a declaration of invalidity, be deemed to be registered in respect only of that part of the goods or services.

3. Paragraph 2 shall apply to earlier national trade marks referred to in Article 8 (2) (a), by substituting use in the Member State in which the earlier national trade mark is protected for use in the Community.

4. The Office may, if it thinks fit, invite the parties to make a friendly settlement.

5. If the examination of the application for revocation of rights or for a declaration of invalidity reveals that the trade mark should not have been registered in respect of some or all of the goods or services for which it is registered, the rights of the proprietor of the Community trade mark shall be revoked or it shall be declared invalid in respect of those goods or services. Otherwise the application for revocation of rights or for a declaration of invalidity shall be rejected.

6. The decision revoking the rights of the proprietor of the Community trade mark or declaring it invalid shall be entered in the Register upon becoming final.

TITLE VII APPEALS

Article 57

Decisions subject to appeal

1. An appeal shall lie from decisions of the examiners, Opposition Divisions, Administration of Trade Marks and Legal Divisions and Cancellation Divisions. It shall have suspensive effect.

2. A decision which does not terminate proceedings as regards one of the parties can only be appealed together with the final decision, unless the decision allows separate appeal.

Article 58

Persons entitled to appeal and to be parties to appeal proceedings

Any party to proceedings adversely affected by a decision may appeal. Any other parties to the proceedings shall be parties to the appeal proceedings as of right.

Article 59

Time limit and form of appeal

Notice of appeal must be filed in writing at the Office within two months after the date of notification of the decision appealed from. The notice shall be deemed to have been filed only when the fee

for appeal has been paid. Within four months after the date of notification of the decision, a written statement setting out the grounds of appeal must be filed.

Article 60

Interlocutory revision

1. If the department whose decision is contested considers the appeal to be admissible and well founded, it shall rectify its decision. This shall not apply where the appellant is opposed by another party to the proceedings.
2. If the decision is not rectified within one month after receipt of the statement of grounds, the appeal shall be remitted to the Board of Appeal without delay, and without comment as to its merit.

Article 61

Examination of appeals

1. If the appeal is admissible, the Board of Appeal shall examine whether the appeal is allowable.
2. In the examination of the appeal, the Board of Appeal shall invite the parties, as often as necessary, to file observations, within a period to be fixed by the Board of Appeal, on communications from the other parties or issued by itself.

Article 62

Decisions in respect of appeals

1. Following the examination as to the allowability of the appeal, the Board of Appeal shall decide on the appeal. The Board of Appeal may either exercise any power within the competence of the department which was responsible for the decision appealed or remit the case to that department for further prosecution.
2. If the Board of Appeal remits the case for further prosecution to the department whose decision was appealed, that department shall be bound by the ratio decidendi of the Board of Appeal, in so far as the facts are the same.
3. The decisions of the Boards of Appeal shall take effect only as from the date of expiration of the period referred to in Article 63 (5) or, if an action has been brought before the Court of Justice within that period, as from the date of rejection of such action.

Article 63

Actions before the Court of Justice

1. Actions may be brought before the Court of Justice against decisions of the Boards of Appeal on appeals.

2. The action may be brought on grounds of lack of competence, infringement of an essential procedural requirement, infringement of the Treaty, of this Regulation or of any rule of law relating to their application or misuse of power.
3. The Court of Justice has jurisdiction to annul or to alter the contested decision.
4. The action shall be open to any party to proceedings before the Board of Appeal adversely affected by its decision.
5. The action shall be brought before the Court of Justice within two months of the date of notification of the decision of the Board of Appeal.
6. The Office shall be required to take the necessary measures to comply with the judgment of the Court of Justice.

TITLE VIII COMMUNITY COLLECTIVE MARKS

Article 64

Community collective marks

1. A Community collective mark shall be a Community trade mark which is described as such when the mark is applied for and is capable of distinguishing the goods or services of the members of the association which is the proprietor of the mark from those of other undertakings. Associations of manufacturers, producers, suppliers of services, or traders which, under the terms of the law governing them, have the capacity in their own name to have rights and obligations of all kinds, to make contracts or accomplish other legal acts and to sue and be sued, as well as legal persons governed by public law, may apply for Community collective marks.
2. In derogation from Article 7 (1) (c), signs or indications which may serve, in trade, to designate the geographical origin of the goods or services may constitute Community collective marks within the meaning of paragraph 1. A collective mark shall not entitle the proprietor to prohibit a third party from using in the course of trade such signs or indications, provided he uses them in accordance with honest practices in industrial or commercial matters; in particular, such a mark may not be invoked against a third party who is entitled to use a geographical name.
3. The provisions of this Regulation shall apply to Community collective marks, unless Articles 65 to 72 provide otherwise.

Article 65

Regulations governing use of the mark

1. An applicant for a Community collective mark must submit regulations governing its use within the period prescribed.
2. The regulations governing use shall specify the persons authorized to use the mark, the conditions of membership of the association and, where they exist, the conditions of use of the mark including sanctions. The regulations governing use of a mark referred to in Article 64 (2) must authorize any person whose goods or services originate in the geographical area concerned to become a member of the association which is the proprietor of the mark.

Article 66

Refusal of the application

1. In addition to the grounds for refusal of a Community trade mark application provided for in Articles 36 and 38, an application for a Community collective mark shall be refused where the provisions of Article 64 or 65 are not satisfied, or where the regulations governing use are contrary to public policy or to accepted principles of morality.
2. An application for a Community collective mark shall also be refused if the public is liable to be misled as regards the character or the significance of the mark, in particular if it is likely to be taken to be something other than a collective mark.
3. An application shall not be refused if the applicant, as a result of amendment of the regulations governing use, meets the requirements of paragraphs 1 and 2.

Article 67

Observations by third parties

Apart from the cases mentioned in Article 41, any person, group or body referred to in that Article may submit to the Office written observations based on the particular grounds on which the application for a Community collective mark should be refused under the terms of Article 66.

Article 68

Use of marks

Use of a Community collective mark by any person who has authority to use it shall satisfy the requirements of this Regulation, provided that the other conditions which this Regulation imposes with regard to the use of Community trade marks are fulfilled.

Article 69

Amendment of the regulations governing use of the mark

1. The proprietor of a Community collective mark must submit to the Office any amended regulations governing use.
2. The amendment shall not be mentioned in the Register if the amended regulations do not satisfy the requirements of Article 65 or involve one of the grounds for refusal referred to in Article 66.
3. Article 67 shall apply to amended regulations governing use.
4. For the purposes of applying this Regulation, amendments to the regulations governing use shall take effect only from the date of entry of the mention of the amendment in the Register.

Article 70

Persons who are entitled to bring an action for infringement

1. The provisions of Article 22 (3) and (4) concerning the rights of licensees shall apply to every person who has authority to use a Community collective mark.
2. The proprietor of a Community collective mark shall be entitled to claim compensation on behalf of persons who have authority to use the mark where they have sustained damage in consequence of unauthorized use of the mark.

Article 71

Grounds for revocation

Apart from the grounds for revocation provided for in Article 50, the rights of the proprietor of a Community collective mark shall be revoked on application to the Office or on the basis of a counterclaim in infringement proceedings, if:

- (a) the proprietor does not take reasonable steps to prevent the mark being used in a manner incompatible with the conditions of use, where these exist, laid down in the regulations governing use, amendments to which have, where appropriate, been mentioned in the Register;
- (b) the manner in which the mark has been used by the proprietor has caused it to become liable to mislead the public in the manner referred to in Article 66 (2);
- (c) an amendment to the regulations governing use of the mark has been mentioned in the Register in breach of the provisions of Article 69 (2), unless the proprietor of the mark, by further amending the regulations governing use, complies with the requirements of those provisions.

Article 72

Grounds for invalidity

Apart from the grounds for invalidity provided for in Articles 51 and 52, a Community collective mark which is registered in breach of the provisions of Article 66 shall be declared invalid on application to the Office or on the basis of a counterclaim in infringement proceedings, unless the proprietor of the mark, by amending the regulations governing use, complies with the requirements of those provisions.

TITLE IX PROCEDURE

SECTION 1

GENERAL PROVISIONS

Article 73

Statement of reasons on which decisions are based

Decisions of the Office shall state the reasons on which they are based. They shall be based only on reasons or evidence on which the parties concerned have had an opportunity to present their comments.

Article 74

Examination of the facts by the Office of its own motion

1. In proceedings before it the Office shall examine the facts of its own motion; however, in proceedings relating to relative grounds for refusal of registration, the Office shall be restricted in this examination to the facts, evidence and arguments provided by the parties and the relief sought.
2. The Office may disregard facts or evidence which are not submitted in due time by the parties concerned.

Article 75

Oral proceedings

1. If the Office considers that oral proceedings would be expedient they shall be held either at the instance of the Office or at the request of any party to the proceedings.
2. Oral proceedings before the examiners, the Opposition Division and the Administration of Trade Marks and Legal Division shall not be public.
3. Oral proceedings, including delivery of the decision, shall be public before the Cancellation Division and the Boards of Appeal, in so far as the department before which the proceedings are taking place does not decide otherwise in cases where admission of the public could have serious and unjustified disadvantages, in particular for a party to the proceedings.

Article 76

Taking of evidence

1. In any proceedings before the Office, the means of giving or obtaining evidence shall include the following:
 - (a) hearing the parties;
 - (b) requests for information;
 - (c) the production of documents and items of evidence;
 - (d) hearing witnesses;
 - (e) opinions by experts;
 - (f) statements in writing sworn or affirmed or having a similar effect under the law of the State in which the statement is drawn up.
2. The relevant department may commission one of its members to examine the evidence adduced.
3. If the Office considers it necessary for a party, witness or expert to give evidence orally, it shall issue a summons to the person concerned to appear before it.

4. The parties shall be informed of the hearing of a witness or expert before the Office. They shall have the right to be present and to put questions to the witness or expert.

Article 77

Notification

The Office shall, as a matter of course, notify those concerned of decisions and summonses and of any notice or other communication from which a time limit is reckoned, or of which those concerned must be notified under other provisions of this Regulation or of the Implementing Regulation, or of which notification has been ordered by the President of the Office.

Article 78

Restitutio in integrum

1. The applicant for or proprietor of a Community trade mark or any other party to proceedings before the Office who, in spite of all due care required by the circumstances having been taken, was unable to observe a time limit vis-à-vis the Office shall, upon application, have his rights re-established if the non-observance in question has the direct consequence, by virtue of the provisions of this Regulation, of causing the loss of any right or means of redress.
2. The application must be filed in writing within two months from the removal of the cause of non-compliance with the time limit. The omitted act must be completed within this period. The application shall only be admissible within the year immediately following the expiry of the unobserved time limit. In the case of non-submission of the request for renewal of registration or of non-payment of a renewal fee, the further period of six months provided in Article 47 (3), third sentence, shall be deducted from the period of one year.
3. The application must state the grounds on which it is based and must set out the facts on which it relies. It shall not be deemed to be filed until the fee for re-establishment of rights has been paid.
4. The department competent to decide on the omitted act shall decide upon the application.
5. The provisions of this Article shall not be applicable to the time limits referred to in paragraph 2 of this Article, Articles 29 (1) and 42 (1).
6. Where the applicant for or proprietor of a Community trade mark has his rights re-established, he may not invoke his rights vis-à-vis a third party who, in good faith, has put goods on the market or supplied services under a sign which is identical with or similar to the Community trade mark in the course of the period between the loss of rights in the application or in the Community trade mark and publication of the mention of re-establishment of those rights.
7. A third party who may avail himself of the provisions of paragraph 6 may bring third party proceedings against the decision re-establishing the rights of the applicant for or proprietor of a Community trade mark within a period of two months as from the date of publication of the mention of re-establishment of those rights.
8. Nothing in this Article shall limit the right of a Member State to grant restitutio in integrum in respect of time limits provided for in this Regulation and to be observed vis-à-vis the authorities

of such State.

Article 79

Reference to general principles

In the absence of procedural provisions in this Regulation, the Implementing Regulation, the fees regulations or the rules of procedure of the Boards of Appeal, the Office shall take into account the principles of procedural law generally recognized in the Member States.

Article 80

Termination of financial obligations

1. Rights of the Office to the payment of a fee shall be extinguished after four years from the end of the calendar year in which the fee fell due.
2. Rights against the Office for the refunding of fees or sums of money paid in excess of a fee shall be extinguished after four years from the end of the calendar year in which the right arose.
3. The period laid down in paragraphs 1 and 2 shall be interrupted in the case covered by paragraph 1 by a request for payment of the fee and in the case covered by paragraph 2 by a reasoned claim in writing. On interruption it shall begin again immediately and shall end at the latest six years after the end of the year in which it originally began, unless, in the meantime, judicial proceedings to enforce the right have begun; in this case the period shall end at the earliest one year after the judgement has acquired the authority of a final decision.

SECTION 2

COSTS

Article 81

Costs

1. The losing party in opposition proceedings, proceedings for revocation, proceedings for a declaration of invalidity or appeal proceedings shall bear the fees incurred by the other party as well as all costs, without prejudice to Article 115 (6), incurred by him essential to the proceedings, including travel and subsistence and the remuneration of an agent, adviser or advocate, within the limits of the scales set for each category of costs under the conditions laid down in the Implementing Regulation.
2. However, where each party succeeds on some and fails on other heads, or if reasons of equity so dictate, the Opposition Division, Cancellation Division or Board of Appeal shall decide a different apportionment of costs.
3. The party who terminates the proceedings by withdrawing the Community trade mark application, the opposition, the application for revocation of rights, the application for a declaration of invalidity or the appeal, or by not renewing registration of the Community trade mark or by surrendering the Community trade mark, shall bear the fees and the costs incurred by the other party as stipulated

in paragraphs 1 and 2.

4. Where a case does not proceed to judgment the costs shall be at the discretion of the Opposition Division, Cancellation Division or Board of Appeal.

5. Where the parties conclude before the Opposition Division, Cancellation Division or Board of Appeal a settlement of costs differing from that provided for in the preceding paragraphs, the department concerned shall take note of that agreement.

6. On request the registry of the Opposition Division or Cancellation Division or Board of Appeal shall fix the amount of the costs to be paid pursuant to the preceding paragraphs. The amount so determined may be reviewed by a decision of the Opposition Division or Cancellation Division or Board of Appeal on a request filed within the prescribed period.

Article 82

Enforcement of decisions fixing the amount of costs

1. Any final decision of the Office fixing the amount of costs shall be enforceable.

2. Enforcement shall be governed by the rules of civil procedure in force in the State in the territory of which it is carried out. The order for its enforcement shall be appended to the decision, without other formality than verification of the authenticity of the decision, by the national authority which the Government of each Member State shall designate for this purpose and shall make known to the Office and to the Court of Justice.

3. When these formalities have been completed on application by the party concerned, the latter may proceed to enforcement in accordance with the national law, by bringing the matter directly before the competent authority.

4. Enforcement may be suspended only by a decision of the Court of Justice. However, the courts of the country concerned shall have jurisdiction over complaints that enforcement is being carried out in an irregular manner.

SECTION 3

INFORMATION OF THE PUBLIC AND OF THE OFFICIAL AUTHORITIES OF THE MEMBER STATES

Article 83

Register of Community trade marks

The Office shall keep a register to be known as the Register of Community trade marks, which shall contain those particulars the registration or inclusion of which is provided for by this Regulation or by the Implementing Regulation. The Register shall be open to public inspection.

Article 84

Inspection of files

1. The files relating to Community trade mark applications which have not yet been published shall not be made available for inspection without the consent of the applicant.
2. Any person who can prove that the applicant for a Community trade mark has stated that after the trade mark has been registered he will invoke the rights under it against him may obtain inspection of the files prior to the publication of that application and without the consent of the applicant.
3. Subsequent to the publication of the Community trade mark application, the files relating to such application and the resulting trade mark may be inspected on request.
4. However, where the files are inspected pursuant to paragraphs 2 or 3, certain documents in the file may be withheld from inspection in accordance with the provisions of the Implementing Regulation.

Article 85

Periodical publications

The Office shall periodically publish:

- (a) a Community Trade Marks Bulletin containing entries made in the Register of Community trade marks as well as other particulars the publication of which is prescribed by this Regulation or by the Implementing Regulation;
- (b) an Official Journal containing notices and information of a general character issued by the President of the Office, as well as any other information relevant to this Regulation or its implementation.

Article 86

Administrative cooperation

Unless otherwise provided in this Regulation or in national laws, the Office and the courts or authorities of the Member States shall on request give assistance to each other by communicating information or opening files for inspection. Where the Office lays files open to inspection by courts, Public Prosecutors' Offices or central industrial property offices, the inspection shall not be subject to the restrictions laid down in Article 84.

Article 87

Exchange of publications

1. The Office and the central industrial property offices of the Member States shall despatch to each other on request and for their own use one or more copies of their respective publications free of charge.
2. The Office may conclude agreements relating to the exchange or supply of publications.

SECTION 4

REPRESENTATION

Article 88

General principles of representation

1. Subject to the provisions of paragraph 2, no person shall be compelled to be represented before the Office.
2. Without prejudice to paragraph 3, second sentence, natural or legal persons not having either their domicile or their principal place of business or a real and effective industrial or commercial establishment in the Community must be represented before the Office in accordance with Article 89 (1) in all proceedings established by this Regulation, other than in filing an application for a Community trade mark; the Implementing Regulation may permit other exceptions.
3. Natural or legal persons having their domicile or principal place of business or a real and effective industrial or commercial establishment in the Community may be represented before the Office by an employee, who must file with it a signed authorization for insertion on the files, the details of which are set out in the Implementing Regulation. An employee of a legal person to which this paragraph applies may also represent other legal persons which have economic connections with the first legal person, even if those other legal persons have neither their domicile nor their principal place of business nor a real and effective industrial or commercial establishment within the Community.

Article 89

Professional representatives

1. Representation of natural or legal persons before the Office may only be undertaken by;
 - (a) any legal practitioner qualified in one of the Member States and having his place of business within the Community, to the extent that he is entitled, within the said State, to act as a representative in trade mark matters; or
 - (b) professional representatives whose names appear on the list maintained for this purpose by the Office.Representatives acting before the Office must file with it a signed authorization for insertion on the files, the details of which are set out in the Implementing Regulation.
2. Any natural person who fulfils the following conditions may be entered on the list of professional representatives:
 - (a) he must be a national of one of the Member States;
 - (b) he must have his place of business or employment in the Community;
 - (c) he must be entitled to represent natural or legal persons in trade mark matters before the central industrial property office of the Member State in which he has his place of business or employment. Where, in that State, the entitlement is not conditional upon the requirement of special professional qualifications, persons applying to be entered on the list who act in trade mark matters before the central industrial property office of the said State must have habitually so acted for at least five years. However, persons whose professional qualification to represent natural or legal persons in trade mark matters before the central industrial property office of one of the Member

States is officially recognized in accordance with the regulations laid down by such State shall not be subject to the condition of having exercised the profession.

3. Entry shall be effected upon request, accompanied by a certificate furnished by the central industrial property office of the Member State concerned, which must indicate that the conditions laid down in paragraph 2 are fulfilled.

4. The President of the Office may grant exemption from:

- (a) the requirement of paragraph 2 (c), second sentence, if the applicant furnishes proof that he has acquired the requisite qualification in another way;
- (b) the requirement of paragraph 2 (a) in special circumstances.

5. The conditions under which a person may be removed from the list of professional representatives shall be laid down in the Implementing Regulation.

TITLE X JURISDICTION AND PROCEDURE IN LEGAL ACTIONS RELATING TO COMMUNITY TRADE MARKS

SECTION 1

APPLICATION OF THE CONVENTION ON JURISDICTION AND ENFORCEMENT

Article 90

Application of the Convention on Jurisdiction and Enforcement

1. Unless otherwise specified in this Regulation, the Convention on Jurisdiction and the Enforcement of Judgments in Civil and Commercial Matters, signed in Brussels on 27 September 1968, as amended by the Conventions on the Accession to that Convention of the States acceding to the European Communities, the whole of which Convention and of which Conventions of Accession are hereinafter referred to as the 'Convention on Jurisdiction and Enforcement', shall apply to proceedings relating to Community trade marks and applications for Community trade marks, as well as to proceedings relating to simultaneous and successive actions on the basis of Community trade marks and national trade marks.

2. In the case of proceedings in respect of the actions and claims referred to in Article 92:

- (a) Articles 2, 4, 5 (1), (3), (4) and (5) and Article 24 of the Convention on Jurisdiction and Enforcement shall not apply;
- (b) Articles 17 and 18 of that Convention shall apply subject to the limitations in Article 93 (4) of this Regulation;
- (c) the provisions of Title II of that Convention which are applicable to persons domiciled in a Member State shall also be applicable to persons who do not have a domicile in any Member State but have an establishment therein.

SECTION 2

DISPUTES CONCERNING THE INFRINGEMENT AND VALIDITY OF COMMUNITY TRADE MARKS

Article 91

Community trade mark courts

1. The Member States shall designate in their territories as limited a number as possible of national courts and tribunals of first and second instance, hereinafter referred to as 'Community trade mark courts', which shall perform the functions assigned to them by this Regulation.
2. Each Member State shall communicate to the Commission within three years of the entry into force of this Regulation a list of Community trade mark courts indicating their names and their territorial jurisdiction.
3. Any change made after communication of the list referred to in paragraph 2 in the number, names or territorial jurisdiction of the courts shall be notified without delay by the Member State concerned to the Commission.
4. The information referred to in paragraphs 2 and 3 shall be notified by the Commission to the Member States and published in the Official Journal of the European Communities.
5. As long as a Member State has not communicated the list as stipulated in paragraph 2, jurisdiction for any proceedings resulting from an action or application covered by Article 92, and for which the courts of that State have jurisdiction under Article 93, shall lie with that court of the State in question which would have jurisdiction *ratione loci* and *ratione materiae* in the case of proceedings relating to a national trade mark registered in that State.

Article 92

Jurisdiction over infringement and validity

The Community trade mark courts shall have exclusive jurisdiction:

- (a) for all infringement actions and - if they are permitted under national law - actions in respect of threatened infringement relating to Community trade marks;
- (b) for actions for declaration of non-infringement, if they are permitted under national law;
- (c) for all actions brought as a result of acts referred to in Article 9 (3), second sentence;
- (d) for counterclaims for revocation or for a declaration of invalidity of the Community trade mark pursuant to Article 96.

Article 93

International jurisdiction

1. Subject to the provisions of this Regulation as well as to any provisions of the Convention on Jurisdiction and Enforcement applicable by virtue of Article 90, proceedings in respect of the actions and claims referred to in Article 92 shall be brought in the courts of the Member State in which the defendant is domiciled or, if he is not domiciled in any of the Member States, in which he has an establishment.

2. If the defendant is neither domiciled nor has an establishment in any of the Member States, such proceedings shall be brought in the courts of the Member State in which the plaintiff is domiciled or, if he is not domiciled in any of the Member States, in which he has an establishment.

3. If neither the defendant nor the plaintiff is so domiciled or has such an establishment, such proceedings shall be brought in the courts of the Member State where the Office has its seat.

4. Notwithstanding the provisions of paragraphs 1, 2 and 3:

- (a) Article 17 of the Convention on Jurisdiction and Enforcement shall apply if the parties agree that a different Community trade mark court shall have jurisdiction;
- (b) Article 18 of that Convention shall apply if the defendant enters an appearance before a different Community trade mark court.

5. Proceedings in respect of the actions and claims referred to in Article 92, with the exception of actions for a declaration of non-infringement of a Community trade mark, may also be brought in the courts of the Member State in which the act of infringement has been committed or threatened, or in which an act within the meaning of Article 9 (3), second sentence, has been committed.

Article 94

Extent of jurisdiction

1. A Community trade mark court whose jurisdiction is based on Article 93 (1) to (4) shall have jurisdiction in respect of:

- acts of infringement committed or threatened within the territory of any of the Member States,
- acts within the meaning of Article 9 (3), second sentence, committed within the territory of any of the Member States.

2. A Community trade mark court whose jurisdiction is based on Article 93 (5) shall have jurisdiction only in respect of acts committed or threatened within the territory of the Member State in which that court is situated.

Article 95

Presumption of validity - Defence as to the merits

1. The Community trade mark courts shall treat the Community trade mark as valid unless its validity is put in issue by the defendant with a counterclaim for revocation or for a declaration of invalidity.

2. The validity of a Community trade mark may not be put in issue in an action for a declaration of non-infringement.

3. In the actions referred to in Article 92 (a) and (c) a plea relating to revocation or invalidity of the Community trade mark submitted otherwise than by way of a counterclaim shall be admissible in so far as the defendant claims that the rights of the proprietor of the Community trade mark could be revoked for lack of use or that Community trade mark could be declared invalid on account of an earlier right of the defendant.

Article 96

Counterclaims

1. A counterclaim for revocation or for a declaration of invalidity may only be based on the grounds for revocation or invalidity mentioned in this Regulation.
2. A Community trade mark court shall reject a counterclaim for revocation or for a declaration of invalidity if a decision taken by the Office relating to the same subject matter and cause of action and involving the same parties has already become final.
3. If the counterclaim is brought in a legal action to which the proprietor of the trade mark is not already a party, he shall be informed thereof and may be joined as a party to the action in accordance with the conditions set out in national law.
4. The Community trade mark court with which a counterclaim for revocation or for a declaration of invalidity of the Community trade mark has been filed shall inform the Office of the date on which the counterclaim was filed. The latter shall record this fact in the Register of Community trade marks.
5. Article 56 (3), (4), (5) and (6) shall apply.
6. Where a Community trade mark court has given a judgment which has become final on a counterclaim for revocation or for invalidity of a Community trade mark, a copy of the judgment shall be sent to the Office. Any party may request information about such transmission. The Office shall mention the judgment in the Register of Community trade marks in accordance with the provisions of the Implementing Regulation.
7. The Community trade mark court hearing a counterclaim for revocation or for a declaration of invalidity may stay the proceedings on application by the proprietor of the Community trade mark and after hearing the other parties and may request the defendant to submit an application for revocation or for a declaration of invalidity to the Office within a time limit which it shall determine. If the application is not made within the time limit, the proceedings shall continue; the counterclaim shall be deemed withdrawn. Article 100 (3) shall apply.

Article 97

Applicable law

1. The Community trade mark courts shall apply the provisions of this Regulation.
2. On all matters not covered by this Regulation a Community trade mark court shall apply its national law, including its private international law.
3. Unless otherwise provided in this Regulation, a Community trade mark court shall apply the rules of procedure governing the same type of action relating to a national trade mark in the Member State where it has its seat.

Article 98

Sanctions

1. Where a Community trade mark court finds that the defendant has infringed or threatened to infringe a Community trade mark, it shall, unless there are special reasons for not doing so, issue an order prohibiting the defendant from proceeding with the acts which infringed or would infringe the Community trade mark. It shall also take such measures in accordance with its national law as are aimed at ensuring that this prohibition is complied with.

2. In all other respects the Community trade mark court shall apply the law of the Member State to which the acts of infringement or threatened infringement were committed, including the private international law.

Article 99

Provisional and protective measures

1. Application may be made to the courts of a Member State, including Community trade mark courts, for such provisional, including protective, measures in respect of a Community trade mark or Community trade mark application as may be available under the law of that State in respect of a national trade mark, even if, under this Regulation, a Community trade mark court of another Member State has jurisdiction as to the substance of the matter.

2. A Community trade mark court whose jurisdiction is based on Article 93 (1), (2), (3) or (4) shall have jurisdiction to grant provisional and protective measures which, subject to any necessary procedure for recognition and enforcement pursuant to Title III of the Convention on Jurisdiction and Enforcement, are applicable in the territory of any Member State. No other court shall have such jurisdiction.

Article 100

Specific rules on related actions

1. A Community trade mark court hearing an action referred to in Article 92, other than an action for a declaration of non-infringement shall, unless there are special grounds for continuing the hearing, of its own motion after hearing the parties or at the request of one of the parties and after hearing the other parties, stay the proceedings where the validity of the Community trade mark is already in issue before another Community trade mark court on account of a counterclaim or where an application for revocation or for a declaration of invalidity has already been filed at the Office.

2. The Office, when hearing an application for revocation or for a declaration of invalidity shall, unless there are special grounds for continuing the hearing, of its own motion after hearing the parties or at the request of one of the parties and after hearing the other parties, stay the proceedings where the validity of the Community trade mark is already in issue on account of a counterclaim before a Community trade mark court. However, if one of the parties to the proceedings before the Community trade mark court so requests, the court may, after hearing the other parties to these proceedings, stay the proceedings. The Office shall in this instance continue the proceedings pending before it.

3. Where the Community trade mark court stays the proceedings it may order provisional and protective

measures for the duration of the stay.

Article 101

Jurisdiction of Community trade mark courts of second instance - Further appeal

1. An appeal to the Community trade mark courts of second instance shall lie from judgments of the Community trade mark courts of first instance in respect of proceedings arising from the actions and claims referred to in Article 92.
2. The conditions under which an appeal may be lodged with a Community trade mark court of second instance shall be determined by the national law of the Member State in which that court is located.
3. The national rules concerning further appeal shall be applicable in respect of judgments of Community trade mark courts of second instance.

SECTION 3

OTHER DISPUTES CONCERNING COMMUNITY TRADE MARKS

Article 102

Supplementary provisions on the jurisdiction of national courts other than Community trade mark courts

1. Within the Member State whose courts have jurisdiction under Article 90 (1) those courts shall have jurisdiction for actions other than those referred to in Article 92, which would have jurisdiction *ratione loci* and *ratione materiae* in the case of actions relating to a national trade mark registered in that State.
2. Actions relating to a Community trade mark, other than those referred to in Article 92, for which no court has jurisdiction under Article 90 (1) and paragraph 1 of this Article may be heard before the courts of the Member State in which the Office has its seat.

Article 103

Obligation of the national court

A national court which is dealing with an action relating to a Community trade mark, other than the action referred to in Article 92, shall treat the trade mark as valid.

SECTION 4

TRANSITIONAL PROVISION

Article 104

Transitional provision relating to the application of the Convention on Jurisdiction and Enforcement

The provisions of the Convention on Jurisdiction and Enforcement which are rendered applicable by the preceding Articles shall have effect in respect of any Member State solely in the text of the Convention which is in force in respect of that State at any given time.

TITLE XI EFFECTS ON THE LAWS OF THE MEMBER STATES

SECTION 1

CIVIL ACTIONS ON THE BASIS OF MORE THAN ONE TRADE MARK

Article 105

Simultaneous and successive civil actions on the basis of Community trade marks and national trade marks

1. Where actions for infringement involving the same cause of action and between the same parties are brought in the courts of different Member States, one seized on the basis of a Community trade mark and the other seized on the basis of a national trade mark:

- (a) the court other than the court first seized shall of its own motion decline jurisdiction in favour of that court where the trade marks concerned are identical and valid for identical goods or services. The court which would be required to decline jurisdiction may stay its proceedings if the jurisdiction of the other court is contested;
- (b) the court other than the court first seized may stay its proceedings where the trade marks concerned are identical and valid for similar goods or services and where the trade marks concerned are similar and valid for identical or similar goods or services.

2. The court hearing an action for infringement on the basis of a Community trade mark shall reject the action if a final judgment on the merits has been given on the same cause of action and between the same parties on the basis of an identical national trade mark valid for identical goods or services.

3. The court hearing an action for infringement on the basis of a national trade mark shall reject the action if a final judgment on the merits has been given on the same cause of action and between the same parties on the basis of an identical Community trade mark valid for identical goods or services.

4. Paragraphs 1, 2 and 3 shall not apply in respect of provisional, including protective, measures.

SECTION 2

APPLICATION OF NATIONAL LAWS FOR THE PURPOSE OF PROHIBITING THE USE OF COMMUNITY TRADE MARKS

Article 106

Prohibition of use of Community trade marks

1. This Regulation shall, unless otherwise provided for, not affect the right existing under the laws of the Member States to invoke claims for infringement of earlier rights within the meaning of Article 8 or Article 52 (2) in relation to the use of a later Community trade mark. Claims for infringement of earlier rights within the meaning of Article 8 (2) and (4) may, however, no longer be invoked if the proprietor of the earlier right may no longer apply for a declaration that

the Community trade mark is invalid in accordance with Article 53 (2).

2. This Regulation shall, unless otherwise provided for, not affect the right to bring proceedings under the civil, administrative or criminal law of a Member State or under provisions of Community law for the purpose of prohibiting the use of a Community trade mark to the extent that the use of a national trade mark may be prohibited under the law of that Member State or under Community law.

Article 107

Prior rights applicable to particular localities

1. The proprietor of an earlier right which only applies to a particular locality may oppose the use of the Community trade mark in the territory where his right is protected in so far as the law of the Member State concerned so permits.

2. Paragraph 1 shall cease to apply if the proprietor of the earlier right has acquiesced in the use of the Community trade mark in the territory where his right is protected for a period of five successive years, being aware of such use, unless the Community trade mark was applied for in bad faith.

3. The proprietor of the Community trade mark shall not be entitled to oppose use of the right referred to in paragraph 1 even though that right may no longer be invoked against the Community trade mark.

SECTION 3

CONVERSION INTO A NATIONAL TRADE MARK APPLICATION

Article 108

Request for the application of national procedure

1. The applicant for or proprietor of a Community trade mark may request the conversion of his Community trade mark application or Community trade mark into a national trade mark application

- (a) to the extent that the Community trade mark application is refused, withdrawn, or deemed to be withdrawn;
- (b) to the extent that the Community trade mark ceases to have effect.

2. Conversion shall not take place:

- (a) where the rights of the proprietor of the Community trade mark have been revoked on the grounds of non-use, unless in the Member State for which conversion is requested the Community trade mark has been put to use which would be considered to be genuine use under the laws of that Member State;
- (b) for the purpose of protection in a Member State in which, in accordance with the decision of the Office or of the national court, grounds for refusal of registration or grounds for revocation or invalidity apply to the Community trade mark application or Community trade mark.

3. The national trade mark application resulting from the conversion of a Community trade mark application or a Community trade mark shall enjoy in respect of the Member State concerned the

date of filing or the date of priority of that application or trade mark and, where appropriate, the seniority of a trade mark of that State claimed under Article 34 or 35.

4. Where:

- the Community trade mark application is deemed to be withdrawn or is refused by a decision of the Office which has become final,

- the Community trade mark ceases to have effect as a result of a decision of the Office which has become final or as a result of registration of surrender of the Community trade mark,

the Office shall notify to the applicant or proprietor a communication fixing a period of three months from the date of that communication in which a request for conversion may be filed.

5. Where the Community trade mark application is withdrawn or the Community trade mark ceases to have effect as a result of failure to renew the registration, the request for conversion shall be filed within three months after the date on which the Community trade mark application is withdrawn or on which the registration of the Community trade mark expires.

6. Where the Community trade mark ceases to have effect as a result of a decision of a national court, the request for conversion shall be filed within three months after the date on which that decision acquired the authority of a final decision.

7. The effect referred to in Article 32 shall lapse if the request is not filed in due time.

Article 109

Submission, publication and transmission of the request for conversion

1. A request for conversion shall be filed with the Office and shall specify the Member States in which application of the procedure for registration of a national trade mark is desired. The request shall not be deemed to be filed until the conversion fee has been paid.

2. If the Community trade mark application has been published, receipt of any such request shall be recorded in the Register of Community trade marks and the request for conversion shall be published.

3. The Office shall check whether conversion may be requested in accordance with Article 108 (1), whether the request has been filed within the period laid down in Article 108 (4), (5) or (6), as the case may be, and whether the conversion fee has been paid. If these conditions are fulfilled, the Office shall transmit the request to the central industrial property offices of the States specified therein. At the request of the central industrial property office of a State concerned, the Office shall give it any information enabling that office to decide as to the admissibility of the request.

Article 110

Formal requirements for conversion

1. Any central industrial property office to which the request is transmitted shall decide as to its admissibility,

2. A Community trade mark application or a Community trade mark transmitted in accordance with Article 109 shall not be subjected to formal requirements of national law which are different from

or additional to those provided for in this Regulation or in the Implementing Regulation.

3. Any central industrial property office to which the request is transmitted may require that the applicant shall, within not less than two months:

- (a) pay the national application fee;
- (b) file a translation in one of the official languages of the State in question of the request and of the documents accompanying it;
- (c) indicate an address for service in the State in question;
- (d) supply a representation of the trade mark in the number of copies specified by the State in question.

TITLE XII THE OFFICE

SECTION 1

GENERAL PROVISIONS

Article 111

Legal status

1. The Office shall be a body of the Community. It shall have legal personality.
2. In each of the Member States the Office shall enjoy the most extensive legal capacity accorded to legal persons under their laws; it may, in particular, acquire or dispose of movable and immovable property and may be a party to legal proceedings.
3. The Office shall be represented by its President.

Article 112

Staff

1. The Staff Regulations of officials of the European Communities, the Conditions of Employment of other servants of the European Communities, and the rules adopted by agreement between the Institutions of the European Communities for giving effect to those Staff Regulations and Conditions of Employment shall apply to the staff of the Office, without prejudice to the application of Article 131 to the members of the Boards of Appeal.
2. Without prejudice to Article 120, the powers conferred on each Institution by the Staff Regulations and by the Conditions of Employment of other servants shall be exercised by the Office in respect of its staff.

Article 113

Privileges and immunities

The Protocol on the Privileges and Immunities of the European Communities shall apply to the Office.

Article 114

Liability

1. The contractual liability of the Office shall be governed by the law applicable to the contract in question.
2. The Court of Justice shall be competent to give judgment pursuant to any arbitration clause contained in a contract concluded by the Office.
3. In the case of non-contractual liability, the Office shall, in accordance with the general principles common to the laws of the Member States, make good any damage caused by its departments or by its servants in the performance of their duties.
4. The Court of Justice shall have jurisdiction in disputes relating to compensation for the damage referred to in paragraph 3.
5. The personal liability of its servants towards the Office shall be governed by the provisions laid down in their Staff Regulations or in the Conditions of Employment applicable to them.

Article 115

Languages

1. The application for a Community trade mark shall be filed in one of the official languages of the European Community.
2. The languages of the Office shall be English, French, German, Italian and Spanish.
3. The applicant must indicate a second language which shall be a language of the Office the use of which he accepts as a possible language of proceedings for opposition, revocation or invalidity proceedings.

If the application was filed in a language which is not one of the languages of the Office, the Office shall arrange to have the application, as described in Article 26 (1), translated into the language indicated by the applicant.

4. Where the applicant for a Community trade mark is the sole party to proceedings before the Office, the language of proceedings shall be the language used for filing the application for a Community trade mark. If the application was made in a language other than the languages of the Office, the Office may send written communications to the applicant in the second language indicated by the applicant in his application.
5. The notice of opposition and an application for revocation or invalidity shall be filed in one of the languages of the Office.
6. If the language chosen, in accordance with paragraph 5, for the notice of opposition or the application for revocation or invalidity is the language of the application for a trade mark or the second language indicated when the application was filed, that language shall be the language of the proceedings.

If the language chosen, in accordance with paragraph 5, for the notice of opposition or the application for revocation or invalidity is neither the language of the application for a trade mark nor the

second language indicated when the application was filed, the opposing party or the party seeking revocation or invalidity shall be required to produce, at his own expense, a translation of his application either into the language of the application for a trade mark, provided that it is a language of the Office, or into the second language indicated when the application was filed. The translation shall be produced within the period prescribed in the implementing regulation. The language into which the application has been translated shall then become the language of the proceedings.

7. Parties to opposition, revocation, invalidity or appeal proceedings may agree that a different official language of the European Community is to be the language of the proceedings.

Article 116

Publication; entries in the Register

1. An application for a Community trade mark, as described in Article 26 (1), and all other information the publication of which is prescribed by this Regulation or the implementing regulation, shall be published in all the official languages of the European Community.

2. All entries in the Register of Community trade marks shall be made in all the official languages of the European Community.

3. In cases of doubt, the text in the language of the Office in which the application for the Community trade mark was filed shall be authentic. If the application was filed in an official language of the European Community other than one of the languages of the Office, the text in the second language indicated by the applicant shall be authentic.

Article 117

The translation services required for the functioning of the Office shall be provided by the Translation Centre of the Bodies of the Union once this begins operation.

Article 118

Control of legality

1. The Commission shall check the legality of those acts of the President of the Office in respect of which Community law does not provide for any check on legality by another body and of acts of the Budget Committee attached to the Office pursuant to Article 133.

2. It shall require that any unlawful acts as referred to in paragraph 1 be altered or annulled.

3. Member States and any person directly and personally involved may refer to the Commission any act as referred to in paragraph 1, whether express or implied, for the Commission to examine the legality of that act. Referral shall be made to the Commission within 15 days of the day on which the party concerned first became aware of the act in question. The Commission shall take a decision within one month. If no decision has been taken within this period, the case shall be deemed to have been dismissed.

SECTION 2

MANAGEMENT OF THE OFFICE

Article 119

Powers of the President

1. The Office shall be managed by the President.
2. To this end the President shall have in particular the following functions and powers:
 - (a) he shall take all necessary steps, including the adoption of internal administrative instructions and the publication of notices, to ensure the functioning of the Office;
 - (b) he may place before the Commission any proposal to amend this Regulation, the Implementing Regulation, the rules of procedure of the Boards of Appeal, the fees regulations and any other rules applying to Community trade marks after consulting the Administrative Board and, in the case of the fees regulations and the budgetary provisions of this Regulation, the Budget Committee;
 - (c) he shall draw up the estimates of the revenue and expenditure of the Office and shall implement the budget;
 - (d) he shall submit a management report to the Commission, the European Parliament and the Administrative Board each year;
 - (e) he shall exercise in respect of the staff the powers laid down in Article 112 (2);
 - (f) he may delegate his powers.
3. The President shall be assisted by one or more Vice-Presidents. If the President is absent or indisposed, the Vice-President or one of the Vice-Presidents shall take his place in accordance with the procedure laid down by the Administrative Board.

Article 120

Appointment of senior officials

1. The President of the Office shall be appointed by the Council from a list of at most three candidates, which shall be prepared by the Administrative Board. Power to dismiss the President shall lie with the Council, acting on a proposal from the Administrative Board.
2. The term of office of the President shall not exceed five years. This term of office shall be renewable.
3. The Vice-President or Vice-Presidents of the Office shall be appointed or dismissed as in paragraph 1, after consultation of the President.
4. The Council shall exercise disciplinary authority over the officials referred to in paragraphs 1 and 3 of this Article.

SECTION 3

ADMINISTRATIVE BOARD

Article 121

Creation and powers

1. An Administrative Board is hereby set up, attached to the Office. Without prejudice to the powers attributed to the Budget Committee in Section 5 - budget and financial control - the Administrative Board shall have the powers defined below.
2. The Administrative Board shall draw up the lists of candidates provided for in Article 120.
3. It shall fix the date for the first filing of Community trade mark applications, pursuant to Article 143 (3).
4. It shall advise the President on matters for which the Office is responsible.
5. It shall be consulted before adoption of the guidelines for examination in the Office and in the other cases provided for in this Regulation.
6. It may deliver opinions and requests for information to the President and to the Commission where it considers that this is necessary.

Article 122

Composition

1. The Administrative Board shall be composed of one representative of each Member State and one representative of the Commission and their alternates.
2. The members of the Administrative Board may, subject to the provisions of its rules of procedure, be assisted by advisers or experts.

Article 123

Chairmanship

1. The Administrative Board shall elect a chairman and a deputy chairman from among its members. The deputy chairman shall ex officio replace the chairman in the event of his being prevented from attending to his duties.
2. The duration of the terms of office of the chairman and the deputy chairman shall be three years. The terms of office shall be renewable.

Article 124

Meetings

1. Meetings of the Administrative Board shall be convened by its chairman.
2. The President of the Office shall take part in the deliberations, unless the Administrative Board decides otherwise.

3. The Administrative Board shall hold an ordinary meeting once a year; in addition, it shall meet on the initiative of its chairman or at the request of the Commission or of one-third of the Member States.
4. The Administrative Board shall adopt rules of procedure.
5. The Administrative Board shall take its decisions by a simple majority of the representatives of the Member States. However, a majority of three-quarters of the representatives of the Member States shall be required for the decisions which the Administrative Board is empowered to take under Article 120 (1) and (3). In both cases each Member State shall have one vote.
6. The Administrative Board may invite observers to attend its meetings.
7. The Secretariat for the Administrative Board shall be provided by the Office.

SECTION 4

IMPLEMENTATION OF PROCEDURES

Article 125

Competence

For taking decisions in connection with the procedures laid down in this Regulation, the following shall be competent:

- (a) Examiners;
- (b) Opposition Divisions;
- (c) an Administration of Trade Marks and Legal Division;
- (d) Cancellation Divisions;
- (e) Boards of Appeal.

Article 126

Examiners

An examiner shall be responsible for taking decisions on behalf of the Office in relation to an application for registration of a Community trade mark, including the matters referred to in Articles 36, 37, 38 and 66, except in so far as an Opposition Division is responsible.

Article 127

Opposition Divisions

1. An Opposition Division shall be responsible for taking decisions on an opposition to an application to register a Community trade mark.
2. An Opposition Division shall consist of three members. At least one of the members must be legally qualified.

Article 128

Administration of Trade Marks and Legal Division

1. The Administration of Trade Marks and Legal Division shall be responsible for those decisions required by this Regulation which do not fall within the competence of an examiner, an Opposition Division or a Cancellation Division. It shall in particular be responsible for decisions in respect of entries in the Register of Community trade marks.
2. It shall also be responsible for keeping the list of professional representatives which is referred to in Article 89.
3. A decision of the Division shall be taken by one member.

Article 129

Cancellation Divisions

1. A Cancellation Division shall be responsible for taking decisions in relation to an application for the revocation or declaration of invalidity of a Community trade mark.
2. A Cancellation Division shall consist of three members. At least one of the members must be legally qualified.

Article 130

Boards of Appeal

1. The Boards of Appeal shall be responsible for deciding on appeals from decisions of the examiners, Opposition Divisions, Administration of Trade Marks and Legal Division and Cancellation Divisions.
2. A Board of Appeal shall consist of three members. At least two of the members must be legally qualified.

Article 131

Independence of the members of the Boards of Appeal

1. The members, including the chairmen, of the Boards of Appeal shall be appointed, in accordance with the procedure laid down in Article 120, for the appointment of the President of the Office, for a term of five years. They may not be removed from office during this term, unless there are serious grounds for such removal and the Court of Justice, on application by the body which appointed them, takes a decision to this effect. Their term of office shall be renewable.
2. The members of the Boards of Appeal shall be independent. In their decisions they shall not be bound by any instructions.
3. The members of the Boards of Appeal may not be examiners or members of the Opposition Divisions, Administration of Trade Marks and Legal Division or Cancellation Divisions.

Article 132

Exclusion and objection

1. Examiners and members of the Divisions set up within the Office or of the Boards of Appeal may not take part in any proceedings if they have any personal interest therein, or if they have previously been involved as representatives of one of the parties. Two of the three members of an Opposition Division shall not have taken part in examining the application. Members of the Cancellation Divisions may not take part in any proceedings if they have participated in the final decision on the case in the proceedings for registration or opposition proceedings. Members of the Boards of Appeal may not take part in appeal proceedings if they participated in the decision under appeal.
2. If, for one of the reasons mentioned in paragraph 1 or for any other reason, a member of a Division or of a Board of Appeal considers that he should not take part in any proceedings, he shall inform the Division or Board accordingly.
3. Examiners and members of the Divisions or of a Board of Appeal may be objected to by any party for one of the reasons mentioned in paragraph 1, or if suspected of partiality. An objection shall not be admissible if, while being aware of a reason for objection, the party has taken a procedural step. No objection may be based upon the nationality of examiners or members.
4. The Divisions and the Boards of Appeal shall decide as to the action to be taken in the cases specified in paragraphs 2 and 3 without the participation of the member concerned. For the purposes of taking this decision the member who withdraws or has been objected to shall be replaced in the Division or Board of Appeal by his alternate.

SECTION 5

BUDGET AND FINANCIAL CONTROL

Article 133

Budget Committee

1. A Budget Committee is hereby set up, attached to the Office. The Budget Committee shall have the powers assigned to it in this Section and in Article 39 (4).
2. Articles 121 (6), 122, 123 and 124 (1) to (4), (6) and (7) shall apply to the Budget Committee *mutatis mutandis*.
3. The Budget Committee shall take its decisions by a simple majority of the representatives of the Member States. However, a majority of three-quarters of the representatives of the Member States shall be required for the decisions which the Budget Committee is empowered to take under Articles 39 (4), 135 (3) and 138. In both cases each Member State shall have one vote.

Article 134

Budget

1. Estimates of all the Office's revenue and expenditure shall be prepared for each financial year and shall be shown in the Office's budget, and each financial year shall correspond with the calendar year.
2. The revenue and expenditure shown in the budget shall be in balance.
3. Revenue shall comprise, without prejudice to other types of income, total fees payable under the fees regulations, and, to the extent necessary, a subsidy entered against a specific heading of the general budget of the European Communities, Commission Section.

Article 135

Preparation of the budget

1. The President shall draw up each year an estimate of the Office's revenue and expenditure for the following year and shall send it to the Budget Committee not later than 31 March in each year, together with a list of posts.
2. Should the budget estimates provide for a Community subsidy, the Budget Committee shall immediately forward the estimate to the Commission, which shall forward it to the budget authority of the Communities. The Commission may attach an opinion on the estimate along with an alternative estimate.
3. The Budget Committee shall adopt the budget, which shall include the Office's list of posts. Should the budget estimates contain a subsidy from the general budget of the Communities, the Office's budget shall, if necessary, be adjusted.

Article 136

Financial control

Control of commitment and payment of all expenditure and control of the existence and recovery of all revenue of the Office shall be carried out by the Financial Controller appointed by the Budget Committee.

Article 137

Auditing of accounts

1. Not later than 31 March in each year the President shall transmit to the Commission, the European Parliament, the Budget Committee and the Court of Auditors accounts of the Office's total revenue and expenditure for the preceding financial year. The Court of Auditors shall examine them in accordance with Article 188c of the Treaty.
2. The Budget Committee shall give a discharge to the President of the Office in respect of the implementation of the budget.

Article 138

Financial provisions

The Budget Committee shall, after consulting the Court of Auditors of the European Communities and the Commission, adopt internal financial provisions specifying, in particular, the procedure for establishing and implementing the Office's budget. As far as is compatible with the particular nature of the Office, the financial provisions shall be based on the financial regulations adopted for other bodies set up by the Community.

Article 139

Fees regulations

1. The fees regulations shall determine in particular the amounts of the fees and the ways in which they are to be paid.
2. The amounts of the fees shall be fixed at such a level as to ensure that the revenue in respect thereof is in principle sufficient for the budget of the Office to be balanced.
3. The fees regulations shall be adopted and amended in accordance with the procedure laid down in Article 141.

TITLE XIII FINAL PROVISIONS

Article 140

Community implementing provisions

1. The rules implementing this Regulation shall be adopted in an Implementing Regulation.
2. In addition to the fees provided for in the preceding Articles, fees shall be charged, in accordance with the detailed rules of application laid down in the Implementing Regulation, in the cases listed below:
 1. alteration of the representation of a Community trade mark;
 2. late payment of the registration fee;
 3. issue of a copy of the certificate of registration;
 4. registration of the transfer of a Community trade mark;
 5. registration of a licence or another right in respect of a Community trade mark;
 6. registration of a licence or another right in respect of an application for a Community trade mark;
 7. cancellation of the registration of a licence or another right;
 8. alteration of a registered Community trade mark;
 9. issue of an extract from the Register;
 10. inspection of the files;
 11. issue of copies of file documents;
 12. issue of certified copies of the application;

13. communication of information in a file;
 14. review of the determination of the procedural costs to be refunded.
3. The Implementing Regulation and the rules of procedure of the Boards of Appeal shall be adopted and amended in accordance with the procedure laid down in Article 141.

Article 141

Establishment of a committee and procedure for the adoption of implementing regulations

1. The Commission shall be assisted by a Committee on Fees, Implementation Rules and the Procedure of the Boards of Appeal of the Office for Harmonization in the Internal Market (trade marks and designs), which shall be composed of representatives of the Member States and chaired by a representative of the Commission.

2. The representative of the Commission shall submit to the Committee a draft of the measures to be taken. The Committee shall deliver its opinion on the draft within a time limit which the chairman may lay down according to the urgency of the matter. The opinion shall be delivered by the majority laid down in Article 148 (2) of the Treaty in the case of decisions which the Council is required to adopt on a proposal from the Commission. The votes of the representatives of the Member States within the Committee shall be weighted in the manner set out in that Article. The chairman shall not vote.

The Commission shall adopt the measures envisaged if they are in accordance with the opinion of the Committee.

If the measures envisaged are not in accordance with the opinion of the Committee, or if no opinion is delivered, the Commission shall, without delay, submit to the Council a proposal relating to the measures to be taken. The Council shall act by a qualified majority.

If, on the expiry of a period of three months from the date of referral to the Council, the Council has not acted, the proposed measures shall be adopted by the Commission, save where the Council has decided against the measures by a simple majority.

Article 142

Compatibility with other Community legal provisions

This Regulation shall not affect Council Regulation (EEC) No 2081/92 on the protection of geographical indications and designations of origin for agricultural products and foodstuffs (7) of 14 July 1992, and in particular Article 14 thereof.

Article 143

Entry into force

1. This Regulation shall enter into force on the 60th day following that of its publication in the Official Journal of the European Communities.

2. The Member States shall within three years following entry into force of this Regulation take the necessary measures for the purpose of implementing Articles 91 and 110 hereof and shall forthwith inform the Commission of those measures.

3. Applications for Community trade marks may be filed at the Office from the date fixed by the Administrative Board on the recommendation of the President of the Office.

4. Applications for Community trade marks filed within three months before the date referred to in paragraph 3 shall be deemed to have been filed on that date.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 20 December 1993.

For the Council

The President

A. BOURGEOIS

Statement by the Council and the Commission on the seat of the Office for Harmonization in the Internal Market (trade marks and designs)

'In adopting the Regulation on the Community Trade Mark, the Council and the Commission note:

- that the representatives of the Governments of the Member States, meeting at Head of State and Government level on 29 October 1993, decided that the Office for Harmonization in the Internal Market (trade marks and designs) should have its seat in Spain, in a town to be determined by the Spanish Government;

- that the Spanish Government has designated Alicante as the seat of the Office.'

**Council Regulation (EC) No 3288/94
of 22 December 1994**

**amending Regulation (EC) No 40/94 on the Community trade mark for the implementation of the
agreements concluded in the framework of the Uruguay Round**

COUNCIL REGULATION (EC) No 3288/94 of 22 December 1994 amending Regulation (EC) No 40/94 on the Community trade mark for the implementation of the agreements concluded in the framework of the Uruguay Round

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 235 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament (1),

Whereas the Agreement establishing the World Trade Organization (hereinafter, the 'WTO Agreement') was signed on behalf of the Community; whereas the Agreement on Trade-Related Aspects of Intellectual Property Rights (hereinafter, the 'TRIPs Agreement'), annexed to the WTO Agreement, contains detailed provisions on the protection of intellectual property rights whose purpose is the establishment of international disciplines in this area in order to promote international trade and prevent trade distortions and friction due to the lack of adequate and effective intellectual property protection;

Whereas in order to ensure that all relevant Community legislation is in full compliance with the TRIPs Agreement, the Community must take certain measures in relation to current Community acts on the protection of intellectual property rights; whereas these measures entail in some respects the amendment or modification of Community acts; whereas these measures also entail complementing current Community acts;

Whereas Regulation (EC) No 40/94 creates the Community trade mark (2); whereas Article 5 of Regulation (EC) No 40/94 defines the 'Persons who can be proprietors of Community trade marks' by referring notably to the Paris Convention for the protection of industrial property and requires reciprocal national treatment from countries which are not parties to the Paris Convention; whereas Article 29 of Regulation (EC) No 40/94, concerning the right of priority, also needs to be amended in this respect; whereas in order to comply with the national treatment obligation in Article 3 of the TRIPs Agreement, these provisions should be modified to ensure that nationals of all WTO Members, even if the Member in question is not a party to the Paris Convention, receive a treatment no less favourable than that accorded to nationals of Community Member States;

Whereas Article 23 (2) of the TRIPs Agreement provides for the refusal or invalidation of trade marks which contain or consist of false geographical indications for wines and spirits without the condition that they are of such a nature as to deceive the public, a new subparagraph (j) has to be added to Article 7 (1) of Regulation (EC) No 40/94,

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 40/94 is amended as follows:

1. Article 5 (1) (b) shall be replaced by the following:

'(b) nationals of other States which are parties to the Paris Convention for the protection of industrial property, hereinafter referred to as 'the Paris Convention', or to the Agreement establishing

the World Trade Organization;`2. Article 5 (1) (d) shall be replaced by the following:

'(d) nationals, other than those referred to under subparagraph (c), of any State which is not party to the Paris Convention or to the Agreement establishing the World Trade Organization and which, according to published findings, accords to nationals of all the Member States the same protection for trade marks as it accords to its own nationals and, if nationals of the Member States are required to prove registration in the country of origin, recognizes the registration of Community trade marks as such proof.'

3. In Article 7 (1) after subparagraph (i) the following shall be added:

'(j) trade marks for wines which contain or consist of a geographical indication identifying wines or for spirits which contain or consist of a geographical indication identifying spirits with respect to such wines or spirits not having that origin.'

4. Article 29 (1) shall be replaced by the following:

'1. A person who has duly filed an application for a trade mark in or for any State party to the Paris Convention or to the Agreement establishing the World Trade Organization, or his successors in title, shall enjoy, for the purpose of filing a Community trade mark application for the same trade mark in respect of goods or services which are identical with or contained within those for which the application has been filed, a right or priority during a period of six months from the date of filing of the first application.'

5. Article 29 (5) shall be replaced by the following:

'5. If the first filing has been made in a State which is not a party to the Paris Convention or to the Agreement establishing the World Trade Organization, paragraphs 1 to 4 shall apply only in so far as that State, according to published findings, grants, on the basis of the first filing made at the Office and subject to conditions equivalent to those laid down in this Regulation, a right of priority having equivalent effect.'

Article 2

This Regulation shall enter into force on 1 January 1995.

It shall be applicable as of 1 January 1996.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 22 December 1994.

**Council Regulation (EC) No 1653/2003
of 18 June 2003
amending Regulation (EC) No 40/94 on the Community trade mark**

Council Regulation (EC) No 1653/2003

of 18 June 2003

amending Regulation (EC) No 40/94 on the Community trade mark

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 308 thereof,

Having regard to the proposal from the Commission(1),

Having regard to the opinion of the European Parliament(2),

Having regard to the opinion of the Court of Auditors(3),

Whereas:

- (1) With the entry into force of Council Regulation (EC, Euratom) No 1605/02 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities(4), the concept of centralised ex ante financial control was replaced by more modern control and audit systems.
- (2) The Office for Harmonization in the Internal Market should have control and audit systems comparable with those of the Community institutions.
- (3) The general principles and limits governing right of access to the documents provided for in Article 255 of the Treaty have been laid down by Regulation (EC) No 1049/2001 of the European Parliament and of the Council of 30 May 2001 regarding public access to European Parliament, Council and Commission documents(5).
- (4) When Regulation (EC) No 1049/2001 was adopted, the three institutions agreed in a joint declaration that the agencies and similar bodies should implement rules conforming to those of that Regulation.
- (5) Appropriate provisions should therefore be included in Regulation (EC) No 40/94 of 20 December 1994 on the Community trade mark(6) to make Regulation (EC) No 1049/2001 applicable to the Office for Harmonization in the Internal Market, as should a provision relating to appeals against a refusal of access to documents.
- (6) Regulation (EC) No 40/94 should therefore be amended accordingly,

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 40/94 is hereby amended as follows:

1. the following Article shall be inserted:

"Article 118a

Access to documents

1. Regulation (EC) No 1049/2001 of the European Parliament and of the Council of 30 May 2001 regarding access to European Parliament, Council and Commission documents(7) shall apply to documents

held by the Office.

2. The Administrative Board shall adopt the practical arrangements for implementing Regulation (EC) No 1049/2001 within six months of entry into force of Regulation (EC) No 1653/2003 of 18 June 2003 amending Regulation (EC) No 40/94 on the Community trade mark(8).

3. Decisions taken by the Office pursuant to Article 8 of Regulation (EC) No 1049/2001 may give rise to the lodging of a complaint to the Ombudsman or form the subject of an action before the Court of Justice of the European Communities, under the conditions laid down in Articles 195 and 230 of the Treaty respectively.";

2. Article 136 shall be replaced by the following:

"Article 136

Audit and control

1. An internal audit function shall be set up within the Office, to be performed in compliance with the relevant international standards. The internal auditor, appointed by the President, shall be responsible to him for verifying the proper operation of budget implementation systems and procedures of the Office.

2. The internal auditor shall advise the President on dealing with risks, by issuing independent opinions on the quality of management and control systems and by issuing recommendations for improving the conditions of implementation of operations and promoting sound financial management.

3. The responsibility for putting in place internal control systems and procedures suitable for carrying out his tasks shall lie with the authorising officer."

Article 2

This Regulation shall enter into force on the first day of the month following that of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Luxembourg, 18 June 2003.

**Council Regulation (EC) No 1992/2003
of 27 October 2003**

amending Regulation (EC) No 40/94 on the Community trade mark to give effect to the accession of the European Community to the Protocol relating to the Madrid Agreement concerning the international registration of marks adopted at Madrid on 27 June 1989

Council Regulation (EC) No 1992/2003

of 27 October 2003

amending Regulation (EC) No 40/94 on the Community trade mark to give effect to the accession of the European Community to the Protocol relating to the Madrid Agreement concerning the international registration of marks adopted at Madrid on 27 June 1989

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 308 thereof,

Having regard to the proposal from the Commission(1),

Having regard to the opinion of the European Parliament(2),

Having regard to the opinion of the European Economic and Social Committee(3),

Whereas:

- (1) Regulation (EC) No 40/94(4) (the Community trade mark Regulation), which is based on Article 308 of the Treaty, is designed to create a market which functions properly and offers conditions which are similar to those obtaining in a national market. In order to create a market of this kind and make it increasingly a single market, the said Regulation created the Community trade mark system whereby undertakings can, by means of one procedural system, obtain Community trade marks to which uniform protection is given and which produce their effects throughout the entire area of the European Community.
- (2) The Diplomatic Conference for the conclusion of a Protocol relating to the Madrid Agreement concerning the international registration of marks adopted the Protocol relating to the Madrid Agreement concerning the international registration of marks (hereafter referred to as the Madrid Protocol) on 27 June 1989, at Madrid.
- (3) The Madrid Protocol was adopted in order to introduce certain new features into the system of the international registration of marks existing under the Madrid Agreement concerning the international registration of marks of 14 April 1891 as amended (hereafter referred to as the Madrid Agreement)(5).
- (4) As compared to the Madrid Agreement, the Madrid Protocol introduced, in its Article 14, as one of the main innovations the possibility that an intergovernmental organisation which has a regional office for the purpose of registering marks with effect in the territory of the organisation may become party to the Madrid Protocol.
- (5) The Madrid Protocol entered into force on 1 December 1995 and became operational on 1 April 1996 and the Community trade mark system also became operational on the latter date.
- (6) The Community trade mark system and the international registration system as established by the Madrid Protocol are complementary. Therefore, in order to enable firms to benefit from the advantages of the Community trade mark through the Madrid Protocol and vice versa, it is necessary to allow Community trade mark applicants and holders of such trade marks to apply for international protection of their trade marks through the filing of an international application under the

Madrid Protocol and, conversely, holders of international registrations under the Madrid Protocol to apply for protection of their trade marks under the Community trade mark system.

- (7) Moreover, the establishment of a link between the Community trade mark system and the international registration system under the Madrid Protocol would promote a harmonious development of economic activities, will eliminate distortions of competition, will be cost efficient and will increase the level of integration and functioning of the internal market. Therefore, the accession of the Community to the Madrid Protocol is necessary in order for the Community trade mark system to become more attractive.
- (8) For the above reasons, the Council, acting on a proposal from the Commission(6), approved the Madrid Protocol and authorised the President of the Council to deposit the instrument of accession with the Director-General of the World Intellectual Property Organisation (WIPO) as from the date on which the Council has adopted the measures which are necessary to give effect to the accession of the European Community to the Madrid Protocol. This Regulation contains these measures.
- (9) These measures should be incorporated in the Community trade mark Regulation through the inclusion of a new title on "International registration of marks". For this reason, the legal basis of this proposal should be the same as the legal basis of the Community trade mark Regulation, i.e. Article 308 of the Treaty.
- (10) Furthermore, it is necessary to provide for rules applying to the filing of an international application at the International Bureau of WIPO through the intermediary of the Office for Harmonisation in the Internal Market (trade marks and designs) (the Office).
- (11) Where an international application is filed, on the basis of a Community trade mark application, in a language other than one of the languages allowed under the Madrid Protocol for the filing of international applications, the Office should make its best efforts to arrange for the translation of the list of goods or services into the language indicated by the applicant in order for the application to be forwarded to the International Bureau in time to maintain the date of priority.
- (12) There is nothing in the Madrid Protocol or in the Regulations adopted under the Madrid Protocol which would determine the language regime to be applied by the Office when processing an international application or an international registration.
- (13) Finally, the rules and procedures relating to international registrations designating the European Community should, in principle, be the same as the rules and procedures which apply to Community trade mark applications and the protection of Community trade marks. According to this principle, international registrations designating the European Community should be subject to examination as to absolute grounds for refusal, searches in the Register of Community trade marks and the registers of trade marks of those Member States which have informed the Office of their decision to operate such a search and should be subject to opposition in the same way as published Community trade marks. Likewise international registrations designating the European Community should be subject to the same rules on use and invalidation as Community trade marks. Furthermore the designation of the European Community through international registrations may be converted into national trade mark applications or into the designation of Member States which are party to the Madrid Protocol or the Madrid Agreement where the designation of the European Community through such international registrations is refused or ceases to have effect,

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 40/94 is hereby amended as follows:

1. The following subparagraph shall be added to Article 8(2)(a):

"(iv) trade marks registered under international arrangements which have effect in the Community;"

2. Article 134(3) shall be replaced by the following:

"3. Revenue shall comprise, without prejudice to other types of income, total fees payable under the fees regulations, total fees payable under the Madrid Protocol referred to in Article 140 for an international registration designating the European Communities and other payments made to Contracting Parties to the Madrid Protocol, and, to the extent necessary, a subsidy entered against a specific heading of the general budget of the European Communities, Commission section."

3. The following title shall be inserted after title XII:

"TITLE XIII INTERNATIONAL REGISTRATION OF MARKS

SECTION I GENERAL PROVISIONS

Article 140

Application of provisions

Unless otherwise specified in this title, this Regulation and any regulations implementing this Regulation adopted pursuant to Article 158 shall apply to applications for international registrations under the Protocol relating to the Madrid Agreement concerning the international registration of marks, adopted at Madrid on 27 June 1989 (hereafter referred to as 'international applications' and 'the Madrid Protocol' respectively), based on an application for a Community trade mark or on a Community trade mark and to registrations of marks in the international register maintained by the International Bureau of the World Intellectual Property Organisation (hereafter referred to as 'international registrations' and 'the International Bureau', respectively) designating the European Community.

SECTION 2 INTERNATIONAL REGISTRATION ON THE BASIS OF APPLICATIONS FOR A COMMUNITY TRADE MARK AND OF COMMUNITY TRADE MARKS

Article 141

Filing of an international application

1. International applications pursuant to Article 3 of the Madrid Protocol based on an application for a Community trade mark or on a Community trade mark shall be filed at the Office.

2. Where an international application is filed before the mark on which the international registration is to be based has been registered as a Community trade mark, the applicant for the international registration must indicate whether the international registration is to be based on a Community trade mark application or registration. Where the international registration is to be based on a Community trade mark once it is registered, the international application shall be deemed to

have been received at the Office on the date of registration of the Community trade mark.

Article 142

Form and contents of the international application

1. The international application shall be filed in one of the official languages of the European Community, using a form provided by the Office. Unless otherwise specified by the applicant on that form when he files the international application, the Office shall correspond with the applicant in the language of filing in a standard form.
2. If the international application is filed in a language which is not one of the languages allowed under the Madrid Protocol, the applicant must indicate a second language from among those languages. This shall be the language in which the Office submits the international application to the International Bureau.
3. Where the international application is filed in a language other than one of the languages allowed under the Madrid Protocol for the filing of international applications, the applicant may provide a translation of the list of goods or services in the language in which the international application is to be submitted to the International Bureau pursuant to paragraph 2.
4. The Office shall forward the international application to the International Bureau as soon as possible.
5. The filing of an international application shall be subject to the payment of a fee to the Office. In the cases referred to in the second sentence of Article 141(2), the fee shall be due on the date of registration of the Community trade mark. The application shall be deemed not to have been filed until the required fee has been paid.
6. The international application must fulfil the relevant conditions laid down in the Implementing Regulation referred to in Article 157.

Article 143

Recordal in the files and in the Register

1. The date and number of an international registration based on a Community trade mark application, shall be recorded in the files of that application. When the application results in a Community trade mark, the date and number of the international registration shall be entered in the register.
2. The date and number of an international registration based on a Community trade mark shall be entered in the Register.

Article 144

Request for territorial extension subsequent to the international registration

A request for territorial extension made subsequent to the international registration pursuant to Article 3ter(2) of the Madrid Protocol may be filed through the intermediary of the Office. The request must be filed in the language in which the international application was filed pursuant

to Article 142.

Article 145

International fees

Any fees payable to the International Bureau under the Madrid Protocol shall be paid direct to the International Bureau.

SECTION 3 INTERNATIONAL REGISTRATIONS DESIGNATING THE EUROPEAN COMMUNITY

Article 146

Effects of international registrations designating the European Community

1. An international registration designating the European Community shall, from the date of its registration pursuant to Article 3(4) of the Madrid Protocol or from the date of the subsequent designation of the European Community pursuant to Article 3ter(2) of the Madrid Protocol, have the same effect as an application for a Community trade mark.
2. If no refusal has been notified in accordance with Article 5(1) and (2) of the Madrid Protocol or if any such refusal has been withdrawn, the international registration of a mark designating the European Community shall, from the date referred to in paragraph 1, have the same effect as the registration of a mark as a Community trade mark.
3. For the purposes of applying Article 9(3), publication of the particulars of the international registration designating the European Community pursuant to Article 147(1) shall take the place of publication of a Community trade mark application, and publication pursuant to Article 147(2) shall take the place of publication of the registration of a Community trade mark.

Article 147

Publication

1. The Office shall publish the date of registration of a mark designating the European Community pursuant to Article 3(4) of the Madrid Protocol or the date of the subsequent designation of the European Community pursuant to Article 3ter(2) of the Madrid Protocol, the language of filing of the international application and the second language indicated by the applicant, the number of the international registration and the date of publication of such registration in the Gazette published by the International Bureau, a reproduction of the mark and the numbers of the classes of the goods or services in respect of which protection is claimed.
2. If no refusal of protection of an international registration designating the European Community has been notified in accordance with Article 5(1) and (2) of the Madrid Protocol or if any such refusal has been withdrawn, the Office shall publish this fact, together with the number of the international registration and, where applicable, the date of publication of such registration in the Gazette published by the International Bureau.

Article 148

Seniority

1. The applicant for an international registration designating the European Community may claim, in the international application, the seniority of an earlier trade mark registered in a Member State, including a trade mark registered in the Benelux countries, or registered under international arrangements having effect in a Member State, as provided for in Article 34.
2. The holder of an international registration designating the European Community may, as from the date of publication of the effects of such registration pursuant to Article 147(2), claim at the Office the seniority of an earlier trade mark registered in a Member State, including a trade mark registered in the Benelux countries, or registered under international arrangements having effect in a Member State, as provided for in Article 35. The Office shall notify the International Bureau accordingly.

Article 149

Examination as to absolute grounds for refusal

1. International registrations designating the European Community shall be subject to examination as to absolute grounds for refusal in the same way as applications for Community trade marks.
2. Protection of an international registration shall not be refused before the holder of the international registration has been allowed the opportunity to renounce or limit the protection in respect of the European Community or of submitting his observations.
3. Refusal of protection shall take the place of refusal of a Community trade mark application.
4. Where protection of an international registration is refused by a decision under this Article which has become final or where the holder of the international registration has renounced the protection in respect of the European Community pursuant to paragraph 2, the Office shall refund the holder of the international registration a part of the individual fee to be laid down in the implementing Regulation.

Article 150

Search

1. Once the Office has received a notification of an international registration designating the European Community, it shall draw up a Community search report as provided for in Article 39(1).
2. As soon as the Office has received a notification of an international registration designating the European Community, the Office shall transmit a copy thereof to the central industrial property office of each Member State which has informed the Office of its decision to operate a search in its own register of trade marks as provided for in Article 39(2).
3. Article 39(3), (4) and (5) shall apply *mutatis mutandis*.
4. The Office shall inform the proprietors of any earlier Community trade marks or Community trade

mark applications cited in the Community search report of the publication of the international registration designating the European Community as provided for in Article 147(1).

Article 151

Opposition

1. International registration designating the European Community shall be subject to opposition in the same way as published Community trade mark applications.
2. Notice of opposition shall be filed within a period of three months which shall begin six months following the date of the publication pursuant to Article 147(1). The opposition shall not be treated as duly entered until the opposition fee has been paid.
3. Refusal of protection shall take the place of refusal of a Community trade mark application.
4. Where protection of an international registration is refused by a decision under this Article which has become final or where the holder of the international registration has renounced the protection in respect of the European Community prior to a decision under this Article which has become final, the Office shall refund the holder of the international registration a part of the individual fee to be laid down in the implementing Regulation.

Article 152

Replacement of a Community trade mark by an international registration

The Office shall, upon request, enter a notice in the Register that a Community trade mark is deemed to have been replaced by an international registration in accordance with Article 4bis of the Madrid Protocol.

Article 153

Invalidation of the effects of an international registration

1. The effects of an international registration designating the European Community may be declared invalid.
2. The application for invalidation of the effects of an international registration designating the European Community shall take the place of an application for a declaration of revocation as provided for in Article 50 or for invalidation as provided for in Article 51 or Article 52.

Article 154

Conversion of a designation of the European Community through an international registration into a national trade mark application or into a designation of Member States

1. Where a designation of the European Community through an international registration has been refused or ceases to have effect, the holder of the international registration may request the conversion

of the designation of the European Community:

- (a) into a national trade mark application pursuant to Articles 108 to 110 or
- (b) into a designation of a Member State party to the Madrid Protocol or the Madrid Agreement concerning the international registration of marks, adopted at Madrid on 14 April 1891, as revised and amended (hereafter referred to as the Madrid Agreement), provided that on the date when conversion was requested it was possible to have designated that Member State directly under the Madrid Protocol or the Madrid Agreement. Articles 108 to 110 shall apply.

2. The national trade mark application or the designation of a Member State party to the Madrid Protocol or the Madrid Agreement resulting from the conversion of the designation of the European Community through an international registration shall enjoy, in respect of the Member State concerned, the date of the international registration pursuant to Article 3(4) of the Madrid Protocol or the date of the extension to the European Community pursuant to Article 3ter(2) of the Madrid Protocol if the latter was made subsequently to the international registration, or the date of priority of that registration and, where appropriate, the seniority of a trade mark of that State claimed under Article 148.

3. The request for conversion shall be published.

Article 155

Use of a mark subject of an international registration

For the purposes of applying Article 15(1), Article 43(2), Article 50(1)(a) and Article 56(2), the date of publication pursuant to Article 147(2) shall take the place of the date of registration for the purpose of establishing the date as from which the mark which is the subject of an international registration designating the European Community must be put to genuine use in the Community.

Article 156

Transformation

1. Subject to paragraph 2, the provisions applicable to Community trade mark applications shall apply *mutatis mutandis* to applications for transformation of an international registration into a Community trade mark application pursuant to Article 9quinquies of the Madrid Protocol.

2. When the application for transformation relates to an international registration designating the European Community the particulars of which have been published pursuant to Article 147(2), Articles 38 to 43 shall not apply."

4. Title XIII becomes Title XIV.

5. Articles 140, 141, 142 and 143 shall be renumbered as follows:

Article 140 becomes Article 157

Article 141 becomes Article 158

Article 142 becomes Article 159

Article 143 becomes Article 160.

6. The reference to Article 140 in Article 26(3) shall be replaced by a reference to Article 157.

7. The reference to Article 141 in Article 139(3) and Article 140(3) shall be replaced by a reference to Article 158.

Article 2

This Regulation shall enter into force on the date on which the Madrid Protocol enters into force with respect to the European Community. The date of entry into force of this Regulation shall be published in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Luxembourg, 27 October 2003.

Protocol

relating to the Madrid Agreement concerning the international registration of marks, adopted at Madrid on 27 June 1989

Article 1

Membership in the Madrid Union

The States party to this Protocol (hereinafter referred to as the contracting States), even where they are not party to the Madrid Agreement concerning the international registration of marks as revised at Stockholm in 1967 and as amended in 1979 (hereinafter referred to as the Madrid (Stockholm) Agreement), and the organisations referred to in Article 14(1)(b) which are party to this Protocol (hereinafter referred to as the contracting organisations) shall be members of the same Union of which countries party to the Madrid (Stockholm) Agreement are members. Any reference in this Protocol to "contracting parties" shall be construed as a reference to both contracting States and contracting organisations.

Article 2

Securing protection through international registration

1. Where an application for the registration of a mark has been filed with the office of a contracting party, or where a mark has been registered in the register of the office of a contracting party, the person in whose name that application (hereinafter referred to as the basic application) or that registration (hereinafter referred to as the basic registration) stands may, subject to the provisions of this Protocol, secure protection for his mark in the territory of the contracting parties, by obtaining the registration of that mark in the register of the International Bureau of the World Intellectual Property Organisation (hereinafter referred to as "the international registration", "the International Register", "the International Bureau" and the "Organisation", respectively), provided that:

(i) where the basic application has been filed with the office of a contracting State or where the basic registration has been made by such an office, the person in whose name that application or registration stands is a national of that contracting State, or is domiciled, or has a real and effective industrial or commercial establishment, in the said contracting State;

(ii) where the basic application has been filed with the office of a contracting organisation or where the basic registration has been made by such an office, the person in whose name that application or registration stands is a national of a State member of that contracting organisation, or is domiciled, or has a real and effective industrial or commercial establishment, in the territory of the said contracting organisation.

2. The application for international registration (hereinafter referred to as the international application) shall be filed with the International Bureau through the intermediary of the office with which the basic application was filed or by which the basic registration was made (hereinafter referred to as the office of origin), as the case may be.

3. Any reference in this Protocol to an "office" or an "office of a contracting party" shall be construed as a reference to the office that is in charge, on behalf of a contracting party, of the registration of marks, and any reference in this Protocol to "marks" shall be construed as a reference to trade marks and service marks.

4. For the purposes of this Protocol, "territory of a contracting party" means, where the contracting party is a State, the territory of that State and, where the contracting party is an intergovernmental organisation, the territory in which the constituting treaty of that intergovernmental organisation applies.

Article 3

International application

1. Every international application under this Protocol shall be presented on the form prescribed by the regulations. The office of origin shall certify that the particulars appearing in the international application correspond to the particulars appearing, at the time of the certification, in the basic application or basic registration, as the case may be. Furthermore, the said office shall indicate:

(i) in the case of a basic application, the date and number of that application;

(ii) in the case of a basic registration, the date and number of that registration as well as the date and number of the application from which the basic registration resulted. The office of origin shall also indicate the date of the international application.

2. The applicant must indicate the goods and services in respect of which protection of the mark is claimed and also, if possible, the corresponding class or classes according to the classification established by the Nice Agreement concerning the international classification of goods and services for the purposes of the registration of marks. If the applicant does not give such indication, the International Bureau shall classify the goods and services in the appropriate classes of the said classification. The indication of classes given by the applicant shall be subject to control by the International Bureau, which shall exercise the said control in association with the office of origin. In the event of disagreement between the said office and the International Bureau, the opinion of the latter shall prevail.

3. If the applicant claims colour as a distinctive feature of his mark, he shall be required:

(i) to state the fact, and to file with his international application a notice specifying the colour or the combination of colours claimed;

(ii) to append to his international application copies in colour of the said mark, which shall be attached to the notifications given by the International Bureau, the number of such copies shall be fixed by the regulations.

4. The International Bureau shall register immediately the marks filed in accordance with Article 2. The international registration shall bear the date on which the international application was received in the office of origin, provided that the international application has been received by the International Bureau within a period of two months from that date. If the international application has not been received within that period, the international registration shall bear the date on which the said international application was received by the International Bureau. The International Bureau shall notify the international registration without delay to the offices concerned. Marks registered in the International Register shall be published in a periodical gazette issued by the International Bureau, on the basis of the

particulars contained in the international application.

5. With a view to the publicity to be given to marks registered in the International Register, each office shall receive from the International Bureau a number of copies of the said gazette free of charge and a number of copies at a reduced price, under the conditions fixed by the assembly referred to in Article 10 (hereinafter referred to as the assembly). Such publicity shall be deemed to be sufficient for the purposes of all the contracting parties, and no other publicity may be required of the holder of the international registration.

Article 3bis

Territorial effect

The protection resulting from the international registration shall extend to any contracting party only at the request of the person who files the international application or who is the holder of the international registration. However, no such request can be made with respect to the contracting party whose office is the office of origin.

Article 3ter

Request for "territorial extension"

1. Any request for extension of the protection resulting from the international registration to any contracting party shall be specially mentioned in the international application.

2. A request for territorial extension may also be made subsequently to the international registration. Any such request shall be presented on the form prescribed by the regulations. It shall be immediately recorded by the International Bureau, which shall notify such recordal without delay to the office or offices concerned. Such recordal shall be published in the periodical gazette of the International Bureau. Such territorial extension shall be effective from the date on which it has been recorded in the International Register; it shall cease to be valid on the expiry of the international registration to which it relates.

Article 4

Effects of international registration

1. (a) From the date of the registration or recordal effected in accordance with the provisions of Articles 3 and 3ter, the protection of the mark in each of the contracting parties concerned shall be the same as if the mark had been deposited direct with the office of that contracting party. If no refusal has been notified to the International Bureau in accordance with Article 5(1) and (2) or if a refusal notified in accordance with the said Article has been withdrawn subsequently, the protection of the mark in the contracting party concerned shall, as from the said date, be the same as if the mark had been registered by the office of that contracting party.

(b) The indication of classes of goods and services provided for in Article 3 shall not bind the contracting parties with regard to the determination of the scope of the protection of the mark.

2. Every international registration shall enjoy the right of priority provided for by Article 4 of the Paris Convention for the protection of industrial property, without it being necessary to comply with the formalities prescribed in section D of that Article.

Article 4bis

Replacement of a national or regional registration by an international registration

1. Where a mark that is the subject of a national or regional registration in the office of a contracting party is also the subject of an international registration and both registrations stand in the name of the same person, the international registration is deemed to replace the national or regional registration, without prejudice to any rights acquired by virtue of the latter, provided that:

- (i) the protection resulting from the international registration extends to the said contracting party under Article 3ter(1) or (2);
- (ii) all the goods and services listed in the national or regional registration are also listed in the international registration in respect of the said contracting party;
- (iii) such extension takes effect after the date of the national or regional registration.

2. The office referred to in paragraph 1 shall, upon request, be required to take note in its register of the international registration.

Article 5

Refusal and invalidation of effects of international registration in respect of certain contracting parties

1. Where the applicable legislation so authorises, any office of a contracting party which has been notified by the International Bureau of an extension to that contracting party, under Article 3ter(1) or (2), of the protection resulting from the international registration shall have the right to declare in a notification of refusal that protection cannot be granted in the said contracting party to the mark which is the subject of such extension. Any such refusal can be based only on the grounds which would apply, under the Paris Convention for the protection of industrial property, in the case of a mark deposited direct with the office which notifies the refusal. However, protection may not be refused, even partially, by reason only that the applicable legislation would permit registration only in a limited number of classes or for a limited number of goods or services.

2. (a) Any office wishing to exercise such right shall notify its refusal to the International Bureau, together with a statement of all grounds, within the period prescribed by the law applicable to that office and at the latest, subject to subparagraphs (b) and (c), before the expiry of one year from the date on which the notification of the extension referred to in paragraph 1 has been sent to that office by the International Bureau.

(b) Notwithstanding subparagraph (a), any contracting party may declare that, for international registrations made under this Protocol, the time limit of one year referred to in subparagraph (a) is replaced by 18 months.

(c) Such declaration may also specify that, when a refusal of protection may result from an opposition to the granting of protection, such refusal may be notified by the office of the said contracting party to the International Bureau after the expiry of the 18-month time limit. Such an office may, with respect to any given international registration, notify a refusal of protection after the expiry of the 18-month time limit, but only if:

(i) it has, before the expiry of the 18-month time limit, informed the International Bureau of the possibility that oppositions may be filed after the expiry of the 18-month time limit; and

(ii) the notification of the refusal based on an opposition is made within a time limit of not more than seven months from the date on which the opposition period begins; if the opposition period expires before this time limit of seven months, the notification must be made

within a time limit of one month from the expiry of the opposition period.

(d) Any declaration under subparagraphs (b) or (c) may be made in the instruments referred to in Article 14(2), and the effective date of the declaration shall be the same as the date of entry into force of this Protocol with respect to the State or intergovernmental organisation having made the declaration. Any such declaration may also be made later, in which case the declaration shall have effect three months after its receipt by the Director-General of the organisation (hereinafter referred to as the Director-General), or at any later date indicated in the declaration, in respect of any international registration whose date is the same as or is later than the effective date of the declaration.

(e) Upon the expiry of a period of 10 years from the entry into force of this Protocol, the Assembly shall examine the operation of the system established by subparagraphs (a) to (d). Thereafter, the provisions of the said subparagraphs may be modified by a unanimous decision of the Assembly.

3. The International Bureau shall, without delay, transmit one of the copies of the notification of refusal to the holder of the international registration. The said holder shall have the same remedies as if the mark had been deposited by him direct with the office which has notified its refusal. Where the International Bureau has received information under paragraph 2(c)(i), it shall, without delay, transmit the said information to the holder of the international registration.

4. The grounds for refusing a mark shall be communicated by the International Bureau to any interested party who may so request.

5. Any office which has not notified, with respect to a given international registration, any provisional or final refusal to the International Bureau in accordance with paragraphs 1 and 2 shall, with respect to that international registration, lose the benefit of the right provided for in paragraph 1.

6. Invalidation, by the competent authorities of a contracting party, of the effects, in the territory of that contracting party, of an international registration may not be pronounced without the holder of such international registration having, in good time, been afforded the opportunity of defending his rights. Invalidation shall be notified to the International Bureau.

Article 5bis

Documentary evidence of legitimacy of use of certain elements of the mark

Documentary evidence of the legitimacy of the use of certain elements incorporated in a mark, such as armorial bearings, escutcheons, portraits, honorary distinctions, titles, trade names, names of persons other than the name of the applicant, or other like inscriptions, which might be required by the offices of the contracting parties, shall be exempt from any legalisation as well as from any certification other than that of the office of origin.

Article 5ter

Copies of entries in the International Register; searches for anticipations; extracts from the International Register

1. The International Bureau shall issue to any person applying therefor, upon the payment of a fee fixed by the regulations, a copy of the entries in the International Register concerning a specific mark.

2. The International Bureau may also, upon payment, undertake searches for anticipations among marks that are the subject of international registrations.

3. Extracts from the International Register requested with a view to their production in one of the contracting parties shall be exempt from any legalisation.

Article 6

Period of validity of international registration; dependence and independence of international registration

1. Registration of a mark at the International Bureau is effected for 10 years, with the possibility of renewal under the conditions specified in Article 7.

2. Upon expiry of a period of five years from the date of the international registration, such registration shall become independent of the basic application or the registration resulting therefrom, or of the basic registration, as the case may be, subject to the following provisions.

3. The protection resulting from the international registration, whether or not it has been the subject of a transfer, may no longer be invoked if, before the expiry of five years from the date of the international registration, the basic application or the registration resulting therefrom, or the basic registration, as the case may be, has been withdrawn, has lapsed, has been renounced or has been the subject of a final decision of rejection, revocation, cancellation or invalidation, in respect of all or some of the goods and services listed in the international registration. The same applies if:

(i) an appeal against a decision refusing the effects of the basic application;

(ii) an action requesting the withdrawal of the basic application or the revocation, cancellation or invalidation of the registration resulting from the basic application or of the basic registration; or

(iii) an opposition to the basic application

results, after the expiry of the five-year period, in a final decision of rejection, revocation, cancellation or invalidation, or ordering the withdrawal, of the basic application, or the registration resulting therefrom, or the basic registration, as the case may be, provided that such appeal, action or opposition had begun before the expiry of the said period. The same also applies if the basic application is withdrawn, or the registration resulting from the basic application or the basic registration is renounced, after the expiry of the five-year period, provided that, at the time of the withdrawal or renunciation, the said application or registration was the subject of a proceeding referred to in item (i), (ii) or (iii) and that such proceeding had begun before the expiry of the said period.

4. The office of origin shall, as prescribed in the regulations, notify the International Bureau of the facts and decisions relevant under paragraph 3, and the International Bureau shall, as prescribed in the regulations, notify the interested parties and effect any publication accordingly. The office of origin shall, where applicable, request the International Bureau to cancel, to the extent applicable, the international registration, and the International Bureau shall proceed accordingly.

Article 7

Renewal of international registration

1. Any international registration may be renewed for a period of 10 years from the expiry of the preceding period, by the mere payment of the basic fee and, subject to Article 8(7), of the supplementary and complementary fees provided for in Article 8(2).

2. Renewal may not bring about any change in the international registration in its latest form.
3. Six months before the expiry of the term of protection, the International Bureau shall, by sending an unofficial notice, remind the holder of the international registration and his representative, if any, of the exact date of expiry.
4. Subject to the payment of a surcharge fixed by the regulations, a period of grace of six months shall be allowed for renewal of the international registration.

Article 8

Fees for international application and registration

1. The office of origin may fix, at its own discretion, and collect, for its own benefit, a fee which it may require from the applicant for international registration or from the holder of the international registration in connection with the filing of the international application or the renewal of the international registration.
2. Registration of a mark at the International Bureau shall be subject to the advance payment of an international fee which shall, subject to the provisions of paragraph 7(a), include:
 - (i) a basic fee;
 - (ii) a supplementary fee for each class of the international classification, beyond three, into which the goods or services to which the mark is applied will fall;
 - (iii) a complementary fee for any request for extension of protection under Article 3ter.
3. However, the supplementary fee specified in paragraph 2(ii) may, without prejudice to the date of the international registration, be paid within the period fixed by the regulations if the number of classes of goods or services has been fixed or disputed by the International Bureau. If, upon expiry of the said period, the supplementary fee has not been paid or the list of goods or services has not been reduced to the required extent by the applicant, the international application shall be deemed to have been abandoned.
4. The annual product of the various receipts from international registration, with the exception of the receipts derived from the fees mentioned in paragraph 2(ii) and (iii), shall be divided equally among the contracting parties by the International Bureau, after deduction of the expenses and charges necessitated by the implementation of this Protocol.
5. The amounts derived from the supplementary fees provided for in paragraph 2(ii) shall be divided, at the expiry of each year, among the interested contracting parties in proportion to the number of marks for which protection has been applied for in each of them during that year, this number being multiplied, in the case of contracting parties which make an examination, by a coefficient which shall be determined by the regulations.
6. The amounts derived from the complementary fees provided for in paragraph 2(iii) shall be divided according to the same rules as those provided for in paragraph 5.
7. (a) Any contracting party may declare that, in connection with each international registration in which it is mentioned under Article 3ter, and in connection with the renewal of any such international registration, it wants to receive, instead of a share in the revenue produced by the supplementary and complementary fees, a fee (hereinafter referred to as the individual fee) whose amount shall be

indicated in the declaration, and can be changed in further declarations, but may not be higher than the equivalent of the amount which the said contracting party's office would be entitled to receive from an applicant for a 10-year registration, or from the holder of a registration for a 10-year renewal of that registration, of the mark in the register of the said office, the said amount being diminished by the savings resulting from the international procedure. Where such an individual fee is payable:

(i) no supplementary fees referred to in paragraph 2(ii) shall be payable if only contracting parties which have made a declaration under this subparagraph are mentioned under Article 3ter; and

(ii) no complementary fee referred to in paragraph 2(iii) shall be payable in respect of any contracting party which has made a declaration under this subparagraph.

(b) Any declaration under subparagraph (a) may be made in the instruments referred to in Article 14(2), and the effective date of the declaration shall be the same as the date of entry into force of this Protocol with respect to the State or intergovernmental organisation having made the declaration. Any such declaration may also be made later, in which case the declaration shall have effect three months after its receipt by the Director-General, or at any later date indicated in the declaration, in respect of any international registration whose date is the same as or is later than the effective date of the declaration.

Article 9

Recordal of change in the ownership of an international registration

At the request of the person in whose name the international registration stands, or at the request of an interested office made ex officio or at the request of an interested person, the International Bureau shall record in the International Register any change in the ownership of that registration, in respect of all or some of the contracting parties in whose territories the said registration has effect and in respect of all or some of the goods and services has effect and in respect of all or some of the goods and services listed in the registration, provided that the new holder is a person who, under Article 2(1), is entitled to file international applications.

Article 9bis

Recordal of certain matters concerning an international registration

The International Bureau shall record in the International Register:

(i) any change in the name or address of the holder of the international registration;

(ii) the appointment of a representative of the holder of the international registration and any other relevant fact concerning such representative;

(iii) any limitation, in respect of all or some of the contracting parties, of the goods and services listed in the international registration;

(iv) any renunciation, cancellation or invalidation of the international registration in respect of all or some of the contracting parties;

(v) any other relevant fact, identified in the regulations, concerning the rights in a mark that is the subject of an international registration.

Article 9ter

Fees for certain recordals

Any recordal under Article 9 or under Article 9bis may be subject to the payment of a fee.

Article 9quater

Common office of several contracting States

1. If several contracting States agree to effect the unification of their domestic legislation on marks, they may notify the Director-General

(i) that a common office shall be substituted for the national office of each of them, and

(ii) that the whole of their respective territories shall be deemed to be a single State for the purposes of the application of all or part of the provisions preceding this Article as well as the provisions of Articles 9quinquies and 9sexies.

2. Such notification shall not take effect until three months after the date of the communication thereof by the Director-General to the other contracting parties.

Article 9quinquies

Transformation of an international registration into national or regional applications

Where, in the event that the international registration is cancelled at the request of the office of origin under Article 6(4), in respect of all or some of the goods and services listed in the said registration, the person who was the holder of the international registration files an application for the registration of the same mark with the office of any of the contracting parties in the territory of which the international registration had effect, that application shall be treated as if it had been filed on the date of the international registration according to Article 3(4) or on the date of recordal of the territorial extension according to Article 3ter(2) and, if the international registration enjoyed priority, shall enjoy the same priority, provided that:

(i) such application is filed within three months from the date on which the international registration was cancelled;

(ii) the goods and services listed in the application are in fact covered by the list of goods and services contained in the international registration in respect of the contracting party concerned; and

(iii) such application complies with all the requirements of the applicable law, including the requirements concerning fees.

Article 9sexies

Safeguard of the Madrid (Stockholm) Agreement

1. Where, with regard to a given international application or a given international registration, the office of origin is the office of a State that is party to both this Protocol and the Madrid (Stockholm) Agreement, the provisions of this Protocol shall have no effect in the territory of any other State that is also party to both this Protocol and the Madrid (Stockholm) Agreement.

2. The Assembly may, by a three-fourths majority, repeal paragraph 1, or restrict the scope of paragraph 1, after the expiry of a period of 10 years from the entry into force of this Protocol, but not before the expiry of a period of five years from the date on which the majority of the countries party to the Madrid (Stockholm) Agreement have become party to this Protocol. In the vote of the Assembly, only those States which are party to both the said Agreement and this Protocol shall have the right to participate.

Article 10

Assembly

1. (a) The contracting parties shall be members of the same Assembly as the countries party to the Madrid (Stockholm) Agreement.
- (b) Each contracting party shall be represented in that Assembly by one delegate, who may be assisted by alternate delegates, advisors, and experts.
- (c) The expenses of each delegation shall be borne by the contracting party which has appointed it, except for the travel expenses and the subsistence allowance of one delegate for each contracting party, which shall be paid from the funds of the Union.
2. The Assembly shall, in addition to the functions which it has under the Madrid (Stockholm) Agreement, also:
 - (i) deal with all matters concerning the implementation of this Protocol;
 - (ii) give directions to the International Bureau concerning the preparation for conferences of revision of this Protocol, due account being taken of any comments made by those countries of the Union which are not party to this Protocol;
 - (iii) adopt and modify the provisions of the regulations concerning the implementation of this Protocol;
 - (iv) perform such other functions as are appropriate under this Protocol.
3. (a) Each contracting party shall have one vote in the Assembly. On matters concerning only countries that are party to the Madrid (Stockholm) Agreement, contracting parties that are not party to the said Agreement shall not have the right to vote, whereas, on matters concerning only contracting parties, only the latter shall have the right to vote.
- (b) One-half of the members of the Assembly which have the right to vote on a given matter shall constitute the quorum for the purposes of the vote on that matter.
- (c) Notwithstanding the provisions of subparagraph (b), if, in any session, the number of the members of the Assembly having the right to vote on a given matter which are represented is less than one-half but equal to or more than one-third of the members of the Assembly having the right to vote on that matter, the Assembly may make decisions but, with the exception of decisions concerning its own procedure, all such decisions shall take effect only if the conditions set forth hereinafter are fulfilled. The International Bureau shall communicate the said decisions to the members of the Assembly having the right to vote on the said matter which were not represented and shall invite them to express in writing their vote or abstention within a period of three months from the date of the communication. If, at the expiry of this period, the number of such members having thus expressed their vote or abstention attains the number of the members which was lacking for attaining the quorum in the session itself, such decisions shall take effect provided that at the same time the required majority still obtains.
- (d) Subject to the provisions of Articles 5(2)(e), 9sexies(2), Article 12 and Article 13(2), the decisions of the Assembly shall require two-thirds of the votes cast.
- (e) Abstentions shall not be considered as votes.
- (f) A delegate may represent, and vote in the name of, one member of the Assembly only.

4. In addition to meeting in ordinary sessions and extraordinary sessions as provided for by the Madrid (Stockholm) Agreement, the Assembly shall meet in extraordinary session upon convocation by the Director-General, at the request of one-fourth of the members of the Assembly having the right to vote on the matters proposed to be included in the agenda of the session. The agenda of such an extraordinary session shall be prepared by the Director-General.

Article 11

International Bureau

1. International registration and related duties, as well as all other administrative tasks, under or concerning this Protocol, shall be performed by the International Bureau.

2. (a) The International Bureau shall, in accordance with the directions of the Assembly, make the preparations for the conferences of revision of this Protocol.

(b) The International Bureau may consult with intergovernmental and international non-governmental organisations concerning preparations for such conferences of revision.

(c) The Director-General and persons designated by him shall take part, without the right to vote, in the discussions at such conferences of revision.

3. The International Bureau shall carry out any other tasks assigned to it in relation to this Protocol.

Article 12

Finances

As far as contracting parties are concerned, the finances of the Union shall be governed by the same provisions as those contained in Article 12 of the Madrid (Stockholm) Agreement, provided that any reference to Article 8 of the said Agreement shall be deemed to be a reference to Article 8 of this Protocol. Furthermore, for the purposes of Article 12(6)(b) of the said Agreement, contracting organisations shall, subject to a unanimous decision to the contrary by the Assembly, be considered to belong to contribution class 1 (one) under the Paris Convention for the protection of industrial property.

Article 13

Amendment of certain Articles of the Protocol

1. Proposals for the amendment of Articles 10, 11, 12, and the present Article, may be initiated by any contracting party, or by the Director-General. Such proposals shall be communicated by the Director-General to the contracting parties at least six months in advance of their consideration by the Assembly.

2. Amendments to the Articles referred to in paragraph 1 shall be adopted by the Assembly. Adoption shall require three-fourths of the votes cast, provided that any amendment to Article 10, and to the present paragraph, shall require four-fifths of the votes casts.

3. Any amendment to the Articles referred to in paragraph 1 shall enter into force one month after written notification of acceptance, effected in accordance with their respective constitutional processes, have been received by the Director-General from three-fourths of

those States and intergovernmental organisations which, at the time the amendment was adopted, were members of the Assembly and had the right to vote on the amendment. Any amendment to the said Articles thus accepted shall bind all the States and intergovernmental organisations which are contracting parties at the time the amendment enters into force, or which become contracting parties at a subsequent date.

Article 14

Becoming party to the Protocol; entry into force

1. (a) Any State that is a party to the Paris Convention for the protection of industrial property may become party to this Protocol.

(b) Furthermore, any intergovernmental organisation may also become party to this Protocol where the following conditions are fulfilled:

(i) at least one of the member States of that organisation is a party to the Paris Convention for the protection of industrial property;

(ii) that organisation has a regional office for the purposes of registering marks with effect in the territory of the organisation, provided that such office is not the subject of a notification under Article 9quater.

2. Any State or organisation referred to in paragraph 1 may sign this Protocol. Any such State or organisation may, if it has signed this Protocol, deposit an instrument of ratification, acceptance or approval of this Protocol or, if it has not signed this Protocol, deposit an instrument of accession to this Protocol.

3. The instruments referred to in paragraph 2 shall be deposited with the Director-General.

4. (a) This Protocol shall enter into force three months after four instruments of ratification, acceptance, approval or accession have been deposited, provided that at least one of those instruments has been deposited by a country party to the Madrid (Stockholm) Agreement and at least one other of those instruments has been deposited by a State not party to the Madrid (Stockholm) Agreement or by any of the organisations referred to in paragraph 1(b).

(b) With respect to any other State or organisation referred to in paragraph 1, this Protocol shall enter into force three months after the date on which its ratification, acceptance, approval or accession has been notified by the Director-General.

5. Any State or organisation referred to in paragraph 1 may, when depositing its instrument of ratification, acceptance or approval of, or accession to, this Protocol, declare that the protection resulting from any international registration effected under this Protocol before the date of entry into force of this Protocol with respect to it cannot be extended to it.

Article 15

Denunciation

1. This Protocol shall remain in force without limitation as to time.

2. Any contracting party may denounce this Protocol by notification addressed to the Director-General.

3. Denunciation shall take effect one year after the day on which the Director-General has received the notification.

4. The right of denunciation provided for by this Article shall not be exercised by any contracting party before the expiry of five years

from the date upon which this Protocol entered into force with respect to that contracting party.

5. (a) Where a mark is the subject of an international registration having effect in the denouncing State or intergovernmental organisation at the date on which the denunciation becomes effective, the holder of such registration may file an application for the registration of the same mark with the office of the denouncing State or intergovernmental organisation, which shall be treated as if it had been filed on the date of the international registration according to Article 3(4) or on the date of recordal of the territorial extension according to Article 3ter(2) and, if the international registration enjoyed priority, enjoy the same priority, provided that:

(i) such application is filed within two years from the date on which the denunciation became effective;

(ii) the goods and services listed in the application are in fact covered by the list of goods and services contained in the international registration in respect of the denouncing State or intergovernmental organisation; and

(iii) such application complies with all the requirements of the applicable law, including the requirements concerning fees.

(b) The provisions of subparagraph (a) shall also apply in respect of any mark that is the subject of an international registration having effect in contracting parties other than the denouncing State or intergovernmental organisation at the date on which denunciation becomes effective and whose holder, because of the denunciation, is no longer entitled to file international applications under Article 2 (1).

Article 16

Signature; languages; depository functions

1. (a) This Protocol shall be signed in a single copy in the English, French and Spanish languages, and shall be deposited with the Director-General when it ceases to be open for signature at Madrid. The texts in the three languages shall be equally authentic.

(b) Official texts of this Protocol shall be established by the Director-General, after consultation with the interested governments and organisations, in the Arabic, Chinese, German, Italian, Japanese, Portuguese and Russian languages, and in such other languages as the Assembly may designate.

2. This Protocol shall remain open for signature at Madrid until 31 December 1989.

3. The Director-General shall transmit two copies, certified by the Government of Spain, of the signed texts of this Protocol to all States and intergovernmental organisations that may become party to this Protocol.

4. The Director-General shall register this Protocol with the Secretariat of the United Nations.

5. The Director-General shall notify all States and international organisations that may become or are party to this Protocol of signatures, deposits of instruments of ratification, acceptance, approval or accession, the entry into force of this protocol and any amendment thereto, any notification of denunciation and any declaration provided for in this Protocol.

Declaration

on the individual fee system

The President of the Council, when depositing this instrument of accession with the Director-General of WIPO, shall attach the following

declaration to the instrument of accession:

"The European Community declares that, in connection with each international registration in which it is mentioned under Article 3ter(1) or (2) of the Madrid Protocol, and in connection with the renewal of any such international registration, it wants to receive, instead of a share in the revenue produced by the supplementary fee and complementary fee,

for an individual mark:

- a designation fee of EUR 1875 plus, where applicable, EUR 400 for each class of goods or services exceeding three, or, where applicable,

- a renewal fee of EUR 2300 plus, where applicable, EUR 500 for each class of goods or services exceeding three;

for a collective mark:

- a designation fee of EUR 3675 plus, where applicable, EUR 800 for each class of goods or services exceeding three, or where applicable,

- a renewal fee of EUR 4800 plus, where applicable, EUR 1000 for each class of goods or services exceeding three."

Notification

on the conversion of a designation of the European Community into designations of its Member States

The President of the Council, when depositing this instrument of accession with the Director-General of WIPO, shall attach the following notification to the instrument of accession:

"The European Community declares that, where a designation of the European Community has been recorded in the International Register, that designation may, to the extent that it has been refused or ceases to have effect, be converted into the designation of any of its Member States, provided that the conditions as set out in Article 154 of the Regulation on the Community trade mark, as amended and the relevant provisions under the Madrid Agreement and Protocol are met."

Declaration

from the European Community to the International Bureau on the period for the notification of the refusal of protection in the territory of a contracting party(1)

The European Community hereby declares that, pursuant to Article 5(2)(b) of the Protocol relating to the Madrid Agreement concerning the international registration of marks (1989), the period of one year to exercise the right to notify the refusal of protection referred to in Article 5(2)(a) thereof is replaced by a period of 18 months.

(1) The European Community notes that its intention is that the present declaration be of a temporary nature only. It will be withdrawn when the elements which justify it have come to an end.

**Council Regulation (EC) No 422/2004
of 19 February 2004
amending Regulation (EC) No 40/94 on the Community **trade mark** (Text with EEA relevance)**

Council Regulation (EC) No 422/2004

of 19 February 2004

amending Regulation (EC) No 40/94 on the Community trade mark

(Text with EEA relevance)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 308 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament(1),

Having regard to the opinion of the European Economic and Social Committee(2),

Whereas:

- (1) Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark(3), set up a unitary system of protection of trade marks throughout the Member States via Community registration. This system has generally fulfilled users' expectations satisfactorily. It has also had a positive effect on the effective achievement of the internal market.
- (2) The functioning of the system has made it possible to identify other aspects which could clarify and further supplement it, thereby making it possible to improve the effectiveness of the system, increase the value it adds and anticipate, as of now, the consequences of additional members in future, without it being necessary to change the substance of the system, which has proven itself to be perfectly valid with regard to the objectives set.
- (3) The Community trade mark system should be made accessible to all, without any requirement of reciprocity, equivalence and/or nationality. This would also encourage trade on the world market. Such requirements make the system complex, inflexible and ineffective. In addition, in the context of the new Community design system, the Council took a flexible line on this question.
- (4) In order to rationalise the procedure, the search system should be amended. It should remain compulsory for Community trade marks, but it should be made optional, subject to the payment of a fee, for searches in the trade mark registers of the Member States which notified their own decision to carry out such a search. Furthermore, measures should be provided with a view to improving the quality of the search reports, ensuring greater uniformity by using a standard form and laying down their essential contents.
- (5) Certain measures should be taken in order to give the Boards of Appeal additional means of speeding up their decisions and improving their operation.
- (6) The experience acquired in the application of the system highlighted the possibility of improving certain aspects of the procedure. Consequently, certain points should be amended and others inserted in order to offer users a higher-quality product which is still competitive,

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 40/94 is hereby amended as follows:

1. Article 5 shall be replaced by the following:

"Article 5

Persons who can be proprietors of Community trade marks

Any natural or legal person, including authorities established under public law, may be the proprietor of a Community trade mark.";

2. in Article 7(1), the following point shall be added:

"(k) trade marks which contain or consist of a designation of origin or a geographical indication registered in accordance with Regulation (EEC) No 2081/92 when they correspond to one of the situations covered by Article 13 of the said Regulation and regarding the same type of product, on condition that the application for registration of the trade mark has been submitted after the date of filing with the Commission of the application for registration of the designation of origin or geographical indication.";

3. In Article 8(4), the introductory subparagraph shall be replaced by the following:

"4. Upon opposition by the proprietor of a non-registered trade mark or of another sign used in the course of trade of more than mere local significance, the trade mark applied for shall not be registered where and to the extent that, pursuant to the Community legislation or the law of the Member State governing that sign:";

4. Article 21 shall be replaced by the following:

"Article 21

Insolvency proceedings

1. The only insolvency proceedings in which a Community trade mark may be involved are those opened in the Member State in the territory of which the debtor has his centre of main interests.

However, where the debtor is an insurance undertaking or a credit institution as defined in Directives 2001/17/EC(4) and 2001/24/EC(5), respectively, the only insolvency proceedings in which a Community trademark may be involved are those opened in the Member State where that undertaking or institution has been authorised.

2. In the case of joint proprietorship of a Community trade mark, paragraph 1 shall apply to the share of the joint proprietor.

3. Where a Community trade mark is involved in insolvency proceedings, on request of the competent national authority an entry to this effect shall be made in the Register and published in the Community Trade Marks Bulletin referred to in Article 85.";

5. Article 25(3) shall be replaced by the following:

"3. Applications referred to in paragraph 2 which reach the Office more than two months after filing shall be deemed to have been filed on the date on which the application reached the Office.";

6. Article 35(1) shall be replaced by the following:

"1. The proprietor of a Community trade mark who is the proprietor of an earlier identical trade

mark registered in a Member State, including a trade mark registered in the Benelux countries or of an earlier identical trade mark, with an international registration effective in a Member State, for goods or services which are identical to those for which the earlier trade mark has been registered, or contained within them, may claim the seniority of the earlier trade mark in respect of the Member State in or for which it was registered.";

7. Article 36(1)(b) shall be replaced by the following:

"(b) the Community trade mark application complies with the conditions laid down in this Regulation and with the conditions laid down in the Implementing Regulation.";

8. Article 37 shall be deleted;

9. Article 39 shall be replaced by the following:

"Article 39

Search

1. Once the Office has accorded a date of filing, it shall draw up a Community search report citing those earlier Community trade marks or Community trade mark applications discovered which may be invoked under Article 8 against the registration of the Community trade mark applied for.

2. Where, at the time of filing a Community trade mark application, the applicant requests that a search report also be prepared by the central industrial property offices of the Member States and where the appropriate search fee has been paid within the time-limit for the payment of the filing fee, the Office shall, as soon as a Community trade mark application has been accorded a date of filing, transmit a copy thereof to the central industrial property office of each Member State which has informed the Office of its decision to operate a search in its own register of trade marks in respect of Community trade mark applications.

3. Each of the central industrial property offices referred to in paragraph 2 shall communicate to the Office within two months as from the date on which it received the Community trade mark application a search report which shall either cite those earlier national trade marks or trade mark applications discovered which may be invoked under Article 8 against the registration of the Community trade mark applied for, or state that the search has revealed no such rights.

4. The search reports referred to in paragraph 3 shall be prepared on a standard form drawn up by the Office, after consulting the Administrative Board. The essential contents of this form shall be set out in the Implementing Regulation provided for in Article 157(1).

5. An amount shall be paid by the Office to each central industrial property office for each search report provided by that office in accordance with paragraph 3. The amount, which shall be the same for each office, shall be fixed by the Budget Committee by means of a decision adopted by a majority of three-quarters of the representatives of the Member States.

6. The Office shall transmit without delay to the applicant for the Community trade mark the Community search report and any requested national search reports received within the time limit laid down in paragraph 3.

7. Upon publication of the Community trade mark application, which may not take place before the expiry of a period of one month as from the date on which the Office transmits the search reports to the applicant, the Office shall inform the proprietors of any earlier Community trade marks or Community trade mark applications cited in the Community search report of the publication of the Community trade mark application.";

10. Article 40 shall be replaced by the following:

"Article 40

Publication of the application

1. If the conditions which the application for a Community trade mark must satisfy have been fulfilled and if the period referred to in Article 39(7) has expired, the application shall be published to the extent that it has not been refused pursuant to Article 38.

2. Where, after publication, the application is refused under Article 38, the decision that it has been refused shall be published upon becoming final.";

11. in Title IV, the title of Section 5 shall be replaced by the following:

"WITHDRAWAL, RESTRICTION, AMENDMENT AND DIVISION OF THE APPLICATION";

12. the following Article shall be inserted:

"Article 44a

Division of the application

1. The applicant may divide the application by declaring that some of the goods or services included in the original application will be the subject of one or more divisional applications. The goods or services in the divisional application shall not overlap with the goods or services which remain in the original application or those which are included in other divisional applications.

2. The declaration of division shall not be admissible:

- (a) if, where an opposition has been entered against the original application, such a divisional application has the effect of introducing a division amongst the goods or services against which the opposition has been directed, until the decision of the Opposition Division has become final or the opposition proceedings are finally terminated otherwise;
- (b) during the periods laid down in the Implementing Regulation.

3. The declaration of division must comply with the provisions set out in the Implementing Regulation.

4. The declaration of division shall be subject to a fee. The application shall be deemed not to have been made until the fee has been paid.

5. The division shall take effect on the date on which it is recorded in the files kept by the Office concerning the original application.

6. All requests and applications submitted and all fees paid with regard to the original application prior to the date on which the Office receives the declaration of division are deemed also to have been submitted or paid with regard to the divisional application or applications. The fees for the original application which have been duly paid prior to the date on which the declaration of division is received shall not be refunded.

7. The divisional application shall preserve the filing date and any priority date and seniority date of the original application.";

13. the title of Title V shall be replaced by the following:

"DURATION, RENEWAL, ALTERATION AND DIVISION OF COMMUNITY TRADE MARKS";

14. the following Article shall be inserted:

"Article 48a

Division of the registration

1. The proprietor of the Community trade mark may divide the registration by declaring that some of the goods or services included in the original registration will be the subject of one or more divisional registrations. The goods or services in the divisional registration shall not overlap with the goods or services which remain in the original registration or those which are included in other divisional registrations.

2. The declaration of division shall not be admissible:

- (a) if, where an application for revocation of rights or for a declaration of invalidity has been entered against the original registration, such a divisional declaration has the effect of introducing a division amongst the goods or services against which the application for revocation of rights or for a declaration of invalidity is directed, until the decision of the Cancellation Division has become final or the proceedings are finally terminated otherwise;
- (b) if, where a counterclaim for revocation or for a declaration of invalidity has been entered in a case before a Community trade mark court, such a divisional declaration has the effect of introducing a division amongst the goods or services against which the counterclaim is directed, until the mention of the Community trade mark court's judgement is recorded in the Register pursuant to Article 96(6).

3. The declaration of division must comply with the provisions set out in the Implementing Regulation.

4. The declaration of division shall be subject to a fee. The declaration shall be deemed not to have been made until the fee has been paid.

5. The division shall take effect on the date on which it is entered in the Register.

6. All requests and applications submitted and all fees paid with regard to the original registration prior to the date on which the Office receives the declaration of division shall be deemed also to have been submitted or paid with regard to the divisional registration or registrations. The fees for the original registration which have been duly paid prior to the date on which the declaration of division is received shall not be refunded.

7. The divisional registration shall preserve the filing date and any priority date and seniority date of the original registration.";

15. in Article 50(1), point (d) shall be deleted;

16. Article 51(1)(a) shall be replaced by the following:

"(a) where the Community trade mark has been registered contrary to the provisions of Article 7;"

17. Article 52(2) shall be replaced by the following:

"2. A Community trade mark shall also be declared invalid on application to the Office or on the basis of a counterclaim in infringement proceedings where the use of such trade mark may be prohibited pursuant to another earlier right, and in particular:

- (a) a right to a name;
- (b) a right of personal portrayal;
- (c) a copyright;
- (d) an industrial property right;

under the Community legislation or national law governing the protection.";

18. Article 56(6) shall be replaced by the following:

"6. A record of the Office's decision on the application for revocation of rights or for a declaration of invalidity shall be entered in the Register once it has become final.";

19. Article 60 shall be replaced by the following:

"Article 60

Revision of decisions in ex parte cases

1. If the party which has lodged the appeal is the sole party to the procedure, and if the department whose decision is contested considers the appeal to be admissible and well founded, the department shall rectify its decision.

2. If the decision is not rectified within one month after receipt of the statement of grounds, the appeal shall be remitted to the Board of Appeal without delay, and without comment as to its merit.";

20. the following Article shall be inserted:

"Article 60a

Revision of decisions in inter partes cases

1. Where the party which has lodged the appeal is opposed by another party and if the department whose decision is contested considers the appeal to be admissible and well founded, it shall rectify its decision.

2. The decision may only be rectified if the department whose decision is contested notifies the other party of its intention to rectify it, and that party accepts it within two months of the date on which it received the notification.

3. If, within two months of receiving the notification referred to in paragraph 2, the other party does not accept that the contested decision is to be rectified and makes a declaration to that effect or does not make any declaration within the period laid down, the appeal shall be remitted to the Board of Appeal without delay, and without comment as to its merit.

4. However, if the department whose decision is contested does not consider the appeal to be admissible and well founded within one month after receipt of the statement of grounds, it shall, instead of taking the measures provided for in paragraphs 2 and 3, remit the appeal to the Board of Appeal without delay, and without comment as to its merit.";

21. the following Article shall be inserted:

"Article 77a

Revocation of decisions

1. Where the Office has made an entry in the Register or taken a decision which contains an obvious procedural error attributable to the Office, it shall ensure that the entry is cancelled or the decision is revoked. Where there is only one party to the proceedings and the entry or the act affects its rights, cancellation or revocation shall be determined even if the error was not evident to the party.

2. Cancellation or revocation as referred to in paragraph 1 shall be determined, ex officio or at the request of one of the parties to the proceedings, by the department which made the entry or took the decision. Cancellation or revocation shall be determined within six months from the date on which the entry was made in the Register or the decision was taken, after consultation with the parties to the proceedings and any proprietor of rights to the Community trade mark in question that are entered in the Register.

3. This Article shall be without prejudice to the right of the parties to submit an appeal under Articles 57 and 63, or to the possibility, under the procedures and conditions laid down by the Implementing Regulation referred to in Article 157(1), of correcting any linguistic errors or errors of transcription and obvious errors in the Office's decisions or errors attributable to the Office in registering the trade mark or in publishing its registration.";

22. Article 78(5) shall be replaced by the following:

"5. This Article shall not be applicable to the time limits referred to in paragraph 2 of this Article, Article 42(1) and (3) and Article 78a.";

23. the following Article shall be inserted:

"Article 78a

Continuation of proceedings

1. An applicant for or proprietor of a Community trade mark or any other party to proceedings before the Office who has omitted to observe a time limit vis-à-vis the Office may, upon request, obtain the continuation of proceedings, provided that at the time the request is made the omitted act has been carried out. The request for continuation of proceedings shall be admissible only if it is presented within two months following the expiry of the unobserved time limit. The request shall not be deemed to have been filed until the fee for continuation of the proceedings has been paid.

2. This Article shall not be applicable to the time limits laid down in Article 25(3), Article 27, Article 29(1), Article 33(1), Article 36(2), Article 42, Article 43, Article 47(3), Article 59, Article 60a, Article 63(5), Article 78, Article 108, or to the time limits laid down in this Article or the time limits laid down by the Implementing Regulation referred to in Article 157(1) for claiming priority within the meaning of Article 30, exhibition priority within the meaning of Article 33 or seniority within the meaning of Article 34 after the application has been filed.

3. The department competent to decide on the omitted act shall decide upon the application.

4. If the Office accepts the application, the consequences of having failed to observe the time limit shall be deemed not to have occurred.

5. If the Office rejects the application, the fee shall be refunded.";

24. Article 81(6) shall be replaced by the following:

"6. The Opposition Division or Cancellation Division or Board of Appeal shall fix the amount of the costs to be paid pursuant to the preceding paragraphs when the costs to be paid are limited to the fees paid to the Office and the representation costs. In all other cases, the registry of the Board of Appeal or a member of the staff of the Opposition Division or Cancellation Division shall fix the amount of the costs to be reimbursed on request. The request is admissible only within two months of the date on which the decision for which an application was made for the costs to be fixed became final. The amount so determined may be reviewed by a decision of the Opposition Division or Cancellation Division or Board of Appeal on a request filed within the prescribed period.";

25. Article 88 shall be amended as follows:

(a) the first sentence of paragraph 3 shall be replaced by the following:"Natural or legal persons having their domicile or principal place of business or a real and effective industrial or commercial establishment in the Community may be represented before the Office by an employee.";

(b) the following paragraph shall be added:

"4. The Implementing Regulation shall specify whether and under what conditions an employee must file with the Office a signed authorisation for insertion on the file.";

26. Article 89 shall be amended as follows:

(a) in paragraph 1, point b shall be replaced by the following:

"(b) professional representatives whose names appear on the list maintained for this purpose by the Office. The Implementing Regulation shall specify whether and under what conditions the representatives before the Office must file with the Office a signed authorisation for insertion on the file.";

(b) in paragraph 2(c) the first sentence shall be replaced by the following:

"(c) he must be entitled to represent natural or legal persons in trade mark matters before the central industrial property office of a Member State.";

27. Article 96(5) shall be replaced by the following:

"5. Article 56(2) to (5) shall apply.";

28. in Article 108 paragraphs 4, 5 and 6 shall be replaced by the following:

"4. In cases where a Community trade mark application is deemed to be withdrawn, the Office shall send to the applicant a communication fixing a period of three months from the date of that communication in which a request for conversion may be filed.

5. Where the Community trade mark application is withdrawn or the Community trade mark ceases to have effect as a result of a surrender being recorded or of failure to renew the registration, the request for conversion shall be filed within three months after the date on which the Community trade mark application has been withdrawn or on which the Community trade mark ceases to have effect.

6. Where the Community trade mark application is refused by decision of the Office or where the Community trade mark ceases to have effect as a result of a decision of the Office or of a Community trade mark court, the request for conversion shall be filed within three months after the date on which that decision acquired the authority of a final decision.";

29. Article 109(3) shall be replaced by the following:

"3. The Office shall check whether the conversion requested fulfils the conditions set out in this Regulation, in particular Article 108(1), (2), (4), (5) and (6), and paragraph 1 of this Article, together with the formal conditions laid down in the Implementing Regulation. If these conditions are fulfilled, the Office shall transmit the request for conversion to the industrial property offices of the Member States specified therein.";

30. Article 110(1) shall be replaced by the following:

"1. Any central industrial property office to which the request for conversion is transmitted may obtain from the Office any additional information concerning the request enabling that office to make a decision regarding the national trade mark resulting from the conversion.";

31. in the second sentence of Article 118(3), the phrase "within 15 days" shall be replaced by the phrase "within one month"and, in the third sentence, the phrase "within one month" shall be replaced by the phrase "within three months";

32. Article 127(2) shall be replaced by the following:

"2. The decisions of the Opposition Divisions shall be taken by three-member groups. At least one member shall be legally qualified. In certain specific cases provided for in the Implementing

Regulation, the decisions shall be taken by a single member.";

33. Article 129(2) shall be replaced by the following:

"2. The decisions of the Cancellation Divisions shall be taken by three-member groups. At least one member shall be legally qualified. In certain specific cases provided for in the Implementing Regulation, the decisions shall be taken by a single member.";

34. Article 130 shall be amended as follows:

(a) paragraph 2 shall be replaced by the following:

"2. The decisions of the Boards of Appeal shall be taken by three members, at least two of whom are legally qualified. In certain specific cases, decisions shall be taken by an enlarged Board chaired by the President of the Boards of Appeal or by a single member, who must be legally qualified.";

(b) the following paragraphs shall be added:

"3. In order to determine the special cases which fall under the jurisdiction of the enlarged Board, account should be taken of the legal difficulty or the importance of the case or of special circumstances which justify it. Such cases may be referred to the enlarged Board:

(a) by the authority of the Boards of Appeal set up in accordance with the rules of procedure of the Boards referred to in Article 157(3), or

(b) by the Board handling the case.

4. The composition of the enlarged Board and the rules on referrals to it shall be laid down pursuant to the rules of procedure of the Boards referred to in Article 157(3).

5. To determine which specific cases fall under the authority of a single member, account should be taken of the lack of difficulty of the legal or factual matters raised, the limited importance of the individual case or the absence of other specific circumstances. The decision to confer a case on one member in the cases referred to shall be adopted by the Board handling the case. Further details shall be laid down in the rules of procedure of the Boards referred to in Article 157(3).";

35. Article 131 shall be replaced by the following:

"Article 131

Independence of the members of the Boards of Appeal

1. The President of the Boards of Appeal and the chairmen of the Boards shall be appointed, in accordance with the procedure laid down in Article 120 for the appointment of the President of the Office, for a term of five years. They may not be removed from office during this term, unless there are serious grounds for such removal and the Court of Justice, on application by the institution which appointed them, takes a decision to this effect. The term of office of the President of Boards of Appeal and the chairmen of the Boards may be renewed for additional five-year periods, or until retirement age if this age is reached during the new term of office.

The President of the Boards of Appeal shall, inter alia, have managerial and organisational powers, principally to:

(a) chair the authority of the Boards of Appeal responsible for laying down the rules and organising the work of the Boards, which authority is provided for in the rules of procedure of the Boards referred to in Article 157(3);

(b) ensure the implementation of the authority's decisions;

- (c) allocate cases to a Board on the basis of objective criteria determined by the authority of the Boards of Appeal;
- (d) forward to the President of the Office the Boards' expenditure requirements, with a view to drawing up the expenditure estimates.

The President of the Boards of Appeal shall chair the enlarged Board.

Further details shall be laid down in the rules of procedure of the Boards referred to in Article 157(3).

2. The members of the Boards of Appeal shall be appointed by the Administrative Board for a term of five years. Their term of office may be renewed for additional five-year periods, or until retirement age if that age is reached during the new term of office.

3. The members of the Boards of Appeal may not be removed from office unless there are serious grounds for such removal and the Court of Justice, after the case has been referred to it by the Administrative Board on the recommendation of the President of the Boards of Appeal, after consulting the chairman of the Board to which the member concerned belongs, takes a decision to this effect.

4. The President of the Boards of Appeal and the chairmen and members of the Boards of Appeal shall be independent. In their decisions they shall not be bound by any instructions.

5. The President of the Boards of Appeal and the chairmen and members of the Boards of Appeal may not be examiners or members of the Opposition Divisions, Administration of Trade Marks and Designs and Legal Division or Cancellation Divisions.";

36. Article 142a shall become Article 159a;

37. in Article 150, paragraph 3 shall be replaced by the following:

"3. Article 39(3) to (6) shall apply mutatis mutandis.";

38. In Article 157(2), points (1) and (4) shall be deleted.

Article 2

1. This Regulation shall enter into force on the day following that of its publication in the Official Journal of the European Union.

2. Points 11 to 14, 21, 23 to 26 and 32 to 36 of Article 1 shall apply from a date which shall be laid down by the Commission and published in the Official Journal of the European Union, when the necessary implementing measures have been adopted.

3. Point 9 of Article 1 shall apply from 10 March 2008.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 19 February 2004.

**Commission Regulation (EC) No 2868/95
of 13 December 1995
implementing Council Regulation (EC) No 40/94 on the Community **trade mark****

COMMISSION REGULATION (EC) No 2868/95 of 13 December 1995 implementing Council Regulation (EC) No 40/94 on the Community trade mark

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark (1) as amended by Regulation (EC) No 3288/94 (2), and in particular Article 140 thereof,

Whereas Regulation (EC) No 40/94 (hereinafter 'the Regulation') creates a new trade mark system allowing a trade mark having effect throughout the Community to be obtained on the basis of an application to the Office for Harmonization in the Internal Market (trade marks and designs) ('the Office');

Whereas for this purpose, the Regulation contains the necessary provisions for a procedure leading to the registration of a Community trade mark, as well as for the administration of Community trade marks, for appeals against decisions of the Office and for proceedings for the revocation or invalidation of a Community trade mark;

Whereas Article 140 of the Regulation provides that the rules implementing the Regulation shall be adopted in an implementing regulation;

Whereas the implementing regulation is to be adopted in accordance with the procedure laid down in Article 141 of the Regulation;

Whereas this implementing regulation therefore lays down the rules necessary for implementing the provisions of the Regulation on the Community trade mark;

Whereas these rules should ensure the smooth and efficient operating of trade mark proceedings before the Office;

Whereas in accordance with Article 116 (1) of the Regulation, all the elements of the application for a Community trade mark specified in its Article 26 (1) as well as any other information the publication of which is prescribed by this implementing regulation should be published in all the official languages of the Community;

Whereas, however, it is not appropriate for the trade mark itself, names, addresses, dates and any other similar data to be translated and published in all the official languages of the Community;

Whereas the Office should make available standard forms for proceedings before the Office in all official languages of the Community;

Whereas the measures envisaged in this Regulation are in accordance with the opinion of the Committee established under Article 141 of the Regulation,

HAS ADOPTED THIS REGULATION:

Article 1

The rules implementing the Regulation shall be as follows:

TITLE I

APPLICATION PROCEDURE

Rule 1

Content of the application

- (1) The application for a Community trade mark shall contain:
 - (a) a request for registration of the mark as a Community trade mark;
 - (b) the name, address and nationality of the applicant and the State in which he is domiciled or has his seat or an establishment. Names of natural persons shall be indicated by the person's family name and given name(s). Names of legal entities, as well as bodies falling under Article 3 of the Regulation, shall be indicated by their official designation, which may be abbreviated in a customary manner; furthermore, the law of the State governing them shall be indicated. The telegraphic and teletype address, telephone as well as fax numbers and details of other data communications links may be given. Only one address shall, in principle, be indicated for each applicant; where several addresses are indicated, only the address mentioned first shall be taken into account, except where the applicant designates one of the addresses as an address for service;
 - (c) a list of the goods and services for which the trade mark is to be registered, in accordance with Rule 2;
 - (d) a representation of the mark in accordance with Rule 3;
 - (e) if the applicant has appointed a representative, his name and the address of his place of business in accordance with point (b); if the representative has more than one business address or if there are two or more representatives with different business addresses, the application shall indicate which address shall be used as an address for service; where such an indication is not made, only the first-mentioned address shall be taken into account as an address for service;
 - (f) where the priority of a previous application is claimed pursuant to Article 30 of the Regulation, a declaration to that effect, stating the date on which and the country in or for which the previous application was filed;
 - (g) where exhibition priority is claimed pursuant to Article 33 of the Regulation, a declaration to that effect, stating the name of the exhibition and the date of the first display of the goods or services;
 - (h) where the seniority of one or more earlier trade marks, registered in a Member State, including a trade mark registered in the Benelux countries or registered under international arrangements having effect in a Member State (hereinafter referred to as 'earlier registered trade marks, as referred to in Article 34 of the Regulation') is claimed pursuant to Article 34 of the Regulation, a declaration to that effect, stating the Member State or Member States in or for which the earlier mark is registered, the date from which the relevant registration was effective, the number of the relevant registration, and the goods and services for which the mark is registered;
 - (i) where applicable, a statement that the application is for registration of a Community collective mark pursuant to Article 64 of the Regulation;
 - (j) specification of the language in which the application has been filed, and of the second language pursuant to Article 115 (3) of the Regulation;
 - (k) the signature of the applicant or his representative.
- (2) The application for a Community collective mark may include the regulations governing its use.
- (3) The application may include a statement by the applicant that he disclaims any exclusive right

to an element of the trade mark which is not distinctive, to be specified by the applicant.

- (4) If there is more than one applicant, the application may contain the appointment of one applicant or representative as common representative.

Rule 2

List of goods and services

- (1) The common classification referred to in Article 1 of the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks of 15 June 1957, as revised and amended, shall be applied to the classification of the goods and services.
- (2) The list of goods and services shall be worded in such a way as to indicate clearly the nature of the goods and services and to allow each item to be classified in only one class of the Nice Classification.
- (3) The goods and services shall, in principle, be grouped according to the classes of the Nice classification, each group being preceded by the number of the class of that Classification to which that group of goods or services belongs and presented in the order of the classes under that Classification.
- (4) The classification of goods and services shall serve exclusively administrative purposes. Therefore, goods and services may not be regarded as being similar to each other on the ground that they appear in the same class under the Nice Classification, and goods and services may not be regarded as being dissimilar from each other on the ground that they appear in different classes under the Nice Classification.

Rule 3

Representation of the mark

- (1) If the applicant does not wish to claim any special graphic feature or colour, the mark shall be reproduced in normal script, as for example, by typing the letters, numerals and signs in the application. The use of small letters and capital letters shall be permitted and shall be followed accordingly in publications of the mark and in the registration by the Office.
- (2) In cases other than those referred to in paragraph 1, the mark shall be reproduced on a sheet of paper separate from the sheet on which the text of the application appears. The sheet on which the mark is reproduced shall not exceed DIN A4 size (29,7 cm high, 21 cm wide) and the space used for the reproduction (type-area) shall not be larger than 26,2 cm x 17 cm. A margin of at least 2,5 cm shall be left on the left-hand side. Where it is not obvious, the correct position of the mark shall be indicated by adding the word 'top` to each reproduction. The reproduction of the mark shall be of such quality as to enable it to be reduced or enlarged to a size not more than 8 cm wide by 16 cm high for publication in the Community Trade Mark Bulletin. The separate sheet shall also indicate the name and address of the applicant. Four copies of the separate sheet carrying the reproduction shall be filed.
- (3) In cases to which paragraph 2 applies, the application shall contain an indication to that effect. The application may contain a description of the mark.
- (4) Where registration of a three-dimensional mark is applied for, the application shall contain an indication to that effect. The representation shall consist of a photographic reproduction or a graphic representation of the mark. The representation may contain up to six different perspectives of the mark.
- (5) Where registration in colour is applied for, the application shall contain an indication to

that effect. The colours making up the mark shall also be indicated. The reproduction under paragraph 2 shall consist of the colour reproduction of the mark.

- (6) The President of the Office may determine that, as far as the requirements of paragraph 2 are concerned, the mark may be reproduced in the text of the application itself and not on a separate sheet of paper and that the the number of copies of the reproduction of the mark may be less than four.

Rule 4

Fees for the application

The fees payable for the application shall be:

- (a) the basic fee;

and

- (b) a class fee for each class exceeding three to which the goods or services belong according to Rule 2.

Rule 5

Filing of the application

- (1) The Office shall mark the documents making up the application with the date of its receipt and the file number of the application. The Office shall issue to the applicant without delay a receipt which shall include at least the file number, a representation, description or other identification of the mark, the nature and the number of the documents and the date of their receipt.
- (2) If the application is filed with the central industrial property office of a Member State or at the Benelux Trade Mark Office in accordance with Article 25 of the Regulation, the office of filing shall number all the pages of the application with arabic numerals. Before forwarding, the office of filing shall mark the documents making up the application with the date of receipt and the number of pages. The office of filing shall issue to the applicant without delay a receipt which shall include at least the nature and the number of the documents and the date of their receipt.
- (3) If the Office receives an application forwarded by the central industrial property office of a Member State or the Benelux Trade Mark Office, it shall mark the application with the date of receipt and the file number and shall issue to the applicant without delay a receipt in accordance with the second sentence of paragraph 1, indicating the date of receipt at the Office.

Rule 6

Claiming priority

- (1) Where the priority of one or more previous applications pursuant to Article 30 of the Regulation is claimed in the application, the applicant shall indicate the file number of the previous application and file a copy of it within three months from the filing date. The copy shall be certified to be an exact copy of the previous application by the authority which received the previous application, and shall be accompanied by a certificate issued by that authority stating the date of filing of the previous application.
- (2) Where the applicant wishes to claim the priority of one or more previous applications pursuant to Article 30 of the Regulation subsequent to the filing of the application, the declaration of priority, stating the date on which and the country in or for which the previous application

was made, shall be submitted within a period of two months from the filing date. The indications and evidence required under paragraph 1 shall be submitted to the Office within a period of three months from receipt of the declaration of priority.

- (3) If the language of the previous application is not one of the languages of the Office, the Office shall require the applicant to file, within a period specified by the Office, which shall be not less than three months, a translation of the previous application into one of these languages.
- (4) The President of the Office may determine that the evidence to be provided by the applicant may consist of less than is required under paragraph 1, provided that the information required is available to the Office from other sources.

Rule 7

Exhibition priority

- (1) Where the exhibition priority pursuant to Article 33 of the Regulation has been claimed in the application, the applicant shall, within three months from the filing date, file a certificate issued at the exhibition by the authority responsible for the protection of industrial property at the exhibition. This certificate shall declare that the mark was in fact used for the goods or services, and shall state the opening date of the exhibition and, where the first public use did not coincide with the opening date of the exhibition, the date of such first public use. The certificate must be accompanied by an identification of the actual use of the mark, duly certified by the abovementioned authority.
- (2) Where the applicant wishes to claim an exhibition priority subsequently to the filing of the application, the declaration of priority, indicating the name of the exhibition and the date of the first display of the goods or services, shall be submitted within a period of two months from the filing date. The indications and evidence required under paragraph 1 shall be submitted to the Office within a period of three months from receipt of the declaration of priority.

Rule 8

Claiming the seniority of a national trade mark

- (1) Where the seniority of one or more earlier registered trade marks, as referred to in Article 34 of the Regulation, has been claimed in the application, the applicant shall, within three months from the filing date, submit a copy of the relevant registration. The copy must be certified by the competent authority to be an exact copy of the relevant registration.
- (2) Where the applicant wishes to claim the seniority of one or more earlier registered trade marks as referred to in Article 34 of the Regulation, subsequent to the filing of the application, the declaration of seniority, indicating the Member State or Member States in or for which the mark is registered, the date from which the relevant registration was effective, the number of the relevant registration, and the goods and services for which the mark is registered, shall be submitted within a period of two months from the filing date. The evidence required under paragraph 1 shall be submitted to the Office within a period of three months from receipt of the declaration of seniority.
- (3) The Office shall inform the Benelux Trade Mark Office or the central industrial property office of the Member State concerned of the effective claiming of seniority.
- (4) The President of the Office may determine that the evidence to be provided by the applicant may consist of less than is required under paragraph 1, provided that the information required is available to the Office from other sources.

Rule 9

Examination of requirements for a filing date and of formal requirements

(1) If the application fails to meet the requirements for according a filing date because:

(a) the application does not contain:

(i) a request for registration of the mark as a Community trade mark;

(ii) information identifying the applicant;

(iii) a list of the goods and services for which the mark is to be registered;

iv) a representation of the trade mark; or

(b) the basic fee for the application has not been paid within one month of the filing of the application with the Office or, if the application has been filed with the central industrial property office of a Member State or with the Benelux Trade Mark Office, with that office,

the Office shall notify the applicant that a date of filing cannot be accorded in view of those deficiencies.

(2) If the deficiencies referred to under paragraph 1 are remedied within two months of receipt of the notification, the date on which all the deficiencies are remedied shall determine the date of filing. If the deficiencies are not remedied before the time limit expires, the application shall not be dealt with as a Community trade mark application. Any fees paid shall be refunded.

(3) Where, although a date of filing has been accorded, the examination reveals that

(a) the requirements of Rules 1, 2 and 3 or the other formal requirements governing applications laid down in the Regulation or in these Rules are not complied with;

(b) the full amount of the class fees payable under Rule 4 (b), read in conjunction with Commission Regulation (EC) No 2869/95 (3) (hereinafter 'the Fees Regulation') has not been received by the Office;

(c) where priority has been claimed pursuant to Rules 6 and 7, either in the application itself or within two months after the date of filing, the other requirements of the said Rules are not complied with; or

(d) where seniority has been claimed pursuant to Rule 8, either in the application itself or within two months after the date of filing, the other requirements of Rule 8 are not complied with,

the Office shall invite the applicant to remedy the deficiencies noted within such period as it may specify.

(4) If the deficiencies referred to in paragraph 3 (a) are not remedied before the time limit expires, the Office shall reject the application.

(5) If the outstanding class fees are not paid before the time limit expires, the application shall be deemed to have been withdrawn, unless it is clear which class or classes the amount paid is intended to cover. In the absence of other criteria to determine which classes are intended to be covered, the Office shall take the classes in the order of the classification. The application shall be deemed to have been withdrawn with regard to those classes for which the class fees have not been paid or have not been paid in full.

(6) If the deficiencies referred to in paragraph 3 concern the claim to priority, the right of priority for the application shall be lost.

(7) If the deficiencies referred to in paragraph 3 concern the claim to seniority, the right of seniority in respect of that application shall be lost.

- (8) If the deficiencies referred to in paragraph 3 concern only some of the goods and services, the Office shall refuse the application, or the right of priority or the right of seniority shall be lost, only in so far as those goods and services are concerned.

Rule 10

Examination of the conditions relating to the entitlement to be proprietor

Where, pursuant to Article 5 of the Regulation, the applicant is not entitled to be the proprietor of a Community trade mark, the Office shall notify the applicant thereof. The Office shall specify a period within which the applicant may withdraw the application or submit his observations. Where the applicant fails to overcome the objections to registration, the Office shall refuse the application.

Rule 11

Examination as to absolute grounds for refusal

- (1) Where, pursuant to Article 7 of the Regulation, the trade mark may not be registered for all or any part of the goods or services applied for, the office shall notify the applicant of the grounds for refusing registration. The Office shall specify a period within which the applicant may withdraw or amend the application or submit his observations.
- (2) Where, pursuant to Article 38 (2) of the Regulation, registration of the Community trade mark is subject to the applicant's stating that he disclaims any exclusive right in the non-distinctive elements in the mark, the Office shall notify the applicant thereof, stating the reasons, and shall invite him to submit the relevant statement within such period as it may specify.
- (3) Where the applicant fails to overcome the ground for refusing registration or to comply with the condition laid down in paragraph 2 within the time limit, the Office shall refuse the application in whole or in part.

Rule 12

Publication of the application

The publication of the application shall contain:

- (a) the applicant's name and address;
- (b) where applicable, the name and business address of the representative appointed by the applicant other than a representative falling within the first sentence of Article 88 (3) of the Regulation; if there is more than one representative with the same business address, only the name and business address of the first-named representative shall be published and it shall be followed by the words 'and others'; if there are two or more representatives with different business addresses, only the address for service determined pursuant to Rule 1 (1) (e) shall be published; where an association of representatives is appointed under Rule 76 (9), only the name and business address of the association shall be published;
- (c) the reproduction of the mark, together with the indications and descriptions pursuant to Rule 3; where registration in colour is applied for, the publication shall contain the indication 'in colour` and indicate the colour or colours making up the mark;
- (d) the list of goods and services, grouped according to the classes of the Nice classification, each group being preceded by the number of the class of that classification to which that group of goods or services belongs, and presented in the order of the classes of that classification;
- (e) the date of filing and the file number;
- (f) where applicable, particulars of the claim of priority pursuant to Article 30 of the Regulation;

- (g) where applicable, particulars of the claim of exhibition priority pursuant to Article 33 of the Regulation;
- (h) where applicable, particulars of the claim of seniority pursuant to Article 34 of the Regulation;
- (i) where applicable, a statement that the mark has become distinctive in consequence of the use which has been made of it, pursuant to Article 7 (3) of the Regulation;
- (j) where applicable, a statement that the application is for a Community collective mark;
- (k) where applicable, a statement by the applicant disclaiming any exclusive right to an element of the mark pursuant to Rule 1 (3) or Rule 11 (2);
- (l) the language in which the application was filed and the second language which the applicant has indicated pursuant to Article 115 (3) of the Regulation.

Rule 13

Amendment of the application

- (1) An application for amendment of the application under Article 44 of the Regulation shall contain:
 - (a) the file number of the application;
 - (b) the name and the address of the applicant in accordance with Rule 1 (1) (b);
 - (c) where the applicant has appointed a representative, the name and the business address of the representative in accordance with Rule 1 (1) (e);
 - (d) the indication of the element of the application to be corrected or amended, and that element in its corrected or amended version;
 - (e) where the amendment relates to the representation of the mark, a representation of the mark as amended, in accordance with Rule 3.
- (2) Where the application for amendment is subject to the payment of a fee, the application shall not be deemed to have been filed until the required fee has been paid. If the fee has not been paid or has not been paid in full, the Office shall inform the applicant accordingly.
- (3) If the requirements governing the amendment of the application are not fulfilled, the Office shall communicate the deficiency to the applicant. If the deficiency is not remedied within a period to be specified by the Office, the Office shall reject the application for amendment.
- (4) Where the amendment is published pursuant to Article 44 (2) of the Regulation, Rules 15 to 22 shall apply *mutatis mutandis*.
- (5) A single application for amendment may be made for the amendment of the same element in two or more applications of the same applicant. Where the application for amendment is subject to the payment of a fee, the required fee shall be paid in respect of each application to be amended.
- (6) Paragraphs 1 to 5 shall apply *mutatis mutandis* for applications to correct the name or the business address of a representative appointed by the applicant. Such applications shall not be subject to the payment of a fee.

Rule 14

Correction of mistakes and errors in publications

- (1) Where the publication of the application contains a mistake or error attributable to the Office, the Office shall correct the mistake or error acting of its own motion or at the request of the applicant.

-
- (2) Where a request as referred to in paragraph 1 is made by the applicant, Rule 13 shall apply mutatis mutandis. The request shall not be subject to the payment of a fee.
 - (3) The corrections effected under this Rule shall be published.
 - (4) Article 42 (2) of the Regulation and Rules 15 to 22 shall apply mutatis mutandis where the correction concerns the list of goods or services or the representation of the mark.

TITLE II

PROCEDURE FOR OPPOSITION AND PROOF OF USE

Rule 15

Contents of the notice of opposition

- (1) Opposition may be entered on the basis of one or more earlier marks within the meaning of Article 8 (2) of the Regulation ('earlier marks') or of one or more other earlier rights within the meaning of Article 8 (4) of the Regulation ('earlier rights').
- (2) The notice of opposition shall contain:
 - (a) as concerns the application against which opposition is entered:
 - (i) the file number of the application against which opposition is entered;
 - (ii) an indication of the goods and services listed in the Community trade mark application against which opposition is entered;
 - (iii) the name of the applicant for the Community trade mark;
 - (b) as concerns the earlier mark or the earlier right on which the opposition is based:
 - (i) where the opposition is based on an earlier mark, a statement to that effect and an indication that the earlier mark is a Community mark or an indication of the Member State or Member States including, where applicable, the Benelux, where the earlier mark has been registered or applied for, or, where the earlier mark is an internationally registered mark, an indication of the Member State or Member States including, where applicable, the Benelux, to which protection of that earlier mark has been extended;
 - (ii) where available, the file number or the registration number and the filing date, including the priority date of the earlier mark;
 - (iii) where the opposition is based on an earlier mark which is a well-known mark within the meaning of Article 8 (2) (c) of the Regulation, an indication to that effect and an indication of the Member State or Member States in which the earlier mark is well-known;
 - (iv) where the opposition is based on an earlier mark having a reputation within the meaning of Article 8 (5) of the Regulation, an indication to that effect, and an indication of where that earlier mark is registered or applied for in accordance with subparagraph (i);
 - (v) where the opposition is based on an earlier right, an indication to that effect, and an indication of the Member State or Member States where that earlier right exists;
 - (vi) a representation and, where appropriate, a description of the earlier mark or earlier right;
 - (vii) the goods and services in respect of which the earlier mark has been registered or applied for or in respect of which the earlier mark is well-known within the meaning of Article 8 (2) (c) of the Regulation or has a reputation within the meaning of Article 8 (5) of the Regulation; the opposing party shall, when indicating all the goods and services for which the earlier mark

is protected, also indicate those goods and services on which the opposition is based;

(c) as concerns the opposing party:

- (i) where the opposition is entered by the proprietor of the earlier mark or of the earlier right, his name and address in accordance with Rule 1 (1) (b) and an indication that he is the proprietor of such mark or right;
 - (ii) where opposition is entered by a licensee, the name of the licensee and his address in accordance with Rule 1 (1) (b) and an indication that he has been authorized to enter the opposition;
 - (iii) where the opposition is entered by the successor in title to the registered proprietor of a Community trade mark who has not yet been registered as new proprietor, an indication to that effect, the name and address of the opposing party in accordance with Rule 1 (1) (b), and an indication of the date on which the application for registration of the new proprietor was received by the Office or, where this information is not available, was sent to the Office;
 - (iv) where opposition is entered on the basis of an earlier right by a person who is not the proprietor of that right, the name of the person and his address in accordance with Rule 1 (1) (b) and an indication that he is entitled under the relevant national law to exercise that right;
 - (v) where the opposing party has appointed a representative, the name of the representative and his business in accordance with Rule 1 (1) (e);
- (d) a specification of the grounds on which the opposition is based.
- (3) Paragraphs 1 and 2 shall apply mutatis mutandis to an opposition entered pursuant to Article 8 (3) of the Regulation.

Rule 16

Facts, evidence and arguments presented in support of the opposition

- (1) Every notice of opposition may contain particulars of the facts, evidence and arguments presented in support of the opposition, accompanied by the relevant supporting documents.
- (2) If the opposition is based on an earlier mark which is not a Community trade mark, the notice of opposition shall preferably be accompanied by evidence of the registration or filing of that earlier mark, such as a certificate of registration. If the opposition is based on a well-known mark as referred to in Article 8 (2) (c) of the Regulation or on a mark having a reputation as referred to in Article 8 (5) of the Regulation, the notice of opposition shall in principle be accompanied by evidence attesting that it is well-known or that it has a reputation. If the opposition is entered on the basis of any other earlier right, the notice of opposition shall in principle be accompanied by appropriate evidence on the acquisition and scope of protection of that right.
- (3) The particulars of the facts, evidence and arguments and other supporting documents as referred to in paragraphs 1, and the evidence referred to in paragraph 2 may, if they are not submitted together with the notice of opposition or subsequent thereto, be submitted within such period after commencement of the opposition proceedings as the Office may specify pursuant to Rule 20 (2).

Rule 17

Use of languages in opposition proceedings

- (1) Where the notice of opposition is not filed in the language of the application for registration of the Community trade mark, if that language is one of the languages of the Office, or in the

second language indicated when the application was filed, the opposing party shall file a translation of the notice of opposition in one of those languages within a period of one month from the expiry of the opposition period.

- (2) Where the evidence in support of the opposition as provided for in Rule 16 (1) and (2) is not filed in the language of the opposition proceedings, the opposing party shall file a translation of that evidence into that language within a period of one month from the expiry of the opposition period or, where applicable, within the period specified by the Office pursuant to Rule 16 (3).
- (3) Where the opposing party or the applicant informs the Office, before the date on which the opposition proceedings shall be deemed to commence pursuant to Rule 19 (1), that the applicant and the opposing party have agreed on a different language for the opposition proceeding pursuant to Article 115 (7) of the Regulation, the opposing party shall, where the notice of opposition has not been filed in that language, file a translation of the notice of opposition in that language within a period of one month from the said date.

Rule 18

Rejection of notice of opposition as inadmissible

- (1) If the Office finds that the notice of opposition does not comply with the provisions of Article 42 of the Regulation, or where the notice of opposition does not clearly identify the application against which opposition is entered or the earlier mark or the earlier right on the basis of which the opposition is being entered, the Office shall reject the notice of opposition as inadmissible unless those deficiencies have been remedied before expiry of the opposition period. If the opposition fee has not been paid within the opposition period, the notice of opposition shall be deemed not to have been entered. If the opposition fee has been paid after the expiry of the opposition period, it shall be refunded to the opposing party.
- (2) If the Office finds that the notice of opposition does not comply with other provisions of the Regulation or of these Rules, it shall inform the opposing party accordingly and shall call upon him to remedy the deficiencies noted within a period of two months. If the deficiencies are not remedied before the time limit expires, the Office shall reject the notice of opposition as inadmissible.
- (3) Any decision to reject a notice of opposition as inadmissible under paragraphs 1 or 2 shall be communicated to the applicant.

Rule 19

Commencement of opposition proceedings

- (1) If the Office does not reject the notice of opposition in accordance with Rule 18, it shall communicate the opposition to the applicant and shall invite him to file his observations within such period as it may specify. The Office shall draw the applicant's attention to the fact that the opposition proceedings shall be deemed to commence two months after receipt of the communication, unless the applicant informs the Office, before the expiry of this period, that he withdraws his application or restricts the application to goods and services against which the opposition is not directed.
- (2) The Office may, pursuant to Rule 71, grant an extension of the period referred to in the second sentence of paragraph 1 where such request is presented jointly by the applicant and the opposing party.
- (3) Where the application is withdrawn or restricted within the period specified in the second sentence of paragraph 1 or within any extension of that period granted under paragraph 2, the

Office shall inform the opposing party accordingly and shall refund the opposition fee.

Rule 20

Examination of opposition

- (1) If the application is not withdrawn or restricted pursuant to Rule 19, the applicant shall file his observations within the period specified by the Office in its communication referred to in the first sentence of Rule 19 (1).
- (2) Where the notice of opposition does not contain particulars of the facts, evidence and arguments as referred to in Rule 16 (1) and (2), the Office shall call upon the opposing party to submit such particulars within a period specified by the Office. Any submission by the opposing party shall be communicated to the applicant who shall be given an opportunity to reply within a period specified by the Office.
- (3) If the applicant files no observations, the Office may give a ruling on the opposition on the basis of the evidence before it.
- (4) The observations filed by the applicant shall be communicated to the opposing party who shall be called upon by the Office, if it considers it necessary to do so, to reply within a period specified by the Office.
- (5) If, pursuant to Article 44 (1) of the Regulation, the applicant restricts the list of goods and services, the Office shall communicate this to the opposing party and call upon him, within such period as it may specify, to submit observations stating whether he maintains the opposition and, if so, against which of the remaining goods and services.
- (6) The Office may suspend any opposition proceeding where the opposition is based on an application for registration pursuant to Article 8 (2) (b) of the Regulation until a final decision is taken in that proceeding, or where other circumstances are such that such suspension is appropriate.

Rule 21

Multiple oppositions

- (1) Where a number of oppositions have been entered in respect of the same application for a Community trade mark, the Office may deal with them in one set of proceedings. The Office may subsequently decide to no longer deal with them in this way.
- (2) If a preliminary examination of one or more oppositions reveals that the Community trade mark for which an application for registration has been filed is possibly not eligible for registration in respect of some or all of the goods or services for which registration is sought, the Office may suspend the other opposition proceedings. The Office shall inform the remaining opposing parties of any relevant decisions taken during those proceedings which are continued.
- (3) Once a decision rejecting the application has become final, the oppositions on which a decision was deferred in accordance with paragraph 2 shall be deemed to have been disposed of and the opposing parties concerned shall be informed accordingly. Such disposition shall be considered to constitute a case which has not proceeded to judgment within the meaning of Article 81 (4) of the Regulation.
- (4) The Office shall refund 50 % of the opposition fee paid by each opposing party whose opposition is deemed to have been disposed of in accordance with paragraphs 1, 2 and 3.

Rule 22

Proof of use

- (1) Where, pursuant to Article 43 (2) or (3) of the Regulation, the opposing party has to furnish proof of use or show that there are proper reasons for non-use, the Office shall invite him to provide the proof required within such period as it shall specify. If the opposing party does not provide such proof before the time limit expires, the Office shall reject the opposition.
- (2) The indications and evidence for the furnishing of proof of use shall consist of indications concerning the place, time, extent and nature of use of the opposing trade mark for the goods and services in respect of which it is registered and on which the opposition is based, and evidence in support of these indications in accordance with paragraph 3.
- (3) The evidence shall, in principle, be confined to the submission of supporting documents and items such as packages, labels, price lists, catalogues, invoices, photographs, newspaper advertisements, and statements in writing as referred to in Article 76 (1) (f) of the Regulation.
- (4) Where the evidence supplied pursuant to paragraphs 1, 2 and 3 is not in the language of the opposition proceedings, the Office may require the opposing party to submit a translation of that evidence in that language, within a period specified by the Office.

TITLE III

REGISTRATION PROCEDURE

Rule 23

Registration of the trade mark

- (1) The registration fee provided for in Article 45 of the Regulation shall consist of
 - (a) a basic fee;and
 - (b) a class fee for each class exceeding three in respect of which the mark is to be registered.
- (2) Where no opposition has been entered or where any opposition entered has been finally disposed of by withdrawal, rejection or other disposition, the Office shall request the applicant to pay the registration fee within two months of receipt of the request.
- (3) If the registration fee is not paid within due time, it may still be validly paid within two months of notification of a communication pointing out the failure to observe the time limit, provided that within this period the additional fee specified in the Fees Regulations is paid.
- (4) On receipt of the registration fee the mark applied for and the particulars referred to in Rule 84 (2) shall be recorded in the Register of Community trade marks.
- (5) The registration shall be published in the Community Trade Marks Bulletin.
- (6) The registration fee shall be refunded if the trade mark applied for is not registered.

Rule 24

Certificate of registration

- (1) The Office shall issue to the proprietor of the trade mark a certificate of registration which shall contain the entries in the Register provided for in Rule 84 (2) and a statement to the effect that those entries have been recorded in the Register.
- (2) The proprietor of the trade mark may request that certified or uncertified copies of the certificate of registration be supplied to him upon payment of a fee.

Rule 25

Alteration of the registration

- (1) An application for alteration of the registration pursuant to Article 48 (2) of the Regulation shall contain:
 - (a) the registration number,
 - (b) the name and the address of the proprietor of the mark in accordance with Rule 1 (1) (b);
 - (c) where the proprietor has appointed a representative, the name and the business address of the representative in accordance with Rule 1 (1) (e);
 - (d) the indication of the element in the representation of the mark to be altered and that element in its altered version;
 - (e) a representation of the mark as altered, in accordance with Rule 3.
- (2) The application shall be deemed not to have been filed until the required fee has been paid. If the fee has not been paid or has not been paid in full, the Office shall inform the applicant accordingly.
- (3) If the requirements governing the alteration of the registration are not fulfilled, the Office shall communicate the deficiency to the applicant. If the deficiency is not remedied within a period to be specified by the Office, the Office shall reject the application.
- (4) Where the registration of the alteration is challenged pursuant to Article 48 (3) of the Regulation, the provisions on opposition contained in the Regulation and in these Rules shall apply *mutatis mutandis*.
- (5) A single application may be made for the alteration of the same element in two or more registrations of the same proprietor. The required fee shall be paid in respect of each registration to be altered.

Rule 26

Change of the name or address of the proprietor of the Community trade mark or of his registered representative

- (1) A change of the name or address of the proprietor of the Community trade mark which is not an alteration of the Community trade mark pursuant to Article 48 (2) of the Regulation and which is not the consequence of a whole or partial transfer of the registered mark shall, at the request of the proprietor, be recorded in the register.
- (2) An application for the change of the name or address of the proprietor of the registered mark shall contain:
 - (a) the registration number of the mark;
 - (b) the name and the address of the proprietor of the mark as recorded in the register;
 - (c) the indication of the name and address of the proprietor of the mark, as amended, in accordance with Rule 1 (1) (e).
 - (d) where the proprietor has appointed a representative, the name and the business address of the representative, in accordance with Rule 1 (1) (e).
- (3) The application shall not be subject to payment of a fee.
- (4) A single application may be made for the change of the name or address in respect of two or more registrations of the same proprietor.

- (5) If the requirements governing the recording of a change are not fulfilled, the Office shall communicate the deficiency to the applicant. If the deficiency is not remedied within a period to be specified by the Office, the Office shall reject the application.
- (6) Paragraphs 1 to 5 shall apply mutatis mutandis to a change of the name or address of the registered representative.
- (7) Paragraphs 1 to 6 shall apply mutatis mutandis to applications for Community trade marks. The change shall be recorded in the files kept by the Office on the Community trade mark application.

Rule 27

Correction of mistakes and errors in the register and in the publication of the registration

- (1) Where the registration of the mark or the publication of the registration contains a mistake or error attributable to the Office, the Office shall correct the error or mistake of its own motion or at the request of the proprietor.
- (2) Where such a request is made by the proprietor, Rule 26 shall apply mutatis mutandis. The request shall not be subject to payment of a fee.
- (3) The Office shall publish the corrections made under this Rule.

Rule 28

Claiming seniority after registration of the Community trade mark

- (1) An application pursuant to Article 35 of the Regulation to obtain the seniority of one or more earlier registered trade marks as referred to in Article 34 of the Regulation, shall contain:
 - (a) the registration number of the Community trade mark;
 - (b) the name and address of the proprietor of the Community trade mark in accordance with Rule 1 (1) (b);
 - (c) where the proprietor has appointed a representative, the name and the business address of the representative in accordance with Rule 1 (1) (e);
 - (d) an indication of the Member State or Member States in or for which the earlier mark is registered, the date from which the relevant registration was effective, the number of the relevant registration, and the goods and services for which the earlier mark is registered;
 - (e) an indication of the goods and services in respect of which seniority is claimed;
 - (f) a copy of the relevant registration; the copy must be certified as an exact copy of the relevant registration by the competent authority.
- (2) If the requirements governing the claiming of seniority are not fulfilled, the Office shall communicate the deficiency to the applicant. If the deficiency is not remedied within a period specified by the Office, the Office shall reject the application.
- (3) The Office shall inform the Benelux Trade Mark Office or the central industrial property office of the Member State concerned of the effective claiming of seniority.
- (4) The President of the Office may determine that the material to be provided by the applicant may consist of less than is required under paragraph 1 (f), provided that the information required is available to the Office from other sources.

TITLE IV

RENEWAL

Rule 29

Notification of expiry

At least six months before expiry of the registration the Office shall inform the proprietor of the Community trade mark, and any person having a registered right, including a licence, in respect of the Community trade mark, that the registration is approaching expiry. Failure to give such notification shall not affect the expiry of the registration.

Rule 30 Renewal of registration

(1) An application for renewal shall contain:

- (a) where the application is filed by the proprietor of the trade mark, his name and address in accordance with Rule 1 (1) (b);
- (b) where the application is filed by a person expressly authorized to do so by the proprietor of the mark, the name and address of that person and evidence that he is authorized to file the application;
- (c) where the applicant has appointed a representative, the name and business address of the representative in accordance with Rule 1 (1) (e);
- (d) the registration number;
- (e) an indication that renewal is requested for all the goods and services covered by the registration or, if the renewal is not requested for all the goods and services for which the mark is registered, an indication of those classes or those goods and services for which renewal is requested or those classes or those goods and services for which renewal is not requested, grouped according to the classes of the Nice classification, each group being preceded by the number of the class of that classification to which that group of goods or services belongs and presented in the order of the classes of that classification.

(2) The fees payable under Article 47 of the Regulation for the renewal of a Community trade mark shall consist of:

- (a) a basic fee;
 - (b) a class fee for each class exceeding three in the list of classes in respect of which renewal is applied for as shown in paragraph 1 (e); and
 - (c) where applicable, the additional fee for late payment of the renewal fee or late submission of the request for renewal, pursuant to Article 47 (3) of the Regulation, as specified in the Fees Regulation.
- (3) Where the application for renewal is filed within the time periods provided for in Article 47 (3) of the Regulation, but the other conditions governing renewal provided for in Article 47 of the Regulation and these Rules are not satisfied, the Office shall inform the applicant of the deficiencies found. If the application is filed by a person whom the proprietor of the trade mark has expressly authorized to do so, the proprietor of the trade mark shall receive a copy of the notification.
- (4) Where an application for renewal is not submitted or is submitted after expiry of the period provided for in the third sentence of Article 47 (3) of the Regulation, or if the fees are not paid or are paid only after the period in question has expired, or if the deficiencies are not remedied within that period, the Office shall determine that the registration has expired and shall so notify the proprietor of the Community trade mark and, where appropriate, the applicant and the person recorded in the Register as having rights in the mark. Where the fees paid are

insufficient to cover all the classes of goods and services for which renewal is requested, such a determination shall not be made if it is clear which class or classes are to be covered. In the absence of other criteria, the Office shall take the classes into account in the order of classification.

- (5) Where the determination made pursuant to paragraph 4 has become final, the Office shall cancel the mark from the register. The cancellation shall take effect from the day following the day on which the existing registration expired.
- (6) Where the renewal fees provided for in paragraph 2 have been paid but the registration is not renewed, those fees shall be refunded.

TITLE V

TRANSFER, LICENCES AND OTHER RIGHTS, CHANGES

Rule 31

Transfer

- (1) An application for registration of a transfer under Article 17 of the Regulation shall contain:
 - (a) the registration number of the Community trade mark;
 - (b) particulars of the new proprietor in accordance with Rule 1 (1) (b);
 - (c) where not all the registered goods or services are included in the transfer, particulars of the registered goods or services to which the transfer relates;
 - (d) documents duly establishing the transfer in accordance with Article 17 (2) and (3) of the Regulation;
- (2) The application may contain, where applicable, the name and business address of the representative of the new proprietor, to be set out in accordance with Rule 1 (1) (e).
- (3) Transfers to any natural or legal persons who cannot be proprietors of Community trade marks pursuant to Article 5 of the Regulation shall not be registered.
- (4) The application shall not be deemed to have been filed until the required fee has been paid. If the fee is not paid or is not paid in full, the Office shall so notify the applicant.
- (5) It shall constitute sufficient proof of transfer under paragraph 1 (d):
 - (a) that the application for registration of the transfer is signed by the registered proprietor or his representative and by the successor in title or his representative; or,
 - (b) that the application, if submitted by the successor in title, is accompanied by a declaration, signed by the registered proprietor or his representative, that he agrees to the registration of the successor in title; or
 - (c) that the application is accompanied by a completed transfer form or document, as specified in Rule 83 (1) (d), signed by the registered proprietor or his representative and by the successor in title or his representative.
- (6) Where the conditions applicable to the registration of a transfer, as laid down in Article 17 (1) to (4) of the Regulation, in paragraphs 1 to 4 above, and in other applicable Rules are not fulfilled, the Office shall notify the applicant of the deficiencies. If the deficiencies are not remedied within a period specified by the Office, it shall reject the application for registration of the transfer.
- (7) A single application for registration of a transfer may be submitted for two or more marks, provided that the registered proprietor and the successor in title are the same in each case.

- (8) Paragraphs 1 to 7 shall apply mutatis mutandis to applications for Community trade marks. The transfer shall be recorded in the files kept by the Office concerning the Community trade mark application.

Rule 32

Partial Transfers

- (1) Where the application for registration of a transfer relates only to some of the goods and services for which the mark is registered, the application shall contain an indication of the goods and services to which the partial transfer relates.
- (2) The goods and services in the original registration shall be distributed between the remaining registration and the new registration so that the goods and services in the remaining registration and the new registration shall not overlap.
- (3) Rule 31 shall apply mutatis mutandis to applications for registrations of a partial transfer.
- (4) The Office shall establish a separate file for the new registration, which shall consist of a complete copy of the file of the original registration and the application for registration of the partial transfer; a copy of that application shall be included in the file of the remaining registration. The Office shall also assign a new registration number to the new registration.
- (5) Any application made by the original proprietor pending with regard to the original registration shall be deemed to be pending with regard to the remaining registration and the new registration. Where such application is subject to the payment of fees and these fees have been paid by the original proprietor, the new proprietor shall not be liable to pay any additional fees with regard to such application.

Rule 33

Registration of licences and other rights

- (1) Rule 31 (1) (a) (b) and (c), (2), (4) and (7) shall apply mutatis mutandis to the registration of the grant or transfer of a licence, to registration of the creation or transfer of a right in rem in respect of a Community trade mark, and to registration of enforcement measures. However, where a Community trade mark is involved in bankruptcy or like proceedings, the request of the competent national authority for an entry in the register to this effect shall not be subject to payment of a fee.
- (2) Where the Community trade mark is licensed for only part of the goods and services for which the mark is registered, or for only a part of the Community, or for a limited period of time, the application for registration shall indicate the goods and services or the part of the Community or the time period for which the licence is granted.
- (3) Where the conditions applicable to registration, as laid down in Articles 19, 20 or 22 of the Regulation, in paragraphs 1 and 2 above, and the other applicable Rules are not fulfilled, the Office shall notify the applicant of the irregularity. If the irregularity is not corrected within a period specified by the Office, it shall reject the application for registration.
- (4) Paragraphs 1, 2 and 3 shall apply mutatis mutandis to applications for Community trade marks. Licences, rights in rem and enforcement measures shall be recorded in the files kept by the Office concerning the Community trade mark application.

Rule 34

Special provisions for the registration of a licence

- (1) A licence in respect of a Community trade mark shall be recorded in the Register as an exclusive licence if the proprietor of the trade mark or the licensee so request.
- (2) A licence in respect of a Community trade mark shall be recorded in the Register as a sub-licence where it is granted by a licensee whose licence is recorded in the Register.
- (3) A licence in respect of a Community trade mark shall be recorded in the Register as a licence limited as to the goods and services or as a territorially limited licence if it is granted for only a part of the goods or services for which the mark is registered or if it is granted only for a part of the Community.
- (4) A licence in respect of a Community trade mark shall be recorded in the Register as a temporary licence if it is granted for a limited period of time.

Rule 35

Cancellation or modification of the registration of licences and other rights

- (1) A registration effected under Rule 33 (1) shall be cancelled at the request of one of the persons concerned.
- (2) The application shall contain:
 - (a) the registration number of the Community trade mark;and
 - (b) particulars of the right whose registration is to be cancelled.
- (3) Application for cancellation of the registration of a licence or another right shall not be deemed to have been filed until the required fee has been paid. If the fee is not paid or is not paid in full, the Office shall so notify the applicant. However, the request of the competent national authority for the cancellation of an entry where a Community trade mark is involved in bankruptcy or like proceedings shall not be subject to payment of a fee.
- (4) The application shall be accompanied by documents showing that the registered right no longer exists or by a statement by the licensee or the holder of another right, to the effect that he consents to cancellation of the registration.
- (5) Where the requirements for cancellation of the registration are not satisfied, the Office shall notify the applicant of the irregularity. If the irregularity is not corrected within a period specified by the Office, it shall reject the application for cancellation of the registration.
- (6) Paragraphs 1, 2, 4 and 5 shall apply mutatis mutandis to a request for the modification of a registration effected under Rule 33 (1).
- (7) Paragraphs 1 to 6 shall apply mutatis mutandis to entries made in the files pursuant to Rule 33 (4).

TITLE VI

SURRENDER

Rule 36

Surrender

- (1) A declaration of surrender pursuant to Article 49 of the Regulation shall contain:
 - (a) the registration number of the Community trade mark;
 - (b) the name and address of the proprietor in accordance with Rule 1 (1) (b);

- (c) where a representative has been appointed, the name and business address of the representative in accordance with Rule 1 (1) (e);
 - (d) where surrender is declared only for some of the goods and services for which the mark is registered, the goods and services for which the surrender is declared or the goods and services for which the mark is to remain registered.
- (2) Where a right of a third party relating to the Community trade mark is entered in the register, it shall be sufficient proof of his agreement to the surrender that a declaration of consent to the surrender is signed by the proprietor of that right or his representative. Where a licence has been registered, surrender shall be registered three months after the date on which the proprietor of the Community trade mark satisfies the Office that he has informed the licensee of his intention to surrender it. If the proprietor proves to the Office before the expiry of that period that the licensee has given his consent, the surrender shall be registered forthwith.
- (3) If the requirements governing surrender are not fulfilled, the Office shall communicate the deficiencies to the declarant. If the deficiencies are not remedied within a period to be specified by the Office, the Office shall reject the entry of the surrender in the Register.

TITLE VII

REVOCATION AND INVALIDITY

Rule 37

Application for revocation or for a declaration of invalidity

An application to the Office for revocation or for a declaration of invalidity pursuant to Article 55 of the Regulation shall contain:

- (a) as concerns the registration in respect of which revocation or a declaration of invalidity is sought;
 - (i) the registration number of the Community trade mark in respect of which revocation or a declaration of invalidity is sought;
 - (ii) the name and address of the proprietor of the Community trade mark in respect of which revocation or a declaration of invalidity is sought;
 - (iii) a statement of the registered goods and services in respect of which revocation or a declaration of invalidity is sought;
- (b) as regards the grounds on which the application is based,
- (i) in the case of an application pursuant to Article 50 or Article 51 of the Regulation, a statement of the grounds on which the application for revocation or a declaration of invalidity is based;
 - (ii) in the case of an application pursuant to Article 52 (1) of the Regulation, particulars of the right on which the application for a declaration of invalidity is based and if necessary particulars showing that the applicant is entitled to adduce the earlier right as grounds for invalidity;
 - (iii) in the case of an application pursuant to Article 52 (2) of the Regulation, particulars of the right on which the application for a declaration of invalidity is based and particulars showing that the applicant is the proprietor of an earlier right as referred to in Article 52 (2) of the Regulation or that he is entitled under the national law applicable to lay claim to that right;
 - (iv) an indication of the facts, evidence and arguments presented in support of those grounds;

- (c) as concerns the applicant,
- (i) his name and address in accordance with Rule 1 (1) (b);
 - (ii) if the applicant has appointed a representative, the name and the business address of the representative, in accordance with Rule 1 (1) (e).

Rule 38

Languages used in revocation or invalidity proceedings

- (1) Where the application for revocation or for a declaration of invalidity is not filed in the language of the application for the registration of the Community trade mark, if that language is one of the languages of the Office, or in the second language indicated when the application was filed, the applicant for revocation or for a declaration of invalidity shall file a translation of his application in one of those two languages within a period of one month from the filing of his application.
- (2) Where the evidence in support of the application is not filed in the language of the revocation or invalidity proceedings, the applicant shall file a translation of that evidence into that language within a period of two months after the filing of such evidence.
- (3) Where the applicant for revocation or for a declaration of invalidity or the proprietor of the Community trade mark inform the Office before the expiry of a period of two months from receipt by the Community trade mark proprietor of the communication referred to in Rule 40 (1), that they have agreed on a different language of proceedings pursuant to Article 115 (7) of the Regulation, the applicant shall, where the application was not filed in that language, file a translation of the application in that language within a period of one month from the said date.

Rule 39

Rejection of the application for revocation or for declaration of invalidity as inadmissible

- (1) If the Office finds that the application does not comply with Article 55 of the Regulation, Rule 37 or any other provision of the Regulation or these Rules, it shall inform the applicant accordingly and shall call upon him to remedy the deficiencies found within such period as it may specify. If the deficiencies are not remedied before expiry of the time limit, the Office shall reject the application as inadmissible.
- (2) Where the Office finds that the required fees have not been paid, it shall inform the applicant accordingly and shall inform him that the application will be deemed not to have been filed if the required fees are not paid within a period specified by the Office. If the required fees are paid after expiry of the period specified by the Office, they shall be refunded to the applicant.
- (3) Any decision to reject an application for revocation or for a declaration of invalidity under paragraph 1 shall be communicated to the applicant. Where the application is considered not to have been filed pursuant to paragraph 2, the applicant shall be informed accordingly.

Rule 40

Examination of the application for revocation or for a declaration of invalidity

- (1) If the Office does not reject the application in accordance with Rule 39, it shall communicate such application to the proprietor of the Community trade mark and shall request him to file his observations within such period as it may specify.
- (2) If the proprietor of the Community trade mark files no observations, the Office may decide on the revocation or invalidity on the basis of the evidence before it.

- (3) Any observations filed by the proprietor of the Community trade mark shall be communicated to the applicant, who shall be requested by the Office, if it sees fit, to reply within a period specified by the Office.
- (4) All communications under Article 56 (1) of the Regulation and all observations filed in this respect shall be sent to the parties concerned.
- (5) If the applicant, under Article 56 (2) or (3) of the Regulation, has to furnish proof of use or proof that there are proper reasons for non-use, Rule 22 shall apply mutatis mutandis.

Rule 41

Multiple applications for revocation or for a declaration of invalidity

- (1) Where a number of applications for revocation or for a declaration of invalidity have been filed relating to the same Community trade mark, the Office may deal with them in one set of proceedings. The Office may subsequently decide no longer to deal with them in this way.
- (2) Rule 21 (2) (3) and (4) shall apply mutatis mutandis.

TITLE VIII

COMMUNITY COLLECTIVE MARKS

Rule 42

Application of provisions

The provisions of these Rules shall apply to Community collective marks, subject to Rule 43.

Rule 43

Regulation governing Community collective marks

- (1) Where the application for a Community collective trade mark does not contain the regulations governing its use pursuant to Article 65 of the Regulation, those regulations shall be submitted to the Office within a period of two months after the date of filing.
- (2) The regulations governing Community collective marks shall specify:
 - (a) the name of the applicant and his office address;
 - (b) the object of the association or the object for which the legal person governed by public law is constituted;
 - (c) the bodies authorized to represent the association or the said legal person;
 - (d) the conditions for membership;
 - (e) the persons authorized to use the mark;
 - (f) where appropriate, the conditions governing use of the mark, including sanctions;
 - (g) where appropriate, the authorization referred to in the second sentence of Article 65 (2) of the Regulation.

TITLE IX

CONVERSION

Rule

44

Application for conversion

- (1) An application for conversion of a Community trade mark application or a registered Community trade mark into a national trademark application pursuant to Article 108 of the Regulation shall contain:
 - (a) the name and the address of the applicant for conversion in accordance with Rule 1 (1) (b);
 - (b) where the applicant for conversion has appointed a representative, the name and the business address of the representative in accordance with Rule 1 (1) (e);
 - (c) the filing number of the Community trade mark application or the registration number of the Community trade mark;
 - (d) the date of filing of the Community trade mark application or the Community trade mark and, where applicable, particulars of the claim to priority for the Community trade mark application or the Community trade mark pursuant to Articles 30 and 33 of the Regulation and particulars of the claim to seniority pursuant to Articles 34 and 35 of the Regulation;
 - (e) a representation of the mark as contained in the application or as registered;
 - (f) the specification of the Member State or the Member States in respect of which conversion is requested;
 - (g) where the request does not relate to all of the goods and services for which the application has been filed or for which the trade mark has been registered, an indication of the goods and services for which conversion is requested, and, where conversion is requested in respect of more than one Member State and the list of goods and services is not the same for all Member States, an indication of the respective goods and services for each Member State;
 - (h) where conversion is requested pursuant to Article 108 (4) of the Regulation, an indication to that effect;
 - (i) where conversion is requested pursuant to Article 108 (5) of the Regulation following a withdrawal of an application for registration, an indication to that effect, and the date on which the application for registration was withdrawn;
 - (j) where conversion is requested pursuant to Article 108 (5) of the Regulation following a failure to renew the registration, an indication to that effect, and the date on which the period of protection has expired, the period of three months provided for in Article 108 (5) of the Regulation shall begin to run on the day following the last day on which the request for renewal can be presented pursuant to Article 47 (3) of the Regulation;
 - (k) where conversion is requested pursuant to article 108 (6) of the Regulation, an indication to that effect, the date on which the decision of the national court has become final, and a copy of that decision.
- (2) Where a copy of a court decision pursuant to paragraph 1 (k) is required, that copy may be submitted in the language in which the decision was given.

Rule 45

Examination of application for conversion

- (1) Where the application for conversion does not comply with the requirements of Article 108 (1) of the Regulation or was not filed within the relevant period of three months, the Office shall reject it.
- (2) Where the conversion fee has not been paid within the relevant period of three months, the

Office shall inform the applicant that the application for conversion shall be deemed not to have been filed.

- (3) Where the other requirements governing conversion as provided for in Rule 44 and in other Rules governing such applications are not fulfilled, the Office shall inform the applicant accordingly and invite him to remedy the deficiency within a period specified by the Office. If the deficiencies are not remedied within that period, the Office shall reject the application for conversion.

Rule 46

Publication of application for conversion

- (1) Where the application for conversion relates to a Community trade mark application which has already been published in the Community Trade Mark Bulletin pursuant to Article 40 of the Regulation or where the application for conversion relates to a Community trade mark, the application for conversion shall be published in the Community Trade Marks Bulletin.
- (2) The publication of the application for conversion shall contain:
 - (a) the filing number or the registration number of the trade mark in respect of which conversion is requested;
 - (b) a reference to the previous publication of the application or the registration in the Community Trade marks Bulletin;
 - (c) an indication of the Member State or Member States in respect of which conversion has been requested;
 - (d) where the request does not relate to all of the goods and services for which the application has been filed or for which the trade mark has been registered, an indication of the goods and services for which conversion is requested;
 - (e) where conversion is requested in respect of more than one Member State and the list of goods and services is not the same for all Member States, an indication of the respective goods and services for each Member State;
 - (f) the date of the application for conversion.

Rule 47

Transmission to central industrial property offices of the Member States

Where the application for conversion complies with the requirements of the Regulation and these Rules, the Office shall transmit without delay the application for conversion to the central industrial property offices of the Member States specified therein, including the Benelux Trade Mark Office. The Office shall inform the applicant of the date of transmission.

TITLE X

APPEALS

Rule 48

Content of the notice of appeal

- (1) The notice of appeal shall contain:
 - (a) the name and address of the appellant in accordance with rule 1 (1) (b);
 - (b) where the appellant has appointed a representative, the name and the business address of the representative in accordance with Rule 1 (1) (e);

-
- (c) a statement identifying the decision which is contested and the extent to which amendment or cancellation of the decision is requested.
- (2) The notice of appeal shall be filed in the language of the proceedings in which the decision subject to the appeal was taken.

Rule 49

Rejection of the appeal as inadmissible

- (1) If the appeal does not comply with Articles 57, 58 and 59 of the Regulation and Rule 48 (1) (c) and (2), the Board of Appeal shall reject it as inadmissible, unless each deficiency has been remedied before the relevant time limit laid down in Article 59 of the Regulation has expired.
- (2) If the Board of Appeal finds that the appeal does not comply with other provisions of the Regulation or other provisions of these Rules, in particular Rule 48 (1) (a) and (b), it shall inform the appellant accordingly and shall request him to remedy the deficiencies noted within such period as it may specify. If the appeal is not corrected in good time, the Board of Appeal shall reject it as inadmissible.
- (3) If the fee for appeal has been paid after expiry of the period for the filing of appeal pursuant to Article 59 of the Regulation, the appeal shall be deemed not to have been filed and the appeal fee shall be refunded to the appellant.

Rule 50

Examination of appeals

- (1) Unless otherwise provided, the provisions relating to proceedings before the department which has made the decision against which the appeal is brought shall be applicable to appeal proceedings *mutatis mutandis*.
- (2) The Board of Appeal's decision shall contain:
- (a) a statement that it is delivered by the Board;
 - (b) the date when the decision was taken;
 - (c) the names of the Chairman and of the other members of the Board of Appeal taking part;
 - (d) the name of the competent employee of the registry;
 - (e) the names of the parties and of their representatives;
 - (f) a statement of the issues to be decided;
 - (g) a summary of the facts;
 - (h) the reasons;
 - (i) the order of the Board of Appeal, including, where necessary, a decision on costs.
- (3) The decision shall be signed by the Chairman and the other members of the Board of Appeal and by the employee of the registry of the Board of Appeal.

Rule 51

Reimbursement of appeal fees

The reimbursement of appeal fees shall be ordered in the event of interlocutory revision or where the Board of Appeal deems an appeal to be allowable, if such reimbursement is equitable by reason of a substantial procedural violation. In the event of interlocutory revision, reimbursement shall

be ordered by the department whose decision has been impugned, and in other cases by the Board of Appeal.

TITLE XI

GENERAL PROVISIONS

Part A

Decisions and communications of the Office

Rule 52

Form of decisions

- (1) Decisions of the Office shall be in writing and shall state the reasons on which they are based. Where oral proceedings are held before the Office, the decision may be given orally. Subsequently, the decision in writing shall be notified to the parties.
- (2) Decisions of the Office which are open to appeal shall be accompanied by a written communication indicating that notice of appeal must be filed in writing at the Office within two months of the date of notification of the decision from which appeal is to be made. The communications shall also draw the attention of the parties to the provisions laid down in Articles 57, 58 and 59 of the Regulation. The parties may not plead any failure to communicate the availability proceedings.

Rule 53

Correction of errors in decisions

In decisions of the Office, only linguistic errors, errors of transcription and obvious mistakes may be corrected. They shall be corrected by the department which took the decision, acting of its own motion or at the request of an interested party.

Rule 54

Noting of loss of rights

- (1) If the Office finds that the loss of any rights results from the Regulation or these Rules without any decision having been taken, it shall communicate this to the person concerned in accordance with Article 77 of the Regulation, and shall draw his attention to the substance of paragraph 2 of this Rule.
- (2) If the person concerned considers that the finding of the Office is inaccurate, he may, within two months after notification of the communication referred to in paragraph 1, apply for a decision on the matter by the Office. Such decision shall be given only if the Office disagrees with the person requesting it; otherwise the Office shall amend its finding and inform the person requesting the decision.

Rule 55

Signature, name, seal

- (1) Any decision, communication or notice from the Office shall indicate the department or division of the Office as well as the name or the names of the official or officials responsible. They shall be signed by the official or officials, or, instead of a signature, carry a printed or stamped seal of the Office.

- (2) The President of the Office may determine that other means of identifying the department or division of the Office and the name of the official or officials responsible or an identification other than a seal may be used where decisions, communications or notices are transmitted by telecopier or any other technical means of communication.

Part B

Oral proceedings and taking of evidence

Rule 56

Summons to oral proceedings

- (1) The parties shall be summoned to oral proceedings provided for in Article 75 of the Regulation and their attention shall be drawn to paragraph 3 of this Rule. At least one month's, notice of the summons shall be given unless the parties agree to a shorter period.
- (2) When issuing the summons, the Office shall draw attention to the points which in its opinion need to be discussed in order for the decision to be taken.
- (3) If a party who has been duly summoned to oral proceedings before the Office does not appear as summoned, the proceedings may continue without him.

Rule 57

Taking of evidence by the Office

- (1) Where the Office considers it necessary to hear the oral evidence of parties, of witnesses or of experts or to carry out an inspection, it shall take a decision to that end, stating the means by which it intends to obtain evidence, the relevant facts to be proved and the date, time and place of hearing or inspection. If oral evidence of witnesses and experts is requested by a party, the decision of the Office shall determine the period of time within which the party filing the request must make known to the Office the names and addresses of the witnesses and experts whom the party wishes to be heard.
- (2) The period of notice given in the summons of a party, witness or expert to give evidence shall be at least one month, unless they agree to a shorter period. The summons shall contain:
- (a) an extract from the decision mentioned in paragraph 1, indicating in particular the date, time and place of the hearing ordered and stating the facts regarding which the parties, witnesses and experts are to be heard;
- (b) the names of the parties to proceedings and particulars of the rights which the witnesses or experts may invoke under Rule 59 (2) to (5).

Rule 58

Commissioning of experts

- (1) The Office shall decide in what form the report made by an expert whom it appoints shall be submitted.
- (2) The terms of reference of the expert shall include:
- (a) a precise description of his task;
- (b) the time limit laid down for the submission of the expert report;

- (c) the names of the parties to the proceedings;
 - (d) particulars of the claims which he may invoke under Rule 59 (2), (3) and (4).
- (3) A copy of any written report shall be submitted to the parties.
- (4) The parties may object to an expert on grounds of incompetence or on the same grounds as those on which objection may be made to an examiner or to a member of a Division or Board of Appeal pursuant to Article 132 (1) and (3) of the Regulation. The department of the Office concerned shall rule on the objection.

Rule 59

Costs of taking of evidence

- (1) The taking of evidence by the Office may be made conditional upon deposit with it, by the party who has requested the evidence to be taken, of a sum which shall be fixed by reference to an estimate of the costs.
- (2) Witnesses and experts who are summoned by and appear before the Office shall be entitled to reimbursement of reasonable expenses for travel and subsistence. An advance for these expenses may be granted to them by the Office. The first sentence shall apply also to witnesses and experts who appear before the Office without being summoned by it and are heard as witnesses or experts.
- (3) Witnesses entitled to reimbursement under paragraph 2 shall also be entitled to appropriate compensation for loss of earnings, and experts to fees for their work. These payments shall be made to the witnesses and experts after they have fulfilled their duties or tasks, where such witnesses and experts have been summoned by the Office of its own initiative.
- (4) The amounts and the advances for expenses to be paid pursuant to paragraphs 1, 2 and 3 shall be determined by the President of the Office and shall be published in the Official Journal of the Office. The amounts shall be calculated on the same basis as the compensation and salaries received by officials in grades A4 to A8 as laid down in the Staff Regulations of Officials of the European Communities and Annex VII thereto.
- (5) Final liability for the amounts due or paid pursuant to paragraphs 1 to 4 shall lie with:
 - (a) the Office where the Office, at its own initiative, considered it necessary to hear the oral evidence of witnesses or experts;or
 - (b) the party concerned where that party requested the giving of oral evidence by witnesses or experts, subject to the decision on apportionment and fixing of costs pursuant to Articles 81 and 82 of the Regulation and Rule 94. Such party shall reimburse the Office for any advances duly paid.

Rule 60

Minutes of oral proceedings and of evidence

- (1) Minutes of oral proceedings or the taking of evidence shall be drawn up, containing the essentials of the oral proceedings or of the taking of evidence, the relevant statements made by the parties, the testimony of the parties, witnesses or experts and the result of any inspection.
- (2) The minutes of the testimony of a witness, expert or party shall be read out or submitted to him so that he may examine them. It shall be noted in the minutes that this formality has been carried out and that the person who gave the testimony approved the minutes. Where his approval is not given, his objections shall be noted.

- (3) The minutes shall be signed by the employee who drew them up and by the employee who conducted the oral proceedings or taking of evidence.
- (4) The parties shall be provided with a copy of the minutes.
- (5) Upon request, the Office shall make available to the parties transcripts of recordings of the oral proceedings, in typescript or in any other machine-readable form. The release under the first sentence of the oral proceedings shall be subject to the payment of the costs incurred by the Office in making such transcript. The amount to be charged shall be determined by the President of the Office.

Part C

Notifications

Rule 61

General provisions on notifications

- (1) In proceedings before the Office, any notifications to be made by the Office shall take the form of the original document, of a copy thereof certified by, or bearing the seal of, the Office or of a computer print-out bearing such seal. Copies of documents emanating from the parties themselves shall not require such certification.
- (2) Notifications shall be made
 - (a) by post in accordance with Rule 62;
 - (b) by hand delivery in accordance with Rule 63;
 - (c) by deposit in a post box at the Office in accordance with Rule 64;
 - (d) by telecopier and other technical means in accordance with Rule 65;
 - (e) by public notification in accordance with Rule 66.

Rule 62

Notification by post

- (1) Decisions subject to a time limit for appeal, summonses and other documents as determined by the President of the Office shall be notified by registered letter with advice of delivery. Decisions and communications subject to some other time limit shall be notified by registered letter, unless the President of the Office determines otherwise. All other communications shall be ordinary mail.
- (2) Notifications in respect of addresses having neither their domicile nor their principal place of business nor an establishment in the Community and who have not appointed a representative in accordance with Article 88 (2) of the Regulation shall be effected by posting the document requiring notification by ordinary mail to the last address of the addressee known to the Office. Notification shall be deemed to have been effected when the posting has taken place.
- (3) Where notification is effected by registered letter, whether or not with advice of delivery, this shall be deemed to be delivered to the addressee on the 10th day following that of its posting, unless the letter has failed to reach the addressee or has reached him at a later date. In the event of any dispute, it shall be for the Office to establish that the letter has reached its destination or to establish the date on which it was delivered to the addressee, as the case

may be.

- (4) Notification by registered letter, with or without advice of delivery, shall be deemed to have been effected even if the addressee refuses to accept the letter.
- (5) To the extent that notification by post is not covered by paragraphs 1 to 4, the law of the State on the territory of which notification is made shall apply.

Rule 63

Notification by hand delivery

Notification may be effected on the premises of the Office by hand delivery of the document to the addressee, who shall on delivery acknowledge its receipt.

Rule 64

Notification by deposit in a post box at the Office

Notification may also be effected to addressees who have been provided with a post box at the Office, by depositing the document therein. A written notification of deposit shall be inserted in the files. The date of deposit shall be recorded on the document. Notification shall be deemed to have taken place on the fifth day following deposit of the document in the post box at the Office.

Rule 65

Notification by telecopier and other technical means

- (1) Notification by telecopier shall be effected by transmitting either the original or a copy, as provided for in Rule 61 (1), of the document to be notified. The details of such transmission shall be determined by the President of the Office.
- (2) Details of notification by other technical means of communication shall be determined by the President of the Office.

Rule 66

Public notification

- (1) If the address of the addressee cannot be established, or if notification in accordance with Rule 62 (1) has proved to be impossible even after a second attempt by the Office, notification shall be effected by public notice. Such notice shall be published at least in the Community Trade Marks Bulletin.
- (2) The President of the Office shall determine how the public notice is to be given and shall fix the beginning of the one-month period on the expiry of which the document shall be deemed to have been notified.

Rule 67

Notification to representatives

- (1) If a representative has been appointed or where the applicant first named in a common application is considered to be the common representative pursuant to Rule 75 (1), notifications shall be addressed to that appointed or common representative.
- (2) If several representatives have been appointed for a single interested party, notification to any one of them shall be sufficient, unless a specific address for service has been indicated in accordance with Rule 1 (1) (e).
- (3) If several interested parties have appointed a common representative, notification of a single

document to the common representative shall be sufficient.

Rule 68

Irregularities in notification

Where a document has reached the addressee, if the Office is unable to prove that it has been duly notified, or if provisions relating to its notification have not been observed, the document shall be deemed to have been notified on the date established by the Office as the date of receipt.

Rule 69

Notification of documents in the case of several parties

Documents emanating from parties which contain substantive proposals, or a declaration of withdrawal of a substantive proposal, shall be notified to the other parties as a matter of course. Notification may be dispensed with where the document contains no new pleadings and the matter is ready for decision.

Part D

Timelimits

Rule 70

Calculation of time limits

- (1) Periods shall be laid down in terms of full years, months, weeks or days.
- (2) Calculation shall start on the day following the day on which the relevant event occurred, the event being either a procedural step or the expiry of another period. Where that procedural step is a notification, the event considered shall be the receipt of the document notified, unless otherwise provided.
- (3) Where a period is expressed as one year or a certain number of years, it shall expire in the relevant subsequent year in the month having the same name and on the day having the same number as the month and the day on which the said event occurred. Where the relevant month has no day with the same number the period shall expire on the last day of that month.
- (4) Where a period is expressed as one month or a certain number of months, it shall expire in the relevant subsequent month on the day which has the same number as the day on which the said event occurred. Where the day on which the said event occurred was the last day of a month or where the relevant subsequent month has no day with the same number the period shall expire on the last day of that month.
- (5) Where a period is expressed as one week or a certain number of weeks, it shall expire in the relevant subsequent week on the day having the same name as the day on which the said event occurred.

Rule 71

Duration of time limits

- (1) Where the Regulation or these Rules provide for a period to be specified by the Office, such period shall, when the party concerned has its domicile or its principal place of business or an establishment within the Community, be not less than one month, or, when those conditions are not fulfilled, not less than two months, and no more than six months. The Office may, when this is appropriate under the circumstances, grant an extension of a period specified if such extension is requested by the party concerned and the request is submitted before the original

period expired.

- (2) Where there are two or more parties, the Office may extend a period subject to the agreement of the other parties.

Rule 72

Expiry of time limits in special cases

- (1) If a time limit expires on a day on which the Office is not open for receipt of documents or on which, for reasons other than those referred to in paragraph 2, ordinary mail is not delivered in the locality in which the Office is located, the time limit shall extend until the first day thereafter on which the Office is open for receipt of documents and on which ordinary mail is delivered. The days referred to in the first sentence shall be as determined by the President of the Office before the commencement of each calendar year.
- (2) If a time limit expires on a day on which there is a general interruption or subsequent dislocation in the delivery of mail in a Member State or between a Member State and the Office, the time limit shall extend until the first day following the end of the period of interruption or dislocation, for parties having their residence or registered office in the State concerned or who have appointed representatives with a place of business in that State. In the event of the Member State concerned being the State in which the Office is located, this provision shall apply to all parties. The duration of the abovementioned period shall be as determined by the President of the Office.
- (3) Paragraphs 1 and 2 shall apply *mutatis mutandis* to the time limits provided for in the Regulation or these Rules in the case of transactions to be carried out with the competent authority within the meaning of Article 25 (1) (b) of the Regulation.
- (4) If an exceptional occurrence such as natural disaster or strike interrupts or dislocates the proper functioning of the Office so that any communication from the Office to parties concerning the expiry of a time limit is delayed, acts to be completed within such a time limit may still be validly completed within one month after the notification of the delayed communication. The date of commencement and the end of any such interruption or dislocation shall be as determined by the President of the Office.

Part E

Interruption of proceedings

Rule 73

Interruption of proceedings

- (1) Proceedings before the Office shall be interrupted:
- (a) in the event of the death or legal incapacity of the applicant for or proprietor of a Community trade mark or of the person authorized by national law to act on his behalf. To the extent that the above events do not affect the authorization of a representative appointed under Article 89 of the Regulation, proceedings shall be interrupted only on application by such representative;
- (b) in the event of the applicant for or proprietor of a Community trade mark, as a result of some action taken against his property, being prevented for legal reasons from continuing the proceedings before the Office;
- (c) in the event of the death or legal incapacity of the representative of an applicant for or proprietor

of a Community trade mark or of his being prevented for legal reasons resulting from action taken against his property from continuing the proceedings before the Office.

- (2) When, in the cases referred to in paragraph 1 (a) and (b), the Office has been informed of the identity of the person authorized to continue the proceedings before the Office, the Office shall communicate to such person and to any interested third parties that the proceedings shall be resumed as from a date to be fixed by the Office.
- (3) In the case referred to in paragraph 1 (c), the proceedings shall be resumed when the Office has been informed of the appointment of a new representative of the applicant or when the Office has notified to the other parties the communication of the appointment of a new representative of the proprietor of the Community trade mark. If, three months after the beginning of the interruption of the proceedings, the Office has not been informed of the appointment of a new representative, it shall inform the applicant for or proprietor of the Community trade mark:
 - (a) where Article 88 (2) of the Regulation is applicable, that the Community trade mark application will be deemed to be withdrawn if the information is not submitted within two months after this communication is notified; or
 - (b) where Article 88 (2) of the Regulation is not applicable, that the proceedings will be resumed with the applicant for or proprietor of the Community trade mark as from the date on which this communication is notified.
- (4) The time limits, other than the time limit for paying the renewal fees, in force as regards the applicant for or proprietor of the Community trade mark at the date of interruption of the proceedings, shall begin again as from the day on which the proceedings are resumed.

Part F

Waiving of enforced recovery procedures

Rule 74

Waiving of enforced recovery procedures

The President of the Office may waive action for the enforced recovery of any sum due where the sum to be recovered is minimal or where such recovery is too uncertain.

Part G

Representation

Rule 75

Appointment of a common representative

- (1) If there is more than one applicant and the application for a Community trade mark does not name a common representative, the applicant first named in the application shall be considered to be the common representative. However, if one of the applicants is obliged to appoint a professional representative, such representative shall be considered to be the common representative unless the applicant named first in the application has appointed a professional representative. The same shall apply *mutatis mutandis* to third parties acting in common in filing notice of opposition

or applying for revocation or for a declaration of invalidity, and to joint proprietors of a Community trade mark.

- (2) If, during the course of proceedings, transfer is made to more than one person, and such persons have not appointed a common representative, paragraph 1 shall apply. If such application is not possible, the Office shall require such persons to appoint a common representative within two months. If this request is not complied with, the Office shall appoint the common representative.

Rule 76

Authorizations

- (1) Representatives acting before the Office must file with it a signed authorization for inclusion in the files. The authorization may cover one or more applications or one or more registered trade marks.
- (2) A general authorization enabling a representative to act in respect of all trade mark transactions of the party giving the authorization may be filed.
- (3) The authorization may be filed in any language of the Office and in the language of the proceedings if that language is not one of the languages of the Office.
- (4) Where the appointment of a representative is communicated to the Office, the necessary authorization shall be filed within a period specified by the Office. If the authorization is not filed in due time, proceedings shall be continued with the represented person. Any procedural steps other than the filing of the application taken by the representative shall be deemed not to have been taken if the represented person does not approve them. The application of Article 88 (2) of the Regulation shall remain unaffected.
- (5) Paragraphs 1 to 3 shall apply *mutatis mutandis* to a document withdrawing an authorization.
- (6) Any representative who has ceased to be authorized shall continue to be regarded as the representative until the termination of his authorization has been communicated to the Office.
- (7) Subject to any provisions to the contrary contained therein, an authorization shall not terminate *vis-à-vis* the Office upon the death of the person who gave it.
- (8) Where several representatives are appointed by the same party, they may, notwithstanding any provisions to the contrary in their authorizations, act either jointly or singly.
- (9) The authorization of an association of representatives shall be deemed to be an authorization of any representative who can establish that he practises within that association.

Rule 77

Representation

Any notification or other communication addressed by the Office to the duly authorized representative shall have the same effect as if it had been addressed to the represented person. Any communication addressed to the Office by the duly authorized representative shall have the same effect as if it originated from the represented person.

Rule 78

Amendment of the list of professional representatives

- (1) The entry of a professional representative in the list of professional representatives, as referred to in Article 89 of the Regulation, shall be deleted at his request.
- (2) The entry of a professional representative shall be deleted automatically:

-
- (a) in the event of the death or legal incapacity of the professional representative;
 - (b) where the professional representative is no longer a national of a Member State, unless the President of the Office has granted an exemption under Article 89 (4) (b) of the Regulation;
 - (c) where the professional representative no longer has his place of business or employment in the Community;
 - (d) where the professional representative no longer possesses the entitlement referred to in the first sentence of Article 89 (2) (c) of the Regulation.
- (3) The entry of a professional representative shall be suspended of the Office's own motion where his entitlement to represent natural or legal persons before the central industrial property office of the Member State as referred to in the first sentence of Article 89 (2) (c) has been suspended.
- (4) A person whose entry has been deleted shall, upon request pursuant to Article 89 (3) of the Regulation, be reinstated in the list of professional representatives if the conditions for deletion no longer exist.
- (5) The Benelux Trade Mark Office and the central industrial property offices of the Member States concerned shall, where they are aware thereof, promptly inform the Office of any relevant events under paragraphs 2 and 3.
- (6) The amendments of the list of professional representatives shall be published in the Official Journal of the Office.

Part H

Written communications and forms

Rule 79

Communication in writing or by other means

Applications for the registration of a Community trade mark as well as any other application provided for in the Regulation and all other communications addressed to the Office shall be submitted as follows:

- (a) by submitting a signed original of the document in question at the Office, such as by post, personal delivery, or by any other means; annexes to documents submitted need not be signed;
- (b) by transmitting a signed original by telecopier in accordance with Rule 80;
- (c) by telex or telegram in accordance with Rule 81;
- (d) by transmitting the contents of the communication by electronic means in accordance with Rule 82.

Rule 80

Communication by telecopier

- (1) Where an application for registration of a trade mark is submitted to the Office by telecopier and the application contains a reproduction of the mark pursuant to Rule 3 (2) which does not satisfy the requirements of that Rule, the required number of original reproductions shall be submitted to the Office in accordance with Rule 79 (a). Where the reproductions are received

by the Office within a period of one month from the date of the receipt of the telecopy by the Office, the application shall be deemed to have been received by the Office on the date on which the telecopy was received by the Office. Where the reproductions are received by the Office after the expiry of that period and the reproduction is necessary for the obtaining of a filing date, the application shall be deemed to have been received by the Office on the date on which the reproductions were received by the Office.

- (2) Where a communication received by telecopier is incomplete or illegible, or where the Office has reasonable doubts as to the accuracy of the transmission, the Office shall inform the sender accordingly and shall invite him, within a period to be specified by the Office, to retransmit the original by telecopy or to submit the original in accordance with Rule 79 (a). Where this request is complied with within the period specified, the date of the receipt of the retransmission or of the original shall be deemed to be the date of the receipt of the original communication, provided that where the deficiency concerns the granting of a filing date for an application to register a trade mark, the provisions on the filing date shall apply. Where the request is not complied with within the period specified, the communication shall be deemed not to have been received.
- (3) Any communication submitted to the Office by telecopier shall be considered to be duly signed if the reproduction of the signature appears on the printout produced by the telecopier.
- (4) The President of the Office may determine additional requirements of communication by telecopier, such as the equipment to be used, technical details of communication, and methods of identifying the sender.

Rule 81

Communication by telex or telegram

- (1) Where an application for registration of a trade mark is submitted to the Office by telex or by telegram and the application contains a reproduction of the mark pursuant to Rule 3 (2), Rule 80 (1) shall apply *mutatis mutandis*.
- (2) Where a communication is submitted by telex or telegram, Rule 80 (2) shall apply *mutatis mutandis*.
- (3) Where a communication is submitted by telex or telegram, the indication of the name of the sender shall be deemed equivalent to the signature.

Rule 82

Communication by electronic means

- (1) Where an application for registration of a trademark is submitted by electronic means and the application contains a reproduction of the mark pursuant to Rule 3 (2), Rule 80 (1) shall apply *mutatis mutandis*.
- (2) Where a communication is sent by electronic means, Rule 80 (2) shall apply *mutatis mutandis*.
- (3) Where a communication is sent to the Office by electronic means, the indication of the name of the sender shall be deemed to be equivalent to the signature.
- (4) The President of the Office shall determine the requirements as to communication by electronic means, such as the equipment to be used, technical details of communication, and methods of identifying the sender.

Rule 83

Forms

- (1) The Office shall make available free of charge forms for the purpose of:
 - (a) filing an application for a Community trade mark;
 - (b) entering opposition to registration of a Community trade mark;
 - (c) applying for an amendment of an application or a registration, for correction of names and addresses and of mistakes and errors;
 - (d) applying for the registration of a transfer and the transfer form and transfer document provided for in Rule 31 (5);
 - (e) applying for the registration of a licence;
 - (f) applying for renewal of the registration of a Community trade mark;
 - (g) applying for revocation or for a declaration of invalidity of a Community trade mark;
 - (h) applying for restitutio in integrum;
 - (i) making an appeal;
 - (j) authorizing a representative, in the form of an individual authorization and in the form of a general authorization.
- (2) The Office may make other forms available free of charge.
- (3) The Office shall make available the forms referred to in paragraphs 1 and 2 in all the official languages of the Community.
- (4) The Office shall place the forms at the disposal of the Benelux Trade Mark Office and the Member States' central industrial property offices free of charge.
- (5) The Office may also make available the forms in machine-readable form.
- (6) Parties to proceedings before the Office shall use the forms provided by the Office, or copies of these forms, or forms with the same content and format as these forms, such as forms generated by means of electronic data processing.
- (7) Forms shall be completed in such a manner as to permit an automated input of the content into a computer, such as by character recognition or scanning.

Part I

Information of the public

Rule 84

Register of Community Trade Marks

- (1) The Register of Community Trade Marks may be maintained in the form of an electronic database.
- (2) The Register of Community Trade Marks shall contain the following entries:
 - (a) the date of filing the application;
 - (b) the file number of the application;
 - (c) the date of the publication of the application;
 - (d) the name, the address and the nationality of the applicant and the State in which he is domiciled

or has his seat or establishment;

- (e) the name and business address of the representative, other than a representative falling within the first sentence of Article 88 (3) of the Regulation; where there is more than one representative, only the name and business address of the first named representative, followed by the words and others, shall be recorded; where an association of representatives is appointed, only the name and address of the association shall be recorded;
 - (f) the reproduction of the mark, with indications as to its nature, unless it is a mark falling under Rule 3 (1); where the registration of the mark is in colour, the indication 'in colour` with an indication of the colour or colours making up the mark; where applicable, a description of the mark;
 - (g) an indication of the goods and services by their names, grouped according to the classes of the Nice Classification; each group shall be preceded by the number of the class of that classification to which that group of goods and services belongs and shall be presented in the order of the classes of that classification
 - (h) particulars of claims of priority pursuant to Article 30 of the Regulation;
 - (i) particulars of claims of exhibition priority pursuant to Article 33 of the Regulation;
 - (j) particulars of claims of seniority of an earlier registered trade mark as referred to in Article 34 of the Regulation;
 - (k) a statement that the mark has become distinctive in consequence of the use which has been made of it, pursuant to Article 7 (3) of the Regulation;
 - (l) a declaration by the applicant disclaiming any exclusive right to some element of the mark pursuant to Article 38 (2) of the Regulation;
 - (m) an indication that the mark is a collective mark;
 - (n) the language in which the application was filed and the second language which the applicant has indicated in his application, pursuant to Article 115 (3) of the Regulation;
 - (o) the date of registration of the mark in the Register and the registration number.
- (3) The Register of Community Trade Marks shall also contain the following entries, each accompanied by the date of recording of such entry:
- (a) changes in the name, the address or the nationality of the proprietor of a Community trade mark or in the State in which he is domiciled or has his seat or establishment;
 - (b) changes in the name or business address of the representative, other than a representative falling within Article 88 (3), first sentence, of the Regulation;
 - (c) when a new representative is appointed, the name and business address of that representative;
 - (d) alterations of the mark pursuant to Article 48 of the Regulation and corrections of mistakes and errors;
 - (e) notice of amendments to the regulations governing the use of the collective mark pursuant to Article 69 of the Regulation;
 - (f) particulars of claims of seniority of an earlier registered trade mark as referred to in Article 34 of the Regulation, pursuant to Article 35 of the Regulation;
 - (g) total or partial transfers pursuant to Article 17 of the Regulation;

-
- (h) the creation or transfer of a right in rem pursuant to Article 19 of the Regulation and the nature of the right in rem;
 - (i) levy of execution pursuant to Article 20 of the Regulation and bankruptcy or like proceedings pursuant to Article 21 of the regulation;
 - (j) the grant or transfer of a licence pursuant to Article 22 of the Regulation and, where applicable, the type of licence pursuant to Rule 34;
 - (k) renewal of the registration pursuant to Article 47 of the Regulation, the date from which it takes effect and any restrictions pursuant to Article 47 (4) of the Regulation;
 - (l) a record of the determination of the expiry of the registration pursuant to Article 47 of the Regulation;
 - (m) a declaration of surrender by the proprietor of the mark pursuant to Article 49 of the Regulation;
 - (n) the date of submission of an application pursuant to Article 55 of the Regulation or of the filing of a counterclaim pursuant to Article 96 (4) of the Regulation for revocation or for a declaration of invalidity;
 - (o) the date and content of the decision on the application or counterclaim pursuant to Article 56 (6) or the third sentence of Article 96 (6) of the Regulation;
 - (p) a record of the receipt of a request for conversion pursuant to Article 109 (2) of the Regulation;
 - (q) the cancellation of the representative recorded pursuant to paragraph 2 (e);
 - (r) the cancellation of the seniority of a national mark;
 - (s) the modification or cancellation from the Register of the items referred to in subparagraphs (h), (i) and (j).
- (4) The President of the Office may determine that items other than those referred to in paragraphs 2 and 3 shall be entered in the Register.
- (5) The proprietor of the trade mark shall be notified of any change in the Register.
- (6) The Office shall provide certified or uncertified extracts from the Register on request, on payment of a fee.

Part J

Community Trade Marks Bulletin and Official Journal of the Office

Rule 85

Community Trade Marks Bulletin

- (1) The Community Trade Marks Bulletin shall be published in periodic editions. The Office may make available to the public editions of the Bulletin on CD-ROM or in any other machine-readable form.
- (2) The Community Trade Marks Bulletin shall contain publications of applications and of entries made in the Register as well as other particulars relating to applications or registrations of trade marks whose publication is prescribed by the Regulation or by these Rules.
- (3) Where particulars whose publication is prescribed in the Regulation or in these Rules are

published in the Community Trade Marks Bulletin, the date of issue shown on the Bulletin shall be taken as the date of publication of the particulars.

- (4) To the extent that the entries regarding the registration of a trade mark contain no changes as compared to the publication of the application, the publication of such entries shall be made by way of a reference to the particulars contained in the publication of the application.
- (5) The elements of the application for a Community trade mark, as set out in Article 26 (1) of the Regulation as well as any other information the publication of which is prescribed in Rule 12 shall, where appropriate, be published in all the official languages of the Community.
- (6) The Office shall take into account any translation submitted by the applicant. If the language of the application is not one of the languages of the Office, the translation into the second language indicated by the applicant shall be communicated to the applicant. The applicant may propose changes to the translation within a period to be specified by the Office. If the applicant does not respond within this period or if the Office considers the proposed changes to be inappropriate, the translation proposed by the Office shall be published.

Rule 86

Official Journal of the Office

- (1) The Official Journal of the Office shall be published in periodic editions. The Office may make available to the public editions of the Official Journal on CD-ROM or in any other machine-readable form.
- (2) The Official Journal shall be published in the languages of the Office. The President of the Office may determine that certain items shall be published in all the official languages of the Community.

Rule 87

Data bank

- (1) The Office shall maintain an electronic data bank with the particulars of applications for registration of trade marks and entries in the Register. The Office may also make available the contents of this data bank on CD-ROM or in any other machine-readable form.
- (2) The President of the Office shall determine the conditions of access to the data bank and the manner in which the contents of this data bank may be made available in machine-readable form, including the charges for these acts.

Part K

Inspection of files and keeping of files

Rule 88

Parts of the file excluded from inspection

The parts of the file which shall be excluded from inspection pursuant to Article 84 (4) of the Regulation shall be:

- (a) documents relating to exclusion or objection pursuant to Article 132 of the Regulation;
- (b) draft decisions and opinions, and all other internal documents used for the preparation of decisions and opinions;

- (c) parts of the file which the party concerned showed a special interest in keeping confidential before the application for inspection of the files was made, unless inspection of such part of the file is justified by overriding legitimate interests of the party seeking inspection.

Rule 89

Procedures for the inspection of files

- (1) Inspection of the files of Community trade mark applications and of registered Community trade marks shall either be of the original document, or of copies thereof, or of technical means of storage if the files are stored in this way. The means of inspection shall be determined by the President of the Office. The request for inspection of the files shall not be deemed to have been made until the required fee has been paid.
- (2) Where inspection of the files of a Community trade mark application is requested, the request shall contain an indication and evidence to the effect that the applicant
- (a) has consented to the inspection; or
- (b) has stated that after the trade mark has been registered he will invoke the rights under it against the party requesting the inspection.
- (3) Inspection of the files shall take place on the premises of the Office.
- (4) On request, inspection of the files shall be effected by means of issuing copies of file documents. Such copies shall incur fees.
- (5) The office shall issue on request certified or uncertified copies of the application for a Community trade mark or of those file documents of which copies may be issued pursuant to paragraph 4 upon payment of a fee.

Rule 90

Communication of information contained in the files

Subject to the restrictions provided for in Article 84 of the Regulation and Rule 88, the Office may, upon request, communicate information from any file of a Community trade mark applied for or of a registered Community trade mark, subject to payment of a fee. However, the Office may require the exercise of the option to obtain inspection of the file itself should it deem this to be appropriate in view of the quantity of information to be supplied.

Rule 91

Keeping of files

- (1) The Office shall keep the files relating to Community trade mark applications and registered Community trade marks for at least five years from the end of the year in which:
- (a) the application is rejected or withdrawn or is deemed to be withdrawn;
- (b) the registration of the Community trade mark expires completely pursuant to Article 47 of the Regulation;
- (c) the complete surrender of the Community trade mark is registered pursuant to Article 49 of the Regulation;
- (d) the Community trade mark is completely removed from the Register pursuant to Article 56 (6) or Article 96 (6) of the Regulation.
- (2) The President of the Office shall determine the form in which the files shall be kept.

Part L

Administrative cooperation

Rule 92

Exchange of information and communications between the Office and the authorities of the Member States

- (1) The Office and the central industrial property offices of the Member States shall, upon request, communicate to each other relevant information about the filing of applications for Community trade marks or national marks and about proceedings relating to such applications and the marks registered as a result thereof. Such communications shall not be subject to the restrictions provided for in Article 84 of the Regulation.
- (2) Communications between the Office and the courts or authorities of the Member States which arise out of the application of the Regulation or these Rules shall be effected directly between these authorities. Such communication may also be effected through the central industrial property offices of the Member States.
- (3) Expenditure in respect of communications under paragraphs 1 and 2 shall be chargeable to the authority making the communications, which shall be exempt from fees.

Rule 93

Inspection of files by or via courts or authorities of the Member States

- (1) Inspection of files relating to Community trade marks applied for or registered Community trade marks by courts or authorities of the Member States be of the original documents or of copies thereof, otherwise Rule 89 shall not apply.
- (2) Courts or Public Prosecutors' Offices of the Member States may, in the course of proceedings before them, open files or copies thereof transmitted by the Office to inspection by third parties. Such inspection shall be subject to Article 84 of the Regulation. The Office shall not charge any fee for such inspection.
- (3) The Office shall, at the time of transmission of the files or copies thereof to the courts or Public Prosecutors' Offices of the Member States, indicate the restrictions to which the inspection of files relating to Community trade marks applied for or registered Community trade marks is subject pursuant to Article 84 of the Regulation and Rule 88.

Part M

Costs

Rule 94

Apportionment and fixing of costs

- (1) Apportionment of costs pursuant to Article 81 (1) and (2) of the Regulation shall be dealt with in the decision on the opposition, the decision on the application for revocation or for a declaration of invalidity of a Community trade mark, or the decision on the appeal.
- (2) Apportionment of costs pursuant to Article 81 (3) and (4) of the Regulation shall be dealt

with in a decision on costs by the Opposition Division, the Cancellation Division or the Board of Appeal.

- (3) A bill of costs, with supporting evidence, shall be attached to the request for the fixing of costs provided for in the first sentence of Article 81 (6) of the Regulation. The request shall be admissible only if the decision in respect of which the fixing of costs is required has become final. Costs may be fixed once their credibility is established.
- (4) The request provided for in the second sentence of Article 81 (6) of the Regulation for a review of the decision of the registry on the fixing of costs, stating the reasons on which it is based, must be filed at the Office within one month after the date of notification of the awarding of costs. It shall not be deemed to be filed until the fee for reviewing the amount of the costs has been paid.
- (5) The Opposition Division, the Cancellation Division or the Board of Appeal, as the case may be, shall take a decision on the request referred to in paragraph 4 without oral proceedings.
- (6) The fees to be borne by the losing party pursuant to Article 81 (1) of the Regulation shall be limited to the fees incurred by the other party for opposition, for an application for revocation or for a declaration of invalidity of the Community trade mark and for appeal.
- (7) Cost essential to the proceedings and actually incurred by the successful party shall be borne by the losing party in accordance with Article 81 (1) of the Regulation on the basis of the following maximum rates:
 - (a) travel expenses of one party for the outward and return journey between the place of residence or the place of business and the place where oral proceedings are held or where evidence is taken, as follows:
 - (i) the cost of the first-class rail-fare including usual transport supplements where the total distance by rail does not exceed 800 km;
 - (ii) the cost of the tourist-class air-fare where the total distance by rail exceeds 800 km or the route includes a sea-crossing;
 - (b) subsistence expenses by one party equal to the daily subsistence allowance for officials in grades A4 to A8 as laid down in Article 13 of Annex VII to the Staff Regulations of Officials of the European Communities;
 - (c) travel expenses of representatives within the meaning of Article 89 (1) of the Regulation and of witnesses and of experts, at the rates provided for in subparagraph (a);
 - (d) subsistence expenses of representatives within the meaning of Article 89 (1) of the Regulation and of witnesses and experts, at the rates provided for in subparagraph (b);
 - (e) costs entailed in the taking of evidence in the form of examination of witnesses, opinions by experts or inspection
up to ECU 300 per proceedings;
 - f) cost of representation, within the meaning of Article 89 (1) of the Regulation,
 - (i) of the opposing party in opposition proceedings:
up to ECU 250;
 - (ii) of the applicant in opposition proceedings:
up to ECU 250;

- (iii) of the applicant in proceedings relating to revocation or invalidity of a Community trade mark:
up to ECU 400;
- (iv) of the proprietor of the trade mark in proceedings relating to revocation or invalidity of a Community trade mark:
up to ECU 400;
- (v) of the appellant in appeal proceedings:
up to ECU 500;
- (vi) of the defendant in appeal proceedings:
up to ECU 500;
- Where the taking of evidence in any of the abovementioned proceedings involves the examination of witnesses, opinions by experts or inspection, an additional amount shall be granted for representation costs of up to ECU 600 per proceedings;
- (g) where the successful party is represented by more than one representative within the meaning of Article 89 (1) of the Regulation, the losing party shall bear the costs referred to in subparagraphs (c), (d) and (f) for one such person only;
- (h) the losing party shall not be obliged to reimburse the successful party for any costs, expenses and fees other than those referred to in subparagraphs (a) to (g).

Part N

Languages

Rule 95

Applications and declarations

Without prejudice to Article 115 (5) of the Regulation,

- (a) any application or declaration relating to a Community trade mark application may be filed in the language used for filing the application for a Community trade mark or in the second language indicated by the applicant in his application;
- (b) any application or declaration relating to a registered Community trade mark may be filed in one of the languages of the Office. However, when the application is filed by using any of the forms provided by the Office pursuant to Rule 83, such forms may be used in any of the official languages of the Community, provided that the form is completed in one of the languages of the Office, as far as textual elements are concerned.

Rule 96

Written proceedings

- (1) Without prejudice to Article 115 (4) and (7) of the Regulation, and unless otherwise provided for in these Rules, in written proceedings before the Office any party may use any language of the Office. If the language chosen is not the language of the proceedings, the party shall supply a translation into that language within one month from the date of the submission of the original document. Where the applicant for a Community trade mark is the sole party to proceedings before the Office and the language used for the filing of the application for the Community

trade mark is not one of the languages of the Office, the translation may also be filed in the second language indicated by the applicant in his application.

- (2) Unless otherwise provided for in these Rules, documents to be used in proceedings before the Office may be filed in any official language of the Community. Where the language of such documents is not the language of the proceedings the Office may require that a translation be supplied, within a period specified by it, in that language or, at the choice of the party to the proceeding, in any language of the Office.

Rule 97

Oral proceedings

- (1) Any party to oral proceedings before the Office may, in place of the language of proceedings, use one of the other official languages of the Community, on condition that he makes provision for interpretation into the language of proceedings. Where the oral proceedings are held in a proceeding concerning the application for registration of a trade mark, the applicant may use either the language of the application or the second language indicated by him.
- (2) In oral proceedings concerning the application for registration of a trade mark, the staff of the Office may use either the language of the application or the second language indicated by the applicant. In all other oral proceedings, the staff of the Office may use, in place of the language of the proceedings, one of the other languages of the Office, on condition that the party or parties to the proceedings agree to such use.
- (3) In the case of taking of evidence, any party to be heard, witness or expert who is unable to express himself adequately in the language of proceedings, may use any of the official languages of the Community. Should the taking of evidence be decided upon following a request by a party to the proceedings, parties to be heard, witnesses or experts who express themselves in languages other than the language of proceedings may be heard only if the party who made the request makes provision for interpretation into that language. In proceedings concerning the application for registration of a trade mark, in place of the language of the application, the second language indicated by the applicant may be used. In any proceedings with only one party the Office may on request of the party concerned permit derogations from the provisions in this paragraph.
- (4) If the parties and Office so agree, any official language of the Community may be used in oral proceedings.
- (5) The Office shall, if necessary, make provision at its own expense for interpretation into the language of proceedings, or, where appropriate, into its other languages, unless this interpretation is the responsibility of one of the parties to the proceedings.
- (6) Statements by staff of the Office, by parties to the proceedings and by witnesses and experts, made in one of the languages of the Office during oral proceedings shall be entered in the minutes in the language employed. Statements made in any other language shall be entered in the language of proceedings. Amendments to the text of the application for or the registration of a Community trade mark shall be entered in the minutes in the language of proceedings.

Rule 98

Certification of translations

- (1) When a translation of any document is to be filed, the Office may require the filing, within a period to be specified by it, of a certificate that the translation corresponds to the original text. Where the certificate relates to the translation of a previous application pursuant to Article 30 of the Regulation, such period shall not be less than three months after the date

of filing of the application. Where the certificate is not filed within that period, the document shall be deemed not to have been received.

- (2) The President of the Office may determine the manner in which translations are certified.

Rule 99

Legal authenticity of translations

In the absence of evidence to the contrary, the Office may assume that a translation corresponds to the relevant original text.

Part O

Organization of the Office

Rule 100

Allocation of duties

- (1) The President of the Office shall determine the examiners and their number, the members of the Opposition Divisions and Cancellation Divisions, and the members of the Administration of Trade Marks and Legal Division. He shall allocate duties to the examiners and the Divisions.
- (2) The President of the Office may provide that examiners may also be members of the Opposition Divisions, Cancellation Divisions, and the Administration of Trade Marks and Legal Division, and that members of these Divisions may also be examiners.
- (3) In addition to the responsibilities vested in them under the Regulation, the President of the Office may allocate further duties to the examiners and the members of the Opposition Divisions, Cancellation Divisions and the Administration of Trade Marks and Legal Division.
- (4) The President of the Office may entrust to other members of the staff of the Office who are not examiners or members of any of the Divisions mentioned in paragraph 1 the execution of individual duties falling to the examiners, Opposition Divisions, Cancellation Divisions or the Administration of Trade Marks and Legal Division and involving no special difficulties.

TITLE XII

RECIPROCITY

Rule 101

Publication of reciprocity

- (1) If necessary, the President of the Office shall request the Commission to enquire whether a State which is not party to the Paris Convention or to the Agreement establishing the World Trade Organization accords reciprocal treatment within the meaning of Article 5 (1) (d), Article 5 (3) and Article 29 (5) of the Regulation.
- (2) If the Commission determines that reciprocal treatment in accordance with paragraph 1 is accorded, it shall publish a communication to this effect in the Official Journal of the European Communities.
- (3) Article 5 (1) (d), Article 5 (3) and Article 29 (5) of the Regulation shall take effect for the nationals of the States concerned from the date of publication in the Official Journal of the European Communities of the communication referred to in paragraph 2, unless the communications states an earlier date from which it is applicable. They shall cease to be effective from the

date of publication in the Official Journal of the European Communities of a communication of the Commission to the effect that reciprocal treatment is no longer accorded, unless the communication states an earlier date from which it is applicable.

- (4) Communications referred to in paragraphs 2 and 3 shall also be published in the Official Journal of the Office.

Article 2

Transitional Provisions

- (1) Any application for registration of a Community trade mark filed within three months prior to the date determined pursuant to Article 143 (3) of the Regulation shall be marked by the Office with the filing date determined pursuant to that provision and with the actual date of receipt of the application.
- (2) With regard to the application, the priority period of six months provided for in Articles 29 and 33 of the Regulation shall be calculated from the date determined pursuant to Article 143 (3) of the Regulation.
- (3) The Office may issue a receipt to the applicant prior to the date determined pursuant to Article 143 (3) of the Regulation.
- (4) The Office may examine the applications prior to the date determined pursuant to Article 143 (3) of the Regulation and communicate with the applicant with a view to remedying any deficiencies prior to that date. Any decisions with regard to such applications may be taken only after that date.
- (5) With regard to the application, the Office shall not carry out any search pursuant to Article 39 (1) of the Regulation, regardless of whether or not a priority was claimed for such application pursuant to Articles 29 or 33 of the Regulation.
- (6) Where the date of receipt of an application for the registration of a Community trade mark by the Office, by the central industrial property office of a Member State or by the Benelux Trade Mark Office is before the commencement of the three months period specified in Article 143 (4) of the Regulation the application shall be deemed not to have been filed. The application shall be informed accordingly and the application shall be sent back to him.

Article 3

Entry into force

This Regulation shall enter into force on the seventh day following that of its publication in the Official Journal of the European Communities.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 13 December 1995.

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark
[1], and in particular Article 157 thereof,

Whereas:

- (1) According to Regulation (EC) No 40/94, it is necessary to adopt technical measures to implement dispositions concerning the standard form for the searches reports, division of the application and registration, revocation of decisions, authorisations, and decisions taken by a single member of the Opposition or Cancellation Division.
- (2) After 10 March 2008 the search system will remain compulsory for Community trade marks, but it should be made optional, subject to the payment of a fee, for searches in the trade mark registers of the Member States which notified their own decision to carry out a search. A standard form comprising essential elements for the search report is hereby laid out with a view to improving the quality and uniformity of such search reports.
- (3) The declaration of division and registration must comply with the elements set out in the present regulation. The new ex officio revocation of a decision or an entry in the register by the Office for Harmonization in the Internal Market (trade marks and designs) (The Office) must comply with the specific procedure as established in the present regulation. The exceptional cases where an authorisation is mandatory are specified. A list of simple cases where a decision can be taken by a single member of the Opposition or Cancellation Divisions is provided for.
- (4) Furthermore, existing rules should be amended in order to improve or clarify the procedure for registration. In addition, certain procedural points should be amended without changing the substance of the system.
- (5) In order to cover the specificities and facilities of the e-filing procedure, the following provisions are amended: Rule 1(1)(c), Rule 3(2), Rule 61, Rule 72(4), Rule 79, Rule 82, Rule 89(1) and (2).
- (6) The electronic filing and electronic publication of Community trade mark applications should facilitate the filing of trade marks in general and in particular enhance the filing of trade marks consisting of colours per se or sounds by means of a representation of the mark which is clear, precise, self-contained, easily accessible, intelligible, durable and objective. The technical conditions, in particular the data format for sound files, should be laid down by the President of the Office. E-filing of trade marks consisting of sounds can be accompanied by an electronic sound file and this file can be included in the electronic publication of the Community trade mark applications to facilitate public access to the sound itself.

- (7) The provisions concerning the opposition procedure should be reframed completely as to specify the admissibility requirements, to specify clearly the legal consequences of deficiencies and to bring the provisions in the chronological order of the proceedings.
- (8) Following the additional competence of the Office for the examination of the admissibility of conversion the refusal of a request for conversion may become partial in the sense that conversion can be acceptable for some Member States but inadmissible for others. In addition, some criteria to be used for examining absolute grounds by reference to the language of a Member State should be added.
- (9) Regarding costs to be born by the losing party in opposition and cancellation procedures, reimbursable costs of the representation should be limited but the present maximum amounts should be increased slightly in view of the time elapsed since adoption of the Implementing Regulation. Where witnesses or experts are summoned, no such maximum rate should be provided but the reimbursable costs shall comprise the actual amounts those witnesses and experts can claim.
- (10) Commission Regulation (EC) No 2868/95 [2] should therefore be amended accordingly.
- (11) The measures provided for in this Regulation are in accordance with the opinion of the Committee on Fees, Implementation Rules and the Procedure of the Boards of Appeal of the Office for Harmonization in the Internal Market (trade marks and designs),

HAS ADOPTED THIS REGULATION:

Article 1

Article 1 of Regulation (EC) No 2868/95 is amended as follows:

1. Rule 1(1) is amended as follows:

(a) point (b) is replaced by the following:

"(b) the name, address and nationality of the applicant and the State in which he is domiciled or has his seat or an establishment. Names of natural persons shall be indicated by the persons family name and given name(s). Names of legal entities, as well as bodies falling under Article 3 of the Regulation, shall be indicated by their official designation and include the legal form of the entity, which may be abbreviated in a customary manner. The telephone numbers, fax numbers, electronic mail address and details of other data communications links under which the applicant accepts to receive communications may be given. Only one address shall, in principle, be indicated for each applicant. Where several addresses are indicated, only the address mentioned first shall be taken into account, except where the applicant designates one of the addresses as an address for service;"

(b) in point (c), the following is added:

", or a reference to the list of the goods and services of a previous Community trade mark application;"

(c) point (k) is replaced by the following:

"(k) the signature of the applicant or his representative in accordance with Rule 79;"

(d) point (l) is added:

"(l) where applicable, the request of a search report referred to in Article 39(2) of the Regulation.";

2. Rule 3 is amended as follows:

(a) paragraph 2 is replaced by the following:

"2. In cases other than those referred to in paragraph 1 and save where the application is filed by electronic means, the mark shall be reproduced on a sheet of paper separate from the sheet on which the text of the application appears. The sheet on which the mark is reproduced shall not exceed DIN A4 size (29,7 cm high, 21 cm wide) and the space used for the reproduction (type-area) shall not be larger than 26,2 cm x 17 cm. A margin of at least 2,5 cm shall be left on the left-hand side. Where it is not obvious, the correct position of the mark shall be indicated by adding the word "top" to each reproduction. The reproduction of the mark shall be of such quality as to enable it to be reduced or enlarged to a size not more than 8 cm wide by 16 cm high for publication in the Community Trade Mark Bulletin.";

(b) paragraphs 5 and 6 are replaced by the following:

"5. Where registration in colour is applied for, the representation of the mark under paragraph 2 shall consist of the colour reproduction of the mark. The colours making up the mark shall also be indicated in words and a reference to a recognized colour code may be added.

6. Where registration of a sound mark is applied for, the representation of the trade mark shall consist of a graphical representation of the sound, in particular a musical notation; where the application is filed through electronic means, it may be accompanied by an electronic file containing the sound. The President of the Office shall determine the formats and maximum size of the electronic file.";

3. Rule 4 is replaced by the following:

"Rule 4

Fees for the application

The fees payable for the application shall be:

- (a) the basic fee;
- (b) a class fee for each class exceeding three to which the goods or services belong according to Rule 2;
- (c) where applicable, the search fee.";

4. The following Rule 5a is inserted:

"Rule 5a

Search report

The search reports shall be prepared using a standard form which contains at least the following information:

- (a) the name of the central industrial property offices that carried out the search;
- (b) the number of the trademark applications or registrations mentioned in the search report;
- (c) the date of application and if applicable date of priority of the trademark applications or registrations mentioned in the search report;
- (d) the date of registration of the trademarks mentioned in the search report;
- (e) the name and contact address of the holder of the trademarks applications or registrations mentioned in the search report;
- (f) a representation of the trademarks applied for or registered mentioned in the search report;

(g) an indication of the classes, according to the Nice Classification, for which the earlier national trademarks are applied for or registered or of the goods and services for which the trademarks mentioned in the search report are either applied for or registered.";

5. In Rule 6(1) the following sentence is added:

"If the previous application is a Community trade mark application, the Office shall ex officio include a copy of the previous application in the file of the Community trade mark application.";

6. Rule 8(2) is replaced by the following:

"2. Where the applicant wishes to claim the seniority of one or more earlier registered trade marks as referred to in Article 34 of the Regulation, subsequent to the filing of the application, the declaration of seniority, indicating the Member State or Member States in or for which the mark is registered, the number and the filing date of the relevant registration, and the goods and services for which the mark is registered, shall be submitted within a period of two months from the filing date. The evidence required under paragraph 1 shall be submitted to the Office within a period of three months from receipt of the declaration of seniority.";

7. Rule 10 is replaced by the following:

"Rule 10

Searches by national offices

1. If the request for a search report referred to in Article 39(2) of the Regulation is not made in the application for a Community trade mark, or if the search fee referred to in Rule 4(c) is not paid within the time limit for paying the basic application fee, the application shall not be subjected to a search by the central industrial property offices.

2. An international registration designating the European Community shall not be subjected to a search by the central industrial property offices if the request for a search report pursuant to Article 39(2) of the Regulation is not made to the Office within one month starting with the date on which the International Bureau notifies the international registration to the Office, or if the search fee is not paid within the same period.";

8. Point (c) of Rule 12 is replaced by the following:

"(c) the reproduction of the mark, together with the elements and descriptions referred to in Rule 3; where the reproduction of the mark is in colour or contains colours, the publication shall be in colour and shall indicate the colour or colours making up the mark, as well as, where applicable, the colour code indicated";

9. In Rule 13, point (c) of paragraph 1, and paragraph 2 are deleted;

10. The following Rule 13a is inserted:

"Rule 13a

Division of the application

1. A declaration of the division of the application pursuant to Article 44a of the Regulation shall contain:

(a) the file number of the application;

(b) the name and address of the applicant in accordance with Rule 1(1)(b);

(c) the list of goods and services which shall form the divisional application, or, where the division into more than one divisional application is sought, the list of goods and services for each

divisional application;

(d) the list of goods and services which shall remain in the original application.

2. Where the Office finds that the requirements laid down in paragraph 1 are not fulfilled or the list of goods and services which shall form the divisional application overlap with the goods and services which shall remain in the original application, it shall invite the applicant to remedy the deficiencies noted within such period as it may specify.

If the deficiencies are not remedied before the time limit expires, the Office shall refuse the declaration of division.

3. The periods as referred to in Article 44a(2)(b) of the Regulation during which a declaration of division of the application is not admissible shall be:

- (a) the period before a date of filing has been accorded;
- (b) the period of three months following the publication of the application provided for in Article 42(1) of the Regulation;
- (c) the period after the date of issue of the notification to pay the registration fee referred to in Rule 23(1).

4. Where the Office finds, that the declaration of division is inadmissible pursuant to Article 44a of the Regulation or pursuant to paragraph 3(a) and (b), it shall refuse the declaration of division.

5. The Office shall establish a separate file for the divisional application, which shall consist of a complete copy of the file of the original application, including the declaration of division and the correspondence relating thereto. The Office shall assign a new application number to the divisional application.

6. Where the declaration of division relates to an application which has already been published pursuant to Article 40 of the Regulation, the division shall be published in the Community Trade Marks Bulletin. The divisional application shall be published; the publication shall contain the indications and elements referred to in Rule 12. The publication does not open a new period for the filing of oppositions.";

11. Rules 15 to 20 are replaced by the following:

"Rule 15

Notice of opposition

1. A notice of opposition may be entered on the basis of one or more earlier marks within the meaning of Article 8(2) of the Regulation (earlier marks) and one and/or more other earlier rights within the meaning of Article 8(4) of the Regulation (earlier rights), provided that the earlier marks or earlier rights all belong to the same proprietor or proprietors. If an earlier mark and/or an earlier right has more than one proprietor (co-ownership), the opposition may be filed by any or all of them.

2. The notice of opposition shall contain:

- (a) the file number of the application against which opposition is entered and the name of the applicant for the Community trade mark;
- (b) a clear identification of the earlier mark or earlier right on which the opposition is based, namely:

-
- (i) where the opposition is based on an earlier mark within the meaning of Article 8(2)(a) or (b) of the Regulation or where the opposition is based on Article 8(3) of the Regulation, the indication of the file number or registration number of the earlier mark, the indication whether the earlier mark is registered or an application for registration, as well as the indication of the Member States including, where applicable, the Benelux, in or for which the earlier mark is protected, or, if applicable, the indication that it is a Community trade mark;
 - (ii) where the opposition is based on a well-known mark within the meaning of Article 8(2)(c) of the Regulation, the indication of the Member State where the mark is well-known and either the indications referred to in point (i) or a representation of the mark;
 - (iii) where the opposition is based on an earlier right within the meaning of Article 8(4), an indication of its kind or nature, a representation of the earlier right, and an indication of whether this earlier right exists in the whole Community or in one or more Member States, and if so, an indication of the Member States;
 - (c) the grounds on which the opposition is based, namely a statement to the effect that the respective requirements under Article 8(1), (3), (4) and (5) of the Regulation are fulfilled;
 - (d) the filing date and, where available, the registration date and the priority date of the earlier mark, unless it is an unregistered well-known trade mark;
 - (e) a representation of the earlier mark as registered or applied for; if the earlier mark is in colour, the representation shall be in colour;
 - (f) the goods and services on which the opposition is based;
 - (g) where the opposition is based on an earlier mark having a reputation within the meaning of Article 8(5) of the Regulation, an indication of the Member State in which, and the goods and services for which, the mark has a reputation;
 - (h) as concerns the opposing party:
 - (i) the name and address of the opposing party in accordance with Rule 1(1)(b);
 - (ii) where the opposing party has appointed a representative, the name and business address of the representative in accordance with Rule 1(1)(e);
 - (iii) where the opposition is entered by a licensee or by a person who is entitled under the relevant national law to exercise an earlier right, a statement to that effect and indications concerning the authorisation or entitlement to file the opposition.

3. The notice of opposition may contain:

- (a) an indication of the goods and services against which the opposition is directed; in the absence of such an indication the opposition shall be considered to be directed against all of the goods and services of the opposed Community trade mark application;
- (b) a reasoned statement setting out the main facts and arguments on which the opposition relies, and evidence to support the opposition.

4. Where the opposition is based on more than one earlier mark or earlier right, paragraphs 2 and 3 shall apply for each of these rights.

Rule 16

Use of languages in the notice of opposition

1. The time limit referred to in Article 115(6) of the Regulation within which the opposing party

has to file a translation of his opposition shall be one month from the expiry of the opposition period.

2. Where the opposing party or the applicant, before the date on which the opposition proceedings are deemed to commence pursuant to Rule 18(1), informs the Office that the applicant and the opposing party have agreed on a different language for the opposition proceedings pursuant to Article 115(7) of the Regulation, the opposing party shall, where the notice of opposition has not been filed in that language, file a translation of the notice of opposition in that language within a period of one month from the said date. Where the translation is not filed or filed late, the language of the proceedings shall remain unchanged.

Rule 16a

Information of the applicant

Any notice of opposition and any document submitted by the opposing party, as well as any communication addressed to one of the parties by the Office prior to the expiry of the period referred to in Rule 18 shall be sent by the Office to the other party for purposes of informing of the introduction of an opposition.

Rule 17

Examination of admissibility

1. If the opposition fee has not been paid within the opposition period, the opposition shall be deemed not to have been entered. If the opposition fee has been paid after the expiry of the opposition period, it shall be refunded to the opposing party.

2. If the notice of opposition has not been filed within the opposition period, or if the notice of opposition does not clearly identify the application against which opposition is entered or the earlier mark or the earlier right on which the opposition is based in accordance with Rule 15(2)(a) and (b), or does not contain grounds for opposition in accordance with Rule 15(2)(c), and if those deficiencies have not been remedied before the expiry of the opposition period, the Office shall reject the opposition as inadmissible.

3. Where the opposing party does not submit a translation as required under Rule 16(1), the opposition shall be rejected as inadmissible. Where the opposing party submits an incomplete translation, the part of the notice of opposition that has not been translated shall not be taken into account in the examination of admissibility.

4. If the notice of opposition does not comply with the other provisions of Rule 15, the Office shall inform the opposing party accordingly and shall invite him to remedy the deficiencies noted within a period of two months. If the deficiencies are not remedied before the time limit expires, the Office shall reject the opposition as inadmissible.

5. Any finding pursuant to paragraph 1 that the notice of opposition is deemed not to have been entered and any decision to reject an opposition as inadmissible under paragraphs 2, 3 and 4 shall be notified to the applicant.

Rule 18

Commencement of opposition proceedings

1. When the opposition is found admissible pursuant to Rule 17, the Office shall send a communication to the parties informing them that the opposition proceedings shall be deemed to commence two months after receipt of the communication. This period may be extended up to a total of 24 months if both parties submit requests for such an extension before the period expires.

2. If, within the period referred to in paragraph 1, the application is withdrawn or restricted

to goods and services against which the opposition is not directed, or the Office is informed about a settlement between the parties, or the application is rejected in parallel proceedings, the opposition proceedings shall be closed.

3. If, within the period referred to in paragraph 1, the applicant restricts the application by deleting some of the goods and services against which the opposition is directed, the Office shall invite the opposing party to state, within such a period as it may specify, whether he maintains the opposition, and if so, against which of the remaining goods and services. If the opposing party withdraws the opposition in view of the restriction the opposition proceedings shall be closed.

4. If before expiry of the period referred to in paragraph 1 the opposition proceedings are closed pursuant to paragraphs 2 or 3, no decision on costs shall be taken.

5. If before expiry of the period referred to in paragraph 1 the opposition proceedings are closed following a withdrawal or restriction of the application or pursuant to paragraph 3, the opposition fee shall be refunded.

Rule 19

Substantiation of the opposition

1. The Office shall give the opposing party the opportunity to present the facts, evidence and arguments in support of his opposition or to complete any facts, evidence or arguments that have already been submitted pursuant to Rule 15(3), within a time limit specified by it and which shall be at least 2 months starting on the date on which the opposition proceedings shall be deemed to commence in accordance with Rule 18(1).

2. Within the period referred to in paragraph 1, the opposing party shall also file proof of the existence, validity and scope of protection of his earlier mark or earlier right, as well as evidence proving his entitlement to file the opposition. In particular, the opposing party shall provide the following evidence:

- (a) if the opposition is based on a trade mark which is not a Community trade mark, evidence of its filing or registration, by submitting:
 - (i) if the trade mark is not yet registered, a copy of the relevant filing certificate or an equivalent document emanating from the administration with which the trade mark application was filed; or
 - (ii) if the trade mark is registered, a copy of the relevant registration certificate and, as the case may be, of the latest renewal certificate, showing that the term of protection of the trade mark extends beyond the time limit referred to in paragraph 1 and any extension thereof, or equivalent documents emanating from the administration by which the trade mark was registered;
- (b) if the opposition is based on a well-known mark within the meaning of Article 8(2)(c) of the Regulation, evidence showing that this mark is well-known in the relevant territory;
- (c) if the opposition is based on a mark with reputation within the meaning of Article 8(5) of the Regulation, in addition to the evidence referred to in point (a) of this paragraph, evidence showing that the mark has a reputation, as well as evidence or arguments showing that use without due cause of the trade mark applied for would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the earlier trade mark;
- (d) if the opposition is based on an earlier right within the meaning of Article 8(4) of the Regulation, evidence of its acquisition, continued existence and scope of protection of that right;
- (e) if the opposition is based on Article 8(3) of the Regulation, evidence of the opposing party's proprietorship and of the nature of his relationship with the agent or representative.

3. The information and evidence referred to in paragraphs 1 and 2 shall be in the language of the proceedings or accompanied by a translation. The translation shall be submitted within the time limit specified for submitting the original document.

4. The Office shall not take into account written submissions or documents, or parts thereof, that have not been submitted, or that have not been translated into the language of the proceedings, within the time limit set by the Office.

Rule 20

Examination of the opposition

1. If until expiry of the period referred to in Rule 19(1) the opposing party has not proven the existence, validity and scope of protection of his earlier mark or earlier right, as well his entitlement to file the opposition, the opposition shall be rejected as unfounded.

2. If the opposition is not rejected pursuant to paragraph 1, the Office shall communicate the submission of the opposing party to the applicant and shall invite him to file his observations within a period specified by the Office.

3. If the applicant submits no observations, the Office shall base its ruling on the opposition on the evidence before it.

4. The observations submitted by the applicant shall be communicated to the opposing party who shall be invited by the Office, if it considers it necessary to do so, to reply within a period specified by the Office.

5. Rule 18(2) and (3) shall apply mutatis mutandis after the date on which the opposition proceedings are deemed to commence.

6. In appropriate cases, the Office may invite the parties to limit their observations to particular issues, in which case it shall allow the party to raise the other issues at a later stage of the proceedings. In no case shall the Office be required to inform the parties which facts or evidence could be or have not been submitted.

7. The Office may suspend opposition proceedings:

- (a) where the opposition is based on an application for registration pursuant to Article 8(2)(b) of the Regulation until a final decision is taken in that proceeding;
- (b) where the opposition is based on an application for registration for a geographical indication or designation of origin under Council Regulation (EEC) No 2081/92 [3] until a final decision is taken in that proceeding; or
- (c) where a suspension is appropriate under the circumstances.

12. Rule 22 is replaced by the following:

"Rule 22

Proof of use

1. A request for proof of use pursuant to Article 43(2) or (3) of the Regulation shall be admissible only if the applicant submits such a request within the period specified by the Office pursuant to Rule 20(2).

2. Where the opposing party has to furnish proof of use or show that there are proper reasons for non-use, the Office shall invite him to provide the proof required within such period as it shall specify. If the opposing party does not provide such proof before the time limit expires, the Office

shall reject the opposition.

3. The indications and evidence for the furnishing of proof of use shall consist of indications concerning the place, time, extent and nature of use of the opposing trade mark for the goods and services in respect of which it is registered and on which the opposition is based, and evidence in support of these indications in accordance with paragraph 4.

4. The evidence shall be filed in accordance with Rules 79 and 79a and shall, in principle, be confined to the submission of supporting documents and items such as packages, labels, price lists, catalogues, invoices, photographs, newspaper advertisements, and statements in writing as referred to in Article 76(1)(f) of the Regulation.

5. A request for proof of use may be made with or without submitting at the same time observations on the grounds on which the opposition is based. Such observations may be filed together with the observations in reply to the proof of use.

6. Where the evidence supplied by the opposing party is not in the language of the opposition proceedings, the Office may require the opposing party to submit a translation of that evidence in that language, within a period specified by the Office."

13. Rule 24(2) is replaced by the following:

"2. The Office shall provide certified or uncertified copies of the certificate of registration, upon payment of a fee.";

14. In Rule 25(1) point (c) is deleted;

15. The following Rule 25a is inserted:

"Rule 25a

Division of a registration

1. A declaration of the division of a registration pursuant to Article 48a of the Regulation shall contain:

- (a) the registration number;
- (b) the name and address of the proprietor of the trade mark in accordance with Rule 1(1)(b);
- (c) the list of goods and services which shall form the divisional registration, or, where the division into more than one divisional registration is sought, the list of goods and services for each divisional registration;
- (d) the list of goods and services which shall remain in the original registration.

2. Where the Office finds that the requirements laid down in paragraph 1 are not fulfilled or the list of goods and services which shall form the divisional registration overlap with the goods and services which shall remain in the original registration, it shall invite the applicant to remedy the deficiencies noted within such period as it may specify.

If the deficiencies are not remedied before the time limit expires, the Office shall refuse the declaration of division.

3. Where the Office finds, that the declaration of division is inadmissible pursuant to Article 48a of the Regulation, it shall refuse the declaration of division.

4. The Office shall establish a separate file for the divisional registration, which shall consist of a complete copy of the file of the original registration, including the declaration of division and the correspondence relating thereto. The Office shall assign a new registration number to the

divisional registration.";

16. In Rule 26(2), point (d) is deleted;

17. Rule 28(1) is amended as follows:

(a) point (c) is deleted;

(b) point (d) is replaced by the following:

"(d) an indication of the Member State or Member States in or for which the earlier mark is registered, the number and the filing date of the relevant registration, and the goods and services for which the earlier mark is registered;"

18. Rule 30 is replaced by the following:

"Rule 30

Renewal of registration

1. An application for renewal shall contain:

(a) the name of the person requesting renewal;

(b) the registration number of the Community trade mark to be renewed;

(c) if the renewal is requested for only part of the goods and services for which the mark is registered, an indication of those classes or those goods and services for which renewal is requested or those classes or those goods and services for which renewal is not requested, grouped according to the classes of the Nice classification, each group being preceded by the number of the class of that classification to which that group of goods or services belongs and presented in the order of the classes of that classification.

2. The fees payable under Article 47 of the Regulation for the renewal of a Community trade mark shall consist of the following:

(a) a basic fee;

(b) a class fee for each class exceeding three in respect of which renewal is applied for; and

(c) where applicable, the additional fee for late payment of the renewal fee or late submission of the request for renewal, pursuant to Article 47(3) of the Regulation, as specified in the Fees Regulation.

3. It shall be deemed to constitute a request for renewal if the payment referred to in paragraph 2 is made by a means of payment referred to in Article 5(1) of the Fees Regulation, provided that it contains all the indications required under paragraph 1 (a) and (b) of this Rule and Article 7(1) of the Fees Regulation.

4. Where the application for renewal is filed within the periods provided for in Article 47(3) of the Regulation, but the other conditions governing renewal provided for in Article 47 of the Regulation and these Rules are not satisfied, the Office shall inform the applicant of the deficiencies found.

5. Where an application for renewal is not submitted or is submitted after expiry of the period provided for in the third sentence of Article 47(3) of the Regulation, or where the fees are not paid or are paid only after the period in question has expired, or where the deficiencies are not remedied within that period, the Office shall determine that the registration has expired and shall so notify the proprietor of the Community trade mark.

Where the fees paid are insufficient to cover all the classes of goods and services for which renewal is requested, such a determination shall not be made if it is clear which class or classes are to be covered. In the absence of other criteria, the Office shall take the classes into account in the order of classification.

6. Where the determination made pursuant to paragraph 5 has become final, the Office shall cancel the mark from the register. The cancellation shall take effect from the day following the day on which the existing registration expired.

7. Where the renewal fees provided for in paragraph 2 have been paid but the registration is not renewed, those fees shall be refunded.

8. A single application for renewal may be submitted for two or more marks, upon payment of the required fees for each of the marks, provided that the proprietors or the representatives are the same in each case.";

19. Rule 31(3) and (4) is deleted;

20. Rule 32(4) is replaced by the following:

"4. The Office shall establish a separate file for the new registration, which shall consist of a complete copy of the file of the original registration, including the application for registration of the partial transfer and the correspondence relating thereto. The Office shall assign a new registration number to the new registration.";

21. Rule 33 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. Rule 31(1), (2), (5) and (7) shall apply mutatis mutandis to the registration of a licence, of a transfer of a licence, of a right in rem, of a transfer of a right in rem, of an enforcement measure or of insolvency proceedings, subject to the following:

(a) Rule 31(1)(c) shall not apply in respect of a request for registration of a right in rem, of a levy of execution or of insolvency proceedings;

(b) Rule 31(1)(d) and (5) shall not apply where the request was made by the proprietor of the Community trade mark.";

(b) paragraph 2 is replaced by the following:

"2. The application for registration of a licence, a transfer of a licence, a right in rem, a transfer of a right in rem or an enforcement measure shall not be deemed to have been filed until the required fee has been paid.";

(c) in paragraph 3, "Articles 19, 20 or 22" is replaced by "Articles 19 to 22" and "in paragraphs 1 and 2 above," is replaced by "in paragraph 1 of this Rule and in Rule 34(2)".

(d) paragraph 4 is replaced by the following:

"4. Paragraphs 1 and 3 shall apply mutatis mutandis to applications for Community trade marks. Licences, rights in rem, insolvency proceedings and enforcement measures shall be recorded in the files kept by the Office concerning the Community trade mark application.";

22. Rule 34 is replaced by the following:

"Rule 34

Special provisions for the registration of a licence

1. The application for registration of a licence may contain a request to record the licence in the Register as one or more of the following:

- (a) an exclusive licence;
- (b) a sub-licence in case where the licence is granted by a licensee whose licence is recorded in the Register;
- (c) a licence limited to only a part of the goods or services for which the mark is registered;
- (d) a licence limited to part of the Community;
- (e) a temporary licence.

2. Where a request is made to record the licence as a licence pursuant to paragraph 1(c), (d) and (e), the application for registration of a licence shall indicate the goods and services and the part of the Community and the time period for which the licence is granted.";

23. Rule 35(3) is replaced by the following:

"3. The application for cancellation of a licence, a right in rem or an enforcement measure shall not be deemed to have been filed until the required fee has been paid.";

24. Point (c) of Rule 36(1) is deleted;

25. Rule 38 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. The time limit referred to in Article 115(6) of the Regulation within which the applicant for revocation or a declaration of invalidity has to file a translation of his application shall be one month, starting with the date of the filing of his application, failing which the application shall be rejected as inadmissible.";

(b) in paragraph 3, the following sentence is added:

"Where the translation is not filed or filed late, the language of the proceedings shall remain unchanged.";

26. Rule 39 is replaced by the following:

"Rule 39

Rejection of the application for revocation or for declaration of invalidity as inadmissible

1. Where the Office finds that the required fee has not been paid, it shall invite the applicant to pay the fee within a period specified by it. If the required fee is not paid within the period specified by the Office, the Office shall inform the applicant that the application for revocation or for declaration of invalidity is deemed not to have been filed. If the fee has been paid after expiry of the period specified, it shall be refunded to the applicant.

2. Where the translation required under Rule 38(1) is not filed within the prescribed period, the Office shall reject the application for revocation or for declaration of invalidity as inadmissible.

3. If the Office finds that the application does not comply with Rule 37, it shall invite the applicant to remedy the deficiencies found within such period as it may specify. If the deficiencies are not remedied before expiry of the time limit, the Office shall reject the application as inadmissible.

4. Any decision to reject an application for revocation or declaration of invalidity under paragraph 2 or 3 shall be communicated to the applicant and the proprietor of the Community trade mark.";

27. Rule 40 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. Every application for revocation or for declaration of invalidity which is deemed to have been filed shall be notified to the proprietor of the Community trade mark. When the Office has found the application admissible, it shall invite the proprietor of the Community trade mark to file his observations within such period as it may specify."

(b) paragraph 4 is replaced by the following:

"4. Save where Rule 69 otherwise provides or allows, all observations filed by the parties shall be sent to the other party concerned.";

(c) paragraph 5 is replaced by the following:

"5. In the case of an application for revocation based on Article 50(1)(a) of the Regulation, the Office shall invite the proprietor of the Community trade mark to furnish proof of genuine use of the mark, within such period as it may specify. If the proof is not provided within the time limit set, the Community trade mark shall be revoked. Rule 22(2), (3) and (4) shall apply *mutatis mutandis*.";

(d) a new paragraph 6 is added:

"6. If the applicant has to furnish proof of use or proof that there are proper reasons for non-use under Article 56(2) or (3) of the Regulation, the Office shall invite the applicant to furnish proof of genuine use of the mark, within such period as it may specify. If the proof is not provided within the time limit set, the application for declaration of invalidity shall be rejected. Rule 22(2), (3) and (4) shall apply *mutatis mutandis*.";

28. Rules 44 and 45 are replaced by the following:

"Rule 44

Application for conversion

1. An application for conversion of a Community trade mark application or a registered Community trade mark into a national trade mark application pursuant to Article 108 of the Regulation shall contain:

- (a) the name and the address of the applicant for conversion in accordance with Rule 1(1)(b);
- (b) the filing number of the Community trade mark application or the registration number of the Community trade mark;
- (c) the indication of the ground for conversion in accordance with Article 108(1)(a) or (b) of the Regulation;
- (d) the specification of the Member State or the Member States in respect of which conversion is requested;
- (e) where the request does not relate to all of the goods and services for which the application has been filed or for which the trade mark has been registered, the application shall contain an indication of the goods and services for which conversion is requested, and, where conversion is requested in respect of more than one Member State and the list of goods and services is not the same for all Member States, an indication of the respective goods and services for each Member State;
- (f) where conversion is requested pursuant to Article 108(6) of the Regulation, the application shall contain the indication of the date on which the decision of the national court has become final, and a copy of that decision; that copy may be submitted in the language in which the decision

was given.

2. The application for conversion shall be filed within the relevant period pursuant to Article 108(4), (5) or (6) of the Regulation. Where conversion is requested following a failure to renew the registration, the period of three months provided for in Article 108(5) of the Regulation shall begin to run on the day following the last day on which the request for renewal can be presented pursuant to Article 47(3) of the Regulation.

Rule 45

Examination of application for conversion

1. Where the application for conversion does not comply with the requirements of Article 108(1) or (2) of the Regulation or has not been filed within the relevant period of three months or does not comply with Rule 44 or other Rules, the Office shall notify the applicant accordingly and specify a period within which he may amend the application or furnish any missing information or indications.

2. Where the conversion fee has not been paid within the relevant period of three months, the Office shall inform the applicant that the application for conversion is deemed not to have been filed.

3. Where the missing indications have not been furnished within the period specified by the Office, the Office shall reject the application for conversion.

Where Article 108(2) of the Regulation applies, the Office shall reject the application for conversion as inadmissible only with respect to those Member States for which conversion is excluded under that provision.

4. If the Office or a Community trade mark court has refused the Community trade mark application or has declared the Community trade mark invalid on absolute grounds by reference to the language of a Member State, conversion shall be excluded under Article 108(2) of the Regulation for all the Member States in which that language is one of the official languages. If the Office or a Community trade mark court has refused the Community trade mark application or has declared the Community trade mark invalid on absolute grounds which are found to apply in the whole Community or on account of an earlier Community trade mark or other Community industrial property right, conversion is excluded under Article 108(2) of the Regulation for all Member States.";

29. Rule 47 is replaced by the following:

"Rule 47

Transmission to central industrial property offices of the Member States

Where the application for conversion complies with the requirements of the Regulation and these Rules, the Office shall transmit the application for conversion and the data referred to in Rule 84(2), to the central industrial property offices of the Member States, including the Benelux Trade Mark Office, for which the application has been found admissible. The Office shall inform the applicant of the date of transmission.";

30. In Rule 50(1) the following is added:

"In particular, when the appeal is directed against a decision taken in opposition proceedings, Article 78a of the Regulation shall not be applicable to the time limits fixed pursuant to Article 61(2) of the Regulation.

Where the appeal is directed against a decision of an Opposition Division, the Board shall limit its examination of the appeal to facts and evidence presented within the time limits set in or specified by the Opposition Division in accordance with the Regulation and these Rules, unless the Board

considers that additional or supplementary facts and evidence should be taken into account pursuant to Article 74(2) of the Regulation.";

31. Rule 51 is replaced by the following:

"Rule 51

Reimbursement of appeal fees

The appeal fee shall only be reimbursed by order of either of the following:

- (a) the department whose decision has been impugned, where it grants revision pursuant to Article 60(1) or Article 60a of the Regulation;
- (b) the Board of Appeal, where it allows the appeal and considers such reimbursement equitable by reason of a substantial procedural violation.";

32. Rule 53 is replaced by the following:

"Rule 53

Correction of errors in decisions

Where the Office becomes aware, of its own motion or at the instance of a party to the proceedings, of a linguistic error, error of transcription or obvious mistake in a decision, it shall ensure that error or mistake is corrected by the department or division responsible."

33. The following Rule 53a is inserted:

"Rule 53a

Revocation of a decision or entry in the Register

1. Where the Office finds of its own motion or pursuant to corresponding information by the parties to the proceedings that a decision or entry in the Register is subject to revocation pursuant to Article 77a of the Regulation, it shall inform the party affected about the intended revocation.
2. The affected party may submit observations on the intended revocation within a period specified by the Office.
3. Where the affected party agrees to the intended revocation or where he does not submit any observations within the period, the Office shall revoke the decision or entry. If the affected party does not agree to the revocation, the Office shall take a decision on the revocation.
4. Paragraphs 1, 2 and 3 shall apply mutatis mutandis if the revocation is likely to affect more than one party. In these cases the observations submitted by one of the parties pursuant to paragraph 3 shall always be communicated to the other party or parties with an invitation to submit observations.
5. Where the revocation of a decision or an entry in the Register affects a decision or entry that has been published, the revocation shall also be published.
6. Competence for revocation under paragraphs 1 to 4 shall lie with the department or unit which took the decision.";

34. Rule 59(4) is replaced by the following:

"4. The amounts and the advances for expenses to be paid pursuant to paragraphs 1, 2 and 3 shall be determined by the President of the Office and shall be published in the Official Journal of the Office. The amounts shall be calculated on the same basis as laid in the Staff Regulations of the Officials of the European Communities and Annex VII thereto.";

35. Rule 60 is replaced by the following:

"Rule 60

Minutes of oral proceedings

1. Minutes of oral proceedings or the taking of evidence shall be drawn up, containing:

- (a) the date of the proceedings;
- (b) the names of the competent officials of the Office, the parties, their representatives, and of the witnesses and experts who are present;
- (c) the applications and requests made by the parties;
- (d) the means of giving or obtaining evidence;
- (e) where applicable, the orders or the decision issued by the Office.

2. The minutes shall become part of the file of the relevant Community trade mark application or registration. The parties shall be provided with a copy of the minutes.

3. Where witnesses, experts or parties are heard in accordance with Article 76(1)(a) or (d) of the Regulation or Rule 59(2), their statements shall be recorded.";

36. Rule 61 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. In proceedings before the Office, notifications to be made by the Office shall take the form of transmitting the original document, an uncertified copy thereof or a computer print-out in accordance with Rule 55, or, as concerns documents emanating from the parties themselves, duplicates or uncertified copies.";

(b) the following paragraph 3 is added:

"3. Where the addressee has indicated his telecopier number or contact details for communicating with him through other technical means, the Office shall have the choice between any of these means of notification and notification by post.";

37. Rule 62 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. Decisions subject to a time limit for appeal, summonses and other documents as determined by the President of the Office shall be notified by registered letter with advice of delivery. All other notifications shall be by ordinary mail.";

(b) the second sentence of paragraph 2 is deleted;

(c) paragraph 5 is replaced by the following:

"5. Notification by ordinary mail shall be deemed to have been effected on the tenth day following that of its posting.";

38. In Rule 65(1), the second sentence is replaced by the following:

"Notification shall be deemed to have been taken place on the date on which the communication was received by the telecopying device of the recipient.";

39. Rule 66(1) is replaced by the following:

"1. If the address of the addressee cannot be established or if after at least one attempt, notification in accordance with Rule 62 has proved impossible, notification shall be effected by public notice.";

40. Rule 72(2) is replaced by the following:

"2. If a time limit expires on a day on which there is a general interruption in the delivery of mail in the Member State where the Office is located, or, if and to the extent that the President of the Office has allowed communications to be sent by electronic means pursuant to Rule 82, on which there is an actual interruption of the Office's connection to these electronic means of communication, the time limit shall extend until the first day following that interruption on which the Office is open for the receipt of documents and on which ordinary mail is delivered. The duration of the period of interruption shall be determined by the President of the Office.";

41. Rule 72(4) is replaced by the following:

"4. If an exceptional occurrence such as a natural disaster or strike interrupts or dislocates proper communication from the parties to the proceedings to the Office or vice versa, the President of the Office may determine that for parties of the proceedings having their residence or registered office in the State concerned or who have appointed a representative with a place of business in the State concerned, all time limits that otherwise would expire on or after the date of commencement of such occurrence, as determined by him, shall extend until a date to be determined by him. If the occurrence affects the seat of the Office, such determination of the President shall specify that it applies in respect of all parties to the proceedings.";

42. Rule 76 is amended as follows:

(a) paragraphs 1 to 4 are replaced by the following:

"1. Legal practitioners and professional representatives entered on the list maintained by the Office pursuant to Article 89(2) of the Regulation shall file with the Office a signed authorisation for insertion in the files only if the Office expressly requires it, or where there are several parties to the proceedings in which the representative acts before the Office, if the other party expressly asks for it.

2. Employees acting on behalf of natural or legal persons pursuant to Article 88(3) of the Regulation shall file with the Office a signed authorisation for insertion in the files.

3. The authorisation may be filed in any official language of the Community. It may cover one or more applications or registered trade marks or may be in the form of a general authorisation authorising the representative to act in respect of all proceedings before the Office to which the person giving the authorisation is a party.

4. Where it is required, pursuant to paragraphs 1 or 2, that a signed authorisation be filed, the Office shall specify a time limit within which such authorisation shall be filed. If the authorisation is not filed in due time, proceedings shall be continued with the represented person. Any procedural steps other than the filing of the application taken by the representative shall be deemed not to have been taken if the represented person does not approve them within a period specified by the Office. The application of Article 88(2) of the Regulation shall remain unaffected.";

(b) paragraphs 8 and 9 are replaced by the following:

"8. Where the appointment of a representative is communicated to the Office, the name and the business address of the representative shall be indicated in accordance with Rule 1(1)(e). Where a representative acts before the Office who has already been appointed, he shall indicate his name and preferably the identification number attributed to him by the Office. Where several representatives are appointed by the same party, they may, notwithstanding any provisions to the contrary in their authorisations, act either jointly or singly.

9. The appointment or authorisation of an association of representatives shall be deemed to be

an appointment or authorisation of any representative who practices within that association.";

43. Rule 79 is amended as follows:

(a) points (a) and (b) are replaced by the following:

"(a) by submitting a signed original of the document in question at the Office, such as by post, personal delivery, or by any other means;

(b) by transmitting a document by telecopier in accordance with Rule 80;"

(b) point (c) is deleted;

44. The following Rule 79a is inserted:

"Rule 79a

Annexes to written communications

Where a document or an item of evidence is submitted in accordance with Rule 79 point (a) by a party in a proceeding before the Office involving more than one party to the proceedings, the document or item of evidence, as well as any annex to the document, shall be submitted in as many copies as the number of parties to the proceedings."

45. Rule 80 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. Where an application for a Community trade mark is submitted to the Office by telecopier and the application contains a reproduction of the mark pursuant to Rule 3(2) which does not satisfy the requirements of that Rule, the required reproduction suitable for publication shall be submitted to the Office in accordance with Rule 79(a). Where the reproduction is received by the Office within a period of one month from the date of receipt of the telecopy, the reproduction shall be deemed to have been received by the Office on the date on which the telecopy was received.";

(b) in paragraph 3, the following sentence is added:

"Where the communication has been sent by telecopier electronically, the indication of the name of the sender shall be equivalent to the signature.";

(c) paragraph 4 is deleted;

46. Rule 81 is deleted;

47. Rule 82 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. The President of the Office shall determine whether, to what extent and under what technical conditions communications may be sent to the Office by electronic means.";

(b) paragraph 4 is deleted;

48. Rule 83 is replaced by the following:

"Rule 83

Forms

1. The Office shall make available to the public free of charge forms for the purposes of:

(a) filing an application for a Community trade mark, including where appropriate a request for the search report;

- (b) entering an opposition;
- (c) applying for revocation or declaration of invalidity;
- (d) applying for the registration of a transfer and the transfer form and transfer document provided for in Rule 31(5);
- (e) applying for the registration of a licence;
- (f) applying for the renewal of a Community trade mark;
- (g) making an appeal;
- (h) authorising a representative, in the form of an individual authorisation or a general authorisation;
- (i) submitting an international application or a subsequent designation under the Madrid Protocol to the Office.

2. Parties to the proceedings before the Office may also use

- (a) forms established under the Trademark Law Treaty or pursuant to recommendations of the Assembly of the Paris Union for the Protection of Industrial Property;
- (b) with the exception of the form referred to in point (i) of paragraph 1, forms with the same content and format.

3. The Office shall make available the forms referred to in paragraph 1 in all the official languages for the Community.";

49. Rule 84 is amended as follows:

- (a) in Paragraph 2 point (d) is replaced by the following:

"(d) the name and address of the applicant;"

- (b) paragraph 3 is amended as follows:

- (i) point (i) is replaced by the following:

"(i) levy of execution pursuant to Article 20 of the Regulation and insolvency proceedings pursuant to Article 21 of the Regulation;"

- (ii) the following points (w) and (x) are added:

"(w) the division of a registration pursuant to Article 48a of the Regulation and Rule 25a, together with the items referred to in paragraph 2 in respect of the divisional registration, as well as the list of goods and services of the original registration as amended;

- (x) the revocation of a decision or an entry in the Register pursuant to Article 77a of the Regulation, where the revocation concerns a decision or entry which has been published.";

50. Rule 85(1) is replaced by the following:

"1. The Community Trade Marks Bulletin shall be published in the manner and frequency determined by the President of the Office.";

51. Rule 89(1) and (2) is replaced by the following:

"1. Inspection of the files of Community trade mark applications and of registered Community trade marks shall either be of the original document, or of copies thereof, or of technical means of storage if the files are stored in this way. The means of inspection shall be determined by the President of the Office.

Where inspection takes place as provided for in paragraphs 3, 4 and 5, the request for inspection of the files shall not be deemed to have been made until the required fee has been paid. No fee is payable if inspection of technical means of storage takes place online.

2. Where inspection of the files of a Community trade mark application which has not yet been published pursuant to Article 40 of the Regulation is requested, the request shall contain an indication and evidence to the effect that the applicant has consented to the inspection or has stated that after the trade mark has been registered he will invoke the rights under it against the party requesting the inspection.";

52. Rule 91 is replaced by the following:

"Rule 91

Keeping of files

1. The President of the Office shall determine the form in which the files shall be kept.

2. Where files are kept electronically, these electronic files, or back-up copies thereof, shall be kept without time limitation. The original documents filed by parties to the proceedings which form the basis of such electronic files shall be disposed of after a period following their reception by the Office, which shall be determined by the President of the Office.

3. Where and to the extent that files or parts of the files are kept in any other form than electronically, documents or items of evidence constituting part of such files shall be kept for at least five years from the end of the year in which any of the following occurrences takes place:

- (a) the application is rejected or withdrawn or is deemed to be withdrawn;
- (b) the registration of the Community trade mark expires completely pursuant to Article 47 of the Regulation;
- (c) the complete surrender of the Community trade mark is registered pursuant to Article 49 of the Regulation;
- (d) the Community trade mark is completely removed from the Register pursuant to Article 56(6) or Article 96(6) of the Regulation.";

53. Rule 94 is amended as follows:

(a) paragraph 3 is replaced by the following:

"3. Where the amount of the costs has not been fixed pursuant to Article 81(6), first sentence, of the Regulation, the request for the fixing of costs shall be accompanied by a bill and supporting evidence. For the costs of representation referred to in paragraph 7(d) of this Rule, an assurance by the representative that the costs have been incurred shall be sufficient. For other costs, it shall be sufficient if their plausibility is established. Where the amount of the costs is fixed pursuant to Article 81(6), first sentence, of the Regulation, representation costs shall be awarded at the level laid down in paragraph 7(d) of this Rule and irrespective of whether they have been actually incurred.";

(b) in paragraph 4, the words "the second sentence of Article 81(6)" are replaced by "the third sentence of Article 81(6)";

(c) paragraph 7 is replaced by the following:

"7. Subject to paragraph 3 of this Rule, costs essential to the proceedings and actually incurred by the successful party shall be borne by the losing party in accordance with Article 81(1) of the Regulation on the basis of the following maximum rates:

-
- (a) where the party is not represented by a representative, travel and subsistence expenses of one party for one person for the outward and return journey between the place of residence or the place of business and the place where oral proceedings are held pursuant to Rule 56, as follows:
- (i) the cost of the first-class rail-fare including usual transport supplements where the total distance by rail does not exceed 800 km;
 - (ii) the cost of the tourist-class air-fare where the total distance by rail exceeds 800 km or the route includes a sea-crossing;
 - (iii) subsistence expenses as laid down in Article 13 of Annex VII to the Staff Regulations of Officials of the European Communities;
- (b) travel expenses of representatives within the meaning of Article 89(1) of the Regulation, at the rates provided for in point (a)(i) and (ii) of this Rule;
- (c) travel expenses, subsistence expenses, compensation for loss of earnings and fees to which witnesses and experts are entitled to be reimbursed pursuant to Rule 59(2), (3) or (4), to the extent that final liability lies with a party to the proceedings pursuant to Rule 59(5)(b);
- (d) cost of representation, within the meaning of Article 89(1) of the Regulation,
- (i) of the opposing party in opposition proceedings:
EUR 300;
 - (ii) of the applicant in opposition proceedings:
EUR 300;
 - (iii) of the applicant in proceedings relating to revocation or invalidity of a Community trade mark:
EUR 450;
 - (iv) of the proprietor of the trade mark in proceedings relating to revocation or invalidity of a Community trade mark:
EUR 450;
 - (v) of the appellant in appeal proceedings:
EUR 550;
 - (vi) of the defendant in appeal proceedings:
EUR 550;
- (vii) where an oral proceedings have taken place to which the parties have been summoned pursuant to Rule 56, the amount referred to in the points (i) to (vi) shall be incremented by EUR 400;
- (e) where there are several applicants or proprietors of the Community trade mark application or registration or where there are several opposing parties or applicants for revocation or declaration of invalidity who have filed the opposition or application for revocation or declaration of invalidity jointly, the losing party shall bear the costs referred to in point (a) for one such person only;
- (f) where the successful party is represented by more than one representative within the meaning of Article 89(1) of the Regulation, the losing party shall bear the costs referred to in points (b) and (d) of this Rule for one such person only;
- (g) the losing party shall not be obliged to reimburse the successful party for any costs, expenses and fees other than those referred to in points (a) to (f).";

54. Rule 98 is replaced by the following:

"Rule 98

Translations

1. When a translation of a document is to be filed, the translation shall identify the document to which it refers and reproduce the structure and contents of the original document. The Office may require the filing, within a period to be specified by it, of a certificate that the translation corresponds to the original text. The President of the Office shall determine the manner in which translations shall be certified.

2. Save where the Regulation or these Rules provide otherwise, a document for which a translation is to be filed shall be deemed not to have been received by the Office

- (a) where the translation is received by the Office after expiry of the relevant period for submitting the original document or the translation;
- (b) in the case of paragraph 1, where the certificate is not filed within the period specified.";

55. Rule 100 is replaced by the following:

"Rule 100

Decisions taken by a single member

The cases in which pursuant to Article 127(2), or Article 129(2), of the Regulation a single member of the Opposition Division or of the Cancellation Division may take a decision shall be the following:

- (a) decisions on the apportionment of costs;
- (b) decisions to fix the amount of the costs to be paid pursuant to Article 81(6), first sentence, of the Regulation;
- (c) decisions to close the file or not to proceed to judgment;
- (d) decisions to reject an opposition as inadmissible before expiry of the period referred to in Rule 18(1);
- (e) decisions to stay proceedings;
- (f) decisions to join or separate multiple oppositions pursuant to Rule 21(1).";

56. Paragraphs 1, 2 and 3 of Rule 101 are replaced by the following:

"1. If necessary, the President of the Office shall request the Commission to enquire whether a State which is not party to the Paris Convention or to the Agreement establishing the World Trade Organization accords reciprocal treatment within the meaning of Article 29(5) of the Regulation.

2. If the Commission determines that reciprocal treatment in accordance with paragraph 1 is accorded, it shall publish a communication to this effect in the Official Journal of the European Union.

3. Article 29(5) of the Regulation shall apply from the date of publication in the Official Journal of the European Union of the communication referred to in paragraph 2, unless the communication states an earlier date from which it is applicable. It shall cease to apply from the date of publication in the Official Journal of the European Union of a communication of the Commission to the effect that reciprocal treatment is no longer accorded, unless the communication states an earlier date from which it is applicable.";

57. Rule 114 is amended as follows:

- (a) in paragraph 1 point (d) is replaced by the following:

"(d) the indications and elements referred to in Rule 15(2)(b) to (h).";

(b) in paragraph 2, the introductory phrase is replaced by the following:

"Rules 15(1), (3) and (4) and 16 to 22 shall apply, subject to the following:";

58. Point (c) of Rule 122(1) is replaced by the following:

"(c) the indications and elements referred to in Rule 44(1)(a), (c), (d), (e) and (f)".

Article 2

1. This Regulation shall enter into force on the 20th day following its publication in the Official Journal of the European Union.

2. In Article 1 point (1)(d), point (3), point (4) and point (7) shall apply from 10 March 2008, as shall the second part, commencing with the word "including", of point (a) of Rule 83(1), set out at point 48 of Article 1 of this Regulation.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 29 June 2005.

**Commission Communication
of 3 December 1999**

**on the Commission findings concerning reciprocal treatment with the Principality of Andorra
within the meaning of Article 5(1)(d) and (3) and Article 29(5) of Council Regulation (EC) No 40/94
on the Community [trade mark](#)**

COMMISSION COMMUNICATION

of 3 December 1999

on the Commission findings concerning reciprocal treatment with the Principality of Andorra within the meaning of Article 5(1)(d) and (3) and Article 29(5) of Council Regulation (EC) No 40/94 on the Community trade mark

(1999/C 359/08)

Under Rule 101(1) of Commission Regulation (EC) No 2868/95 of 13 December 1995 implementing Council Regulation (EC) No 40/94 on the Community trade mark(1), the President of the Office for Harmonisation in the Internal Market (OHIM) asked the Commission to establish whether the Principality of Andorra accorded to nationals of all Member States of the Community reciprocal treatment within the meaning of Article 5(1)(d) and (3) and Article 29(5) of Council Regulation (EC) No 40/94(2), hereinafter referred to as "the Community Trade Mark Regulation", as amended by Regulation (EC) No 3288/94(3).

The Commission has examined the corresponding trade mark laws and has exchanged correspondence with the authorities of the Principality of Andorra.

- Under Article 5(1)(d) of the Community Trade Mark Regulation, nationals of any State which is not party to the Paris Convention and which, according to published findings, accords to nationals of all the Member States the same protection for trade marks as it accords to its own nationals may be proprietors of Community trade marks.

Likewise, under paragraph (c) of Article 5 of the Andorran law on trade marks, a national of another State which grants the same protection to nationals of the Principality of Andorra as it does to its own nationals with respect to trade marks, may be owner of the registration of a mark in the Principality of Andorra.

Moreover, the Andorran legislation on trade marks does not entail any obligation to the applicant regarding the need to prove the previous registration of a trade mark in the country of origin within the meaning of Article 5(1)(d) of the Community Trade Mark Regulation. Therefore, Article 5(3) of that Regulation does not apply in this case.

Finally, on a request for information on the application of Article 5 of the Andorran Trade Mark Law in respect of nationals of the European Union, the Andorran authorities have given proof that the current practice of the Andorran trade mark office is to grant to nationals of all Member States the same protection as it does to its own nationals with regard to trade marks.

Accordingly, OHIM shall accept, pursuant to Article 5(1) of the Community Trade Mark Regulation, trade mark applications from nationals of the Principality of Andorra.

- Under Article 29(5) of the Community Trade Mark Regulation, a person who has duly filed an application for a trade mark in a State which is not a party to the Paris Convention or to the Agreement establishing the World Trade Organisation, may only claim the priority date of that filing for the purpose of the filing of that mark as a Community trade mark, in so far as the State concerned accepts Community trade mark applications as a first filing for the purpose of the claiming of priority in relation to the filing of the same mark as its own trade mark office.

In this sense, the Andorran trade mark law states in its Article 6(5) that, provided that a State grants nationals of the Principality of Andorra a right of priority subject to conditions and having effects equivalent to those of the right of priority provided for in the said Article, nationals of that State may claim the right of priority provided for in Article 6 of the Andorran trade mark law in the Principality of Andorra.

Having been consulted about the application of that provision in relation to applicants of all the Member States or in relation to rights of priority derived from a first filing in any of the Member States or in the OHIM, the Andorran authorities have given proof that the Andorran trade mark office grants the right of priority set out in Article 29 of the Community Trade Mark Regulation.

Therefore, the OHIM shall accept, pursuant to Article 29(5) of the Community Trade Mark Regulation, trade mark priority claims deriving from a first application for the registration of a trade mark with the Andorran trade mark office.

Conclusions

This examination has shown that the Principality of Andorra's law on trade marks, and the practice of the Andorran trade mark office, afford nationals of all Member States the same protection in the matter of trade marks as its own nationals. Thus, under Article 5(1)(d) of the Community Trade Mark Regulation, Andorran nationals may become proprietors of a Community trade mark.

Applicants for a Community trade mark need not prove the prior registration in the Principality of Andorra of the trade mark for which they have filed a Community trade mark application.

This examination has also shown that the Principality of Andorra's law on trade marks, and the practice of the Andorran trade mark office, grants, on the basis of a first filing made at the OHIM and subject to conditions equivalent to those laid down in the Community Trade Mark Regulation, a right of priority as set out in Article 29 of that Regulation.

Therefore, the OHIM shall accept, pursuant to Article 29(5) of the Community Trade Mark Regulation, priority claims deriving from a first application for the registration of a trade mark with the Andorran trade mark office.

These findings shall take effect on 1 April 1996.

**First Council Directive 89/104/EEC
of 21 December 1988
to approximate the laws of the Member States relating to trade marks**

FIRST COUNCIL DIRECTIVE of 21 December 1988 to approximate the laws of the Member States relating to trade marks (89/104/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 100a thereof,

Having regard to the proposal from the Commission (1),

In cooperation with the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

Whereas the trade mark laws at present applicable in the Member States contain disparities which may impede the free movement of goods and freedom to provide services and may distort competition within the common market; whereas it is therefore necessary, in view of the establishment and functioning of the internal market, to approximate the laws of Member States;

Whereas it is important not to disregard the solutions and advantages which the Community trade mark system may afford to undertakings wishing to acquire trade marks;

Whereas it does not appear to be necessary at present to undertake full-scale approximation of the trade mark laws of the Member States and it will be sufficient if approximation is limited to those national provisions of law which most directly affect the functioning of the internal market;

Whereas the Directive does not deprive the Member States of the right to continue to protect trademarks acquired through use but takes them into account only in regard to the relationship between them and trade marks acquired by registration;

Whereas Member States also remain free to fix the provisions of procedure concerning the registration, the revocation and the invalidity of trade marks acquired by registration; whereas they can, for example, determine the form of trade mark registration and invalidity procedures, decide whether earlier rights should be invoked either in the registration procedure or in the invalidity procedure or in both and, if they allow earlier rights to be invoked in the registration procedure, have an opposition procedure or an ex officio examination procedure or both; whereas Member States remain free to determine the effects of revocation or invalidity of trade marks;

Whereas this Directive does not exclude the application to trade marks of provisions of law of the Member States other than trade mark law, such as the provisions relating to unfair competition, civil liability or consumer protection;

Whereas attainment of the objectives at which this approximation of laws is aiming requires that the conditions for obtaining and continuing to hold a registered trade mark are, in general, identical in all Member States; whereas, to this end, it is necessary to list examples of signs which may constitute a trade mark, provided that such signs are capable of distinguishing the goods or services of one undertaking from those of another or of invalidity concerning the trade mark itself, for example, the absence of any distinctive character, or concerning conflicts between the trade mark and earlier rights, are to be listed in an exhaustive manner, even if some of these grounds are listed as an option for the Member States which will therefore be able to maintain or introduce those grounds in their legislation; whereas Member States will be able to maintain or introduce into their legislation grounds of refusal or invalidity linked to conditions for obtaining and continuing to hold a trade mark for which there is no provision of approximation, concerning, for example,

the eligibility for the grant of a [trade mark](#), the renewal of the [trade mark](#) or rules on fees, or related to the non-compliance with procedural rules;

Whereas in order to reduce the total number of trade marks registered and protected in the Community and, consequently, the number of conflicts which arise between them, it is essential to require that registered trade marks must actually be used or, if not used, be subject to revocation; whereas it is necessary to provide that a [trade mark](#) cannot be invalidated on the basis of the existence of a non-used earlier [trade mark](#), while the Member States remain free to apply the same principle in respect of the registration of a [trade mark](#) or to provide that a [trade mark](#) may not be successfully invoked in infringement proceedings if it is established as a result of a plea that the [trade mark](#) could be revoked; whereas in all these cases it is up to the Member States to establish the applicable rules of procedure;

Whereas it is fundamental, in order to facilitate the free circulation of goods and services, to ensure that henceforth registered trade marks enjoy the same protection under the legal systems of all the Member States; whereas this should however not prevent the Member States from granting at their option extensive protection to those trade marks which have a reputation;

Whereas the protection afforded by the registered [trade mark](#), the function of which is in particular to guarantee the [trade mark](#) as an indication of origin, is absolute in the case of identity between the mark and the sign and goods or services; whereas the protection applies also in case of similarity between the mark and the sign and the goods or services; whereas it is indispensable to give an interpretation of the concept of similarity in relation to the likelihood of confusion; whereas the likelihood of confusion, the appreciation of which depends on numerous elements and, in particular, on the recognition of the [trade mark](#) on the market, of the association which can be made with the used or registered sign, of the degree of similarity between the [trade mark](#) and the sign and between the goods or services identified, constitutes the specific condition for such protection; whereas the ways in which likelihood of confusion may be established, and in particular the onus of proof, are a matter for national Procedural rules which are not prejudiced by the [Directive](#);

Whereas it is important, for reasons of legal certainty and without inequitably prejudicing the interests of a proprietor of an earlier [trade mark](#), to Provide that the latter may no longer request a declaration of invalidity nor may he oppose the use of a [trade mark](#) subsequent to his own of which he has knowingly tolerated the use for a substantial length of time, unless the application for the subsequent [trade mark](#) was made in bad faith:

Whereas all Member States of the Community are bound by the Paris Convention for the Protection of Industrial Property; whereas it is necessary that the provisions of this [Directive](#) are entirely consistent with those of the Paris Convention; whereas the obligations of the Member States resulting from this Convention are not affected by this [Directive](#); whereas, where appropriate, the second subparagraph of Article 234 of the Treaty is applicable,

HAS ADOPTED THIS [DIRECTIVE](#):

Article 1

Scope

This [Directive](#) shall apply to every [trade mark](#) in respect of goods or services which is the subject of registration or of an application in a Member State for registration as an individual [trade mark](#), a collective mark or a guarantee or certification mark, or which is the subject of a registration or an application for registration in the Benelux [Trade Mark](#) Office or of an international registration

having effect in a Member State.

Article 2

Signs of which a **trade mark** may consist

A **trade mark** may consist of any sign capable of being represented graphically, particularly words, including personal names, designs, letters, numerals, the shape of goods or of their packaging, provided that such signs are capable of distinguishing the goods or services of one undertaking from those of other undertakings.

Article 3

Grounds for refusal or invalidity

1. The following shall not be registered or if registered shall be liable to be declared invalid:

- (a) signs which cannot constitute a **trade mark**;
- (b) trade marks which are devoid of any distinctive character;
- (c) trade marks which consist exclusively of signs or indications which may serve, in trade, to designate the kind, quality, quantity, intended purpose, value, geographical origin, or the time of production of the goods or of rendering of the service, or other characteristics of the goods or (d) trade marks which consist exclusively of signs or indications which have become customary in the current language or in the bona fide and established practices of the trade;
- (e) signs which consist exclusively of:
 - the shape which results from the nature of the goods themselves, or
 - the shape of goods which is necessary to obtain a technical result, or
 - the shape which gives substantial value to the goods;
- (f) trade marks which are contrary to public policy or to accepted principles of morality;
- (g) trade marks which are of such a nature as to deceive the public, for instance as to the nature, quality or geographical origin of the goods or service;
- (h) trade marks which have not been authorized by the competent authorities and are to be refused or invalidated pursuant to Article 6 ter of the Paris Convention for the Protection of Industrial Property, hereinafter referred to as the 'Paris Convention'.

2. Any Member State may provide that a **trade mark** shall not be registered or, if registered, shall be liable to be declared invalid where and to the extent that:

- (a) the use of that **trade mark** may be prohibited pursuant to provisions of law other than **trade mark** law of the Member State concerned or of the Community;
- (b) the **trade mark** covers a sign of high symbolic value, in particular a religious symbol;
- (c) the **trade mark** includes badges, emblems and escutcheons other than those covered by Article 6 ter of the Paris Convention and which are of public interest, unless the consent of the appropriate authorities to its registration has been given in conformity with the legislation of the Member

State;

(d) the application for registration of the **trade mark** was made in bad faith by the applicant.

3. A **trade mark** shall not be refused registration or be declared invalid in accordance with paragraph 1 (b), (c) or (d) if, before the date of application for registration and following the use which has been made of it, it has acquired a distinctive character. Any Member State may in addition provide that this provision shall also apply where the distinctive character was acquired after the date of application for registration or after the date of registration.

4. Any Member State may provide that, by derogation from the preceding paragraphs, the grounds of refusal of registration or invalidity in force in that State prior to the date on which the provisions necessary to comply with this **Directive** enter into force, shall apply to trade marks for which application has been made prior to that date.

Article 4

Further grounds for refusal or invalidity concerning conflicts with earlier rights

1. A **trade mark** shall not be registered or, if registered, shall be liable to be declared invalid:

- (a) if it is identical with an earlier **trade mark**, and the goods or services for which the **trade mark** is applied for or is registered are identical with the goods or services for which the earlier **trade mark** is protected;
- (b) if because of its identity with, or similarity to, the earlier **trade mark** and the identity or similarity of the goods or services covered by the trade marks, there exists a likelihood of confusion on the part of the public, which includes the likelihood of association with the earlier **trade mark**.

2. 'Earlier trade marks' within the meaning of paragraph 1 means:

- (a) trade marks of the following kinds with a date of application for registration which is earlier than the date of application for registration of the **trade mark**, taking account, where appropriate, of the priorities claimed in respect of those trade marks; (i) Community trade marks;
- (ii) trade marks registered in the Member State or, in the case of Belgium, Luxembourg or the Netherlands, at the Benelux **Trade Mark** Office;
- (iii) trade marks registered under international arrangements which have effect in the Member State;
- (b) Community trade marks which validly claim seniority, in accordance with the Regulation on the Community **trade mark**, from a **trade mark** referred to in (a) (ii) and (iii), even when the latter **trade mark** has been surrendered or allowed to lapse;
- (c) applications for the trade marks referred to in (a) and (b), subject to their registration;
- (d) trade marks which, on the date of application for registration of the **trade mark**, or, where appropriate, of the priority claimed in respect of the application for registration of the **trade mark**, are well known in a Member State, in the sense in which the words 'well known' are used in Article 6 bis of the Paris Convention.

3. A **trade mark** shall furthermore not be registered or, if registered, shall be liable to be declared invalid if it is identical with, or similar to, an earlier Community **trade mark** within the meaning of paragraph 2 and is to be, or has been, registered for goods or services which are not similar to those for which the earlier Community **trade mark** is registered, where the earlier Community

trade mark has a reputation in the Community and where the use of the later trade mark without due cause would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the ea4. Any Member State may furthermore provide that a trade mark shall not be registered or, if registered, shall be liable to be declared invalid where, and to the extent that:

- (a) the trade mark is identical with, or similar to, an earlier national trade mark within the meaning of paragraph 2 and is to be, or has been, registered for goods or services which are not similar to those for which the earlier trade mark is registered, where the earlier trade mark has a reputation in the Member State concerned and where the use of the later trade mark without due cause would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the earlier trade mark;
- (b) rights to a non-registered trade mark or to another sign used in the course of trade were acquired prior to the date of application for registration of the subsequent trade mark, or the date of the priority claimed for the application for registration of the subsequent trade mark and that non-registered trade mark or other sign confers on its proprietor the right to prohibit the use of a subsequent trade mark;
- (c) the use of the trade mark may be prohibited by virtue of an earlier right other than the rights referred to in paragraphs 2 and 4 (b) and in particular:
 - (i) a right to a name;
 - (ii) a right of personal portrayal;
 - (iii) a copyright;
 - (iv) an industrial property right;
- (d) the trade mark is identical with, or similar to, an earlier collective trade mark conferring a right which expired within a period of a maximum of three years preceding application;
- (e) the trade mark is identical with, or similar to, an earlier guarantee or certification mark conferring a right which expired within a period preceding application the length of which is fixed by the Member State;
- (f) the trade mark is identical with, or similar to, an earlier trade mark which was registered for identical or similar goods or services and conferred on them a right which has expired for failure to renew within a period of a maximum of two years preceding application, unless the proprietor of the earlier trade mark gave his agreement for the registration of the later mark or did not use his trade mark;
- (g) the trade mark is liable to be confused with a mark which was in use abroad on the filing date of the application and which is still in use there, provided that at the date of the application the applicant was acting in bad faith?

5. The Member States may permit that in appropriate circumstances registration need not be refused or the trade mark need not be declared invalid where the proprietor of the earlier trade mark or other earlier right consents to the registration of the later trade mark.

6. Any Member State may provide that, by derogation from paragraphs 1 to 5, the grounds for refusal of registration or invalidity in force in that State prior to the date on which the provisions necessary to comply with this Directive enter into force, shall apply to trade marks for which application has been made prior to that date.

*Article 5*Rights conferred by a [trade mark](#)

1. The registered [trade mark](#) shall confer on the proprietor exclusive rights therein. The proprietor shall be entitled to prevent all third parties not having his consent from using in the course of trade:

- (a) any sign which is identical with the [trade mark](#) in relation to goods or services which are identical with those for which the [trade mark](#) is registered;
- (b) any sign where, because of its identity with, or similarity to, the [trade mark](#) and the identity or similarity of the goods or services covered by the [trade mark](#) and the sign, there exists a likelihood of confusion on the part of the public, which includes the likelihood of association between the sign and the [trade mark](#).

2. Any Member State may also provide that the proprietor shall be entitled to prevent all third parties not having his consent from using in the course of trade any sign which is identical with, or similar to, the [trade mark](#) in relation to goods or services which are not similar to those for which the [trade mark](#) is registered, where the latter has a reputation in the Member State and where use of that sign without due cause takes unfair advantage of, or is detrimental to, the distinctive character or the repute of the [trade mark](#).

3. The following, inter alia, may be prohibited under paragraphs 1 and 2:

- (a) affixing the sign to the goods or to the packaging thereof;
- (b) offering the goods, or putting them on the market or stocking them for these purposes under that sign, or offering or supplying services thereunder;
- (c) importing or exporting the goods under the sign;
- (d) using the sign on business papers and in advertising.

4. Where, under the law of the Member State, the use of a sign under the conditions referred to in 1 (b) or 2 could not be prohibited before the date on which the provisions necessary to comply with this [Directive](#) entered into force in the Member State concerned, the rights conferred by the [trade mark](#) may not be relied on to prevent the continued use of the sign.

5. Paragraphs 1 to 4 shall not affect provisions in any Member State relating to the protection against the use of a sign other than for the purposes of distinguishing goods or services, where use of that sign without due cause takes unfair advantage of, or is detrimental to, the distinctive character or the repute of the [trade mark](#)

*Article 6*Limitation of the effects of a [trade mark](#)

1. The [trade mark](#) shall not entitle the proprietor to prohibit a third party from using, in the course of trade,

- (a) his own name or address;
- (h) indications concerning the kind, quality, quantity, intended purpose, value, geographical origin,

the time of production of goods or of rendering of the service, or other characteristics of goods or services;

- (c) the [trade mark](#) where it is necessary to indicate the intended purpose of a product or service, in particular as accessories or spare parts;

provided he uses them in accordance with honest practices in industrial or commercial matters

2. The [trade mark](#) shall not entitle the proprietor to prohibit a third party from using, in the course of trade, an earlier right which only applies in a particular locality if that right is recognized by the laws of the Member State in question and within the limits of the territory in which it is recognized.

Article 7

Exhaustion of the rights conferred by a [trade mark](#)

1. The [trade mark](#) shall not entitle the proprietor to prohibit its use in relation to goods which have been put on the market in the Community under that [trade mark](#) by the proprietor or with his consent.

2. Paragraph 1 shall not apply where there exist legitimate reasons for the proprietor to oppose further commercialization of the goods, especially where the condition of the goods is changed or impaired after they have been put on the market.

Article 8

Licensing

1. A [trade mark](#) may be licensed for some or all of the goods or services for which it is registered and for the whole or part of the Member State concerned. A license may be exclusive or non-exclusive.

2. The proprietor of a [trade mark](#) may invoke the rights conferred by that [trade mark](#) against a licensee who contravenes any provision in his licensing contract with regard to its duration, the form covered by the registration in which the [trade mark](#) may be used, the scope of the goods or services for which the licence is granted, the territory in which the [trade mark](#) may be affixed, or the quality of the goods manufactured or of the services provided by the licensee.

Article 9

Limitation in consequence of acquiescence

1. Where, in a Member State, the proprietor of an earlier [trade mark](#) as referred to in Article 4 (2) has acquiesced, for a period of five successive years, in the use of a later [trade mark](#) registered in that Member State while being aware of such use, he shall no longer be entitled on the basis of the earlier [trade mark](#) either to apply for a declaration that the later [trade mark](#) is invalid or to oppose the use of the later [trade mark](#) in respect of the goods or services for which the later [trade mark](#) has been used, unless registration of the later [trade mark](#) was applied for in bad faith.

2. Any Member State may provide that paragraph 1 shall apply *mutatis mutandis* to the proprietor

of an earlier [trade mark](#) referred to in Article 4 (4) (a) or an other earlier right referred to in Article 4 (4) (b) or (c).

3. In the cases referred to in paragraphs 1 and 2, the proprietor of a later registered [trade mark](#) shall not be entitled to oppose the use of the earlier right, even though that right may no longer be invoked against the later [trade mark](#).

Article 10

Use of trade marks

1. If, within a period of five years following the date of the completion of the registration procedure, the proprietor has not put the [trade mark](#) to genuine use in the Member State in connection with the goods or services in respect of which it is registered, or if such use has been suspended during an uninterrupted period of five years, the [trade mark](#) shall be subject to the sanctions provided for in this [Directive](#), unless there are proper reasons for non-use.

2. The following shall also constitute use within the meaning of paragraph 1:

- (a) use of the [trade mark](#) in a form differing in elements which do not alter the distinctive character of the mark in the form in which it was registered;
- (b) affixing of the [trade mark](#) to goods or to the packaging thereof in the Member State concerned solely for export purposes.

3. Use of the [trade mark](#) with the consent of the proprietor or by any person who has authority to use a collective mark or a guarantee or certification mark shall be deemed to constitute use by the proprietor.

4. In relation to trade marks registered before the date on which the provisions necessary to comply with this [Directive](#) enter into force in the Member State concerned:

- (a) where a provision in force prior to that date attaches sanctions to non-use of a [trade mark](#) during an uninterrupted period, the relevant period of five years mentioned in paragraph 1 shall be deemed to have begun to run at the same time as any period of non-use which is already running at that date;
- (b) where there is no use provision in force prior to that date, the periods of five years mentioned in paragraph 1 shall be deemed to run from that date at the earliest.

Article 11

Sanctions for non use of a [trade mark](#) in legal or administrative proceedings

1. A [trade mark](#) may not be declared invalid on the ground that there is an earlier conflicting [trade mark](#) if the latter does not fulfil the requirements of use set out in Article 10 (1), (2) and (3) or in Article 10 (4), as the case may be.

2. Any Member State may provide that registration of a [trade mark](#) may not be refused on the ground that there is an earlier conflicting [trade mark](#) if the latter does not fulfil the requirements of use set out in Article 10 (1), (2) and (3) or in Article 10 (4), as the case may be.

3. Without prejudice to the application of Article 12, where a counter-claim for revocation is

made, any Member State may provide that a **trade mark** may not be successfully invoked in infringement proceedings if it is established as a result of a plea that the **trade mark** could be revoked pursuant to Article 12 (1).

4. If the earlier **trade mark** has been used in relation to part only of the goods or services for which it is registered, it shall, for purposes of applying paragraphs 1, 2 and 3, be deemed to be registered in respect only of that part of the goods or services.

Article 12

Grounds for revocation

1. A **trade mark** shall be liable to revocation if, within a continuous period of five years, it has not been put to genuine use in the Member State in connection with the goods or

services in respect of which it is registered, and there are no proper reasons for non-use; however, no person may claim that the proprietor's rights in a **trade mark** should be revoked where, during the interval between expiry of the five-year period and filing of the application for revocation, genuine use of the **trade mark** has been started or resumed; the commencement or resumption of use within a period of three months preceding the filing of the application for revocation which began at the earliest on expiry of the continuous period of five years of non-use, shall, however, be disregarded where preparations for the commencement or resumption occur only after the proprietor becomes aware that the application for revocation may be filed.

2. A **trade mark** shall also be liable to revocation if, after the date on which it was registered,

- (a) in consequence of acts or inactivity of the proprietor, it has become the common name in the trade for a product or service in respect of which it is registered;
- (b) in consequence of the use made of it by the proprietor of the **trade mark** or with his consent in respect of the goods or services for which it is registered, it is liable to mislead the public, particularly as to the nature, quality or geographical origin of those goods or services.

Article 13

Grounds for refusal or revocation or invalidity relating to only some of the goods or services

Where grounds for refusal of registration or for revocation or invalidity of a **trade mark** exist in respect of only some of the goods or services for which that **trade mark** has been applied for or registered, refusal of registration or revocation or invalidity shall cover those goods or services only.

Article 14

Establishment a posteriori of invalidity or revocation of a **trade mark**

Where the seniority of an earlier **trade mark** which has been surrendered or allowed to lapse, is claimed for a Community **trade mark**, the invalidity or revocation of the earlier **trade mark** may be established a posteriori

Article 15

Special provisions in respect of collective marks, guarantee marks and certification marks

1. Without prejudice to Article 4, Member States whose laws authorize the registration of collective marks or of

guarantee or certification marks may provide that such marks shall not be registered, or shall be revoked or declared invalid, on grounds additional to those specified in Articles 3 and 12 where the function of those marks so requires.

2. By way of derogation from Article 3 (1) (c), Member States may provide that signs or indications which may serve, in trade, to designate the geographical origin of the goods or services may constitute collective, guarantee or certification marks. Such a mark does not entitle the proprietor to prohibit a third party from using in the course of trade such signs or indications, provided he uses them in accordance with honest practices in industrial or commercial matters; in particular, such a mark may not be invoked against a third party who is entitled to use a geographical name

Article 16

National provisions to be adopted pursuant to this [Directive](#)

1. The Member States shall bring into force the laws, regulations and administrative provisions necessary to

comply with this [Directive](#) not later than 28 December 1991. They shall immediately inform the Commission thereof.

2. Acting on a proposal from the Commission, the Council, acting by qualified majority, may defer the date referred to in paragraph 1 until 31 December 1992 at the latest.

3. Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field governed by this [Directive](#).

**92/10/EEC: Council Decision
of 19 December 1991**

**postponing the date on which the national provisions applying Directive 89/104/EEC to
approximate the laws of the Member States relating to trade marks are to be put into effect**

COUNCIL DECISION of 19 December 1991 postponing the date on which the national provisions applying Directive 89/104/EEC to approximate the laws of the Member States relating to trade marks are to be put into effect (92/10/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to the First Council Directive 89/104/EEC of 21 December 1988 to approximate the laws of the Member States relating to trade marks (1), and in particular Article 16 (2) thereof,

Having regard to the proposal from the Commission,

Whereas, pursuant to Article 16 (1) of Directive 89/104/EEC, Member States are to bring into force the laws, regulations and administrative provisions necessary to comply with the Directive not later than 28 December 1991;

Whereas pursuant to Article 16 (2) of that Directive, on a proposal from the Commission, the Council, acting by qualified majority, may defer the date referred to in paragraph 1 of that Article until 31 December 1992 at the latest;

Whereas this exceptional provision was included in the said Directive to ensure, if necessary, that the date of the putting into effect of the national provisions applying the Directive should, as far as possible, be aligned with the date as from which it would be possible for Community trade mark applications to be filed;

Whereas the Commission's proposal for a Council Regulation on the Community trade mark (1) has not yet been adopted; whereas it is expected that the said Regulation will be adopted shortly;

Whereas it seems therefore appropriate to postpone until 31 December 1992 the date provided for in Article 16 (1) of Directive 89/104/EEC, so that the objective referred to above may be the more easily pursued;

Whereas the objectives set for the completion of the internal market continue to be respected notwithstanding this postponement,

HAS ADOPTED THIS DECISION:

Article 1

The date set in Article 16 (1) of Directive 89/104/EEC shall be replaced by 31 December 1992.

Article 2

This Decision is addressed to the Member States. Done at Brussels, 19 December 1991. For the Council

The President

Commission Recommendation

of 18 May 2005

on collective cross-border management of copyright and related rights for legitimate online music services

(Text with EEA relevance)

(2005/737/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community, and in particular Article 211 thereof,

Whereas:

- (1) In April 2004 the Commission adopted a Communication on the Management of Copyright and Related Rights in the Internal Market.
- (2) The European Parliament, in its report of 15 January 2004 [1], stated that right-holders should be able to enjoy copyright and related rights protection wherever such rights are established, independent of national borders or modes of use during the whole term of their validity.
- (3) The European Parliament further emphasised that any action by the Community in respect of the collective cross-border management of copyright and related rights should strengthen the confidence of artists, including writers and musicians, that the pan-European use of their creative works will be financially rewarded [2].
- (4) New technologies have led to the emergence of a new generation of commercial users that make use of musical works and other subject matter online. The provision of legitimate online music services requires management of a series of copyright and related rights.
- (5) One category of those rights is the exclusive right of reproduction which covers all reproductions made in the process of online distribution of a musical work. Other categories of rights are the right of communication to the public of musical works, the right to equitable remuneration for the communication to the public of other subject matter and the exclusive right of making available a musical work or other subject matter.
- (6) Pursuant to Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society [3] and Council Directive 92/100/EEC of 19 November 1992 on rental right and lending right and on certain rights related to copyright in the field of intellectual property [4], a licence is required for each of the rights in the online exploitation of musical works. These rights may be managed by collective rights managers that provide certain management services to right-holders as agents or by individual right-holders themselves.
- (7) Licensing of online rights is often restricted by territory, and commercial users negotiate in each Member State with each of the respective collective rights managers for each right that is included in the online exploitation.
- (8) In the era of online exploitation of musical works, however, commercial users need a licensing policy that corresponds to the ubiquity of the online environment and which is multi-territorial.

It is therefore appropriate to provide for multi-territorial licensing in order to enhance greater legal certainty to commercial users in relation to their activity and to foster the development of legitimate online services, increasing, in turn, the revenue stream for right-holders.

- (9) Freedom to provide collective management services across national borders entails that right-holders are able to freely choose the collective rights manager for the management of the rights necessary to operate legitimate online music services across the Community. That right implies the possibility to entrust or transfer all or a part of the online rights to another collective rights manager irrespective of the Member State of residence or the nationality of either the collective rights manager or the rights-holder.
- (10) Fostering effective structures for cross-border management of rights should also ensure that collective rights managers achieve a higher level of rationalisation and transparency, with regard to compliance with competition rules, especially in the light of the requirements arising out of the digital environment.
- (11) The relationship between right-holders and collective rights managers, whether based on contract or statutory membership rules, should include a minimum protection for right-holders with respect to all categories of rights that are necessary for the provision of legitimate online music services. There should be no difference in treatment of right-holders by rights managers on the basis of the Member State of residence or nationality.
- (12) Royalties collected on behalf of right-holders should be distributed equitably and without discrimination on the grounds of residence, nationality, or category of right-holder. In particular, royalties collected on behalf of right-holders in Member States other than those in which the right-holders are resident or of which they are nationals should be distributed as effectively and efficiently as possible.
- (13) Additional recommendations on accountability, right-holder representation in the decision-making bodies of collective rights managers and dispute resolution should ensure that collective rights managers achieve a higher level of rationalisation and transparency and that right-holders and commercial users can make informed choices. There should be no difference in treatment on the basis of category of membership in the collective rights management society: all right-holders, be they authors, composers, publishers, record producers, performers or others, should be treated equally.
- (14) It is appropriate to continuously assess the development of the online music market,

HEREBY RECOMMENDS:

Definitions

1. For the purposes of this Recommendation the following definitions are applied:

- (a) "management of copyright and related rights for the provision of legitimate online music services at Community level" means the provision of the following services: the grant of licences to commercial users, the auditing and monitoring of rights, the enforcement of copyright and related rights, the collection of royalties and the distribution of royalties to right-holders;
- (b) "musical works" means any musical work or other protected subject matter;
- (c) "repertoire" means the catalogue of musical works which is administered by a collective rights manager;
- (d) "multi-territorial licence" means a licence which covers the territory of more than one Member state;

-
- (e) "collective rights manager" means any person providing the services set out in point (a) to several right-holders;
- (f) "online rights" means any of the following rights:
- (i) the exclusive right of reproduction that covers all reproductions provided for under Directive 2001/29/EC in the form of intangible copies, made in the process of online distribution of musical works;
- (ii) the right of communication to the public of a musical work, either in the form of a right to authorise or prohibit pursuant to Directive 2001/29/EC or a right to equitable remuneration in accordance with Directive 92/100/EEC, which includes webcasting, internet radio and simulcasting or near-on-demand services received either on a personal computer or on a mobile telephone;
- (iii) the exclusive right of making available a musical work pursuant to Directive 2001/29/EC, which includes on-demand or other interactive services;
- (g) "right-holder" means any natural or legal person that holds online rights;
- (h) "commercial user" means any person involved in the provision of online music services who needs a licence from right-holders in order to provide legitimate online music services;
- (i) "reciprocal representation agreement" means any bilateral agreement between collective rights managers whereby one collective rights manager grants to the other the right to represent its repertoire in the territory of the other.

General

2. Member States are invited to take the steps necessary to facilitate the growth of legitimate online services in the Community by promoting a regulatory environment which is best suited to the management, at Community level, of copyright and related rights for the provision of legitimate online music services.

The relationship between right-holders, collective rights managers and commercial users

3. Right-holders should have the right to entrust the management of any of the online rights necessary to operate legitimate online music services, on a territorial scope of their choice, to a collective rights manager of their choice, irrespective of the Member State of residence or the nationality of either the collective rights manager or the right-holder.

4. Collective rights managers should apply the utmost diligence in representing the interests of right-holders.

5. With respect to the licensing of online rights the relationship between right-holders and collective rights managers, whether based on contract or statutory membership rules, should, at least be governed by the following:

- (a) right-holders should be able to determine the online rights to be entrusted for collective management;
- (b) right-holders should be able to determine the territorial scope of the mandate of the collective rights managers;
- (c) right-holders should, upon reasonable notice of their intention to do so, have the right to withdraw any of the online rights and transfer the multi territorial management of those rights to another collective rights manager, irrespective of the Member State of residence or the nationality of either the collective rights manager or the right-holder;
- (d) where a right-holder has transferred the management of an online right to another collective rights manager, without prejudice to other forms of cooperation among rights managers, all collective

rights managers concerned should ensure that those online rights are withdrawn from any existing reciprocal representation agreement concluded amongst them.

6. Collective rights managers should inform right-holders and commercial users of the repertoire they represent, any existing reciprocal representation agreements, the territorial scope of their mandates for that repertoire and the applicable tariffs.

7. Collective rights managers should give reasonable notice to each other and commercial users of changes in the repertoire they represent.

8. Commercial users should inform collective right managers of the different features of the services for which they want to acquire online rights.

9. Collective rights managers should grant commercial users licences on the basis of objective criteria and without any discrimination among users.

Equitable distribution and deductions

10. Collective rights managers should distribute royalties to all right-holders or category of right-holders they represent in an equitable manner.

11. Contracts and statutory membership rules governing the relationship between collective rights managers and right-holders for the management, at Community level, of musical works for online use should specify whether and to what extent, there will be deductions from the royalties to be distributed for purposes other than for the management services provided.

12. Upon payment of the royalties collective rights managers should specify vis-à-vis all the right-holders they represent, the deductions made for purposes other than for the management services provided.

Non-discrimination and representation

13. The relationship between collective rights managers and right-holders, whether based on contract or statutory membership rules should be based on the following principles:

- (a) any category of right-holder is treated equally in relation to all elements of the management service provided;
- (b) the representation of right-holders in the internal decision making process is fair and balanced.

Accountability

14. Collective rights managers should report regularly to all right-holders they represent, whether directly or under reciprocal representation agreements, on any licences granted, applicable tariffs and royalties collected and distributed.

Dispute settlement

15. Member States are invited to provide for effective dispute resolution mechanisms, in particular in relation to tariffs, licensing conditions, entrustment of online rights for management and withdrawal of online rights.

Follow-up

16. Member States and collective rights managers are invited to report, on a yearly basis, to the Commission on the measures they have taken in relation to this Recommendation and on the management, at Community level, of copyright and related rights for the provision of legitimate online music services.

17. The Commission intends to assess, on a continuous basis, the development of the online music sector and in the light of this Recommendation.

18. The Commission will to consider, on the basis of the assessment referred to in point 17, the need for further action at Community level.

Addressees

19. This Recommendation is addressed to the Member States and to all economic operators which are involved in the management of copyright and related rights within the Community.

Done at Brussels, 18 May 2005.

Directive 2001/84/EC of the European Parliament and of the Council of 27 September 2001 on the resale right for the benefit of the author of an original work of art

Directive 2001/84/EC of the European Parliament and of the Council
of 27 September 2001

on the resale right for the benefit of the author of an original work of art

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 95 thereof,

Having regard to the proposal from the Commission(1),

Having regard to the opinion of the Economic and Social Committee(2),

Acting in accordance with the procedure laid down in Article 251 of the Treaty(3), and in the light of the joint text approved by the Conciliation Committee on 6 June 2001,

Whereas:

- (1) In the field of copyright, the resale right is an unassignable and inalienable right, enjoyed by the author of an original work of graphic or plastic art, to an economic interest in successive sales of the work concerned.
- (2) The resale right is a right of a productive character which enables the author/artist to receive consideration for successive transfers of the work. The subject-matter of the resale right is the physical work, namely the medium in which the protected work is incorporated.
- (3) The resale right is intended to ensure that authors of graphic and plastic works of art share in the economic success of their original works of art. It helps to redress the balance between the economic situation of authors of graphic and plastic works of art and that of other creators who benefit from successive exploitations of their works.
- (4) The resale right forms an integral part of copyright and is an essential prerogative for authors. The imposition of such a right in all Member States meets the need for providing creators with an adequate and standard level of protection.
- (5) Under Article 151(4) of the Treaty the Community is to take cultural aspects into account in its action under other provisions of the Treaty.
- (6) The Berne Convention for the Protection of Literary and Artistic Works provides that the resale right is available only if legislation in the country to which the author belongs so permits. The right is therefore optional and subject to the rule of reciprocity. It follows from the case-law of the Court of Justice of the European Communities on the application of the principle of non-discrimination laid down in Article 12 of the Treaty, as shown in the judgment of 20 October 1993 in Joined Cases C-92/92 and C-326/92 *Phil Collins and Others*(4), that domestic provisions containing reciprocity clauses cannot be relied upon in order to deny nationals of other Member States rights conferred on national authors. The application of such clauses in the Community context runs counter to the principle of equal treatment resulting from the prohibition of any discrimination on grounds of nationality.
- (7) The process of internationalisation of the Community market in modern and contemporary art, which is now being speeded up by the effects of the new economy, in a regulatory context in which few States outside the EU recognise the resale right, makes it essential for the European Community, in the external sphere, to open negotiations with a view to making Article 14b of the Berne

Convention compulsory.

- (8) The fact that this international market exists, combined with the lack of a resale right in several Member States and the current disparity as regards national systems which recognise that right, make it essential to lay down transitional provisions as regards both entry into force and the substantive regulation of the right, which will preserve the competitiveness of the European market.
- (9) The resale right is currently provided for by the domestic legislation of a majority of Member States. Such laws, where they exist, display certain differences, notably as regards the works covered, those entitled to receive royalties, the rate applied, the transactions subject to payment of a royalty, and the basis on which these are calculated. The application or non-application of such a right has a significant impact on the competitive environment within the internal market, since the existence or absence of an obligation to pay on the basis of the resale right is an element which must be taken into account by each individual wishing to sell a work of art. This right is therefore a factor which contributes to the creation of distortions of competition as well as displacement of sales within the Community.
- (10) Such disparities with regard to the existence of the resale right and its application by the Member States have a direct negative impact on the proper functioning of the internal market in works of art as provided for by Article 14 of the Treaty. In such a situation Article 95 of the Treaty constitutes the appropriate legal basis.
- (11) The objectives of the Community as set out in the Treaty include laying the foundations of an ever closer union among the peoples of Europe, promoting closer relations between the Member States belonging to the Community, and ensuring their economic and social progress by common action to eliminate the barriers which divide Europe. To that end the Treaty provides for the establishment of an internal market which presupposes the abolition of obstacles to the free movement of goods, freedom to provide services and freedom of establishment, and for the introduction of a system ensuring that competition in the common market is not distorted. Harmonisation of Member States' laws on the resale right contributes to the attainment of these objectives.
- (12) The Sixth Council Directive (77/388/EEC) of 17 May 1977 on the harmonisation of the laws of the Member States relating to turnover taxes - common system of value added tax: uniform basis of assessment⁽⁵⁾, progressively introduces a Community system of taxation applicable inter alia to works of art. Measures confined to the tax field are not sufficient to guarantee the harmonious functioning of the art market. This objective cannot be attained without harmonisation in the field of the resale right.
- (13) Existing differences between laws should be eliminated where they have a distorting effect on the functioning of the internal market, and the emergence of any new differences of that kind should be prevented. There is no need to eliminate, or prevent the emergence of, differences which cannot be expected to affect the functioning of the internal market.
- (14) A precondition of the proper functioning of the internal market is the existence of conditions of competition which are not distorted. The existence of differences between national provisions on the resale right creates distortions of competition and displacement of sales within the Community and leads to unequal treatment between artists depending on where their works are sold. The issue under consideration has therefore transnational aspects which cannot be satisfactorily regulated by action by Member States. A lack of Community action would conflict with the requirement of the Treaty to correct distortions of competition and unequal treatment.
- (15) In view of the scale of divergences between national provisions it is therefore necessary to adopt harmonising measures to deal with disparities between the laws of the Member States

in areas where such disparities are liable to create or maintain distorted conditions of competition. It is not however necessary to harmonise every provision of the Member States' laws on the resale right and, in order to leave as much scope for national decision as possible, it is sufficient to limit the harmonisation exercise to those domestic provisions that have the most direct impact on the functioning of the internal market.

- (16) This Directive complies therefore, in its entirety, with the principles of subsidiarity and proportionality as laid down in Article 5 of the Treaty.
- (17) Pursuant to Council Directive 93/98/EEC of 29 October 1993 harmonising the term of protection of copyright and certain related rights(6), the term of copyright runs for 70 years after the author's death. The same period should be laid down for the resale right. Consequently, only the originals of works of modern and contemporary art may fall within the scope of the resale right. However, in order to allow the legal systems of Member States which do not, at the time of the adoption of this Directive, apply a resale right for the benefit of artists to incorporate this right into their respective legal systems and, moreover, to enable the economic operators in those Member States to adapt gradually to the aforementioned right whilst maintaining their economic viability, the Member States concerned should be allowed a limited transitional period during which they may choose not to apply the resale right for the benefit of those entitled under the artist after his death.
- (18) The scope of the resale right should be extended to all acts of resale, with the exception of those effected directly between persons acting in their private capacity without the participation of an art market professional. This right should not extend to acts of resale by persons acting in their private capacity to museums which are not for profit and which are open to the public. With regard to the particular situation of art galleries which acquire works directly from the author, Member States should be allowed the option of exempting from the resale right acts of resale of those works which take place within three years of that acquisition. The interests of the artist should also be taken into account by limiting this exemption to such acts of resale where the resale price does not exceed EUR 10000.
- (19) It should be made clear that the harmonisation brought about by this Directive does not apply to original manuscripts of writers and composers.
- (20) Effective rules should be laid down based on experience already gained at national level with the resale right. It is appropriate to calculate the royalty as a percentage of the sale price and not of the increase in value of works whose original value has increased.
- (21) The categories of works of art subject to the resale right should be harmonised.
- (22) The non-application of royalties below the minimum threshold may help to avoid disproportionately high collection and administration costs compared with the profit for the artist. However, in accordance with the principle of subsidiarity, the Member States should be allowed to establish national thresholds lower than the Community threshold, so as to promote the interests of new artists. Given the small amounts involved, this derogation is not likely to have a significant effect on the proper functioning of the internal market.
- (23) The rates set by the different Member States for the application of the resale right vary considerably at present. The effective functioning of the internal market in works of modern and contemporary art requires the fixing of uniform rates to the widest possible extent.
- (24) It is desirable to establish, with the intention of reconciling the various interests involved in the market for original works of art, a system consisting of a tapering scale of rates for several price bands. It is important to reduce the risk of sales relocating and of the circumvention

of the Community rules on the resale right.

- (25) The person by whom the royalty is payable should, in principle, be the seller. Member States should be given the option to provide for derogations from this principle in respect of liability for payment. The seller is the person or undertaking on whose behalf the sale is concluded.
- (26) Provision should be made for the possibility of periodic adjustment of the threshold and rates. To this end, it is appropriate to entrust to the Commission the task of drawing up periodic reports on the actual application of the resale right in the Member States and on the impact on the art market in the Community and, where appropriate, of making proposals relating to the amendment of this Directive.
- (27) The persons entitled to receive royalties must be specified, due regard being had to the principle of subsidiarity. It is not appropriate to take action through this Directive in relation to Member States' laws of succession. However, those entitled under the author must be able to benefit fully from the resale right after his death, at least following the expiry of the transitional period referred to above.
- (28) The Member States are responsible for regulating the exercise of the resale right, particularly with regard to the way this is managed. In this respect management by a collecting society is one possibility. Member States should ensure that collecting societies operate in a transparent and efficient manner. Member States must also ensure that amounts intended for authors who are nationals of other Member States are in fact collected and distributed. This Directive is without prejudice to arrangements in Member States for collection and distribution.
- (29) Enjoyment of the resale right should be restricted to Community nationals as well as to foreign authors whose countries afford such protection to authors who are nationals of Member States. A Member State should have the option of extending enjoyment of this right to foreign authors who have their habitual residence in that Member State.
- (30) Appropriate procedures for monitoring transactions should be introduced so as to ensure by practical means that the resale right is effectively applied by Member States. This implies also a right on the part of the author or his authorised representative to obtain any necessary information from the natural or legal person liable for payment of royalties. Member States which provide for collective management of the resale right may also provide that the bodies responsible for that collective management should alone be entitled to obtain information,

HAVE ADOPTED THIS DIRECTIVE:

CHAPTER I

SCOPE

Article 1

Subject matter of the resale right

1. Member States shall provide, for the benefit of the author of an original work of art, a resale right, to be defined as an inalienable right, which cannot be waived, even in advance, to receive a royalty based on the sale price obtained for any resale of the work, subsequent to the first transfer of the work by the author.
2. The right referred to in paragraph 1 shall apply to all acts of resale involving as sellers, buyers or intermediaries art market professionals, such as salesrooms, art galleries and, in general,

any dealers in works of art.

3. Member States may provide that the right referred to in paragraph 1 shall not apply to acts of resale where the seller has acquired the work directly from the author less than three years before that resale and where the resale price does not exceed EUR 10000.

4. The royalty shall be payable by the seller. Member States may provide that one of the natural or legal persons referred to in paragraph 2 other than the seller shall alone be liable or shall share liability with the seller for payment of the royalty.

Article 2

Works of art to which the resale right relates

1. For the purposes of this Directive, "original work of art" means works of graphic or plastic art such as pictures, collages, paintings, drawings, engravings, prints, lithographs, sculptures, tapestries, ceramics, glassware and photographs, provided they are made by the artist himself or are copies considered to be original works of art.

2. Copies of works of art covered by this Directive, which have been made in limited numbers by the artist himself or under his authority, shall be considered to be original works of art for the purposes of this Directive. Such copies will normally have been numbered, signed or otherwise duly authorised by the artist.

CHAPTER II

PARTICULAR PROVISIONS

Article 3

Threshold

1. It shall be for the Member States to set a minimum sale price from which the sales referred to in Article 1 shall be subject to resale right.

2. This minimum sale price may not under any circumstances exceed EUR 3000.

Article 4

Rates

1. The royalty provided for in Article 1 shall be set at the following rates:

- (a) 4 % for the portion of the sale price up to EUR 50000;
- (b) 3 % for the portion of the sale price from EUR 50000,01 to EUR 200000;
- (c) 1 % for the portion of the sale price from EUR 200000,01 to EUR 350000;
- (d) 0,5 % for the portion of the sale price from EUR 350000,01 to EUR 500000;
- (e) 0,25 % for the portion of the sale price exceeding EUR 500000.

However, the total amount of the royalty may not exceed EUR 12500.

2. By way of derogation from paragraph 1, Member States may apply a rate of 5 % for the portion of the sale price referred to in paragraph 1(a).

3. If the minimum sale price set should be lower than EUR 3000, the Member State shall also determine the rate applicable to the portion of the sale price up to EUR 3000; this rate may not be lower than 4 %.

Article 5

Calculation basis

The sale prices referred to in Articles 3 and 4 are net of tax.

Article 6

Persons entitled to receive royalties

1. The royalty provided for under Article 1 shall be payable to the author of the work and, subject to Article 8(2), after his death to those entitled under him/her.

2. Member States may provide for compulsory or optional collective management of the royalty provided for under Article 1.

Article 7

Third-country nationals entitled to receive royalties

1. Member States shall provide that authors who are nationals of third countries and, subject to Article 8(2), their successors in title shall enjoy the resale right in accordance with this Directive and the legislation of the Member State concerned only if legislation in the country of which the author or his/her successor in title is a national permits resale right protection in that country for authors from the Member States and their successors in title.

2. On the basis of information provided by the Member States, the Commission shall publish as soon as possible an indicative list of those third countries which fulfil the condition set out in paragraph 1. This list shall be kept up to date.

3. Any Member State may treat authors who are not nationals of a Member State but who have their habitual residence in that Member State in the same way as its own nationals for the purpose of resale right protection.

Article 8

Term of protection of the resale right

1. The term of protection of the resale right shall correspond to that laid down in Article 1 of

Directive 93/98/EEC.

2. By way of derogation from paragraph 1, those Member States which do not apply the resale right on (the entry into force date referred to in Article 13), shall not be required, for a period expiring not later than 1 January 2010, to apply the resale right for the benefit of those entitled under the artist after his/her death.

3. A Member State to which paragraph 2 applies may have up to two more years, if necessary to enable the economic operators in that Member State to adapt gradually to the resale right system while maintaining their economic viability, before it is required to apply the resale right for the benefit of those entitled under the artist after his/her death. At least 12 months before the end of the period referred to in paragraph 2, the Member State concerned shall inform the Commission giving its reasons, so that the Commission can give an opinion, after appropriate consultations, within three months following the receipt of such information. If the Member State does not follow the opinion of the Commission, it shall within one month inform the Commission and justify its decision. The notification and justification of the Member State and the opinion of the Commission shall be published in the Official Journal of the European Communities and forwarded to the European Parliament.

4. In the event of the successful conclusion, within the periods referred to in Article 8(2) and (3), of international negotiations aimed at extending the resale right at international level, the Commission shall submit appropriate proposals.

Article 9

Right to obtain information

The Member States shall provide that for a period of three years after the resale, the persons entitled under Article 6 may require from any art market professional mentioned in Article 1(2) to furnish any information that may be necessary in order to secure payment of royalties in respect of the resale.

CHAPTER III

FINAL PROVISIONS

Article 10

Application in time

This Directive shall apply in respect of all original works of art as defined in Article 2 which, on 1 January 2006, are still protected by the legislation of the Member States in the field of copyright or meet the criteria for protection under the provisions of this Directive at that date.

Article 11

Revision clause

1. The Commission shall submit to the European Parliament, the Council and the Economic and Social

Committee not later than 1 January 2009 and every four years thereafter a report on the implementation and the effect of this Directive, paying particular attention to the competitiveness of the market in modern and contemporary art in the Community, especially as regards the position of the Community in relation to relevant markets that do not apply the resale right and the fostering of artistic creativity and the management procedures in the Member States. It shall examine in particular its impact on the internal market and the effect of the introduction of the resale right in those Member States that did not apply the right in national law prior to the entry into force of this Directive. Where appropriate, the Commission shall submit proposals for adapting the minimum threshold and the rates of royalty to take account of changes in the sector, proposals relating to the maximum amount laid down in Article 4(1) and any other proposal it may deem necessary in order to enhance the effectiveness of this Directive.

2. A Contact Committee is hereby established. It shall be composed of representatives of the competent authorities of the Member States. It shall be chaired by a representative of the Commission and shall meet either on the initiative of the Chairman or at the request of the delegation of a Member State.

3. The task of the Committee shall be as follows:

- to organise consultations on all questions deriving from application of this Directive,
- to facilitate the exchange of information between the Commission and the Member States on relevant developments in the art market in the Community.

Article 12

Implementation

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive before 1 January 2006. They shall forthwith inform the Commission thereof.

When Member States adopt these measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such a reference shall be laid down by the Member States.

2. Member States shall communicate to the Commission the provisions of national law which they adopt in the field covered by this Directive.

Article 13

Entry into force

This Directive shall enter into force on the day of its publication in the Official Journal of the European Communities.

Article 14

Addressees

This Directive is addressed to the Member States.

Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of [copyright](#) and related rights in the information society

Directive 2001/29/EC of the European Parliament and of the Council
of 22 May 2001

on the harmonisation of certain aspects of copyright and related rights in the information society

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Articles 47(2), 55 and 95 thereof,

Having regard to the proposal from the Commission(1),

Having regard to the opinion of the Economic and Social Committee(2),

Acting in accordance with the procedure laid down in Article 251 of the Treaty(3),

Whereas:

- (1) The Treaty provides for the establishment of an internal market and the institution of a system ensuring that competition in the internal market is not distorted. Harmonisation of the laws of the Member States on copyright and related rights contributes to the achievement of these objectives.
- (2) The European Council, meeting at Corfu on 24 and 25 June 1994, stressed the need to create a general and flexible legal framework at Community level in order to foster the development of the information society in Europe. This requires, inter alia, the existence of an internal market for new products and services. Important Community legislation to ensure such a regulatory framework is already in place or its adoption is well under way. Copyright and related rights play an important role in this context as they protect and stimulate the development and marketing of new products and services and the creation and exploitation of their creative content.
- (3) The proposed harmonisation will help to implement the four freedoms of the internal market and relates to compliance with the fundamental principles of law and especially of property, including intellectual property, and freedom of expression and the public interest.
- (4) A harmonised legal framework on copyright and related rights, through increased legal certainty and while providing for a high level of protection of intellectual property, will foster substantial investment in creativity and innovation, including network infrastructure, and lead in turn to growth and increased competitiveness of European industry, both in the area of content provision and information technology and more generally across a wide range of industrial and cultural sectors. This will safeguard employment and encourage new job creation.
- (5) Technological development has multiplied and diversified the vectors for creation, production and exploitation. While no new concepts for the protection of intellectual property are needed, the current law on copyright and related rights should be adapted and supplemented to respond adequately to economic realities such as new forms of exploitation.
- (6) Without harmonisation at Community level, legislative activities at national level which have already been initiated in a number of Member States in order to respond to the technological challenges might result in significant differences in protection and thereby in restrictions on the free movement of services and products incorporating, or based on, intellectual property, leading to a refragmentation of the internal market and legislative inconsistency. The impact of such legislative differences and uncertainties will become more significant with the further

development of the information society, which has already greatly increased transborder exploitation of intellectual property. This development will and should further increase. Significant legal differences and uncertainties in protection may hinder economies of scale for new products and services containing copyright and related rights.

- (7) The Community legal framework for the protection of copyright and related rights must, therefore, also be adapted and supplemented as far as is necessary for the smooth functioning of the internal market. To that end, those national provisions on copyright and related rights which vary considerably from one Member State to another or which cause legal uncertainties hindering the smooth functioning of the internal market and the proper development of the information society in Europe should be adjusted, and inconsistent national responses to the technological developments should be avoided, whilst differences not adversely affecting the functioning of the internal market need not be removed or prevented.
- (8) The various social, societal and cultural implications of the information society require that account be taken of the specific features of the content of products and services.
- (9) Any harmonisation of copyright and related rights must take as a basis a high level of protection, since such rights are crucial to intellectual creation. Their protection helps to ensure the maintenance and development of creativity in the interests of authors, performers, producers, consumers, culture, industry and the public at large. Intellectual property has therefore been recognised as an integral part of property.
- (10) If authors or performers are to continue their creative and artistic work, they have to receive an appropriate reward for the use of their work, as must producers in order to be able to finance this work. The investment required to produce products such as phonograms, films or multimedia products, and services such as "on-demand" services, is considerable. Adequate legal protection of intellectual property rights is necessary in order to guarantee the availability of such a reward and provide the opportunity for satisfactory returns on this investment.
- (11) A rigorous, effective system for the protection of copyright and related rights is one of the main ways of ensuring that European cultural creativity and production receive the necessary resources and of safeguarding the independence and dignity of artistic creators and performers.
- (12) Adequate protection of copyright works and subject-matter of related rights is also of great importance from a cultural standpoint. Article 151 of the Treaty requires the Community to take cultural aspects into account in its action.
- (13) A common search for, and consistent application at European level of, technical measures to protect works and other subject-matter and to provide the necessary information on rights are essential insofar as the ultimate aim of these measures is to give effect to the principles and guarantees laid down in law.
- (14) This Directive should seek to promote learning and culture by protecting works and other subject-matter while permitting exceptions or limitations in the public interest for the purpose of education and teaching.
- (15) The Diplomatic Conference held under the auspices of the World Intellectual Property Organisation (WIPO) in December 1996 led to the adoption of two new Treaties, the "WIPO Copyright Treaty" and the "WIPO Performances and Phonograms Treaty", dealing respectively with the protection of authors and the protection of performers and phonogram producers. Those Treaties update the international protection for copyright and related rights significantly, not least with regard to the so-called "digital agenda", and improve the means to fight piracy world-wide. The Community and a majority of Member States have already signed the Treaties and the process of making arrangements

for the ratification of the Treaties by the Community and the Member States is under way. This Directive also serves to implement a number of the new international obligations.

- (16) Liability for activities in the network environment concerns not only copyright and related rights but also other areas, such as defamation, misleading advertising, or infringement of trademarks, and is addressed horizontally in Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the internal market ("Directive on electronic commerce")(4), which clarifies and harmonises various legal issues relating to information society services including electronic commerce. This Directive should be implemented within a timescale similar to that for the implementation of the Directive on electronic commerce, since that Directive provides a harmonised framework of principles and provisions relevant inter alia to important parts of this Directive. This Directive is without prejudice to provisions relating to liability in that Directive.
- (17) It is necessary, especially in the light of the requirements arising out of the digital environment, to ensure that collecting societies achieve a higher level of rationalisation and transparency with regard to compliance with competition rules.
- (18) This Directive is without prejudice to the arrangements in the Member States concerning the management of rights such as extended collective licences.
- (19) The moral rights of rightholders should be exercised according to the legislation of the Member States and the provisions of the Berne Convention for the Protection of Literary and Artistic Works, of the WIPO Copyright Treaty and of the WIPO Performances and Phonograms Treaty. Such moral rights remain outside the scope of this Directive.
- (20) This Directive is based on principles and rules already laid down in the Directives currently in force in this area, in particular Directives 91/250/EEC(5), 92/100/EEC(6), 93/83/EEC(7), 93/98/EEC(8) and 96/9/EC(9), and it develops those principles and rules and places them in the context of the information society. The provisions of this Directive should be without prejudice to the provisions of those Directives, unless otherwise provided in this Directive.
- (21) This Directive should define the scope of the acts covered by the reproduction right with regard to the different beneficiaries. This should be done in conformity with the *acquis communautaire*. A broad definition of these acts is needed to ensure legal certainty within the internal market.
- (22) The objective of proper support for the dissemination of culture must not be achieved by sacrificing strict protection of rights or by tolerating illegal forms of distribution of counterfeited or pirated works.
- (23) This Directive should harmonise further the author's right of communication to the public. This right should be understood in a broad sense covering all communication to the public not present at the place where the communication originates. This right should cover any such transmission or retransmission of a work to the public by wire or wireless means, including broadcasting. This right should not cover any other acts.
- (24) The right to make available to the public subject-matter referred to in Article 3(2) should be understood as covering all acts of making available such subject-matter to members of the public not present at the place where the act of making available originates, and as not covering any other acts.
- (25) The legal uncertainty regarding the nature and the level of protection of acts of on-demand transmission of copyright works and subject-matter protected by related rights over networks should be overcome by providing for harmonised protection at Community level. It should be made clear that all rightholders recognised by this Directive should have an exclusive right to make

available to the public copyright works or any other subject-matter by way of interactive on-demand transmissions. Such interactive on-demand transmissions are characterised by the fact that members of the public may access them from a place and at a time individually chosen by them.

- (26) With regard to the making available in on-demand services by broadcasters of their radio or television productions incorporating music from commercial phonograms as an integral part thereof, collective licensing arrangements are to be encouraged in order to facilitate the clearance of the rights concerned.
- (27) The mere provision of physical facilities for enabling or making a communication does not in itself amount to communication within the meaning of this Directive.
- (28) Copyright protection under this Directive includes the exclusive right to control distribution of the work incorporated in a tangible article. The first sale in the Community of the original of a work or copies thereof by the rightholder or with his consent exhausts the right to control resale of that object in the Community. This right should not be exhausted in respect of the original or of copies thereof sold by the rightholder or with his consent outside the Community. Rental and lending rights for authors have been established in Directive 92/100/EEC. The distribution right provided for in this Directive is without prejudice to the provisions relating to the rental and lending rights contained in Chapter I of that Directive.
- (29) The question of exhaustion does not arise in the case of services and on-line services in particular. This also applies with regard to a material copy of a work or other subject-matter made by a user of such a service with the consent of the rightholder. Therefore, the same applies to rental and lending of the original and copies of works or other subject-matter which are services by nature. Unlike CD-ROM or CD-I, where the intellectual property is incorporated in a material medium, namely an item of goods, every on-line service is in fact an act which should be subject to authorisation where the copyright or related right so provides.
- (30) The rights referred to in this Directive may be transferred, assigned or subject to the granting of contractual licences, without prejudice to the relevant national legislation on copyright and related rights.
- (31) A fair balance of rights and interests between the different categories of rightholders, as well as between the different categories of rightholders and users of protected subject-matter must be safeguarded. The existing exceptions and limitations to the rights as set out by the Member States have to be reassessed in the light of the new electronic environment. Existing differences in the exceptions and limitations to certain restricted acts have direct negative effects on the functioning of the internal market of copyright and related rights. Such differences could well become more pronounced in view of the further development of transborder exploitation of works and cross-border activities. In order to ensure the proper functioning of the internal market, such exceptions and limitations should be defined more harmoniously. The degree of their harmonisation should be based on their impact on the smooth functioning of the internal market.
- (32) This Directive provides for an exhaustive enumeration of exceptions and limitations to the reproduction right and the right of communication to the public. Some exceptions or limitations only apply to the reproduction right, where appropriate. This list takes due account of the different legal traditions in Member States, while, at the same time, aiming to ensure a functioning internal market. Member States should arrive at a coherent application of these exceptions and limitations, which will be assessed when reviewing implementing legislation in the future.
- (33) The exclusive right of reproduction should be subject to an exception to allow certain acts of temporary reproduction, which are transient or incidental reproductions, forming an integral and essential part of a technological process and carried out for the sole purpose of enabling

either efficient transmission in a network between third parties by an intermediary, or a lawful use of a work or other subject-matter to be made. The acts of reproduction concerned should have no separate economic value on their own. To the extent that they meet these conditions, this exception should include acts which enable browsing as well as acts of caching to take place, including those which enable transmission systems to function efficiently, provided that the intermediary does not modify the information and does not interfere with the lawful use of technology, widely recognised and used by industry, to obtain data on the use of the information. A use should be considered lawful where it is authorised by the rightholder or not restricted by law.

- (34) Member States should be given the option of providing for certain exceptions or limitations for cases such as educational and scientific purposes, for the benefit of public institutions such as libraries and archives, for purposes of news reporting, for quotations, for use by people with disabilities, for public security uses and for uses in administrative and judicial proceedings.
- (35) In certain cases of exceptions or limitations, rightholders should receive fair compensation to compensate them adequately for the use made of their protected works or other subject-matter. When determining the form, detailed arrangements and possible level of such fair compensation, account should be taken of the particular circumstances of each case. When evaluating these circumstances, a valuable criterion would be the possible harm to the rightholders resulting from the act in question. In cases where rightholders have already received payment in some other form, for instance as part of a licence fee, no specific or separate payment may be due. The level of fair compensation should take full account of the degree of use of technological protection measures referred to in this Directive. In certain situations where the prejudice to the rightholder would be minimal, no obligation for payment may arise.
- (36) The Member States may provide for fair compensation for rightholders also when applying the optional provisions on exceptions or limitations which do not require such compensation.
- (37) Existing national schemes on reprography, where they exist, do not create major barriers to the internal market. Member States should be allowed to provide for an exception or limitation in respect of reprography.
- (38) Member States should be allowed to provide for an exception or limitation to the reproduction right for certain types of reproduction of audio, visual and audio-visual material for private use, accompanied by fair compensation. This may include the introduction or continuation of remuneration schemes to compensate for the prejudice to rightholders. Although differences between those remuneration schemes affect the functioning of the internal market, those differences, with respect to analogue private reproduction, should not have a significant impact on the development of the information society. Digital private copying is likely to be more widespread and have a greater economic impact. Due account should therefore be taken of the differences between digital and analogue private copying and a distinction should be made in certain respects between them.
- (39) When applying the exception or limitation on private copying, Member States should take due account of technological and economic developments, in particular with respect to digital private copying and remuneration schemes, when effective technological protection measures are available. Such exceptions or limitations should not inhibit the use of technological measures or their enforcement against circumvention.
- (40) Member States may provide for an exception or limitation for the benefit of certain non-profit making establishments, such as publicly accessible libraries and equivalent institutions, as well as archives. However, this should be limited to certain special cases covered by the reproduction right. Such an exception or limitation should not cover uses made in the context of on-line delivery of protected works or other subject-matter. This Directive should be without prejudice to the

Member States' option to derogate from the exclusive public lending right in accordance with Article 5 of Directive 92/100/EEC. Therefore, specific contracts or licences should be promoted which, without creating imbalances, favour such establishments and the disseminative purposes they serve.

- (41) When applying the exception or limitation in respect of ephemeral recordings made by broadcasting organisations it is understood that a broadcaster's own facilities include those of a person acting on behalf of and under the responsibility of the broadcasting organisation.
- (42) When applying the exception or limitation for non-commercial educational and scientific research purposes, including distance learning, the non-commercial nature of the activity in question should be determined by that activity as such. The organisational structure and the means of funding of the establishment concerned are not the decisive factors in this respect.
- (43) It is in any case important for the Member States to adopt all necessary measures to facilitate access to works by persons suffering from a disability which constitutes an obstacle to the use of the works themselves, and to pay particular attention to accessible formats.
- (44) When applying the exceptions and limitations provided for in this Directive, they should be exercised in accordance with international obligations. Such exceptions and limitations may not be applied in a way which prejudices the legitimate interests of the rightholder or which conflicts with the normal exploitation of his work or other subject-matter. The provision of such exceptions or limitations by Member States should, in particular, duly reflect the increased economic impact that such exceptions or limitations may have in the context of the new electronic environment. Therefore, the scope of certain exceptions or limitations may have to be even more limited when it comes to certain new uses of copyright works and other subject-matter.
- (45) The exceptions and limitations referred to in Article 5(2), (3) and (4) should not, however, prevent the definition of contractual relations designed to ensure fair compensation for the rightholders insofar as permitted by national law.
- (46) Recourse to mediation could help users and rightholders to settle disputes. The Commission, in cooperation with the Member States within the Contact Committee, should undertake a study to consider new legal ways of settling disputes concerning copyright and related rights.
- (47) Technological development will allow rightholders to make use of technological measures designed to prevent or restrict acts not authorised by the rightholders of any copyright, rights related to copyright or the sui generis right in databases. The danger, however, exists that illegal activities might be carried out in order to enable or facilitate the circumvention of the technical protection provided by these measures. In order to avoid fragmented legal approaches that could potentially hinder the functioning of the internal market, there is a need to provide for harmonised legal protection against circumvention of effective technological measures and against provision of devices and products or services to this effect.
- (48) Such legal protection should be provided in respect of technological measures that effectively restrict acts not authorised by the rightholders of any copyright, rights related to copyright or the sui generis right in databases without, however, preventing the normal operation of electronic equipment and its technological development. Such legal protection implies no obligation to design devices, products, components or services to correspond to technological measures, so long as such device, product, component or service does not otherwise fall under the prohibition of Article 6. Such legal protection should respect proportionality and should not prohibit those devices or activities which have a commercially significant purpose or use other than to circumvent the technical protection. In particular, this protection should not hinder research into cryptography.
- (49) The legal protection of technological measures is without prejudice to the application of

any national provisions which may prohibit the private possession of devices, products or components for the circumvention of technological measures.

- (50) Such a harmonised legal protection does not affect the specific provisions on protection provided for by Directive 91/250/EEC. In particular, it should not apply to the protection of technological measures used in connection with computer programs, which is exclusively addressed in that Directive. It should neither inhibit nor prevent the development or use of any means of circumventing a technological measure that is necessary to enable acts to be undertaken in accordance with the terms of Article 5(3) or Article 6 of Directive 91/250/EEC. Articles 5 and 6 of that Directive exclusively determine exceptions to the exclusive rights applicable to computer programs.
- (51) The legal protection of technological measures applies without prejudice to public policy, as reflected in Article 5, or public security. Member States should promote voluntary measures taken by rightholders, including the conclusion and implementation of agreements between rightholders and other parties concerned, to accommodate achieving the objectives of certain exceptions or limitations provided for in national law in accordance with this Directive. In the absence of such voluntary measures or agreements within a reasonable period of time, Member States should take appropriate measures to ensure that rightholders provide beneficiaries of such exceptions or limitations with appropriate means of benefiting from them, by modifying an implemented technological measure or by other means. However, in order to prevent abuse of such measures taken by rightholders, including within the framework of agreements, or taken by a Member State, any technological measures applied in implementation of such measures should enjoy legal protection.
- (52) When implementing an exception or limitation for private copying in accordance with Article 5(2)(b), Member States should likewise promote the use of voluntary measures to accommodate achieving the objectives of such exception or limitation. If, within a reasonable period of time, no such voluntary measures to make reproduction for private use possible have been taken, Member States may take measures to enable beneficiaries of the exception or limitation concerned to benefit from it. Voluntary measures taken by rightholders, including agreements between rightholders and other parties concerned, as well as measures taken by Member States, do not prevent rightholders from using technological measures which are consistent with the exceptions or limitations on private copying in national law in accordance with Article 5(2)(b), taking account of the condition of fair compensation under that provision and the possible differentiation between various conditions of use in accordance with Article 5(5), such as controlling the number of reproductions. In order to prevent abuse of such measures, any technological measures applied in their implementation should enjoy legal protection.
- (53) The protection of technological measures should ensure a secure environment for the provision of interactive on-demand services, in such a way that members of the public may access works or other subject-matter from a place and at a time individually chosen by them. Where such services are governed by contractual arrangements, the first and second subparagraphs of Article 6(4) should not apply. Non-interactive forms of online use should remain subject to those provisions.
- (54) Important progress has been made in the international standardisation of technical systems of identification of works and protected subject-matter in digital format. In an increasingly networked environment, differences between technological measures could lead to an incompatibility of systems within the Community. Compatibility and interoperability of the different systems should be encouraged. It would be highly desirable to encourage the development of global systems.
- (55) Technological development will facilitate the distribution of works, notably on networks, and this will entail the need for rightholders to identify better the work or other subject-matter, the author or any other rightholder, and to provide information about the terms and conditions of use of the work or other subject-matter in order to render easier the management of rights

attached to them. Rightholders should be encouraged to use markings indicating, in addition to the information referred to above, inter alia their authorisation when putting works or other subject-matter on networks.

- (56) There is, however, the danger that illegal activities might be carried out in order to remove or alter the electronic copyright-management information attached to it, or otherwise to distribute, import for distribution, broadcast, communicate to the public or make available to the public works or other protected subject-matter from which such information has been removed without authority. In order to avoid fragmented legal approaches that could potentially hinder the functioning of the internal market, there is a need to provide for harmonised legal protection against any of these activities.
- (57) Any such rights-management information systems referred to above may, depending on their design, at the same time process personal data about the consumption patterns of protected subject-matter by individuals and allow for tracing of on-line behaviour. These technical means, in their technical functions, should incorporate privacy safeguards in accordance with Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and the free movement of such data(10).
- (58) Member States should provide for effective sanctions and remedies for infringements of rights and obligations as set out in this Directive. They should take all the measures necessary to ensure that those sanctions and remedies are applied. The sanctions thus provided for should be effective, proportionate and dissuasive and should include the possibility of seeking damages and/or injunctive relief and, where appropriate, of applying for seizure of infringing material.
- (59) In the digital environment, in particular, the services of intermediaries may increasingly be used by third parties for infringing activities. In many cases such intermediaries are best placed to bring such infringing activities to an end. Therefore, without prejudice to any other sanctions and remedies available, rightholders should have the possibility of applying for an injunction against an intermediary who carries a third party's infringement of a protected work or other subject-matter in a network. This possibility should be available even where the acts carried out by the intermediary are exempted under Article 5. The conditions and modalities relating to such injunctions should be left to the national law of the Member States.
- (60) The protection provided under this Directive should be without prejudice to national or Community legal provisions in other areas, such as industrial property, data protection, conditional access, access to public documents, and the rule of media exploitation chronology, which may affect the protection of copyright or related rights.
- (61) In order to comply with the WIPO Performances and Phonograms Treaty, Directives 92/100/EEC and 93/98/EEC should be amended,

HAVE ADOPTED THIS DIRECTIVE:

CHAPTER I

OBJECTIVE AND SCOPE

Article 1

Scope

1. This Directive concerns the legal protection of copyright and related rights in the framework

of the internal market, with particular emphasis on the information society.

2. Except in the cases referred to in Article 11, this Directive shall leave intact and shall in no way affect existing Community provisions relating to:

- (a) the legal protection of computer programs;
- (b) rental right, lending right and certain rights related to copyright in the field of intellectual property;
- (c) copyright and related rights applicable to broadcasting of programmes by satellite and cable retransmission;
- (d) the term of protection of copyright and certain related rights;
- (e) the legal protection of databases.

CHAPTER II

RIGHTS AND EXCEPTIONS

Article 2

Reproduction right

Member States shall provide for the exclusive right to authorise or prohibit direct or indirect, temporary or permanent reproduction by any means and in any form, in whole or in part:

- (a) for authors, of their works;
- (b) for performers, of fixations of their performances;
- (c) for phonogram producers, of their phonograms;
- (d) for the producers of the first fixations of films, in respect of the original and copies of their films;
- (e) for broadcasting organisations, of fixations of their broadcasts, whether those broadcasts are transmitted by wire or over the air, including by cable or satellite.

Article 3

Right of communication to the public of works and right of making available to the public other subject-matter

1. Member States shall provide authors with the exclusive right to authorise or prohibit any communication to the public of their works, by wire or wireless means, including the making available to the public of their works in such a way that members of the public may access them from a place and at a time individually chosen by them.

2. Member States shall provide for the exclusive right to authorise or prohibit the making available to the public, by wire or wireless means, in such a way that members of the public may access them from a place and at a time individually chosen by them:

- (a) for performers, of fixations of their performances;

- (b) for phonogram producers, of their phonograms;
 - (c) for the producers of the first fixations of films, of the original and copies of their films;
 - (d) for broadcasting organisations, of fixations of their broadcasts, whether these broadcasts are transmitted by wire or over the air, including by cable or satellite.
3. The rights referred to in paragraphs 1 and 2 shall not be exhausted by any act of communication to the public or making available to the public as set out in this Article.

Article 4

Distribution right

1. Member States shall provide for authors, in respect of the original of their works or of copies thereof, the exclusive right to authorise or prohibit any form of distribution to the public by sale or otherwise.
2. The distribution right shall not be exhausted within the Community in respect of the original or copies of the work, except where the first sale or other transfer of ownership in the Community of that object is made by the rightholder or with his consent.

Article 5

Exceptions and limitations

1. Temporary acts of reproduction referred to in Article 2, which are transient or incidental [and] an integral and essential part of a technological process and whose sole purpose is to enable:
 - (a) a transmission in a network between third parties by an intermediary, or
 - (b) a lawful useof a work or other subject-matter to be made, and which have no independent economic significance, shall be exempted from the reproduction right provided for in Article 2.
2. Member States may provide for exceptions or limitations to the reproduction right provided for in Article 2 in the following cases:
 - (a) in respect of reproductions on paper or any similar medium, effected by the use of any kind of photographic technique or by some other process having similar effects, with the exception of sheet music, provided that the rightholders receive fair compensation;
 - (b) in respect of reproductions on any medium made by a natural person for private use and for ends that are neither directly nor indirectly commercial, on condition that the rightholders receive fair compensation which takes account of the application or non-application of technological measures referred to in Article 6 to the work or subject-matter concerned;
 - (c) in respect of specific acts of reproduction made by publicly accessible libraries, educational establishments or museums, or by archives, which are not for direct or indirect economic or commercial advantage;
 - (d) in respect of ephemeral recordings of works made by broadcasting organisations by means of their own facilities and for their own broadcasts; the preservation of these recordings in official

archives may, on the grounds of their exceptional documentary character, be permitted;

(e) in respect of reproductions of broadcasts made by social institutions pursuing non-commercial purposes, such as hospitals or prisons, on condition that the rightholders receive fair compensation.

3. Member States may provide for exceptions or limitations to the rights provided for in Articles 2 and 3 in the following cases:

(a) use for the sole purpose of illustration for teaching or scientific research, as long as the source, including the author's name, is indicated, unless this turns out to be impossible and to the extent justified by the non-commercial purpose to be achieved;

(b) uses, for the benefit of people with a disability, which are directly related to the disability and of a non-commercial nature, to the extent required by the specific disability;

(c) reproduction by the press, communication to the public or making available of published articles on current economic, political or religious topics or of broadcast works or other subject-matter of the same character, in cases where such use is not expressly reserved, and as long as the source, including the author's name, is indicated, or use of works or other subject-matter in connection with the reporting of current events, to the extent justified by the informatory purpose and as long as the source, including the author's name, is indicated, unless this turns out to be impossible;

(d) quotations for purposes such as criticism or review, provided that they relate to a work or other subject-matter which has already been lawfully made available to the public, that, unless this turns out to be impossible, the source, including the author's name, is indicated, and that their use is in accordance with fair practice, and to the extent required by the specific purpose;

(e) use for the purposes of public security or to ensure the proper performance or reporting of administrative, parliamentary or judicial proceedings;

(f) use of political speeches as well as extracts of public lectures or similar works or subject-matter to the extent justified by the informatory purpose and provided that the source, including the author's name, is indicated, except where this turns out to be impossible;

(g) use during religious celebrations or official celebrations organised by a public authority;

(h) use of works, such as works of architecture or sculpture, made to be located permanently in public places;

(i) incidental inclusion of a work or other subject-matter in other material;

(j) use for the purpose of advertising the public exhibition or sale of artistic works, to the extent necessary to promote the event, excluding any other commercial use;

(k) use for the purpose of caricature, parody or pastiche;

(l) use in connection with the demonstration or repair of equipment;

(m) use of an artistic work in the form of a building or a drawing or plan of a building for the purposes of reconstructing the building;

(n) use by communication or making available, for the purpose of research or private study, to individual members of the public by dedicated terminals on the premises of establishments referred to in paragraph 2(c) of works and other subject-matter not subject to purchase or licensing terms which are contained in their collections;

(o) use in certain other cases of minor importance where exceptions or limitations already exist under national law, provided that they only concern analogue uses and do not affect the free

circulation of goods and services within the Community, without prejudice to the other exceptions and limitations contained in this Article.

4. Where the Member States may provide for an exception or limitation to the right of reproduction pursuant to paragraphs 2 and 3, they may provide similarly for an exception or limitation to the right of distribution as referred to in Article 4 to the extent justified by the purpose of the authorised act of reproduction.

5. The exceptions and limitations provided for in paragraphs 1, 2, 3 and 4 shall only be applied in certain special cases which do not conflict with a normal exploitation of the work or other subject-matter and do not unreasonably prejudice the legitimate interests of the rightholder.

CHAPTER III

PROTECTION OF TECHNOLOGICAL MEASURES AND RIGHTS-MANAGEMENT INFORMATION

Article 6

Obligations as to technological measures

1. Member States shall provide adequate legal protection against the circumvention of any effective technological measures, which the person concerned carries out in the knowledge, or with reasonable grounds to know, that he or she is pursuing that objective.

2. Member States shall provide adequate legal protection against the manufacture, import, distribution, sale, rental, advertisement for sale or rental, or possession for commercial purposes of devices, products or components or the provision of services which:

- (a) are promoted, advertised or marketed for the purpose of circumvention of, or
- (b) have only a limited commercially significant purpose or use other than to circumvent, or
- (c) are primarily designed, produced, adapted or performed for the purpose of enabling or facilitating the circumvention of,

any effective technological measures.

3. For the purposes of this Directive, the expression "technological measures" means any technology, device or component that, in the normal course of its operation, is designed to prevent or restrict acts, in respect of works or other subject-matter, which are not authorised by the rightholder of any copyright or any right related to copyright as provided for by law or the sui generis right provided for in Chapter III of Directive 96/9/EC. Technological measures shall be deemed "effective" where the use of a protected work or other subject-matter is controlled by the rightholders through application of an access control or protection process, such as encryption, scrambling or other transformation of the work or other subject-matter or a copy control mechanism, which achieves the protection objective.

4. Notwithstanding the legal protection provided for in paragraph 1, in the absence of voluntary measures taken by rightholders, including agreements between rightholders and other parties concerned, Member States shall take appropriate measures to ensure that rightholders make available to the beneficiary of an exception or limitation provided for in national law in accordance with Article 5(2)(a), (2)(c), (2)(d), (2)(e), (3)(a), (3)(b) or (3)(e) the means of benefiting from that exception or limitation, to the extent necessary to benefit from that exception or limitation and where that beneficiary has legal access to the protected work or subject-matter concerned.

A Member State may also take such measures in respect of a beneficiary of an exception or limitation provided for in accordance with Article 5(2)(b), unless reproduction for private use has already been made possible by rightholders to the extent necessary to benefit from the exception or limitation concerned and in accordance with the provisions of Article 5(2)(b) and (5), without preventing rightholders from adopting adequate measures regarding the number of reproductions in accordance with these provisions.

The technological measures applied voluntarily by rightholders, including those applied in implementation of voluntary agreements, and technological measures applied in implementation of the measures taken by Member States, shall enjoy the legal protection provided for in paragraph 1.

The provisions of the first and second subparagraphs shall not apply to works or other subject-matter made available to the public on agreed contractual terms in such a way that members of the public may access them from a place and at a time individually chosen by them.

When this Article is applied in the context of Directives 92/100/EEC and 96/9/EC, this paragraph shall apply *mutatis mutandis*.

Article 7

Obligations concerning rights-management information

1. Member States shall provide for adequate legal protection against any person knowingly performing without authority any of the following acts:

- (a) the removal or alteration of any electronic rights-management information;
- (b) the distribution, importation for distribution, broadcasting, communication or making available to the public of works or other subject-matter protected under this Directive or under Chapter III of Directive 96/9/EC from which electronic rights-management information has been removed or altered without authority,

if such person knows, or has reasonable grounds to know, that by so doing he is inducing, enabling, facilitating or concealing an infringement of any copyright or any rights related to copyright as provided by law, or of the *sui generis* right provided for in Chapter III of Directive 96/9/EC.

2. For the purposes of this Directive, the expression "rights-management information" means any information provided by rightholders which identifies the work or other subject-matter referred to in this Directive or covered by the *sui generis* right provided for in Chapter III of Directive 96/9/EC, the author or any other rightholder, or information about the terms and conditions of use of the work or other subject-matter, and any numbers or codes that represent such information.

The first subparagraph shall apply when any of these items of information is associated with a copy of, or appears in connection with the communication to the public of, a work or other subject-matter referred to in this Directive or covered by the *sui generis* right provided for in Chapter III of Directive 96/9/EC.

CHAPTER IV

COMMON PROVISIONS

Article 8

Sanctions and remedies

1. Member States shall provide appropriate sanctions and remedies in respect of infringements of the rights and obligations set out in this Directive and shall take all the measures necessary to ensure that those sanctions and remedies are applied. The sanctions thus provided for shall be effective, proportionate and dissuasive.
2. Each Member State shall take the measures necessary to ensure that rightholders whose interests are affected by an infringing activity carried out on its territory can bring an action for damages and/or apply for an injunction and, where appropriate, for the seizure of infringing material as well as of devices, products or components referred to in Article 6(2).
3. Member States shall ensure that rightholders are in a position to apply for an injunction against intermediaries whose services are used by a third party to infringe a copyright or related right.

Article 9

Continued application of other legal provisions

This Directive shall be without prejudice to provisions concerning in particular patent rights, trade marks, design rights, utility models, topographies of semi-conductor products, type faces, conditional access, access to cable of broadcasting services, protection of national treasures, legal deposit requirements, laws on restrictive practices and unfair competition, trade secrets, security, confidentiality, data protection and privacy, access to public documents, the law of contract.

Article 10

Application over time

1. The provisions of this Directive shall apply in respect of all works and other subject-matter referred to in this Directive which are, on 22 December 2002, protected by the Member States' legislation in the field of copyright and related rights, or which meet the criteria for protection under the provisions of this Directive or the provisions referred to in Article 1(2).
2. This Directive shall apply without prejudice to any acts concluded and rights acquired before 22 December 2002.

Article 11

Technical adaptations

1. Directive 92/100/EEC is hereby amended as follows:
 - (a) Article 7 shall be deleted;
 - (b) Article 10(3) shall be replaced by the following: "3. The limitations shall only be applied in certain special cases which do not conflict with a normal exploitation of the subject-matter and do not unreasonably prejudice the legitimate interests of the rightholder."
2. Article 3(2) of Directive 93/98/EEC shall be replaced by the following: "2. The rights of

producers of phonograms shall expire 50 years after the fixation is made. However, if the phonogram has been lawfully published within this period, the said rights shall expire 50 years from the date of the first lawful publication. If no lawful publication has taken place within the period mentioned in the first sentence, and if the phonogram has been lawfully communicated to the public within this period, the said rights shall expire 50 years from the date of the first lawful communication to the public.

However, where through the expiry of the term of protection granted pursuant to this paragraph in its version before amendment by Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society(11) the rights of producers of phonograms are no longer protected on 22 December 2002, this paragraph shall not have the effect of protecting those rights anew."

Article 12

Final provisions

1. Not later than 22 December 2004 and every three years thereafter, the Commission shall submit to the European Parliament, the Council and the Economic and Social Committee a report on the application of this Directive, in which, inter alia, on the basis of specific information supplied by the Member States, it shall examine in particular the application of Articles 5, 6 and 8 in the light of the development of the digital market. In the case of Article 6, it shall examine in particular whether that Article confers a sufficient level of protection and whether acts which are permitted by law are being adversely affected by the use of effective technological measures. Where necessary, in particular to ensure the functioning of the internal market pursuant to Article 14 of the Treaty, it shall submit proposals for amendments to this Directive.

2. Protection of rights related to copyright under this Directive shall leave intact and shall in no way affect the protection of copyright.

3. A contact committee is hereby established. It shall be composed of representatives of the competent authorities of the Member States. It shall be chaired by a representative of the Commission and shall meet either on the initiative of the chairman or at the request of the delegation of a Member State.

4. The tasks of the committee shall be as follows:

- (a) to examine the impact of this Directive on the functioning of the internal market, and to highlight any difficulties;
- (b) to organise consultations on all questions deriving from the application of this Directive;
- (c) to facilitate the exchange of information on relevant developments in legislation and case-law, as well as relevant economic, social, cultural and technological developments;
- (d) to act as a forum for the assessment of the digital market in works and other items, including private copying and the use of technological measures.

Article 13

Implementation

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive before 22 December 2002. They shall forthwith inform the Commission thereof.

When Member States adopt these measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2. Member States shall communicate to the Commission the text of the provisions of domestic law which they adopt in the field governed by this Directive.

Article 14

Entry into force

This Directive shall enter into force on the day of its publication in the Official Journal of the European Communities.

Article 15

Addressees

This Directive is addressed to the Member States.

POSSIBLE ABUSES OF TRADE MARK RIGHTS WITHIN THE EU IN THE CONTEXT OF COMMUNITY EXHAUSTION

This report examines the background behind the current discussion on exhaustion of trade marks before proceeding to a description of the Commission's investigation in response to the Parliament's question and the results of that investigation.

In addition to making a study of past and present competition cases involving alleged abuses of trade marks, the Commission also sent questionnaires to over sixty interested parties, chiefly organisations representing rightsholders, consumers and parallel traders asking for their experiences of such abuses.

The possible abuses identified in the course of the investigation can broadly be divided into three categories – problems that appear to relate to selective distribution systems, problems of abusive refusal to license trade marks, and problems of trade mark infringements themselves. For each of these different areas, an overview is made of the relevant case law (both settled and on-going) and it is concluded that the alleged abuses identified can, in general, be dealt with through existing legal provisions particular to that area.

Therefore, the report concludes that the Commission, as a result of the present investigation, has not found any deficiencies in current legal provision relating to possible abuses of trade marks within the EU.

1. INTRODUCTION

This report comes in response to the resolution adopted by the European Parliament on the 3rd October 2001 calling on the European Commission to examine various aspects relating to the exhaustion of trade marks within the EU. The Commission stated its willingness to look at the Parliament's request for it "*to present a report on any abuses of trade mark rights notified to the Commission, to explain how such cases of abuse have been addressed, including with regard to competition rules, and to identify possible deficiencies that may exist in current legal provision*"¹.

In addition to looking at possible abuses notified to the Commission (and interpreting the notion of 'abuse' in its widest sense i.e. beyond the definition used in Article 82 EC "*abuse by one or more undertakings of a dominant position*"), we have also taken the opportunity to consult with interested parties on a wider basis in order to look at the

¹ statement of Commissioner Bolkestein 3/10/01, this commitment was subsequently confirmed in response to a question submitted by MEPs Mayer and Lehne on 25/9/02.

question of possible abuses of trade marks occurring in the EU which have not been directly notified to the Commission.

2. BACKGROUND

The current régime inside the EU of Community exhaustion means that, in law, trade mark rights cannot be invoked to restrain the free movement of goods within the EU, but they can be used to restrain the entry of such goods into the EU. An alternative to this, international exhaustion (or, more correctly, global exhaustion) would mean that the flow of goods into the EU could not be restrained by such rights.

2.1. Current legal situation on exhaustion of trade marks

The current legal situation regarding the exhaustion of trade marks within the EU is rather clear. First of all, the principle of *Community* exhaustion has been well established as upheld by the European Court of Justice in cases such as Centrafarm/Winthrop² and Hoffman-La Roche/Centrafarm³.

It is also clearly established that there is no international, or global, exhaustion as a result, in particular, of the Silhouette⁴, Sebago⁵ and Zino Davidoff⁶ cases. In other words, trade mark holders *do* have the right to prevent the import into the EU of goods even if those goods were placed on the market *outside* the EU with the consent of the trade mark holder.

2.2. Commission study of exhaustion régime for trade marks

In February 1999, a study prepared by NERA⁷ at the request of the Commission, was published which examined the economic consequences of the different exhaustion régimes for trade marks. Furthermore, two meetings of Member States experts were organised on the issue on the basis of a Commission working document and a public hearing was held in 1999 with interested parties to allow an exchange of views.

3. METHODOLOGY

3.1. Working approach

In order to gather as much relevant information as possible, an extensive consultation was carried out both internally, within the different departments of the Commission, and externally with interested parties.

⁷ National Economic Research Associates

In the course of July 2002, questionnaires (see annex) were sent out to over sixty organisations. Responses were requested by 30th September 2002. The organisations chosen fell into three broad categories: (i) rightsholders (ii) consumer groups and (iii) parallel traders. In some cases, the addressees were lawyers representing the respective organisations.

The term ‘parallel trader’ is here used to denote companies which are not rightsholders but which trade at a wholesale or retail level and exploit differences in price levels between different regions or countries. This applies to traders both within and outside the EU.

A decision was made, on grounds of efficiency, to target representative organisations at a European level. In general, there are many more European-level associations representing rightsholders than consumer groups or parallel traders. A special effort was therefore made to identify organisations representing the latter in order to ensure that a full range of interests and opinions was covered.

3.2. Results of questionnaires

Replies were eventually received from some two dozen organisations. Of these, two were from consumer groups and six from ‘parallel traders’ within the definition above. Although the consumer groups and parallel traders provided a minority of the respondents, they provided probably three quarters of the responses in terms of volume of text received (some 300-400 pages). They therefore made a very important contribution to the survey that was undertaken.

The following represents a summary of the responses received. It should be noted that several respondents only agreed to contribute to the study on the understanding that their responses would not be published. To respect their wish, the Commission has not therefore annexed the responses to the present report.

3.2.1. Rightsholders

Perhaps not surprisingly, none of the rightsholders who responded to the questionnaire reported being aware of any cases of abuse of trade mark rights.

A number of respondents addressed the issue of the disadvantages associated with international, rather than Community, exhaustion of trade marks. They mentioned the difficulties this would cause rightsholders in tailoring their products to different local market conditions and the effect this would have on consumer confidence, and even safety.

One respondent also noted that international exhaustion would impede the ability of rightsholders to prevent counterfeit goods coming onto the market. Although they did not explicitly explain why, the implication seems to be that certain countries (outside the EU) are the origin of a disproportionate number of counterfeit goods. It follows that, the ability of rightsholders to prevent imports of both legitimate *and* illegitimate goods from these countries may be a useful tool to combat counterfeiting.

A number of respondents noted that many of the possible ‘abuses’ of trade mark rights would be covered by the relevant provisions of European competition law, both Articles 81 and 82 EC, and notably Block Exemption Regulation 2790/99 (see section 4.2).

In particular, one respondent raised the question of how the Commission is supposed to assess whether ‘pricesetting’ by trade mark holders is abusive. Price differences between different countries would not be evidence of abusive pricing (see also discussion in section 5.2). Such differences could result from differences in tax levels, exchange rates, subsidies, market scale, consumer preferences, sales promotion strategies, retail market characteristics and production, distribution and/or marketing costs.

The same respondent made the point that, for non-dominant companies, abusive conduct such as supercompetitive pricing would be punished by market forces since buyers would switch to other suppliers. It is furthermore not demonstrated that the markets in which branded goods are claimed to be overpriced are characterised by market dominance of a single company.

3.2.2. *Consumer groups*

The response from consumer groups was rather sparse. Neither of the two responses provided any evidence of cases of abuse of trade marks, and one of the responses suggested that the Commission was, in any case, not seriously interested in finding any such cases.

3.2.3. *Parallel traders*

The respondents noted a number of problems deriving from the lack of international exhaustion. These problems related particularly to the cosmetics, and also the alcoholic spirits, sectors, but it was claimed (although not substantiated) that similar problems also arise in textiles, films and photos and other types of branded goods.

One respondent gave a detailed analysis of the difference in price levels of cosmetics between the EU and the USA, claiming that prices in the EU were typically 20%-40% higher, a difference that could not be attributed to transport costs for the goods in question.

The complaints centred on a number of interrelated issues. Firstly, that, following the Zino Davidoff ruling, the burden of proof is placed on parallel traders to demonstrate the origin of the goods which they are trading. This means that a rightsholder has the ability, by alleging trade mark infringement, to force the parallel trader to reveal the origin of branded goods even if this origin is within the EU and the goods are authentic. Thus the allegation of infringement, even if completely unsubstantiated, can be used by rightsholders to identify the origin of branded goods.

A similar complaint is made in relation to number-based code systems. This is where the manufacturer places a code on the product which identifies the origin of the goods. These codes are typically encrypted such that they can be understood only by the manufacturer himself (rather than a parallel trader). A number of respondents complained that the removal of the number code from the product is considered illegal under either national fair trading regulations or trade mark law itself (this is claimed to be particularly the case in the Netherlands⁸, Belgium⁹, Germany¹⁰, the United Kingdom¹¹ and Italy), even where the companies in question were not trying to repackage the goods, or interfere with the trade mark in any way.

The respondents claim that, once rightsholders are able to identify the origin of branded goods (through the two methods noted above), they are then able to abuse this information at the expense of the parallel traders. Here the complaints centred almost entirely on selective distribution systems (in the economic sectors noted above). It was alleged that rightsholders use these systems, and the information on origin of goods, to restrict parallel trade *within* the EU and to put pressure on distributors and retailers to keep prices high.

In particular, one respondent complained that most contracts for selective distribution systems contain very vaguely worded requirements that the distributor or retailer must meet. Such clauses would discriminate among newcomers to the system and against those with novel forms of distribution. In some cases, it is alleged that there is a situation of a dominant oligopoly of producers which, in combination with selective distribution and the lack of international exhaustion, closes all alternative supply routes to retailers excluded from the distribution system. Finally, suppliers in selective distribution systems are alleged to exert a high degree of sales pressure by setting unachievable sales targets for distributors. If these targets are not met, distributors are threatened with termination of their distribution agreements.

The same respondent also noted that manufacturers may produce quantities of products in excess of the actual consumer demand. They may then offload the products on distributors within the EU and then prevent precisely those same distributors from selling within the EU (presumably the origin of the products in question is outside the EU).

3.3. Interface with competition law

3.3.1. *On-going or informally resolved cases involving trade marks and Article 81 EC*

3.3.1.1. Use of trade marks to enforce restriction of sales to authorised distributors in selective distribution systems

A number of complaints have been received regarding control systems in selective distribution systems which allow manufacturers to track products through the distribution chain. So far, however, the Commission has considered the use of codes to detect whether products remain within the authorised network of distributors to be a reasonable means to monitor and implement compliance with agreements exempted (approved in principle, see section 4.2.1) by the Commission. Hence the Commission did not find any of the control systems complained of to infringe Article 81 EC.

3.3.1.2. Licensing of trade marks according to national territories

In the Duales System Deutschland case (DSD), the Commission assessed the set of agreements by which DSD granted the association Pro Europe the right to control the Green Dot trade mark outside Germany. Through the same set of agreements, Pro Europe licensed the right to use and sublicense the Green Dot trade mark to its members in their respective territories. Pro Europe submitted undertakings to the Commission stating that its licensing arrangements would not prevent the entry into the market of competitors.

In the Visa International case, the Commission examined the principle of territorial licensing, including of trade marks, in the agreements between Visa International and its member financial institutions which operated the Visa card system network. The Commission, in its decision¹², noted that each Visa member was able to obtain an amendment to the original trade mark licence or an ‘additional licence’, depending on local trade mark law, for any other territory where it was authorised to carry out banking activities. Hence, the principle of territorial licensing *as such* was not found to be an appreciable restriction of competition under Article 81(1) EC¹³.

3.3.1.3. Clause for termination of trade mark licences on the acquisition of the licensee by a resident of another Member State

In Vickers/Rolls Royce, the Commission did not find any restriction of competition in the clause granting the trade mark

¹² of 9/8/01

¹³ Commission Decision of 9/8/01, OJ 2001 L-293/24

holder (Rolls Royce) the power to terminate the trade mark licence in the event of a licensee (Rolls Royce Motors Group) coming under the control of a non-UK resident. The Commission rejected the request of Vickers (a parent company of the licensee) for interim measures after having found no *prima facie* infringement of competition rules. For the Commission, it was not clear that the ‘resident clause’ had a significant impact on the conditions of competition as Vickers failed to show that the purchase of a company currently active in the relevant market(s) was the only way for a new company to enter the market for luxury cars. Moreover, the ‘resident clause’ did not seem to have the significance claimed by Vickers as the licensor actually supported the sale of the licensee to a non-UK resident¹⁴.

3.3.1.4. Delimitation agreements

Delimitation agreements may infringe Article 81 EC if they aim at dividing up the market or restricting competition in other ways. However, such agreements are lawful and useful if they serve to delimit, in the mutual interest of the parties concerned, the spheres within which their respective trade marks may be used and are intended to avoid confusion or conflict between them¹⁵. On the same basis, the Commission cleared a notified agreement in which the use of similar trade marks was delimited on a non-geographical basis¹⁶.

3.3.2. *On-going or informally resolved cases involving trade marks and Article 82 EC*

In the Duales System Deutschland (DSD) case¹⁷, the Commission ruled on a system under which DSD, the owner of the Green Dot trade mark, organised a waste recovery system on behalf of manufacturers and distributors in Germany. The Commission found that there had been an abuse of dominant position with respect to DSD’s practice of linking the licence fees solely to the amount of packaging using the Green Dot trade mark and not to the amount of packaging for which DSD was actually providing its waste recovery service. This obliged customers to pay for services not actually provided by DSD and hence prevented market entry by competitors.

The Commission and DSD disagreed over the function of the Green Dot trade mark, as to whether it implied that the packaging in question would be recovered by DSD itself or whether it merely implied to the consumer

that (s)he has the option of having the packaging collected by DSD¹⁸. The parties are currently awaiting a judgement of the Court of First Instance on the substance of the case.

4. SELECTIVE DISTRIBUTION SYSTEMS

4.1. Economic role of selective distribution systems

Some of the products commonly protected by trade marks are also marketed through selective distribution systems, in particular cosmetics. Selective distribution systems are used by suppliers who generally do not distribute the products themselves and who require that the products in question should be sold in a certain way, in particular that specified *pre-sales services* should be provided to the customer.

For cosmetics, this may be to ensure that the sales service provided is consistent with the image of the brand concerned, that the customer should be fully informed and advised about the product they are purchasing. Another example might be consumer electronic goods where the customer requires technical advice before purchasing the product in question.

In the absence of a selective distribution system, there may be a problem of *free riding*. A customer may find it suits them best to go to a *bona fide* distributor where they will be informed about the product in question but then buy the products themselves from a free riding distributor who is able to sell more cheaply because he does not provide the pre-sales services in question.

In order to circumvent this problem, suppliers may decide to set up a selective distribution system. In the system, the supplier supplies the product only to *authorised* distributors. These distributors are constrained, in return, to provide certain pre-sales services to customers. They are also constrained only to resell to end customers or to other authorised distributors. In this way, the system is said to be impermeable because, in theory, none of the products will 'leak' into the hands of unauthorised distributors.

In some cases, notably cosmetics, selective distribution systems are *complementary* to the use of trade marks, but they are not the same. Selective distribution systems ensure the provision of pre-sales services whereas trade marks are designed to protect the presentation of the products themselves. Many trade marked goods are not distributed selectively, and some non-trade marked goods may be subject to selective distribution (e.g. certain electronic components).

4.2. Legal framework

Agreements between different companies ('undertakings') are governed by Article 81 EC. This includes also the agreements at issue here, namely trade mark licensing and selective distribution agreements.

¹⁸ see §143-146 of the Decision

The latter are also covered by more specific rules applying to so-called ‘vertical agreements’ (i.e. between supplier, distributor and retailer rather than between competitors). These rules are laid out in the Block Exemption Regulation 2790/99 on ‘the application of Article 81(3) of the Treaty to categories of vertical agreements and concerted practices’, in particular Articles 4 and 5 which prescribe the types of provisions in vertical agreements which are not acceptable.

It should also be noted that special rules apply in the case of motor vehicles¹⁹.

4.2.1. Article 81 EC

Article 81(1) EC prohibits as "*incompatible with the common market: all agreements between undertakings, decisions by associations of undertakings and concerted practices which may affect trade between Member States and which have as their object or effect the prevention, restriction or distortion of competition within the common market*".

Any such agreements or decisions are automatically void (Article 81(2) EC). However, certain types of agreements can be exempted from this prohibition on the grounds that they contribute “*to improving the production or distribution of goods or to promoting technical or economic progress, while allowing consumers a fair share of the resulting benefit*”. An agreement, notified to the Commission, which is found to fall within the scope of Articles 81(1) and 81(3) may then receive a so-called ‘exemption’.

4.2.2. Regulation 2790/99

Distribution agreements, such as those complained about above by parallel traders, are generally covered by Block Exemption Regulation 2790/99. This Regulation in particular covers selective distribution agreements and provides a general exemption from the competition rules for agreements which cover 30% or less of a given relevant market.

However, certain types of provision are considered to render either part or all of a given agreement non-exemptable²⁰. Examples of such restrictive provisions in selective distribution agreements are:

- retail price maintenance
- restriction on sales between authorised wholesalers (‘cross-supply’ restrictions)
- customer allocation to a given distributor, including customer allocation by territory

¹⁹ Regulation 1400/2002

²⁰ Article 4 Regulation 2790/99, note that agreements falling outside the exemption provided for in Regulation 2790/99 may still be granted an individual exemption under Article 81 EC

It should also be noted what is *not* considered objectionable *per se*. For example in Ford vs. Commission²¹, the Court ruled that, in the context of a distribution system, only the agreement embodied in the distribution contract is capable of constituting an infringement of Article 81(1) of the Treaty. From this it follows that the refusal by a rightsholder to supply a particular parallel trader, or sign a distribution agreement with that company, cannot be considered *in itself* to fall within the scope of Article 81(1).

4.3. Relevant settled case law

Since many (or even most) selective distribution systems apply to trade marked goods, there are a number of examples of relevant case law.

For example, in Yves Saint Laurent²², the Commission exempted a selective distribution system for cosmetics. Of particular interest is the fact that the Commission, as a condition for exemption, required the distribution agreements to be changed whereby distributors had been previously required to provide Yves Saint Laurent with details of who they had sold goods to. This was changed to provide that distributors had to keep the relevant information, but were only required to release it to Yves Saint Laurent where there was *prima facie* suspicion of sales to unauthorised distributors.

In this case, the Commission considered that, within a system of selective distribution, the tracing of the origin of branded goods cannot be considered to infringe Article 81 EC in so far as it serves the lawful purpose of preventing sales to unauthorised distributors. However, such practices *would* constitute an infringement of the competition rules where it is clear that such information is being used to limit cross-supplies between *authorised* distributors within the selective distribution system.

The facts of this case, relating to the provision by distributors of information about the origin of goods to their supplier, are thus rather similar to the complaints from parallel traders about being forced to reveal the origin of the branded goods they sell to the trade mark holder. This is all the more so given that, where branded goods are being sold through a selective distribution system, the (ultimate) supplier and trade mark holder are likely to be the same company.

4.4. Conclusion

Selective distribution systems are not *per se* illegal, indeed the Commission has recognised the economic benefits to consumers which may derive from them. Restrictions of the sort enumerated in section 4.2.2 in the context of a selective distribution system *are* illegal and Article 81 EC, in the context of Regulation 2790/99, provides an effective means to combat them.

²¹ Joined Cases 228 and 229/82, [1984] ECR p. 1129 §21

²² Decision 92/33/EEC, particularly §7

5. ABUSE OF DOMINANT POSITION INVOLVING TRADE MARKS

5.1. Possible types of abuse involving trade marks

There has historically been a certain level of tension between the granting of intellectual property rights, such as trade marks, which generally entail a right to exclude others from using that property, and the obligation under competition law for a dominant company to provide a license to others where a failure to do so would damage competition in the market in question. Such a failure by a dominant company could conceivably be regarded as an abusive refusal to license and fall within the scope of Article 82 EC.

Other types of behaviour involving trade mark licensing could also fall within the scope of Article 82 EC. It is not possible to exhaustively list such behaviour but one example is excessive pricing of trade mark licence fees.

5.2. Legal framework

Unilateral anti-competitive conduct by companies is covered by Article 82 EC, so-called ‘abuse of dominant position’.

5.2.1. Article 82 EC

Article 82 EC states that “*any abuse by one or more undertakings of a dominant position within the common market [...] shall be prohibited [...] in so far as it may affect trade between Member States*”. Such abuse includes “*directly or indirectly imposing unfair purchase or selling prices*”.

Refusal by a rightsholder to license its trade mark to another company could conceivably fall under the scope of this article. However, the European Court of Justice (ECJ) has ruled that²³ “*the very subject matter of*” an intellectual property right is the power to exclude others and that there is no general obligation to grant licences, even in return for a royalty. It follows that, in the case of a dominant company refusing to license a trade mark, an extra element is required, in addition to the refusal to license, to demonstrate an infringement of Article 82 EC.

5.2.2. Article 10 EC in conjunction with Article 82 EC

According to Article 10 EC, “*Member States shall take all appropriate measures, whether general or particular, to ensure fulfilment of the obligations arising out of this Treaty or resulting from action taken by the institutions of the Community. They shall facilitate the achievement of the Community's tasks.*

They shall abstain from any measure which could jeopardise the attainment of the objectives of this Treaty”.

²³ Volvo vs. Veng decision 238/87/EEC [1988] ECR p. 6211

The case law of the Court of Justice²⁴ shows that a Member State may be in breach of its obligations under Article 10 if it induces a company to infringe Article 81 e.g. by imposing or encouraging the fixing of prices. At least in theory, the same would be true if a Member State was to induce an undertaking to abuse its dominant position in a particular relevant market.

It might be argued that, since the rule of Community exhaustion (or, rather, the absence of international exhaustion) allows certain undertakings within the EEA to charge higher prices than would otherwise be the case, this means that, in the case of a dominant undertaking, one can say that state-imposed rule enables it to abuse its dominant position by overcharging.

There are however considerable difficulties with this approach. First of all, it could only apply in the case of dominant companies. Secondly, if they were really in a dominant position in the first place, it would very likely be this dominant position, and not the rule of Community exhaustion, which would enable them to charge high prices, or at least, the cause of high prices would be very difficult to determine. Thirdly, and unanswerably, a Member State could never be in breach of its Community law obligations by virtue of upholding the rule of Community exhaustion, since this is a rule laid down by the Community legislator in Article 7 of the Trade Mark Directive, as interpreted by the Court of Justice in Silhouette, Sebago and Zino Davidoff."

5.3. Relevant settled case law

There is no settled case law in this area. As noted above, there is a relevant ongoing case, namely DSD. However, it should be noted that the main market of concern, in which DSD was found by the Commission to be dominant, is for recycling *services*. It is therefore difficult to see much relevance in the case given that the question of Community/international exhaustion applies only to goods²⁵.

5.4. Conclusion

For cases where a dominant company might seek to abuse its trade mark rights, for example by charging excessively high prices for its branded goods, legal provisions exist under Article 82 to combat such abusive conduct. Furthermore, the situation where such an abuse is found to consist of a refusal to license the trade mark rights in question is likely to be very rare, and there is no relevant settled case law in this area.

²⁴ e.g. Case 209/84 Asjes [1986] ECR-1425

²⁵ there is no exhaustion for services within the EU, see Directive 92/100/EEC, also Metronome Musik Case C-200/96 [1998] ECR I p. 1953 and Coditel I Case 62/79

6. TRADE MARK INFRINGEMENTS

6.1. Economic role of trade marks

As was noted in the NERA report, the economic role of trade marks is twofold: “to assist and protect the consumer in identifying the source of products and hence improving their ability to judge quality” and to allow “trade mark holders to be rewarded for their investment in product development and quality and [...] in creating brand image or ‘branding’ of a product” through the use of their exclusive rights.

6.2. Legal framework

Within the EU, both national and Community trade marks co-exist. Both are regulated at Community level through, respectively, Directive 89/104/EEC and Regulation 40/94. Also of relevance in cases of (alleged) trade mark infringements and exhaustion of trade marks are Articles 28 and 30 EC relating to the free movement of goods within the EU.

6.2.1. Directive 89/104/EEC

Directive 89/104/EEC harmonises national trade mark law throughout the EU. Of particular relevance to the question of exhaustion are Articles 7(1), which states that “*The trade mark shall not entitle the proprietor to prohibit its use in relation to goods which have been put on the market in the Community under that trade mark by the proprietor or with his consent*”, and 7(2) which states that, “[*the previous paragraph*] shall not apply where there exist legitimate reasons for the proprietor to oppose further commercialisation of the goods, especially where the condition of the goods is changed or impaired after they have been put on the market”.

6.2.2. Regulation 40/94

Regulation 40/94 creates a unitary Community trade mark throughout the EU. Articles 13(1) and (2) correspond almost exactly to Articles 7(1) and (2) of the trade mark directive, hence establishing an identical exhaustion régime for both national and Community trade marks.

6.2.3. Articles 28 and 30 EC

Article 28 EC, which enshrines the key principle of free movement of goods within the EU, prohibits “*quantitative restrictions on imports and all measures having equivalent effect*” between Member States.

Article 30 EC allows an exception to Article 28 EC in various cases, including “*the protection of industrial and commercial property*” i.e. trade marks. However, “*such prohibitions or restrictions shall not [...] constitute [...] a disguised restriction on trade between Member States*”.

6.3. Relevant settled case law

Trade mark law has also been invoked to settle the question of under what conditions a rightsholder can prevent the advertising of branded goods by a

retailer. In Dior/Evora²⁶, where Dior had objected to advertising by Evora of goods incorporating its trade marks, the ECJ ruled that “a balance must be struck between the legitimate interest of the trade mark holder [to prevent advertising] which could damage the reputation of the trade mark and the reseller’s legitimate interest [to] resell the goods [...] using advertising methods [...] customary in his sector of trade”. The two principles at stake were thus the protection of trade mark rights and the free movement of goods within the EU.

In Loendersloot²⁷, the Court assessed the compatibility of a prohibition on the removal of identification numbers placed on products to trace their origin with the rules on the free movement of goods. Parallel traders argued that the removal of such identification numbers was necessary to prevent the artificial partitioning of markets by the suppliers of the goods. However, the Court ruled that the use of identification numbers for legitimate objectives, including the prevention of counterfeiting, itself did not lead to artificial partitioning of markets and hence was not an infringement of Community rules on free movement of goods.

6.4. Conclusion

Where it is trade marks, rather than contractual provisions or the market power of a dominant company, which are being invoked to restrict the free movement of goods within the EU, Community law provides an effective means to prevent such a restriction while protecting the legitimate rights of the trade mark holder.

7. OVERALL CONCLUSIONS

This report has presented a summary of cases involving alleged abuses of trade mark rights notified to the Commission, particularly regarding competition law aspects, and has shown how these cases were dealt with under existing legal provisions.

In addition, the report has presented the results of the survey carried out by the Commission of trade mark holders, consumer groups and parallel traders. Most of the complaints made by the latter relate to the means by which rightsholders can identify the origin of branded goods. Inasmuch as this allows rightsholders to interdict the import of such goods from outside the EU, this can hardly be seen as an abuse since it is an inevitable consequence of the Silhouette ruling.

Inasmuch as this allows rightsholders to restrict parallel trade *within* the EU, such restrictions might well be unlawful, but this is a question which can be judged on the basis of existing provisions in European competition law (Articles 81 and 82 EC), European trade mark law (trade mark directive and regulation) and provisions on free movement of goods (Articles 28 and 30 EC).

It may be true that some branded goods are more expensive than they would be if a system of international exhaustion prevailed within the EU, although the NERA study suggests that such an effect is in general rather minor. However, such a pricing situation

²⁶ Case C-337/95 [1997] ECR I p. 6013, particularly §44

²⁷ Case C-349/95, Loendersloot vs. Ballantine et al [1997] ECR I-6227

cannot be considered to constitute an abuse of dominant position in the sense of Article 82 EC, whether considered in conjunction with Article 86(1) or not.

It follows that the Commission, as a result of the investigations carried out in the preparation of this report, has not found any deficiencies in current legal provision relating to possible abuses of trade marks within the EU.

Subject: International exhaustion of trade marks

Sir/Madam,

I am writing to you regarding the question of the so-called international exhaustion of trade marks within the European Union. By this, I mean whether a trade mark holder in the EU should have the right, under trade mark law, to prevent the import into the EU of goods which were originally placed on the market outside the EU either by the trade mark holder himself or with his consent.

As you may well be aware, this issue formed the basis of a recent resolution of the European Parliament on the 3rd October 2001 calling on the European Commission to investigate, *inter alia*, “any cases of abuse of trade marks notified to the Commission”.

I am therefore writing to you to ask for your assistance in letting us know about any recent instances of abuse of trade marks in terms of pricesetting which you are aware of, and whether or not you have already notified the European Commission of this.

I should stress that, by ‘abuse of trade marks’, I do not intend to cover instances where counterfeit or pirated goods were put on the market.

To clarify, such instances might well include cases where a trade mark holder (or companies acting in his interest):

- places restrictions in agreements with distributors (e.g. selective distribution arrangements)
- restrictive provisions in supply contracts (e.g. prohibitions or coercive measures to prevent further export of the supplied goods to certain geographic areas)
- introduces guarantee terms which effectively inhibit supply into certain geographical areas

or, where the supplier is dominant in a particular relevant market:

- withdraws from that market and/or refuses to supply resellers in the market
- prices goods at excessive levels
- applies sanctions on distributors not adhering to the same kinds of practice

Of course, the above list is intended to be illustrative rather than exhaustive and we would welcome information on any other possible instances of abuse of trade mark

rights. It would help us greatly if you could send us your contributions by **30th September 2002**. I look forward to hearing from you on this matter.

Yours sincerely,

EXHAUSTION OF TRADE MARK RIGHTS

WORKING DOCUMENT FROM THE COMMISSION SERVICES

INTRODUCTION

This document constitutes the Commission services' working document on exhaustion of trade mark rights that the Commission undertook to prepare at the Internal Market Council of 21 June 1999.

The working document should serve as a basis for a further and detailed discussion in a Council expert group in order to prepare the EC position on a possible change to the current trade mark exhaustion regime in the EC. The discussion should focus in particular on four key issues which were raised at the Internal market Council in June. These are: a) Possible consequences of different regimes for national trade marks compared to Community trade marks, b) Differentiation of exhaustion regimes between different intellectual property rights, c) Differentiation of exhaustion regimes for different sectors of industry and d) International exhaustion through international agreements.

The working document explores different options available if it is decided that a change of exhaustion is necessary. Each option has its own advantages and disadvantages and will require careful examination before any conclusions can be drawn. The document does not elaborate on other issues which are also relevant in the larger context of parallel trade, like competition issues and questions on vertical restraints. It such in this context be noticed that from the judgement of the Court of Justice in the Javico case, it is clear that an export prohibition from a third country may, under certain circumstances, be acceptable under EU competition rules.¹

The four key issues outlined above are - as stated - of relevance when considering possible merits and problems related to a change from the existing Community exhaustion regime to that of international exhaustion. The discussion on the legal and practical consequences of these options must not necessarily be limited to that based on this document. It appears useful to address further questions, which are linked to the implication of the Community exhaustion regime for the function of a trade mark. In fact it appears that, in the light of recent case law on exhaustion, the purpose of a trade mark is no longer to function as an indicator of source but also of good will ("brand") calling for specific distribution systems.

¹ Javico v. Yves Saint Laurent, case C-306/96 (1998) ECR I-1983.

Developments in the information society including e-commerce are also of relevance when discussing the merits and problems of the Community exhaustion regime, in so far as they open up new possibilities for consumers to obtain branded goods which have initially been marketed on foreign markets.

The discussion on exhaustion regimes is not a purely academic one, but has important economic implications. The following information illustrates the scale and economic background of the industries that may be affected by the choice of exhaustion regime: The world market for musical recordings amounts to nearly 30 billion EURO, of which the EU accounts for about 30 per cent. The number of people employed in that sector is about 600.000. European companies are the world's leading producers of pharmaceuticals with a turnover of about 93,500 million EURO. The number of people directly employed in the pharmaceutical industry is about 520,000. The EU is the largest producer of cosmetics and perfumes in the world. This is also the case for confectionery where EU citizens are also the largest consumers in the world. EU companies producing footwear, leather goods and alcoholic drinks are also among the world leaders. The EU motor vehicle industry is a net exporter². The number of people employed in the vehicle sector alone is about 1,000,000 (0,7 % of EU total employment).

² National Economic Research Associates "The Economic consequences of the choice of regime of exhaustion in the area of trademarks" (available on the DG Internal Market web site), Executive Summary of the NERA study, page20-23 NERA study pages 31,

I. THE FOUR KEY ISSUES

- a. CHANGE OF THE EXHAUSTION REGIMES FOR COMMUNITY TRADE MARKS AND NATIONAL TRADE MARKS. SHOULD THE REGIMES BE THE SAME ?

*In theory, there are three options available; (1) to change the exhaustion regime for **both national trade marks and Community trade marks**, (2) to change the exhaustion regime for **national trade marks only**, or (3)) to change the exhaustion regime for **Community trade marks only** .*

The introduction of a full international exhaustion scheme for all types of trade marks in the Union would require a change to both Directive 89/104 on national trade marks and Regulation 40/94 on the Community trade mark³.

A change to the Directive would require a qualified majority decision from the Council and approval through co-decision with the Parliament pursuant to Article 95 of the Treaty. A change to the Regulation on the Community trade mark would however require an unanimous Council decision, after having consulted the European Parliament under Article 308 of the Treaty.

If, within the Council, a qualified majority, but not a consensus, could be obtained for the introduction of international exhaustion then the EC could be confronted with the possibility of having two different exhaustion regimes, i.e. (1) an international exhaustion regime for national trade marks, and (2) a Community exhaustion regime for Community trade marks.

The co-existence of two different schemes within the EC might create confusion within the market place as well as in the minds of consumers, in particular in relation to the question of whether a given trade marked product had been lawfully put on the market or not.

Furthermore, this situation might weaken the position of holders of national trade marks in the Union vis-à-vis the holders of Community trade marks. This is because that holders of national trade marks would be exposed to competition through parallel trade and increased inter-brand competition whereas the holders of Community trade marks would still be able to prevent parallel imports on the basis of their Community trade mark rights. An important element which should be taken into account when assessing the possible consequences of such differentiation is the question of whether such a policy would put SMEs in a weaker position than larger

³ First Council Directive 89/104/EEC of 21 December 1988 to approximate the laws of the Member States relating to trade marks, OJ N° L 40 of 11 February 1989 and Council Regulation (EC) N° 40/94 of 20 December 1993 on the Community trade mark, OJ N° L 11 OF 14 January 1994.

companies. In this respect, the extent to which products with national trade marks are, or would become, the subject of parallel imports should be further studied.

A Community trade mark (CTM) is generally used by companies seeking protection in at least 4 or 5 Member States. Most Community trade mark holders are therefore the larger European and non-European (e.g. American) companies. SMEs, whilst also to some extent using the CTM system, rely much more on national trade mark systems. This is because they often only supply their local markets.

Any weakening of the position of national trade mark holders in relation to the exhaustion issue might increase the attractiveness of the CTM system for those companies, including SMEs, that are confronted with parallel imports and who wish to maintain the possibility of opposing such imports. However, this would impose a heavy burden on SMEs in terms of costs and procedures. Larger companies who rely on the CTM system would however not face any additional burdens.

Clearly, the cost of a CTM is higher than the price of a limited number of national trade marks and the procedures relating to the registration of a CTM may be more complex to handle than those necessary to obtain a very limited number of national trade mark registrations. Trade mark holders for whom the exhaustion regime is of less importance could continue to rely on national trade marks. It should also be recalled that in the debate on exhaustion, trade mark holders strongly advocated the present Community wide exhaustion regime for both types of trade marks.

b. DIFFERENTIATION OF EXHAUSTION REGIMES BETWEEN DIFFERENT INTELLECTUAL PROPERTY RIGHTS

*Two options are available: either to change the exhaustion regime for **trade marks only** or to change the exhaustion regime for **trade marks and some or all of the other categories of intellectual property**.*

In practice, a great variety of products are covered by multitude of IP rights at the same time.

In respect of a music CD for example, the music as such may be protected by copyright and neighbouring rights, the CD technology by patents, and the label by trade mark rights. Computers for example, may be protected by a trade mark right, a design right, and patents. The NERA study indicated the relevance of the various IP rights for a wide range of products.

These examples show that the possible introduction of international exhaustion for trade marks only would still allow the producer of products which are protected by a bundle of IP rights, to rely on the other IP rights to oppose the importation of a given product into the EU.

There are relatively few type of products which are the subject of only trade mark protection. The NERA study identified in this respect in particular the clothing industry, soft drinks, confectionery and alcoholic drinks.

Certain fundamental questions need to be answered before deciding whether the possible introduction of international exhaustion for trade mark rights should be extended to other IP rights.

It should be recalled that IP rights, by their very nature, have traditionally always been granted on a State-by-State basis and with legal effects only in the territory of the State concerned. This allowed States to define their own policy on the creation, grant and scope of protection of IP rights as market instruments within their territories, subject to their obligations under international agreements and for EU countries their obligations under Community law.

The establishment of the EC as an economic region, has had significant consequences on the traditional principle of territoriality of IP rights. The creation of a common market between States providing for, in principle, uniform (economic) market conditions and based, inter alia, on the principle of free movement of goods led the EC Court of Justice to introduce the concept of “international exhaustion” between the EC Member Sates. This has become known as “Community exhaustion”. It should be stressed that the existence of common market conditions and the principle of free movement of goods within the EC constituted the main argument for the Court to considerably restrict the possibilities for holders of IP rights within the EC to rely on these rights to oppose inter-(EC)state trade of their products.

When considering the possible extension of international exhaustion to other IP rights in addition to trade marks, one should also bear in mind that for each of these IP rights, the justification for their existence (their “raison d’être”) and enforcement are different. Consequently, it is important to examine the question of exhaustion regime for the IP rights on a case-by-case basis.

Trade marks serve in particular as an indicator of source and as an important bearer of “goodwill” for the producers of the products concerned. Trade marks can be maintained for an unlimited period of time unlike most other IP rights.

For **patents**, it should in particular be stressed that they serve as a major instrument to promote investment in research & development. The availability of patents serves to promote innovation and employment by ensuring a return on investment for inventors during a limited period of time (generally 20 years from the filing of the patent application).

For the pharmaceutical industry for example, it is known that a key characteristic of its research-based industry is its reliance on patents.

For **design rights**, it should be mentioned that they serve as an instrument to promote investment and innovation in industrial design. A design right is generally granted for a maximum period of 25 years after filing.

Finally, **copyright** serves to promote and stimulate human creativity. Copyright is generally granted for 70 years *post mortem auctoris*.

Industry has on several occasions stressed that it is vital for them to be able to protect various elements of their products using a multitude of IP rights. This allows them to focus on different issues such as confidence of the consumers in the quality of a given product (through trade marks) and obtaining a return on the investment made in the developing of the product (through design and patents).

For certain sectors (for example musical recordings) the enforcement of IP rights is a major problem. Most problems with piracy occur in countries with poor intellectual property protection. In the current regime of EC exhaustion it is not necessary to prove that imported goods are counterfeit, as imports of marked goods from third countries are not allowed without the consent of the right holders. With international exhaustion it would be necessary to prove that counterfeit goods were indeed counterfeit. Therefore the choice of trade mark exhaustion regime could have an effect on the right holder's ability to enforce his trade mark. This could undermine the fight against piracy and counterfeits.

Finally, it should be recalled that companies tend to be more willing to supply those markets where there is a high level of IP right protection than those providing a low level of protection for IP rights.

On the basis of the above, a preliminary conclusion would be that the introduction of international exhaustion for trade marks only would, from an IP right point of view, affect only a limited number of sectors in a limited way. The introduction of international exhaustion for all intellectual property rights would affect all industrial sectors.

c. DIFFERENTIATION OF EXHAUSTION REGIMES FOR DIFFERENT SECTORS OF INDUSTRY

A differentiation of exhaustion regimes between different sectors could be obtained through two different alternatives.

*It could be decided to introduce **international exhaustion only in relation to specific products, included in an exhaustive list**. The other approach would be to*

introduce international exhaustion as a matter of principle, but to exclude international exhaustion for specific products, included in an exhaustive list.

The role of trade marks may be of particular importance for certain sectors. International exhaustion may also be considered essential for specific sectors. Some sectors would be directly effected by a change in exhaustion regime, while other sectors would remain more or less untouched by such a change. This may depend on the role of other IP rights, transaction costs, technical barriers, vertical constraints and price differences.

The pharmaceutical industry has often been referred to as a sector where trade mark rights and patents play a vital role and where a change in the exhaustion regime(s) would be extremely delicate. The audio visual industries also continuously stress the vital importance of copyright and trade marks for the continuation of their business. These particular industries are however often identified as examples where prices for the same products may significantly differ between different states and different regions.

Generally speaking, the narrower the area of exhaustion, the greater the value the IP right has as a marketing instrument. Against this, enforcing wider areas of exhaustion creates pressure to reduce prices in some countries.

Also the role of governments in the pricing and purchasing of medicines has to be fully considered while analysing the specific situation for the pharmaceutical industry.

With regard to the possibility of introducing international exhaustion on a sector-by-sector basis, it should be noted that the main difficulty which will probably arise will be identifying those sectors to be covered by international exhaustion. In this respect, a further complication might be that certain products might be classified under different sectors. In any case, both options, referred to above, would require careful examination of all the elements which are crucial for the sectors concerned.

d. INTERNATIONAL EXHAUSTION THROUGH INTERNATIONAL AGREEMENTS

From a macro-economic point of view, three different options or “models” are available to introduce international exhaustion in the Union.

- i) On a **unilateral** basis, through a change to the relevant Community legal instruments*
- ii) on the basis of **bilateral agreements** with third countries, and*
- iii) on the basis of a **multilateral agreement**.*

i. Unilateral introduction of international exhaustion.

It has been argued that a unilateral change to the EC legislation would create the most immediate and foreseeable effect on trade but it would also put the EU at a disadvantage vis-à-vis trading partners if they did not follow.

Under the unilateral scenario, trade mark holders within the EU could not prevent parallel imports from products which they have put on the markets in any third countries. Such a system might increase parallel imports to Europe from third countries, but it would not compensate Europe through increased “parallel” exports from Europe to those third countries.

For some sectors the loss of profits if there were a unilateral change could be twice that if there were a bilateral (or multilateral) change⁴.

ii. International exhaustion with specific EU trade partners on the basis of bilateral agreements.

A second option to provide for international exhaustion would be through the conclusion of bilateral agreements with certain trading partners.

This approach might provide an opportunity to carefully select the countries with which the EC would be ready to open the markets for parallel imports to a certain extent, to ensure that European industry would not be exposed to unbalanced competition.

Clearly the EU would have to decide on what criteria it would be ready to enter into bilateral agreements. Such criteria should probably include the level of IP protection available, the market conditions, the level of pricing and possibly the country's' GNP.

However, it should be carefully considered whether bilateral agreements on this issue could come under the scope of the WTO Agreements and in particular the TRIPs Agreement. The "Most Favoured Nation Treatment" clause in Article 4 of TRIPs for example, provides that “with regard to the protection of intellectual property, any advantage, favour, privilege or immunity granted by a Member to the nationals of any other country shall be accorded immediately and unconditionally to the nationals of all other Members”.

iii. International exhaustion on the basis of a multilateral agreement.

⁴ NERA study pages 80, 88, 90, 97 and 99.

A third option would be to establish the principle of international exhaustion of trade marks at the global level through the conclusion of a multilateral agreement, for example in the context of WTO.

This approach would in principle allow any State to become a party to the multilateral agreement on international exhaustion of trade marks, unless the idea would be to build in certain thresholds. In the latter case, important and delicate criteria as mentioned under (ii) would need to be examined in greater detail.

However, it should be noted that negotiations on a multilateral level may be quite time consuming. It should also be noted that to overcome possible problems with TRIPS compatibility, it might be necessary to involve all WTO Members in the multilateral approach.

III. MISCELLANEOUS

In addition to the elements mentioned above, other issues may also play an important role. The implications of the future enlargement of the European Union on this issue of exhaustion will also need consideration, given that enlargement will extend the free trade area within Europe. The development and the growth of electronic commerce/Internet should also be taken into account. Due regard has to be given to the creation of the Internal Market legal framework which will allow European companies to fully reap the benefit of electronic commerce and the Internal Market. The introduction and use of new technologies may give consumers access to a greater choice of products at lower prices.

III SUMMARY OF OPTIONS AVAILABLE

The following lists summarises the options available for changing the present situation.

The final option would comprise one option from each list ((I), (II) and (III)). For example, one could envisage to change the exhaustion regime for national trade marks only ((I)(2)), for all sectors ((II)(i)), on a unilateral basis ((III)(A)).

I. Possible changes to the exhaustion regime

1. Change the exhaustion regime for national trade marks and Community trade marks, e.g. amend the EC Directive on trade marks and the Community trade mark Regulation.
2. Change the exhaustion regime for national trade marks only, e.g. amend the EC Directive on trade marks.
3. Change the exhaustion regime for all IP rights, e.g. change each relevant Directive/Regulation or Convention.

II. Sectors affected

- (i) Introduce international exhaustion for all sectors.
- (ii) Introduce international exhaustion for certain sectors only (Opt in).
- (iii) Introduce the principle of international exhaustion, but exclude certain sectors (Opt out).

III. Methods of introducing any change

- A. On a Unilateral basis.
- B. On a Bilateral basis.
- C. On a Multilateral basis.

ANNEX I

DEFINITIONS

a. Trade marks

Trade marks fulfil two mutually dependent economic functions.

First of all they assist and protect the consumer in identifying the source of products and hence improving their ability to judge quality.

Secondly, they provide a property right to the trade mark holders, by limiting the rights of other parties to copy their products, specifically by prohibiting the unauthorised use of their trade mark; this allows trade mark holders to be rewarded for their investment in product development and product quality, and for their expenditure in creating brand image or "branding" of a product.

b. Exhaustion of trade mark rights within the Union

“Exhaustion” of trade mark rights implies that once a branded product has been “put” (commercialised) on the market by the trade mark holder or with his consent, he cannot prohibit the further commercialisation (such as subsequent re-sale) of that product. His rights in respect of a specific individual item or consignment are "exhausted" by the act of selling it.

There are two different exhaustion regimes – national (or Community/EEA-wide) exhaustion and international exhaustion.

The current EU exhaustion regime is related to the territory of the Member States (and the EEA) only; a trade mark holder cannot legally prevent the further commercialisation of a given product within the EU (and the EEA), once the product has been put on the EU/EEA market by him or with his consent.

c. Parallel trade

From an EU perspective, parallel trade (sometimes referred to as the "grey market") consists of trade in genuine trade mark protected products, which have been firstly commercialised (by the trade mark holder) outside the EU/EEA, and which are subsequently imported into the EU/EEA area.

For the purpose of the discussion on exhaustion of trade mark rights, it is also assumed that parallel trade takes place without the consent of the trade mark owner. Under this assumption, the “authorised” goods reach the final consumer through the intermediaries and distribution networks that are designated by trade mark owner.

Parallel traders acquire goods, typically without the consent of the trade mark owner, from some layer of the authorised channel. This can either be directly from the manufacturer, from an intermediary (wholesaler or middleman) or from authorised retailers.

Occasionally a trade mark owner may give tacit consent to the disposal of some part of production through parallel traders. It is a characteristic of the phenomena of parallel trade, that it could take many different forms and use many different channels.

ANNEX II

LEGAL FRAMEWORK

a. Acquis communautaire

The exhaustion regime for national trade marks is defined by Article 7 of Directive No 89/104/EEC of 21 December 1988⁵, the exhaustion regime for Community trade marks is defined by Article 13 of Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark⁶.

According to both instruments, Community exhaustion is the current regime for both types of trade marks.

In its basic proposal both for a trade mark Directive and the Community trade mark Regulation in 1980, the Commission originally proposed international exhaustion. After discussions in the Council and at the explicit request of the European Parliament it was finally decided to adopt the Community exhaustion regime for both instruments.

In addition to both trade mark instruments, there are five other Community instruments in the field of intellectual property, which establish Community exhaustion⁷.

The Silhouette case - During the summer 1998 the Court of Justice delivered a judgement in the *Silhouette case*⁸. In its decision, the Court confirmed that Article 7 of Directive 40/89 establishes the absolute principle of Community exhaustion, i.e. that the wording of the said provision does not allow Member States to extend the principle of Community exhaustion to international exhaustion.

⁵ OJ No L 40 of 11 February 1989.

⁶ OJ No L 11 of 14 January 1994.

⁷ Council Directive 87/54/EEC of 16 December 1986 on the legal protection of topographies of semiconductor products (OJ No L 24 of 27 January 1987), Council Directive 91/250/EEC of 14 May 1991 on the legal protection of computer programs (OJ No L 122 of 17 May 1991), Council Directive 92/100/EEC of 19 November 1992 on rental and lending right and on certain rights related to copyright in the field of intellectual property (OJ No L 346 of 27 November 1992), Council Regulation 2100/94/EG of 27 July 1994 on Community plant variety rights (OJ No L 45 of 15 February 1994) and Directive 96/9/EC of the European Parliament and the Council of 11 March 1996 on legal protection of databases (OJ No 77 of 27 March 1996).

⁸ Case C-355/96, [1998] ECR 676

Thus, trade mark holders within the Community may rely on their national trade mark rights to prevent parallel imports of their products when these imports originate in non-EEA countries.

After the Silhouette decision the question of exhaustion has become an important issue. Following the Silhouette decision, some Member States have voiced concerns about the economic consequences of the situation currently applied in the Community, especially as regards the difficulties for consumers to obtain cheaper branded products through parallel imports from third countries.

b. Other International instruments

The question of exhaustion of intellectual property rights was discussed in the Uruguay Round in the framework of the Agreement on Trade Related aspects of Intellectual Property ("TRIPs"). However, the exhaustion issue was too delicate and was therefore not included in the Agreement on TRIPs⁹.

According to the Europe Agreement, the candidate countries are obliged to provide for the same level of protection of IPR as the EU including enforcement of such rights. There is no specific agreement on exhaustion regimes¹⁰.

c. Legal situation within important trading partners US and Japan

US applies *a priori* a national exhaustion regime for trade mark rights in cases where products are not from the same corporate entity or where parallel imports may cause "consumer confusion". The national exhaustion scheme applies also in principle in the field of patents and designs.

Further to a recent Court decision in Japan¹¹, it is considered that international exhaustion applies in the field of patents and trade marks, unless, through licences, it is otherwise agreed.

⁹ Article 6 of TRIPS: "nothing in this Agreement shall be used to address the exhaustion of intellectual property rights".

ANNEX III

BACKGROUND

I. INTRODUCTION

Identification of the problem

The question of exhaustion of trade mark rights has become an important issue. Discussions within the Council and discussions in hearings and meetings, organised by the Commission services have shown that the views between Member States as well as between the various interested circles are divided.

It is sometimes claimed that the actual Community exhaustion regime on trade marks within the Union constitutes an important barrier for (parallel) trade and creates artificially high prices for consumer goods within the Union.

Those advocating the Community exhaustion regime claim that this system is necessary for the promotion of investment in innovation and in high-quality goods.

II. THE NERA STUDY

With a view to obtaining a clearer picture of its economic effects, the Commission launched a study on the possible economic consequences of a possible change of the current Community exhaustion regime. The study has been carried out by the NERA institute in London and was presented to the Commission in February 1999.

According to the study the issue of exhaustion is very complex and may have an impact not only on prices, but also on product quality, product availability, after-sales services (guarantees), employment, distribution agreements, market segmentation, etc. The study also shows that the impact of a change in the existing Community exhaustion regime would be minimal in certain sectors like alcoholic drinks and confectionery, whereas it may have more significant consequences in others such as consumer electronics, domestic appliances and footwear. The study calculates that the lowering effect on prices would range from "negligible" (soft drinks) to "small" (around 1% for footwear, musical recordings, motorcars) or "moderate" (around 2% for consumer electronics).

a. Arguments for the present exhaustion regime

The study lists a number of arguments in favour of retaining the present arrangements, i.e. Community exhaustion.

The main argument for maintaining the current exhaustion regime is that it is essential to protect EC competitiveness and innovation, in that it guarantees a return on investment in new products.

Further it was held that the present exhaustion regime provides a higher economic reward to firms that invest in the quality or style of their products, and that this incentive is necessary in order to maintain the range of products and the quality of goods and associated service that EU consumers expect. A change to international exhaustion would reduce the value of intellectual property and put European companies at a disadvantage against countries not applying the same regime.

The study also indicates that a change in the exhaustion regime for trade marks would not necessarily lead to a tangible change on the market. Right holders have also other means to control the distribution of their products, such as setting up selective distribution networks prohibiting sales to unauthorised dealers. The study also suggests that parallel imports may confuse the consumer as a result of problems such as instructions in foreign language, lack of after-sales service, quality etc.

Finally, it is stated that international exhaustion would lead to more imports of counterfeit products, thus having a severe negative impact on health and safety of consumers.

b. Arguments for a change to international exhaustion

Besides a reduction of prices, the study lists a series of other arguments in favour of changing to international exhaustion.

Parallel imports would increase (inter-brand) competition, by reducing the possibility for a trade mark holder to exploit his position in that brand and to set higher prices in certain markets, and by increasing competition in the distribution of the product. Beside this claimed effect from a change in the exhaustion regime, the study lists a series of other arguments in favour of changing the present regime.

Some of the interviewees point at the fact that trade mark legislation is intended to provide assurance of origin of a product and not to be an instrument of market segmentation. Further it is stressed that there is little evidence that consumers would be confused if more parallel imports were to be permitted.

Moreover, some important trading partners partially implement international exhaustion with no evidence of alleged ill effects such as poor consumer service or lack of availability.

Finally, it is stated in the study that sometimes manufactures use parallel trade when they wish to off-load excess supplies.

III.TWO HEARINGS ON EXHAUSTION

During spring 1999 the Commission arranged for two meetings on exhaustion - one with representatives of the Member States and one hearing with interested circles.

a. Meeting with the Member States

On 26 April DG XV, together with the Legal Service, DG 1A, DG III, DG IV and DG XXIV, met with representatives from the Member States. The objective of this meeting was to inform Member States in detail on the NERA study, to discuss the main findings, and to allow the Member States to express their (preliminary) views on the preferred exhaustion regime. The researchers from the NERA Institute made a presentation of the study. At the meeting, Sweden presented a study on exhaustion carried out by the Swedish Competition Authority¹².

Regarding the methodology of the study, it became a subject of argument whether the issue of trade mark exhaustion could be discussed separately from the questions concerning exhaustion of other intellectual property rights. The question was also raised, to what extent associations of parallel traders were involved in preparation of the study. It was further pointed out that the study assumes constant price levels, whereas the prices encountered in parallel trade transactions often are inconsistent and specific to the circumstances. It was finally suggested that issues such as potential problems for certain sectors, the impact of electronic commerce on the issues involved and the effects caused by different characteristics of parallel imported products should be studied in greater detail.

Certain delegations expressed their doubts on the conclusions of the study with regard to the presumed negative effects of international exhaustion.

It was also mentioned that the positive long-term effects of international exhaustion should have received more attention, whereas on the other hand it was suggested that the potential negative impacts on consumers caused by a change of regime had been played down. The suggested increase in employment was said to be contradicted by the finding that profits of trade mark proprietors would decrease.

Finally, the question why there were no numerical estimates of long-term effects was also raised.

The estimated effects of a change of regime varied, with some delegations pointing to price reductions and increased competition to be anticipated, other expressing

¹² "Parallel imports - Effects of the Silhouette Ruling", Swedish Competition Authority, Report Series 1999:1.

concern over the fate of distribution chains, after-sale-services and guarantees as well as suggesting that there is a link between parallel importing and product piracy. In particular two delegations presented strong but diverting views on the exhaustion issue; one delegation expressed strong support for the present Community exhaustion regime, whereas another delegation strongly pleaded for a change to international exhaustion.

It emerged from the meeting that a considerable number of Member States are still in the process of examining the matter in greater detail.

b. Hearing with interested circles

On 28 April 1999, DG XV organised a hearing at Brussels with around 180 representatives of interested parties¹³ on the subject of exhaustion.

The interested circles were given the opportunity to express their views on the NERA study, the issue of the trade mark exhaustion as such, and the possible impact of a change from Community to international exhaustion for trade marks. Around 60 interventions were made.

As regards the estimated effects of a change in current trade mark exhaustion regime, representatives of all industries emphasised the important role of trade marks and other intellectual property rights as incentives for innovation and research. It was held that international exhaustion would weaken the position of trade mark proprietors and have implications for their strategic behaviour, this in turn leading to losses in innovation, production and employment.

Representatives from the pharmaceutical industry expressed their concern that extending the exhaustion regime in the field of trade marks would initiate a similar change in the field of patents with even worse effects for their sector; corresponding fears with respect to copyright exhaustion were expressed by the Audio-visual industry.

It was suggested that allowing international exhaustion would complicate the fight against counterfeiting and piracy: therefore, support of Community exhaustion was strongly advocated from industry.

Representatives of foreign trade associations, parallel trader's associations and consumer organisations underlined the welfare benefits resulting from free trade.

¹³ Associations of parallel importers, associations of trade mark holders, associations of different sectors of industry, consumer's associations etc.

According to these groups a change to an international exhaustion regime would lower prices, increase product availability and increase consumption in the Community.

Position papers

The Commission has received around 50 position papers from interested circles.

IV.COMMISSION WORKING PAPER

At the Internal Market Council on 21 June 1999, Commissioner Monti reported from the two hearings and announced that he envisaged to charge the Commission services with the preparation of a working document for discussion at Council working group level during the autumn 1999. The working document should focus on key issues which merit further examination before taking any final decisions on the matter of exhaustion.

ANNEX IV

THE NERA FINDINGS

The NERA researchers drafted the following table to present the relevance of the various IP rights for specific products.¹⁴

Sector	Trade mark	Copyright	Design	Patent
Footwear and leather goods	High	Low	High	Low
Musical recordings	High	High	Low	Low
Motorcars	High	Low	High	Only for components
Consumer electronics	High	Generally low	Medium/high	Only for components
Domestic appliances	High	Low	Medium/high	Only for components
Cosmetics and perfumes	High	Low	Medium/high	Low/medium
Clothing	High	Low	Low	Low
Soft drinks	High	Low	Low	Low
Confectionery	High	Low	Low	Low
Alcoholic drinks	High	Low	Low	Low

On the basis of the above table, the NERA researchers concluded the following. “Trade marks are clearly the most important form of intellectual property protection for the sectors we have examined, with the exception of musical recordings, where copyright is for obvious reasons also of great importance. Even for musical recordings, trade mark holders tend to regard trade marks as important because trade mark rights are often easier to enforce. Design protection is also fairly important in a number of sectors. Overall the availability of other forms of intellectual property protection would appear to offer only limited comfort, even if these operated with different and more restricted exhaustion regimes. For analytical convenience we make the working assumption that trade marks are the dominant form of protection, and that possibly different regimes for the other forms of protection will not alter the effects we describe.”

The NERA study revealed the following overall assessment of the scope for parallel trade for the following sectors¹⁵.

¹⁴ Executive Summary NERA report, “Relative Importance of Different Intellectual Property Rights”, table 4.3, p. 13.

¹⁵ Executive Summary NERA report, “Qualitative Assessment: Scope for Increase in Parallel Trade”, table 4.9, p. 19.

Sector	Price differences	Transaction costs	Technical barriers	Trade policy	Vertical constraints	Current parallel trade	Overall scope
Footwear and leather goods	++	+	+	-	-	-	+
Musical recordings	+	++	++	-	-	++	++
Motorcars	+	+	-	++	-	-	+
Consumer electronics	++	-/+	-	-	-	+	+
Domestic appliances	++	-	-	+	-	-	+
Cosmetics and perfumes	+	-	-	++	-	++	++
Clothing	+	+	+	--	-	+	+
Soft drinks	++	---	+	-	+	+	+
Confectionery	+	--	+	-	+	+	+
Alcoholic drinks	---	--	+	-	-	+	-

++ and + indicate strong and moderate positive influence tending to promote parallel trade; - - and - indicate negative influences tending to reduce parallel trade; blank denotes neutral effect

In the NERA report certain interesting conclusions are drawn from this table. For the footwear and leather sector, for example, there are rather considerable price differences, which would stimulate parallel trade; on the other hand there are also elements that have the potential of discouraging parallel trade like import duties and tight vertical restraints/long-term relationship.

According to the study the scope for extra parallel trade after a change of exhaustion regime would be moderate overall, but may be greater in some segments of the market for these goods.

For the market for motor cars, technical barriers constitute a significant deterrent for parallel imports. The study therefore only foresees some low to moderate penetration of parallel imports, in particular from Japan. The study notes that also other considerations than price are also important for vehicles and that it is not clear to what extent purchases of parallel imports will enjoy service, guarantees etc.

On cosmetics and perfumes the study states that there may be quite a high level of parallel imports for premium products, though the price level outside Europe is often the same or higher. The savings that would encourage parallel trade come according to the study from avoiding the cost of retailing in a luxury setting and selling the products in non-traditional outlets. According to the study, this might damage the luxury image of the products.

The clothing market is characterised by price differences in particular for premium brand names, and of tight vertical restraints for luxury clothes. In the study the assumption is made that parallel imports may limit the market as a whole although focussed on a small number of premium brands.

For soft drinks the study does not foresee any increase in parallel imports as the prices differ within Europe and the transport costs would be relatively high. The market for alcoholic drinks has barriers in terms of transaction costs and vertical relationships. As the prices for alcoholic drinks are relatively low it is estimated that it is unlikely that the level of parallel imports to Europe would increase.

**Directive 96/9/EC of the European Parliament and of the Council
the Council the Council March 1996 on the legal protection of databases**

March 1996 on the legal protection of databases

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 57 (2), 66 and 100a thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the Economic and Social Committee (2),

Acting in accordance with the procedure laid down in Article 189b of the Treaty (3),

- (1) Whereas databases are at present not sufficiently protected in all Member States by existing legislation; whereas such protection, where it exists, has different attributes;
- (2) Whereas such differences in the legal protection of databases offered by the legislation of the Member States have direct negative effects on the functioning of the internal market as regards databases and in particular on the freedom of natural and legal persons to provide on-line database goods and services on the basis of harmonized legal arrangements throughout the Community; whereas such differences could well become more pronounced as Member States introduce new legislation in this field, which is now taking on an increasingly international dimension;
- (3) Whereas existing differences distorting the functioning of the internal market need to be removed and new ones prevented from arising, while differences not adversely affecting the functioning of the internal market or the development of an information market within the Community need not be removed or prevented from arising;
- (4) Whereas copyright protection for databases exists in varying forms in the Member States according to legislation or case-law, and whereas, if differences in legislation in the scope and conditions of protection remain between the Member States, such unharmonized intellectual property rights can have the effect of preventing the free movement of goods or services within the Community;
- (5) Whereas copyright remains an appropriate form of exclusive right for authors who have created databases;
- (6) Whereas, nevertheless, in the absence of a harmonized system of unfair-competition legislation or of case-law, other measures are required in addition to prevent the unauthorized extraction and/or re-utilization of the contents of a database;
- (7) Whereas the making of databases requires the investment of considerable human, technical and financial resources while such databases can be copied or accessed at a fraction of the cost needed to design them independently;
- (8) Whereas the unauthorized extraction and/or re-utilization of the contents of a database constitute acts which can have serious economic and technical consequences;
- (9) Whereas databases are a vital tool in the development of an information market within the Community; whereas this tool will also be of use in many other fields;
- (10) Whereas the exponential growth, in the Community and worldwide, in the amount of information generated and processed annually in all sectors of commerce and industry calls for investment in all the Member States in advanced information processing systems;
- (11) Whereas there is at present a very great imbalance in the level of investment in the database sector both as between the Member States and between the Community and the world's largest database-producing

third countries;

- (12) Whereas such an investment in modern information storage and processing systems will not take place within the Community unless a stable and uniform legal protection regime is introduced for the protection of the rights of makers of databases;
- (13) Whereas this Directive protects collections, sometimes called 'compilations', of works, data or other materials which are arranged, stored and accessed by means which include electronic, electromagnetic or electro-optical processes or analogous processes;
- (14) Whereas protection under this Directive should be extended to cover non-electronic databases;
- (15) Whereas the criteria used to determine whether a database should be protected by copyright should be defined to the fact that the selection or the arrangement of the contents of the database is the author's own intellectual creation; whereas such protection should cover the structure of the database;
- (16) Whereas no criterion other than originality in the sense of the author's intellectual creation should be applied to determine the eligibility of the database for copyright protection, and in particular no aesthetic or qualitative criteria should be applied;
- (17) Whereas the term 'database' should be understood to include literary, artistic, musical or other collections of works or collections of other material such as texts, sound, images, numbers, facts, and data; whereas it should cover collections of independent works, data or other materials which are systematically or methodically arranged and can be individually accessed; whereas this means that a recording or an audiovisual, cinematographic, literary or musical work as such does not fall within the scope of this Directive;
- (18) Whereas this Directive is without prejudice to the freedom of authors to decide whether, or in what manner, they will allow their works to be included in a database, in particular whether or not the authorization given is exclusive; whereas the protection of databases by the sui generis right is without prejudice to existing rights over their contents, and whereas in particular where an author or the holder of a related right permits some of his works or subject matter to be included in a database pursuant to a non-exclusive agreement, a third party may make use of those works or subject matter subject to the required consent of the author or of the holder of the related right without the sui generis right of the maker of the database being invoked to prevent him doing so, on condition that those works or subject matter are neither extracted from the database nor re-utilized on the basis thereof;
- (19) Whereas, as a rule, the compilation of several recordings of musical performances on a CD does not come within the scope of this Directive, both because, as a compilation, it does not meet the conditions for copyright protection and because it does not represent a substantial enough investment to be eligible under the sui generis right;
- (20) Whereas protection under this Directive may also apply to the materials necessary for the operation or consultation of certain databases such as thesaurus and indexation systems;
- (21) Whereas the protection provided for in this Directive relates to databases in which works, data or other materials have been arranged systematically or methodically; whereas it is not necessary for those materials to have been physically stored in an organized manner;
- (22) Whereas electronic databases within the meaning of this Directive may also include devices such as CD-ROM and CD-i;
- (23) Whereas the term 'database' should not be taken to extend to computer programs used in the making or operation of a database, which are protected by Council Directive 91/250/EEC of 14

May 1991 on the legal protection of computer programs (4);

- (24) Whereas the rental and lending of databases in the field of copyright and related rights are governed exclusively by Council Directive 92/100/EEC of 19 November 1992 on rental right and lending right and on certain rights related to copyright in the field of intellectual property (5);
- (25) Whereas the term of copyright is already governed by Council Directive 93/98/EEC of 29 October 1993 harmonizing the term of protection of copyright and certain related rights (6);
- (26) Whereas works protected by copyright and subject matter protected by related rights, which are incorporated into a database, remain nevertheless protected by the respective exclusive rights and may not be incorporated into, or extracted from, the database without the permission of the rightholder or his successors in title;
- (27) Whereas copyright in such works and related rights in subject matter thus incorporated into a database are in no way affected by the existence of a separate right in the selection or arrangement of these works and subject matter in a database;
- (28) Whereas the moral rights of the natural person who created the database belong to the author and should be exercised according to the legislation of the Member States and the provisions of the Berne Convention for the Protection of Literary and Artistic Works; whereas such moral rights remain outside the scope of this Directive;
- (29) Whereas the arrangements applicable to databases created by employees are left to the discretion of the Member States; whereas, therefore nothing in this Directive prevents Member States from stipulating in their legislation that where a database is created by an employee in the execution of his duties or following the instructions given by his employer, the employer exclusively shall be entitled to exercise all economic rights in the database so created, unless otherwise provided by contract;
- (30) Whereas the author's exclusive rights should include the right to determine the way in which his work is exploited and by whom, and in particular to control the distribution of his work to unauthorized persons;
- (31) Whereas the copyright protection of databases includes making databases available by means other than the distribution of copies;
- (32) Whereas Member States are required to ensure that their national provisions are at least materially equivalent in the case of such acts subject to restrictions as are provided for by this Directive;
- (33) Whereas the question of exhaustion of the right of distribution does not arise in the case of on-line databases, which come within the field of provision of services; whereas this also applies with regard to a material copy of such a database made by the user of such a service with the consent of the rightholder; whereas, unlike CD-ROM or CD-i, where the intellectual property is incorporated in a material medium, namely an item of goods, every on-line service is in fact an act which will have to be subject to authorization where the copyright so provides;
- (34) Whereas, nevertheless, once the rightholder has chosen to make available a copy of the database to a user, whether by an on-line service or by other means of distribution, that lawful user must be able to access and use the database for the purposes and in the way set out in the agreement with the rightholder, even if such access and use necessitate performance of otherwise restricted acts;
- (35) Whereas a list should be drawn up of exceptions to restricted acts, taking into account the

fact that copyright as covered by this Directive applies only to the selection or arrangements of the contents of a database; whereas Member States should be given the option of providing for such exceptions in certain cases; whereas, however, this option should be exercised in accordance with the Berne Convention and to the extent that the exceptions relate to the structure of the database; whereas a distinction should be drawn between exceptions for private use and exceptions for reproduction for private purposes, which concerns provisions under national legislation of some Member States on levies on blank media or recording equipment;

- (36) Whereas the term 'scientific research' within the meaning of this Directive covers both the natural sciences and the human sciences;
- (37) Whereas Article 10 (1) of the Berne Convention is not affected by this Directive;
- (38) Whereas the increasing use of digital recording technology exposes the database maker to the risk that the contents of his database may be copied and rearranged electronically, without his authorization, to produce a database of identical content which, however, does not infringe any copyright in the arrangement of his database;
- (39) Whereas, in addition to aiming to protect the copyright in the original selection or arrangement of the contents of a database, this Directive seeks to safeguard the position of makers of databases against misappropriation of the results of the financial and professional investment made in obtaining and collection the contents by protecting the whole or substantial parts of a database against certain acts by a user or competitor;
- (40) Whereas the object of this sui generis right is to ensure protection of any investment in obtaining, verifying or presenting the contents of a database for the limited duration of the right; whereas such investment may consist in the deployment of financial resources and/or the expending of time, effort and energy;
- (41) Whereas the objective of the sui generis right is to give the maker of a database the option of preventing the unauthorized extraction and/or re-utilization of all or a substantial part of the contents of that database; whereas the maker of a database is the person who takes the initiative and the risk of investing; whereas this excludes subcontractors in particular from the definition of maker;
- (42) Whereas the special right to prevent unauthorized extraction and/or re-utilization relates to acts by the user which go beyond his legitimate rights and thereby harm the investment; whereas the right to prohibit extraction and/or re-utilization of all or a substantial part of the contents relates not only to the manufacture of a parasitical competing product but also to any user who, through his acts, causes significant detriment, evaluated qualitatively or quantitatively, to the investment;
- (43) Whereas, in the case of on-line transmission, the right to prohibit re-utilization is not exhausted either as regards the database or as regards a material copy of the database or of part thereof made by the addressee of the transmission with the consent of the rightholder;
- (44) Whereas, when on-screen display of the contents of a database necessitates the permanent or temporary transfer of all or a substantial part of such contents to another medium, that act should be subject to authorization by the rightholder;
- (45) Whereas the right to prevent unauthorized extraction and/or re-utilization does not in any way constitute an extension of copyright protection to mere facts or data;
- (46) Whereas the existence of a right to prevent the unauthorized extraction and/or re-utilization of the whole or a substantial part of works, data or materials from a database should not give rise to the creation of a new right in the works, data or materials themselves;

-
- (47) Whereas, in the interests of competition between suppliers of information products and services, protection by the sui generis right must not be afforded in such a way as to facilitate abuses of a dominant position, in particular as regards the creation and distribution of new products and services which have an intellectual, documentary, technical, economic or commercial added value; whereas, therefore, the provisions of this Directive are without prejudice to the application of Community or national competition rules;
- (48) Whereas the objective of this Directive, which is to afford an appropriate and uniform level of protection of databases as a means to secure the remuneration of the maker of the database, is different from the aim of Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data (7), which is to guarantee free circulation of personal data on the basis of harmonized rules designed to protect fundamental rights, notably the right to privacy which is recognized in Article 8 of the European Convention for the Protection of Human Rights and Fundamental Freedoms; whereas the provisions of this Directive are without prejudice to data protection legislation;
- (49) Whereas, notwithstanding the right to prevent extraction and/or re-utilization of all or a substantial part of a database, it should be laid down that the maker of a database or rightholder may not prevent a lawful user of the database from extracting and re-utilizing insubstantial parts; whereas, however, that user may not unreasonably prejudice either the legitimate interests of the holder of the sui generis right or the holder of copyright or a related right in respect of the works or subject matter contained in the database;
- (50) Whereas the Member States should be given the option of providing for exceptions to the right to prevent the unauthorized extraction and/or re-utilization of a substantial part of the contents of a database in the case of extraction for private purposes, for the purposes of illustration for teaching or scientific research, or where extraction and/or re-utilization are/is carried out in the interests of public security or for the purposes of an administrative or judicial procedure; whereas such operations must not prejudice the exclusive rights of the maker to exploit the database and their purpose must not be commercial;
- (51) Whereas the Member States, where they avail themselves of the option to permit a lawful user of a database to extract a substantial part of the contents for the purposes of illustration for teaching or scientific research, may limit that permission to certain categories of teaching or scientific research institution;
- (52) Whereas those Member States which have specific rules providing for a right comparable to the sui generis right provided for in this Directive should be permitted to retain, as far as the new right is concerned, the exceptions traditionally specified by such rules;
- (53) Whereas the burden of proof regarding the date of completion of the making of a database lies with the maker of the database;
- (54) Whereas the burden of proof that the criteria exist for concluding that a substantial modification of the contents of a database is to be regarded as a substantial new investment lies with the maker of the database resulting from such investment;
- (55) Whereas a substantial new investment involving a new term of protection may include a substantial verification of the contents of the database;
- (56) Whereas the right to prevent unauthorized extraction and/or re-utilization in respect of a database should apply to databases whose makers are nationals or habitual residents of third countries or to those produced by legal persons not established in a Member State, within the

meaning of the Treaty, only if such third countries offer comparable protection to databases produced by nationals of a Member State or persons who have their habitual residence in the territory of the Community;

- (57) Whereas, in addition to remedies provided under the legislation of the Member States for infringements of copyright or other rights, Member States should provide for appropriate remedies against unauthorized extraction and/or re-utilization of the contents of a database;
- (58) Whereas, in addition to the protection given under this Directive to the structure of the database by copyright, and to its contents against unauthorized extraction and/or re-utilization under the sui generis right, other legal provisions in the Member States relevant to the supply of database goods and services continue to apply;
- (59) Whereas this Directive is without prejudice to the application to databases composed of audiovisual works of any rules recognized by a Member State's legislation concerning the broadcasting of audiovisual programmes;
- (60) Whereas some Member States currently protect under copyright arrangements databases which do not meet the criteria for eligibility for copyright protection laid down in this Directive; whereas, even if the databases concerned are eligible for protection under the right laid down in this Directive to prevent unauthorized extraction and/or re-utilization of their contents, the term of protection under that right is considerably shorter than that which they enjoy under the national arrangements currently in force; whereas harmonization of the criteria for determining whether a database is to be protected by copyright may not have the effect of reducing the term of protection currently enjoyed by the rightholders concerned; whereas a derogation should be laid down to that effect; whereas the effects of such derogation must be confined to the territories of the Member States concerned,

HAVE ADOPTED THIS DIRECTIVE:

CHAPTER I

SCOPE

Article 1

Scope

1. This Directive concerns the legal protection of databases in any form.
2. For the purposes of this Directive, 'database' shall mean a collection of independent works, data or other materials arranged in a systematic or methodical way and individually accessible by electronic or other means.
3. Protection under this Directive shall not apply to computer programs used in the making or operation of databases accessible by electronic means.

Article 2

Limitations on the scope

This Directive shall apply without prejudice to Community provisions relating to:

- (a) the legal protection of computer programs;
- (b) rental right, lending right and certain rights related to copyright in the field of intellectual property;
- (c) the term of protection of copyright and certain related rights.

CHAPTER II

COPYRIGHT

Article 3

Object of protection

1. In accordance with this Directive, databases which, by reason of the selection or arrangement of their contents, constitute the author's own intellectual creation shall be protected as such by copyright. No other criteria shall be applied to determine their eligibility for that protection.
2. The copyright protection of databases provided for by this Directive shall not extend to their contents and shall be without prejudice to any rights subsisting in those contents themselves.

Article 4

Database authorship

1. The author of a database shall be the natural person or group of natural persons who created the base or, where the legislation of the Member States so permits, the legal person designated as the rightholder by that legislation.
2. Where collective works are recognized by the legislation of a Member State, the economic rights shall be owned by the person holding the copyright.
3. In respect of a database created by a group of natural persons jointly, the exclusive rights shall be owned jointly.

Article 5

Restricted acts

In respect of the expression of the database which is protectable by copyright, the author of a database shall have the exclusive right to carry out or to authorize:

- (a) temporary or permanent reproduction by any means and in any form, in whole or in part;
- (b) translation, adaptation, arrangement and any other alteration;
- (c) any form of distribution to the public of the database or of copies thereof. The first sale in the Community of a copy of the database by the rightholder or with his consent shall exhaust the right to control resale of that copy within the Community;
- (d) any communication, display or performance to the public;

- (e) any reproduction, distribution, communication, display or performance to the public of the results of the acts referred to in (b).

Article 6

Exceptions to restricted acts

1. The performance by the lawful user of a database or of a copy thereof of any of the acts listed in Article 5 which is necessary for the purposes of access to the contents of the databases and normal use of the contents by the lawful user shall not require the authorization of the author of the database. Where the lawful user is authorized to use only part of the database, this provision shall apply only to that part.

2. Member States shall have the option of providing for limitations on the rights set out in Article 5 in the following cases:

- (a) in the case of reproduction for private purposes of a non-electronic database;
- (b) where there is use for the sole purpose of illustration for teaching or scientific research, as long as the source is indicated and to the extent justified by the non-commercial purpose to be achieved;
- (c) where there is use for the purposes of public security or for the purposes of an administrative or judicial procedure;
- (d) where other exceptions to copyright which are traditionally authorized under national law are involved, without prejudice to points (a), (b) and (c).

3. In accordance with the Berne Convention for the protection of Literary and Artistic Works, this Article may not be interpreted in such a way as to allow its application to be used in a manner which unreasonably prejudices the rightholder's legitimate interests or conflicts with normal exploitation of the database.

CHAPTER III

SUI GENERIS RIGHT

Article 7

Object of protection

1. Member States shall provide for a right for the maker of a database which shows that there has been qualitatively and/or quantitatively a substantial investment in either the obtaining, verification or presentation of the contents to prevent extraction and/or re-utilization of the whole or of a substantial part, evaluated qualitatively and/or quantitatively, of the contents of that database.

2. For the purposes of this Chapter:

- (a) 'extraction` shall mean the permanent or temporary transfer of all or a substantial part of the contents of a database to another medium by any means or in any form;
- (b) 're-utilization` shall mean any form of making available to the public all or a substantial part of the contents of a database by the distribution of copies, by renting, by on-line or other forms of transmission. The first sale of a copy of a database within the Community by the rightholder

or with his consent shall exhaust the right to control resale of that copy within the Community;

Public lending is not an act of extraction or re-utilization.

3. The right referred to in paragraph 1 may be transferred, assigned or granted under contractual licence.
4. The right provided for in paragraph 1 shall apply irrespective of the eligibility of that database for protection by copyright or by other rights. Moreover, it shall apply irrespective of eligibility of the contents of that database for protection by copyright or by other rights. Protection of databases under the right provided for in paragraph 1 shall be without prejudice to rights existing in respect of their contents.
5. The repeated and systematic extraction and/or re-utilization of insubstantial parts of the contents of the database implying acts which conflict with a normal exploitation of that database or which unreasonably prejudice the legitimate interests of the maker of the database shall not be permitted.

Article 8

Rights and obligations of lawful users

1. The maker of a database which is made available to the public in whatever manner may not prevent a lawful user of the database from extracting and/or re-utilizing insubstantial parts of its contents, evaluated qualitatively and/or quantitatively, for any purposes whatsoever. Where the lawful user is authorized to extract and/or re-utilize only part of the database, this paragraph shall apply only to that part.
2. A lawful user of a database which is made available to the public in whatever manner may not perform acts which conflict with normal exploitation of the database or unreasonably prejudice the legitimate interests of the maker of the database.
3. A lawful user of a database which is made available to the public in any manner may not cause prejudice to the holder of a copyright or related right in respect of the works or subject matter contained in the database.

Article 9

Exceptions to the sui generis right

Member States may stipulate that lawful users of a database which is made available to the public in whatever manner may, without the authorization of its maker, extract or re-utilize a substantial part of its contents:

- (a) in the case of extraction for private purposes of the contents of a non-electronic database;
- (b) in the case of extraction for the purposes of illustration for teaching or scientific research, as long as the source is indicated and to the extent justified by the non-commercial purpose to be achieved;
- (c) in the case of extraction and/or re-utilization for the purposes of public security or an administrative or judicial procedure.

Article 10

Term of protection

1. The right provided for in Article 7 shall run from the date of completion of the making of the database. It shall expire fifteen years from the first of January of the year following the date of completion.
2. In the case of a database which is made available to the public in whatever manner before expiry of the period provided for in paragraph 1, the term of protection by that right shall expire fifteen years from the first of January of the year following the date when the database was first made available to the public.
3. Any substantial change, evaluated qualitatively or quantitatively, to the contents of a database, including any substantial change resulting from the accumulation of successive additions, deletions or alterations, which would result in the database being considered to be a substantial new investment, evaluated qualitatively or quantitatively, shall qualify the database resulting from that investment for its own term of protection.

Article 11

Beneficiaries of protection under the sui generis right

1. The right provided for in Article 7 shall apply to database whose makers or rightholders are nationals of a Member State or who have their habitual residence in the territory of the Community.
2. Paragraph 1 shall also apply to companies and firms formed in accordance with the law of a Member State and having their registered office, central administration or principal place of business within the Community; however, where such a company or firm has only its registered office in the territory of the Community, its operations must be genuinely linked on an ongoing basis with the economy of a Member State.
3. Agreements extending the right provided for in Article 7 to databases made in third countries and falling outside the provisions of paragraphs 1 and 2 shall be concluded by the Council acting on a proposal from the Commission. The term of any protection extended to databases by virtue of that procedure shall not exceed that available pursuant to Article 10.

CHAPTER IV

COMMON PROVISIONS

Article 12

Remedies

Member States shall provide appropriate remedies in respect of infringements of the rights provided for in this Directive.

Article 13

Continued application of other legal provisions

This Directive shall be without prejudice to provisions concerning in particular copyright, rights related to copyright or any other rights or obligations subsisting in the data, works or other materials incorporated into a database, patent rights, trade marks, design rights, the protection of national treasures, laws on restrictive practices and unfair competition, trade secrets, security, confidentiality, data protection and privacy, access to public documents, and the law of contract.

Article 14

Application over time

1. Protection pursuant to this Directive as regards copyright shall also be available in respect of databases created prior to the date referred to in Article 16 (1) which on that date fulfil the requirements laid down in this Directive as regards copyright protection of databases.
2. Notwithstanding paragraph 1, where a database protected under copyright arrangements in a Member State on the date of publication of this Directive does not fulfil the eligibility criteria for copyright protection laid down in Article 3 (1), this Directive shall not result in any curtailing in that Member State of the remaining term of protection afforded under those arrangements.
3. Protection pursuant to the provisions of this Directive as regards the right provided for in Article 7 shall also be available in respect of databases the making of which was completed not more than fifteen years prior to the date referred to in Article 16 (1) and which on that date fulfil the requirements laid down in Article 7.
4. The protection provided for in paragraphs 1 and 3 shall be without prejudice to any acts concluded and rights acquired before the date referred to in those paragraphs.
5. In the case of a database the making of which was completed not more than fifteen years prior to the date referred to in Article 16 (1), the term of protection by the right provided for in Article 7 shall expire fifteen years from the first of January following that date.

Article 15

Binding nature of certain provisions

Any contractual provision contrary to Articles 6 (1) and 8 shall be null and void.

Article 16

Final provisions

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive before 1 January 1998.

When Member States adopt these provisions, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2. Member States shall communicate to the Commission the text of the provisions of domestic law which they adopt in the field governed by this Directive.

3. Not later than at the end of the third year after the date referred to in paragraph 1, and every three years thereafter, the Commission shall submit to the European Parliament, the Council and the Economic and Social Committee a report on the application of this Directive, in which, inter alia, on the basis of specific information supplied by the Member States, it shall examine in particular the application of the sui generis right, including Articles 8 and 9, and shall verify especially whether the application of this right has led to abuse of a dominant position or other interference with free competition which would justify appropriate measures being taken, including the establishment of non-voluntary licensing arrangements. Where necessary, it shall submit proposals for adjustment of this Directive in line with developments in the area of databases.

**Council Directive 92/100/EEC
of 19 November 1992
on rental right and lending right and on certain rights related to **copyright** in the field of
intellectual property**

COUNCIL DIRECTIVE 92/100/EEC of 19 November 1992 on rental right and lending right and on certain rights related to copyright in the field of intellectual property

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Articles 57 (2), 66 and 100a thereof,

Having regard to the proposal from the Commission (1),

In cooperation with the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

Whereas differences exist in the legal protection provided by the laws and practices of the Member States for copyright works and subject matter of related rights protection as regards rental and lending; whereas such differences are sources of barriers to trade and distortions of competition which impede the achievement and proper functioning of the internal market;

Whereas such differences in legal protection could well become greater as Member States adopt new and different legislation or as national case-law interpreting such legislation develops differently;

Whereas such differences should therefore be eliminated in accordance with the objective of introducing an area without internal frontiers as set out in Article 8a of the Treaty so as to institute, pursuant to Article 3 (f) of the Treaty, a system ensuring that competition in the common market is not distorted;

Whereas rental and lending of copyright works and the subject matter of related rights protection is playing an increasingly important role in particular for authors, performers and producers of phonograms and films; whereas piracy is becoming an increasing threat;

Whereas the adequate protection of copyright works and subject matter of related rights protection by rental and lending rights as well as the protection of the subject matter of related rights protection by the fixation right, reproduction right, distribution right, right to broadcast and communication to the public can accordingly be considered as being of fundamental importance for the Community's economic and cultural development;

Whereas copyright and related rights protection must adapt to new economic developments such as new forms of exploitation;

Whereas the creative and artistic work of authors and performers necessitates an adequate income as a basis for further creative and artistic work, and the investments required particularly for the production of phonograms and films are especially high and risky; whereas the possibility for securing that income and recouping that investment can only effectively be guaranteed through adequate legal protection of the rightholders concerned;

Whereas these creative, artistic and entrepreneurial activities are, to a large extent, activities of self-employed persons; whereas the pursuit of such activities must be made easier by providing a harmonized legal protection within the Community;

Whereas, to the extent that these activities principally constitute services, their provision must equally be facilitated by the establishment in the Community of a harmonized legal framework;

Whereas the legislation of the Member States should be approximated in such a way so as not to

conflict with the international conventions on which many Member States' copyright and related rights laws are based;

Whereas the Community's legal framework on the rental right and lending right and on certain rights related to copyright can be limited to establishing that Member States provide rights with respect to rental and lending for certain groups of rightholders and further to establishing the rights of fixation, reproduction, distribution, broadcasting and communication to the public for certain groups of rightholders in the field of related rights protection;

Whereas it is necessary to define the concepts of rental and lending for the purposes of this Directive;

Whereas it is desirable, with a view to clarity, to exclude from rental and lending within the meaning of this Directive certain forms of making available, as for instance making available phonograms or films (cinematographic or audiovisual works or moving images, whether or not accompanied by sound) for the purpose of public performance or broadcasting, making available for the purpose of exhibition, or making available for on-the-spot reference use; whereas lending within the meaning of this Directive does not include making available between establishments which are accessible to the public;

Whereas, where lending by an establishment accessible to the public gives rise to a payment the amount of which does not go beyond what is necessary to cover the operating costs of the establishment, there is no direct or indirect economic or commercial advantage within the meaning of this Directive;

Whereas it is necessary to introduce arrangements ensuring that an unwaivable equitable remuneration is obtained by authors and performers who must retain the possibility to entrust the administration of this right to collecting societies representing them;

Whereas the equitable remuneration may be paid on the basis of one or several payments at any time on or after the conclusion of the contract;

Whereas the equitable remuneration must take account of the importance of the contribution of the authors and performers concerned to the phonogram or film;

Whereas it is also necessary to protect the rights at least of authors as regards public lending by providing for specific arrangements; whereas, however, any measures based on Article 5 of this Directive have to comply with Community law, in particular with Article 7 of the Treaty;

Whereas the provisions of Chapter II do not prevent Member States from extending the presumption set out in Article 2 (5) to the exclusive rights included in that chapter; whereas furthermore the provisions of Chapter II do not prevent Member States from providing for a rebuttable presumption of the authorization of exploitation in respect of the exclusive rights of performers provided for in those articles, in so far as such presumption is compatible with the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations (hereinafter referred to as the Rome Convention);

Whereas Member States may provide for more far-reaching protection for owners of rights related to copyright than that required by Article 8 of this Directive;

Whereas the harmonized rental and lending rights and the harmonized protection in the field of rights related to copyright should not be exercised in a way which constitutes a disguised restriction on trade between Member States or in a way which is contrary to the rule of media exploitation chronology, as recognized in the Judgment handed down in *Société Cinéthèque v. FNCF* (4),

HAS ADOPTED THIS DIRECTIVE: CHAPTER I RENTAL AND LENDING RIGHT

Article 1

Object of harmonization 1. In accordance with the provisions of this Chapter, Member States shall provide, subject to Article 5, a right to authorize or prohibit the rental and lending of originals and copies of copyright works, and other subject matter as set out in Article 2 (1).

2. For the purposes of this Directive, 'rental' means making available for use, for a limited period of time and for direct or indirect economic or commercial advantage.

3. For the purposes of this Directive, 'lending' means making available for use, for a limited period of time and not for direct or indirect economic or commercial advantage, when it is made through establishments which are accessible to the public.

4. The rights referred to in paragraph 1 shall not be exhausted by any sale or other act of distribution of originals and copies of copyright works and other subject matter as set out in Article 2 (1).

Article 2

Rightholders and subject matter of rental and lending right 1. The exclusive right to authorize or prohibit rental and lending shall belong:

- to the author in respect of the original and copies of his work,
- to the performer in respect of fixations of his performance,
- to the phonogram producer in respect of his phonograms, and
- to the producer of the first fixation of a film in respect of the original and copies of his film. For the purposes of this Directive, the term 'film' shall designate a cinematographic or audiovisual work or moving images, whether or not accompanied by sound.

2. For the purposes of this Directive the principal director of a cinematographic or audiovisual work shall be considered as its author or one of its authors. Member States may provide for others to be considered as its co-authors.

3. This Directive does not cover rental and lending rights in relation to buildings and to works of applied art.

4. The rights referred to in paragraph 1 may be transferred, assigned or subject to the granting of contractual licences.

5. Without prejudice to paragraph 7, when a contract concerning film production is concluded, individually or collectively, by performers with a film producer, the performer covered by this contract shall be presumed, subject to contractual clauses to the contrary, to have transferred his rental right, subject to Article 4.

6. Member States may provide for a similar presumption as set out in paragraph 5 with respect to authors.

7. Member States may provide that the signing of a contract concluded between a performer and a film producer concerning the production of a film has the effect of authorizing rental, provided that such contract provides for an equitable remuneration within the meaning of Article 4. Member States may also provide that this paragraph shall apply *mutatis mutandis* to the rights included

in Chapter II.

Article 3

Rental of computer programs This Directive shall be without prejudice to Article 4 (c) of Council Directive 91/250/EEC of 14 May 1991 on the legal protection of computer programs (5).

Article 4

Unwaivable right to equitable remuneration 1. Where an author or performer has transferred or assigned his rental right concerning a phonogram or an original or copy of a film to a phonogram or film producer, that author or performer shall retain the right to obtain an equitable remuneration for the rental.

2. The right to obtain an equitable remuneration for rental cannot be waived by authors or performers.

3. The administration of this right to obtain an equitable remuneration may be entrusted to collecting societies representing authors or performers.

4. Member States may regulate whether and to what extent administration by collecting societies of the right to obtain an equitable remuneration may be imposed, as well as the question from whom this remuneration may be claimed or collected.

Article 5

Derogation from the exclusive public lending right 1. Member States may derogate from the exclusive right provided for in Article 1 in respect of public lending, provided that at least authors obtain a remuneration for such lending. Member States shall be free to determine this remuneration taking account of their cultural promotion objectives.

2. When Member States do not apply the exclusive lending right provided for in Article 1 as regards phonograms, films and computer programs, they shall introduce, at least for authors, a remuneration.

3. Member States may exempt certain categories of establishments from the payment of the remuneration referred to in paragraphs 1 and 2.

4. The Commission, in cooperation with the Member States, shall draw up before 1 July 1997 a report on public lending in the Community. It shall forward this report to the European Parliament and to the Council.

CHAPTER II RIGHTS RELATED TO COPYRIGHT

Article 6

Fixation right 1. Member States shall provide for performers the exclusive right to authorize or prohibit the fixation of their performances.

2. Member States shall provide for broadcasting organizations the exclusive right to authorize or prohibit the fixation of their broadcasts, whether these broadcasts are transmitted by wire or

over the air, including by cable or satellite.

3. A cable distributor shall not have the right provided for in paragraph 2 where it merely retransmits by cable the broadcasts of broadcasting organizations.

Article 7

Reproduction right 1. Member States shall provide the exclusive right to authorize or prohibit the direct or indirect reproduction:

- for performers, of fixations of their performances,
- for phonogram producers, of their phonograms,
- for producers of the first fixations of films, in respect of the original and copies of their films, and
- for broadcasting organizations, of fixations of their broadcasts, as set out in Article 6 (2).

2. The reproduction right referred to in paragraph 1 may be transferred, assigned or subject to the granting of contractual licences.

Article 8

Broadcasting and communication to the public 1. Member States shall provide for performers the exclusive right to authorize or prohibit the broadcasting by wireless means and the communication to the public of their performances, except where the performance is itself already a broadcast performance or is made from a fixation.

2. Member States shall provide a right in order to ensure that a single equitable remuneration is paid by the user, if a phonogram published for commercial purposes, or a reproduction of such phonogram, is used for broadcasting by wireless means or for any communication to the public, and to ensure that this remuneration is shared between the relevant performers and phonogram producers. Member States may, in the absence of agreement between the performers and phonogram producers, lay down the conditions as to the sharing of this remuneration between them.

3. Member States shall provide for broadcasting organizations the exclusive right to authorize or prohibit the rebroadcasting of their broadcasts by wireless means, as well as the communication to the public of their broadcasts if such communication is made in places accessible to the public against payment of an entrance fee.

Article 9

Distribution right 1. Member States shall provide

- for performers, in respect of fixations of their performances,
- for phonogram producers, in respect of their phonograms,
- for producers of the first fixations of films, in respect of the original and copies of their films,

- for broadcasting organizations, in respect of fixations of their broadcast as set out in Article 6 (2), the exclusive right to make available these objects, including copies thereof, to the public by sale or otherwise, hereafter referred to as the 'distribution right'.

2. The distribution right shall not be exhausted within the Community in respect of an object as referred to in paragraph 1, except where the first sale in the Community of that object is made by the rightholder or with his consent.

3. The distribution right shall be without prejudice to the specific provisions of Chapter I, in particular Article 1 (4).

4. The distribution right may be transferred, assigned or subject to the granting of contractual licences.

Article 10

Limitations to rights 1. Member States may provide for limitations to the rights referred to in Chapter II in respect of:

(a) private use;

(b) use of short excerpts in connection with the reporting of current events;

(c) ephemeral fixation by a broadcasting organization by means of its own facilities and for its own broadcasts;

(d) use solely for the purposes of teaching or scientific research.

2. Irrespective of paragraph 1, any Member State may provide for the same kinds of limitations with regard to the protection of performers, producers of phonograms, broadcasting organizations and of producers of the first fixations of films, as it provides for in connection with the protection of copyright in literary and artistic works. However, compulsory licences may be provided for only to the extent to which they are compatible with the Rome Convention.

3. Paragraph 1 (a) shall be without prejudice to any existing or future legislation on remuneration for reproduction for private use. CHAPTER III DURATION

Article 11

Duration of authors' rights Without prejudice to further harmonization, the authors' rights referred to in this Directive shall not expire before the end of the term provided by the Berne Convention for the Protection of Literary and Artistic Works.

Article 12

Duration of related rights Without prejudice to further harmonization, the rights referred to in this Directive of performers, phonogram producers and broadcasting organizations shall not expire before the end of the respective terms provided by the Rome Convention. The rights referred to

in this Directive for producers of the first fixations of films shall not expire before the end of a period of 20 years computed from the end of the year in which the fixation was made. CHAPTER IV COMMON PROVISIONS

Article 13

Application in time 1. This Directive shall apply in respect of all copyright works, performances, phonograms, broadcasts and first fixations of films referred to in this Directive which are, on 1 July 1994, still protected by the legislation of the Member States in the field of copyright and related rights or meet the criteria for protection under the provisions of this Directive on that date.

2. This Directive shall apply without prejudice to any acts of exploitation performed before 1 July 1994.

3. Member States may provide that the rightholders are deemed to have given their authorization to the rental or lending of an object referred to in Article 2 (1) which is proven to have been made available to third parties for this purpose or to have been acquired before 1 July 1994. However, in particular where such an object is a digital recording, Member States may provide that rightholders shall have a right to obtain an adequate remuneration for the rental or lending of that object.

4. Member States need not apply the provisions of Article 2 (2) to cinematographic or audiovisual works created before 1 July 1994.

5. Member States may determine the date as from which the Article 2 (2) shall apply, provided that that date is no later than 1 July 1997.

6. This Directive shall, without prejudice to paragraph 3 and subject to paragraphs 8 and 9, not affect any contracts concluded before the date of its adoption.

7. Member States may provide, subject to the provisions of paragraphs 8 and 9, that when rightholders who acquire new rights under the national provisions adopted in implementation of this Directive have, before 1 July 1994, given their consent for exploitation, they shall be presumed to have transferred the new exclusive rights.

8. Member States may determine the date as from which the unwaivable right to an equitable remuneration referred to in Article 4 exists, provided that that date is no later than 1 July 1997.

9. For contracts concluded before 1 July 1994, the unwaivable right to an equitable remuneration provided for in Article 4 shall apply only where authors or performers or those representing them have submitted a request to that effect before 1 January 1997. In the absence of agreement between rightholders concerning the level of remuneration, Member States may fix the level of equitable remuneration.

Article 14

Relation between copyright and related rights Protection of copyright-related rights under this Directive shall leave intact and shall in no way affect the protection of copyright.

Article 15

Final provisions 1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive not later than 1 July 1994. They shall forthwith inform the Commission thereof.

When Member States adopt these measures, they shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The methods of making such a reference shall be laid down by the Member States.

2. Member States shall communicate to the Commission the main provisions of domestic law which they adopt in the field covered by this Directive.

Article 16

This Directive is addressed to the Member States. Done at Brussels, 19 November 1992. For the Council

**Council Directive 93/83/EEC
of 27 September 1993**

on the coordination of certain rules concerning **copyright and rights related to **copyright** applicable to satellite broadcasting and cable retransmission**

COUNCIL DIRECTIVE 93/83/EEC of 27 September 1993 on the coordination of certain rules concerning copyright and rights related to copyright applicable to satellite broadcasting and cable retransmission

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Articles 57 (2) and 66 thereof,

Having regard to the proposal from the Commission (1),

In cooperation with the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

- (1) Whereas the objectives of the Community as laid down in the Treaty include establishing an ever closer union among the peoples of Europe, fostering closer relations between the States belonging to the Community and ensuring the economic and social progress of the Community countries by common action to eliminate the barriers which divide Europe;
- (2) Whereas, to that end, the Treaty provides for the establishment of a common market and an area without internal frontiers; whereas measures to achieve this include the abolition of obstacles to the free movement of services and the institution of a system ensuring that competition in the common market is not distorted; whereas, to that end, the Council may adopt directives for the coordination of the provisions laid down by law, regulation or administrative action in Member States concerning the taking up and pursuit of activities as self-employed persons;
- (3) Whereas broadcasts transmitted across frontiers within the Community, in particular by satellite and cable, are one of the most important ways of pursuing these Community objectives, which are at the same time political, economic, social, cultural and legal;
- (4) Whereas the Council has already adopted Directive 89/552/EEC of 3 October 1989 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the pursuit of television broadcasting activities (4), which makes provision for the promotion of the distribution and production of European television programmes and for advertising and sponsorship, the protection of minors and the right of reply;
- (5) Whereas, however, the achievement of these objectives in respect of cross-border satellite broadcasting and the cable retransmission of programmes from other Member States is currently still obstructed by a series of differences between national rules of copyright and some degree of legal uncertainty; whereas this means that holders of rights are exposed to the threat of seeing their works exploited without payment of remuneration or that the individual holders of exclusive rights in various Member States block the exploitation of their rights; whereas the legal uncertainty in particular constitutes a direct obstacle in the free circulation of programmes within the Community;
- (6) Whereas a distinction is currently drawn for copyright purposes between communication to the public by direct satellite and communication to the public by communications satellite; whereas, since individual reception is possible and affordable nowadays with both types of satellite, there is no longer any justification for this differing legal treatment;
- (7) Whereas the free broadcasting of programmes is further impeded by the current legal uncertainty over whether broadcasting by a satellite whose signals can be received directly affects the

rights in the country of transmission only or in all countries of reception together; whereas, since communications satellites and direct satellites are treated alike for copyright purposes, this legal uncertainty now affects almost all programmes broadcast in the Community by satellite;

- (8) Whereas, furthermore, legal certainty, which is a prerequisite for the free movement of broadcasts within the Community, is missing where programmes transmitted across frontiers are fed into and retransmitted through cable networks;
- (9) Whereas the development of the acquisition of rights on a contractual basis by authorization is already making a vigorous contribution to the creation of the desired European audiovisual area; whereas the continuation of such contractual agreements should be ensured and their smooth application in practice should be promoted wherever possible;
- (10) Whereas at present cable operators in particular cannot be sure that they have actually acquired all the programme rights covered by such an agreement;
- (11) Whereas, lastly, parties in different Member States are not all similarly bound by obligations which prevent them from refusing without valid reason to negotiate on the acquisition of the rights necessary for cable distribution or allowing such negotiations to fail;
- (12) Whereas the legal framework for the creation of a single audiovisual area laid down in Directive 89/552/EEC must, therefore, be supplemented with reference to copyright;
- (13) Whereas, therefore, an end should be put to the differences of treatment of the transmission of programmes by communications satellite which exist in the Member States, so that the vital distinction throughout the Community becomes whether works and other protected subject matter are communicated to the public; whereas this will also ensure equal treatment of the suppliers of cross-border broadcasts, regardless of whether they use a direct broadcasting satellite or a communications satellite;
- (14) Whereas the legal uncertainty regarding the rights to be acquired which impedes cross-border satellite broadcasting should be overcome by defining the notion of communication to the public by satellite at a Community level; whereas this definition should at the same time specify where the act of communication takes place; whereas such a definition is necessary to avoid the cumulative application of several national laws to one single act of broadcasting; whereas communication to the public by satellite occurs only when, and in the Member State where, the programme-carrying signals are introduced under the control and responsibility of the broadcasting organization into an uninterrupted chain of communication leading to the satellite and down towards the earth; whereas normal technical procedures relating to the programme-carrying signals should not be considered as interruptions to the chain of broadcasting;
- (15) Whereas the acquisition on a contractual basis of exclusive broadcasting rights should comply with any legislation on copyright and rights related to copyright in the Member State in which communication to the public by satellite occurs;
- (16) Whereas the principle of contractual freedom on which this Directive is based will make it possible to continue limiting the exploitation of these rights, especially as far as certain technical means of transmission or certain language versions are concerned;
- (17) Whereas, in arriving at the amount of the payment to be made for the rights acquired, the parties should take account of all aspects of the broadcast, such as the actual audience, the potential audience and the language version;
- (18) Whereas the application of the country-of-origin principle contained in this Directive could pose a problem with regard to existing contracts; whereas this Directive should provide for a period of five years for existing contracts to be adapted, where necessary, in the light of

the Directive; whereas the said country-of-origin principle should not, therefore, apply to existing contracts which expire before 1 January 2000; whereas if by that date parties still have an interest in the contract, the same parties should be entitled to renegotiate the conditions of the contract;

- (19) Whereas existing international co-production agreements must be interpreted in the light of the economic purpose and scope envisaged by the parties upon signature; whereas in the past international co-production agreements have often not expressly and specifically addressed communication to the public by satellite within the meaning of this Directive a particular form of exploitation; whereas the underlying philosophy of many existing international co-production agreements is that the rights in the co-production are exercised separately and independently by each co-producer, by dividing the exploitation rights between them along territorial lines; whereas, as a general rule, in the situation where a communication to the public by satellite authorized by one co-producer would prejudice the value of the exploitation rights of another co-producer, the interpretation of such an existing agreement would normally suggest that the latter co-producer would have to give his consent to the authorization, by the former co-producer, of the communication to the public by satellite; whereas the language exclusivity of the latter co-producer will be prejudiced where the language version or versions of the communication to the public, including where the version is dubbed or subtitled, coincide(s) with the language or the languages widely understood in the territory allotted by the agreement to the latter co-producer; whereas the notion of exclusivity should be understood in a wider sense where the communication to the public by satellite concerns a work which consists merely of images and contains no dialogue or subtitles; whereas a clear rule is necessary in cases where the international co-production agreement does not expressly regulate the division of rights in the specific case of communication to the public by satellite within the meaning of this Directive;
- (20) Whereas communications to the public by satellite from non-member countries will under certain conditions be deemed to occur within a Member State of the Community;
- (21) Whereas it is necessary to ensure that protection for authors, performers, producers of phonograms and broadcasting organizations is accorded in all Member States and that this protection is not subject to a statutory licence system; whereas only in this way is it possible to ensure that any difference in the level of protection within the common market will not create distortions of competition;
- (22) Whereas the advent of new technologies is likely to have an impact on both the quality and the quantity of the exploitation of works and other subject matter;
- (23) Whereas in the light of these developments the level of protection granted pursuant to this Directive to all rightholders in the areas covered by this Directive should remain under consideration;
- (24) Whereas the harmonization of legislation envisaged in this Directive entails the harmonization of the provisions ensuring a high level of protection of authors, performers, phonogram producers and broadcasting organizations; whereas this harmonization should not allow a broadcasting organization to take advantage of differences in levels of protection by relocating activities, to the detriment of audiovisual productions;
- (25) Whereas the protection provided for rights related to copyright should be aligned on that contained in Council Directive 92/100/EEC of 19 November 1992 on rental right and lending right and on certain rights related to copyright in the field of intellectual property (5) for the purposes of communication to the public by satellite; whereas, in particular, this will ensure that performers and phonogram producers are guaranteed an appropriate remuneration for the communication to the public by satellite of their performances or phonograms;
- (26) Whereas the provisions of Article 4 do not prevent Member States from extending the presumption

set out in Article 2 (5) of Directive 92/100/EEC to the exclusive rights referred to in Article 4; whereas, furthermore, the provisions of Article 4 do not prevent Member States from providing for a rebuttable presumption of the authorization of exploitation in respect of the exclusive rights of performers referred to in that Article, in so far as such presumption is compatible with the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations;

- (27) Whereas the cable retransmission of programmes from other Member States is an act subject to copyright and, as the case may be, rights related to copyright; whereas the cable operator must, therefore, obtain the authorization from every holder of rights in each part of the programme retransmitted; whereas, pursuant to this Directive, the authorizations should be granted contractually unless a temporary exception is provided for in the case of existing legal licence schemes;
- (28) Whereas, in order to ensure that the smooth operation of contractual arrangements is not called into question by the intervention of outsiders holding rights in individual parts of the programme, provision should be made, through the obligation to have recourse to a collecting society, for the exclusive collective exercise of the authorization right to the extent that this is required by the special features of cable retransmission; whereas the authorization right as such remains intact and only the exercise of this right is regulated to some extent, so that the right to authorize a cable retransmission can still be assigned; whereas this Directive does not affect the exercise of moral rights;
- (29) Whereas the exemption provided for in Article 10 should not limit the choice of holders of rights to transfer their rights to a collecting society and thereby have a direct share in the remuneration paid by the cable distributor for cable retransmission;
- (30) Whereas contractual arrangements regarding the authorization of cable retransmission should be promoted by additional measures; whereas a party seeking the conclusion of a general contract should, for its part, be obliged to submit collective proposals for an agreement; whereas, furthermore, any party shall be entitled, at any moment, to call upon the assistance of impartial mediators whose task is to assist negotiations and who may submit proposals; whereas any such proposals and any opposition thereto should be served on the parties concerned in accordance with the applicable rules concerning the service of legal documents, in particular as set out in existing international conventions; whereas, finally, it is necessary to ensure that the negotiations are not blocked without valid justification or that individual holders are not prevented without valid justification from taking part in the negotiations; whereas none of these measures for the promotion of the acquisition of rights calls into question the contractual nature of the acquisition of cable retransmission rights;
- (31) Whereas for a transitional period Member States should be allowed to retain existing bodies with jurisdiction in their territory over cases where the right to retransmit a programme by cable to the public has been unreasonably refused or offered on unreasonable terms by a broadcasting organization; whereas it is understood that the right of parties concerned to be heard by the body should be guaranteed and that the existence of the body should not prevent the parties concerned from having normal access to the courts;
- (32) Whereas, however, Community rules are not needed to deal with all of those matters, the effects of which perhaps with some commercially insignificant exceptions, are felt only inside the borders of a single Member State;
- (33) Whereas minimum rules should be laid down in order to establish and guarantee free and uninterrupted cross-border broadcasting by satellite and simultaneous, unaltered cable retransmission of programmes broadcast from other Member States, on an essentially contractual basis;

- (34) Whereas this Directive should not prejudice further harmonization in the field of copyright and rights related to copyright and the collective administration of such rights; whereas the possibility for Member States to regulate the activities of collecting societies should not prejudice the freedom of contractual negotiation of the rights provided for in this Directive, on the understanding that such negotiation takes place within the framework of general or specific national rules with regard to competition law or the prevention of abuse of monopolies;
- (35) Whereas it should, therefore, be for the Member States to supplement the general provisions needed to achieve the objectives of this Directive by taking legislative and administrative measures in their domestic law, provided that these do not run counter to the objectives of this Directive and are compatible with Community law;
- (36) Whereas this Directive does not affect the applicability of the competition rules in Articles 85 and 86 of the Treaty,

HAS ADOPTED THIS DIRECTIVE:

CHAPTER I DEFINITIONS

Article 1

Definitions 1. For the purpose of this Directive, 'satellite' means any satellite operating on frequency bands which, under telecommunications law, are reserved for the broadcast of signals for reception by the public or which are reserved for closed, point-to-point communication. In the latter case, however, the circumstances in which individual reception of the signals takes place must be comparable to those which apply in the first case.

2. (a) For the purpose of this Directive, 'communication to the public by satellite' means the act of introducing, under the control and responsibility of the broadcasting organization, the programme-carrying signals intended for reception by the public into an uninterrupted chain of communication leading to the satellite and down towards the earth.

- (b) The act of communication to the public by satellite occurs solely in the Member State where, under the control and responsibility of the broadcasting organization, the programme-carrying signals are introduced into an uninterrupted chain of communication leading to the satellite and down towards the earth.
- (c) If the programme-carrying signals are encrypted, then there is communication to the public by satellite on condition that the means for decrypting the broadcast are provided to the public by the broadcasting organization or with its consent.
- (d) Where an act of communication to the public by satellite occurs in a non-Community State which does not provide the level of protection provided for under Chapter II,
- (i) if the programme-carrying signals are transmitted to the satellite from an uplink situation situated in a Member State, that act of communication to the public by satellite shall be deemed to have occurred in that Member State and the rights provided for under Chapter II shall be exercisable against the person operating the uplink station; or
- (ii) if there is no use of an uplink station situated in a Member State but a broadcasting organization established in a Member State has commissioned the act of communication to the public by satellite, that act shall be deemed to have occurred in the Member State in which the broadcasting organization has its principal establishment in the Community and the rights provided for under Chapter II

shall be exercisable against the broadcasting organization.

3. For the purposes of this Directive, 'cable retransmission' means the simultaneous, unaltered and unabridged retransmission by a cable or microwave system for reception by the public of an initial transmission from another Member State, by wire or over the air, including that by satellite, of television or radio programmes intended for reception by the public.

4. For the purposes of this Directive 'collecting society' means any organization which manages or administers copyright or rights related to copyright as its sole purpose or as one of its main purposes.

5. For the purposes of this Directive, the principal director of a cinematographic or audiovisual work shall be considered as its author or one of its authors. Member States may provide for others to be considered as its co-authors.

CHAPTER II BROADCASTING OF PROGRAMMES BY SATELLITE

Article 2

Broadcasting right Member States shall provide an exclusive right for the author to authorize the communication to the public by satellite of copyright works, subject to the provisions set out in this chapter.

Article 3

Acquisition of broadcasting rights 1. Member States shall ensure that the authorization referred to in Article 2 may be acquired only by agreement.

2. A Member State may provide that a collective agreement between a collecting society and a broadcasting organization concerning a given category of works may be extended to rightholders of the same category who are not represented by the collecting society, provided that:

- the communication to the public by satellite simulcasts a terrestrial broadcast by the same broadcaster, and
- the unrepresented rightholder shall, at any time, have the possibility of excluding the extension of the collective agreement to his works and of exercising his rights either individually or collectively.

3. Paragraph 2 shall not apply to cinematographic works, including works created by a process analogous to cinematography.

4. Where the law of a Member State provides for the extension of a collective agreement in accordance with the provisions of paragraph 2, that Member States shall inform the Commission which broadcasting organizations are entitled to avail themselves of that law. The Commission shall publish this information in the Official Journal of the European Communities (C series).

Article 4

Rights of performers, phonogram producers and broadcasting organizations 1. For the purposes of communication to the public by satellite, the rights of performers, phonogram producers and broadcasting

organizations shall be protected in accordance with the provisions of Articles 6, 7, 8 and 10 of Directive 92/100/EEC.

2. For the purposes of paragraph 1, 'broadcasting by wireless means' in Directive 92/100/EEC shall be understood as including communication to the public by satellite.

3. With regard to the exercise of the rights referred to in paragraph 1, Articles 2 (7) and 12 of Directive 92/100/EEC shall apply.

Article 5

Relation between copyright and related rights Protection of copyright-related rights under this Directive shall leave intact and shall in no way affect the protection of copyright.

Article 6

Minimum protection 1. Member States may provide for more far-reaching protection for holders of rights related to copyright than that required by Article 8 of Directive 92/100/EEC.

2. In applying paragraph 1 Member States shall observe the definitions contained in Article 1 (1) and (2).

Article 7

Transitional provisions 1. With regard to the application in time of the rights referred to in Article 4 (1) of this Directive, Article 13 (1), (2), (6) and (7) of Directive 92/100/EEC shall apply. Article 13 (4) and (5) of Directive 92/100/EEC shall apply mutatis mutandis.

2. Agreements concerning the exploitation of works and other protected subject matter which are in force on the date mentioned in Article 14 (1) shall be subject to the provisions of Articles 1 (2), 2 and 3 as from 1 January 2000 if they expire after that date.

3. When an international co-production agreement concluded before the date mentioned in Article 14 (1) between a co-producer from a Member State and one or more co-producers from other Member States or third countries expressly provides for a system of division of exploitation rights between the co-producers by geographical areas for all means of communication to the public, without distinguishing the arrangement applicable to communication to the public by satellite from the provisions applicable to the other means of communication, and where communication to the public by satellite of the co-production would prejudice the exclusivity, in particular the language exclusivity, of one of the co-producers or his assignees in a given territory, the authorization by one of the co-producers or his assignees for a communication to the public by satellite shall require the prior consent of the holder of that exclusivity, whether co-producer or assignee.

CHAPTER III CABLE RETRANSMISSION

Article 8

Cable retransmission right 1. Member States shall ensure that when programmes from other Member States are retransmitted by cable in their territory the applicable copyright and related rights are observed and that such retransmission takes place on the basis of individual or collective contractual agreements between copyright owners, holders of related rights and cable operators.

2. Notwithstanding paragraph 1, Member States may retain until 31 December 1997 such statutory licence systems which are in operation or expressly provided for by national law on 31 July 1991.

Article 9

Exercise of the cable retransmission right 1. Member States shall ensure that the right of copyright owners and holders or related rights to grant or refuse authorization to a cable operator for a cable retransmission may be exercised only through a collecting society.

2. Where a rightholder has not transferred the management of his rights to a collecting society, the collecting society which manages rights of the same category shall be deemed to be mandated to manage his rights. Where more than one collecting society manages rights of that category, the rightholder shall be free to choose which of those collecting societies is deemed to be mandated to manage his rights. A rightholder referred to in this paragraph shall have the same rights and obligations resulting from the agreement between the cable operator and the collecting society which is deemed to be mandated to manage his rights as the rightholders who have mandated that collecting society and he shall be able to claim those rights within a period, to be fixed by the Member State concerned, which shall not be shorter than three years from the date of the cable retransmission which includes his work or other protected subject matter.

3. A Member State may provide that, when a rightholder authorizes the initial transmission within its territory of a work or other protected subject matter, he shall be deemed to have agreed not to exercise his cable retransmission rights on an individual basis but to exercise them in accordance with the provisions of this Directive.

Article 10

Exercise of the cable retransmission right by broadcasting organizations Member States shall ensure that Article 9 does not apply to the rights exercised by a broadcasting organization in respect of its own transmission, irrespective of whether the rights concerned are its own or have been transferred to it by other copyright owners and/or holders of related rights.

Article 11

Mediators 1. Where no agreement is concluded regarding authorization of the cable retransmission of a broadcast. Member States shall ensure that either party may call upon the assistance of one or more mediators.

2. The task of the mediators shall be to provide assistance with negotiation. They may also submit proposals to the parties.

3. It shall be assumed that all the parties accept a proposal as referred to in paragraph 2 if none of them expresses its opposition within a period of three months. Notice of the proposal and

of any opposition thereto shall be served on the parties concerned in accordance with the applicable rules concerning the service of legal documents.

4. The mediators shall be so selected that their independence and impartiality are beyond reasonable doubt.

Article 12

Prevention of the abuse of negotiating positions 1. Member States shall ensure by means of civil or administrative law, as appropriate, that the parties enter and conduct negotiations regarding authorization for cable retransmission in good faith and do not prevent or hinder negotiation without valid justification.

2. A Member State which, on the date mentioned in Article 14 (1), has a body with jurisdiction in its territory over cases where the right to retransmit a programme by cable to the public in that Member State has been unreasonably refused or offered on unreasonable terms by a broadcasting organization may retain that body.

3. Paragraph 2 shall apply for a transitional period of eight years from the date mentioned in Article 14 (1).

CHAPTER IV GENERAL PROVISIONS

Article 13

Collective administration of rights This Directive shall be without prejudice to the regulation of the activities of collecting societies by the Member States.

Article 14

Final provisions 1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive before 1 January 1995. They shall immediately inform the Commission thereof.

When Member States adopt these measures, the latter shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The methods of making such a reference shall be laid down by the Member States.

2. Member States shall communicate to the Commission the provisions of national law which they adopt in the field covered by this Directive.

3. Not later than 1 January 2000, the Commission shall submit to the European Parliament, the Council and the Economic and Social Committee a report on the application of this Directive and, if necessary, make further proposals to adapt it to developments in the audio and audiovisual sector.

Article 15

This Directive is addressed to the Member States.

Done at Brussels, 27 September 1993.

**Council Directive 93/98/EEC
of 29 October 1993**

harmonizing the term of protection of **copyright and certain related rights**

COUNCIL DIRECTIVE 93/98/EEC of 29 October 1993 harmonizing the term of protection of copyright and certain related rights

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Articles 57 (2), 66 and 100a thereof,

Having regard to the proposal from the Commission (1),

In cooperation with the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

- (1) Whereas the Berne Convention for the protection of literary and artistic works and the International Convention for the protection of performers, producers of phonograms and broadcasting organizations (Rome Convention) lay down only minimum terms of protection of the rights they refer to, leaving the Contracting States free to grant longer terms; whereas certain Member States have exercised this entitlement; whereas in addition certain Member States have not become party to the Rome Convention;
- (2) Whereas there are consequently differences between the national laws governing the terms of protection of copyright and related rights, which are liable to impede the free movement of goods and freedom to provide services, and to distort competition in the common market; whereas therefore with a view to the smooth operation of the internal market, the laws of the Member States should be harmonized so as to make terms of protection identical throughout the Community;
- (3) Whereas harmonization must cover not only the terms of protection as such, but also certain implementing arrangements such as the date from which each term of protection is calculated;
- (4) Whereas the provisions of this Directive do not affect the application by the Member States of the provisions of Article 14a (2) (b), (c) and (d) and (3) of the Berne Convention;
- (5) Whereas the minimum term of protection laid down by the Berne Convention, namely the life of the author and 50 years after his death, was intended to provide protection for the author and the first two generations of his descendants; whereas the average lifespan in the Community has grown longer, to the point where this term is no longer sufficient to cover two generations;
- (6) Whereas certain Member States have granted a term longer than 50 years after the death of the author in order to offset the effects of the world wars on the exploitation of authors' works;
- (7) Whereas for the protection of related rights certain Member States have introduced a term of 50 years after lawful publication or lawful communication to the public;
- (8) Whereas under the Community position adopted for the Uruguay Round negotiations under the General Agreement on Tariffs and Trade (GATT) the term of protection for producers of phonograms should be 50 years after first publication;
- (9) Whereas due regard for established rights is one of the general principles of law protected by the Community legal order; whereas, therefore, a harmonization of the terms of protection of copyright and related rights cannot have the effect of reducing the protection currently enjoyed by rightholders in the Community; whereas in order to keep the effects of transitional measures to a minimum and to allow the internal market to operate in practice, the harmonization of the term of protection should take place on a long term basis;

-
- (10) Whereas in its communication of 17 January 1991 'Follow-up to the Green Paper - Working programme of the Commission in the field of copyright and neighbouring rights' the Commission stresses the need to harmonize copyright and neighbouring rights at a high level of protection since these rights are fundamental to intellectual creation and stresses that their protection ensures the maintenance and development of creativity in the interest of authors, cultural industries, consumers and society as a whole;
- (11) Whereas in order to establish a high level of protection which at the same time meets the requirements of the internal market and the need to establish a legal environment conducive to the harmonious development of literary and artistic creation in the Community, the term of protection for copyright should be harmonized at 70 years after the death of the author or 70 years after the work is lawfully made available to the public, and for related rights at 50 years after the event which sets the term running;
- (12) Whereas collections are protected according to Article 2 (5) of the Berne Convention when, by reason of the selection and arrangement of their content, they constitute intellectual creations; whereas those works are protected as such, without prejudice to the copyright in each of the works forming part of such collections, whereas in consequence specific terms of protection may apply to works included in collections;
- (13) Whereas in all cases where one or more physical persons are identified as authors the term of protection should be calculated after their death; whereas the question of authorship in the whole or a part of a work is a question of fact which the national courts may have to decide;
- (14) Whereas terms of protection should be calculated from the first day of January of the year following the relevant event, as they are in the Berne and Rome Conventions;
- (15) Whereas Article 1 of Council Directive 91/250/EEC of 14 May 1991 on the legal protection of computer programs (4) provides that Member States are to protect computer programs, by copyright, as literary works within the meaning of the Berne Convention; whereas this Directive harmonizes the term of protection of literary works in the Community; whereas Article 8 of Directive 91/250/EEC, which merely makes provisional arrangements governing the term of protection of computer programs, should accordingly be repealed;
- (16) Whereas Articles 11 and 12 of Council Directive 92/100/EEC of 19 November 1992 on rental right and lending right and on certain rights related to copyright in the field of intellectual property (5) make provision for minimum terms of protection only, subject to any further harmonization; whereas this Directive provides such further harmonization; whereas these Articles should accordingly be repealed;
- (17) Whereas the protection of photographs in the Member States is the subject of varying regimes; whereas in order to achieve a sufficient harmonization of the term of protection of photographic works, in particular of those which, due to their artistic or professional character, are of importance within the internal market, it is necessary to define the level of originality required in this Directive; whereas a photographic work within the meaning of the Berne Convention is to be considered original if it is the author's own intellectual creation reflecting his personality, no other criteria such as merit or purpose being taken into account; whereas the protection of other photographs should be left to national law;
- (18) Whereas, in order to avoid differences in the term of protection as regards related rights it is necessary to provide the same starting point for the calculation of the term throughout the Community; whereas the performance, fixation, transmission, lawful publication, and lawful communication to the public, that is to say the means of making a subject of a related right perceptible in all appropriate ways to persons in general, should be taken into account for the

calculation of the term of protection regardless of the country where this performance, fixation, transmission, lawful publication, or lawful communication to the public takes place;

- (19) Whereas the rights of broadcasting organizations in their broadcasts, whether these broadcasts are transmitted by wire or over the air, including by cable or satellite, should not be perpetual; whereas it is therefore necessary to have the term of protection running from the first transmission of a particular broadcast only; whereas this provision is understood to avoid a new term running in cases where a broadcast is identical to a previous one;
- (20) Whereas the Member States should remain free to maintain or introduce other rights related to copyright in particular in relation to the protection of critical and scientific publications; whereas, in order to ensure transparency at Community level, it is however necessary for Member States which introduce new related rights to notify the Commission;
- (21) Whereas it is useful to make clear that the harmonization brought about by this Directive does not apply to moral rights;
- (22) Whereas, for works whose country of origin within the meaning of the Berne Convention is a third country and whose author is not a Community national, comparison of terms of protection should be applied, provided that the term accorded in the Community does not exceed the term laid down in this Directive;
- (23) Whereas where a rightholder who is not a Community national qualifies for protection under an international agreement the term of protection of related rights should be the same as that laid down in this Directive, except that it should not exceed that fixed in the country of which the rightholder is a national;
- (24) Whereas comparison of terms should not result in Member States being brought into conflict with their international obligations;
- (25) Whereas, for the smooth functioning of the internal market this Directive should be applied as from 1 July 1995;
- (26) Whereas Member States should remain free to adopt provisions on the interpretation, adaptation and further execution of contracts on the exploitation of protected works and other subject matter which were concluded before the extension of the term of protection resulting from this Directive;
- (27) Whereas respect of acquired rights and legitimate expectations is part of the Community legal order; whereas Member States may provide in particular that in certain circumstances the copyright and related rights which are revived pursuant to this Directive may not give rise to payments by persons who undertook in good faith the exploitation of the works at the time when such works lay within the public domain,

HAS ADOPTED THIS DIRECTIVE:

Article 1

Duration of authors' rights

1. The rights of an author of a literary or artistic work within the meaning of Article 2 of the Berne Convention shall run for the life of the author and for 70 years after his death, irrespective of the date when the work is lawfully made available to the public.
2. In the case of a work of joint authorship the term referred to in paragraph 1 shall be calculated from the death of the last surviving author.

3. In the case of anonymous or pseudonymous works, the term of protection shall run for seventy years after the work is lawfully made available to the public. However, when the pseudonym adopted by the author leaves no doubt as to his identity, or if the author discloses his identity during the period referred to in the first sentence, the term of protection applicable shall be that laid down in paragraph 1.

4. Where a Member State provides for particular provisions on copyright in respect of collective works or for a legal person to be designated as the rightholder, the term of protection shall be calculated according to the provisions of paragraph 3, except if the natural persons who have created the work as such are identified as such in the versions of the work which are made available to the public. This paragraph is without prejudice to the rights of identified authors whose identifiable contributions are included in such works, to which contributions paragraph 1 or 2 shall apply.

5. Where a work is published in volumes, parts, instalments, issues or episodes and the term of protection runs from the time when the work was lawfully made available to the public, the term of protection shall run for each such item separately.

6. In the case of works for which the term of protection is not calculated from the death of the author or authors and which have not been lawfully made available to the public within seventy years from their creation, the protection shall terminate.

Article 2

Cinematographic or audiovisual works

1. The principal director of a cinematographic or audiovisual work shall be considered as its author or one of its authors. Member States shall be free to designate other co-authors.

2. The term of protection of cinematographic or audiovisual works shall expire 70 years after the death of the last of the following persons to survive, whether or not these persons are designated as co-authors: the principal director, the author of the screenplay, the author of the dialogue and the composer of music specifically created for use in the cinematographic or audiovisual work.

Article 3

Duration of related rights

1. The rights of performers shall expire 50 years after the date of the performance. However, if a fixation of the performance is lawfully published or lawfully communicated to the public within this period, the rights shall expire 50 years from the date of the first such publication or the first such communication to the public, whichever is the earlier.

2. The rights of producers of phonograms shall expire 50 years after the fixation is made. However, if the phonogram is lawfully published or lawfully communicated to the public during this period, the rights shall expire 50 years from the date of the first such publication or the first such communication to the public, whichever is the earlier.

3. The rights of producers of the first fixation of a film shall expire 50 years after the fixation is made. However, if the film is lawfully published or lawfully communicated to the public during this period, the rights shall expire 50 years from the date of the first such publication or the first such communication to the public, whichever is the earlier. The term 'film' shall designate

a cinematographic or audiovisual work or moving images, whether or not accompanied by sound.

4. The rights of broadcasting organizations shall expire 50 years after the first transmission of a broadcast, whether this broadcast is transmitted by wire or over the air, including by cable or satellite.

Article 4

Protection of previously unpublished works

Any person who, after the expiry of copyright protection, for the first time lawfully publishes or lawfully communicates to the public a previously unpublished work, shall benefit from a protection equivalent to the economic rights of the author. The term of protection of such rights shall be 25 years from the time when the work was first lawfully published or lawfully communicated to the public.

Article 5

Critical and scientific publications

Member States may protect critical and scientific publications of works which have come into the public domain. The maximum term of protection of such rights shall be 30 years from the time when the publication was first lawfully published.

Article 6

Protection of photographs

Photographs which are original in the sense that they are the author's own intellectual creation shall be protected in accordance with Article 1. No other criteria shall be applied to determine their eligibility for protection. Member States may provide for the protection of other photographs.

Article 7

Protection vis-à-vis third countries

1. Where the country of origin of a work, within the meaning of the Berne Convention, is a third country, and the author of the work is not a Community national, the term of protection granted by the Member States shall expire on the date of expiry of the protection granted in the country of origin of the work, but may not exceed the term laid down in Article 1.

2. The terms of protection laid down in Article 3 shall also apply in the case of rightholders who are not Community nationals, provided Member States grant them protection. However, without prejudice to the international obligations of the Member States, the term of protection granted by Member States shall expire no later than the date of expiry of the protection granted in the country of which the rightholder is a national and may not exceed the term laid down in Article 3.

3. Member States which, at the date of adoption of this Directive, in particular pursuant to their international obligations, granted a longer term of protection than that which would result from the provisions, referred to in paragraphs 1 and 2 may maintain this protection until the conclusion of international agreements on the term of protection by copyright or related rights.

Article 8

Calculation of terms

The terms laid down in this Directive are calculated from the first day of January of the year following the event which gives rise to them.

Article 9

Moral rights

This Directive shall be without prejudice to the provisions of the Member States regulating moral rights.

Article 10

Application in time

1. Where a term of protection, which is longer than the corresponding term provided for by this Directive, is already running in a Member State on the date referred to in Article 13 (1), this Directive shall not have the effect of shortening that term of protection in that Member State.

2. The terms of protection provided for in this Directive shall apply to all works and subject matter which are protected in at least one Member State, on the date referred to in Article 13 (1), pursuant to national provisions on copyright or related rights or which meet the criteria for protection under Directive 92/100/EEC.

3. This Directive shall be without prejudice to any acts of exploitation performed before the date referred to in Article 13 (1). Member States shall adopt the necessary provisions to protect in particular acquired rights of third parties.

4. Member States need not apply the provisions of Article 2 (1) to cinematographic or audiovisual works created before 1 July 1994.

5. Member States may determine the date as from which Article 2 (1) shall apply, provided that date is no later than 1 July 1997.

Article 11

Technical adaptation

1. Article 8 of Directive 91/250/EEC is hereby repealed.

2. Articles 11 and 12 of Directive 92/100/EEC are hereby repealed.

Article 12

Notification procedure

Member States shall immediately notify the Commission of any governmental plan to grant new related rights, including the basic reasons for their introduction and the term of protection envisaged.

Article 13

General provisions

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with Articles 1 to 11 of this Directive before 1 July 1995.

When Member States adopt these provisions, they shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The methods of making such a reference shall be laid down by the Member States.

Member States shall communicate to the Commission the texts of the provisions of national law which they adopt in the field governed by this Directive.

2. Member States shall apply Article 12 from the date of notification of this Directive.

Article 14

This Directive is addressed to the Member States.

Done at Brussels, 29 October 1993.

**Council Resolution
of 14 May 1992
on increased protection for **copyright** and **neighbouring rights****

COUNCIL RESOLUTION of 14 May 1992 on increased protection for copyright and neighbouring rights (92/C 138/01)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Whereas advances in technology have encouraged the exploitation of literary and artistic works throughout the world; whereas the protection of copyright and neighbouring rights should therefore be consolidated at national, Community and international level;

Whereas, because of the level of protection they guarantee for literary and artistic works, rights of performers, producers of phonograms and broadcasting organizations, the Berne Convention for the Protection of Literary and Artistic works enshrined in the Paris Act of 24 July 1971 (Paris Act of the Berne Convention), and the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations (Rome Convention) of 26 October 1961 enjoy a wide and increasing international acceptance; whereas it is necessary that all the Member States of the Community become parties to these Conventions;

Whereas, given the problem of piracy, it is in the interests of rightholders in the Community protected by these instruments that they should be ensured the minimum level of protection afforded by the latter in the maximum possible number of third countries, without prejudice to more detailed provisions in bilateral or multilateral agreements; whereas it is desirable that third countries become parties to these instruments,

HEREBY ADOPTS THIS RESOLUTION:

1. The Council notes that the Member States of the Community, in so far as they have not already done so, undertake, subject to their constitutional provisions, to become by 1 January 1995 parties to the Paris Act of the Berne Convention and the Rome Convention, and to introduce national legislation to ensure effective compliance therewith.
2. The Council considers that it is in the interests of Community copyright-holders and holders of neighbouring rights in the Community that third countries should ratify the Paris Act of the Berne Convention and the Rome Convention or accede thereto. It accordingly invites the Commission, when negotiating agreements between the Community and third countries, to pay particular attention, within the terms of the mandates given to them for the purpose, to the ratification of these instruments by the third countries concerned, or to the accession of the latter thereto, and to the effective compliance of such countries with these instruments.

Conclusions of the Ministers for Culture meeting within the Council of 7 June 1991 on copyright and neighbouring rights

CONCLUSIONS OF THE MINISTERS FOR CULTURE MEETING WITHIN THE COUNCIL of 7 June 1991 on copyright and neighbouring rights (91/C 188/04)

THE MINISTERS FOR CULTURE MEETING WITHIN THE COUNCIL,

Referring to the 'Green Paper on copyright and the technological challenge' published by the Commission in 1988 for discussion by the Member States and the professional circles concerned,

Bearing in mind their wish expressed both at the informal meeting of Culture Ministers on 2 November 1989 at Blois and in the Council on 19 November 1990, that the Commission should propose a comprehensive discussion of questions concerning the rights of authors, artists and producers in the Community, taking into account the completion of the single market on 1 January 1993,

Recalling their opinion that the matter of cultural goods and services cannot be addressed in the Community without taking into account their specific nature,

Consequently voicing their concern that the completion of the single market should not constitute a threat to cultural identities and to the rich diversity of Europe and that, taking into account the cultural dimension of copyright, internal harmonization at Community level in this area should be implemented only in areas affecting the establishment or functioning of the common market,

Considering that the Commission, when approving on 5 December 1990 its work programme in the matter of copyright and neighbouring rights in the form of a communication entitled 'Follow-up to the Green Paper', opens up real opportunities in this field for the completion of the single market,

Having taken note of the first three documents put forward by the Commission:

- the proposal for a Council Decision concerning the accession of the Member States to the Berne Convention (Paris Act of 24 July 1971) and the Rome International Convention of 26 October 1961,
- the proposal for a Directive on rental right, lending right and on certain related rights,
- the consultative document entitled 'Broadcasting and copyright in the internal market', on cable and satellite broadcasting,

WELCOME the overall approach to the harmonization of copyright and neighbouring rights adopted by the Commission in its work programme,

EXPRESS their satisfaction that the Commission has clearly demonstrated its will to seek, with a view to the single market, a high level of protection for authors, artists and producers in the whole Community,

POINT OUT that concern with the cultural industries should not cause to be relegated to a secondary level the giving of priority attention to the specific problems encountered by the professionals,

POINT OUT further that the free movement of goods should at no time detract from moral rights and rights to beneficial economic use associated with the different forms of presentation of works to the public,

REQUEST that in connection with the harmonization of copyright and neighbouring rights and while respecting the provisions of the Treaty of Rome, the capacity of Member States to preserve the balance of creative and artistic activity, particularly in limited geographical or linguistic distribution areas, should not be jeopardized,

REQUEST that allowance should be made for the consequences which the adoption of normative measures would have on the conditions of the exercise of the rights granted for the holders of these rights,

INVITE the Commission to make as quickly as possible a study of the conditions of the administration of these rights,

REQUEST that in negotiations with third parties (in particular the European economic area and countries of Central and Eastern Europe, without neglecting the other regions of the world), the cultural content of copyright and neighbouring rights should be taken into account,

INVITE the Commission to seek reinforced cooperation with the Council of Europe in this field.

**Council Directive 91/250/EEC
of 14 May 1991
on the legal protection of computer programs**

COUNCIL DIRECTIVE of 14 May 1991 on the legal protection of computer programs (91/250/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community and in particular Article 100a thereof,

Having regard to the proposal from the Commission (1),

In cooperation with the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

Whereas computer programs are at present not clearly protected in all Member States by existing legislation and such protection, where it exists, has different attributes;

Whereas the development of computer programs requires the investment of considerable human, technical and financial resources while computer programs can be copied at a fraction of the cost needed to develop them independently;

Whereas computer programs are playing an increasingly important role in a broad range of industries and computer program technology can accordingly be considered as being of fundamental importance for the Community's industrial development;

Whereas certain differences in the legal protection of computer programs offered by the laws of the Member States have direct and negative effects on the functioning of the common market as regards computer programs and such differences could well become greater as Member States introduce new legislation on this subject;

Whereas existing differences having such effects need to be removed and new ones prevented from arising, while differences not adversely affecting the functioning of the common market to a substantial degree need not be removed or prevented from arising;

Whereas the Community's legal framework on the protection of computer programs can accordingly in the first instance be limited to establishing that Member States should accord protection to computer programs under copyright law as literary works and, further, to establishing who and what should be protected, the exclusive rights on which protected persons should be able to rely in order to authorize or prohibit certain acts and for how long the protection should apply;

Whereas, for the purpose of this Directive, the term 'computer program' shall include programs in any form, including those which are incorporated into hardware; whereas this term also includes preparatory design work leading to the development of a computer program provided that the nature of the preparatory work is such that a computer program can result from it at a later stage;

Whereas, in respect of the criteria to be applied in determining whether or not a computer program is an original work, no tests as to the qualitative or aesthetic merits of the program should be applied;

Whereas the Community is fully committed to the promotion of international standardization;

Whereas the function of a computer program is to communicate and work together with other components of a computer system and with users and, for this purpose, a logical and, where appropriate, physical interconnection and interaction is required to permit all elements of software and hardware to work with other software and hardware and with users in all the ways in which they are intended to function;

Whereas the parts of the program which provide for such interconnection and interaction between elements of software and hardware are generally known as 'interfaces`;

Whereas this functional interconnection and interaction is generally known as 'interoperability`; whereas such interoperability can be defined as the ability to exchange information and mutually to use the information which has been exchanged;

Whereas, for the avoidance of doubt, it has to be made clear that only the expression of a computer program is protected and that ideas and principles which underlie any element of a program, including those which underlie its interfaces, are not protected by copyright under this Directive;

Whereas, in accordance with this principle of copyright, to the extent that logic, algorithms and programming languages comprise ideas and principles, those ideas and principles are not protected under this Directive;

Whereas, in accordance with the legislation and jurisprudence of the Member States and the international copyright conventions, the expression of those ideas and principles is to be protected by copyright;

Whereas, for the purposes of this Directive, the term 'rental` means the making available for use, for a limited period of time and for profit-making purposes, of a computer program or a copy thereof; whereas this term does not include public lending, which, accordingly, remains outside the scope of this Directive;

Whereas the exclusive rights of the author to prevent the unauthorized reproduction of his work have to be subject to a limited exception in the case of a computer program to allow the reproduction technically necessary for the use of that program by the lawful acquirer;

Whereas this means that the acts of loading and running necessary for the use of a copy of a program which has been lawfully acquired, and the act of correction of its errors, may not be prohibited by contract; whereas, in the absence of specific contractual provisions, including when a copy of the program has been sold, any other act necessary for the use of the copy of a program may be performed in accordance with its intended purpose by a lawful acquirer of that copy;

Whereas a person having a right to use a computer program should not be prevented from performing acts necessary to observe, study or test the functioning of the program, provided that these acts do not infringe the copyright in the program;

Whereas the unauthorized reproduction, translation, adaptation or transformation of the form of the code in which a copy of a computer program has been made available constitutes an infringement of the exclusive rights of the author;

Whereas, nevertheless, circumstances may exist when such a reproduction of the code and translation of its form within the meaning of Article 4 (a) and (b) are indispensable to obtain the necessary information to achieve the interoperability of an independently created program with other programs;

Whereas it has therefore to be considered that in these limited circumstances only, performance of the acts of reproduction and translation by or on behalf of a person having a right to use a copy of the program is legitimate and compatible with fair practice and must therefore be deemed not to require the authorization of the rightholder;

Whereas an objective of this exception is to make it possible to connect all components of a computer system, including those of different manufacturers, so that they can work together;

Whereas such an exception to the author's exclusive rights may not be used in a way which prejudices the legitimate interests of the rightholder or which conflicts with a normal exploitation of the program;

Whereas, in order to remain in accordance with the provisions of the Berne Convention for the Protection of Literary and Artistic Works, the term of protection should be the life of the author and fifty years from the first of January of the year following the year of his death or, in the case of an anonymous or pseudonymous work, 50 years from the first of January of the year following the year in which the work is first published;

Whereas protection of computer programs under copyright laws should be without prejudice to the application, in appropriate cases, of other forms of protection; whereas, however, any contractual provisions contrary to Article 6 or to the exceptions provided for in Article 5 (2) and (3) should be null and void;

Whereas the provisions of this Directive are without prejudice to the application of the competition rules under Articles 85 and 86 of the Treaty if a dominant supplier refuses to make information available which is necessary for interoperability as defined in this Directive;

Whereas the provisions of this Directive should be without prejudice to specific requirements of Community law already enacted in respect of the publication of interfaces in the telecommunications sector or Council Decisions relating to standardization in the field of information technology and telecommunication;

Whereas this Directive does not affect derogations provided for under national legislation in accordance with the Berne Convention on points not covered by this Directive,

HAS ADOPTED THIS DIRECTIVE:

Article 1 Object of protection

1. In accordance with the provisions of this Directive, Member States shall protect computer programs, by copyright, as literary works within the meaning of the Berne Convention for the Protection of Literary and Artistic Works. For the purposes of this Directive, the term 'computer programs' shall include their preparatory design material.
2. Protection in accordance with this Directive shall apply to the expression in any form of a computer program. Ideas and principles which underlie any element of a computer program, including those which underlie its interfaces, are not protected by copyright under this Directive.
3. A computer program shall be protected if it is original in the sense that it is the author's own intellectual creation. No other criteria shall be applied to determine its eligibility for protection.

Article 2 Authorship of computer programs

1. The author of a computer program shall be the natural person or group of natural persons who has created the program or, where the legislation of the Member State permits, the legal person designated as the rightholder by that legislation. Where collective works are recognized by the legislation of a Member State, the person considered by the legislation of the Member State to have created the work shall be deemed to be its author.
2. In respect of a computer program created by a group of natural persons jointly, the exclusive rights shall be owned jointly.
3. Where a computer program is created by an employee in the execution of his duties or following the instructions given by his employer, the employer exclusively shall be entitled to exercise all economic rights in the program so created, unless otherwise provided by contract.

Article 3 Beneficiaries of protection

Protection shall be granted to all natural or legal persons eligible under national copyright legislation

as applied to literary works.

Article 4 Restricted Acts

Subject to the provisions of Articles 5 and 6, the exclusive rights of the rightholder within the meaning of Article 2, shall include the right to do or to authorize:

- (a) the permanent or temporary reproduction of a computer program by any means and in any form, in part or in whole. Insofar as loading, displaying, running, transmission or storage of the computer program necessitate such reproduction, such acts shall be subject to authorization by the rightholder;
- (b) the translation, adaptation, arrangement and any other alteration of a computer program and the reproduction of the results thereof, without prejudice to the rights of the person who alters the program;
- (c) any form of distribution to the public, including the rental, of the original computer program or of copies thereof. The first sale in the Community of a copy of a program by the rightholder or with his consent shall exhaust the distribution right within the Community of that copy, with the exception of the right to control further rental of the program or a copy thereof.

Article 5 Exceptions to the restricted acts

1. In the absence of specific contractual provisions, the acts referred to in Article 4 (a) and (b) shall not require authorization by the rightholder where they are necessary for the use of the computer program by the lawful acquirer in accordance with its intended purpose, including for error correction.
2. The making of a back-up copy by a person having a right to use the computer program may not be prevented by contract insofar as it is necessary for that use.
3. The person having a right to use a copy of a computer program shall be entitled, without the authorization of the rightholder, to observe, study or test the functioning of the program in order to determine the ideas and principles which underlie any element of the program if he does so while performing any of the acts of loading, displaying, running, transmitting or storing the program which he is entitled to do.

Article 6 Decompilation

1. The authorization of the rightholder shall not be required where reproduction of the code and translation of its form within the meaning of Article 4 (a) and (b) are indispensable to obtain the information necessary to achieve the interoperability of an independently created computer program with other programs, provided that the following conditions are met:

- (a) these acts are performed by the licensee or by another person having a right to use a copy of a program, or on their behalf by a person authorized to do so;
- (b) the information necessary to achieve interoperability has not previously been readily available to the persons referred to in subparagraph (a); and (c) these acts are confined to the parts of the original program which are necessary to achieve interoperability.

2. The provisions of paragraph 1 shall not permit the information obtained through its application:

- (a) to be used for goals other than to achieve the interoperability of the independently created computer program;
- (b) to be given to others, except when necessary for the interoperability of the independently created computer program; or (c) to be used for the development, production or marketing of a computer program substantially similar in its expression, or for any other act which infringes copyright.

3. In accordance with the provisions of the Berne Convention for the protection of Literary and Artistic Works, the provisions of this Article may not be interpreted in such a way as to allow its application to be used in a manner which unreasonably prejudices the right holder's legitimate interests or conflicts with a normal exploitation of the computer program.

Article 7 Special measures of protection

1. Without prejudice to the provisions of Articles 4, 5 and 6, Member States shall provide, in accordance with their national legislation, appropriate remedies against a person committing any of the acts listed in subparagraphs (a), (b) and (c) below:

- (a) any act of putting into circulation a copy of a computer program knowing, or having reason to believe, that it is an infringing copy;
- (b) the possession, for commercial purposes, of a copy of a computer program knowing, or having reason to believe, that it is an infringing copy;
- (c) any act of putting into circulation, or the possession for commercial purposes of, any means the sole intended purpose of which is to facilitate the unauthorized removal or circumvention of any technical device which may have been applied to protect a computer program.

2. Any infringing copy of a computer program shall be liable to seizure in accordance with the legislation of the Member State concerned.

3. Member States may provide for the seizure of any means referred to in paragraph 1 (c).

Article 8 Term of protection

1. Protection shall be granted for the life of the author and for fifty years after his death or after the death of the last surviving author; where the computer program is an anonymous or pseudonymous work, or where a legal person is designated as the author by national legislation in accordance with Article 2 (1), the term of protection shall be fifty years from the time that the computer program is first lawfully made available to the public. The term of protection shall be deemed to begin on the first of January of the year following the abovementioned events.

2. Member States which already have a term of protection longer than that provided for in paragraph 1 are allowed to maintain their present term until such time as the term of protection for copyright works is harmonized by Community law in a more general way.

Article 9 Continued application of other legal provisions

1. The provisions of this Directive shall be without prejudice to any other legal provisions such as those concerning patent rights, trade-marks, unfair competition, trade secrets, protection of semi-conductor products or the law of contract. Any contractual provisions contrary to Article 6 or to the exceptions provided for in Article 5 (2) and (3) shall be null and void.

2. The provisions of this Directive shall apply also to programs created before 1 January 1993 without prejudice to any acts concluded and rights acquired before that date.

Article 10 Final provisions

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive before 1 January 1993.

When Member States adopt these measures, the latter shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such a reference shall be laid down by the Member States.

2. Member States shall communicate to the Commission the provisions of national law which they

adopt in the field governed by this Directive.

Article 11

This Directive is addressed to the Member States.

on the approval, on behalf of the European Community, of the WIPO Copyright Treaty and the WIPO Performances and Phonograms Treaty(1)

(2000/278/EC)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Articles 47(2), 55 and 95 thereof, in conjunction with the first sentence of Article 300(2) and the second subparagraph of Article 300(3),

Having regard to the proposal from the Commission(2),

Having regard to the assent of the European Parliament(3),

Whereas:

- (1) The WIPO Copyright Treaty (WCT) and the WIPO Performances and Phonograms Treaty (WPPT) adopted in Geneva on 20 December 1996 under the auspices of the World Intellectual Property Organisation will help to ensure a balanced level of protection for works and other subject matter, while allowing the public access to material available via networks.
- (2) The competence of the Community to conclude or accede to international agreements or treaties does not derive only from explicit conferral by the Treaty but may also derive from other provisions of the Treaty and from acts adopted pursuant to those provisions by Community institutions.
- (3) The subject matter of the WCT and the WPPT falls to a large extent within the scope of existing Community directives in this field.
- (4) It follows that the approval of the WCT and the WPPT is a matter for both the Community and its Member States.
- (5) The WCT and the WPPT should therefore be approved on behalf of the Community with regard to matters within its competence.
- (6) The Community has already signed the WCT and the WPPT, subject to final conclusion.
- (7) The deposit of the instruments of conclusion of the Community should take place as far as possible simultaneously with the deposit of the instruments of ratification of the Member States,

HAS DECIDED AS FOLLOWS:

Article 1

1. The WIPO Copyright Treaty (WCT) is hereby approved on behalf of the Community with regard to matters within its competence.
2. The WIPO Performances and Phonograms Treaty (WPPT) is hereby approved on behalf of the Community with regard to matters within its competence.

3. The texts of the Treaties are attached to this Decision.

Article 2

The President of the Council is hereby authorised to deposit the instruments of conclusion with the Director-General of the World Intellectual Property Organisation as from the date by which the Member States will have to bring into force the measures adopted by the European Parliament and the Council necessary to adapt the existing Community legislation to the obligations deriving from the WCT and the WPPT.

Article 3

1. The Commission is hereby authorised to represent the Community at the meetings of the Assemblies referred to in the WCT and WPPT.

2. On all matters within the sphere of competence of the Community, the Commission shall negotiate in the Assemblies of the WCT and the WPPT on behalf of the Community in accordance with the applicable rules of the EC Treaty, in particular Article 300 thereof.

3. The position which the Community may adopt within the Assemblies shall be prepared by the relevant Council working party.

Done at Brussels, 16 March 2000.

For the Council

The President

F. Seixas da Costa

Article 3:	<i>Criteria of Eligibility for Protection:</i> 1. Nationality of author; place of publication of work; 2. Residence of author; 3. "Published" works; 4. "Simultaneously published" works
Article 4:	<i>Criteria of Eligibility for Protection of Cinematographic Works, Works of Architecture and Certain Artistic Works</i>
Article 5:	<i>Rights Guaranteed:</i> 1. and 2. Outside the country of origin; 3. In the country of origin; 4. "Country of origin"
Article 6:	<i>Possible Restriction of Protection in Respect of Certain Works of Nationals of Certain Countries Outside the Union:</i> 1. In the country of the first publication and in other countries; 2. No retroactivity; 3. Notice
Article 6bis:	<i>Moral Rights:</i> 1. To claim authorship; to object to certain modifications and other derogatory actions; 2. After the author's death; 3. Means of redress
Article 7:	<i>Term of Protection:</i> 1. Generally; 2. For cinematographic works; 3. For anonymous and pseudonymous works; 4. For photographic works and works of applied art; 5. Starting date of computation; 6. Longer terms; 7. Shorter terms; 8. Applicable law; "comparison" of terms
Article 7bis:	<i>Term of Protection for Works of Joint Authorship</i>
Article 8:	<i>Right of Translation</i>

* This Table of Contents is added for the convenience of the reader. It does not appear in the original (English) text of the Convention.

- Article 9:* *Right of Reproduction:* 1. Generally; 2. Possible exceptions; 3. Sound and visual recordings
- Article 10:* *Certain Free Uses of Works:* 1. Quotations; 2. Illustrations for teaching; 3. Indication of source and author
- Article 10bis:* *Further Possible Free Uses of Works:* 1. Of certain articles and broadcast works; 2. Of works seen or heard in connection with current events
- Article 11:* *Certain Rights in Dramatic and Musical Works:* 1. Right of public performance and of communication to the public of a performance; 2. In respect of translations
- Article 11bis:* *Broadcasting and Related Rights:* 1. Broadcasting and other wireless communications, public communication of broadcast by wire or rebroadcast, public communication of broadcast by loudspeaker or analogous instruments; 2. Compulsory licenses; 3. Recording; ephemeral recordings
- Article 11ter:* *Certain Rights in Literary Works:* 1. Right of public recitation and of communication to the public of a recitation; 2. In respect of translations
- Article 12:* *Right of Adaptation, Arrangement and Other Alteration*
- Article 13:* *Possible Limitation of the Right of Recording of Musical Works and Any Words Pertaining Thereto:* 1. Compulsory licenses; 2. Transitory measures; 3. Seizure on importation of copies made without the author's permission
- Article 14:* *Cinematographic and Related Rights:* 1. Cinematographic adaptation and reproduction; distribution; public performance and public communication by wire of works thus adapted or reproduced; 2. Adaptation of cinematographic productions; 3. No compulsory licenses
- Article 14bis:* *Special Provisions Concerning Cinematographic Works:* 1. Assimilation to "original" works; 2. Ownership; limitation of certain rights of certain contributors; 3. Certain other contributors
- Article 14ter:* *"Droit de suite" in Works of Art and Manuscripts:* 1. Right to an interest in resales; 2. Applicable law; 3. Procedure
- Article 15:* *Right to Enforce Protected Rights:* 1. Where author's name is indicated or where pseudonym leaves no doubt as to author's identity; 2. In the case of cinematographic works; 3. In the case of anonymous and pseudonymous works; 4. In the case of certain unpublished works of unknown authorship
- Article 16:* *Infringing Copies:* 1. Seizure; 2. Seizure on importation; 3. Applicable law
- Article 17:* *Possibility of Control of Circulation, Presentation and Exhibition of Works*
- Article 18:* *Works Existing on Convention's Entry Into Force:* 1. Protectable where protection not yet expired in country of origin; 2. Non-protectable where protection already expired in country where it is claimed; 3. Application of these principles; 4. Special cases
- Article 19:* *Protection Greater than Resulting from Convention*
- Article 20:* *Special Agreements Among Countries of the Union*
- Article 21:* *Special Provisions Regarding Developing Countries:* 1. Reference to Appendix; 2. Appendix part of Act
- Article 22:* *Assembly:* 1. Constitution and composition; 2. Tasks; 3. Quorum, voting, observers; 4. Convocation; 5. Rules of procedure
- Article 23:* *Executive Committee:* 1. Constitution; 2. Composition; 3. Number of members; 4. Geographical distribution; special agreements; 5. Term, limits of re-eligibility, rules of election; 6. Tasks; 7. Convocation; 8. Quorum, voting; 9. Observers; 10. Rules of procedure
- Article 24:* *International Bureau:* 1. Tasks in general, Director General; 2. General information; 3. Periodical; 4. Information to countries; 5. Studies and services; 6. Participation in meetings; 7. Conferences of revision; 8. Other tasks

- Article 25:* *Finances:* 1. Budget; 2. Coordination with other Unions; 3. Resources; 4. Contributions; possible extension of previous budget; 5. Fees and charges; 6. Working capital fund; 7. Advances by host Government; 8. Auditing of accounts
- Article 26:* *Amendments:* 1. Provisions susceptible of amendment by the Assembly; proposals; 2. Adoption; 3. Entry into force
- Article 27:* *Revision:* 1. Objective; 2. Conferences; 3. Adoption
- Article 28:* *Acceptance and Entry Into Force of Act for Countries of the Union:* 1. Ratification, accession; possibility of excluding certain provisions; withdrawal of exclusion; 2. Entry into force of Articles 1 to 21 and Appendix; 3. Entry into force of Articles 22 to 38
- Article 29:* *Acceptance and Entry Into Force for Countries Outside the Union:* 1. Accession; 2. Entry into force
- Article 29bis:* *Effect of Acceptance of Act for the Purposes of Article 14(2) of the WIPO Convention*
- Article 30:* *Reservations:* 1. Limits of possibility of making reservations; 2. Earlier reservations; reservation as to the right of translation; withdrawal of reservation
- Article 31:* *Applicability to Certain Territories:* 1. Declaration; 2. Withdrawal of declaration; 3. Effective date; 4. Acceptance of factual situations not implied
- Article 32:* *Applicability of this Act and of Earlier Acts:* 1. As between countries already members of the Union; 2. As between a country becoming a member of the Union and other countries members of the Union; 3. Applicability of the Appendix in Certain Relations
- Article 33:* *Disputes:* 1. Jurisdiction of the International Court of Justice; 2. Reservation as to such jurisdiction; 3. Withdrawal of reservation
- Article 34:* *Closing of Certain Earlier Provisions:* 1. Of earlier Acts; 2. Of the Protocol to the Stockholm Act
- Article 35:* *Duration of the Convention; Denunciation:* 1. Unlimited duration; 2. Possibility of denunciation; 3. Effective date of denunciation; 4. Moratorium on denunciation
- Article 36:* *Application of the Convention:* 1. Obligation to adopt the necessary measures; 2. Time from which obligation exists
- Article 37:* *Final Clauses:* 1. Languages of the Act; 2. Signature; 3. Certified copies; 4. Registration; 5. Notifications
- Article 38:* *Transitory Provisions:* 1. Exercise of the “five-year privilege”; 2. Bureau of the Union, Director of the Bureau; 3. Succession of Bureau of the Union

Appendix

SPECIAL PROVISIONS REGARDING DEVELOPING COUNTRIES

- Article I:* *Faculties Open to Developing Countries:* 1. Availability of certain faculties; declaration; 2. Duration of effect of declaration; 3. Cessation of developing country status; 4. Existing stocks of copies; 5. Declarations concerning certain territories; 6. Limits of reciprocity
- Article II:* *Limitations on the Right of Translation:* 1. Licenses grantable by competent authority; 2 to 4. Conditions allowing the grant of such licenses; 5. Purposes for which licenses may be granted; 6. Termination of licenses; 7. Works composed mainly of illustrations; 8. Works withdrawn from circulation; 9. Licenses for broadcasting organizations
- Article III:* *Limitation on the Right of Reproduction:* 1. Licenses grantable by competent authority; 2 to 5. Conditions allowing the grant of such licenses; 6. Termination of licenses; 7. Works to which this Article applies

<i>Article IV:</i>	Provisions Common to Licenses Under Articles II and III: 1 and 2. Procedure; 3. Indication of author and title of work; 4. Exportation of copies; 5. Notice; 6. Compensation
<i>Article V:</i>	Alternative Possibility for Limitation of the Right of Translation: 1. Regime provided for under the 1886 and 1896 Acts; 2. No possibility of change to regime under Article II; 3. Time limit for choosing the alternative possibility
<i>Article VI:</i>	Possibilities of applying, or admitting the application of, certain provisions of the Appendix before becoming bound by it: 1. Declaration; 2. Depository and effective date of declaration

The countries of the Union, being equally animated by the desire to protect, in as effective and uniform a manner as possible, the rights of authors in their literary and artistic works,

Recognizing the importance of the work of the Revision Conference held at Stockholm in 1967,

Have resolved to revise the Act adopted by the Stockholm Conference, while maintaining without change Articles 1 to 20 and 22 to 26 of that Act.

Consequently, the undersigned Plenipotentiaries, having presented their full powers, recognized as in good and due form, have agreed as follows:

Article 1

*[Establishment of a Union]*¹

The countries to which this Convention applies constitute a Union for the protection of the rights of authors in their literary and artistic works.

Article 2

[Protected Works: 1. “Literary and artistic works”; 2. Possible requirement of fixation; 3. Derivative works; 4. Official texts; 5. Collections; 6. Obligation to protect; beneficiaries of protection; 7. Works of applied art and industrial designs; 8. News]

(1) The expression “literary and artistic works” shall include every production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression, such as books, pamphlets and other writings; lectures, addresses, sermons and other works of the same nature; dramatic or dramatico-musical works; choreographic works and entertainments in dumb show; musical compositions with or without words; cinematographic works to which are assimilated works expressed by a process analogous to cinematography; works of drawing, painting, architecture, sculpture, engraving and lithography; photographic works to which are assimilated works expressed by a process analogous to photography; works of applied art; illustrations, maps, plans, sketches and three-dimensional works relative to geography, topography, architecture or science.

(2) It shall, however, be a matter for legislation in the countries of the Union to prescribe that works in general or any specified categories of works shall not be protected unless they have been fixed in some material form.

(3) Translations, adaptations, arrangements of music and other alterations of a literary or artistic work shall be protected as original works without prejudice to the copyright in the original work.

(4) It shall be a matter for legislation in the countries of the Union to determine the protection to be granted to official texts of a legislative, administrative and legal nature, and to official translations of such texts.

(5) Collections of literary or artistic works such as encyclopaedias and anthologies which, by reason of the selection and arrangement of their contents, constitute intellectual creations shall be protected as such, without prejudice to the copyright in each of the works forming part of such collections.

¹ Each Article and the Appendix have been given titles to facilitate their identification. There are no titles in the signed (English) text.

(6) The works mentioned in this Article shall enjoy protection in all countries of the Union. This protection shall operate for the benefit of the author and his successors in title.

(7) Subject to the provisions of Article 7(4) of this Convention, it shall be a matter for legislation in the countries of the Union to determine the extent of the application of their laws to works of applied art and industrial designs and models, as well as the conditions under which such works, designs and models shall be protected. Works protected in the country of origin solely as designs and models shall be entitled in another country of the Union only to such special protection as is granted in that country to designs and models; however, if no such special protection is granted in that country, such works shall be protected as artistic works.

(8) The protection of this Convention shall not apply to news of the day or to miscellaneous facts having the character of mere items of press information.

Article 2^{bis}

[Possible Limitation of Protection of Certain Works: 1. Certain speeches; 2. Certain uses of lectures and addresses; 3. Right to make collections of such works]

(1) It shall be a matter for legislation in the countries of the Union to exclude, wholly or in part, from the protection provided by the preceding Article political speeches and speeches delivered in the course of legal proceedings.

(2) It shall also be a matter for legislation in the countries of the Union to determine the conditions under which lectures, addresses and other works of the same nature which are delivered in public may be reproduced by the press, broadcast, communicated to the public by wire and made the subject of public communication as envisaged in Article 11^{bis}(1) of this Convention, when such use is justified by the informatory purpose.

(3) Nevertheless, the author shall enjoy the exclusive right of making a collection of his works mentioned in the preceding paragraphs.

Article 3

[Criteria of Eligibility for Protection: 1. Nationality of author; place of publication of work; 2. Residence of author; 3. "Published" works; 4. "Simultaneously published" works]

(1) The protection of this Convention shall apply to:

- (a) authors who are nationals of one of the countries of the Union, for their works, whether published or not;
- (b) authors who are not nationals of one of the countries of the Union, for their works first published in one of those countries, or simultaneously in a country outside the Union and in a country of the Union.

(2) Authors who are not nationals of one of the countries of the Union but who have their habitual residence in one of them shall, for the purposes of this Convention, be assimilated to nationals of that country.

(3) The expression "published works" means works published with the consent of their authors, whatever may be the means of manufacture of the copies, provided that the availability of such copies has been such as to satisfy the reasonable requirements of the public, having regard to the nature of the work. The performance of a dramatic, dramatico-musical, cinematographic or musical work, the public recitation of a literary work, the communication by wire or the broadcasting of literary or artistic works, the exhibition of a work of art and the construction of a work of architecture shall not constitute publication.

(4) A work shall be considered as having been published simultaneously in several countries if it has been published in two or more countries within thirty days of its first publication.

Article 4

[Criteria of Eligibility for Protection of Cinematographic Works, Works of Architecture and Certain Artistic Works]

The protection of this Convention shall apply, even if the conditions of Article 3 are not fulfilled, to:

- (a) authors of cinematographic works the maker of which has his headquarters or habitual residence in one of the countries of the Union;
- (b) authors of works of architecture erected in a country of the Union or of other artistic works incorporated in a building or other structure located in a country of the Union.

Article 5

[Rights Guaranteed: 1. and 2. Outside the country of origin; 3. In the country of origin; 4. "Country of origin"]

(1) Authors shall enjoy, in respect of works for which they are protected under this Convention, in countries of the Union other than the country of origin, the rights which their respective laws do now or may hereafter grant to their nationals, as well as the rights specially granted by this Convention.

(2) The enjoyment and the exercise of these rights shall not be subject to any formality; such enjoyment and such exercise shall be independent of the existence of protection in the country of origin of the work. Consequently, apart from the provisions of this Convention, the extent of protection, as well as the means of redress afforded to the author to protect his rights, shall be governed exclusively by the laws of the country where protection is claimed.

(3) Protection in the country of origin is governed by domestic law. However, when the author is not a national of the country of origin of the work for which he is protected under this Convention, he shall enjoy in that country the same rights as national authors.

(4) The country of origin shall be considered to be:

- (a) in the case of works first published in a country of the Union, that country; in the case of works published simultaneously in several countries of the Union which grant different terms of protection, the country whose legislation grants the shortest term of protection;
- (b) in the case of works published simultaneously in a country outside the Union and in a country of the Union, the latter country;
- (c) in the case of unpublished works or of works first published in a country outside the Union, without simultaneous publication in a country of the Union, the country of the Union of which the author is a national, provided that:
 - (i) when these are cinematographic works the maker of which has his headquarters or his habitual residence in a country of the Union, the country of origin shall be that country, and
 - (ii) when these are works of architecture erected in a country of the Union or other artistic works incorporated in a building or other structure located in a country of the Union, the country of origin shall be that country.

Article 6

[Possible Restriction of Protection in Respect of Certain Works of Nationals of Certain Countries Outside the Union: 1. In the country of the first publication and in other countries; 2. No retroactivity; 3. Notice]

(1) Where any country outside the Union fails to protect in an adequate manner the works of authors who are nationals of one of the countries of the Union, the latter country may restrict the protection given to the works of authors who are, at the date of the first publication thereof, nationals of the other country and are not habitually resident in one of the countries of the Union. If the country of first publication avails itself of this right, the other countries of the Union shall not be required to grant to works thus subjected to special treatment a wider protection than that granted to them in the country of first publication.

(2) No restrictions introduced by virtue of the preceding paragraph shall affect the rights which an author may have acquired in respect of a work published in a country of the Union before such restrictions were put into force.

(3) The countries of the Union which restrict the grant of copyright in accordance with this Article shall give notice thereof to the Director General of the World Intellectual Property Organization (hereinafter designated as “the Director General”) by a written declaration specifying the countries in regard to which protection is restricted, and the restrictions to which rights of authors who are nationals of those countries are subjected. The Director General shall immediately communicate this declaration to all the countries of the Union.

Article 6^{bis}

[*Moral Rights*: 1. To claim authorship; to object to certain modifications and other derogatory actions; 2. After the author’s death; 3. Means of redress]

(1) Independently of the author’s economic rights, and even after the transfer of the said rights, the author shall have the right to claim authorship of the work and to object to any distortion, mutilation or other modification of, or other derogatory action in relation to, the said work, which would be prejudicial to his honor or reputation.

(2) The rights granted to the author in accordance with the preceding paragraph shall, after his death, be maintained, at least until the expiry of the economic rights, and shall be exercisable by the persons or institutions authorized by the legislation of the country where protection is claimed. However, those countries whose legislation, at the moment of their ratification of or accession to this Act, does not provide for the protection after the death of the author of all the rights set out in the preceding paragraph may provide that some of these rights may, after his death, cease to be maintained.

(3) The means of redress for safeguarding the rights granted by this Article shall be governed by the legislation of the country where protection is claimed.

Article 7

[*Term of Protection*: 1. Generally; 2. For cinematographic works; 3. For anonymous and pseudonymous works; 4. For photographic works and works of applied art; 5. Starting date of computation; 6. Longer terms; 7. Shorter terms; 8. Applicable law; “comparison” of terms]

(1) The term of protection granted by this Convention shall be the life of the author and fifty years after his death.

(2) However, in the case of cinematographic works, the countries of the Union may provide that the term of protection shall expire fifty years after the work has been made available to the public with the consent of the author, or, failing such an event within fifty years from the making of such a work, fifty years after the making.

(3) In the case of anonymous or pseudonymous works, the term of protection granted by this Convention shall expire fifty years after the work has been lawfully made available to the public. However, when the pseudonym adopted by the author leaves no doubt as to his identity, the term of protection shall be that provided in paragraph (1). If the author of an anonymous or pseudonymous work discloses his identity during the above-mentioned period, the term of protection applicable shall be that provided in paragraph (1). The countries of the Union shall not be required to protect anonymous or pseudonymous works in respect of which it is reasonable to presume that their author has been dead for fifty years.

(4) It shall be a matter for legislation in the countries of the Union to determine the term of protection of photographic works and that of works of applied art in so far as they are protected as artistic works; however, this term shall last at least until the end of a period of twenty-five years from the making of such a work.

(5) The term of protection subsequent to the death of the author and the terms provided by paragraphs (2), (3) and (4) shall run from the date of death or of the event referred to in those paragraphs, but such terms shall always be deemed to begin on the first of January of the year following the death or such event.

(6) The countries of the Union may grant a term of protection in excess of those provided by the preceding paragraphs.

(7) Those countries of the Union bound by the Rome Act of this Convention which grant, in their national legislation in force at the time of signature of the present Act, shorter terms of protection than those provided for in the preceding paragraphs shall have the right to maintain such terms when ratifying or acceding to the present Act.

(8) In any case, the term shall be governed by the legislation of the country where protection is claimed; however, unless the legislation of that country otherwise provides, the term shall not exceed the term fixed in the country of origin of the work.

Article 7^{bis}

[Term of Protection for Works of Joint Authorship]

The provisions of the preceding Article shall also apply in the case of a work of joint authorship, provided that the terms measured from the death of the author shall be calculated from the death of the last surviving author.

Article 8

[Right of Translation]

Authors of literary and artistic works protected by this Convention shall enjoy the exclusive right of making and of authorizing the translation of their works throughout the term of protection of their rights in the original works.

Article 9

[Right of Reproduction: 1. Generally; 2. Possible exceptions; 3. Sound and visual recordings]

(1) Authors of literary and artistic works protected by this Convention shall have the exclusive right of authorizing the reproduction of these works, in any manner or form.

(2) It shall be a matter for legislation in the countries of the Union to permit the reproduction of such works in certain special cases, provided that such reproduction does not conflict with a normal exploitation of the work and does not unreasonably prejudice the legitimate interests of the author.

(3) Any sound or visual recording shall be considered as a reproduction for the purposes of this Convention.

Article 10

[Certain Free Uses of Works: 1. Quotations; 2. Illustrations for teaching; 3. Indication of source and author]

(1) It shall be permissible to make quotations from a work which has already been lawfully made available to the public, provided that their making is compatible with fair practice, and their extent does not exceed that justified by the purpose, including quotations from newspaper articles and periodicals in the form of press summaries.

(2) It shall be a matter for legislation in the countries of the Union, and for special agreements existing or to be concluded between them, to permit the utilization, to the extent justified by the purpose, of literary or artistic works by way of illustration in publications, broadcasts or sound or visual recordings for teaching, provided such utilization is compatible with fair practice.

(3) Where use is made of works in accordance with the preceding paragraphs of this Article, mention shall be made of the source, and of the name of the author if it appears thereon.

Article 10^{bis}

[*Further Possible Free Uses of Works*: 1. Of certain articles and broadcast works; 2. Of works seen or heard in connection with current events]

(1) It shall be a matter for legislation in the countries of the Union to permit the reproduction by the press, the broadcasting or the communication to the public by wire of articles published in newspapers or periodicals on current economic, political or religious topics, and of broadcast works of the same character, in cases in which the reproduction, broadcasting or such communication thereof is not expressly reserved. Nevertheless, the source must always be clearly indicated; the legal consequences of a breach of this obligation shall be determined by the legislation of the country where protection is claimed.

(2) It shall also be a matter for legislation in the countries of the Union to determine the conditions under which, for the purpose of reporting current events by means of photography, cinematography, broadcasting or communication to the public by wire, literary or artistic works seen or heard in the course of the event may, to the extent justified by the informatory purpose, be reproduced and made available to the public.

Article 11

[*Certain Rights in Dramatic and Musical Works*: 1. Right of public performance and of communication to the public of a performance; 2. In respect of translations]

(1) Authors of dramatic, dramatico-musical and musical works shall enjoy the exclusive right of authorizing:

- (i) the public performance of their works, including such public performance by any means or process;
- (ii) any communication to the public of the performance of their works.

(2) Authors of dramatic or dramatico-musical works shall enjoy, during the full term of their rights in the original works, the same rights with respect to translations thereof.

Article 11^{bis}

[*Broadcasting and Related Rights*: 1. Broadcasting and other wireless communications, public communication of broadcast by wire or rebroadcast, public communication of broadcast by loudspeaker or analogous instruments; 2. Compulsory licenses; 3. Recording; ephemeral recordings]

(1) Authors of literary and artistic works shall enjoy the exclusive right of authorizing:

- (i) the broadcasting of their works or the communication thereof to the public by any other means of wireless diffusion of signs, sounds or images;
- (ii) any communication to the public by wire or by rebroadcasting of the broadcast of the work, when this communication is made by an organization other than the original one;
- (iii) the public communication by loudspeaker or any other analogous instrument transmitting, by signs, sounds or images, the broadcast of the work.

(2) It shall be a matter for legislation in the countries of the Union to determine the conditions under which the rights mentioned in the preceding paragraph may be exercised, but these conditions shall apply only in the countries where they have been prescribed. They shall not in any circumstances be prejudicial to the moral rights of the author, nor to his right to obtain equitable remuneration which, in the absence of agreement, shall be fixed by competent authority.

(3) In the absence of any contrary stipulation, permission granted in accordance with paragraph (1) of this Article shall not imply permission to record, by means of instruments recording sounds or images, the work broadcast. It shall, however, be a matter for legislation in the countries of the Union to determine the regulations for ephemeral recordings made by a broadcasting organization by means of its own facilities and used for its own broadcasts. The preservation of these recordings in official archives may, on the ground of their exceptional documentary character, be authorized by such legislation.

Article 11^{ter}

[*Certain Rights in Literary Works*: 1. Right of public recitation and of communication to the public of a recitation; 2. In respect of translations]

- (1) Authors of literary works shall enjoy the exclusive right of authorizing:
 - (i) the public recitation of their works, including such public recitation by any means or process;
 - (ii) any communication to the public of the recitation of their works.
- (2) Authors of literary works shall enjoy, during the full term of their rights in the original works, the same rights with respect to translations thereof.

Article 12

[*Right of Adaptation, Arrangement and Other Alteration*]

Authors of literary or artistic works shall enjoy the exclusive right of authorizing adaptations, arrangements and other alterations of their works.

Article 13

[*Possible Limitation of the Right of Recording of Musical Works and Any Words Pertaining Thereto*:

1. Compulsory licenses; 2. Transitory measures; 3. Seizure on importation of copies made without the author's permission]

(1) Each country of the Union may impose for itself reservations and conditions on the exclusive right granted to the author of a musical work and to the author of any words, the recording of which together with the musical work has already been authorized by the latter, to authorize the sound recording of that musical work, together with such words, if any; but all such reservations and conditions shall apply only in the countries which have imposed them and shall not, in any circumstances, be prejudicial to the rights of these authors to obtain equitable remuneration which, in the absence of agreement, shall be fixed by competent authority.

(2) Recordings of musical works made in a country of the Union in accordance with Article 13(3) of the Conventions signed at Rome on June 2, 1928, and at Brussels on June 26, 1948, may be reproduced in that country without the permission of the author of the musical work until a date two years after that country becomes bound by this Act.

(3) Recordings made in accordance with paragraphs (1) and (2) of this Article and imported without permission from the parties concerned into a country where they are treated as infringing recordings shall be liable to seizure.

Article 14

[*Cinematographic and Related Rights*: 1. Cinematographic adaptation and reproduction; distribution; public performance and public communication by wire of works thus adapted or reproduced; 2. Adaptation of cinematographic productions; 3. No compulsory licenses]

- (1) Authors of literary or artistic works shall have the exclusive right of authorizing:
 - (i) the cinematographic adaptation and reproduction of these works, and the distribution of the works thus adapted or reproduced;
 - (ii) the public performance and communication to the public by wire of the works thus adapted or reproduced.
- (2) The adaptation into any other artistic form of a cinematographic production derived from literary or artistic works shall, without prejudice to the authorization of the author of the cinematographic production, remain subject to the authorization of the authors of the original works.
- (3) The provisions of Article 13(1) shall not apply.

Article 14^{bis}

[*Special Provisions Concerning Cinematographic Works*: 1. Assimilation to “original” works; 2. Ownership; limitation of certain rights of certain contributors; 3. Certain other contributors]

(1) Without prejudice to the copyright in any work which may have been adapted or reproduced, a cinematographic work shall be protected as an original work. The owner of copyright in a cinematographic work shall enjoy the same rights as the author of an original work, including the rights referred to in the preceding Article.

(2)

(a) Ownership of copyright in a cinematographic work shall be a matter for legislation in the country where protection is claimed.

(b) However, in the countries of the Union which, by legislation, include among the owners of copyright in a cinematographic work authors who have brought contributions to the making of the work, such authors, if they have undertaken to bring such contributions, may not, in the absence of any contrary or special stipulation, object to the reproduction, distribution, public performance, communication to the public by wire, broadcasting or any other communication to the public, or to the subtitling or dubbing of texts, of the work.

(c) The question whether or not the form of the undertaking referred to above should, for the application of the preceding subparagraph (b), be in a written agreement or a written act of the same effect shall be a matter for the legislation of the country where the maker of the cinematographic work has his headquarters or habitual residence. However, it shall be a matter for the legislation of the country of the Union where protection is claimed to provide that the said undertaking shall be in a written agreement or a written act of the same effect. The countries whose legislation so provides shall notify the Director General by means of a written declaration, which will be immediately communicated by him to all the other countries of the Union.

(d) By “contrary or special stipulation” is meant any restrictive condition which is relevant to the aforesaid undertaking.

(3) Unless the national legislation provides to the contrary, the provisions of paragraph (2)(b) above shall not be applicable to authors of scenarios, dialogues and musical works created for the making of the cinematographic work, or to the principal director thereof. However, those countries of the Union whose legislation does not contain rules providing for the application of the said paragraph (2)(b) to such director shall notify the Director General by means of a written declaration, which will be immediately communicated by him to all the other countries of the Union.

Article 14^{ter}

[*“Droit de suite” in Works of Art and Manuscripts*:

1. Right to an interest in resales; 2. Applicable law; 3. Procedure]

(1) The author, or after his death the persons or institutions authorized by national legislation, shall, with respect to original works of art and original manuscripts of writers and composers, enjoy the inalienable right to an interest in any sale of the work subsequent to the first transfer by the author of the work.

(2) The protection provided by the preceding paragraph may be claimed in a country of the Union only if legislation in the country to which the author belongs so permits, and to the extent permitted by the country where this protection is claimed.

(3) The procedure for collection and the amounts shall be matters for determination by national legislation.

Article 15

[*Right to Enforce Protected Rights:* 1. Where author's name is indicated or where pseudonym leaves no doubt as to author's identity; 2. In the case of cinematographic works; 3. In the case of anonymous and pseudonymous works; 4. In the case of certain unpublished works of unknown authorship]

(1) In order that the author of a literary or artistic work protected by this Convention shall, in the absence of proof to the contrary, be regarded as such, and consequently be entitled to institute infringement proceedings in the countries of the Union, it shall be sufficient for his name to appear on the work in the usual manner. This paragraph shall be applicable even if this name is a pseudonym, where the pseudonym adopted by the author leaves no doubt as to his identity.

(2) The person or body corporate whose name appears on a cinematographic work in the usual manner shall, in the absence of proof to the contrary, be presumed to be the maker of the said work.

(3) In the case of anonymous and pseudonymous works, other than those referred to in paragraph (1) above, the publisher whose name appears on the work shall, in the absence of proof to the contrary, be deemed to represent the author, and in this capacity he shall be entitled to protect and enforce the author's rights. The provisions of this paragraph shall cease to apply when the author reveals his identity and establishes his claim to authorship of the work.

(4)

(a) In the case of unpublished works where the identity of the author is unknown, but where there is every ground to presume that he is a national of a country of the Union, it shall be a matter for legislation in that country to designate the competent authority which shall represent the author and shall be entitled to protect and enforce his rights in the countries of the Union.

(b) Countries of the Union which make such designation under the terms of this provision shall notify the Director General by means of a written declaration giving full information concerning the authority thus designated. The Director General shall at once communicate this declaration to all other countries of the Union.

Article 16

[*Infringing Copies:* 1. Seizure; 2. Seizure on importation; 3. Applicable law]

(1) Infringing copies of a work shall be liable to seizure in any country of the Union where the work enjoys legal protection.

(2) The provisions of the preceding paragraph shall also apply to reproductions coming from a country where the work is not protected, or has ceased to be protected.

(3) The seizure shall take place in accordance with the legislation of each country.

Article 17

[*Possibility of Control of Circulation, Presentation and Exhibition of Works*]

The provisions of this Convention cannot in any way affect the right of the Government of each country of the Union to permit, to control, or to prohibit, by legislation or regulation, the circulation, presentation, or exhibition of any work or production in regard to which the competent authority may find it necessary to exercise that right.

Article 18

[*Works Existing on Convention's Entry Into Force:* 1. Protectable where protection not yet expired in country of origin; 2. Non-protectable where protection already expired in country where it is claimed; 3. Application of these principles; 4. Special cases]

(1) This Convention shall apply to all works which, at the moment of its coming into force, have not yet fallen into the public domain in the country of origin through the expiry of the term of protection.

(2) If, however, through the expiry of the term of protection which was previously granted, a work has fallen into the public domain of the country where protection is claimed, that work shall not be protected anew.

(3) The application of this principle shall be subject to any provisions contained in special conventions to that effect existing or to be concluded between countries of the Union. In the absence of such provisions, the respective countries shall determine, each in so far as it is concerned, the conditions of application of this principle.

(4) The preceding provisions shall also apply in the case of new accessions to the Union and to cases in which protection is extended by the application of Article 7 or by the abandonment of reservations.

Article 19

[Protection Greater than Resulting from Convention]

The provisions of this Convention shall not preclude the making of a claim to the benefit of any greater protection which may be granted by legislation in a country of the Union.

Article 20

[Special Agreements Among Countries of the Union]

The Governments of the countries of the Union reserve the right to enter into special agreements among themselves, in so far as such agreements grant to authors more extensive rights than those granted by the Convention, or contain other provisions not contrary to this Convention. The provisions of existing agreements which satisfy these conditions shall remain applicable.

Article 21

[Special Provisions Regarding Developing Countries: 1. Reference to Appendix; 2. Appendix part of Act]

- (1) Special provisions regarding developing countries are included in the Appendix.
- (2) Subject to the provisions of Article 28(1)(b), the Appendix forms an integral part of this Act.

Article 22

[Assembly: 1. Constitution and composition; 2. Tasks; 3. Quorum, voting, observers; 4. Convocation; 5. Rules of procedure]

- (1)
 - (a) The Union shall have an Assembly consisting of those countries of the Union which are bound by Articles 22 to 26.
 - (b) The Government of each country shall be represented by one delegate, who may be assisted by alternate delegates, advisors, and experts.
 - (c) The expenses of each delegation shall be borne by the Government which has appointed it.
- (2)
 - (a) The Assembly shall:
 - (i) deal with all matters concerning the maintenance and development of the Union and the implementation of this Convention;
 - (ii) give directions concerning the preparation for conferences of revision to the International Bureau of Intellectual Property (hereinafter designated as "the International Bureau") referred to in the Convention Establishing the World Intellectual Property Organization (hereinafter designated as "the Organization"), due account being taken of any comments made by those countries of the Union which are not bound by Articles 22 to 26;

- (iii) review and approve the reports and activities of the Director General of the Organization concerning the Union, and give him all necessary instructions concerning matters within the competence of the Union;
- (iv) elect the members of the Executive Committee of the Assembly;
- (v) review and approve the reports and activities of its Executive Committee, and give instructions to such Committee;
- (vi) determine the program and adopt the biennial budget of the Union, and approve its final accounts;
- (vii) adopt the financial regulations of the Union;
- (viii) establish such committees of experts and working groups as may be necessary for the work of the Union;
- (ix) determine which countries not members of the Union and which intergovernmental and international non-governmental organizations shall be admitted to its meetings as observers;
- (x) adopt amendments to Articles 22 to 26;
- (xi) take any other appropriate action designed to further the objectives of the Union;
- (xii) exercise such other functions as are appropriate under this Convention;
- (xiii) subject to its acceptance, exercise such rights as are given to it in the Convention establishing the Organization.

(b) With respect to matters which are of interest also to other Unions administered by the Organization, the Assembly shall make its decisions after having heard the advice of the Coordination Committee of the Organization.

(3)

(a) Each country member of the Assembly shall have one vote.

(b) One-half of the countries members of the Assembly shall constitute a quorum.

(c) Notwithstanding the provisions of subparagraph (b), if, in any session, the number of countries represented is less than one-half but equal to or more than one-third of the countries members of the Assembly, the Assembly may make decisions but, with the exception of decisions concerning its own procedure, all such decisions shall take effect only if the following conditions are fulfilled. The International Bureau shall communicate the said decisions to the countries members of the Assembly which were not represented and shall invite them to express in writing their vote or abstention within a period of three months from the date of the communication. If, at the expiration of this period, the number of countries having thus expressed their vote or abstention attains the number of countries which was lacking for attaining the quorum in the session itself, such decisions shall take effect provided that at the same time the required majority still obtains.

(d) Subject to the provisions of Article 26(2), the decisions of the Assembly shall require two-thirds of the votes cast.

(e) Abstentions shall not be considered as votes.

(f) A delegate may represent, and vote in the name of, one country only.

(g) Countries of the Union not members of the Assembly shall be admitted to its meetings as observers.

(4)

(a) The Assembly shall meet once in every second calendar year in ordinary session upon convocation by the Director General and, in the absence of exceptional circumstances, during the same period and at the same place as the General Assembly of the Organization.

(b) The Assembly shall meet in extraordinary session upon convocation by the Director General, at the request of the Executive Committee or at the request of one-fourth of the countries members of the Assembly.

(5) The Assembly shall adopt its own rules of procedure.

Article 23

[*Executive Committee*: 1. Constitution; 2. Composition; 3. Number of members; 4. Geographical distribution; special agreements; 5. Term, limits of re-eligibility, rules of election; 6. Tasks; 7. Convocation; 8. Quorum, voting; 9. Observers; 10. Rules of procedure]

(1) The Assembly shall have an Executive Committee.

(2)

(a) The Executive Committee shall consist of countries elected by the Assembly from among countries members of the Assembly. Furthermore, the country on whose territory the Organization has its headquarters shall, subject to the provisions of Article 25(7)(b), have an ex officio seat on the Committee.

(b) The Government of each country member of the Executive Committee shall be represented by one delegate, who may be assisted by alternate delegates, advisors, and experts.

(c) The expenses of each delegation shall be borne by the Government which has appointed it.

(3) The number of countries members of the Executive Committee shall correspond to one-fourth of the number of countries members of the Assembly. In establishing the number of seats to be filled, remainders after division by four shall be disregarded.

(4) In electing the members of the Executive Committee, the Assembly shall have due regard to an equitable geographical distribution and to the need for countries party to the Special Agreements which might be established in relation with the Union to be among the countries constituting the Executive Committee.

(5)

(a) Each member of the Executive Committee shall serve from the close of the session of the Assembly which elected it to the close of the next ordinary session of the Assembly.

(b) Members of the Executive Committee may be re-elected, but not more than two-thirds of them.

(c) The Assembly shall establish the details of the rules governing the election and possible re-election of the members of the Executive Committee.

(6)

(a) The Executive Committee shall:

(i) prepare the draft agenda of the Assembly;

(ii) submit proposals to the Assembly respecting the draft program and biennial budget of the Union prepared by the Director General;

(iii) *[deleted]*

(iv) submit, with appropriate comments, to the Assembly the periodical reports of the Director General and the yearly audit reports on the accounts;

(v) in accordance with the decisions of the Assembly and having regard to circumstances arising between two ordinary sessions of the Assembly, take all necessary measures to ensure the execution of the program of the Union by the Director General;

(vi) perform such other functions as are allocated to it under this Convention.

(b) With respect to matters which are of interest also to other Unions administered by the Organization, the Executive Committee shall make its decisions after having heard the advice of the Coordination Committee of the Organization.

(7)

(a) The Executive Committee shall meet once a year in ordinary session upon convocation by the Director General, preferably during the same period and at the same place as the Coordination Committee of the Organization.

(b) The Executive Committee shall meet in extraordinary session upon convocation by the Director General, either on his own initiative, or at the request of its Chairman or one-fourth of its members.

(8)

(a) Each country member of the Executive Committee shall have one vote.

(b) One-half of the members of the Executive Committee shall constitute a quorum.

- (c) Decisions shall be made by a simple majority of the votes cast.
- (d) Abstentions shall not be considered as votes.
- (e) A delegate may represent, and vote in the name of, one country only.
- (9) Countries of the Union not members of the Executive Committee shall be admitted to its meetings as observers.
- (10) The Executive Committee shall adopt its own rules of procedure.

Article 24

[*International Bureau*: 1. Tasks in general, Director General; 2. General information; 3. Periodical; 4. Information to countries; 5. Studies and services; 6. Participation in meetings; 7. Conferences of revision; 8. Other tasks]

(1)

(a) The administrative tasks with respect to the Union shall be performed by the International Bureau, which is a continuation of the Bureau of the Union united with the Bureau of the Union established by the International Convention for the Protection of Industrial Property.

(b) In particular, the International Bureau shall provide the secretariat of the various organs of the Union.

(c) The Director General of the Organization shall be the chief executive of the Union and shall represent the Union.

(2) The International Bureau shall assemble and publish information concerning the protection of copyright. Each country of the Union shall promptly communicate to the International Bureau all new laws and official texts concerning the protection of copyright.

(3) The International Bureau shall publish a monthly periodical.

(4) The International Bureau shall, on request, furnish information to any country of the Union on matters concerning the protection of copyright.

(5) The International Bureau shall conduct studies, and shall provide services, designed to facilitate the protection of copyright.

(6) The Director General and any staff member designated by him shall participate, without the right to vote, in all meetings of the Assembly, the Executive Committee and any other committee of experts or working group. The Director General, or a staff member designated by him, shall be ex officio secretary of these bodies.

(7)

(a) The International Bureau shall, in accordance with the directions of the Assembly and in cooperation with the Executive Committee, make the preparations for the conferences of revision of the provisions of the Convention other than Articles 22 to 26.

(b) The International Bureau may consult with intergovernmental and international non-governmental organizations concerning preparations for conferences of revision.

(c) The Director General and persons designated by him shall take part, without the right to vote, in the discussions at these conferences.

(8) The International Bureau shall carry out any other tasks assigned to it.

Article 25

[*Finances*: 1. Budget; 2. Coordination with other Unions; 3. Resources; 4. Contributions; possible extension of previous budget; 5. Fees and charges; 6. Working capital fund; 7. Advances by host Government; 8. Auditing of accounts]

(1)

(a) The Union shall have a budget.

(b) The budget of the Union shall include the income and expenses proper to the Union, its contribution to the budget of expenses common to the Unions, and, where applicable, the sum made available to the budget of the Conference of the Organization.

(c) Expenses not attributable exclusively to the Union but also to one or more other Unions administered by the Organization shall be considered as expenses common to the Unions. The share of the Union in such common expenses shall be in proportion to the interest the Union has in them.

(2) The budget of the Union shall be established with due regard to the requirements of coordination with the budgets of the other Unions administered by the Organization.

(3) The budget of the Union shall be financed from the following sources:

- (i) contributions of the countries of the Union;
- (ii) fees and charges due for services performed by the International Bureau in relation to the Union;
- (iii) sale of, or royalties on, the publications of the International Bureau concerning the Union;
- (iv) gifts, bequests, and subventions;
- (v) rents, interests, and other miscellaneous income.

(4)

(a) For the purpose of establishing its contribution towards the budget, each country of the Union shall belong to a class, and shall pay its annual contributions on the basis of a number of units fixed as follows:

Class I	25
Class II	20
Class III	15
Class IV	10
Class V	5
Class VI	3
Class VII	1

(b) Unless it has already done so, each country shall indicate, concurrently with depositing its instrument of ratification or accession, the class to which it wishes to belong. Any country may change class. If it chooses a lower class, the country must announce it to the Assembly at one of its ordinary sessions. Any such change shall take effect at the beginning of the calendar year following the session.

(c) The annual contribution of each country shall be an amount in the same proportion to the total sum to be contributed to the annual budget of the Union by all countries as the number of its units is to the total of the units of all contributing countries.

(d) Contributions shall become due on the first of January of each year.

(e) A country which is in arrears in the payment of its contributions shall have no vote in any of the organs of the Union of which it is a member if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years. However, any organ of the Union may allow such a country to continue to exercise its vote in that organ if, and as long as, it is satisfied that the delay in payment is due to exceptional and unavoidable circumstances.

(f) If the budget is not adopted before the beginning of a new financial period, it shall be at the same level as the budget of the previous year, in accordance with the financial regulations.

(5) The amount of the fees and charges due for services rendered by the International Bureau in relation to the Union shall be established, and shall be reported to the Assembly and the Executive Committee, by the Director General.

(6)

(a) The Union shall have a working capital fund which shall be constituted by a single payment made by each country of the Union. If the fund becomes insufficient, an increase shall be decided by the Assembly.

(b) The amount of the initial payment of each country to the said fund or of its participation in the increase thereof shall be a proportion of the contribution of that country for the year in which the fund is established or the increase decided.

(c) The proportion and the terms of payment shall be fixed by the Assembly on the proposal of the Director General and after it has heard the advice of the Coordination Committee of the Organization.

(7)

(a) In the headquarters agreement concluded with the country on the territory of which the Organization has its headquarters, it shall be provided that, whenever the working capital fund is insufficient, such country shall grant advances. The amount of these advances and the conditions on which they are granted shall be the subject of separate agreements, in each case, between such country and the Organization. As long as it remains under the obligation to grant advances, such country shall have an ex officio seat on the Executive Committee.

(b) The country referred to in subparagraph (a) and the Organization shall each have the right to denounce the obligation to grant advances, by written notification. Denunciation shall take effect three years after the end of the year in which it has been notified.

(8) The auditing of the accounts shall be effected by one or more of the countries of the Union or by external auditors, as provided in the financial regulations. They shall be designated, with their agreement, by the Assembly.

Article 26

[Amendments: 1. Provisions susceptible of amendment by the Assembly; proposals; 2. Adoption; 3. Entry into force]

(1) Proposals for the amendment of Articles 22, 23, 24, 25, and the present Article, may be initiated by any country member of the Assembly, by the Executive Committee, or by the Director General. Such proposals shall be communicated by the Director General to the member countries of the Assembly at least six months in advance of their consideration by the Assembly.

(2) Amendments to the Articles referred to in paragraph (1) shall be adopted by the Assembly. Adoption shall require three-fourths of the votes cast, provided that any amendment of Article 22, and of the present paragraph, shall require four-fifths of the votes cast.

(3) Any amendment to the Articles referred to in paragraph (1) shall enter into force one month after written notifications of acceptance, effected in accordance with their respective constitutional processes, have been received by the Director General from three-fourths of the countries members of the Assembly at the time it adopted the amendment. Any amendment to the said Articles thus accepted shall bind all the countries which are members of the Assembly at the time the amendment enters into force, or which become members thereof at a subsequent date, provided that any amendment increasing the financial obligations of countries of the Union shall bind only those countries which have notified their acceptance of such amendment.

Article 27

[Revision: 1. Objective; 2. Conferences; 3. Adoption]

(1) This Convention shall be submitted to revision with a view to the introduction of amendments designed to improve the system of the Union.

(2) For this purpose, conferences shall be held successively in one of the countries of the Union among the delegates of the said countries.

(3) Subject to the provisions of Article 26 which apply to the amendment of Articles 22 to 26, any revision of this Act, including the Appendix, shall require the unanimity of the votes cast.

Article 28

[Acceptance and Entry Into Force of Act for Countries of the Union: 1. Ratification, accession; possibility of excluding certain provisions; withdrawal of exclusion; 2. Entry into force of Articles 1 to 21 and Appendix; 3. Entry into force of Articles 22 to 38]

(1)

(a) Any country of the Union which has signed this Act may ratify it, and, if it has not signed it, may accede to it. Instruments of ratification or accession shall be deposited with the Director General.

(b) Any country of the Union may declare in its instrument of ratification or accession that its ratification or accession shall not apply to Articles 1 to 21 and the Appendix, provided that, if such country has previously made a declaration under Article VI(1) of the Appendix, then it may declare in the said instrument only that its ratification or accession shall not apply to Articles 1 to 20.

(c) Any country of the Union which, in accordance with subparagraph (b), has excluded provisions therein referred to from the effects of its ratification or accession may at any later time declare that it extends the effects of its ratification or accession to those provisions. Such declaration shall be deposited with the Director General.

(2)

(a) Articles 1 to 21 and the Appendix shall enter into force three months after both of the following two conditions are fulfilled:

- (i) at least five countries of the Union have ratified or acceded to this Act without making a declaration under paragraph (1)(b),
- (ii) France, Spain, the United Kingdom of Great Britain and Northern Ireland, and the United States of America, have become bound by the Universal Copyright Convention as revised at Paris on July 24, 1971.

(b) The entry into force referred to in subparagraph (a) shall apply to those countries of the Union which, at least three months before the said entry into force, have deposited instruments of ratification or accession not containing a declaration under paragraph (1)(b).

(c) With respect to any country of the Union not covered by subparagraph (b) and which ratifies or accedes to this Act without making a declaration under paragraph (1)(b), Articles 1 to 21 and the Appendix shall enter into force three months after the date on which the Director General has notified the deposit of the relevant instrument of ratification or accession, unless a subsequent date has been indicated in the instrument deposited. In the latter case, Articles 1 to 21 and the Appendix shall enter into force with respect to that country on the date thus indicated.

(d) The provisions of subparagraphs (a) to (c) do not affect the application of Article VI of the Appendix.

(3) With respect to any country of the Union which ratifies or accedes to this Act with or without a declaration made under paragraph (1)(b), Articles 22 to 38 shall enter into force three months after the date on which the Director General has notified the deposit of the relevant instrument of ratification or accession, unless a subsequent date has been indicated in the instrument deposited. In the latter case, Articles 22 to 38 shall enter into force with respect to that country on the date thus indicated.

Article 29

[Acceptance and Entry Into Force for Countries Outside the Union: 1. Accession; 2. Entry into force]

(1) Any country outside the Union may accede to this Act and thereby become party to this Convention and a member of the Union. Instruments of accession shall be deposited with the Director General.

(2)

(a) Subject to subparagraph (b), this Convention shall enter into force with respect to any country outside the Union three months after the date on which the Director General has notified the deposit of its instrument of accession, unless a subsequent date has been indicated in the instrument deposited. In the latter case, this Convention shall enter into force with respect to that country on the date thus indicated.

(b) If the entry into force according to subparagraph (a) precedes the entry into force of Articles 1 to 21 and the Appendix according to Article 28(2)(a), the said country shall, in the meantime, be bound, instead of by Articles 1 to 21 and the Appendix, by Articles 1 to 20 of the Brussels Act of this Convention.

Article 29^{bis}

[*Effect of Acceptance of Act for the Purposes of Article 14(2) of the WIPO Convention*]

Ratification of or accession to this Act by any country not bound by Articles 22 to 38 of the Stockholm Act of this Convention shall, for the sole purposes of Article 14(2) of the Convention establishing the Organization, amount to ratification of or accession to the said Stockholm Act with the limitation set forth in Article 28(1)(b)(i) thereof.

Article 30

[*Reservations: 1. Limits of possibility of making reservations; 2. Earlier reservations; reservation as to the right of translation; withdrawal of reservation*]

(1) Subject to the exceptions permitted by paragraph (2) of this Article, by Article 28(1)(b), by Article 33(2), and by the Appendix, ratification or accession shall automatically entail acceptance of all the provisions and admission to all the advantages of this Convention.

(2)

(a) Any country of the Union ratifying or acceding to this Act may, subject to Article V(2) of the Appendix, retain the benefit of the reservations it has previously formulated on condition that it makes a declaration to that effect at the time of the deposit of its instrument of ratification or accession.

(b) Any country outside the Union may declare, in acceding to this Convention and subject to Article V(2) of the Appendix, that it intends to substitute, temporarily at least, for Article 8 of this Act concerning the right of translation, the provisions of Article 5 of the Union Convention of 1886, as completed at Paris in 1896, on the clear understanding that the said provisions are applicable only to translations into a language in general use in the said country. Subject to Article I(6)(b) of the Appendix, any country has the right to apply, in relation to the right of translation of works whose country of origin is a country availing itself of such a reservation, a protection which is equivalent to the protection granted by the latter country.

(c) Any country may withdraw such reservations at any time by notification addressed to the Director General.

Article 31

[*Applicability to Certain Territories: 1. Declaration; 2. Withdrawal of declaration; 3. Effective date; 4. Acceptance of factual situations not implied*]

(1) Any country may declare in its instrument of ratification or accession, or may inform the Director General by written notification at any time thereafter, that this Convention shall be applicable to all or part of those territories, designated in the declaration or notification, for the external relations of which it is responsible.

(2) Any country which has made such a declaration or given such a notification may, at any time, notify the Director General that this Convention shall cease to be applicable to all or part of such territories.

(3)

(a) Any declaration made under paragraph (1) shall take effect on the same date as the ratification or accession in which it was included, and any notification given under that paragraph shall take effect three months after its notification by the Director General.

(b) Any notification given under paragraph (2) shall take effect twelve months after its receipt by the Director General.

(4) This Article shall in no way be understood as implying the recognition or tacit acceptance by a country of the Union of the factual situation concerning a territory to which this Convention is made applicable by another country of the Union by virtue of a declaration under paragraph (1).

Article 32

[*Applicability of this Act and of Earlier Acts:* 1. As between countries already members of the Union; 2. As between a country becoming a member of the Union and other countries members of the Union;
3. Applicability of the Appendix in Certain Relations]

(1) This Act shall, as regards relations between the countries of the Union, and to the extent that it applies, replace the Berne Convention of September 9, 1886, and the subsequent Acts of revision. The Acts previously in force shall continue to be applicable, in their entirety or to the extent that this Act does not replace them by virtue of the preceding sentence, in relations with countries of the Union which do not ratify or accede to this Act.

(2) Countries outside the Union which become party to this Act shall, subject to paragraph (3), apply it with respect to any country of the Union not bound by this Act or which, although bound by this Act, has made a declaration pursuant to Article 28(1)(b). Such countries recognize that the said country of the Union, in its relations with them:

- (i) may apply the provisions of the most recent Act by which it is bound, and
- (ii) subject to Article I(6) of the Appendix, has the right to adapt the protection to the level provided for by this Act.

(3) Any country which has availed itself of any of the faculties provided for in the Appendix may apply the provisions of the Appendix relating to the faculty or faculties of which it has availed itself in its relations with any other country of the Union which is not bound by this Act, provided that the latter country has accepted the application of the said provisions.

Article 33

[*Disputes:* 1. Jurisdiction of the International Court of Justice; 2. Reservation as to such jurisdiction; 3. Withdrawal of reservation]

(1) Any dispute between two or more countries of the Union concerning the interpretation or application of this Convention, not settled by negotiation, may, by any one of the countries concerned, be brought before the International Court of Justice by application in conformity with the Statute of the Court, unless the countries concerned agree on some other method of settlement. The country bringing the dispute before the Court shall inform the International Bureau; the International Bureau shall bring the matter to the attention of the other countries of the Union.

(2) Each country may, at the time it signs this Act or deposits its instrument of ratification or accession, declare that it does not consider itself bound by the provisions of paragraph (1). With regard to any dispute between such country and any other country of the Union, the provisions of paragraph (1) shall not apply.

(3) Any country having made a declaration in accordance with the provisions of paragraph (2) may, at any time, withdraw its declaration by notification addressed to the Director General.

Article 34

[*Closing of Certain Earlier Provisions:* 1. Of earlier Acts; 2. Of the Protocol to the Stockholm Act]

(1) Subject to Article 29^{bis} no country may ratify or accede to earlier Acts of this Convention once Articles 1 to 21 and the Appendix have entered into force.

(2) Once Articles 1 to 21 and the Appendix have entered into force, no country may make a declaration under Article 5 of the Protocol Regarding Developing Countries attached to the Stockholm Act.

Article 35

[*Duration of the Convention; Denunciation:* 1. Unlimited duration; 2. Possibility of denunciation;
3. Effective date of denunciation; 4. Moratorium on denunciation]

(1) This Convention shall remain in force without limitation as to time.

(2) Any country may denounce this Act by notification addressed to the Director General. Such denunciation shall constitute also denunciation of all earlier Acts and shall affect only the country making it, the Convention remaining in full force and effect as regards the other countries of the Union.

(3) Denunciation shall take effect one year after the day on which the Director General has received the notification.

(4) The right of denunciation provided by this Article shall not be exercised by any country before the expiration of five years from the date upon which it becomes a member of the Union.

Article 36

[*Application of the Convention*: 1. Obligation to adopt the necessary measures; 2. Time from which obligation exists]

(1) Any country party to this Convention undertakes to adopt, in accordance with its constitution, the measures necessary to ensure the application of this Convention.

(2) It is understood that, at the time a country becomes bound by this Convention, it will be in a position under its domestic law to give effect to the provisions of this Convention.

Article 37

[*Final Clauses*: 1. Languages of the Act; 2. Signature; 3. Certified copies; 4. Registration; 5. Notifications]

(1)

(a) This Act shall be signed in a single copy in the French and English languages and, subject to paragraph (2), shall be deposited with the Director General.

(b) Official texts shall be established by the Director General, after consultation with the interested Governments, in the Arabic, German, Italian, Portuguese and Spanish languages, and such other languages as the Assembly may designate.

(c) In case of differences of opinion on the interpretation of the various texts, the French text shall prevail.

(2) This Act shall remain open for signature until January 31, 1972. Until that date, the copy referred to in paragraph (1)(a) shall be deposited with the Government of the French Republic.

(3) The Director General shall certify and transmit two copies of the signed text of this Act to the Governments of all countries of the Union and, on request, to the Government of any other country.

(4) The Director General shall register this Act with the Secretariat of the United Nations.

(5) The Director General shall notify the Governments of all countries of the Union of signatures, deposits of instruments of ratification or accession and any declarations included in such instruments or made pursuant to Articles 28(1)(c), 30(2)(a) and (b), and 33(2), entry into force of any provisions of this Act, notifications of denunciation, and notifications pursuant to Articles 30(2)(c), 31(1) and (2), 33(3), and 38(1), as well as the Appendix.

Article 38

[*Transitory Provisions*: 1. Exercise of the "five-year privilege"; 2. Bureau of the Union, Director of the Bureau; 3. Succession of Bureau of the Union]

(1) Countries of the Union which have not ratified or acceded to this Act and which are not bound by Articles 22 to 26 of the Stockholm Act of this Convention may, until April 26, 1975, exercise, if they so desire, the rights provided under the said Articles as if they were bound by them. Any country desiring to exercise such rights shall give written notification to this effect to the Director General; this notification shall be effective on the date of its receipt. Such countries shall be deemed to be members of the Assembly until the said date.

(2) As long as all the countries of the Union have not become Members of the Organization, the International Bureau of the Organization shall also function as the Bureau of the Union, and the Director General as the Director of the said Bureau.

(3) Once all the countries of the Union have become Members of the Organization, the rights, obligations, and property, of the Bureau of the Union shall devolve on the International Bureau of the Organization.

APPENDIX

[SPECIAL PROVISIONS REGARDING DEVELOPING COUNTRIES]

Article I

[*Faculties Open to Developing Countries*: 1. Availability of certain faculties; declaration: 2. Duration of effect of declaration, 3. Cessation of developing country status; 4. Existing stocks of copies; 5. Declarations concerning certain territories; 6. Limits of reciprocity]

(1) Any country regarded as a developing country in conformity with the established practice of the General Assembly of the United Nations which ratifies or accedes to this Act, of which this Appendix forms an integral part, and which, having regard to its economic situation and its social or cultural needs, does not consider itself immediately in a position to make provision for the protection of all the rights as provided for in this Act, may, by a notification deposited with the Director General at the time of depositing its instrument of ratification or accession or, subject to Article V(1)(c), at any time thereafter, declare that it will avail itself of the faculty provided for in Article II, or of the faculty provided for in Article III, or of both of those faculties. It may, instead of availing itself of the faculty provided for in Article II, make a declaration according to Article V(1)(a).

(2)

(a) Any declaration under paragraph (1) notified before the expiration of the period of ten years from the entry into force of Articles 1 to 21 and this Appendix according to Article 28(2) shall be effective until the expiration of the said period. Any such declaration may be renewed in whole or in part for periods of ten years each by a notification deposited with the Director General not more than fifteen months and not less than three months before the expiration of the ten-year period then running.

(b) Any declaration under paragraph (1) notified after the expiration of the period of ten years from the entry into force of Articles 1 to 21 and this Appendix according to Article 28(2) shall be effective until the expiration of the ten-year period then running. Any such declaration may be renewed as provided for in the second sentence of subparagraph (a).

(3) Any country of the Union which has ceased to be regarded as a developing country as referred to in paragraph (1) shall no longer be entitled to renew its declaration as provided in paragraph (2), and, whether or not it formally withdraws its declaration, such country shall be precluded from availing itself of the faculties referred to in paragraph (1) from the expiration of the ten-year period then running or from the expiration of a period of three years after it has ceased to be regarded as a developing country, whichever period expires later.

(4) Where, at the time when the declaration made under paragraph (1) or (2) ceases to be effective, there are copies in stock which were made under a license granted by virtue of this Appendix, such copies may continue to be distributed until their stock is exhausted.

(5) Any country which is bound by the provisions of this Act and which has deposited a declaration or a notification in accordance with Article 31(1) with respect to the application of this Act to a particular territory, the situation of which can be regarded as analogous to that of the countries referred to in paragraph (1), may, in respect of such territory, make the declaration referred to in paragraph (1) and the notification of renewal referred to in paragraph (2). As long as such declaration or notification remains in effect, the provisions of this Appendix shall be applicable to the territory in respect of which it was made.

(6)

(a) The fact that a country avails itself of any of the faculties referred to in paragraph (1) does not permit another country to give less protection to works of which the country of origin is the former country than it is obliged to grant under Articles 1 to 20.

(b) The right to apply reciprocal treatment provided for in Article 30(2)(b), second sentence, shall not, until the date on which the period applicable under Article I(3) expires, be exercised in respect of works the country of origin of which is a country which has made a declaration according to Article V(1)(a).

Article II

[*Limitations on the Right of Translation:* 1. Licenses grantable by competent authority; 2. to 4. Conditions allowing the grant of such licenses; 5. Purposes for which licenses may be granted; 6. Termination of licenses; 7. Works composed mainly of illustrations; 8. Works withdrawn from circulation; 9. Licenses for broadcasting organizations]

(1) Any country which has declared that it will avail itself of the faculty provided for in this Article shall be entitled, so far as works published in printed or analogous forms of reproduction are concerned, to substitute for the exclusive right of translation provided for in Article 8 a system of non-exclusive and non-transferable licenses, granted by the competent authority under the following conditions and subject to Article IV.

(2)

(a) Subject to paragraph (3), if, after the expiration of a period of three years, or of any longer period determined by the national legislation of the said country, commencing on the date of the first publication of the work, a translation of such work has not been published in a language in general use in that country by the owner of the right of translation, or with his authorization, any national of such country may obtain a license to make a translation of the work in the said language and publish the translation in printed or analogous forms of reproduction.

(b) A license under the conditions provided for in this Article may also be granted if all the editions of the translation published in the language concerned are out of print.

(3)

(a) In the case of translations into a language which is not in general use in one or more developed countries which are members of the Union, a period of one year shall be substituted for the period of three years referred to in paragraph (2)(a).

(b) Any country referred to in paragraph (1) may, with the unanimous agreement of the developed countries which are members of the Union and in which the same language is in general use, substitute, in the case of translations into that language, for the period of three years referred to in paragraph (2)(a) a shorter period as determined by such agreement but not less than one year. However, the provisions of the foregoing sentence shall not apply where the language in question is English, French or Spanish. The Director General shall be notified of any such agreement by the Governments which have concluded it.

(4)

(a) No license obtainable after three years shall be granted under this Article until a further period of six months has elapsed, and no license obtainable after one year shall be granted under this Article until a further period of nine months has elapsed

(i) from the date on which the applicant complies with the requirements mentioned in Article IV(1), or

(ii) where the identity or the address of the owner of the right of translation is unknown, from the date on which the applicant sends, as provided for in Article IV(2), copies of his application submitted to the authority competent to grant the license.

(b) If, during the said period of six or nine months, a translation in the language in respect of which the application was made is published by the owner of the right of translation or with his authorization, no license under this Article shall be granted.

(5) Any license under this Article shall be granted only for the purpose of teaching, scholarship or research.

(6) If a translation of a work is published by the owner of the right of translation or with his authorization at a price reasonably related to that normally charged in the country for comparable works, any license granted under this Article shall terminate if such translation is in the same language and with substantially the same content as the translation published under the license. Any copies already made before the license terminates may continue to be distributed until their stock is exhausted.

(7) For works which are composed mainly of illustrations, a license to make and publish a translation of the text and to reproduce and publish the illustrations may be granted only if the conditions of Article III are also fulfilled.

(8) No license shall be granted under this Article when the author has withdrawn from circulation all copies of his work.

(9)

(a) A license to make a translation of a work which has been published in printed or analogous forms of reproduction may also be granted to any broadcasting organization having its headquarters in a country referred to in paragraph (1), upon an application made to the competent authority of that country by the said organization, provided that all of the following conditions are met:

- (i) the translation is made from a copy made and acquired in accordance with the laws of the said country;
- (ii) the translation is only for use in broadcasts intended exclusively for teaching or for the dissemination of the results of specialized technical or scientific research to experts in a particular profession;
- (iii) the translation is used exclusively for the purposes referred to in condition (ii) through broadcasts made lawfully and intended for recipients on the territory of the said country, including broadcasts made through the medium of sound or visual recordings lawfully and exclusively made for the purpose of such broadcasts;
- (iv) all uses made of the translation are without any commercial purpose.

(b) Sound or visual recordings of a translation which was made by a broadcasting organization under a license granted by virtue of this paragraph may, for the purposes and subject to the conditions referred to in subparagraph (a) and with the agreement of that organization, also be used by any other broadcasting organization having its headquarters in the country whose competent authority granted the license in question.

(c) Provided that all of the criteria and conditions set out in subparagraph (a) are met, a license may also be granted to a broadcasting organization to translate any text incorporated in an audio-visual fixation where such fixation was itself prepared and published for the sole purpose of being used in connection with systematic instructional activities.

(d) Subject to subparagraphs (a) to (c), the provisions of the preceding paragraphs shall apply to the grant and exercise of any license granted under this paragraph.

Article III

[Limitation on the Right of Reproduction: 1. Licenses grantable by competent authority; 2. to 5. Conditions allowing the grant of such licenses; 6. Termination of licenses; 7. Works to which this Article applies]

(1) Any country which has declared that it will avail itself of the faculty provided for in this Article shall be entitled to substitute for the exclusive right of reproduction provided for in Article 9 a system of non-exclusive and non-transferable licenses, granted by the competent authority under the following conditions and subject to Article IV.

(2)

(a) If, in relation to a work to which this Article applies by virtue of paragraph (7), after the expiration of

- (i) the relevant period specified in paragraph (3), commencing on the date of first publication of a particular edition of the work, or
- (ii) any longer period determined by national legislation of the country referred to in paragraph (1), commencing on the same date,

copies of such edition have not been distributed in that country to the general public or in connection with systematic instructional activities, by the owner of the right of reproduction or with his authorization, at a price reasonably related to that normally charged in the country for comparable works, any national of such country may obtain a license to reproduce and publish such edition at that or a lower price for use in connection with systematic instructional activities.

(b) A license to reproduce and publish an edition which has been distributed as described in subparagraph (a) may also be granted under the conditions provided for in this Article if, after the expiration of the applicable period, no authorized copies of that edition have been on sale for a period of six months in

the country concerned to the general public or in connection with systematic instructional activities at a price reasonably related to that normally charged in the country for comparable works.

- (3) The period referred to in paragraph (2)(a)(i) shall be five years, except that
- (i) for works of the natural and physical sciences, including mathematics, and of technology, the period shall be three years;
 - (ii) for works of fiction, poetry, drama and music, and for art books, the period shall be seven years.

(4)

(a) No license obtainable after three years shall be granted under this Article until a period of six months has elapsed

- (i) from the date on which the applicant complies with the requirements mentioned in Article IV(1), or
- (ii) where the identity or the address of the owner of the right of reproduction is unknown, from the date on which the applicant sends, as provided for in Article IV(2), copies of his application submitted to the authority competent to grant the license.

(b) Where licenses are obtainable after other periods and Article IV(2) is applicable, no license shall be granted until a period of three months has elapsed from the date of the dispatch of the copies of the application.

(c) If, during the period of six or three months referred to in subparagraphs (a) and (b), a distribution as described in paragraph (2)(a) has taken place, no license shall be granted under this Article.

(d) No license shall be granted if the author has withdrawn from circulation all copies of the edition for the reproduction and publication of which the license has been applied for.

(5) A license to reproduce and publish a translation of a work shall not be granted under this Article in the following cases:

- (i) where the translation was not published by the owner of the right of translation or with his authorization, or
- (ii) where the translation is not in a language in general use in the country in which the license is applied for.

(6) If copies of an edition of a work are distributed in the country referred to in paragraph (1) to the general public or in connection with systematic instructional activities, by the owner of the right of reproduction or with his authorization, at a price reasonably related to that normally charged in the country for comparable works, any license granted under this Article shall terminate if such edition is in the same language and with substantially the same content as the edition which was published under the said license. Any copies already made before the license terminates may continue to be distributed until their stock is exhausted.

(7)

(a) Subject to subparagraph (b), the works to which this Article applies shall be limited to works published in printed or analogous forms of reproduction.

(b) This Article shall also apply to the reproduction in audio-visual form of lawfully made audio-visual fixations including any protected works incorporated therein and to the translation of any incorporated text into a language in general use in the country in which the license is applied for, always provided that the audio-visual fixations in question were prepared and published for the sole purpose of being used in connection with systematic instructional activities.

Article IV

[Provisions Common to Licenses Under Articles II and III: 1 and 2. Procedure; 3. Indication of author and title of work; 4. Exportation of copies; 5. Notice; 6. Compensation]

(1) A license under Article II or Article III may be granted only if the applicant, in accordance with the procedure of the country concerned, establishes either that he has requested, and has been denied, authorization by the owner of the right to make and publish the translation or to reproduce and publish the

edition, as the case may be, or that, after due diligence on his part, he was unable to find the owner of the right. At the same time as making the request, the applicant shall inform any national or international information center referred to in paragraph (2).

(2) If the owner of the right cannot be found, the applicant for a license shall send, by registered airmail, copies of his application, submitted to the authority competent to grant the license, to the publisher whose name appears on the work and to any national or international information center which may have been designated, in a notification to that effect deposited with the Director General, by the Government of the country in which the publisher is believed to have his principal place of business.

(3) The name of the author shall be indicated on all copies of the translation or reproduction published under a license granted under Article II or Article III. The title of the work shall appear on all such copies. In the case of a translation, the original title of the work shall appear in any case on all the said copies.

(4)

(a) No license granted under Article II or Article III shall extend to the export of copies, and any such license shall be valid only for publication of the translation or of the reproduction, as the case may be, in the territory of the country in which it has been applied for.

(b) For the purposes of subparagraph (a), the notion of export shall include the sending of copies from any territory to the country which, in respect of that territory, has made a declaration under Article I(5).

(c) Where a governmental or other public entity of a country which has granted a license to make a translation under Article II into a language other than English, French or Spanish sends copies of a translation published under such license to another country, such sending of copies shall not, for the purposes of subparagraph (a), be considered to constitute export if all of the following conditions are met:

- (i) the recipients are individuals who are nationals of the country whose competent authority has granted the license, or organizations grouping such individuals;
- (ii) the copies are to be used only for the purpose of teaching, scholarship or research;
- (iii) the sending of the copies and their subsequent distribution to recipients is without any commercial purpose; and
- (iv) the country to which the copies have been sent has agreed with the country whose competent authority has granted the license to allow the receipt, or distribution, or both, and the Director General has been notified of the agreement by the Government of the country in which the license has been granted.

(5) All copies published under a license granted by virtue of Article II or Article III shall bear a notice in the appropriate language stating that the copies are available for distribution only in the country or territory to which the said license applies.

(6)

(a) Due provision shall be made at the national level to ensure

- (i) that the license provides, in favour of the owner of the right of translation or of reproduction, as the case may be, for just compensation that is consistent with standards of royalties normally operating on licenses freely negotiated between persons in the two countries concerned, and
- (ii) payment and transmittal of the compensation: should national currency regulations intervene, the competent authority shall make all efforts, by the use of international machinery, to ensure transmittal in internationally convertible currency or its equivalent.

(b) Due provision shall be made by national legislation to ensure a correct translation of the work, or an accurate reproduction of the particular edition, as the case may be.

Article V

[*Alternative Possibility for Limitation of the Right of Translation*: 1. Regime provided for under the 1886 and 1896 Acts; 2. No possibility of change to regime under Article II; 3. Time limit for choosing the alternative possibility]

(1)

(a) Any country entitled to make a declaration that it will avail itself of the faculty provided for in Article II may, instead, at the time of ratifying or acceding to this Act:

- (i) if it is a country to which Article 30(2)(a) applies, make a declaration under that provision as far as the right of translation is concerned;
- (ii) if it is a country to which Article 30(2)(a) does not apply, and even if it is not a country outside the Union, make a declaration as provided for in Article 30(2)(b), first sentence.

(b) In the case of a country which ceases to be regarded as a developing country as referred to in Article I(1), a declaration made according to this paragraph shall be effective until the date on which the period applicable under Article I(3) expires.

(c) Any country which has made a declaration according to this paragraph may not subsequently avail itself of the faculty provided for in Article II even if it withdraws the said declaration.

(2) Subject to paragraph (3), any country which has availed itself of the faculty provided for in Article II may not subsequently make a declaration according to paragraph (1).

(3) Any country which has ceased to be regarded as a developing country as referred to in Article I(1) may, not later than two years prior to the expiration of the period applicable under Article I(3), make a declaration to the effect provided for in Article 30(2)(b), first sentence, notwithstanding the fact that it is not a country outside the Union. Such declaration shall take effect at the date on which the period applicable under Article I(3) expires.

Article VI

[Possibilities of applying, or admitting the application of, certain provisions of the Appendix before becoming bound by it: 1. Declaration; 2. Depository and effective date of declaration]

(1) Any country of the Union may declare, as from the date of this Act, and at any time before becoming bound by Articles 1 to 21 and this Appendix:

- (i) if it is a country which, were it bound by Articles 1 to 21 and this Appendix, would be entitled to avail itself of the faculties referred to in Article I(1), that it will apply the provisions of Article II or of Article III or of both to works whose country of origin is a country which, pursuant to (ii) below, admits the application of those Articles to such works, or which is bound by Articles 1 to 21 and this Appendix; such declaration may, instead of referring to Article II, refer to Article V;
- (ii) that it admits the application of this Appendix to works of which it is the country of origin by countries which have made a declaration under (i) above or a notification under Article I.

(2) Any declaration made under paragraph (1) shall be in writing and shall be deposited with the Director General. The declaration shall become effective from the date of its deposit.

**98/731/EC: Commission Decision
of 11 December 1998**

**under the provisions of Council Regulation (EC) No 3286/94 concerning section 110(5) of the
Copyright Act of the United States of America (notified under document number C(1998) 4033)**

Council Regulation (EC) No 3286/94 concerning section 110(5) of the Copyright Act of the United States of America (notified under document number C(1998) 4033) (98/731/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 3286/94 of 22 December 1994 laying down Community procedures in the field of the common commercial policy in order to ensure the exercise of the Community's right under international trade rules, in particular those established under the auspices of the World Trade Organisation (1), as amended by Regulation (EC) No 356/95 (2), and in particular Articles 13 and 14 thereof,

After consulting the Advisory Committee,

Whereas:

A. PROCEDURE

- (1) On 21 April 1997 the Commission received a complaint pursuant to Article 4 of Council Regulation (EC) No 3286/94 (hereafter 'the Regulation'). The complaint was lodged by the Irish Music Rights Organisation (IMRO) with the unanimous support of the Groupement européen des sociétés d'auteurs et compositeurs (GESAC).
- (2) The complainant alleged that Section 110(5) of the 1976 Copyright Act of the United States of America is inconsistent with several provisions of the Agreement establishing the World Trade Organisation (hereafter 'the WTO Agreement') and its annexes. On that basis the complainant asked the Commission to take the necessary actions to convince the United States of America to repeal this measure.
- (3) The complaint contained sufficient prima facie evidence to justify the initiation of a Community examination procedure pursuant to Article 8 of the Regulation. Consequently, such procedure was initiated on 11 June 1997 (3).
- (4) Following the initiation of the examination procedure the Commission conducted an in-depth legal and factual investigation into Section 110(5) of the US Copyright Act as well as into the amendments to the statute as discussed in US Congress at the time of the investigation and enacted meanwhile. Based on the findings of this investigation the Commission reached the conclusions which are indicated below.

B. FINDINGS REGARDING THE EXISTENCE OF AN OBSTACLE TO TRADE

- (5) Although under the US Copyright Act the right holder of a musical work has the exclusive right 'to perform the copyrighted work publicly', Section 110(5) of the US Copyright Act exempts certain public performances from protection. Before the recent addition of a new subparagraph widening the scope of the exemption (see further under item D) it read as follows: 'Notwithstanding the provisions of Section 106, the following are not infringements of copyright: (...) communication or transmission embodying a performance or display of a work by the public reception of the transmission on a single receiving apparatus of a kind commonly used in private homes, unless (a) a direct charge is made to see or hear the transmission or (b) the transmission thus received is further retransmitted to the public'. The exemption covers the use of a radio or television set 'of a type commonly found in private homes' in a shop, a bar, a restaurant or any other place frequented by the public. As a result of its vague and ambiguous statutory language, Section 110(5) has

given rise to a very broad interpretation of what is commonly referred to as the 'homestyle exemption'. For example, it has been held that the exemption can also apply to companies operating large chains of stores throughout the country and using the playing of music in stores as part of their commercial policy (4).

- (6) Under Article 9(1) of the WTO Agreement on Trade-Related Intellectual Property Rights (hereafter 'TRIPs'), members must comply with Articles 1 to 21 of the Berne Convention for the Protection of Literary and Artistic Works (hereafter the 'Berne Convention'). Article 11bis(1) of the Berne Convention, as revised by the Paris Act of 1971, grants the right holders of literary and artistic works (which include musical works) the exclusive right of authorising not only the broadcasting and other wireless communication of their works, but also the public communication of a broadcast of their works by loudspeaker or analogous instrument. By permitting qualifying locations to use music without being licensed by the right holders and without payment of royalties, the US exemption deprives right holders of the protection to which they are entitled under Article 11bis(1)(iii) when broadcasts of their works are publicly communicated by loudspeakers or analogous instruments and under Article 11(1)(ii) when direct cable transmissions of their works are publicly communicated by such instruments. Article 11bis(1)(iii) or Article 11(1)(ii) clearly cover situations where broadcast music or music transmitted by cable is further transmitted to the public by a radio or a television apparatus (such as under the homestyle exemption) or any other means since it addresses the issue of public communication of broadcast works and not the technical specifications of the means used for that purpose.
- (7) Article 11bis(2) of the Berne Convention provides that, while countries may place conditions on the exercise of the exclusive rights set out in Article 11bis(1), such conditions may not be prejudicial to the right holders' right to obtain equitable remuneration. Section 110(5) of the US Copyright Act is prejudicial to the right holders' right to obtain such remuneration, as it deprives them of all remuneration in respect of the use of their works in situations covered by the homestyle exemption.
- (8) The Commission also reviewed the homestyle exemption from the point of view of 'minor reservations', a category of exceptions which might be considered to apply on the exercise of the exclusive rights under the Berne Convention, but concluded that, even where 'minor reservations' were applicable to the exclusive rights set out in Article 11bis(1)(iii) and (1)(ii), it would still remain that the homestyle exemption is clearly not a minor reservation. The exemption is widely applied on a commercial basis through the US and the economic losses incurred by Community rightholders are important, ranging between 13 to 24 % of the US performing rights organisations' annual distributions to Community collecting societies representing composers and arrangers of music, lyricists and publishers.
- (9) Since Article 9(1) of TRIPs imposes a mandatory obligation on WTO members to comply with Articles 1 to 21 of the Berne Convention, a WTO member is in breach of its obligations under the TRIPs Agreement where it fails to comply with the Berne Convention. Therefore, since Section 110(5) of the US Copyright Act contravenes Article 11bis(1), bis (2) and (1) of the Berne Convention, Section 110(5) of the US Copyright Act is in breach of Article 9(1) of TRIPs. Also, the Commission holds the opinion that Article 13 of TRIPs cannot be invoked by the United States to justify the homestyle exemption, as this provision limits the scope of existing exemptions under the Berne Convention to special cases which do not conflict with a normal exploitation of the work and do not unreasonably prejudice the legitimate interests of the right holder. It does not allow additional exemptions to the rights protected under the Berne Convention.
- (10) Under these circumstances the Commission considers that the complainant's allegations are

well-founded and that Section 110(5) of the US Copyright Act constitutes an obstacle to trade within the meaning of Article 2(1) of the Regulation, that is 'a practice adopted or maintained by a third country in respect of which international trade rules establish a right of action`.

- (11) The Commission none the less considers that reference to the above legal bases does not rule out recourse to any other pertinent provision of the WTO Agreement and of the Agreements annexed to it, which could be of use in procedures before the WTO.

C. FINDINGS REGARDING ADVERSE TRADE EFFECTS

- (12) Section 110(5) of the US Copyright Act curtails Community right holders in the full and normal exercise of their exclusive rights under the Berne Convention and the TRIPs Agreement. The right holders are deprived of the possibility to license the performing right of their work (either directly or through collecting societies) and of the possibility to obtain remuneration for the communication of their works to the public.
- (13) The most direct effect of Section 110(5) is that it deprives right holders of their remuneration for certain communications to the public. Estimations made by the Commission reveal that the direct loss of licensing income to Community right holders for performing rights in music (i.e. composers and arrangers of music, lyricists and music publishers) resulting from the application of Section 110(5) amounts to between USD 3,8 and 6,8 million a year. These amounts represent 13 to 24 % of the US performing rights organisations' annual distributions to Community collecting societies representing these three categories of right holders. This shows that the losses caused by the homestyle exemption to the Community right holders are important.
- (14) The homestyle exemption also entails indirect losses to the Community right holders as it acts as a disincentive to the US performing right organisations to effectively and efficiently license bars, shops, restaurants and others in markets where no exemption exists and leads to a reduction of the efficiency of US organisations when trying to license such venues. The result of the very existence of Section 110(5) is that even those venues which clearly do not qualify for the exemption are not always properly licensed.
- (15) Further indirect losses are also caused by the fact that the homestyle exemption has acted as a catalyst for negative public and private attitudes towards licensing of non-dramatical musical works in the US. Powerful lobbies of music users have systematically (and successfully) resisted efforts by the collecting societies to effectively license and to collect reasonable fees for the communication of music to the public.
- (16) As a result of Section 110(5), the prospective revenue a right holder can expect from the licensing of his work in the US is less than it should be. This reduced prospective income may have a negative impact on the stimulus to export music to the US.
- (17) Under these circumstances the Commission considers that the complainant's allegations are well-founded and that Section 110(5) of the US Copyright Act is causing adverse trade effects within the meaning of Article 2(4) of the Regulation.

D. RECENT AMENDMENTS TO SECTION 110(5) OF THE US COPYRIGHT ACT

- (18) While the Commission was investigating the homestyle exemption, US Congress was examining a bill amending Section 110(5) of the US Copyright Act in view of widening its scope.
- (19) On 6 and 7 October 1998, the bill, entitled 'Fairness in Music Licensing Act', was adopted by, respectively, the US House of Representatives and the US Senate. The bill consists of adding a new subparagraph B to Section 110(5) of the US Copyright Act which provides for a further exception to the rightholders' exclusive right to authorise public communication of their works, while the homestyle exemption remains unchanged under subparagraph A. The new subparagraph

B now applies to a much wider range of beneficiaries, namely eating, drinking and other commercial establishments provided that they fulfil a certain number of conditions, mainly with regard to the surface of the establishment and the number of loudspeakers used. It covers the use of any type of audiovisual device, and is thus not limited to the use of a 'homestyle' apparatus only.

- (20) The bill was signed by the President of the United States on 27 October 1998, to enter into force 90 days after enactment. Since this means that, from a legal point of view, the bill is now part of the US legal order, although its entry into effect has been delayed for 90 days, it can already be the object of a dispute settlement procedure under WTO.
- (21) From a legal point of view, the new paragraph B of Section 110(5) also deprives right holders to the protection they are entitled under Articles 11bis (1)(iii) and 11(1)(ii) of the Berne Convention when broadcasts of their works or cable transmissions of their works are communicated to the public. Therefore, the Commission's analysis of the 1976 version of Section 110(5) of the US Copyright Act (now under subparagraph A of the section) fully applies to the new version of the Statute, which is thus equally in breach of the Berne Convention and the TRIPs Agreement.
- (22) As far as the adverse trade effects are concerned, it is clear that they will be seriously amplified by the widening of the Statute's scope in terms of beneficiaries and type of audiovisual devices used to perform music in public establishments. Whereas the Commission estimated that the 1976 homestyle exemption applied to between 20 and 35 % of US business establishments categorised as small business by US Government and employing fewer than 20 persons, and to between 6 and 12 % of US business of the same category employing more than 20 persons, the US collecting societies estimate that, only where eating and drinking business is concerned, the new Bill would already exempt 70 % of all US bars and restaurants, as they fall below the surface thresholds under the new Section 110(5)B.

E. COMMUNITY INTEREST

- (23) Ensuring that WTO partners fully comply with their obligations is of the utmost importance for the Community which has committed itself to the same obligations. Therefore, the Community should immediately challenge Section 110(5) of the US Copyright Act.

F. CONCLUSIONS AND MEASURES TO BE TAKEN

- (24) Meetings have been held and letters have been exchanged with the relevant US authorities to discuss this matter further and aimed at finding an amicable solution to the problems concerning the licensing of music works but the US authorities have not forwarded any proposals in view of such a solution.
- (25) In these circumstances, it appears that the interests of the Community call for initiation of WTO dispute settlement proceedings,

HAS DECIDED AS FOLLOWS:

Article 1

1. Section 110(5) of the Copyright Act of the United States of America appears to be inconsistent with the obligations of that country under the Marrakesh Agreement Establishing the World Trade Organisation and constitutes an 'obstacle to trade' within the meaning of Article 2(1) of Regulation (EC) No 3286/94.
2. The Community, will commence action against the United States of America under the Understanding

on the Rules and Procedures for the Settlement of Disputes and other relevant WTO provisions with a view to securing removal of the obstacle to trade.

Article 2

This Decision shall apply from the date of its publication in the Official Journal of the European Communities.

Done at Brussels, 11 December 1998.

**Council Regulation (EC) No 6/2002
of 12 December 2001
on Community designs**

Council Regulation (EC) No 6/2002

of 12 December 2001

on Community designs

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 308 thereof,

Having regard to the proposal from the Commission(1),

Having regard to the opinion of the European Parliament(2),

Having regard to the opinion of the Economic and Social Committee(3),

Whereas:

- (1) A unified system for obtaining a Community design to which uniform protection is given with uniform effect throughout the entire territory of the Community would further the objectives of the Community as laid down in the Treaty.
- (2) Only the Benelux countries have introduced a uniform design protection law. In all the other Member States the protection of designs is a matter for the relevant national law and is confined to the territory of the Member State concerned. Identical designs may be therefore protected differently in different Member States and for the benefit of different owners. This inevitably leads to conflicts in the course of trade between Member States.
- (3) The substantial differences between Member States' design laws prevent and distort Community-wide competition. In comparison with domestic trade in, and competition between, products incorporating a design, trade and competition within the Community are prevented and distorted by the large number of applications, offices, procedures, laws, nationally circumscribed exclusive rights and the combined administrative expense with correspondingly high costs and fees for the applicant. [Directive 98/71/EC](#) of the European Parliament and of the Council of 13 October 1998 on the legal protection of designs(4) contributes to remedying this situation.
- (4) The effect of design protection being limited to the territory of the individual Member States whether or not their laws are approximated, leads to a possible division of the internal market with respect to products incorporating a design which is the subject of national rights held by different individuals, and hence constitutes an obstacle to the free movement of goods.
- (5) This calls for the creation of a Community design which is directly applicable in each Member State, because only in this way will it be possible to obtain, through one application made to the Office for Harmonisation in the Internal Market (Trade Marks and Design) in accordance with a single procedure under one law, one design right for one area encompassing all Member States.
- (6) Since the objectives of the proposed action, namely, the protection of one design right for one area encompassing all the Member States, cannot be sufficiently achieved by the Member States by reason of the scale and the effects of the creation of a Community design and a Community design authority and can therefore, and can therefore be better achieved at Community level, the Community may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality, as set out

in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.

- (7) Enhanced protection for industrial design not only promotes the contribution of individual designers to the sum of Community excellence in the field, but also encourages innovation and development of new products and investment in their production.
- (8) Consequently a more accessible design-protection system adapted to the needs of the internal market is essential for Community industries.
- (9) The substantive provisions of this Regulation on design law should be aligned with the respective provisions in [Directive 98/71/EC](#).
- (10) Technological innovation should not be hampered by granting design protection to features dictated solely by a technical function. It is understood that this does not entail that a design must have an aesthetic quality. Likewise, the interoperability of products of different makes should not be hindered by extending protection to the design of mechanical fittings. Consequently, those features of a design which are excluded from protection for those reasons should not be taken into consideration for the purpose of assessing whether other features of the design fulfil the requirements for protection.
- (11) The mechanical fittings of modular products may nevertheless constitute an important element of the innovative characteristics of modular products and present a major marketing asset, and therefore should be eligible for protection.
- (12) Protection should not be extended to those component parts which are not visible during normal use of a product, nor to those features of such part which are not visible when the part is mounted, or which would not, in themselves, fulfil the requirements as to novelty and individual character. Therefore, those features of design which are excluded from protection for these reasons should not be taken into consideration for the purpose of assessing whether other features of the design fulfil the requirements for protection.
- (13) Full-scale approximation of the laws of the Member States on the use of protected designs for the purpose of permitting the repair of a complex product so as to restore its original appearance, where the design is applied to or incorporated in a product which constitutes a component part of a complex product upon whose appearance the protected design is dependent, could not be achieved through [Directive 98/71/EC](#). Within the framework of the conciliation procedure on the said [Directive](#), the Commission undertook to review the consequences of the provisions of that [Directive](#) three years after the deadline for transposition of the [Directive](#) in particular for the industrial sectors which are most affected. Under these circumstances, it is appropriate not to confer any protection as a Community design for a design which is applied to or incorporated in a product which constitutes a component part of a complex product upon whose appearance the design is dependent and which is used for the purpose of the repair of a complex product so as to restore its original appearance, until the Council has decided its policy on this issue on the basis of a Commission proposal.
- (14) The assessment as to whether a design has individual character should be based on whether the overall impression produced on an informed user viewing the design clearly differs from that produced on him by the existing design corpus, taking into consideration the nature of the product to which the design is applied or in which it is incorporated, and in particular the industrial sector to which it belongs and the degree of freedom of the designer in developing the design.
- (15) A Community design should, as far as possible, serve the needs of all sectors of industry in the Community.
- (16) Some of those sectors produce large numbers of designs for products frequently having a short

market life where protection without the burden of registration formalities is an advantage and the duration of protection is of lesser significance. On the other hand, there are sectors of industry which value the advantages of registration for the greater legal certainty it provides and which require the possibility of a longer term of protection corresponding to the foreseeable market life of their products.

- (17) This calls for two forms of protection, one being a short-term unregistered design and the other being a longer term registered design.
- (18) A registered Community design requires the creation and maintenance of a register in which will be registered all those applications which comply with formal conditions and which have been accorded a date of filing. This registration system should in principle not be based upon substantive examination as to compliance with requirements for protection prior to registration, thereby keeping to a minimum the registration and other procedural burdens on applicants.
- (19) A Community design should not be upheld unless the design is new and unless it also possesses an individual character in comparison with other designs.
- (20) It is also necessary to allow the designer or his successor in title to test the products embodying the design in the market place before deciding whether the protection resulting from a registered Community design is desirable. To this end it is necessary to provide that disclosures of the design by the designer or his successor in title, or abusive disclosures during a period of 12 months prior to the date of the filing of the application for a registered Community design should not be prejudicial in assessing the novelty or the individual character of the design in question.
- (21) The exclusive nature of the right conferred by the registered Community design is consistent with its greater legal certainty. It is appropriate that the unregistered Community design should, however, constitute a right only to prevent copying. Protection could not therefore extend to design products which are the result of a design arrived at independently by a second designer. This right should also extend to trade in products embodying infringing designs.
- (22) The enforcement of these rights is to be left to national laws. It is necessary therefore to provide for some basic uniform sanctions in all Member States. These should make it possible, irrespective of the jurisdiction under which enforcement is sought, to stop the infringing acts.
- (23) Any third person who can establish that he has in good faith commenced use even for commercial purposes within the Community, or has made serious and effective preparations to that end, of a design included within the scope of protection of a registered Community design, which has not been copied from the latter, may be entitled to a limited exploitation of that design.
- (24) It is a fundamental objective of this Regulation that the procedure for obtaining a registered Community design should present the minimum cost and difficulty to applicants, so as to make it readily available to small and medium-sized enterprises as well as to individual designers.
- (25) Those sectors of industry producing large numbers of possibly short-lived designs over short periods of time of which only some may be eventually commercialised will find advantage in the unregistered Community design. Furthermore, there is also a need for these sectors to have easier recourse to the registered Community design. Therefore, the option of combining a number of designs in one multiple application would satisfy that need. However, the designs contained in a multiple application may be dealt with independently of each other for the purposes of enforcement of rights, licensing, rights in rem, levy of execution, insolvency proceedings, surrender, renewal, assignment, deferred publication or declaration of invalidity.
- (26) The normal publication following registration of a Community design could in some cases destroy

or jeopardise the success of a commercial operation involving the design. The facility of a deferment of publication for a reasonable period affords a solution in such cases.

- (27) A procedure for hearing actions concerning validity of a registered Community design in a single place would bring savings in costs and time compared with procedures involving different national courts.
- (28) It is therefore necessary to provide safeguards including a right of appeal to a Board of Appeal, and ultimately to the Court of Justice. Such a procedure would assist the development of uniform interpretation of the requirements governing the validity of Community designs.
- (29) It is essential that the rights conferred by a Community design can be enforced in an efficient manner throughout the territory of the Community.
- (30) The litigation system should avoid as far as possible "forum shopping". It is therefore necessary to establish clear rules of international jurisdiction.
- (31) This Regulation does not preclude the application to designs protected by Community designs of the industrial property laws or other relevant laws of the Member States, such as those relating to design protection acquired by registration or those relating to unregistered designs, trade marks, patents and utility models, unfair competition or civil liability.
- (32) In the absence of the complete harmonisation of copyright law, it is important to establish the principle of cumulation of protection under the Community design and under copyright law, whilst leaving Member States free to establish the extent of copyright protection and the conditions under which such protection is conferred.
- (33) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission(5),

HAS ADOPTED THIS REGULATION:

TITLE I

GENERAL PROVISIONS

Article 1

Community design

1. A design which complies with the conditions contained in this Regulation is hereinafter referred to as a "Community design".
2. A design shall be protected:
 - (a) by an "unregistered Community design", if made available to the public in the manner provided for in this Regulation;
 - (b) by a "registered Community design", if registered in the manner provided for in this Regulation.
3. A Community design shall have a unitary character. It shall have equal effect throughout the Community. It shall not be registered, transferred or surrendered or be the subject of a decision declaring it invalid, nor shall its use be prohibited, save in respect of the whole Community. This principle and its implications shall apply unless otherwise provided in this Regulation.

Article 2

Office

The Office for Harmonisation in the Internal Market (Trade Marks and Designs), hereinafter referred to as "the Office", instituted by Council Regulation (EC) No 40/94 of 20 December 1993 on the Community [trade mark](#)(6), hereinafter referred to as the "Regulation on the Community [trade mark](#)", shall carry out the tasks entrusted to it by this Regulation.

TITLE II

THE LAW RELATING TO DESIGNS

Section 1

Requirements for protection

Article 3

Definitions

For the purposes of this Regulation:

- (a) "design" means the appearance of the whole or a part of a product resulting from the features of, in particular, the lines, contours, colours, shape, texture and/or materials of the product itself and/or its ornamentation;
- (b) "product" means any industrial or handicraft item, including inter alia parts intended to be assembled into a complex product, packaging, get-up, graphic symbols and typographic typefaces, but excluding computer programs;
- (c) "complex product" means a product which is composed of multiple components which can be replaced permitting disassembly and re-assembly of the product.

Article 4

Requirements for protection

1. A design shall be protected by a Community design to the extent that it is new and has individual character.
2. A design applied to or incorporated in a product which constitutes a component part of a complex product shall only be considered to be new and to have individual character:
 - (a) if the component part, once it has been incorporated into the complex product, remains visible during normal use of the latter; and
 - (b) to the extent that those visible features of the component part fulfil in themselves the requirements as to novelty and individual character.
3. "Normal use" within the meaning of paragraph (2)(a) shall mean use by the end user, excluding maintenance, servicing or repair work.

Article 5

Novelty

1. A design shall be considered to be new if no identical design has been made available to the public:
 - (a) in the case of an unregistered Community design, before the date on which the design for which protection is claimed has first been made available to the public;
 - (b) in the case of a registered Community design, before the date of filing of the application for registration of the design for which protection is claimed, or, if priority is claimed, the date of priority.
2. Designs shall be deemed to be identical if their features differ only in immaterial details.

Article 6

Individual character

1. A design shall be considered to have individual character if the overall impression it produces on the informed user differs from the overall impression produced on such a user by any design which has been made available to the public:
 - (a) in the case of an unregistered Community design, before the date on which the design for which protection is claimed has first been made available to the public;
 - (b) in the case of a registered Community design, before the date of filing the application for registration or, if a priority is claimed, the date of priority.
2. In assessing individual character, the degree of freedom of the designer in developing the design shall be taken into consideration.

Article 7

Disclosure

1. For the purpose of applying Articles 5 and 6, a design shall be deemed to have been made available to the public if it has been published following registration or otherwise, or exhibited, used in trade or otherwise disclosed, before the date referred to in Articles 5(1)(a) and 6(1)(a) or in Articles 5(1)(b) and 6(1)(b), as the case may be, except where these events could not reasonably have become known in the normal course of business to the circles specialised in the sector concerned, operating within the Community. The design shall not, however, be deemed to have been made available to the public for the sole reason that it has been disclosed to a third person under explicit or implicit conditions of confidentiality.
2. A disclosure shall not be taken into consideration for the purpose of applying Articles 5 and 6 and if a design for which protection is claimed under a registered Community design has been made available to the public:
 - (a) by the designer, his successor in title, or a third person as a result of information provided

or action taken by the designer or his successor in title; and

(b) during the 12-month period preceding the date of filing of the application or, if a priority is claimed, the date of priority.

3. Paragraph 2 shall also apply if the design has been made available to the public as a consequence of an abuse in relation to the designer or his successor in title.

Article 8

Designs dictated by their technical function and designs of interconnections

1. A Community design shall not subsist in features of appearance of a product which are solely dictated by its technical function.

2. A Community design shall not subsist in features of appearance of a product which must necessarily be reproduced in their exact form and dimensions in order to permit the product in which the design is incorporated or to which it is applied to be mechanically connected to or placed in, around or against another product so that either product may perform its function.

3. Notwithstanding paragraph 2, a Community design shall under the conditions set out in Articles 5 and 6 subsist in a design serving the purpose of allowing the multiple assembly or connection of mutually interchangeable products within a modular system.

Article 9

Designs contrary to public policy or morality

A Community design shall not subsist in a design which is contrary to public policy or to accepted principles of morality.

Section 2

Scope and term of protection

Article 10

Scope of protection

1. The scope of the protection conferred by a Community design shall include any design which does not produce on the informed user a different overall impression.

2. In assessing the scope of protection, the degree of freedom of the designer in developing his design shall be taken into consideration.

Article 11

Commencement and term of protection of the unregistered Community design

1. A design which meets the requirements under Section 1 shall be protected by an unregistered Community design for a period of three years as from the date on which the design was first made available to the public within the Community.

2. For the purpose of paragraph 1, a design shall be deemed to have been made available to the public within the Community if it has been published, exhibited, used in trade or otherwise disclosed in such a way that, in the normal course of business, these events could reasonably have become known to the circles specialised in the sector concerned, operating within the Community. The design shall not, however, be deemed to have been made available to the public for the sole reason that it has been disclosed to a third person under explicit or implicit conditions of confidentiality.

Article 12

Commencement and term of protection of the registered Community design

Upon registration by the Office, a design which meets the requirements under Section 1 shall be protected by a registered Community design for a period of five years as from the date of the filing of the application. The right holder may have the term of protection renewed for one or more periods of five years each, up to a total term of 25 years from the date of filing.

Article 13

Renewal

1. Registration of the registered Community design shall be renewed at the request of the right holder or of any person expressly authorised by him, provided that the renewal fee has been paid.

2. The Office shall inform the right holder of the registered Community design and any person having a right entered in the register of Community designs, referred to in Article 72, hereafter referred to as the "register" in respect of the registered Community design, of the expiry of the registration in good time before the said expiry. Failure to give such information shall not involve the responsibility of the Office.

3. The request for renewal shall be submitted and the renewal fee paid within a period of six months ending on the last day of the month in which protection ends. Failing this, the request may be submitted and the fee paid within a further period of six months from the day referred to in the first sentence, provided that an additional fee is paid within this further period.

4. Renewal shall take effect from the day following the date on which the existing registration expires. The renewal shall be entered in the register.

Section 3

Right to the Community design

Article 14

Right to the Community design

1. The right to the Community design shall vest in the designer or his successor in title.

2. If two or more persons have jointly developed a design, the right to the Community design shall vest in them jointly.

3. However, where a design is developed by an employee in the execution of his duties or following the instructions given by his employer, the right to the Community design shall vest in the employer, unless otherwise agreed or specified under national law.

Article 15

Claims relating to the entitlement to a Community design

1. If an unregistered Community design is disclosed or claimed by, or a registered Community design has been applied for or registered in the name of, a person who is not entitled to it under Article 14, the person entitled to it under that provision may, without prejudice to any other remedy which may be open to him, claim to become recognised as the legitimate holder of the Community design.

2. Where a person is jointly entitled to a Community design, that person may, in accordance with paragraph 1, claim to become recognised as joint holder.

3. Legal proceedings under paragraphs 1 or 2 shall be barred three years after the date of publication of a registered Community design or the date of disclosure of an unregistered Community design. This provision shall not apply if the person who is not entitled to the Community design was acting in bad faith at the time when such design was applied for or disclosed or was assigned to him.

4. In the case of a registered Community design, the following shall be entered in the register:

- (a) the mention that legal proceedings under paragraph 1 have been instituted;
- (b) the final decision or any other termination of the proceedings;
- (c) any change in the ownership of the registered Community design resulting from the final decision.

Article 16

Effects of a judgement on entitlement to a registered Community design

1. Where there is a complete change of ownership of a registered Community design as a result of legal proceedings under Article 15(1), licences and other rights shall lapse upon the entering in the register of the person entitled.

2. If, before the institution of the legal proceedings under Article 15(1) has been registered, the holder of the registered Community design or a licensee has exploited the design within the Community or made serious and effective preparations to do so, he may continue such exploitation provided that he requests within the period prescribed by the implementing regulation a non-exclusive licence from the new holder whose name is entered in the register. The licence shall be granted for a reasonable period and upon reasonable terms.

3. Paragraph 2 shall not apply if the holder of the registered Community design or the licensee was acting in bad faith at the time when he began to exploit the design or to make preparations to do so.

Article 17

Presumption in favour of the registered holder of the design

The person in whose name the registered Community design is registered or, prior to registration, the person in whose name the application is filed, shall be deemed to be the person entitled in any proceedings before the Office as well as in any other proceedings.

Article 18

Right of the designer to be cited

The designer shall have the right, in the same way as the applicant for or the holder of a registered Community design, to be cited as such before the Office and in the register. If the design is the result of teamwork, the citation of the team may replace the citation of the individual designers.

Section 4

Effects of the Community design

Article 19

Rights conferred by the Community design

1. A registered Community design shall confer on its holder the exclusive right to use it and to prevent any third party not having his consent from using it. The aforementioned use shall cover, in particular, the making, offering, putting on the market, importing, exporting or using of a product in which the design is incorporated or to which it is applied, or stocking such a product for those purposes.

2. An unregistered Community design shall, however, confer on its holder the right to prevent the acts referred to in paragraph 1 only if the contested use results from copying the protected design.

The contested use shall not be deemed to result from copying the protected design if it results from an independent work of creation by a designer who may be reasonably thought not to be familiar with the design made available to the public by the holder.

3. Paragraph 2 shall also apply to a registered Community design subject to deferment of publication as long as the relevant entries in the register and the file have not been made available to the public in accordance with Article 50(4).

Article 20

Limitation of the rights conferred by a Community design

1. The rights conferred by a Community design shall not be exercised in respect of:

(a) acts done privately and for non-commercial purposes;

- (b) acts done for experimental purposes;
 - (c) acts of reproduction for the purpose of making citations or of teaching, provided that such acts are compatible with fair trade practice and do not unduly prejudice the normal exploitation of the design, and that mention is made of the source.
2. In addition, the rights conferred by a Community design shall not be exercised in respect of:
- (a) the equipment on ships and aircraft registered in a third country when these temporarily enter the territory of the Community;
 - (b) the importation in the Community of spare parts and accessories for the purpose of repairing such craft;
 - (c) the execution of repairs on such craft.

Article 21

Exhaustion of rights

The rights conferred by a Community design shall not extend to acts relating to a product in which a design included within the scope of protection of the Community design is incorporated or to which it is applied, when the product has been put on the market in the Community by the holder of the Community design or with his consent.

Article 22

Rights of prior use in respect of a registered Community design

1. A right of prior use shall exist for any third person who can establish that before the date of filing of the application, or, if a priority is claimed, before the date of priority, he has in good faith commenced use within the Community, or has made serious and effective preparations to that end, of a design included within the scope of protection of a registered Community design, which has not been copied from the latter.
2. The right of prior use shall entitle the third person to exploit the design for the purposes for which its use had been effected, or for which serious and effective preparations had been made, before the filing or priority date of the registered Community design.
3. The right of prior use shall not extend to granting a licence to another person to exploit the design.
4. The right of prior use cannot be transferred except, where the third person is a business, along with that part of the business in the course of which the act was done or the preparations were made.

Article 23

Government use

Any provision in the law of a Member State allowing use of national designs by or for the government

may be applied to Community designs, but only to the extent that the use is necessary for essential defence or security needs.

Section 5

Invalidity

Article 24

Declaration of invalidity

1. A registered Community design shall be declared invalid on application to the Office in accordance with the procedure in Titles VI and VII or by a Community design court on the basis of a counterclaim in infringement proceedings.

2. A Community design may be declared invalid even after the Community design has lapsed or has been surrendered.

3. An unregistered Community design shall be declared invalid by a Community design court on application to such a court or on the basis of a counterclaim in infringement proceedings.

Article 25

Grounds for invalidity

1. A Community design may be declared invalid only in the following cases:

- (a) if the design does not correspond to the definition under Article 3(a);
- (b) if it does not fulfil the requirements of Articles 4 to 9;
- (c) if, by virtue of a court decision, the right holder is not entitled to the Community design under Article 14;
- (d) if the Community design is in conflict with a prior design which has been made available to the public after the date of filing of the application or, if a priority is claimed, the date of priority of the Community design, and which is protected from a date prior to the said date by a registered Community design or an application for such a design, or by a registered design right of a Member State, or by an application for such a right;
- (e) if a distinctive sign is used in a subsequent design, and Community law or the law of the Member State governing that sign confers on the right holder of the sign the right to prohibit such use;
- (f) if the design constitutes an unauthorised use of a work protected under the copyright law of a Member State;
- (g) if the design constitutes an improper use of any of the items listed in Article 6ter of the "Paris Convention" for the Protection of Industrial Property hereafter referred to as the "Paris Convention", or of badges, emblems and escutcheons other than those covered by the said Article 6ter and which are of particular public interest in a Member State.

2. The ground provided for in paragraph (1)(c) may be invoked solely by the person who is entitled to the Community design under Article 14.

3. The grounds provided for in paragraph (1)(d), (e) and (f) may be invoked solely by the applicant for or holder of the earlier right.
4. The ground provided for in paragraph (1)(g) may be invoked solely by the person or entity concerned by the use.
5. Paragraphs 3 and 4 shall be without prejudice to the freedom of Member States to provide that the grounds provided for in paragraphs 1(d) and (g) may also be invoked by the appropriate authority of the Member State in question on its own initiative.
6. A registered Community design which has been declared invalid pursuant to paragraph (1)(b), (e), (f) or (g) may be maintained in an amended form, if in that form it complies with the requirements for protection and the identity of the design is retained. "Maintenance" in an amended form may include registration accompanied by a partial disclaimer by the holder of the registered Community design or entry in the register of a court decision or a decision by the Office declaring the partial invalidity of the registered Community design.

Article 26

Consequences of invalidity

1. A Community design shall be deemed not to have had, as from the outset, the effects specified in this Regulation, to the extent that it has been declared invalid.
2. Subject to the national provisions relating either to claims for compensation for damage caused by negligence or lack of good faith on the part of the holder of the Community design, or to unjust enrichment, the retroactive effect of invalidity of the Community design shall not affect:
 - (a) any decision on infringement which has acquired the authority of a final decision and been enforced prior to the invalidity decision;
 - (b) any contract concluded prior to the invalidity decision, in so far as it has been performed before the decision; however, repayment, to an extent justified by the circumstances, of sums paid under the relevant contract may be claimed on grounds of equity.

TITLE III

COMMUNITY DESIGNS AS OBJECTS OF PROPERTY

Article 27

Dealing with Community designs as national design rights

1. Unless Articles 28, 29, 30, 31 and 32 provide otherwise, a Community design as an object of property shall be dealt with in its entirety, and for the whole area of the Community, as a national design right of the Member State in which:
 - (a) the holder has his seat or his domicile on the relevant date; or
 - (b) where point (a) does not apply, the holder has an establishment on the relevant date.
2. In the case of a registered Community design, paragraph 1 shall apply according to the entries in the register.

3. In the case of joint holders, if two or more of them fulfil the condition under paragraph 1, the Member State referred to in that paragraph shall be determined:

- (a) in the case of an unregistered Community design, by reference to the relevant joint holder designated by them by common agreement;
- (b) in the case of a registered Community design, by reference to the first of the relevant joint holders in the order in which they are mentioned in the register.

4. Where paragraphs 1, 2 and 3 do not apply, the Member State referred to in paragraph 1 shall be the Member State in which the seat of the Office is situated.

Article 28

Transfer of the registered Community design

The transfer of a registered Community design shall be subject to the following provisions:

- (a) at the request of one of the parties, a transfer shall be entered in the register and published;
- (b) until such time as the transfer has been entered in the register, the successor in title may not invoke the rights arising from the registration of the Community design;
- (c) where there are time limits to be observed in dealings with the Office, the successor in title may make the corresponding statements to the Office once the request for registration of the transfer has been received by the Office;
- (d) all documents which by virtue of Article 66 require notification to the holder of the registered Community design shall be addressed by the Office to the person registered as holder or his representative, if one has been appointed.

Article 29

Rights in rem on a registered Community design

- 1. A registered Community design may be given as security or be the subject of rights in rem.
- 2. On request of one of the parties, the rights mentioned in paragraph 1 shall be entered in the register and published.

Article 30

Levy of execution

- 1. A registered Community design may be levied in execution.
- 2. As regards the procedure for levy of execution in respect of a registered Community design, the courts and authorities of the Member State determined in accordance with Article 27 shall have exclusive jurisdiction.
- 3. On request of one of the parties, levy of execution shall be entered in the register and published.

Article 31

Insolvency proceedings

1. The only insolvency proceedings in which a Community design may be involved shall be those opened in the Member State within the territory of which the centre of a debtor's main interests is situated.
2. In the case of joint proprietorship of a Community design, paragraph 1 shall apply to the share of the joint proprietor.
3. Where a Community design is involved in insolvency proceedings, on request of the competent national authority an entry to this effect shall be made in the register and published in the Community Designs Bulletin referred to in Article 73(1).

Article 32

Licensing

1. A Community design may be licensed for the whole or part of the Community. A licence may be exclusive or non-exclusive.
2. Without prejudice to any legal proceedings based on the law of contract, the holder may invoke the rights conferred by the Community design against a licensee who contravenes any provision in his licensing contract with regard to its duration, the form in which the design may be used, the range of products for which the licence is granted and the quality of products manufactured by the licensee.
3. Without prejudice to the provisions of the licensing contract, the licensee may bring proceedings for infringement of a Community design only if the right holder consents thereto. However, the holder of an exclusive licence may bring such proceedings if the right holder in the Community design, having been given notice to do so, does not himself bring infringement proceedings within an appropriate period.
4. A licensee shall, for the purpose of obtaining compensation for damage suffered by him, be entitled to intervene in an infringement action brought by the right holder in a Community design.
5. In the case of a registered Community design, the grant or transfer of a licence in respect of such right shall, at the request of one of the parties, be entered in the register and published.

Article 33

Effects vis-à-vis third parties

1. The effects vis-à-vis third parties of the legal acts referred to in Articles 28, 29, 30 and 32 shall be governed by the law of the Member State determined in accordance with Article 27.
2. However, as regards registered Community designs, legal acts referred to in Articles 28, 29 and 32 shall only have effect vis-à-vis third parties in all the Member States after entry in the register. Nevertheless, such an act, before it is so entered, shall have effect vis-à-vis third parties who have acquired rights in the registered Community design after the date of that act

but who knew of the act at the date on which the rights were acquired.

3. Paragraph 2 shall not apply to a person who acquires the registered Community design or a right concerning the registered Community design by way of transfer of the whole of the undertaking or by any other universal succession.

4. Until such time as common rules for the Member States in the field of insolvency enter into force, the effects vis-à-vis third parties of insolvency proceedings shall be governed by the law of the Member State in which such proceedings are first brought under the national law or the regulations applicable in this field.

Article 34

The application for a registered Community design as an object of property

1. An application for a registered Community design as an object of property shall be dealt with in its entirety, and for the whole area of the Community, as a national design right of the Member State determined in accordance with Article 27.

2. Articles 28, 29, 30, 31, 32 and 33 shall apply mutatis mutandis to applications for registered Community designs. Where the effect of one of these provisions is conditional upon an entry in the register, that formality shall be performed upon registration of the resulting registered Community design.

TITLE IV

APPLICATION FOR A REGISTERED COMMUNITY DESIGN

Section 1

Filing of applications and the conditions which govern them

Article 35

Filing and forwarding of applications

1. An application for a registered Community design shall be filed, at the option of the applicant:

- (a) at the Office; or
- (b) at the central industrial property office of a Member State; or
- (c) in the Benelux countries, at the Benelux Design Office.

2. Where the application is filed at the central industrial property office of a Member State or at the Benelux Design Office, that office shall take all steps to forward the application to the Office within two weeks after filing. It may charge the applicant a fee which shall not exceed the administrative costs of receiving and forwarding the application.

3. As soon as the Office has received an application which has been forwarded by a central industrial property office of a Member State or by the Benelux Design Office, it shall inform the applicant accordingly, indicating the date of its receipt at the Office.

4. No less than 10 years after the entry into force of this Regulation, the Commission shall draw up a report on the operation of the system of filing applications for registered Community designs,

accompanied by any proposals for revision that it may deem appropriate.

Article 36

Conditions with which applications must comply

1. An application for a registered Community design shall contain:

- (a) a request for registration;
 - (b) information identifying the applicant;
 - (c) a representation of the design suitable for reproduction. However, if the object of the application is a two-dimensional design and the application contains a request for deferment of publication in accordance with Article 50, the representation of the design may be replaced by a specimen.
2. The application shall further contain an indication of the products in which the design is intended to be incorporated or to which it is intended to be applied.
3. In addition, the application may contain:
- (a) a description explaining the representation or the specimen;
 - (b) a request for deferment of publication of the registration in accordance with Article 50;
 - (c) information identifying the representative if the applicant has appointed one;
 - (d) the classification of the products in which the design is intended to be incorporated or to which it is intended to be applied according to class;
 - (e) the citation of the designer or of the team of designers or a statement under the applicant's responsibility that the designer or the team of designers has waived the right to be cited.
4. The application shall be subject to the payment of the registration fee and the publication fee. Where a request for deferment under paragraph 3(b) is filed, the publication fee shall be replaced by the fee for deferment of publication.
5. The application shall comply with the conditions laid down in the implementing regulation.
6. The information contained in the elements mentioned in paragraph 2 and in paragraph 3(a) and (d) shall not affect the scope of protection of the design as such.

Article 37

Multiple applications

1. Several designs may be combined in one multiple application for registered Community designs. Except in cases of ornamentation, this possibility is subject to the condition that the products in which the designs are intended to be incorporated or to which they are intended to be applied all belong to the same class of the International Classification for Industrial Designs.
2. Besides the fees referred to in Article 36(4), the multiple application shall be subject to payment of an additional registration fee and an additional publication fee. Where the multiple application contains a request for deferment of publication, the additional publication fee shall be replaced by the additional fee for deferment of publication. The additional fees shall correspond

to a percentage of the basic fees for each additional design.

3. The multiple application shall comply with the conditions of presentation laid down in the implementing regulation.

4. Each of the designs contained in a multiple application or registration may be dealt with separately from the others for the purpose of applying this Regulation. It may in particular, separately from the others, be enforced, licensed, be the subject of a right in rem, a levy of execution or insolvency proceedings, be surrendered, renewed or assigned, be the subject of deferred publication or be declared invalid. A multiple application or registration may be divided into separate applications or registrations only under the conditions set out in the implementing regulation.

Article 38

Date of filing

1. The date of filing of an application for a registered Community design shall be the date on which documents containing the information specified in Article 36(1) are filed with the Office by the applicant, or, if the application has been filed with the central industrial property office of a Member State or with the Benelux Design Office, with that office.

2. By derogation from paragraph 1, the date of filing of an application filed with the central industrial property office of a Member State or with the Benelux Design Office and reaching the Office more than two months after the date on which documents containing the information specified in Article 36(1) have been filed shall be the date of receipt of such documents by the Office.

Article 39

Equivalence of Community filing with national filing

An application for a registered Community design which has been accorded a date of filing shall, in the Member States, be equivalent to a regular national filing, including where appropriate the priority claimed for the said application.

Article 40

Classification

For the purpose of this Regulation, use shall be made of the Annex to the Agreement establishing an International Classification for Industrial Designs, signed at Locarno on 8 October 1968.

Section 2

Priority

Article 41

Right of priority

1. A person who has duly filed an application for a design right or for a utility model in or for any State party to the Paris Convention for the Protection of Industrial Property, or to the Agreement establishing the World Trade Organisation, or his successors in title, shall enjoy, for the purpose of filing an application for a registered Community design in respect of the same design or utility model, a right of priority of six months from the date of filing of the first application.
2. Every filing that is equivalent to a regular national filing under the national law of the State where it was made or under bilateral or multilateral agreements shall be recognised as giving rise to a right of priority.
3. "Regular national filing" means any filing that is sufficient to establish the date on which the application was filed, whatever may be the outcome of the application.
4. A subsequent application for a design which was the subject of a previous first application, and which is filed in or in respect of the same State, shall be considered as the first application for the purpose of determining priority, provided that, at the date of the filing of the subsequent application, the previous application has been withdrawn, abandoned or refused without being open to public inspection and without leaving any rights outstanding, and has not served as a basis for claiming priority. The previous application may not thereafter serve as a basis for claiming a right of priority.
5. If the first filing has been made in a State which is not a party to the Paris Convention, or to the Agreement establishing the World Trade Organisation, paragraphs 1 to 4 shall apply only in so far as that State, according to published findings, grants, on the basis of a filing made at the Office and subject to conditions equivalent to those laid down in this Regulation, a right of priority having equivalent effect.

Article 42

Claiming priority

An applicant for a registered Community design desiring to take advantage of the priority of a previous application shall file a declaration of priority and a copy of the previous application. If the language of the latter is not one of the languages of the Office, the Office may require a translation of the previous application in one of those languages.

Article 43

Effect of priority right

The effect of the right of priority shall be that the date of priority shall count as the date of the filing of the application for a registered Community design for the purpose of Articles 5, 6, 7, 22, 25(1)(d) and 50(1).

Article 44

Exhibition priority

1. If an applicant for a registered Community design has disclosed products in which the design is incorporated, or to which it is applied, at an official or officially recognised international exhibition falling within the terms of the Convention on International Exhibitions signed in Paris on 22 November 1928 and last revised on 30 November 1972, he may, if he files the application within a period of six months from the date of the first disclosure of such products, claim a right of priority from that date within the meaning of Article 43.

2. An applicant who wishes to claim priority pursuant to paragraph 1, under the conditions laid down in the implementing regulation, must file evidence that he has disclosed at an exhibition the products in or to which the design is incorporated or applied.

3. An exhibition priority granted in a Member State or in a third country does not extend the period of priority laid down in Article 41.

TITLE V

REGISTRATION PROCEDURE

Article 45

Examination as to formal requirements for filing

1. The Office shall examine whether the application complies with the requirements laid down in Article 36(1) for the accordancy of a date of filing.

2. The Office shall examine whether:

- (a) the application complies with the other requirements laid down in Article 36(2), (3), (4) and (5) and, in the case of a multiple application, Article 37(1) and (2);
- (b) the application meets the formal requirements laid down in the implementing regulation for the implementation of Articles 36 and 37;
- (c) the requirements of Article 77(2) are satisfied;
- (d) the requirements concerning the claim to priority are satisfied, if a priority is claimed.

3. The conditions for the examination as to the formal requirements for filing shall be laid down in the implementing regulation.

Article 46

Remediable deficiencies

1. Where, in carrying out the examination under Article 45, the Office notes that there are deficiencies which may be corrected, the Office shall request the applicant to remedy them within the prescribed period.

2. If the deficiencies concern the requirements referred to in Article 36(1) and the applicant complies with the Office's request within the prescribed period, the Office shall accord as the date of filing the date on which the deficiencies are remedied. If the deficiencies are not remedied within the prescribed period, the application shall not be dealt with as an application for a registered Community design.

3. If the deficiencies concern the requirements, including the payment of fees, as referred to in Article 45(2)(a), (b) and (c) and the applicant complies with the Office's request within the prescribed period, the Office shall accord as the date of filing the date on which the application was originally filed. If the deficiencies or the default in payment are not remedied within the prescribed period, the Office shall refuse the application.

4. If the deficiencies concern the requirements referred to in Article 45(2)(d), failure to remedy them within the prescribed period shall result in the loss of the right of priority for the application.

Article 47

Grounds for non-registrability

1. If the Office, in carrying out the examination pursuant to Article 45, notices that the design for which protection is sought:

(a) does not correspond to the definition under Article 3(a); or

(b) is contrary to public policy or to accepted principles of morality, it shall refuse the application.

2. The application shall not be refused before the applicant has been allowed the opportunity of withdrawing or amending the application or of submitting his observations.

Article 48

Registration

If the requirements that an application for a registered Community design must satisfy have been fulfilled and to the extent that the application has not been refused by virtue of Article 47, the Office shall register the application in the Community design Register as a registered Community design. The registration shall bear the date of filing of the application referred to in Article 38.

Article 49

Publication

Upon registration, the Office shall publish the registered Community design in the Community Designs Bulletin as mentioned in Article 73(1). The contents of the publication shall be set out in the implementing regulation.

Article 50

Deferment of publication

1. The applicant for a registered Community design may request, when filing the application, that the publication of the registered Community design be deferred for a period of 30 months from the date of filing the application or, if a priority is claimed, from the date of priority.

2. Upon such request, where the conditions set out in Article 48 are satisfied, the registered Community design shall be registered, but neither the representation of the design nor any file relating to the application shall, subject to Article 74(2), be open to public inspection.

3. The Office shall publish in the Community Designs Bulletin a mention of the deferment of the publication of the registered Community design. The mention shall be accompanied by information identifying the right holder in the registered Community design, the date of filing the application and any other particulars prescribed by the implementing regulation.

4. At the expiry of the period of deferment, or at any earlier date on request by the right holder, the Office shall open to public inspection all the entries in the register and the file relating to the application and shall publish the registered Community design in the Community Designs Bulletin, provided that, within the time limit laid down in the implementing regulation:

- (a) the publication fee and, in the event of a multiple application, the additional publication fee are paid;
- (b) where use has been made of the option pursuant to Article 36(1)(c), the right holder has filed with the Office a representation of the design.

If the right holder fails to comply with these requirements, the registered Community design shall be deemed from the outset not to have had the effects specified in this Regulation.

5. In the case of multiple applications, paragraph 4 need only be applied to some of the designs included therein.

6. The institution of legal proceedings on the basis of a registered Community design during the period of deferment of publication shall be subject to the condition that the information contained in the register and in the file relating to the application has been communicated to the person against whom the action is brought.

TITLE VI

SURRENDER AND INVALIDITY OF THE REGISTERED COMMUNITY DESIGN

Article 51

Surrender

1. The surrender of a registered Community design shall be declared to the Office in writing by the right holder. It shall not have effect until it has been entered in the register.

2. If a Community design which is subject to deferment of publication is surrendered it shall be deemed from the outset not to have had the effects specified in this Regulation.

3. A registered Community design may be partially surrendered provided that its amended form complies with the requirements for protection and the identity of the design is retained.

4. Surrender shall be registered only with the agreement of the proprietor of a right entered in the register. If a licence has been registered, surrender shall be entered in the register only if the right holder in the registered Community design proves that he has informed the licensee of his intention to surrender. This entry shall be made on expiry of the period prescribed by the implementing regulation.

5. If an action pursuant to Article 14 relating to the entitlement to a registered Community design has been brought before a Community design court, the Office shall not enter the surrender in the

register without the agreement of the claimant.

Article 52

Application for a declaration of invalidity

1. Subject to Article 25(2), (3), (4) and (5), any natural or legal person, as well as a public authority empowered to do so, may submit to the Office an application for a declaration of invalidity of a registered Community design.
2. The application shall be filed in a written reasoned statement. It shall not be deemed to have been filed until the fee for an application for a declaration of invalidity has been paid.
3. An application for a declaration of invalidity shall not be admissible if an application relating to the same subject matter and cause of action, and involving the same parties, has been adjudicated on by a Community design court and has acquired the authority of a final decision.

Article 53

Examination of the application

1. If the Office finds that the application for a declaration of invalidity is admissible, the Office shall examine whether the grounds for invalidity referred to in Article 25 prejudice the maintenance of the registered Community design.
2. In the examination of the application, which shall be conducted in accordance with the implementing regulation, the Office shall invite the parties, as often as necessary, to file observations, within a period to be fixed by the Office, on communications from the other parties or issued by itself.
3. The decision declaring the registered Community design invalid shall be entered in the register upon becoming final.

Article 54

Participation in the proceedings of the alleged infringer

1. In the event of an application for a declaration of invalidity of a registered Community design being filed, and as long as no final decision has been taken by the Office, any third party who proves that proceedings for infringement of the same design have been instituted against him may be joined as a party in the invalidity proceedings on request submitted within three months of the date on which the infringement proceedings were instituted.

The same shall apply in respect of any third party who proves both that the right holder of the Community design has requested that he cease an alleged infringement of the design and that he has instituted proceedings for a court ruling that he is not infringing the Community design.

2. The request to be joined as a party shall be filed in a written reasoned statement. It shall not be deemed to have been filed until the invalidity fee, referred to in Article 52(2), has been paid. Thereafter the request shall, subject to any exceptions laid down in the implementing regulation, be treated as an application for a declaration of invalidity.

TITLE VII

APPEALS

Article 55

Decisions subject to appeal

1. An appeal shall lie from decisions of the examiners, the Administration of Trade Marks and Designs and Legal Division and Invalidity Divisions. It shall have suspensive effect.
2. A decision which does not terminate proceedings as regards one of the parties can only be appealed together with the final decision, unless the decision allows separate appeal.

Article 56

Persons entitled to appeal and to be parties to appeal proceedings

Any party to proceedings adversely affected by a decision may appeal. Any other parties to the proceedings shall be parties to the appeal proceedings as of right.

Article 57

Time limit and form of appeal

Notice of appeal must be filed in writing at the Office within two months after the date of notification of the decision appealed from. The notice shall be deemed to have been filed only when the fee for appeal has been paid. Within four months after the date of notification of the decision, a written statement setting out the grounds of appeal must be filed.

Article 58

Interlocutory revision

1. If the department whose decision is contested considers the appeal to be admissible and well founded, it shall rectify its decision. This shall not apply where the appellant is opposed by another party to the proceedings.
2. If the decision is not rectified within one month after receipt of the statement of grounds, the appeal shall be remitted to the Board of Appeal without delay and without comment as to its merits.

Article 59

Examination of appeals

1. If the appeal is admissible, the Board of Appeal shall examine whether the appeal is to be allowed.
2. In the examination of the appeal, the Board of Appeal shall invite the parties, as often as necessary, to file observations, within a period to be fixed by the Board of Appeal, on communications from the other parties or issued by itself.

Article 60

Decisions in respect of appeals

1. Following the examination as to the merits of the appeal, the Board of Appeal shall decide on the appeal. The Board of Appeal may either exercise any power within the competence of the department which was responsible for the decision appealed against or remit the case to that department for further prosecution.
2. If the Board of Appeal remits the case for further prosecution to the department whose decision was appealed, that department shall be bound by the ratio decidendi of the Board of Appeal, in so far as the facts are the same.
3. The decisions of the Boards of Appeal shall take effect only from the date of expiry of the period referred to in Article 61(5) or, if an action has been brought before the Court of Justice within that period, from the date of rejection of such action.

Article 61

Actions before the Court of Justice

1. Actions may be brought before the Court of Justice against decisions of the Boards of Appeal on appeals.
2. The action may be brought on grounds of lack of competence, infringement of an essential procedural requirement, infringement of the Treaty, of this Regulation or of any rule of law relating to their application or misuse of power.
3. The Court of Justice has jurisdiction to annul or to alter the contested decision.
4. The action shall be open to any party to proceedings before the Board of Appeal adversely affected by its decision.
5. The action shall be brought before the Court of Justice within two months of the date of notification of the decision of the Board of Appeal.
6. The Office shall be required to take the necessary measures to comply with the judgment of the Court of Justice.

TITLE VIII

PROCEDURE BEFORE THE OFFICE

Section 1

General provisions

Article 62

Statement of reasons on which decisions are based

Decisions of the Office shall state the reasons on which they are based. They shall be based only on reasons or evidence on which the parties concerned have had an opportunity to present their comments.

Article 63

Examination of the facts by the Office of its own motion

1. In proceedings before it the Office shall examine the facts of its own motion. However, in proceedings relating to a declaration of invalidity, the Office shall be restricted in this examination to the facts, evidence and arguments provided by the parties and the relief sought.

2. The Office may disregard facts or evidence which are not submitted in due time by the parties concerned.

Article 64

Oral proceedings

1. If the Office considers that oral proceedings would be expedient, they shall be held either at the instance of the Office or at the request of any party to the proceedings.

2. Oral proceedings, including delivery of the decision, shall be public, unless the department before which the proceedings are taking place decides otherwise in cases where admission of the public could have serious and unjustified disadvantages, in particular for a party to the proceedings.

Article 65

Taking of evidence

1. In any proceedings before the Office the means of giving or obtaining evidence shall include the following:

- (a) hearing the parties;
- (b) requests for information;
- (c) the production of documents and items of evidence;
- (d) hearing witnesses;
- (e) opinions by experts;
- (f) statements in writing, sworn or affirmed or having a similar effect under the law of the State in which the statement is drawn up.

2. The relevant department of the Office may commission one of its members to examine the evidence

adduced.

3. If the Office considers it necessary for a party, witness or expert to give evidence orally, it shall issue a summons to the person concerned to appear before it.

4. The parties shall be informed of the hearing of a witness or expert before the Office. They shall have the right to be present and to put questions to the witness or expert.

Article 66

Notification

The Office shall, as a matter of course, notify those concerned of decisions and summonses and of any notice or other communication from which a time limit is reckoned, or of which those concerned must be notified under other provisions of this Regulation or of the implementing regulation, or of which notification has been ordered by the President of the Office.

Article 67

Restitutio in integrum

1. The applicant for or holder of a registered Community design or any other party to proceedings before the Office who, in spite of all due care required by the circumstances having been taken, was unable to observe a time limit vis-à-vis the Office shall, upon application, have his rights re-established if the non-observance in question has the direct consequence, by virtue of the provisions of this Regulation, of causing the loss of any rights or means of redress.

2. The application must be filed in writing within two months of the removal of the cause of non-compliance with the time limit. The omitted act must be completed within this period. The application shall only be admissible within the year immediately following the expiry of the unobserved time limit. In the case of non-submission of the request for renewal of registration or of non-payment of a renewal fee, the further period of six months provided for in the second sentence of Article 13(3) shall be deducted from the period of one year.

3. The application must state the grounds on which it is based and must set out the facts on which it relies. It shall not be deemed to be filed until the fee for the re-establishment of rights has been paid.

4. The department competent to decide on the omitted act shall decide upon the application.

5. The provisions of this Article shall not be applicable to the time limits referred to in paragraph 2 and Article 41(1).

6. Where the applicant for or holder of a registered Community design has his rights re-established, he may not invoke his rights vis-à-vis a third party who, in good faith, in the course of the period between the loss of rights in the application for or registration of the registered Community design and publication of the mention of re-establishment of those rights, has put on the market products in which a design included within the scope of protection of the registered Community design is incorporated or to which it is applied.

7. A third party who may avail himself of the provisions of paragraph 6 may bring third party proceedings against the decision re-establishing the rights of the applicant for or holder of the registered

Community design within a period of two months as from the date of publication of the mention of re-establishment of those rights.

8. Nothing in this Article shall limit the right of a Member State to grant restitutio in integrum in respect of time limits provided for in this Regulation and to be complied with vis-à-vis the authorities of such State.

Article 68

Reference to general principles

In the absence of procedural provisions in this Regulation, the implementing regulation, the fees regulation or the rules of procedure of the Boards of Appeal, the Office shall take into account the principles of procedural law generally recognised in the Member States.

Article 69

Termination of financial obligations

1. Rights of the Office to the payment of fees shall be barred four years from the end of the calendar year in which the fee fell due.
2. Rights against the Office for the refunding of fees or sums of money paid in excess of a fee shall be barred after four years from the end of the calendar year in which the right arose.
3. The periods laid down in paragraphs 1 and 2 shall be interrupted, in the case covered by paragraph 1, by a request for payment of the fee and, in the case covered by paragraph 2, by a reasoned claim in writing. On interruption it shall begin again immediately and shall end at the latest six years after the end of the year in which it originally began, unless in the meantime judicial proceedings to enforce the right have begun. In this case the period shall end at the earliest one year after the judgment has acquired the authority of a final decision.

Section 2

Costs

Article 70

Apportionment of costs

1. The losing party in proceedings for a declaration of invalidity of a registered Community design or appeal proceedings shall bear the fees incurred by the other party as well as all costs incurred by him essential to the proceedings, including travel and subsistence and the remuneration of an agent, adviser or advocate, within the limits of scales set for each category of costs under the conditions laid down in the implementing regulation.
2. However, where each party succeeds on some and fails on other heads, or if reasons of equity so dictate, the Invalidity Division or Board of Appeal shall decide a different apportionment of costs.

3. A party who terminates the proceedings by surrendering the registered Community design or by not renewing its registration or by withdrawing the application for a declaration of invalidity or the appeal, shall bear the fees and the costs incurred by the other party as stipulated in paragraphs 1 and 2.

4. Where a case does not proceed to judgment, the costs shall be at the discretion of the Invalidity Division or Board of Appeal.

5. Where the parties conclude before the Invalidity Division or Board of Appeal a settlement of costs differing from that provided for in paragraphs 1, 2, 3 and 4, the body concerned shall take note of that agreement.

6. On request, the registry of the Invalidity Division or Board of Appeal shall fix the amount of the costs to be paid pursuant to the preceding paragraphs. The amount so determined may be reviewed by a decision of the Invalidity Division or Board of Appeal on a request filed within the period prescribed by the implementing regulation.

Article 71

Enforcement of decisions fixing the amount of costs

1. Any final decision of the Office fixing the amount of costs shall be enforceable.

2. Enforcement shall be governed by the rules of civil procedure in force in the State in the territory of which it is carried out. The order for its enforcement shall be appended to the decision, without any other formality than verification of the authenticity of the decision, by the national authority which the government of each Member State shall designate for this purpose and shall make known to the Office and to the Court of Justice.

3. When these formalities have been completed on application by the party concerned, the latter may proceed to enforcement in accordance with the national law, by bringing the matter directly before the competent authority.

4. Enforcement may be suspended only by a decision of the Court of Justice. However, the courts of the Member State concerned shall have jurisdiction over complaints that enforcement is being carried out in an irregular manner.

Section 3

Informing the public and the official authorities of the Member States

Article 72

Register of Community designs

The Office shall keep a register to be known as the register of Community designs, which shall contain those particulars of which the registration is provided for by this Regulation or by the implementing regulation. The register shall be open to public inspection, except to the extent that Article 50(2) provides otherwise.

Article 73

Periodical publications

1. This Office shall periodically publish a Community Designs Bulletin containing entries open to public inspection in the register as well as other particulars the publication of which is prescribed by this Regulation or by the implementing regulation.
2. Notices and information of a general character issued by the President of the Office, as well as any other information relevant to this Regulation or its implementation, shall be published in the Official Journal of the Office.

Article 74

Inspection of files

1. The files relating to applications for registered Community designs which have not yet been published or the files relating to registered Community designs which are subject to deferment of publication in accordance with Article 50 or which, being subject to such deferment, have been surrendered before or on the expiry of that period, shall not be made available for inspection without the consent of the applicant for or the right holder in the registered Community design.
2. Any person who can establish a legitimate interest may inspect a file without the consent of the applicant for or holder of the registered Community design prior to the publication or after the surrender of the latter in the case provided for in paragraph 1.

This shall in particular apply if the interested person proves that the applicant for or the holder of the registered Community design has taken steps with a view to invoking against him the right under the registered Community design.

3. Subsequent to the publication of the registered Community design, the file may be inspected on request.
4. However, where a file is inspected pursuant to paragraph 2 or 3, certain documents in the file may be withheld from inspection in accordance with the provisions of the implementing regulation.

Article 75

Administrative cooperation

Unless otherwise provided in this Regulation or in national laws, the Office and the courts or authorities of the Member States shall on request give assistance to each other by communicating information or opening files for inspection.

Where the Office opens files to inspection by courts, public prosecutors' offices or central industrial property offices, the inspection shall not be subject to the restrictions laid down in Article 74.

Article 76

Exchange of publications

1. The Office and the central industrial property offices of the Member States shall despatch to each other on request and for their own use one or more copies of their respective publications free of charge.
2. The Office may conclude agreements relating to the exchange or supply of publications.

Section 4

Representation

Article 77

General principles of representation

1. Subject to paragraph 2, no person shall be compelled to be represented before the Office.
2. Without prejudice to the second subparagraph of paragraph 3, natural or legal persons not having either their domicile or their principal place of business or a real and effective industrial or commercial establishment in the Community must be represented before the Office in accordance with Article 78(1) in all proceedings before the Office established by this Regulation, other than in filing an application for a registered Community design; the implementing regulation may permit other exceptions.
3. Natural or legal persons having their domicile or principal place of business or a real and effective industrial or commercial establishment in the Community may be represented before the Office by one of their employees, who must file with it a signed authorisation for inclusion in the files, the details of which are set out in the implementing regulation.

An employee of a legal person to which this paragraph applies may also represent other legal persons which have economic connections with the first legal person, even if those other legal persons have neither their domicile nor their principal place of business nor a real and effective industrial or commercial establishment within the Community.

Article 78

Professional representation

1. Representation of natural or legal persons in proceedings before the Office under this Regulation may only be undertaken by:
 - (a) any legal practitioner qualified in one of the Member States and having his place of business within the Community, to the extent that he is entitled, within the said State, to act as a representative in industrial property matters; or
 - (b) any professional representatives whose name has been entered on the list of professional representatives referred to in Article 89(1)(b) of the Regulation on the Community [trade mark](#); or

- (c) persons whose names are entered on the special list of professional representatives for design matters referred to in paragraph 4.
2. The persons referred to in paragraph 1(c) shall only be entitled to represent third persons in proceedings on design matters before the Office.
3. The implementing regulation shall provide whether and under what conditions representatives must file with the Office a signed authorisation for insertion on the files.
4. Any natural person may be entered on the special list of professional representatives in design matters, if he fulfils the following conditions:
- (a) he must be a national of one of the Member States;
- (b) he must have his place of business or employment in the Community;
- (c) he must be entitled to represent natural or legal persons in design matters before the central industrial property office of a Member State or before the Benelux Design Office. Where, in that State, the entitlement to represent in design matters is not conditional upon the requirement of special professional qualifications, persons applying to be entered on the list must have habitually acted in design matters before the central industrial property office of the said State for at least five years. However, persons whose professional qualification to represent natural or legal persons in design matters before the central industrial property office of one of the Member States is officially recognised in accordance with the regulations laid by such State shall not be subject to the condition of having exercised the profession.
5. Entry on the list referred to in paragraph 4 shall be effected upon request, accompanied by a certificate furnished by the central industrial property office of the Member State concerned, which must indicate that the conditions laid down in the said paragraph are fulfilled.
6. The President of the Office may grant exemption from:
- (a) the requirement of paragraph 4(a) in special circumstances;
- (b) the requirement of paragraph 4(c), second sentence, if the applicant furnishes proof that he has acquired the requisite qualification in another way.
7. The conditions under which a person may be removed from the list shall be laid down in the implementing regulation.

TITLE IX

JURISDICTION AND PROCEDURE IN LEGAL ACTIONS RELATING TO COMMUNITY DESIGNS

Section 1

Jurisdiction and enforcement

Article 79

Application of the Convention on Jurisdiction and Enforcement

1. Unless otherwise specified in this Regulation, the Convention on Jurisdiction and the Enforcement of Judgements in Civil and Commercial Matters, signed in Brussels on 27 September 1968(7), hereinafter referred to as the "Convention on Jurisdiction and Enforcement", shall apply to proceedings relating to Community designs and applications for registered Community designs, as well as to proceedings relating to actions on the basis of Community designs and national designs enjoying simultaneous

protection.

2. The provisions of the Convention on Jurisdiction and Enforcement which are rendered applicable by the paragraph 1 shall have effect in respect of any Member State solely in the text which is in force in respect of that State at any given time.

3. In the event of proceedings in respect of the actions and claims referred to in Article 85:

- (a) Articles 2, 4, 5(1), (3), (4) and (5), 16(4) and 24 of the Convention on Jurisdiction and Enforcement shall not apply;
- (b) Articles 17 and 18 of that Convention shall apply subject to the limitations in Article 82(4) of this Regulation;
- (c) the provisions of Title II of that Convention which are applicable to persons domiciled in a Member State shall also be applicable to persons who do not have a domicile in any Member State but have an establishment therein.

4. The provisions of the Convention on Jurisdiction and Enforcement shall not have effect in respect of any Member State for which that Convention has not yet entered into force. Until such entry into force, proceedings referred to in paragraph 1 shall be governed in such a Member State by any bilateral or multilateral convention governing its relationship with another Member State concerned, or, if no such convention exists, by its domestic law on jurisdiction, recognition and enforcement of decisions.

Section 2

Disputes concerning the infringement and validity of Community designs

Article 80

Community design courts

1. The Member States shall designate in their territories as limited a number as possible of national courts and tribunals of first and second instance (Community design courts) which shall perform the functions assigned to them by this Regulation.
2. Each Member State shall communicate to the Commission not later than 6 March 2005 a list of Community design courts, indicating their names and their territorial jurisdiction.
3. Any change made after communication of the list referred to in paragraph 2 in the number, names or territorial jurisdiction of the Community design courts shall be notified without delay by the Member State concerned to the Commission.
4. The information referred to in paragraphs 2 and 3 shall be notified by the Commission to the Member States and published in the Official Journal of the European Communities.
5. As long as a Member State has not communicated the list as stipulated in paragraph 2, jurisdiction for any proceedings resulting from an action covered by Article 81 for which the courts of that State have jurisdiction pursuant to Article 82 shall lie with that court of the State in question which would have jurisdiction *ratione loci* and *ratione materiae* in the case of proceedings relating to a national design right of that State.

Article 81

Jurisdiction over infringement and validity

The Community design courts shall have exclusive jurisdiction:

- (a) for infringement actions and - if they are permitted under national law - actions in respect of threatened infringement of Community designs;
- (b) for actions for declaration of non-infringement of Community designs, if they are permitted under national law;
- (c) for actions for a declaration of invalidity of an unregistered Community design;
- (d) for counterclaims for a declaration of invalidity of a Community design raised in connection with actions under (a).

Article 82

International jurisdiction

1. Subject to the provisions of this Regulation and to any provisions of the Convention on Jurisdiction and Enforcement applicable by virtue of Article 79, proceedings in respect of the actions and claims referred to in Article 81 shall be brought in the courts of the Member State in which the defendant is domiciled or, if he is not domiciled in any of the Member States, in any Member State in which he has an establishment.

2. If the defendant is neither domiciled nor has an establishment in any of the Member States, such proceedings shall be brought in the courts of the Member State in which the plaintiff is domiciled or, if he is not domiciled in any of the Member States, in any Member State in which he has an establishment.

3. If neither the defendant nor the plaintiff is so domiciled or has such an establishment, such proceedings shall be brought in the courts of the Member State where the Office has its seat.

4. Notwithstanding paragraphs 1, 2 and 3:

- (a) Article 17 of the Convention on Jurisdiction and Enforcement shall apply if the parties agree that a different Community design court shall have jurisdiction;
- (b) Article 18 of that Convention shall apply if the defendant enters an appearance before a different Community design court.

5. Proceedings in respect of the actions and claims referred to in Article 81(a) and (d) may also be brought in the courts of the Member State in which the act of infringement has been committed or threatened.

Article 83

Extent of jurisdiction on infringement

1. A Community design court whose jurisdiction is based on Article 82(1), (2) (3) or (4) shall

have jurisdiction in respect of acts of infringement committed or threatened within the territory of any of the Member States.

2. A Community design court whose jurisdiction is based on Article 82(5) shall have jurisdiction only in respect of acts of infringement committed or threatened within the territory of the Member State in which that court is situated.

Article 84

Action or counterclaim for a declaration of invalidity of a Community design

1. An action or a counterclaim for a declaration of invalidity of a Community design may only be based on the grounds for invalidity mentioned in Article 25.

2. In the cases referred to in Article 25(2), (3), (4) and (5) the action or the counterclaim may be brought solely by the person entitled under those provisions.

3. If the counterclaim is brought in a legal action to which the right holder of the Community design is not already a party, he shall be informed thereof and may be joined as a party to the action in accordance with the conditions set out in the law of the Member State where the court is situated.

4. The validity of a Community design may not be put in issue in an action for a declaration of non-infringement.

Article 85

Presumption of validity - defence as to the merits

1. In proceedings in respect of an infringement action or an action for threatened infringement of a registered Community design, the Community design court shall treat the Community design as valid. Validity may be challenged only with a counterclaim for a declaration of invalidity. However, a plea relating to the invalidity of a Community design, submitted otherwise than by way of counterclaim, shall be admissible in so far as the defendant claims that the Community design could be declared invalid on account of an earlier national design right, within the meaning of Article 25(1)(d), belonging to him.

2. In proceedings in respect of an infringement action or an action for threatened infringement of an unregistered Community design, the Community design court shall treat the Community design as valid if the right holder produces proof that the conditions laid down in Article 11 have been met and indicates what constitutes the individual character of his Community design. However, the defendant may contest its validity by way of a plea or with a counterclaim for a declaration of invalidity.

Article 86

Judgements of invalidity

1. Where in a proceeding before a Community design court the Community design has been put in

issue by way of a counterclaim for a declaration of invalidity:

- (a) if any of the grounds mentioned in Article 25 are found to prejudice the maintenance of the Community design, the court shall declare the Community design invalid;
- (b) if none of the grounds mentioned in Article 25 is found to prejudice the maintenance of the Community design, the court shall reject the counterclaim.

2. The Community design court with which a counterclaim for a declaration of invalidity of a registered Community design has been filed shall inform the Office of the date on which the counterclaim was filed. The latter shall record this fact in the register.

3. The Community design court hearing a counterclaim for a declaration of invalidity of a registered Community design may, on application by the right holder of the registered Community design and after hearing the other parties, stay the proceedings and request the defendant to submit an application for a declaration of invalidity to the Office within a time limit which the court shall determine. If the application is not made within the time limit, the proceedings shall continue; the counterclaim shall be deemed withdrawn. Article 91(3) shall apply.

4. Where a Community design court has given a judgment which has become final on a counterclaim for a declaration of invalidity of a registered Community design, a copy of the judgment shall be sent to the Office. Any party may request information about such transmission. The Office shall mention the judgment in the register in accordance with the provisions of the implementing regulation.

5. No counterclaim for a declaration of invalidity of a registered Community design may be made if an application relating to the same subject matter and cause of action, and involving the same parties, has already been determined by the Office in a decision which has become final.

Article 87

Effects of the judgement on invalidity

When it has become final, a judgment of a Community design court declaring a Community design invalid shall have in all the Member States the effects specified in Article 26.

Article 88

Applicable law

1. The Community design courts shall apply the provisions of this Regulation.
2. On all matters not covered by this Regulation, a Community design court shall apply its national law, including its private international law.
3. Unless otherwise provided in this Regulation, a Community design court shall apply the rules of procedure governing the same type of action relating to a national design right in the Member State where it is situated.

Article 89

Sanctions in actions for infringement

1. Where in an action for infringement or for threatened infringement a Community design court finds that the defendant has infringed or threatened to infringe a Community design, it shall, unless there are special reasons for not doing so, order the following measures:

- (a) an order prohibiting the defendant from proceeding with the acts which have infringed or would infringe the Community design;
- (b) an order to seize the infringing products;
- (c) an order to seize materials and implements predominantly used in order to manufacture the infringing goods, if their owner knew the effect for which such use was intended or if such effect would have been obvious in the circumstances;
- (d) any order imposing other sanctions appropriate under the circumstances which are provided by the law of the Member State in which the acts of infringement or threatened infringement are committed, including its private international law.

2. The Community design court shall take such measures in accordance with its national law as are aimed at ensuring that the orders referred to in paragraph 1 are complied with.

Article 90

Provisional measures, including protective measures

1. Application may be made to the courts of a Member State, including Community design courts, for such provisional measures, including protective measures, in respect of a Community design as may be available under the law of that State in respect of national design rights even if, under this Regulation, a Community design court of another Member State has jurisdiction as to the substance of the matter.

2. In proceedings relating to provisional measures, including protective measures, a plea otherwise than by way of counterclaim relating to the invalidity of a Community design submitted by the defendant shall be admissible. Article 85(2) shall, however, apply *mutatis mutandis*.

3. A Community design court whose jurisdiction is based on Article 82(1), (2), (3) or (4) shall have jurisdiction to grant provisional measures, including protective measures, which, subject to any necessary procedure for recognition and enforcement pursuant to Title III of the Convention on Jurisdiction and Enforcement, are applicable in the territory of any Member State. No other court shall have such jurisdiction.

Article 91

Specific rules on related actions

1. A Community design court hearing an action referred to in Article 81, other than an action for a declaration of non-infringement, shall, unless there are special grounds for continuing the hearing, of its own motion after hearing the parties, or at the request of one of the parties and after hearing the other parties, stay the proceedings where the validity of the Community design is already in issue before another Community design court on account of a counterclaim or, in the case of a registered Community design, where an application for a declaration of invalidity has

already been filed at the Office.

2. The Office, when hearing an application for a declaration of invalidity of a registered Community design, shall, unless there are special grounds for continuing the hearing, of its own motion after hearing the parties, or at the request of one of the parties and after hearing the other parties, stay the proceedings where the validity of the registered Community design is already in issue on account of a counterclaim before a Community design court. However, if one of the parties to the proceedings before the Community design court so requests, the court may, after hearing the other parties to these proceedings, stay the proceedings. The Office shall in this instance continue the proceedings pending before it.

3. Where the Community design court stays the proceedings it may order provisional measures, including protective measures, for the duration of the stay.

Article 92

Jurisdiction of Community design courts of second instance - further appeal

1. An appeal to the Community design courts of second instance shall lie from judgments of the Community design courts of first instance in respect of proceedings arising from the actions and claims referred to in Article 81.

2. The conditions under which an appeal may be lodged with a Community design court of second instance shall be determined by the national law of the Member State in which that court is located.

3. The national rules concerning further appeal shall be applicable in respect of judgments of Community design courts of second instance.

Section 3

Other disputes concerning Community designs

Article 93

Supplementary provisions on the jurisdiction of national courts other than Community design courts

1. Within the Member State whose courts have jurisdiction under Article 79(1) or (4), those courts shall have jurisdiction for actions relating to Community designs other than those referred to in Article 81 which would have jurisdiction *ratione loci* and *ratione materiae* in the case of actions relating to a national design right in that State.

2. Actions relating to a Community design, other than those referred to in Article 81, for which no court has jurisdiction pursuant to Article 79(1) and (4) and paragraph 1 of this Article may be heard before the courts of the Member State in which the Office has its seat.

Article 94

Obligation of the national court

A national court which is dealing with an action relating to a Community design other than the

actions referred to in Article 81 shall treat the design as valid. Articles 85(2) and 90(2) shall, however, apply *mutatis mutandis*.

TITLE X

EFFECTS ON THE LAWS OF THE MEMBER STATES

Article 95

Parallel actions on the basis of Community designs and national design rights

1. Where actions for infringement or for threatened infringement involving the same cause of action and between the same parties are brought before the courts of different Member States, one seized on the basis of a Community design and the other seized on the basis of a national design right providing simultaneous protection, the court other than the court first seized shall of its own motion decline jurisdiction in favour of that court. The court which would be required to decline jurisdiction may stay its proceedings if the jurisdiction of the other court is contested.
2. The Community design court hearing an action for infringement or threatened infringement on the basis of a Community design shall reject the action if a final judgment on the merits has been given on the same cause of action and between the same parties on the basis of a design right providing simultaneous protection.
3. The court hearing an action for infringement or for threatened infringement on the basis of a national design right shall reject the action if a final judgment on the merits has been given on the same cause of action and between the same parties on the basis of a Community design providing simultaneous protection.
4. Paragraphs 1, 2 and 3 shall not apply in respect of provisional measures, including protective measures.

Article 96

Relationship to other forms of protection under national law

1. The provisions of this Regulation shall be without prejudice to any provisions of Community law or of the law of the Member States concerned relating to unregistered designs, trade marks or other distinctive signs, patents and utility models, typefaces, civil liability and unfair competition.
2. A design protected by a Community design shall also be eligible for protection under the law of copyright of Member States as from the date on which the design was created or fixed in any form. The extent to which, and the conditions under which, such a protection is conferred, including the level of originality required, shall be determined by each Member State.

TITLE XI

SUPPLEMENTARY PROVISIONS CONCERNING THE OFFICE

Section 1

General provisions

Article 97

General provision

Unless otherwise provided in this Title, Title XII of the Regulation on the Community [trade mark](#) shall apply to the Office with regard to its tasks under this Regulation.

Article 98

Language of proceedings

1. The application for a registered Community design shall be filed in one of the official languages of the Community.

2. The applicant must indicate a second language which shall be a language of the Office the use of which he accepts as a possible language of proceedings before the Office.

If the application was filed in a language which is not one of the languages of the Office, the Office shall arrange to have the application translated into the language indicated by the applicant.

3. Where the applicant for a registered Community design is the sole party to proceedings before the Office, the language of proceedings shall be the language used for filing the application. If the application was made in a language other than the languages of the Office, the Office may send written communications to the applicant in the second language indicated by the applicant in his application.

4. In the case of invalidity proceedings, the language of proceedings shall be the language used for filing the application for a registered Community design if this is one of the languages of the Office. If the application was made in a language other than the languages of the Office, the language of proceedings shall be the second language indicated in the application.

The application for a declaration of invalidity shall be filed in the language of proceedings.

Where the language of proceedings is not the language used for filing the application for a registered Community design, the right holder of the Community design may file observations in the language of filing. The Office shall arrange to have those observations translated into the language of proceedings.

The implementing regulation may provide that the translation expenses to be borne by the Office may not, subject to a derogation granted by the Office where justified by the complexity of the case, exceed an amount to be fixed for each category of proceedings on the basis of the average size of statements of case received by the Office. Expenditure in excess of this amount may be allocated to the losing party in accordance with Article 70.

5. Parties to invalidity proceedings may agree that a different official language of the Community is to be the language of the proceedings.

Article 99

Publication and register

1. All information the publication of which is prescribed by this Regulation or the implementing regulation shall be published in all the official languages of the Community.
2. All entries in the Register of Community designs shall be made in all the official languages of the Community.
3. In cases of doubt, the text in the language of the Office in which the application for a registered Community design was filed shall be authentic. If the application was filed in an official language of the Community other than one of the languages of the Office, the text in the second language indicated by the applicant shall be authentic.

Article 100

Supplementary powers of the President

In addition to the functions and powers conferred on the President of the Office by Article 119 of the Regulation on the Community [trade mark](#), the President may place before the Commission any proposal to amend this Regulation, the implementing regulation, the fees regulation and any other rule to the extent that they apply to registered Community designs, after consulting the Administrative Board and, in the case of the fees regulation, the Budget Committee.

Article 101

Supplementary powers of the Administrative Board

In addition to the powers conferred on it by Article 121 et seq of the Regulation on the Community [trade mark](#) or by other provisions of this Regulation, the Administrative Board;

- (a) shall set the date for the first filing of applications for registered Community designs pursuant to Article 111(2);
- (b) shall be consulted before adoption of the guidelines for examination as to formal requirements, examination as to grounds for refusal of registration and invalidity proceedings in the Office and in the other cases provided for in this Regulation.

Section 2

Procedures

Article 102

Competence

For taking decisions in connection with the procedures laid down in this Regulation the following shall be competent:

- (a) examiners;
- (b) the Administration of Trade Marks and Designs and Legal Division;
- (c) Invalidity Divisions;

(d) Boards of Appeal.

Article 103

Examiners

An examiner shall be responsible for taking decisions on behalf of the Office in relation to an application for a registered Community design.

Article 104

The Administration of Trade Marks and Designs and Legal Division

1. The Administration of Trade Marks and Legal Division provided for by Article 128 of the Regulation on the Community [trade mark](#) shall become the Administration of Trade Marks and Designs and Legal Division.

2. In addition to the powers conferred upon it by the Regulation on the Community [trade mark](#), it shall be responsible for taking those decisions required by this Regulation which do not fall within the competence of an examiner or an Invalidity Division. It shall in particular be responsible for decisions in respect of entries in the register.

Article 105

Invalidity Divisions

1. An Invalidity Division shall be responsible for taking decisions in relation to applications for declarations of invalidity of registered Community designs.

2. An Invalidity Division shall consist of three members. At least one of the members must be legally qualified.

Article 106

Boards of Appeal

In addition to the powers conferred upon it by Article 131 of the Regulation on the Community [trade mark](#), the Boards of Appeal instituted by that Regulation shall be responsible for deciding on appeals from decisions of the examiners, the Invalidity Divisions and from the decisions of the Administration of Trade Marks and Designs and Legal Division as regards their decisions concerning Community designs.

TITLE XII

FINAL PROVISIONS

Article 107

Implementing regulation

1. The rules implementing this Regulation shall be adopted in an implementing regulation.

2. In addition to the fees already provided for in this Regulation, fees shall be charged, in accordance with the detailed rules of application laid down in the implementing regulation and in a fees regulation, in the cases listed below:

- (a) late payment of the registration fee;
- (b) late payment of the publication fee;
- (c) late payment of the fee for deferment of publication;
- (d) late payment of additional fees for multiple applications;
- (e) issue of a copy of the certificate of registration;
- (f) registration of the transfer of a registered Community design;
- (g) registration of a licence or another right in respect of a registered Community design;
- (h) cancellation of the registration of a licence or another right;
- (i) issue of an extract from the register;
- (j) inspection of the files;
- (k) issue of copies of file documents;
- (l) communication of information in a file;
- (m) review of the determination of the procedural costs to be refunded;
- (n) issue of certified copies of the application.

3. The implementing regulation and the fees regulation shall be adopted and amended in accordance with the procedure laid down in Article 109(2).

Article 108

Rules of procedure of the Boards of Appeal

The rules of procedure of the Boards of Appeal shall apply to appeals heard by those Boards under this Regulation, without prejudice to any necessary adjustment or additional provision, adopted in accordance with the procedure laid down in Article 109(2).

Article 109

Committee

1. The Commission shall be assisted by a Committee.
2. Where reference is made to this paragraph, Articles 5 and 7 of Decision 1999/468/EC shall

apply.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months.

3. The Committee shall adopt its rules of procedure

Article 110

Transitional provision

1. Until such time as amendments to this Regulation enter into force on a proposal from the Commission on this subject, protection as a Community design shall not exist for a design which constitutes a component part of a complex product used within the meaning of Article 19(1) for the purpose of the repair of that complex product so as to restore its original appearance.

2. The proposal from the Commission referred to in paragraph 1 shall be submitted together with, and take into consideration, any changes which the Commission shall propose on the same subject pursuant to Article 18 of [Directive 98/71/EC](#).

Article 111

Entry into force

1. This Regulation shall enter into force on the 60th day following its publication in the Official Journal of the European Communities.

2. Applications for registered Community designs may be filed at the Office from the date fixed by the Administrative Board on the recommendation of the President of the Office.

3. Applications for registered Community designs filed within three months before the date referred to in paragraph 2 shall be deemed to have been filed on that date.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 12 December 2001.

**Commission Regulation (EC) No 2245/2002
of 21 October 2002
implementing Council Regulation (EC) No 6/2002 on Community designs**

Commission Regulation (EC) No 2245/2002

of 21 October 2002

implementing Council Regulation (EC) No 6/2002 on Community designs

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 6/2002 of 12 December 2001 on Community designs(1), and in particular Article 107(3) thereof,

Whereas:

- (1) Regulation (EC) No 6/2002 creates a system enabling a design having effect throughout the Community to be obtained on the basis of an application to the Office for Harmonisation in the Internal Market (trade marks and designs) (hereinafter "the Office").
- (2) For this purpose, Regulation (EC) No 6/2002 contains the necessary provisions for a procedure leading to the registration of a Community design, as well as for the administration of registered Community designs, for appeals against decisions of the Office and for proceedings for the invalidation of a Community design.
- (3) The present Regulation lays down the necessary measures for implementing the provisions of Regulation (EC) No 6/2002.
- (4) This Regulation should ensure the smooth and efficient operation of design proceedings before the Office.
- (5) The measures provided for in this Regulation are in accordance with the opinion of the Committee established under Article 109 of Regulation (EC) No 6/2002,

HAS ADOPTED THIS REGULATION:

CHAPTER I

APPLICATION PROCEDURE

Article 1

Content of the application

1. The application for a registered Community design shall contain:

- (a) a request for registration of the design as a registered Community design;
- (b) the name, address and nationality of the applicant and the State in which the applicant is domiciled or in which it has its seat or establishment. Names of natural persons shall take the form of the family name and the given name(s). Names of legal entities shall be indicated by their official designation, which may be abbreviated in a customary manner; furthermore, the State whose law governs such entities shall be indicated.

The telephone numbers as well as fax numbers and details of other data-communications links, such as electronic mail, may be given. Only one address shall, in principle, be indicated for each applicant;

where several addresses are indicated, only the address mentioned first shall be taken into account, except where the applicant designates one of the addresses as an address for service. If the Office has given the applicant an identification number, it shall be sufficient to mention that number together with the name of the applicant;

- (c) a representation of the design in accordance with Article 4 of this Regulation or, if the application concerns a two-dimensional design and contains a request for deferment of publication in accordance with Article 50 of Regulation (EC) No 6/2002, a specimen in accordance with Article 5 of this Regulation;
- (d) an indication, in accordance with Article 3(3), of the products in which the design is intended to be incorporated or to which it is intended to be applied;
- (e) if the applicant has appointed a representative, the name of that representative and the address of his/her place of business in accordance with point (b); if the representative has more than one business address or if there are two or more representatives with different business addresses, the application shall indicate which address shall be used as an address for service; where no such indication is made, only the first-mentioned address shall be taken into account as an address for service. If there is more than one applicant, the application may indicate the appointment of one applicant or representative as common representative. If an appointed representative has been given an identification number by the Office, it shall be sufficient to mention that number together with the name of the representative;
- (f) if applicable, a declaration that priority of a previous application is claimed pursuant to Article 42 of Regulation (EC) No 6/2002, stating the date on which the previous application was filed and the country in which or for which it was filed;
- (g) if applicable, a declaration that exhibition priority is claimed pursuant to Article 44 of Regulation (EC) No 6/2002, stating the name of the exhibition and the date of the first disclosure of the products in which the design is incorporated or to which it is applied;
- (h) a specification of the language in which the application is filed, and of the second language pursuant to Article 98(2) of Regulation (EC) No 6/2002;
- (i) the signature of the applicant or his/her representative in accordance with Article 65.

2. The application may contain:

- (a) a single description per design not exceeding 100 words explaining the representation of the design or the specimen; the description must relate only to those features which appear in the reproductions of the design or the specimen; it shall not contain statements as to the purported novelty or individual character of the design or its technical value;
- (b) a request for deferment of publication of registration in accordance with Article 50(1) of Regulation (EC) No 6/2002;
- (c) an indication of the "Locarno classification" of the products contained in the application, that is to say, of the class or classes and the subclass or subclasses to which they belong in accordance with the Annex to the Agreement establishing an international classification for industrial designs, signed at Locarno on 8 October 1968 (hereinafter "the Locarno Agreement"), referred to in Article 3 and subject to Article 2(2);
- (d) the citation of the designer or of the team of designers or a statement signed by the applicant to the effect that the designer or team of designers has waived the right to be cited under Article 36(3)(e) of Regulation (EC) No 6/2002.

Article 2

Multiple application

1. An application may be a multiple application requesting the registration of several designs.
2. When several designs other than ornamentation are combined in a multiple application, the application shall be divided if the products in which the designs are intended to be incorporated or to which they are intended to be applied belong to more than one class of the Locarno Classification.
3. For each design contained in the multiple application the applicant shall provide a representation of the design in accordance with Article 4 and the indication of the product in which the design is intended to be incorporated or to be applied.
4. The applicant shall number the designs contained in the multiple application consecutively, using arabic numerals.

Article 3

Classification and indication of products

1. Products shall be classified in accordance with Article 1 of the Locarno Agreement, as amended and in force at the date of filing of the design.
2. The classification of products shall serve exclusively administrative purposes.
3. The indication of products shall be worded in such a way as to indicate clearly the nature of the products and to enable each product to be classified in only one class of the Locarno classification, preferably using the terms appearing in the list of products set out therein.
4. The products shall be grouped according to the classes of the Locarno classification, each group being preceded by the number of the class to which that group of products belongs and presented in the order of the classes and subclasses under that classification.

Article 4

Representation of the design

1. The representation of the design shall consist in a graphic or photographic reproduction of the design, either in black and white or in colour. It shall meet the following requirements:
 - (a) save where the application is filed by electronic means pursuant to Article 67, the representation must be filed on separate sheets of paper or reproduced on the page provided for that purpose in the form made available by the Office pursuant to Article 68;
 - (b) in the case of separate sheets of paper, the design shall be reproduced on opaque white paper and either pasted or printed directly on it. Only one copy shall be filed and the sheets of paper shall not be folded or stapled;
 - (c) the size of the separate sheet shall be DIN A4 size (29,7 cm x 21 cm) and the space used for the reproduction shall be no larger than 26,2 cm x 17 cm. A margin of at least 2,5 cm shall be

left on the left-hand side; at the top of each sheet of paper the number of views shall be indicated pursuant to paragraph 2 and, in the case of a multiple application, the consecutive number of the design; no explanatory text, wording or symbols, other than the indication "top" or the name or address of the applicant, may be displayed thereon;

- (d) where the application is filed by electronic means, the graphic or photographic reproduction of the designs shall be in a data format determined by the President of the Office; the manner of identifying the different designs contained in a multiple application, or the different views, shall be determined by the President of the Office;
- (e) the design shall be reproduced on a neutral background and shall not be retouched with ink or correcting fluid. It shall be of a quality permitting all the details of the matter for which protection is sought to be clearly distinguished and permitting it to be reduced or enlarged to a size no greater than 8 cm by 16 cm per view for entry in the Register of Community Designs provided for in Article 72 of Regulation (EC) No 6/2002, hereinafter "the Register", and for direct publishing in the Community Designs Bulletin referred to in Article 73 of that Regulation.

2. The representation may contain no more than seven different views of the design. Any one graphic or photographic reproduction may contain only one view. The applicant shall number each view using arabic numerals. The number shall consist of separate numerals separated by a point, the numeral to the left of the point indicating the number of the design, that to the right indicating the number of the view.

In cases where more than seven views are provided, the Office may disregard for registration and publication any of the extra views. The Office shall take the views in the consecutive order in which the views are numbered by the applicant.

3. Where an application concerns a design that consists in a repeating surface pattern, the representation of the design shall show the complete pattern and a sufficient portion of the repeating surface.

The size limits set out in paragraph 1(c) shall apply.

4. Where an application concerns a design consisting in a typographic typeface, the representation of the design shall consist in a string of all the letters of the alphabet, in both upper and lower case, and of all the arabic numerals, together with a text of five lines produced using that typeface, both letters and numerals being in the size pitch 16.

Article 5

Specimens

1. Where the application concerns a two-dimensional design and contains a request for a deferment of publication, in accordance with Article 50(1) of Regulation (EC) No 6/2002, the representation of the design may be replaced by a specimen pasted on a sheet of paper.

Applications for which a specimen is submitted must be sent by a single mail or directly delivered to the office of filing.

Both the application and the specimen shall be submitted at the same time.

2. The specimens shall not exceed 26,2 cm x 17 cm in size, 50 grams in weight or 3 mm in thickness. The specimen shall be capable of being stored, unfolded, alongside documents of the size prescribed in Article 4(1)(c).

3. Specimens that are perishable or dangerous to store shall not be filed.

The specimen shall be filed in five copies; in the case of a multiple application, five copies of the specimen shall be filed for each design.

4. Where the design concerns a repeating surface pattern, the specimen shall show the complete pattern and a sufficient portion of the repeating surface in length and width. The limits set out in paragraph 2 shall apply.

Article 6

Fees for the application

1. The following fees shall be paid at the time when the application is submitted to the Office:

- (a) the registration fee;
- (b) the publication fee or a deferment fee if deferment of publication has been requested;
- (c) an additional registration fee in respect of each additional design included in a multiple application;
- (d) an additional publication fee in respect of each additional design included in a multiple application, or an additional deferment fee in respect of each additional design included in a multiple application if deferment of publication has been requested.

2. Where the application includes a request for deferment of publication of registration, the publication fee and any additional publication fee in respect of each additional design included in a multiple application shall be paid within the time limits specified in Article 15(4).

Article 7

Filing of the application

1. The Office shall mark the documents making up the application with the date of its receipt and the file number of the application.

Each design contained in a multiple application shall be numbered by the Office in accordance with a system determined by the President.

The Office shall issue to the applicant without delay a receipt which shall specify the file number, the representation, description or other identification of the design, the nature and the number of the documents and the date of their receipt.

In the case of a multiple application, the receipt issued by the Office shall specify the first design and the number of designs filed.

2. If the application is filed with the central industrial property office of a Member State or at the Benelux Design Office in accordance with Article 35 of Regulation (EC) No 6/2002, the office of filing shall number each page of the application, using arabic numerals. The office of filing shall mark the documents making up the application with the date of receipt and the number of pages before forwarding the application to the Office.

The office of filing shall issue to the applicant without delay a receipt specifying the nature and the number of the documents and the date of their receipt.

3. If the Office receives an application forwarded by the central industrial property office of

a Member State or the Benelux Design Office, it shall mark the application with the date of receipt and the file number and shall issue to the applicant without delay a receipt in accordance with the third and fourth subparagraphs of paragraph 1, indicating the date of receipt at the Office.

Article 8

Claiming priority

1. Where the priority of one or more previous applications is claimed in the application pursuant to Article 42 of Regulation (EC) No 6/2002, the applicant shall indicate the file number of the previous application and file a copy of it within three months of the filing date referred to in Article 38 of that Regulation. The President of the Office shall determine the evidence to be provided by the applicant.

2. Where, subsequent to the filing of the application, the applicant wishes to claim the priority of one or more previous applications pursuant to Article 42 of Regulation (EC) No 6/2002, he/she shall submit, within one month of the filing date, the declaration of priority, stating the date on which and the country in or for which the previous application was made.

The applicant shall submit to the Office the indications and evidence referred to in paragraph 1 within three months of receipt of the declaration of priority.

Article 9

Exhibition priority

1. Where exhibition priority has been claimed in the application pursuant to Article 44 of Regulation (EC) No 6/2002, the applicant shall, together with the application or at the latest within three months of the filing date, file a certificate issued at the exhibition by the authority responsible for the protection of industrial property at the exhibition.

That certificate shall declare that the design was incorporated in or applied to the product and disclosed at the exhibition, and shall state the opening date of the exhibition and, where the first disclosure of the product did not coincide with the opening date of the exhibition, the date of such first disclosure. The certificate shall be accompanied by an identification of the actual disclosure of the product, duly certified by that authority.

2. Where the applicant wishes to claim an exhibition priority subsequent to the filing of the application, the declaration of priority, indicating the name of the exhibition and the date of the first disclosure of the product in which the design was incorporated or to which it was applied, shall be submitted within one month of the filing date. The indications and evidence referred to in paragraph 1 shall be submitted to the Office within three months of receipt of the declaration of priority.

Article 10

Examination of requirements for a filing date and of formal requirements

1. The Office shall notify the applicant that a date of filing cannot be granted if the application does not contain:

- (a) a request for registration of the design as a registered Community design;
- (b) information identifying the applicant;
- (c) a representation of the design pursuant to Article 4(1)(d) and (e) or, where applicable, a specimen.

2. If the deficiencies indicated in paragraph 1 are remedied within two months of receipt of the notification, the date on which all the deficiencies are remedied shall determine the date of filing.

If the deficiencies are not remedied before the time limit expires, the application shall not be dealt with as a Community design application. Any fees paid shall be refunded.

3. The Office shall call upon the applicant to remedy the deficiencies noted within a time limit specified by it where, although a date of filing has been granted, the examination reveals that:

- (a) the requirements set out in Articles 1, 2, 4 and 5 or the other formal requirements for applications laid down in the Regulation (EC) No 6/2002 or in this Regulation have not been complied with;
- (b) the full amount of the fees payable pursuant to Article 6(1), read in conjunction with Commission Regulation (EC) No 2246/2002(2), has not been received by the Office;
- (c) where priority has been claimed pursuant to Articles 8 and 9, either in the application itself or within one month after the date of filing, the other requirements set out in those Articles have not been complied with;
- (d) in the case of a multiple application, the products in which the designs are intended to be incorporated or to which they are intended to be applied belong to more than one class of the Locarno classification.

In particular, the Office shall call upon the applicant to pay the required fees within two months of the date of notification, together with the late payment fees provided for in Article 107(2)(a) to (d) of Regulation (EC) No 6/2002 and as set out in Regulation (EC) No 2246/2002.

In the case of the deficiency referred to in point (d) of the first subparagraph, the Office shall call upon the applicant to divide the multiple application in order to ensure compliance with the requirements under Article 2(2). It shall also call upon the applicant to pay the total amount of the fees for all the applications resulting from the separation of the multiple application, within such a time limit as it may specify.

After the applicant has complied with the request to divide the application within the time limit set, the date of filing of the resulting application or applications shall be the date of filing granted to the multiple application initially filed.

4. If the deficiencies referred to in paragraph 3(a) and (d) are not remedied before the time limit expires, the Office shall reject the application.

5. If the fees payable pursuant to Article 6(1)(a) and (b) are not paid before the time limit expires, the Office shall reject the application.

6. If any additional fees payable pursuant to Article 6(1)(c) or (d) in respect of multiple applications are not paid or not paid in full before the time limit expires, the Office shall reject the application in respect of all the additional designs which are not covered by the amount paid.

In the absence of any criteria for determining which designs are intended to be covered, the Office shall take the designs in the numerical order in which they are represented in accordance with Article 2(4). The Office shall reject the application in so far as it concerns designs for which additional fees have not been paid or have not been paid in full.

7. If the deficiencies referred to in paragraph 3(c) are not remedied before the time limit expires, the right of priority for the application shall be lost.

8. If any of the deficiencies referred to in paragraph 3 is not remedied before the time limit expires and such deficiency concerns only some of the designs contained in a multiple application, the Office shall reject the application, or the right of priority shall be lost, only in so far as those designs are concerned.

Article 11

Examination of grounds for non-registrability

1. Where, pursuant to Article 47 of Regulation (EC) No 6/2002, the Office finds, in the course of carrying out the examination under Article 10 of this Regulation, that the design for which protection is sought does not correspond to the definition of design provided in Article 3(a) of Regulation (EC) No 6/2002 or that the design is contrary to public policy or to accepted principles of morality, it shall inform the applicant that the design is non-registrable, specifying the ground for non-registrability.

2. The Office shall specify a time limit within which the applicant may submit his/her observations, withdraw the application or amend it by submitting an amended representation of the design, provided that the identity of the design is retained.

3. Where the applicant fails to overcome the grounds for non-registrability within the time limit, the Office shall refuse the application. If those grounds concern only some of the designs contained in a multiple application, the Office shall refuse the application only in so far as those designs are concerned.

Article 12

Withdrawal or correction of the application

1. The applicant may at any time withdraw a Community design application or, in the case of a multiple application, withdraw some of the designs contained in the application.

2. Only the name and address of the applicant, errors of wording or of copying, or obvious mistakes may be corrected, at the request of the applicant and provided that such correction does not change the representation of the design.

3. An application for the correction of the application pursuant to paragraph 2 shall contain:

- (a) the file number of the application;
- (b) the name and the address of the applicant in accordance with Article 1(1)(b);
- (c) where the applicant has appointed a representative, the name and the business address of the representative in accordance with Article 1(1)(e);
- (d) the indication of the element of the application to be corrected and that element in its corrected version.

4. If the requirements for the correction of the application are not fulfilled, the Office shall communicate the deficiency to the applicant. If the deficiency is not remedied within the time

limits specified by the Office, the Office shall reject the application for correction.

5. A single application may be made for the correction of the same element in two or more applications submitted by the same applicant.

6. Paragraphs 2 to 5 shall apply *mutatis mutandis* to applications to correct the name or the business address of a representative appointed by the applicant.

CHAPTER II

REGISTRATION PROCEDURE

Article 13

Registration of the design

1. If the application satisfies the requirements referred to in Article 48 of Regulation (EC) No 6/2002, the design contained in that application and the particulars set out in Article 69(2) of this Regulation shall be recorded in the Register.

2. If the application contains a request for deferment of publication pursuant to Article 50 of Regulation (EC) No 6/2002, that fact and the date of expiry of the period of deferment shall be recorded.

3. The fees payable pursuant to Article 6(1) shall not be refunded even if the design applied for is not registered.

Article 14

Publication of the registration

1. The registration of the design shall be published in the Community Designs Bulletin.

2. Subject to paragraph 3, the publication of the registration shall contain:

- (a) the name and address of the holder of the Community design (hereinafter "the holder");
- (b) where applicable, the name and business address of the representative appointed by the holder other than a representative falling within the first subparagraph of Article 77(3) of Regulation (EC) No 6/2002; if more than one representative has the same business address, only the name and business address of the first-named representative shall be published, the name being followed by the words "et al"; if there are two or more representatives with different business addresses, only the address for service determined pursuant to Article 1(1)(e) of this Regulation shall be published; where an association of representatives is appointed pursuant to Article 62(9) only the name and business address of the association shall be published;
- (c) the representation of the design pursuant to Article 4; where the representation of the design is in colour, the publication shall be in colour;
- (d) where applicable, an indication that a description has been filed pursuant to Article 1(2)(a);
- (e) an indication of the products in which the design is intended to be incorporated or to which it is intended to be applied, preceded by the number of the relevant classes and subclasses of the Locarno classification, and grouped accordingly;

- (f) where applicable, the name of the designer or the team of designers;
- (g) the date of filing and the file number and, in the case of a multiple application, the file number of each design;
- (h) where applicable, particulars of the claim of priority pursuant to Article 42 of Regulation (EC) No 6/2002;
- (i) where applicable, particulars of the claim of exhibition priority pursuant to Article 44 of Regulation (EC) No 6/2002;
- (j) the date and the registration number and the date of the publication of the registration;
- (k) the language in which the application was filed and the second language indicated by the applicant pursuant to Article 98(2) of Regulation (EC) No 6/2002.

3. If the application contains a request for deferment of publication pursuant to Article 50 of Regulation (EC) No 6/2002, a mention of the deferment shall be published in the Community Designs Bulletin, together with the name of the holder, the name of the representative, if any, the date of filing and registration, and the file number of the application. Neither the representation of the design nor any particulars identifying its appearance shall be published.

Article 15

Deferment of publication

1. Where the application contains a request for deferment of publication pursuant to Article 50 of Regulation (EC) No 6/2002, the holder shall, together with the request or at the latest three months before the 30-month deferment period expires:

- (a) pay the publication fee referred to in Article 6(1)(b);
- (b) in the case of a multiple registration, pay the additional publication fees, referred to in Article 6(1)(d);
- (c) in cases where a representation of the design has been replaced by a specimen in accordance with Article 5, file a representation of the design in accordance with Article 4. This applies to all the designs contained in a multiple application for which publication is requested;
- (d) in the case of a multiple registration, clearly indicate which of the designs contained therein is to be published or which of the designs are to be surrendered, or, if the period of deferment has not yet expired, for which designs deferment is to be continued.

Where the holder requests publication before the expiry of the 30-month deferment period, he/she shall, at the latest three months before the requested date of publication, comply with the requirements set out in points (a) to (d) of the first paragraph.

2. If the holder fails to comply with the requirements set out in paragraph 1(c) or (d), the Office shall call upon him/her to remedy the deficiencies within a specified time limit which shall in no case expire after the 30-month deferment period.

3. If the holder fails to remedy the deficiencies referred to in paragraph 2 within the applicable time limit:

- (a) the registered Community design shall be deemed from the outset not to have had the effects specified in Regulation (EC) No 6/2002;

(b) where the holder has requested earlier publication as provided for under the second subparagraph of paragraph 1, the request shall be deemed not to have been filed.

4. If the holder fails to pay the fees referred to in paragraph 1(a) or (b), the Office shall call upon him/her to pay those fees together with the fees for late payment provided for in Article 107(2)(b) or (d) of Regulation (EC) No 6/2002 and as set out in Regulation (EC) No 2246/2002, within a specified time limit which shall in no case expire after the 30-month deferment period.

If no payment has been made within that time limit, the Office shall notify the holder that the registered Community design has from the outset not had the effects specified in Regulation (EC) No 6/2002.

If, in respect of a multiple registration, a payment is made within that time limit but is insufficient to cover all the fees payable pursuant to paragraph 1(a) and (b), as well as the applicable fee for late payment, all the designs in respect of which the fees have not been paid shall be deemed from the outset not to have had the effects specified in Regulation (EC) No 6/2002.

Unless it is clear which designs the amount paid is intended to cover, and in the absence of other criteria for determining which designs are intended to be covered, the Office shall take the designs in the numerical order in which they are represented in accordance with Article 2(4).

All designs for which the additional publication fee has not been paid or has not been paid in full, together with the applicable fee for late payment, shall be deemed from the outset not to have had the effects specified in Regulation (EC) No 6/2002.

Article 16

Publication after the period for deferment

1. Where the holder has complied with the requirements laid down in Article 15, the Office shall, at the expiry of the period for deferment or in the case of a request for earlier publication, as soon as is technically possible:

- (a) publish the registered Community design in the Community Designs Bulletin, with the indications set out in Article 14(2), together with an indication of the fact that the application contained a request for deferment of publication pursuant to Article 50 of Regulation (EC) No 6/2002 and, where applicable, that a specimen was filed in accordance with Article 5 of this Regulation;
- (b) make available for public inspection any file relating to the design;
- (c) open to public inspection all the entries in the Register, including any entries withheld from inspection pursuant to Article 73.

2. Where Article 15(4) applies, the actions referred to in paragraph 1 of this Article shall not take place in respect of those designs contained in the multiple registration which are deemed from the outset not to have had the effects specified in Regulation (EC) No 6/2002.

Article 17

Certificate of registration

1. After publication, the Office shall issue to the holder a certificate of registration which

shall contain the entries in the Register provided for in Article 69(2) and a statement to the effect that those entries have been recorded in the Register.

2. The holder may request that certified or uncertified copies of the certificate of registration be supplied to him/her upon payment of a fee.

Article 18

Maintenance of the design in an amended form

1. Where, pursuant to Article 25(6) of Regulation (EC) No 6/2002, the registered Community design is maintained in an amended form, the Community design in its amended form shall be entered in the Register and published in the Community Designs Bulletin.

2. Maintenance of a design in an amended form may include a partial disclaimer, not exceeding 100 words, by the holder or an entry in the Register of Community Designs of a court decision or a decision by the Office declaring the partial invalidity of the design right.

Article 19

Change of the name or address of the holder or of his/her registered representative

1. A change of the name or address of the holder which is not the consequence of a transfer of the registered design shall, at the request of the holder, be recorded in the Register.

2. An application for a change of the name or address of the holder shall contain:

- (a) the registration number of the design;
- (b) the name and the address of the holder as recorded in the Register. If the holder has been given an identification number by the Office, it shall be sufficient to indicate that number together with the name of the holder;
- (c) the indication of the name and address of the holder, as changed, in accordance with Article 1(1)(b);
- (d) where the holder has appointed a representative, the name and business address of the representative, in accordance with Article 1(1)(e).

3. The application referred to in paragraph 2 shall not be subject to payment of a fee.

4. A single application may be made for a change of the name or address in respect of two or more registrations of the same holder.

5. If the requirements set out in paragraphs 1 and 2 are not fulfilled, the Office shall communicate the deficiency to the applicant.

If the deficiency is not remedied within the time limits specified by the Office, the Office shall reject the application.

6. Paragraphs 1 to 5 shall apply *mutatis mutandis* to a change of the name or address of the registered representative.

7. Paragraphs 1 to 6 shall apply *mutatis mutandis* to applications for Community designs. The change shall be recorded in the files kept by the Office concerning the Community design application.

Article 20

Correction of mistakes and errors in the Register and in the publication of the registration

Where the registration of a design or the publication of the registration contains a mistake or error attributable to the Office, the Office shall correct the error or mistake of its own motion or at the request of the holder.

Where such a request is made by the holder, Article 19 shall apply *mutatis mutandis*. The request shall not be subject to payment of a fee.

The Office shall publish the corrections made pursuant to this Article.

CHAPTER III

RENEWAL OF REGISTRATION

Article 21

Notification of expiry of registration

At least six months before expiry of the registration, the Office shall inform the holder, and any person having a right entered in the Register, including a licence, in respect of the Community design, that the registration is approaching expiry. Failure to give notification shall not affect the expiry of the registration.

Article 22

Renewal of registration

1. An application for renewal of registration shall contain:

- (a) where the application is filed by the holder, his/her name and address in accordance with Article 1(1)(b);
- (b) where the application is filed by a person expressly authorised to do so by the holder, the name and address of that person and evidence that he/she is authorised to file the application;
- (c) where the applicant has appointed a representative, the name and business address of the representative in accordance with Article 1(1)(e);
- (d) the registration number;
- (e) where applicable, an indication that renewal is requested for all the designs covered by a multiple registration or, if the renewal is not requested for all such designs, an indication of those designs for which renewal is requested.

2. The fees payable pursuant to Article 13 of Regulation (EC) No 6/2002 for the renewal of a registration shall consist of:

- (a) a renewal fee, which, in cases where several designs are covered by a multiple registration, shall be proportionate to the number of designs covered by the renewal;

(b) where applicable, the additional fee for late payment of the renewal fee or late submission of the request for renewal, pursuant to Article 13 of Regulation (EC) No 6/2002, as specified in Regulation (EC) No 2246/2002.

3. Where the application for renewal is filed within the time limits provided for in Article 13(3) of Regulation (EC) No 6/2002, but the other conditions for renewal provided for in Article 13 thereof and in this Regulation are not satisfied, the Office shall inform the applicant of the deficiencies.

If the application is filed by a person whom the holder has expressly authorised to do so, the holder of the design shall receive a copy of the notification.

4. Where an application for renewal is not submitted or is submitted after expiry of the time limit provided for in the second sentence of Article 13(3) of Regulation (EC) No 6/2002, or if the fees are not paid or are paid only after expiry of the relevant time limit, or if the deficiencies are not remedied within the time limit specified by the Office, the Office shall determine that the registration has expired and shall notify accordingly the holder and, where appropriate, the applicant for renewal and the person recorded in the Register as having rights in the design.

In the case of a multiple registration, where the fees paid are insufficient to cover all the designs for which renewal is requested, such a determination shall be made only after the Office has established which designs the amount paid is intended to cover.

In the absence of other criteria for determining which designs are intended to be covered, the Office shall take the designs in the numerical order in which they are represented in accordance with Article 2(4).

The Office shall determine that the registration has expired with regard to all designs for which the renewal fees have not been paid or have not been paid in full.

5. Where the determination made pursuant to paragraph 4 has become final, the Office shall cancel the design from the Register with effect from the day following the day on which the existing registration expired.

6. Where the renewal fees provided for in paragraph 2 have been paid but the registration is not renewed, those fees shall be refunded.

CHAPTER IV

TRANSFER, LICENCES AND OTHER RIGHTS, CHANGES

Article 23

Transfer

1. An application for registration of a transfer pursuant to Article 28 of Regulation (EC) No 6/2002 shall contain:

- (a) the registration number of the Community design;
- (b) particulars of the new holder in accordance with Article 1(1)(b);
- (c) where not all of the designs covered by a multiple registration are included in the transfer, particulars of the registered designs to which the transfer relates;
- (d) documents duly establishing the transfer.

2. The application may contain, where applicable, the name and business address of the representative of the new holder, to be set out in accordance with Article 1(1)(e).

3. The application shall not be deemed to have been filed until the required fee has been paid. If the fee is not paid or is not paid in full, the Office shall notify the applicant accordingly.

4. The following shall constitute sufficient proof of transfer under paragraph 1(d):

- (a) the application for registration of the transfer is signed by the registered holder or his/her representative and by the successor in title or his/her representative; or
- (b) the application, if submitted by the successor in title, is accompanied by a declaration, signed by the registered holder or his/her representative, that he/she agrees to the registration of the successor in title; or
- (c) the application is accompanied by a completed transfer form or document, signed by the registered holder or his/her representative and by the successor in title or his/her representative.

5. Where the conditions applicable to the registration of a transfer are not fulfilled, the Office shall notify the applicant of the deficiencies.

If the deficiencies are not remedied within the time limit specified by the Office, it shall reject the application for registration of the transfer.

6. A single application for registration of a transfer may be submitted for two or more registered Community designs, provided that the registered holder and the successor in title are the same in each case.

7. Paragraphs 1 to 6 shall apply *mutatis mutandis* to the transfer of applications for registered Community designs. The transfer shall be recorded in the files kept by the Office concerning the Community design application.

Article 24

Registration of licences and other rights

1. Article 23(1)(a), (b) and (c) and Article 23(2), (3), (5) and (6) shall apply *mutatis mutandis* to the registration of the grant or transfer of a licence, to registration of the creation or transfer of a right in rem in respect of a registered Community design, and to registration of enforcement measures. However, where a registered Community design is involved in insolvency proceedings, the request of the competent national authority for an entry in the Register to this effect shall not be subject to payment of a fee.

In the case of a multiple registration, each registered Community design may, separately from the others, be licensed, the subject of a right in rem, levy of execution or insolvency proceedings.

2. Where the registered Community design is licensed for only a part of the Community, or for a limited period of time, the application for registration of the licence shall indicate the part of the Community or the period of time for which the licence is granted.

3. Where the conditions applicable to registration of licences and other rights, set out in Articles 29, 30 or 32 of Regulation (EC) No 6/2002, in paragraph 1 of this Article, and in the other applicable Articles of this Regulation are not fulfilled, the Office shall notify the applicant of the deficiencies.

If the deficiencies are not remedied within a time limit specified by the Office, it shall reject the application for registration.

4. Paragraphs 1, 2 and 3 shall apply mutatis mutandis to licences and other rights concerning applications for registered Community designs. Licences, rights in rem and enforcement measures shall be recorded in the files kept by the Office concerning the Community design application.

5. The request for a non-exclusive licence pursuant to Article 16(2) of Regulation (EC) No 6/2002 shall be made within three months of the date of the entry in the Register of the newly entitled holder.

Article 25

Special provisions for the registration of a licence

1. A licence in respect of a registered Community design shall be recorded in the Register as an exclusive licence if the holder of the design or the licensee so requests.

2. A licence in respect of a registered Community design shall be recorded in the Register as a sub-licence where it is granted by a licensee whose licence is recorded in the Register.

3. A licence in respect of a registered Community design shall be recorded in the Register as a territorially limited licence if it is granted for a part of the Community.

4. A licence in respect of a registered Community design shall be recorded in the Register as a temporary licence if it is granted for a limited period of time.

Article 26

Cancellation or modification of the registration of licences and other rights

1. A registration effected under Article 24 shall be cancelled upon application by one of the persons concerned.

2. The application shall contain:

- (a) the registration number of the registered Community design, or in the case of a multiple registration, the number of each design; and
- (b) particulars of the right whose registration is to be cancelled.

3. Application for cancellation of the registration of a licence or other right shall not be deemed to have been filed until the required fee has been paid.

If the fee is not paid or is not paid in full, the Office shall notify the applicant accordingly. A request from a competent national authority for cancellation of an entry where a registered Community design is involved in insolvency proceedings shall not be subject to payment of a fee.

4. The application shall be accompanied by documents showing that the registered right no longer exists or by a statement by the licensee or the holder of another right to the effect that he/she consents to cancellation of the registration.

5. Where the requirements for cancellation of the registration are not satisfied, the Office shall notify the applicant of the deficiencies. If the deficiencies are not remedied within the time limit specified by the Office, it shall reject the application for cancellation of the registration.

6. Paragraphs 1, 2, 4 and 5 shall apply mutatis mutandis to a request for modification of a registration

effected pursuant to Article 24.

7. Paragraphs 1 to 6 shall apply mutatis mutandis to entries made in the files pursuant to Article 24(4).

CHAPTER V

SURRENDER AND INVALIDITY

Article 27

Surrender

1. A declaration of surrender pursuant to Article 51 of Regulation (EC) No 6/2002 shall contain:

- (a) the registration number of the registered Community design;
- (b) the name and address of the holder in accordance with Article 1(1)(b);
- (c) where a representative has been appointed, the name and business address of the representative in accordance with Article 1(1)(e);
- (d) where surrender is declared only for some of the designs contained in a multiple registration, an indication of the designs for which the surrender is declared or the designs which are to remain registered;
- (e) where, pursuant to Article 51(3) of Regulation (EC) No 6/2002, the registered Community design is partially surrendered, a representation of the amended design in accordance with Article 4 of this Regulation.

2. Where a right of a third party relating to the registered Community design is entered in the Register, it shall be sufficient proof of his/her agreement to the surrender that a declaration of consent to the surrender is signed by the holder of that right or his/her representative.

Where a licence has been registered, surrender of the design shall be registered three months after the date on which the holder satisfies the Office that he/she has informed the licensee of his/her intention to surrender it. If the holder proves to the Office before the expiry of that period that the licensee has given his/her consent, the surrender shall be registered forthwith.

3. Where a claim relating to the entitlement to a registered Community design has been brought before a court pursuant to Article 15 of Regulation (EC) No 6/2002, a declaration of consent to the surrender, signed by the claimant or his/her representative, shall be sufficient proof of his/her agreement to the surrender.

4. If the requirements governing surrender are not fulfilled, the Office shall communicate the deficiencies to the declarant. If the deficiencies are not remedied within the time limit specified by the Office, the Office shall reject the entry of the surrender in the Register.

Article 28

Application for a declaration of invalidity

1. An application to the Office for a declaration of invalidity pursuant to Article 52 of Regulation (EC) No 6/2002 shall contain:

-
- (a) as concerns the registered Community design for which the declaration of invalidity is sought:
- (i) its registration number;
 - (ii) the name and address of its holder;
- (b) as regards the grounds on which the application is based:
- (i) a statement of the grounds on which the application for a declaration of invalidity is based;
 - (ii) additionally, in the case of an application pursuant to Article 25(1)(d) of Regulation (EC) No 6/2002, the representation and particulars identifying the prior design on which the application for a declaration of invalidity is based and showing that the applicant is entitled to invoke the earlier design as a ground for invalidity pursuant to Article 25(3) of that Regulation;
 - (iii) additionally, in the case of an application pursuant to Article 25(1)(e) or (f) of Regulation (EC) No 6/2002, the representation and particulars identifying the distinctive sign or the work protected by copyright on which the application for a declaration of invalidity is based and particulars showing that the applicant is the holder of the earlier right pursuant to Article 25(3) of that Regulation;
 - (iv) additionally, in the case of an application pursuant to Article 25(1)(g) of the Regulation (EC) No 6/2002, the representation and particulars of the relevant item as referred to in that Article and particulars showing that the application is filed by the person or entity concerned by the improper use pursuant to Article 25(4) of that Regulation;
 - (v) where the ground for invalidity is that the registered Community design does not fulfil the requirements set out in Article 5 or 6 of Regulation (EC) No 6/2002, the indication and the reproduction of the prior designs that could form an obstacle to the novelty or individual character of the registered Community design, as well as documents proving the existence of those earlier designs;
 - (vi) an indication of the facts, evidence and arguments submitted in support of those grounds;
- (c) as concerns the applicant:
- (i) his/her name and address in accordance with Article 1(1)(b);
 - (ii) if the applicant has appointed a representative, the name and the business address of the representative, in accordance with Article 1(1)(e);
 - (iii) additionally, in the case of an application pursuant to Article 25(1)(c) of Regulation (EC) No 6/2002, particulars showing that the application is made by a person or by persons duly entitled pursuant to Article 25(2) of that Regulation.
2. The application shall be subject to the fee referred to in Article 52(2) of Regulation (EC) No 6/2002.
3. The Office shall inform the holder that an application for declaration of invalidity has been filed.

Article 29

Languages used in invalidity proceedings

1. The application for a declaration of invalidity shall be filed in the language of proceedings pursuant to Article 98(4) of Regulation (EC) No 6/2002.

2. Where the language of proceedings is not the language used for filing the application and the holder has filed his/her observations in the language of filing, the Office shall arrange to have those observations translated into the language of proceedings.
3. Three years after the date fixed in accordance with Article 111(2) of Regulation (EC) No 6/2002, the Commission will submit to the Committee mentioned in Article 109 of Regulation (EC) No 6/2002 a report on the application of paragraph 2 of this Article and, if appropriate, proposals for fixing a limit for the expenses borne by the Office in this respect as provided for in the fourth subparagraph of Article 98(4) of Regulation (EC) No 6/2002.
4. The Commission may decide to submit the report and possible proposals referred to in paragraph 3 at an earlier date, and the Committee shall discuss them as a matter of priority if the facilities in paragraph 2 lead to disproportionate expenditure.
5. Where the evidence in support of the application is not filed in the language of the invalidity proceedings, the applicant shall file a translation of that evidence into that language within two months of the filing of such evidence.
6. Where the applicant for a declaration of invalidity or the holder informs the Office, within two months of receipt by the holder of the communication referred to in Article 31(1) of this Regulation, that they have agreed on a different language of proceedings pursuant to Article 98(5) of Regulation (EC) No 6/2002, the applicant shall, where the application was not filed in that language, file a translation of the application in that language within one month of the said date.

Article 30

Rejection of the application for declaration of invalidity as inadmissible

1. If the Office finds that the application for declaration of invalidity does not comply with Article 52 of Regulation (EC) No 6/2002, Article 28(1) of this Regulation or any other provision of Regulation (EC) No 6/2002 or this Regulation, it shall inform the applicant accordingly and shall call upon him/her to remedy the deficiencies within such time limit as it may specify.

If the deficiencies are not remedied within the specified time limit, the Office shall reject the application as inadmissible.

2. Where the Office finds that the required fees have not been paid, it shall inform the applicant accordingly and shall inform him/her that the application will be deemed not to have been filed if the required fees are not paid within a specified time limit.

If the required fees are paid after the expiry of the time limit specified, they shall be refunded to the applicant.

3. Any decision to reject an application for a declaration of invalidity pursuant to paragraph 1 shall be communicated to the applicant.

Where, pursuant to paragraph 2, an application is deemed not to have been filed, the applicant shall be informed accordingly.

Article 31

Examination of the application for a declaration of invalidity

1. If the Office does not reject the application for declaration of invalidity in accordance with Article 30, it shall communicate such application to the holder and shall request him/her to file his/her observations within such time limits as it may specify.
2. If the holder files no observations, the Office may base its decision concerning invalidity on the evidence before it.
3. Any observations filed by the holder shall be communicated to the applicant, who may be called upon by the Office to reply within specified time limits.
4. All communications pursuant to Article 53(2) of Regulation (EC) No 6/2002 and all observations filed in that respect shall be sent to the parties concerned.
5. The Office may call upon the parties to make a friendly settlement.

Article 32

Multiple applications for a declaration of invalidity

1. Where a number of applications for a declaration of invalidity have been filed relating to the same registered Community design, the Office may deal with them in one set of proceedings.

The Office may subsequently decide no longer to deal with them in that way.

2. If a preliminary examination of one or more applications reveals that the registered Community design may be invalid, the Office may suspend the other invalidity proceedings.

The Office shall inform the remaining applicants of any relevant decisions taken during such proceedings as are continued.

3. Once a decision declaring the invalidity of the design has become final, the applications in respect of which the proceedings have been suspended in accordance with paragraph 2 shall be deemed to have been disposed of and the applicants concerned shall be informed accordingly. Such disposition shall be considered to constitute a case which has not proceeded to judgment for the purposes of Article 70(4) of Regulation (EC) No 6/2002.
4. The Office shall refund 50 % of the invalidity fee referred to in Article 52(2) of Regulation (EC) No 6/2002 paid by each applicant whose application is deemed to have been disposed of in accordance with paragraphs 1, 2 and 3 of this Article.

Article 33

Participation of an alleged infringer

Where, pursuant to Article 54 of Regulation (EC) No 6/2002, an alleged infringer seeks to join the proceedings, he/she shall be subject to the relevant provisions of Articles 28, 29 and 30 of this Regulation, and shall in particular file a reasoned statement and pay the fee referred to in Article 52(2) of Regulation (EC) No 6/2002.

CHAPTER VI

APPEALS

Article 34

Content of the notice of appeal

1. The notice of appeal shall contain:

- (a) the name and address of the appellant in accordance with Article 1(1)(b);
- (b) where the appellant has appointed a representative, the name and the business address of the representative in accordance with Article 1(1)(e);
- (c) a statement identifying the decision which is contested and the extent to which amendment or cancellation of the decision is requested.

2. The notice of appeal shall be filed in the language of the proceedings in which the decision subject to the appeal was taken.

Article 35

Rejection of the appeal as inadmissible

1. If the appeal does not comply with Articles 55, 56 and 57 of Regulation (EC) No 6/2002 and Article 34(1)(c) and (2) of this Regulation, the Board of Appeal shall reject it as inadmissible, unless each deficiency has been remedied before the relevant time limit laid down in Article 57 of Regulation (EC) No 6/2002 has expired.

2. If the Board of Appeal finds that the appeal does not comply with other provisions of Regulation (EC) No 6/2002 or other provisions of this Regulation, in particular with Article 34(1)(a) and (b), it shall inform the appellant accordingly and shall request him/her to remedy the deficiencies noted within such time limit as it may specify. If the deficiencies are not remedied in good time, the Board of Appeal shall reject the appeal as inadmissible.

3. If the fee for appeal has been paid after expiry of the time limits for the filing of an appeal pursuant to Article 57 of Regulation (EC) No 6/2002, the appeal shall be deemed not to have been filed and the appeal fee shall be refunded to the appellant.

Article 36

Examination of appeals

1. Save as otherwise provided, the provisions relating to proceedings before the department which has made the decision against which the appeal is brought shall be applicable to appeal proceedings *mutatis mutandis*.

2. The Board of Appeal's decision shall contain:

- (a) a statement that it is delivered by the Board;
- (b) the date when the decision was taken;
- (c) the names of the Chairman and the other members of the Board of Appeal taking part;

- (d) the name of the competent employee of the registry;
- (e) the names of the parties and of their representatives;
- (f) a statement of the issues to be decided;
- (g) a summary of the facts;
- (h) the reasons;
- (i) the order of the Board of Appeal, including, where necessary, a decision on costs.

3. The decision shall be signed by the Chairman and the other members of the Board of Appeal and by the employee of the registry of the Board of Appeal.

Article 37

Reimbursement of appeal fees

The reimbursement of appeal fees shall be ordered in the event of interlocutory revision or where the Board of Appeal deems an appeal to be allowable, if such reimbursement is equitable by reason of a substantial procedural violation. In the event of interlocutory revision, reimbursement shall be ordered by the department whose decision has been impugned, and in other cases by the Board of Appeal.

CHAPTER VII

DECISIONS AND COMMUNICATIONS OF THE OFFICE

Article 38

Form of decisions

1. Decisions of the Office shall be in writing and shall state the reasons on which they are based.

Where oral proceedings are held before the Office, the decision may be given orally. Subsequently, the decision in writing shall be notified to the parties.

2. Decisions of the Office which are open to appeal shall be accompanied by a written communication indicating that notice of appeal must be filed in writing at the Office within two months of the date of notification of the decision from which appeal is to be made. The communications shall also draw the attention of the parties to the provisions laid down in Articles 55, 56 and 57 of Regulation (EC) No 6/2002.

The parties may not plead any failure to communicate the availability of such appeal proceedings.

Article 39

Correction of errors in decisions

In decisions of the Office, only linguistic errors, errors of transcription and obvious mistakes may be corrected. They shall be corrected by the department which took the decision, acting of its own motion or at the request of an interested party.

Article 40

Noting of loss of rights

1. If the Office finds that the loss of any rights results from Regulation (EC) No 6/2002 or this Regulation without any decision having been taken, it shall communicate this to the person concerned in accordance with Article 66 of Regulation (EC) No 6/2002, and shall draw his/her attention to the legal remedies set out in paragraph 2 of this Article.

2. If the person concerned considers that the finding of the Office is inaccurate, he/she may, within two months of notification of the communication referred to in paragraph 1, apply for a decision on the matter by the Office.

Such decision shall be given only if the Office disagrees with the person requesting it; otherwise the Office shall amend its finding and inform the person requesting the decision.

Article 41

Signature, name, seal

1. Any decision, communication or notice from the Office shall indicate the department or division of the Office as well as the name or the names of the official or officials responsible. They shall be signed by the official or officials, or, instead of a signature, carry a printed or stamped seal of the Office.

2. The President of the Office may determine that other means of identifying the department or division of the Office and the name of the official or officials responsible or an identification other than a seal may be used where decisions, communications or notices are transmitted by fax or any other technical means of communication.

CHAPTER VIII

ORAL PROCEEDINGS AND TAKING OF EVIDENCE

Article 42

Summons to oral proceedings

1. The parties shall be summoned to oral proceedings provided for in Article 64 of Regulation (EC) No 6/2002 and their attention shall be drawn to paragraph 3 of this Article. At least one month's notice of the summons shall be given unless the parties agree to a shorter time limit.

2. When issuing the summons, the Office shall draw attention to the points which in its opinion need to be discussed in order for the decision to be taken.

3. If a party who has been duly summoned to oral proceedings before the Office does not appear as summoned, the proceedings may continue without him/her.

Article 43

Taking of evidence by the Office

1. Where the Office considers it necessary to hear the oral evidence of parties, of witnesses or of experts or to carry out an inspection, it shall take a decision to that end, stating the means by which it intends to obtain evidence, the relevant facts to be proved and the date, time and place of the hearing or inspection.

If oral evidence from witnesses and experts is requested by a party, the decision of the Office shall determine the period of time within which the party filing the request must make known to the Office the names and addresses of the witnesses and experts whom the party wishes to be heard.

2. The period of notice given in the summons of a party, witness or expert to give evidence shall be at least one month, unless they agree to a shorter time limit.

The summons shall contain:

- (a) an extract from the decision mentioned in the first subparagraph of paragraph 1, indicating in particular the date, time and place of the hearing ordered and stating the facts regarding which the parties, witnesses and experts are to be heard;
- (b) the names of the parties to proceedings and particulars of the rights which the witnesses or experts may invoke pursuant to Article 45(2) to (5).

Article 44

Commissioning of experts

1. The Office shall decide in what form the report made by an expert whom it appoints shall be submitted.

2. The terms of reference of the expert shall include:

- (a) a precise description of his/her task;
- (b) the time limit laid down for the submission of the expert's report;
- (c) the names of the parties to the proceedings;
- (d) particulars of the claims which the expert may invoke pursuant to Article 45(2), (3) and (4).

3. A copy of any written report shall be submitted to the parties.

4. The parties may object to an expert on grounds of incompetence or on the same grounds as those on which objection may be made to an examiner or to a member of a Division or Board of Appeal pursuant to Article 132(1) and (3) of Council Regulation (EC) No 40/94(3). The department of the Office concerned shall rule on the objection.

Article 45

Costs of taking of evidence

1. The taking of evidence by the Office may be made conditional upon deposit with it, by the party who has requested the evidence to be taken, of a sum which shall be fixed by reference to an estimate of the costs.

2. Witnesses and experts who are summoned by and appear before the Office shall be entitled to reimbursement of reasonable expenses for travel and subsistence. An advance for those expenses may be granted to them by the Office. The first sentence shall apply also to witnesses and experts who appear before the Office without being summoned by it and who are heard as witnesses or experts.

3. Witnesses entitled to reimbursement under paragraph 2 shall also be entitled to appropriate compensation for loss of earnings, and experts shall be entitled to fees for their services. Those payments shall be made to the witnesses and experts after they have fulfilled their duties or tasks, where such witnesses and experts have been summoned by the Office on its own initiative.

4. The amounts and the advances for expenses to be paid pursuant to paragraphs 1, 2 and 3 shall be determined by the President of the Office and shall be published in the Official Journal of the Office.

The amounts shall be calculated on the same basis as the compensation and salaries received by officials in grades A 4 to A 8 as laid down in the Staff Regulations of officials of the European Communities and in Annex VII thereto.

5. Final liability for the amounts due or paid pursuant to paragraphs 1 to 4 shall lie with:

- (a) the Office where the Office, on its own initiative, considered it necessary to hear the oral evidence of witnesses or experts; or
- (b) the party concerned where that party requested the giving of oral evidence by witnesses or experts, subject to the decision on apportionment and fixing of costs pursuant to Articles 70 and 71 of Regulation (EC) No 6/2002 and Article 79 of this Regulation.

The party referred to in point (b) of the first subparagraph shall reimburse the Office for any advances duly paid.

Article 46

Minutes of oral proceedings and of evidence

1. Minutes of oral proceedings or the taking of evidence shall be drawn up, containing the essentials of the oral proceedings or of the taking of evidence, the relevant statements made by the parties, the testimony of the parties, witnesses or experts and the result of any inspection.

2. The minutes of the testimony of a witness, expert or party shall be read out or submitted to him/her so that he/she may examine them. It shall be noted in the minutes that this formality has been carried out and that the person who gave the testimony approved the minutes. Where his/her approval is not given, his/her objections shall be noted.

3. The minutes shall be signed by the employee who drew them up and by the employee who conducted the oral proceedings or taking of evidence.

4. The parties shall be provided with a copy of the minutes.

5. Upon request, the Office shall make available to the parties transcripts of recordings of the oral proceedings, in typescript or in any other machine-readable form.

The release of transcripts of those recordings shall be subject to the payment of the costs incurred

by the Office in making such transcript. The amount to be charged shall be determined by the President of the Office.

CHAPTER IX

NOTIFICATIONS

Article 47

General provisions on notifications

1. In proceedings before the Office, any notifications to be made by the Office shall take the form of the original document, of a copy thereof certified by, or bearing the seal of, the Office or of a computer print-out bearing such seal. Copies of documents emanating from the parties themselves shall not require such certification.

2. Notifications shall be made:

- (a) by post in accordance with Article 48;
- (b) by hand delivery in accordance with Article 49;
- (c) by deposit in a post box at the Office in accordance with Article 50;
- (d) by fax and other technical means in accordance with Article 51;
- (e) by public notification in accordance with Article 52.

Article 48

Notification by post

1. Decisions subject to a time limit for appeal, summonses and other documents as determined by the President of the Office shall be notified by registered letter with acknowledgement of delivery.

Decisions and communications subject to another time limit shall be notified by registered letter, unless the President of the Office determines otherwise.

All other communications shall be ordinary mail.

2. Notifications to addressees having neither their domicile nor their principal place of business nor an establishment in the Community and who have not appointed a representative in accordance with Article 77(2) of Regulation (EC) No 6/2002 shall be effected by posting the document requiring notification by ordinary mail to the last address of the addressee known to the Office.

Notification shall be deemed to have been effected when the posting has taken place.

3. Where notification is effected by registered letter, whether or not with acknowledgement of delivery, it shall be deemed to be delivered to the addressee on the 10th day following that of its posting, unless the letter has failed to reach the addressee or has reached him/her at a later date.

In the event of any dispute, it shall be for the Office to establish that the letter has reached its destination or to establish the date on which it was delivered to the addressee, as the case may be.

4. Notification by registered letter, with or without acknowledgement of delivery, shall be deemed to have been effected even if the addressee refuses to accept the letter.

5. To the extent that notification by post is not covered by paragraphs 1 to 4, the law of the State on the territory of which notification is made shall apply.

Article 49

Notification by hand delivery

Notification may be effected on the premises of the Office by hand delivery of the document to the addressee, who shall on delivery acknowledge its receipt.

Article 50

Notification by deposit in a post box at the Office

Notification may also be effected to addressees who have been provided with a post box at the Office, by depositing the document therein. A written notification of deposit shall be inserted in the files. The date of deposit shall be recorded on the document. Notification shall be deemed to have taken place on the fifth day following deposit of the document in the post box at the Office.

Article 51

Notification by fax and other technical means

1. Notification by fax shall be effected by transmitting either the original or a copy, as provided for in Article 47(1), of the document to be notified. The details of such transmission shall be determined by the President of the Office.

2. Details of notification by other technical means of communication shall be determined by the President of the Office.

Article 52

Public notification

1. If the address of the addressee cannot be established, or if notification in accordance with Article 48(1) has proved to be impossible even after a second attempt by the Office, notification shall be effected by public notice.

Such notice shall be published at least in the Community Designs Bulletin.

2. The President of the Office shall determine how the public notice is to be given and shall fix the beginning of the time limit of one month on the expiry of which the document shall be deemed to have been notified.

Article 53

Notification to representatives

1. If a representative has been appointed or where the applicant first named in a common application is considered to be the common representative pursuant to Article 61(1), notifications shall be addressed to that appointed or common representative.
2. If several representatives have been appointed for a single interested party, notification to any one of them shall be sufficient, unless a specific address for service has been indicated in accordance with Article 1(1)(e).
3. If several interested parties have appointed a common representative, notification of a single document to the common representative shall be sufficient.

Article 54

Irregularities in notification

Where a document has reached the addressee, if the Office is unable to prove that it has been duly notified or if provisions relating to its notification have not been observed, the document shall be deemed to have been notified on the date established by the Office as the date of receipt.

Article 55

Notification of documents in the case of several parties

Documents emanating from parties which contain substantive proposals, or a declaration of withdrawal of a substantive proposal, shall be notified to the other parties as a matter of course. Notification may be dispensed with where the document contains no new pleadings and the matter is ready for decision.

CHAPTER X

TIME LIMITS

Article 56

Calculation of time limits

1. Time limits shall be laid down in terms of full years, months, weeks or days.
2. The beginning of any time limit shall be calculated starting on the day following the day on which the relevant event occurred, the event being either a procedural step or the expiry of another time limit. Where that procedural step is a notification, the event considered shall be the receipt of the document notified, unless otherwise provided.
3. Where a time limit is expressed as one year or a certain number of years, it shall expire in the relevant subsequent year in the month having the same name and on the day having the same number as the month and the day on which the relevant event occurred. Where the relevant month has no

day with the same number the time limit shall expire on the last day of that month.

4. Where a time limit is expressed as one month or a certain number of months, it shall expire in the relevant subsequent month on the day which has the same number as the day on which the relevant event occurred. Where the day on which the relevant event occurred was the last day of a month or where the relevant subsequent month has no day with the same number the time limit shall expire on the last day of that month.

5. Where a time limit is expressed as one week or a certain number of weeks, it shall expire in the relevant subsequent week on the day having the same name as the day on which the relevant event occurred.

Article 57

Duration of time limits

1. Where Regulation (EC) No 6/2002 or this Regulation provide for a time limit to be specified by the Office, such time limit shall, when the party concerned has its domicile or its principal place of business or an establishment within the Community, be not less than one month, or, when those conditions are not fulfilled, not less than two months, and no more than six months.

The Office may, when this is appropriate under the circumstances, grant an extension of a time limit specified if such extension is requested by the party concerned and the request is submitted before the original time limit expires.

2. Where there are two or more parties, the Office may make the extension of a time limit subject to the agreement of the other parties.

Article 58

Expiry of time limits in special cases

1. If a time limit expires on a day on which the Office is not open for receipt of documents or on which, for reasons other than those referred to in paragraph 2, ordinary mail is not delivered in the locality in which the Office is located, the time limit shall extend until the first day thereafter on which the Office is open for receipt of documents and on which ordinary mail is delivered.

The days on which the Office is not open for receipt of documents shall be determined by the President of the Office before the commencement of each calendar year.

2. If a time limit expires on a day on which there is a general interruption or subsequent dislocation in the delivery of mail in a Member State or between a Member State and the Office, the time limit shall extend until the first day following the end of the period of interruption or dislocation, for parties having their residence or registered office in the State concerned or who have appointed representatives with a place of business in that State.

In the event of the Member State concerned being the State in which the Office is located, the first subparagraph shall apply to all parties.

The period referred to in the first subparagraph shall be as determined by the President of the Office.

3. Paragraphs 1 and 2 shall apply *mutatis mutandis* to the time limits provided for in Regulation (EC) No 6/2002 or this Regulation in the case of transactions to be carried out with the competent authority within the meaning of Article 35(1)(b) and (c) of Regulation (EC) No 6/2002.

4. If an exceptional occurrence such as natural disaster or strike interrupts or dislocates the proper functioning of the Office so that any communication from the Office to parties concerning the expiry of a time limit is delayed, acts to be completed within such a time limit may still be validly completed within one month of the notification of the delayed communication.

The date of commencement and the end of any such interruption or dislocation shall be as determined by the President of the Office.

CHAPTER XI

INTERRUPTION OF PROCEEDINGS AND WAIVING OF ENFORCED RECOVERY PROCEDURES

Article 59

Interruption of proceedings

1. Proceedings before the Office shall be interrupted:

- (a) in the event of the death or legal incapacity of the applicant for or holder of a registered Community design or of the person authorised by national law to act on his/her behalf;
- (b) in the event that the applicant for or holder of a registered Community design is, as a result of some action taken against his/her property, prevented for legal reasons from continuing the proceedings before the Office;
- (c) in the event of the death or legal incapacity of the representative of an applicant for or holder of a registered Community design or of his/her being prevented for legal reasons resulting from action taken against his/her property from continuing the proceedings before the Office.

To the extent that the events referred to in point (a) of the first subparagraph do not affect the authorisation of a representative appointed under Article 78 of Regulation (EC) No 6/2002, proceedings shall be interrupted only on application by such representative.

2. When, in the cases referred to in points (a) and (b) of the first subparagraph of paragraph 1, the Office has been informed of the identity of the person authorised to continue the proceedings before the Office, the Office shall communicate to such person and to any interested third parties that the proceedings shall be resumed as from a date to be fixed by the Office.

3. In the case referred to in paragraph 1(c), the proceedings shall be resumed when the Office has been informed of the appointment of a new representative of the applicant or when the Office has notified to the other parties the communication of the appointment of a new representative of the holder of the design.

If, three months after the beginning of the interruption of the proceedings, the Office has not been informed of the appointment of a new representative, it shall communicate that fact to the applicant for or holder of the registered Community design:

- (a) where Article 77(2) of Regulation (EC) No 6/2002 is applicable, that the Community design application will be deemed to be withdrawn if the information is not submitted within two months after that communication is notified; or
- (b) where Article 77(2) of Regulation (EC) No 6/2002 is not applicable, that the proceedings

will be resumed with the applicant for or holder as from the date on which that communication is notified.

4. The time limits, other than the time limit for paying the renewal fees, in force as regards the applicant for or holder of the Community design at the date of interruption of the proceedings, shall begin again as from the day on which the proceedings are resumed.

Article 60

Waiving of enforced recovery procedures

The President of the Office may waive action for the enforced recovery of any sum due where the sum to be recovered is minimal or where such recovery is too uncertain.

CHAPTER XII

REPRESENTATION

Article 61

Appointment of a common representative

1. If there is more than one applicant and the application for a registered Community design does not name a common representative, the applicant first named in the application shall be considered to be the common representative.

However, if one of the applicants is obliged to appoint a professional representative, such representative shall be considered to be the common representative unless the applicant named first in the application has also appointed a professional representative.

The first and second subparagraphs shall apply *mutatis mutandis* to third parties acting in common in applying for a declaration of invalidity, and to joint holders of a registered Community design.

2. If, during the course of proceedings, transfer is made to more than one person, and such persons have not appointed a common representative, paragraph 1 shall apply.

If such application is not possible, the Office shall require such persons to appoint a common representative within two months. If this request is not complied with, the Office shall appoint the common representative.

Article 62

Authorisations

1. Legal practitioners and professional representatives entered on the lists maintained by the Office pursuant to Article 78(1)(b) or (c) of Regulation (EC) No 6/2002 may file with the Office a signed authorisation for inclusion in the files.

Such authorisation shall be filed if the Office expressly requires it or, where there are several parties to the proceedings in which the representative acts before the Office, one of the parties expressly request it.

2. Employees acting on behalf of natural or legal persons pursuant to Article 77(3) of Regulation (EC) No 6/2002 shall file with the Office a signed authorisation for insertion in the files.
3. The authorisation may be filed in any of the official languages of the Community. It may cover one or more applications or registered Community designs or may be in the form of a general authorisation allowing the representative to act in respect of all proceedings before the Office to which the person who has issued it is a party.
4. Where, pursuant to paragraphs 1 or 2, an authorisation has to be filed, the Office shall specify a time limit within which such authorisation shall be filed. If the authorisation is not filed in due time, proceedings shall be continued with the represented person. Any procedural steps other than the filing of the application taken by the representative shall be deemed not to have been taken if the represented person does not approve them. The application of Article 77(2) of Regulation (EC) No 6/2002 shall remain unaffected.
5. Paragraphs 1, 2 and 3 shall apply *mutatis mutandis* to a document withdrawing an authorisation.
6. Any representative who has ceased to be authorised shall continue to be regarded as the representative until the termination of his/her authorisation has been communicated to the Office.
7. Subject to any provisions to the contrary contained therein, an authorisation shall not terminate *vis-à-vis* the Office upon the death of the person who gave it.
8. Where several representatives are appointed by the same party, they may, notwithstanding any provisions to the contrary in their authorisations, act either collectively or individually.
9. The authorisation of an association of representatives shall be deemed to be an authorisation of any representative who can establish that he/she practises within that association.

Article 63

Representation

Any notification or other communication addressed by the Office to the duly authorised representative shall have the same effect as if it had been addressed to the represented person.

Any communication addressed to the Office by the duly authorised representative shall have the same effect as if it originated from the represented person.

Article 64

Amendment of the special list of professional representatives for design matters

1. The entry of a professional representative in the special list of professional representatives for design matters, as referred to in Article 78(4) of Regulation (EC) No 6/2002, shall be deleted at his/her request.
2. The entry of a professional representative shall be deleted automatically:
 - (a) in the event of the death or legal incapacity of the professional representative;
 - (b) where the professional representative is no longer a national of a Member State, unless the President of the Office has granted an exemption pursuant to Article 78(6)(a) of Regulation (EC) No 6/2002;

- (c) where the professional representative no longer has his/her place of business or employment in the Community;
- (d) where the professional representative no longer possesses the entitlement referred to in the first sentence of Article 78(4)(c) of Regulation (EC) No 6/2002.

3. The entry of a professional representative shall be suspended of the Office's own motion where his/her entitlement to represent natural or legal persons before the Benelux Design Office or the central industrial property office of the Member State as referred to in the first sentence of Article 78(4)(c) of Regulation (EC) No 6/2002 has been suspended.

4. A person whose entry has been deleted shall, upon request pursuant to Article 78(5) of Regulation (EC) No 6/2002, be reinstated in the list of professional representatives if the conditions for deletion no longer exist.

5. The Benelux Design Office and the central industrial property offices of the Member States concerned shall, where they are aware thereof, promptly inform the Office of any relevant events referred to in paragraphs 2 and 3.

6. The amendments of the special list of professional representatives for design matters shall be published in the Official Journal of the Office.

CHAPTER XIII

WRITTEN COMMUNICATIONS AND FORMS

Article 65

Communication in writing or by other means

1. Subject to paragraph 2, applications for the registration of a Community design as well as any other application or declaration provided for in Regulation (EC) No 6/2002 and all other communications addressed to the Office shall be submitted as follows:

- (a) by submitting a signed original of the document in question to the Office, by post, personal delivery, or by any other means; annexes to documents submitted need not be signed;
- (b) by transmitting a signed original by fax in accordance with Article 66; or
- (c) by transmitting the contents of the communication by electronic means in accordance with Article 67.

2. Where the applicant avails himself of the possibility provided for in Article 36(1)(c) of Regulation (EC) No 6/2002 of filing a specimen of the design, the application and the specimen shall be submitted to the Office by a single mail in the form prescribed in paragraph 1(a) of this Article. If the application and the specimen, or specimens in the case of a multiple application, are not submitted by a single mail the Office shall not give a filing date until the last item has been received pursuant to Article 10(1) of this Regulation.

Article 66

Communication by fax

1. Where an application for registration of a Community design is submitted by fax and the application

contains a reproduction of the design pursuant to Article 4(1) which does not satisfy the requirements of that Article, the required reproduction suitable for registration and publication shall be submitted to the Office in accordance with Article 65(1)(a).

Where the reproduction is received by the Office within a time limit of one month from the date of the receipt of the fax, the application shall be deemed to have been received by the Office on the date on which the fax was received.

Where the reproduction is received by the Office after the expiry of that time limit, the application shall be deemed to have been received by the Office on the date on which the reproduction was received.

2. Where a communication received by fax is incomplete or illegible, or where the Office has reasonable doubts as to the accuracy of the transmission, the Office shall inform the sender accordingly and shall call upon him/her, within a time limit to be specified by the Office, to retransmit the original by fax or to submit the original in accordance with Article 65(1)(a).

Where that request is complied with within the time limit specified, the date of the receipt of the retransmission or of the original shall be deemed to be the date of the receipt of the original communication, provided that where the deficiency concerns the granting of a filing date for an application to register a Community design, the provisions on the filing date shall apply.

Where the request is not complied with within the time limit specified, the communication shall be deemed not to have been received.

3. Any communication submitted to the Office by fax shall be considered to be duly signed if the reproduction of the signature appears on the printout produced by the fax.

4. The President of the Office may determine additional requirements for communication by fax, such as the equipment to be used, technical details of communication, and methods of identifying the sender.

Article 67

Communication by electronic means

1. Applications for registration of a Community design may be submitted by electronic means, including the representation of the design, and notwithstanding Article 65(2) in the case of filing a specimen.

The conditions shall be laid down by the President of the Office.

2. The President of the Office shall determine the requirements for communication by electronic means, such as the equipment to be used, technical details of communication, and methods of identifying the sender.

3. Where a communication is sent by electronic means, Article 66(2) shall apply *mutatis mutandis*.

4. Where a communication is sent to the Office by electronic means, the indication of the name of the sender shall be deemed to be equivalent to the signature.

Article 68

Forms

1. The Office shall make available free of charge forms for the purpose of:

- (a) filing an application for a registered Community design;
 - (b) applying for the correction of an application or a registration;
 - (c) applying for the registration of a transfer and the transfer form and transfer document referred to in Article 23(4);
 - (d) applying for the registration of a licence;
 - (e) applying for renewal of registration of a registered Community design;
 - (f) applying for a declaration of invalidity of a registered Community design;
 - (g) applying for restitutio in integrum;
 - (h) taking an appeal;
 - (i) authorising a representative, in the form of an individual authorisation and in the form of a general authorisation.
2. The Office may make other forms available free of charge.
 3. The Office shall make available the forms referred to in paragraphs 1 and 2 in all the official languages of the Community.
 4. The Office shall place the forms at the disposal of the Benelux Design Office and of the Member States' central industrial property offices free of charge.
 5. The Office may also make available the forms in machine-readable form.
 6. Parties to proceedings before the Office should use the forms provided by the Office, or copies of those forms, or forms with the same content and format as those forms, such as forms generated by means of electronic data processing.
 7. Forms shall be completed in such a manner as to permit an automated input of the content into a computer, such as by character recognition or scanning.

CHAPTER XIV

INFORMATION TO THE PUBLIC

Article 69

Register of Community Designs

1. The Register may be maintained in the form of an electronic database.
2. The Register shall contain the following entries:
 - (a) the date of filing the application;
 - (b) the file number of the application and the file number of each individual design included in a multiple application;
 - (c) the date of the publication of the registration;
 - (d) the name, the address and the nationality of the applicant and the State in which he/she is domiciled or has his/her seat or establishment;
 - (e) the name and business address of the representative, other than an employee acting as representative in accordance with the first subparagraph of Article 77(3) of Regulation (EC) No 6/2002; where

there is more than one representative, only the name and business address of the first named representative, the name being followed by the words "et al", shall be recorded; where an association of representatives is appointed, only the name and address of the association shall be recorded;

- (f) the representation of the design;
- (g) an indication of the products by their names, preceded by the numbers of the classes and subclasses of the Locarno classification, and grouped accordingly;
- (h) particulars of claims of priority pursuant to Article 42 of Regulation (EC) No 6/2002;
- (i) particulars of claims of exhibition priority pursuant to Article 44 of Regulation (EC) No 6/2002;
- (j) where applicable, the citation of the designer or of the team of designers pursuant to Article 18 of Regulation (EC) No 6/2002, or a statement that the designer or the team of designers has waived the right to be cited;
- (k) the language in which the application was filed and the second language which the applicant has indicated in his/her application, pursuant to Article 98(2) of Regulation (EC) No 6/2002;
- (l) the date of registration of the design in the Register and the registration number;
- (m) a mention of any request for deferment of publication pursuant to Article 50(3) of Regulation (EC) No 6/2002, specifying the date of expiry of the period of deferment;
- (n) a mention that a specimen was filed pursuant to Article 5;
- (o) a mention that a description was filed pursuant to Article 1(2)(a).

3. In addition to the entries set out in paragraph 2 the Register shall contain the following entries, each accompanied by the date of recording such entry:

- (a) changes in the name, the address or the nationality of the holder or in the State in which he/she is domiciled or has his/her seat or establishment;
- (b) changes in the name or business address of the representative, other than a representative falling within the first subparagraph of Article 77(3) of Regulation (EC) No 6/2002;
- (c) when a new representative is appointed, the name and business address of that representative;
- (d) a mention that a multiple application or registration has been divided into separate applications or registrations pursuant to Article 37(4) of Regulation (EC) No 6/2002;
- (e) the notice of an amendment to the design pursuant to Article 25(6) of Regulation (EC) No 6/2002, including, if applicable, a reference to the disclaimer made or the court decision or the decision by the Office declaring the partial invalidity of the design right, as well as corrections of mistakes and errors pursuant to Article 20 of this Regulation;
- (f) a mention that entitlement proceedings have been instituted under Article 15(1) of Regulation (EC) No 6/2002 in respect of a registered Community design;
- (g) the final decision or other termination of proceedings pursuant to Article 15(4)(b) of Regulation (EC) No 6/2002 concerning entitlement proceedings;
- (h) a change of ownership pursuant to Article 15(4)(c) of Regulation (EC) No 6/2002;
- (i) transfers pursuant to Article 28 of Regulation (EC) No 6/2002;
- (j) the creation or transfer of a right in rem pursuant to Article 29 of Regulation (EC) No 6/2002 and the nature of the right in rem;

- (k) levy of execution pursuant to Article 30 of Regulation (EC) No 6/2002 and insolvency proceedings pursuant to Article 31 of that Regulation;
 - (l) the grant or transfer of a licence pursuant to Article 16(2) or Article 32 of Regulation (EC) No 6/2002 and, where applicable, the type of licence pursuant to Article 25 of this Regulation;
 - (m) renewal of the registration pursuant to Article 13 of Regulation (EC) No 6/2002 and the date from which it takes effect;
 - (n) a record of the determination of the expiry of the registration;
 - (o) a declaration of total or partial surrender by the holder pursuant to Article 51(1) and (3) of Regulation (EC) No 6/2002;
 - (p) the date of submission of an application or of the filing of a counterclaim for a declaration of invalidity pursuant, respectively, to Article 52 or Article 86(2) of Regulation (EC) No 6/2002;
 - (q) the date and content of the decision on the application or counterclaim for declaration of invalidity or any other termination of proceedings pursuant, respectively, to Article 53 or Article 86(4) of Regulation (EC) No 6/2002;
 - (r) a mention pursuant to Article 50(4) of Regulation (EC) No 6/2002 that the registered Community design is deemed from the outset not to have had the effects specified in that Regulation;
 - (s) the cancellation of the representative recorded pursuant to paragraph 2(e);
 - (t) the modification or cancellation from the Register of the items referred to in points (j), (k) and (l).
4. The President of the Office may determine that items other than those referred to in paragraphs 2 and 3 shall be entered in the Register.
5. The holder shall be notified of any change in the Register.
6. Subject to Article 73, the Office shall provide certified or uncertified extracts from the Register on request, on payment of a fee.

CHAPTER XV

COMMUNITY DESIGNS BULLETIN AND DATA BASE

Article 70

Community Designs Bulletin

1. The Office shall determine the frequency of the publication of the Community Designs Bulletin and the manner in which such publication shall take place.
2. Without prejudice to the provisions of Article 50(2) of Regulation (EC) No 6/2002 and subject to Articles 14 and 16 of this Regulation relating to deferment of publication, the Community Designs Bulletin shall contain publications of registration and of entries made in the Register as well as other particulars relating to registrations of designs whose publication is prescribed by Regulation (EC) No 6/2002 or by this Regulation.
3. Where particulars whose publication is prescribed in Regulation (EC) No 6/2002 or in this Regulation are published in the Community Designs Bulletin, the date of issue shown on the Bulletin

shall be taken as the date of publication of the particulars.

4. The information the publication of which is prescribed in Articles 14 and 16 shall, where appropriate, be published in all the official languages of the Community.

Article 71

Database

1. The Office shall maintain an electronic database with the particulars of applications for registration of Community designs and entries in the Register. The Office may, subject to the restrictions prescribed by Article 50(2) and (3) of Regulation (EC) No 6/2002, make available the contents of that database for direct access or on CD-ROM or in any other machine-readable form.

2. The President of the Office shall determine the conditions of access to the database and the manner in which the contents of this database may be made available in machine-readable form, including the charges for those acts.

CHAPTER XVI

INSPECTION OF FILES AND KEEPING OF FILES

Article 72

Parts of the file excluded from inspection

The parts of the file which shall be excluded from inspection pursuant to Article 74(4) of Regulation (EC) No 6/2002 shall be:

- (a) documents relating to exclusion or objection pursuant to Article 132 of Regulation (EC) No 40/94, the provisions of that Article being considered for this purpose as applying *mutatis mutandis* to registered Community designs and to applications for these;
- (b) draft decisions and opinions, and all other internal documents used for the preparation of decisions and opinions;
- (c) parts of the file which the party concerned showed a special interest in keeping confidential before the application for inspection of the files was made, unless inspection of such part of the file is justified by overriding legitimate interests of the party seeking inspection.

Article 73

Inspection of the Register of Community Designs

Where the registration is subject to a deferment of publication pursuant to Article 50(1) of Regulation (EC) No 6/2002:

- (a) access to the Register to persons other than the holder shall be limited to the name of the holder, the name of any representative, the date of filing and registration, the file number of the application and the mention that publication is deferred;

- (b) the certified or uncertified extracts from the Register shall contain only the name of the holder, the name of any representative, the date of filing and registration, the file number of the application and the mention that publication is deferred, except where the request has been made by the holder or his/her representative.

Article 74

Procedures for the inspection of files

1. Inspection of the files of registered Community designs shall either be of the original document, or of copies thereof, or of technical means of storage if the files are so stored.

The request for inspection of the files shall not be deemed to have been made until the required fee has been paid.

The means of inspection shall be determined by the President of the Office.

2. Where inspection of the files relates to an application for a registered Community design or to a registered Community design which is subject to deferment of publication, which, being subject to such deferment, has been surrendered before or on the expiry of that period or which, pursuant to Article 50(4) of Regulation (EC) No 6/2002, is deemed from the outset not to have had the effects specified in that Regulation, the request shall contain an indication and evidence to the effect that:

- (a) the applicant for or holder of the Community design has consented to the inspection; or
- (b) the person requesting the inspection has established a legitimate interest in the inspection of the file, in particular where the applicant for or holder of the Community design has stated that after the design has been registered he/she will invoke the rights under it against the person requesting the inspection.

3. Inspection of the files shall take place on the premises of the Office.

4. On request, inspection of the files shall be effected by means of issuing copies of file documents. Such copies shall incur fees.

5. The Office shall issue on request certified or uncertified copies of the application for a registered Community design or of those file documents of which copies may be issued pursuant to paragraph 4 upon payment of a fee.

Article 75

Communication of information contained in the files

Subject to the restrictions provided for in Article 74 of Regulation (EC) No 6/2002 and Articles 72 and 73 of this Regulation, the Office may, upon request, communicate information from any file of a Community design applied for or of a registered Community design, subject to payment of a fee.

However, the Office may require the applicant to inspect the file in situ, should it deem that to be appropriate in view of the quantity of information to be supplied.

Article 76

Keeping of files

1. The Office shall keep the files relating to Community design applications and to registered Community designs for at least five years from the end of the year in which:

- (a) the application is rejected or withdrawn;
- (b) the registration of the registered Community design expires definitively;
- (c) the complete surrender of the registered Community design is registered pursuant to Article 51 of Regulation (EC) No 6/2002;
- (d) the registered Community design is definitively removed from the Register;
- (e) the registered Community design is deemed not to have had the effects specified in Regulation (EC) No 6/2002 pursuant to Article 50(4) thereof.

2. The President of the Office shall determine the form in which the files shall be kept.

CHAPTER XVII

ADMINISTRATIVE COOPERATION

Article 77

Exchange of information and communications between the Office and the authorities of the Member States

1. The Office and the central industrial property offices of the Member States and the Benelux Design Office shall, upon request, communicate to each other relevant information about the filing of applications for registered Community designs, Benelux designs or national registered designs and about proceedings relating to such applications and the designs registered as a result thereof. Such communications shall not be subject to the restrictions provided for in Article 74 of Regulation (EC) No 6/2002.

2. Communications between the Office and the courts or authorities of the Member States which arise out of the application of Regulation (EC) No 6/2002 or this Regulation shall be effected directly between those authorities.

Such communication may also be effected through the central industrial property offices of the Member States or the Benelux Design Office.

3. Expenditure in respect of communications pursuant to paragraphs 1 and 2 shall be chargeable to the authority making the communications, which shall be exempt from fees.

Article 78

Inspection of files by or via courts or authorities of the Member States

1. Inspection of files relating to Community designs applied for or registered Community designs

by courts or authorities of the Member States shall if so requested be of the original documents or of copies thereof. Article 74 shall not apply.

2. Courts or public prosecutors' offices of the Member States may, in the course of proceedings before them, open files or copies thereof transmitted by the Office to inspection by third parties. Such inspection shall be subject to Article 74 of Regulation (EC) No 6/2002.

3. The Office shall not charge any fee for inspections pursuant to paragraphs 1 and 2.

4. The Office shall, at the time of transmission of the files or copies thereof to the courts or public prosecutors' offices of the Member States, indicate the restrictions to which the inspection of files relating to Community designs applied for or registered Community designs is subject pursuant to Article 74 of Regulation (EC) No 6/2002 and Article 72 of this Regulation.

CHAPTER XVIII

COSTS

Article 79

Apportionment and fixing of costs

1. Apportionment of costs pursuant to Article 70(1) and (2) of Regulation (EC) No 6/2002 shall be dealt with in the decision on the application for a declaration of invalidity of a registered Community design, or in the decision on the appeal.

2. Apportionment of costs pursuant to Article 70(3) and (4) of Regulation (EC) No 6/2002 shall be dealt with in a decision on costs by the Invalidity Division or the Board of Appeal.

3. A bill of costs, with supporting evidence, shall be attached to the request for the fixing of costs provided for in the first sentence of Article 70(6) of Regulation (EC) No 6/2002.

The request shall be admissible only if the decision in respect of which the fixing of costs is required has become final. Costs may be fixed once their credibility is established.

4. The request provided for in the second sentence of Article 70(6) of Regulation (EC) No 6/2002 for a review of the decision of the registry on the fixing of costs, stating the reasons on which it is based, must be filed at the Office within one month of the date of notification of the awarding of costs.

It shall not be deemed to be filed until the fee for reviewing the amount of the costs has been paid.

5. The Invalidity Division or the Board of Appeal, as the case may be, shall take a decision on the request referred to in paragraph 4 without oral proceedings.

6. The fees to be borne by the losing party pursuant to Article 70(1) of Regulation (EC) No 6/2002 shall be limited to the fees incurred by the other party for the application for a declaration of invalidity and/or for the appeal.

7. Costs essential to the proceedings and actually incurred by the successful party shall be borne by the losing party in accordance with Article 70(1) of Regulation (EC) No 6/2002 on the basis of the following maximum rates:

- (a) travel expenses of one party for the outward and return journey between the place of residence or the place of business and the place where oral proceedings are held or where evidence is taken,

as follows:

- (i) the cost of the first-class rail fare including usual transport supplements where the total distance by rail does not exceed 800 km;
- (ii) the cost of the tourist-class air fare where the total distance by rail exceeds 800 km or the route includes a sea crossing;
- (b) subsistence expenses of one party equal to the daily subsistence allowance for officials in grades A 4 to A 8 as laid down in Article 13 of Annex VII to the Staff Regulations of officials of the European Communities;
- (c) travel expenses of representatives within the meaning of Article 78(1) of Regulation (EC) No 6/2002 and of witnesses and of experts, at the rates provided for in point (a);
- (d) subsistence expenses of representatives within the meaning of Article 78(1) of Regulation (EC) No 6/2002 and of witnesses and experts, at the rates referred to in point (b);
- (e) costs entailed in the taking of evidence in the form of examination of witnesses, opinions by experts or inspection, up to EUR 300 per proceedings;
- (f) costs of representation, within the meaning of Article 78(1) of Regulation (EC) No 6/2002:
 - (i) of the applicant in proceedings relating to invalidity of a registered Community design up to EUR 400;
 - (ii) of the holder in proceedings relating to invalidity of a registered Community design up to EUR 400;
 - (iii) of the appellant in appeal proceedings up to EUR 500;
 - (iv) of the defendant in appeal proceedings up to EUR 500;
- (g) where the successful party is represented by more than one representative within the meaning of Article 78(1) of the Regulation (EC) No 6/2002, the losing party shall bear the costs referred to in points (c), (d) and (f) for one such person only;
- (h) the losing party shall not be obliged to reimburse the successful party for any costs, expenses and fees other than those referred to in points (a) to (g).

Where the taking of evidence in any of the proceedings referred to in point (f) of the first subparagraph involves the examination of witnesses, opinions by experts or inspection, an additional amount shall be granted for representation costs of up to EUR 600 per proceedings.

CHAPTER XIX

LANGUAGES

Article 80

Applications and declarations

Without prejudice to Article 98(4) of Regulation (EC) No 6/2002:

- (a) any application or declaration relating to an application for a registered Community design may be filed in the language used for filing the application or in the second language indicated by the applicant in his/her application;

- (b) any application or declaration other than an application for declaration of invalidity pursuant to Article 52 of Regulation (EC) No 6/2002, or declaration of surrender pursuant to Article 51 of that Regulation relating to a registered Community design may be filed in one of the languages of the Office;
- (c) when any of the forms provided by the Office pursuant to Article 68 is used, such forms may be used in any of the official languages of the Community, provided that the form is completed in one of the languages of the Office, as far as textual elements are concerned.

Article 81

Written proceedings

1. Without prejudice to Article 98(3) and (5) of Regulation (EC) No 6/2002 and save as otherwise provided in this Regulation, in written proceedings before the Office a party may use any language of the Office.

If the language chosen is not the language of the proceedings, the party shall supply a translation into that language within one month of the date of the submission of the original document.

Where the applicant for a registered Community design is the sole party to proceedings before the Office and the language used for the filing of the application for the registered Community design is not one of the languages of the Office, the translation may also be filed in the second language indicated by the applicant in his/her application.

2. Save as otherwise provided in this Regulation, documents to be used in proceedings before the Office may be filed in any official language of the Community.

Where the language of such documents is not the language of the proceedings the Office may require that a translation be supplied, within a time limit specified by it, in that language or, at the choice of the party to the proceeding, in any language of the Office.

Article 82

Oral proceedings

1. Any party to oral proceedings before the Office may, in place of the language of proceedings, use one of the other official languages of the Community, on condition that he/she makes provision for interpretation into the language of proceedings.

Where the oral proceedings are held in a proceeding concerning the application for registration of a design the applicant may use either the language of the application or the second language indicated by him/her.

2. In oral proceedings concerning the application for registration of a design, the staff of the Office may use either the language of the application or the second language indicated by the applicant.

In all other oral proceedings, the staff of the Office may use, in place of the language of the proceedings, one of the other languages of the Office, on condition that the party or parties to the proceedings agree(s) to such use.

3. With regard to the taking of evidence, any party to be heard, witness or expert who is unable

to express himself/herself adequately in the language of proceedings, may use any of the official languages of the Community.

Where the taking of evidence is decided upon following a request by a party to the proceedings, parties to be heard, witnesses or experts who express themselves in languages other than the language of proceedings may be heard only if the party who made the request makes provision for interpretation into that language.

In proceedings concerning the application for registration of a design, in place of the language of the application, the second language indicated by the applicant may be used.

In any proceedings with only one party, the Office may at the request of the party concerned permit derogation from the provisions in this paragraph.

4. If the parties and the Office so agree, any official language of the Community may be used in oral proceedings.

5. The Office shall, if necessary, make provision at its own expense for interpretation into the language of proceedings, or, where appropriate, into its other languages, unless this interpretation is the responsibility of one of the parties to the proceedings.

6. Statements by staff of the Office, by parties to the proceedings and by witnesses and experts, made in one of the languages of the Office during oral proceedings shall be entered in the minutes in the language employed. Statements made in any other language shall be entered in the language of proceedings.

Corrections to the application for or the registration of a Community design shall be entered in the minutes in the language of proceedings.

Article 83

Certification of translations

1. When a translation of any document is to be filed, the Office may require the filing, within a time limit to be specified by it, of a certificate that the translation corresponds to the original text.

Where the certificate relates to the translation of a previous application pursuant to Article 42 of Regulation (EC) No 6/2002, such time limit shall not be less than three months after the date of filing of the application.

Where the certificate is not filed within that time limit, the document shall be deemed not to have been received.

2. The President of the Office may determine the manner in which translations are certified.

Article 84

Legal authenticity of translations

In the absence of evidence to the contrary, the Office may assume that a translation corresponds to the relevant original text.

CHAPTER XX

RECIPROCITY, TRANSITION PERIOD AND ENTRY INTO FORCE

Article 85

Publication of reciprocity

1. If necessary, the President of the Office shall request the Commission to enquire whether a State which is not party to the Paris Convention for the Protection of Industrial Property or to the Agreement establishing the World Trade Organisation grants reciprocal treatment within the meaning of Article 41(5) Regulation (EC) No 6/2002.

2. If the Commission determines that reciprocal treatment in accordance with paragraph 1 is granted, it shall publish a communication to that effect in the Official Journal of the European Communities.

3. Article 41(5) of Regulation (EC) No 6/2002 shall apply from the date of publication in the Official Journal of the European Communities of the communication referred to in paragraph 2, unless the communication states an earlier date from which it is applicable.

Article 41(5) of Regulation (EC) No 6/2002 shall cease to be applicable from the date of publication in the Official Journal of the European Communities of a communication of the Commission stating that reciprocal treatment is no longer granted, unless the communication states an earlier date from which it is applicable.

4. Communications referred to in paragraphs 2 and 3 shall also be published in the Official Journal of the Office.

Article 86

Transition period

1. Any application for registration of a Community design filed no more than three months before the date fixed pursuant to Article 111(2) of Regulation (EC) No 6/2002 shall be marked by the Office with the filing date determined pursuant to that provision and with the actual date of receipt of the application.

2. With regard to the application, the priority period of six months provided for in Articles 41 and 44 of Regulation (EC) No 6/2002 shall be calculated from the date fixed pursuant to Article 111(2) of that Regulation.

3. The Office may issue a receipt to the applicant prior to the date fixed pursuant to Article 111(2) of Regulation (EC) No 6/2002.

4. The Office may examine the applications prior to the date fixed pursuant to Article 111(2) of Regulation (EC) No 6/2002 and communicate with the applicant with a view to remedying any deficiencies prior to that date.

Any decisions with regard to such applications may be taken only after that date.

5. Where the date of receipt of an application for the registration of a Community design by the Office, by the central industrial property office of a Member State or by the Benelux Design Office is before the commencement of the three-month period specified in Article 111(3) of Regulation (EC) No 6/2002 the application shall be deemed not to have been filed.

The applicant shall be informed accordingly and the application shall be sent back to him/her.

Article 87

Entry into force

This Regulation shall enter into force on the seventh day following its publication in the Official Journal of the European Communities.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 21 October 2002.

For the Commission

Frederik Bolkestein

Member of the Commission

Industrial property: Registration of "Community Designs" from 1 April 2003 - frequently asked questions

Reference: MEMO/03/77 Date: 01/04/2003

HTML: [EN](#) [FR](#) [DE](#)PDF: [EN](#) [FR](#) [DE](#)DOC: [EN](#) [FR](#) [DE](#)

MEMO/03/77

Brussels, 1st April 2003

Industrial property: Registration of "Community Designs" from 1 April 2003 - frequently asked questions

The Office for Harmonisation in the Internal Market (OHIM) in Alicante will register Community designs as from 1st April 2003, under the EU's new Community system for the protection of designs. This system has been set up under a Regulation adopted by the EU's Council of Ministers on 12 December 2001, after a proposal from the European Commission. The registration procedure is simple and inexpensive. Unregistered designs will also be protected.

What are the objectives of the new system?

To reduce legal obstacles to the circulation of design goods within the Internal Market and to ensure fair competition in this respect.

The system will foster creativity and innovation by making it easier to protect designs throughout the Internal Market with a single application. It will also help fight counterfeiting and piracy.

How does the system work?

Community Designs registered by the OHIM will enjoy protection in all fifteen Member States.

Procedural burdens on applicants will be kept to a minimum: in particular, there will be no need for designs submitted to undergo, before registration is granted, a detailed examination in order to ensure they qualify for protection.

Instead, the OHIM will be able to annul non-qualifying registrations after invalidity proceedings.

Member States' Community design courts will also be able to decide, if appropriate, that a registered design should not in fact be entitled to protection, following a counterclaim for a declaration of invalidity in the context of litigation arising from an alleged infringement of that protection.

Exactly what protection is conferred by the registration of a design?

Holders of registered designs will have exclusive rights to use the design concerned and to prevent any third party from using it anywhere within the European Union. They will be protected against both deliberate copying and the independent development of a similar design

How long will this protection last?

For up to 25 years. Registrations will need to be renewed every five years up to that maximum.

What is the cost of registering designs?

The basic registration fee for a first design will be € 230, with lower fees for any further design registered at the same time. Renewals will cost € 90 for a first renewal up to € 180 for a maximum fourth renewal.

A full table of costs is annexed.

What criteria must a design meet to be eligible for protection?

To be eligible for protection, designs must be **new** and must have **an individual character**. In other words it must be apparent to the public that they are different from products which existed previously.

What about unregistered designs? Will there be any protection at EU level for them?

Yes. Unregistered designs must meet the same criteria as registered ones - they must be new and have an individual character - in order to enjoy protection.

This protection will be applicable from the date of disclosure of designs to the public within the European Union. That disclosure may occur through designs going on sale or through prior marketing or publicity. The relevant designs will be protected for **three years**.

The main difference in the **level** of protection afforded will be that a Registered Community Design will be protected against both deliberate copying and the independent development of a similar design. An unregistered design will be protected only against deliberate copying.

How long will it be before designs can be registered in practice?

Designs can be registered as of now. In order to get the system up and running immediately, the OHIM has been accepting pre-applications since 2 January 2003.

Can companies still register designs under national law?

Companies will still be able to choose to register designs under national law, as national design protection, as harmonised by the Design Protection Directive (98/71/EC, see below), will continue to exist in parallel with Community design protection.

How much will all this cost the taxpayer?

The aim is that fee revenue will enable the OHIM to cover the costs it incurs in setting up and managing the system.

What is the historical background to the introduction of the Community Design system?

Since 1993, when it brought forward its first proposal on the EU-wide protection of designs, the Commission has viewed this as a high priority.

The first step was achieved in 1998, with the adoption of the **Directive on Design Protection** (98/71/EC) harmonising the main rules governing designs registered in the Member States.

However, until now, designs have had to be registered separately in every individual Member State where protection was sought. This means there has continued to be a potential obstacle to the free movement of those products which incorporate designs, which are the subject of national rights, held in different countries by different entities.

In order to remove this barrier to the efficient working of the Internal Market, the **Regulation on Community Designs** was adopted by the Council on 12 December 2001 (see IP/01/1803), after a proposal from the Commission in June 1999 (see IP/99/407). This amended the earlier proposal from 1993, in order to ensure compatibility with the Directive.

The Commission then adopted on 22 October 2002 a Regulation of its own giving the OHIM **the administrative tools** it needed to operate the system, such as the registration and cancellation of designs and the procedure for appeals (see IP/02/1535).

Finally, a second Commission Regulation adopted on 19 December 2002 **set the fees** payable for the registration of Community Designs (see IP/02/1926).

Are there any types of design, which are not covered by the Community Design system?

Component parts not visible once incorporated into complex products, designs dictated by function of the product - for example certain parts of a shaver which must have a certain shape in order to work - and "must-fit" parts of complex products, for example electrical or other interconnections (with the exception of connections in modular systems such as lego) will not be protected under the Community Design.

Furthermore, in line with Directive 98/71, designs which constitute a component part of a complex product will not be protected when used for the purpose of repairing that complex product so as to restore its original appearance. The Commission intends to make parallel proposals to amend the spare parts provisions of both the Directive and the Regulation, in 2004.

What is the relationship with the Community trademark system?

The procedures for applying for registration of Community Designs are aligned as closely as possible with those set up for registering Community Trade Marks under the equivalent Commission Regulation adopted in 1995. This is to ensure that the registration procedures dealt with by the OHIM are as coherent and convenient as possible for future users of the system.

Where can I get more information and detailed instructions on how to register a design?

The full text of the Regulation is available at:

http://www.europa.eu.int/comm/internal_market/en/indprop/design/index.htm

Further practical details are available on the OHIM website at:

<http://oami.eu.int/>

Fees for the registration of Community Designs

Reason for Fee	Fee	Additional fee (designs 2-10 each)	Additional fee (designs 11+ each)
Registration	â,-230	â,-115	â,-50
Publication	â,-120	â,-60	â,-30

**Directive 98/71/EC of the European Parliament and of the Council
the Councilthe CouncilOctober 1998 on the legal protection of designs**

DIRECTIVE 98/71/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 13 October 1998 on the legal protection of designs

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community and in particular Article 100a thereof,

Having regard to the proposal by the Commission (1),

Having regard to the opinion of the Economic and Social Committee (2),

Acting in accordance with the procedure laid down in Article 189b of the Treaty (3), in the light of the joint text approved by the Conciliation Committee on 29 July 1998,

- (1) Whereas the objectives of the Community, as laid down in the Treaty, include laying the foundations of an ever closer union among the peoples of Europe, fostering closer relations between Member States of the Community, and ensuring the economic and social progress of the Community countries by common action to eliminate the barriers which divide Europe; whereas to that end the Treaty provides for the establishment of an internal market characterised by the abolition of obstacles to the free movement of goods and also for the institution of a system ensuring that competition in the internal market is not distorted; whereas an approximation of the laws of the Member States on the legal protection of designs would further those objectives;
- (2) Whereas the differences in the legal protection of designs offered by the legislation of the Member States directly affect the establishment and functioning of the internal market as regards goods embodying designs; whereas such differences can distort competition within the internal market;
- (3) Whereas it is therefore necessary for the smooth functioning of the internal market to approximate the design protection laws of the Member States;
- (4) Whereas, in doing so, it is important to take into consideration the solutions and the advantages with which the Community design system will provide undertakings wishing to acquire design rights;
- (5) Whereas it is unnecessary to undertake a full-scale approximation of the design laws of the Member States, and it will be sufficient if approximation is limited to those national provisions of law which most directly affect the functioning of the internal market; whereas provisions on sanctions, remedies and enforcement should be left to national law; whereas the objectives of this limited approximation cannot be sufficiently achieved by the Member States acting alone;
- (6) Whereas Member States should accordingly remain free to fix the procedural provisions concerning registration, renewal and invalidation of design rights and provisions concerning the effects of such invalidity;
- (7) Whereas this Directive does not exclude the application to designs of national or Community legislation providing for protection other than that conferred by registration or publication as design, such as legislation relating to unregistered design rights, trade marks, patents and utility models, unfair competition or civil liability;
- (8) Whereas, in the absence of harmonisation of copyright law, it is important to establish the principle of cumulation of protection under specific registered design protection law and under copyright law, whilst leaving Member States free to establish the extent of copyright protection and the conditions under which such protection is conferred;

-
- (9) Whereas the attainment of the objectives of the internal market requires that the conditions for obtaining a registered design right be identical in all the Member States; whereas to that end it is necessary to give a unitary definition of the notion of design and of the requirements as to novelty and individual character with which registered design rights must comply;
 - (10) Whereas it is essential, in order to facilitate the free movement of goods, to ensure in principle that registered design rights confer upon the right holder equivalent protection in all Member States;
 - (11) Whereas protection is conferred by way of registration upon the right holder for those design features of a product, in whole or in part, which are shown visibly in an application and made available to the public by way of publication or consultation of the relevant file;
 - (12) Whereas protection should not be extended to those component parts which are not visible during normal use of a product, or to those features of such part which are not visible when the part is mounted, or which would not, in themselves, fulfil the requirements as to novelty and individual character; whereas features of design which are excluded from protection for these reasons should not be taken into consideration for the purpose of assessing whether other features of the design fulfil the requirements for protection;
 - (13) Whereas the assessment as to whether a design has individual character should be based on whether the overall impression produced on an informed user viewing the design clearly differs from that produced on him by the existing design corpus, taking into consideration the nature of the product to which the design is applied or in which it is incorporated, and in particular the industrial sector to which it belongs and the degree of freedom of the designer in developing the design;
 - (14) Whereas technological innovation should not be hampered by granting design protection to features dictated solely by a technical function; whereas it is understood that this does not entail that a design must have an aesthetic quality; whereas, likewise, the interoperability of products of different makes should not be hindered by extending protection to the design of mechanical fittings; whereas features of a design which are excluded from protection for these reasons should not be taken into consideration for the purpose of assessing whether other features of the design fulfil the requirements for protection;
 - (15) Whereas the mechanical fittings of modular products may nevertheless constitute an important element of the innovative characteristics of modular products and present a major marketing asset and therefore should be eligible for protection;
 - (16) Whereas a design right shall not subsist in a design which is contrary to public policy or to accepted principles of morality; whereas this Directive does not constitute a harmonisation of national concepts of public policy or accepted principles of morality;
 - (17) Whereas it is fundamental for the smooth functioning of the internal market to unify the term of protection afforded by registered design rights;
 - (18) Whereas the provisions of this Directive are without prejudice to the application of the competition rules under Articles 85 and 86 of the Treaty;
 - (19) Whereas the rapid adoption of this Directive has become a matter of urgency for a number of industrial sectors; whereas full-scale approximation of the laws of the Member States on the use of protected designs for the purpose of permitting the repair of a complex product so as to restore its original appearance, where the product incorporating the design or to which the design is applied constitutes a component part of a complex product upon whose appearance the protected design is dependent, cannot be introduced at the present stage; whereas the lack of

full-scale approximation of the laws of the Member States on the use of protected designs for such repair of a complex product should not constitute an obstacle to the approximation of those other national provisions of design law which most directly affect the functioning of the internal market; whereas for this reason Member States should in the meantime maintain in force any provisions in conformity with the Treaty relating to the use of the design of a component part used for the purpose of the repair of a complex product so as to restore its original appearance, or, if they introduce any new provisions relating to such use, the purpose of these provisions should be only to liberalise the market in such parts; whereas those Member States which, on the date of entry into force of this Directive, do not provide for protection for designs of component parts are not required to introduce registration of designs for such parts; whereas three years after the implementation date the Commission should submit an analysis of the consequences of the provisions of this Directive for Community industry, for consumers, for competition and for the functioning of the internal market; whereas, in respect of component parts of complex products, the analysis should, in particular, consider harmonisation on the basis of possible options, including a remuneration system and a limited term of exclusivity; whereas, at the latest one year after the submission of its analysis, the Commission should, after consultation with the parties most affected, propose to the European Parliament and the Council any changes to this Directive needed to complete the internal market in respect of component parts of complex products, and any other changes which it considers necessary;

- (20) Whereas the transitional provision in Article 14 concerning the design of a component part used for the purpose of the repair of a complex product so as to restore its original appearance is in no case to be construed as constituting an obstacle to the free movement of a product which constitutes such a component part;
- (21) Whereas the substantive grounds for refusal of registration in those Member States which provide for substantive examination of applications prior to registration, and the substantive grounds for the invalidation of registered design rights in all the Member States, must be exhaustively enumerated,

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Definitions

For the purpose of this Directive:

- (a) 'design` means the appearance of the whole or a part of a product resulting from the features of, in particular, the lines, contours, colours, shape, texture and/or materials of the product itself and/or its ornamentation;
- (b) 'product` means any industrial or handicraft item, including inter alia parts intended to be assembled into a complex product, packaging, get-up, graphic symbols and typographic typefaces, but excluding computer programs;
- (c) 'complex product` means a product which is composed of multiple components which can be replaced permitting disassembly and reassembly of the product.

Article 2

Scope of application

1. This Directive shall apply to:

- (a) design rights registered with the central industrial property offices of the Member States;
- (b) design rights registered at the Benelux Design Office;
- (c) design rights registered under international arrangements which have effect in a Member State;
- (d) applications for design rights referred to under (a), (b) and (c).

2. For the purpose of this Directive, design registration shall also comprise the publication following filing of the design with the industrial property office of a Member State in which such publication has the effect of bringing a design right into existence.

Article 3

Protection requirements

1. Member States shall protect designs by registration, and shall confer exclusive rights upon their holders in accordance with the provisions of this Directive.

2. A design shall be protected by a design right to the extent that it is new and has individual character.

3. A design applied to or incorporated in a product which constitutes a component part of a complex product shall only be considered to be new and to have individual character:

- (a) if the component part, once it has been incorporated into the complex product, remains visible during normal use of the latter, and
- (b) to the extent that those visible features of the component part fulfil in themselves the requirements as to novelty and individual character.

4. 'Normal use' within the meaning of paragraph (3)(a) shall mean use by the end user, excluding maintenance, servicing or repair work.

Article 4

Novelty

A design shall be considered new if no identical design has been made available to the public before the date of filing of the application for registration or, if priority is claimed, the date of priority. Designs shall be deemed to be identical if their features differ only in immaterial details.

Article 5

Individual character

1. A design shall be considered to have individual character if the overall impression it produces on the informed user differs from the overall impression produced on such a user by any design which has been made available to the public before the date of filing of the application for registration

or, if priority is claimed, the date of priority.

2. In assessing individual character, the degree of freedom of the designer in developing the design shall be taken into consideration.

Article 6

Disclosure

1. For the purpose of applying Articles 4 and 5, a design shall be deemed to have been made available to the public if it has been published following registration or otherwise, or exhibited, used in trade or otherwise disclosed, except where these events could not reasonably have become known in the normal course of business to the circles specialised in the sector concerned, operating within the Community, before the date of filing of the application for registration or, if priority is claimed, the date of priority. The design shall not, however, be deemed to have been made available to the public for the sole reason that it has been disclosed to a third person under explicit or implicit conditions of confidentiality.

2. A disclosure shall not be taken into consideration for the purpose of applying Articles 4 and 5 if a design for which protection is claimed under a registered design right of a Member State has been made available to the public:

- (a) by the designer, his successor in title, or a third person as a result of information provided or action taken by the designer, or his successor in title; and
- (b) during the 12-month period preceding the date of filing of the application or, if priority is claimed, the date of priority.

3. Paragraph 2 shall also apply if the design has been made available to the public as a consequence of an abuse in relation to the designer or his successor in title.

Article 7

Designs dictated by their technical function and designs of interconnections

1. A design right shall not subsist in features of appearance of a product which are solely dictated by its technical function.

2. A design right shall not subsist in features of appearance of a product which must necessarily be reproduced in their exact form and dimensions in order to permit the product in which the design is incorporated or to which it is applied to be mechanically connected to or placed in, around or against another product so that either product may perform its function.

3. Notwithstanding paragraph 2, a design right shall, under the conditions set out in Articles 4 and 5, subsist in a design serving the purpose of allowing multiple assembly or connection of mutually interchangeable products within a modular system.

Article 8

Designs contrary to public policy or morality

A design right shall not subsist in a design which is contrary to public policy or to accepted principles of morality.

Article 9

Scope of protection

1. The scope of the protection conferred by a design right shall include any design which does not produce on the informed user a different overall impression.
2. In assessing the scope of protection, the degree of freedom of the designer in developing his design shall be taken into consideration.

Article 10

Term of protection

Upon registration, a design which meets the requirements of Article 3(2) shall be protected by a design right for one or more periods of five years from the date of filing of the application. The right holder may have the term of protection renewed for one or more periods of five years each, up to a total term of 25 years from the date of filing.

Article 11

Invalidity or refusal of registration

1. A design shall be refused registration, or, if the design has been registered, the design right shall be declared invalid:
 - (a) if the design is not a design within the meaning of Article 1(a); or
 - (b) if it does not fulfil the requirements of Articles 3 to 8; or
 - (c) if the applicant for or the holder of the design right is not entitled to it under the law of the Member State concerned; or
 - (d) if the design is in conflict with a prior design which has been made available to the public after the date of filing of the application or, if priority is claimed, the date of priority, and which is protected from a date prior to the said date by a registered Community design or an application for a registered Community design or by a design right of the Member State concerned, or by an application for such a right.
2. Any Member State may provide that a design shall be refused registration, or, if the design has been registered, that the design right shall be declared invalid:
 - (a) if a distinctive sign is used in a subsequent design, and Community law or the law of the Member State concerned governing that sign confers on the right holder of the sign the right to prohibit such use; or
 - (b) if the design constitutes an unauthorised use of a work protected under the copyright law of the Member State concerned; or

- (c) if the design constitutes an improper use of any of the items listed in Article 6b of the Paris Convention for the Protection of Industrial Property, or of badges, emblems and escutcheons other than those covered by Article 6b of the said Convention which are of particular public interest in the Member State concerned.
3. The ground provided for in paragraph 1(c) may be invoked solely by the person who is entitled to the design right under the law of the Member State concerned.
 4. The grounds provided for in paragraph 1(d) and in paragraph 2(a) and (b) may be invoked solely by the applicant for or the holder of the conflicting right.
 5. The ground provided for in paragraph 2(c) may be invoked solely by the person or entity concerned by the use.
 6. Paragraphs 4 and 5 shall be without prejudice to the freedom of Member States to provide that the grounds provided for in paragraphs 1(d) and 2(c) may also be invoked by the appropriate authority of the Member State in question on its own initiative.
 7. When a design has been refused registration or a design right has been declared invalid pursuant to paragraph 1(b) or to paragraph 2, the design may be registered or the design right maintained in an amended form, if in that form it complies with the requirements for protection and the identity of the design is retained. Registration or maintenance in an amended form may include registration accompanied by a partial disclaimer by the holder of the design right or entry in the design Register of a court decision declaring the partial invalidity of the design right.
 8. Any Member State may provide that, by way of derogation from paragraphs 1 to 7, the grounds for refusal of registration or for invalidation in force in that State prior to the date on which the provisions necessary to comply with this Directive enter into force shall apply to design applications which have been made prior to that date and to resulting registrations.
 9. A design right may be declared invalid even after it has lapsed or has been surrendered.

Article 12

Rights conferred by the design right

1. The registration of a design shall confer on its holder the exclusive right to use it and to prevent any third party not having his consent from using it. The aforementioned use shall cover, in particular, the making, offering, putting on the market, importing, exporting or using of a product in which the design is incorporated or to which it is applied, or stocking such a product for those purposes.
2. Where, under the law of a Member State, acts referred to in paragraph 1 could not be prevented before the date on which the provisions necessary to comply with this Directive entered into force, the rights conferred by the design right may not be invoked to prevent continuation of such acts by any person who had begun such acts prior to that date.

Article 13

Limitation of the rights conferred by the design right

1. The rights conferred by a design right upon registration shall not be exercised in respect of:

-
- (a) acts done privately and for non-commercial purposes;
- (b) acts done for experimental purposes;
- (c) acts of reproduction for the purposes of making citations or of teaching, provided that such acts are compatible with fair trade practice and do not unduly prejudice the normal exploitation of the design, and that mention is made of the source.
2. In addition, the rights conferred by a design right upon registration shall not be exercised in respect of:
- (a) the equipment on ships and aircraft registered in another country when these temporarily enter the territory of the Member State concerned;
- (b) the importation in the Member State concerned of spare parts and accessories for the purpose of repairing such craft;
- (c) the execution of repairs on such craft.

Article 14

Transitional provision

Until such time as amendments to this Directive are adopted on a proposal from the Commission in accordance with the provisions of Article 18, Member States shall maintain in force their existing legal provisions relating to the use of the design of a component part used for the purpose of the repair of a complex product so as to restore its original appearance and shall introduce changes to those provisions only if the purpose is to liberalise the market for such parts.

Article 15

Exhaustion of rights

The rights conferred by a design right upon registration shall not extend to acts relating to a product in which a design included within the scope of protection of the design right is incorporated or to which it is applied, when the product has been put on the market in the Community by the holder of the design right or with his consent.

Article 16

Relationship to other forms of protection

The provisions of this Directive shall be without prejudice to any provisions of Community law or of the law of the Member State concerned relating to unregistered design rights, trade marks or other distinctive signs, patents and utility models, typefaces, civil liability or unfair competition.

Article 17

Relationship to copyright

A design protected by a design right registered in or in respect of a Member State in accordance with this Directive shall also be eligible for protection under the law of copyright of that State as from the date on which the design was created or fixed in any form. The extent to which, and the conditions under which, such a protection is conferred, including the level of originality required, shall be determined by each Member State.

Article 18

Revision

Three years after the implementation date specified in Article 19, the Commission shall submit an analysis of the consequences of the provisions of this Directive for Community industry, in particular the industrial sectors which are most affected, particularly manufacturers of complex products and component parts, for consumers, for competition and for the functioning of the internal market. At the latest one year later the Commission shall propose to the European Parliament and the Council any changes to this Directive needed to complete the internal market in respect of component parts of complex products and any other changes which it considers necessary in light of its consultations with the parties most affected.

Article 19

Implementation

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 28 October 2001.

When Member States adopt these provisions, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2. Member States shall communicate to the Commission the provisions of national law which they adopt in the field governed by this Directive.

Article 20

Entry into force

This Directive shall enter into force on the 20th day following its publication in the Official Journal of the European Communities.

Article 21

Addressees

This Directive is addressed to the Member States.

Done at Luxembourg, 13 October 1998.

For the European Parliament

The President

C. EINEM

(1) OJ C 345, 23. 12. 1993, p. 14 and OJ C 142, 14. 5. 1996, p. 7.

(2) OJ C 388, 31. 12. 1994, p. 9 and OJ C 110, 2. 5. 1995, p. 12.

(3) Opinion of the European Parliament of 12 October 1995 (OJ C 287, 30. 10. 1995, p. 157), common position of the Council of 17 June 1997 (OJ C 237, 4. 8. 1997, p. 1), Decision of the European Parliament of 22 October 1997 (OJ C 339, 10. 11. 1997, p. 52). Decision of the European Parliament of 15 September 1998. Decision of the Council of 24 September 1998.

Statement by the Commission

The Commission shares the European Parliament's concern about combating counterfeiting.

The Commission's intention is to present before the end of the year a Green Paper regarding piracy and counterfeiting in the internal market.

The Commission will include in this Green Paper Parliament's idea of creating an obligation for counterfeiters to provide holders of design rights with information on their illegal acts.

Statement by the Commission regarding Article 18

Immediately following the date of adoption of the Directive, and without prejudice to Article 18, the Commission proposes to launch a consultation exercise involving manufacturers of complex products and of component parts in the motor vehicles sector. The aim of this consultation will be to arrive at a voluntary agreement between the parties involved on the protection of designs in cases where the product incorporating the design or to which the design is applied constitutes a component part of a complex product upon whose appearance the protected design is dependent.

The Commission will coordinate the consultation exercise and will report regularly to the Parliament and the Council on its progress. The consulted parties will be invited by the Commission to consider a range of possible options on which to base a voluntary agreement, including a remuneration system and a system based on a limited period of design protection.

Industrial property: Commission proposes linking of EU design registration system with WIPO international system

Reference: IP/05/1691 Date: 22/12/2005

Brussels, 22 December 2005

Industrial property: Commission proposes linking of EU design registration system with WIPO international system

The European Commission has presented two proposals to link the 'Community Design' system, which protects designs within the EU, with the international design registration system of the World Intellectual Property Organisation (WIPO). The proposals would allow companies, with a single application, to obtain protection of a design not only throughout the EU with the Community Design, but also in the countries which are members of the Geneva Act of the Hague Agreement concerning the international registration of industrial designs. The first proposal relates to the accession of the European Community (EC) to the Geneva Act. The second proposal contains the necessary provisions to give effect to that accession, in particular through an amendment of Council Regulation No 6/2002 on Community Designs.

Internal Market and Services Commissioner Charlie McCreevy said: "These proposals will allow EU firms to safeguard valuable design rights with less bureaucracy while at the same time encouraging them to trade with third countries in the knowledge that their design rights are protected. I hope that the Council will now adopt these proposals as soon as possible."

In 2004 the Commission launched a consultation with interested parties on the possible impact on business of EC accession to the Hague system. An overwhelming majority of businesses, professional organisations and Member States were in favour of accession in the near future.

The Community Design system^[1], which became fully operational on 1 April 2003, provides for the acquisition of protection for designs with unitary effect for the whole territory of the EU. The Office for the Harmonization in the Internal Market (Trade Marks and Designs), which is located in Alicante (Spain), is in charge of handling the administration of the registered Community designs.

The Geneva Act, signed on 2 July 1999, became fully operational on 1 April 2004. It allows designers to obtain design protection in a number of countries through a single international registration filed with the International Bureau of WIPO, replacing a whole series of registrations with different national or regional offices.

This simplified procedure would lead to a saving of costs: there would no longer be a need to provide translations of the documents, to keep watch on the different deadlines for renewal of a great number of national registrations and to pay a series of national fees and fees to agents in different countries.

All this would have a positive impact on research, development and innovation activities. The simplified procedure would also facilitate access to protection in third countries, which would encourage EU companies to trade with these countries in the knowledge that their designs are protected.

The creation of a link between the Community design system and the Hague arrangement would benefit a wide range of industrial sectors, in particular textiles, furniture, cars, jewellery and mobile phones.

So far 18 countries have become party to the Geneva Act, including Singapore, Korea, Turkey and Switzerland.

[11] Council Regulation (EC) No 6/2002 on Community Designs, OJ No L 3, 5.1.2002, p.1.

COMMISSION OF THE EUROPEAN COMMUNITIES

Brussels, 22.12.2005
COM(2005)687 final

2005/0273 (CNS)

Proposal for a

COUNCIL DECISION

approving the accession of the European Community to the Geneva Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999

{SEC(2005)1748}

(presented by the Commission)

EXPLANATORY MEMORANDUM

1. Introduction

On 12 December 2001, the Council adopted Regulation (EC) No 6/2002 on Community Designs (hereinafter referred to as “the Community Designs Regulation”).¹

The Community Designs Regulation establishes the Community design system, which provides for the acquisition of protection for designs with unitary effect for the whole territory of the European Community. According to the Regulation, a design may be protected either by an unregistered Community design, if the design is made available to the public in the manner provided for in the Regulation, or by a registered Community design, if registered under the procedure provided for in the Regulation.

The Community Designs Regulation entrusts the Office for the Harmonization in the Internal Market (Trade Marks and Designs), hereinafter referred to as “the Office”,² to handle the administration of the Community design. On 1 January 2003, the Office enabled applications for registered Community designs with the first date of filing being granted on 1 April 2003.

On 23 December 2003, the 1999 Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999 (hereinafter referred to as “the Geneva Act”) entered into force. The Geneva Act allows designers to obtain design protection in a number of countries through a single international registration. Thus, under the Geneva Act, a single international application filed with the International Bureau of the World Intellectual Property Organization (WIPO) replaces a whole series of applications which, otherwise, should have been effected with different national or regional Offices.

The objective of this proposal is to establish a link between the Community design system and the international registration system established under the Geneva Act. This link will enable designers to file a single international application at the International Bureau of WIPO designating, amongst other Contracting Parties, the European Community in order to obtain protection under the Community design system.

2. The Geneva Act

The Hague System is based on the Hague Agreement Concerning the International Registration of Industrial Designs. This Agreement is constituted by three different Acts: the London Act of 1934, the Hague Act of 1960 and the Geneva Act of 1999. The three Acts are autonomous and coexist with respect to their substantive provisions. Contracting parties may decide to become party to only one, to two or to all three of the Acts. They automatically become member of the Hague Union which at present has 42 Contracting States, amongst which 12 EU Member States.³

¹ OJ L 3, 5.1.2002, p. 1.

² The OHIM is established by Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark, OJ L 11, 14.1.1994, p. 1.

³ Belgium, Estonia, France, Germany, Greece, Hungary, Italy, Latvia, Luxembourg, Netherlands, Slovenia, Spain. n Five EU Member States – out of 18 countries in total - have become party to the Geneva Act (Estonia, Hungary, Latvia, Slovenia and Spain). Updates will be published on the WIPO website: www.wipo.int.

The system of international registration of designs arose from a need for simplicity and economy. In effect, it enables design owners originating from a Contracting State to obtain protection of their designs with a minimum of formality and expense.

The international application can be filed in one language (English or French), upon payment of a single set of fees. The applicant has to designate the Contracting States in which protection is sought. An international application is normally sent directly to the International Bureau. Upon receipt, the International Bureau checks that the international application complies with the prescribed formal requirements and then publishes the application – or better, the registration - in the *International Designs Bulletin* (on WIPO's internet website). Following publication, each national Office must identify the international registrations in which they have been designated, in order to proceed with the substantive examination, if any, provided for by its own legislation.

Any substantive aspect of the protection (including in particular the substantive examination carried out by each Office, the assessment of the conditions of protection and the scope of that protection) is thus entirely a matter of the legislation of each designated Contracting Party.

As a result of that examination, the Office may notify to the International Bureau a refusal of protection for its territory. However, an international registration may not be refused on grounds of non-compliance with formal requirements. Such requirements must be considered as already satisfied, following the examination carried out by the International Bureau.

Once the international registration has been accepted it produces the same effect in each of the countries designated as if the design had been deposited there directly. The international registration is therefore equivalent to a national right in terms of its scope of protection and enforcement. At the same time, the international registration facilitates the maintenance of protection: there is a single deposit to renew and one simple procedure for recording any changes (e.g. in ownership or address).

The adoption of the Geneva Act in 1999 had a twofold objective, namely:

- to make the Hague System more attractive for applicants and to extend the system to new members; to that end, the 1999 Act has introduced a number of features into the Hague system with a view to facilitating the accession to the Hague Union of countries which administer design examination systems (such as USA and Japan);
- to provide for the establishment of a *link* between the international registration system and regional systems by providing that intergovernmental organizations may become a party to the Act.

The second objective opens the door for the accession of the European Community to the Hague System. The territory of the EU would then be regarded as a single country for the purposes of the Geneva Act, with the Community design rules as the relevant domestic legislation. The OHIM would become the Office responsible for the substantive examination of international applications in which the Community has been designated.

The Community design system and the international registration system as established by the Hague Agreement can be considered as being complementary. The Community design system provides for a complete and unified regional designs registration system which covers the

whole territory of the European Union. The Hague Agreement constitutes a treaty centralizing the procedures for obtaining protection of designs in the territory of the designated Contracting Parties.

The Geneva Act system became fully operational on 1 April 2004. On that date, both the Geneva Act and the modernised Common Regulations under the Hague Agreement, which simplify the entire proceedings, became effective.

3. Legal basis

A Community act to accede to the Geneva Act must be based on Article 308 EC, the provision of the Treaty on which the common rules, i.e. the Community Designs Regulation, are based. In addition, a reference should be made to Article 300 of the Treaty, which confers powers to the European Community to enter into agreements between the European Community and one or more States or international organisations.

A recent precedent on a similar intellectual property exercise is Council Decision 2003/793/EC of 27 October 2003 approving the accession of the European Community to the Protocol relating to the Madrid Agreement concerning the international registration of marks, adopted at Madrid on 27 June 1989.⁴ This Decision is based on Article 308 EC, in conjunction with Article 300 (2), second sentence, and Article 300(3), first subparagraph.

4. Procedure for the accession of the European Community to the Geneva Act

Under Article 27(1)(ii) of the Geneva Act, an intergovernmental organization may become party provided the following conditions are fulfilled:

- at least one of the Member States of the intergovernmental organization is a member of WIPO, and
- the organization maintains an Office through which protection of industrial designs may be obtained with effect in the territory in which the constituting treaty of the intergovernmental organization applies;
- the Office of such organization is not the subject of a notification under Article 19 of the Geneva Act.

The European Community fulfils those conditions. First, all Member States are member of WIPO. Second, OHIM is managing the administration of the Community design system set up under Regulation 6/2002. Third, OHIM is not subject of a notification under Article 19 of the Geneva Act.⁵

According to Article 27(2) of the Geneva Act, the instrument of accession to the Act shall be deposited by any State or international organization if it has not signed this Act. The EC has not signed the Geneva Act and is therefore obliged to deposit the instrument of accession. Article 27(3)(a) declares that for the EC accession the effective date of the deposit of the instrument of accession shall be the date on which the instrument is deposited. According to

⁴ OJ L 296 of 14.11.2003, p. 20.

⁵ This provision is relevant for countries which share a common Office, like the Benelux countries.

Article 28(3)(b) the accession of the EC then becomes effective three months after the date on which its instrument of accession has been deposited.

5. Declarations to be made in the framework of the accession of the Community to the Geneva Act

The Geneva Act and the Common Regulations under the Geneva Act, the London Act and the Hague Act of the Hague Agreement provide for the possibility or obligation for Contracting States to make certain declarations concerning the operation of the international registration system. Declarations made in the instrument of accession become effective on the date on which the Contracting Party becomes bound by the Act.

The Commission proposes that declarations to the Director-General of WIPO be made on the following matters.

(i) Article 4(1)(a) of the Geneva Act states that the international application may be filed, at the option of the applicant, either directly with the International Bureau or through the Office of the applicant's Contracting party. However, according to Article 4(1)(b) a Contracting Party may notify that international applications may not be filed through its Office.

The Hague system draws most of its advantages from its simplicity and the location of the receiving office seems to be of minor importance for the application of designs. The European Community should therefore exclude the filing of an application through the Office in order to avoid useless duplication of work. Direct filing at WIPO is also to be preferred in order to avoid confusion by applicants between applications for registering Community designs and applications for international registrations. Such confusion would be all the more problematic in case of payment of the basic fee for an international application, which has to be paid in any event directly to the International Bureau and which is payable at the time of filing. If applicants would erroneously pay the fee to OHIM, this Office would have to return the fee.

It is significant that at present WIPO does not receive applications filed through national offices even from those Contracting Parties who would permit such a procedure.⁶

(ii) The Geneva Act provides in Article 7 that the prescribed fees shall include a standard designation fee that has to be paid for each designated Contracting Party. In addition, any Contracting Party that is an intergovernmental organisation may declare that, for each application and for each renewal of an international registration in which it is designated, the standard designation fee is replaced by an individual designation fee, whose amount shall be indicated in the declaration and can be changed in further declarations. The fixed amount may not be higher than the equivalent of the amount which the Contracting Party would be entitled to receive for a national application and renewal, that amount being diminished by the savings resulting from the international procedure. The designation fee shall be transferred by the International Bureau to the respective Contracting Party.⁷

⁶ In this respect, the Geneva Act differs from the Madrid Protocol concerning the international registration of marks, which specifies in Article 2 (2) that international applications shall be filed with the International Bureau through the intermediary of the office with which the basic application was filed or by which the basic registration was made.

⁷ The total fees payable in connection with an international application consist of (i) a basic fee; (ii) the standard designation fee or the individual designation fee, (iii) a publication fee. These fees are payable

In terms of income, the choice between the standard designation fee and the individual designation fee will have budgetary consequences for the Office. The European Community should therefore take advantage of this option and determine its own individual designation fee.

Such determination will have to be made on the basis of a number of elements. Fees will have to be sufficient to cover the costs incurred by the procedures relating to designs the protection of which is requested in the EU. This means not only the costs relating to examination of such designs in OHIM but also other procedures like invalidities and appeals. Such determination has not yet been made as a prior financial analysis is required. To undertake such an analysis, the major conditions of the accession to the Hague Agreement will have to be examined in detail. The Commission also needs to have a better idea as to the possible number of invalidities and appeals international designations could generate and thus the level of work involved for the OHIM.

On the basis of these studies, the Commission will propose an amendment of the Fees Regulation which will contain the level and structure of the fees to be fixed for the designation of the European Community through the Geneva Act.

(iii) Article 17(3)(c) of the Geneva Act obliges each Contracting Party to notify the Director-General of the International Bureau of the maximum duration of protection provided by its law. Article 12 of the Community Design Regulation provides for the maximum duration of protection of 25 years. The European Community shall notify the Director-General accordingly.

Declarations are not relevant or should not be made on other issues as foreseen in the Geneva Act and the Common Rules. Several of these possible declarations are not relevant for the European Community because they concern specific features of national legislation unknown in or not applicable to the Community Design Regulation, or because they are only relevant for examining offices.⁸ Possible declarations on the effect of change of ownership and on exchange of documents do require a further explanation.

- According to Article 16(2) of the Geneva Act, any contracting party may, in a declaration, notify the Director-General of WIPO that a recording of change of ownership in the International Register shall not have the same effect as a recording in its own Register until it has received the statement or documents specified in that declaration. However, in order to keep the international system as simple and efficient as possible, the Community should not submit such a declaration. Thus the international register will have full and direct effect in the EU.
- Article 10(5)(a) of the Geneva Act specifies that the Office of each Contracting Party may notify the International Bureau that it wishes to receive a copy of each

at the time of filing of the international application, with an exception in the case of a request for deferment of publication. See Rule 12 of the Common Regulations.

⁸ These issues concern the deferred publication (Article 11); the unity of design (Article 13); certain views of the design required (Rule 9); special requirement concerning the applicant (Rule 8); security clearance (Rule 13); prohibition of self-designation (Article 14); mandatory contents of an international application (Article 5 and Rule 7); extension of time for notifying refusal and date from which industrial design is protected (Rule 18); common offices of several states (Article 19) and, indirectly, the language regime between the national office and the International Bureau (Rule 6).

international registration in which it has been designated immediately after the registration has been effected, along with any relevant statement, document or specimen accompanying the international registration. The Community should not require such copies since the examination as to the grounds for refusal (public policy, morality and definition of the design) can be carried out on the basis of the publication of the international registrations by the International Bureau. Consequently, there is no need for OHIM to receive complete files from WIPO.

6. Commentary on the Articles

Article 1

In Article 1 the Council is invited to approve the Geneva Act. The text of the Geneva Act is attached to this decision in all the official languages of the European Community.

Article 2

Article 2(1) specifies that following the adoption of this proposal, the President of the Council shall deposit the instrument of accession with the Director-General of WIPO, in accordance with Article 27 of the Geneva Act. In order to avoid any complications on the implementation of the Geneva Act within the European Community, it has been clarified that the instrument of accession may be adopted as from the date on which the Council and the Commission have adopted the necessary implementing measures (Council Regulation amending Regulation (EC) No 6/2002 on Community Designs; Commission Regulation amending the implementing Regulation 2245/2002; Commission Regulation amending the Fees Regulation 2245/2002).

The second paragraph specifies the declarations that shall be made in the instrument of accession.

Article 3

Following accession to the Geneva Act, the European Community will become a member of the Assembly of the Hague Union (Article 20 and 21 of the Geneva Act). This implies, for example, that the European Community may vote, in place of its Member States, with a number of votes equal to the number of its Member States which are party to this Act, and that the European Community shall not participate in the vote if any one of its Member States exercises its rights to vote, and *vice versa*.

The tasks of the Assembly are, amongst others, to deal with all matters concerning the maintenance and development of the Union and the implementation of the Geneva Act; give directions concerning the preparations for conferences of revision and decide the convocation of any such conference; and amend the Common Regulations under the Geneva Act.

In accordance with Article 300 of the Treaty, the European Commission shall represent the European Community in the Assembly of the Hague Union. The European Community delegations may also include representatives of the Office.

In view of the above and in order to avoid unnecessary cumbersome procedures whenever future meetings of the Assembly of the Hague Union take place, Article 3(1) of the proposal provides that the Council authorises the European Commission to represent the European Community at the future meetings of the Assembly of the Hague Union and to negotiate

matters, on behalf of the Community, which fall under the competence which the Assembly has pursuant to Article 21 of the Geneva Act. Article 3(2) specifies that the position of the European Community will be drawn up by the European Commission and the Member States within the competent Council working party or at on-the-spot meetings convened in the course of the work carried out within the framework of WIPO.

7. Supplementary measures to be taken in the context of the accession of the Community to the Geneva Act

The accession of the European Community to the Geneva Act requires several implementing measures at Community level.

First, the Community legislator has to provide rules which adapt the Community design system to the system of international applications under the Geneva Act. It is proposed that the measures giving effect to the accession of the European Community to the Geneva Act be incorporated in the Community Design Regulation by means of an amendment of existing provisions and addition of a new and separate title on “International Registration of Designs”.

Second, there is a need for modification of the implementing rules to give effect to the accession to the Geneva Act. This requires a modification of the Commission Regulation (EC) No 2245/2002 of 21 October 2002 implementing the Community Designs Regulation.⁹

Third, there is a need for modification of Commission Regulation (EC) No 2246/2002 of 16 December 2002 on the fees payable to the Office for Harmonisation in the Internal Market (Trade Marks and Designs) in respect of the registration of Community designs.¹⁰ The amended Fees Regulation should establish the individual fee system for international registrations, in line with the declaration made in this Decision.

Since the European Community would become bound by the Geneva Act three months after the date on which it has deposited its instrument of accession, the necessary implementing measures should enter into force before the expiry of the three months period.

8. Conclusions

On the basis of the above, the Council is invited to adopt the attached decision approving, on behalf of the European Community, the Geneva Act, authorising the President of the Council to deposit the instrument of accession to the Geneva Act with the Director General of WIPO, and authorising the European Commission to represent the European Community at the meetings of the Assembly of the Hague Union to be held under the auspices of WIPO and to negotiate and approve matters, on behalf of the European Community, which fall under the competence of the Assembly.

⁹ OJ L 341 of 17.12.2002, p. 28.

¹⁰ OJ L 341 of 17.12.2002, p. 54.

Proposal for a

COUNCIL DECISION

approving the accession of the European Community to the Geneva Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 308, in conjunction with Article 300(2), first subparagraph, second sentence, and Article 300(3), first subparagraph, thereof,

Having regard to the proposal from the Commission¹¹,

Having regard to the opinion of the European Parliament¹²,

Having regard to the opinion of the European Economic and Social Committee¹³,

Whereas:

- (1) Council Regulation (EC) No 6/2002 of 12 December 2001 on Community designs¹⁴, which is based on Article 308 of the Treaty, aims to create a market which functions properly and offers conditions which are similar to those obtaining in a national market. In order to create a market of this kind and make it increasingly a single market, that Regulation created the Community design system whereby undertakings can by means of a single procedure obtain Community designs to which uniform protection is given and which produce their effects throughout the entire area of the Community.
- (2) Following preparations initiated and carried out by the World Intellectual Property Organization (WIPO) with the participation of the Member States which are members of the Hague Union, the Member States which are not members of the Hague Union and the European Community, the Diplomatic Conference, convened for that purpose at Geneva, adopted the Geneva Act of the Hague Agreement concerning the international registration of industrial designs (hereinafter referred to as the “Geneva Act”) on 2 July 1999.
- (3) The Geneva Act was adopted in order to introduce certain innovations to the system for the international deposit of industrial designs provided for in the London Act,

¹⁴ OJ C , , p. .

¹⁵ OJ C , , p. .

¹³ OJ C , , p. .

¹⁴ OJ L 3, 5.1.2002, p. 1. Regulation as amended by 2003 Act of Accession.

which had been adopted on 2 June 1934, and the Hague Act, which had been adopted on 28 November 1960.

- (4) The objectives of the Geneva Act are to extend the Hague system of international registration to new members, and to make the system more attractive to applicants. As compared to the London Act and the Hague Act, one of the main innovations is that an intergovernmental organisation which maintains an office authorized to grant protection to designs with effect in the territory of the organisation may become party to the Geneva Act.
- (5) The facility whereby an intergovernmental organisation which has a regional office for the registration of designs may become a party to the Geneva Act was introduced in order to allow, in particular, for the Community to accede to that Act, and hence, to the Hague Union.
- (6) The Geneva Act entered into force on 23 December 2003 and became operational on 1 April 2004. On 1 January 2003, the Office for the Harmonization in the Internal Market (Trade Marks and Designs) admitted applications for registered Community designs, the first date of filing being granted on 1 April 2003.
- (7) The Community design system and the international registration system as established by the Geneva Act are complementary. The Community design system provides for a complete and unified regional designs registration system which covers the whole territory of the Community. The Hague Agreement constitutes a treaty centralising the procedures for obtaining protection of designs in the territory of the designated Contracting Parties.
- (8) The establishment of a link would enable designers to obtain, through one single international application protection for their designs in the Community under the Community design system and in the territories of the Geneva Act inside and outside the Community.
- (9) Moreover, the establishment of a link between the Community design system and the international registration system under the Geneva Act will promote a harmonious development of economic activities, will eliminate distortions of competition, will be cost efficient and will increase the level of integration and functioning of the internal market. Therefore, the Community needs to accede to the Geneva Act in order to make the Community design system more attractive.
- (10) The Commission should be authorised to represent the Community in the Assembly of the Hague Union after the accession of the Community to the Geneva Act.
- (11) This Decision does not affect the right of the Member States to participate in the Assembly of the Hague Union with regard to their national designs.

.HAS DECIDED AS FOLLOWS

Article 1

The Geneva Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999 (hereinafter referred to as the Geneva

Act), is hereby approved on behalf of the Community with regard to the matters within its competence.

The text of the Geneva Act is attached to this Decision.

Article 2

1. The President of the Council is hereby authorised to deposit the instrument of accession with the Director-General of the World Intellectual Property Organization as from the date on which the Council and the Commission have adopted the measures which are necessary for the establishment of a link between Community design law and the Geneva Act.

2. The declarations which are attached to this Decision shall be made in the instrument of accession.

Article 3

1. The Commission is hereby authorised to represent the European Community at the meetings of the Hague Union Assembly held under the auspices of the World Intellectual Property Organization.

2. On all matters lying within the competence of the Community with regard to Community design, the Commission shall negotiate in the Hague Union Assembly on behalf of the Community and in accordance with the following arrangements:

(a) the position which the Community may adopt within the Assembly shall be prepared by the relevant Council working party or, if this is not possible, at on-the-spot meetings convened in the course of the work within the framework of the World Intellectual Property Organization;

(b) as regards decisions involving amendments to Regulation (EC) No 6/2002, or to any other act of the Council requiring unanimity, the Community position shall be adopted by the Council acting unanimously on a proposal from the Commission;

(c) as regards other decisions affecting Community design law, the Community position shall be adopted by the Council acting by a qualified majority on a proposal from the Commission.

Done at Brussels,

For the Council
The President

INTRODUCTORY PROVISIONS

Article 1

Abbreviated Expressions

For the purposes of this Act:

(i) “the Hague Agreement” means the Hague Agreement Concerning the International Deposit of Industrial Designs, henceforth renamed the Hague Agreement Concerning the International Registration of Industrial Designs;

(ii) “this Act” means the Hague Agreement as established by the present Act;

(iii) “Regulations” means the Regulations under this Act;

(iv) “prescribed” means prescribed in the Regulations;

(v) “Paris Convention” means the Paris Convention for the Protection of Industrial Property, signed at Paris on March 20, 1883, as revised and amended;

(vi) “international registration” means the international registration of an industrial design effected according to this Act;

(vii) “international application” means an application for international registration;

(viii) “International Register” means the official collection of data concerning international registrations maintained by the International Bureau, which data this Act or the Regulations require or permit to be recorded, regardless of the medium in which such data are stored;

(ix) “person” means a natural person or a legal entity;

(x) “applicant” means the person in whose name an international application is filed;

(xi) “holder” means the person in whose name an international registration is recorded in the International Register;

(xii) “intergovernmental organization” means an intergovernmental organization eligible to become party to this Act in accordance with Article 27(1)(ii);

(xiii) “Contracting Party” means any State or intergovernmental organization party to this Act;

(xiv) “applicant’s Contracting Party” means the Contracting Party or one of the Contracting Parties from which the applicant derives its entitlement to file an international application by virtue of satisfying, in relation to that Contracting Party, at least one of the conditions specified in Article 3; where there are two or more Contracting Parties from which the applicant may, under Article 3, derive its entitlement to file an international application,

“applicant’s Contracting Party” means the one which, among those Contracting Parties, is indicated as such in the international application;

(xv) “territory of a Contracting Party” means, where the Contracting Party is a State, the territory of that State and, where the Contracting Party is an intergovernmental organization, the territory in which the constituent treaty of that intergovernmental organization applies;

(xvi) “Office” means the agency entrusted by a Contracting Party with the grant of protection for industrial designs with effect in the territory of that Contracting Party;

(xvii) “Examining Office” means an Office which *ex officio* examines applications filed with it for the protection of industrial designs at least to determine whether the industrial designs satisfy the condition of novelty;

(xviii) “designation” means a request that an international registration have effect in a Contracting Party; it also means the recording, in the International Register, of that request;

(xix) “designated Contracting Party” and “designated Office” means the Contracting Party and the Office of the Contracting Party, respectively, to which a designation applies;

(xx) “1934 Act” means the Act signed at London on June 2, 1934, of the Hague Agreement;

(xxi) “1960 Act” means the Act signed at The Hague on November 28, 1960, of the Hague Agreement;

(xxii) “1961 Additional Act” means the Act signed at Monaco on November 18, 1961, additional to the 1934 Act;

(xxiii) “Complementary Act of 1967” means the Complementary Act signed at Stockholm on July 14, 1967, as amended, of the Hague Agreement;

(xxiv) “Union” means the Hague Union established by the Hague Agreement of November 6, 1925, and maintained by the 1934 and 1960 Acts, the 1961 Additional Act, the Complementary Act of 1967 and this Act;

(xxv) “Assembly” means the Assembly referred to in Article 21(1)(a) or any body replacing that Assembly;

(xxvi) “Organization” means the World Intellectual Property Organization;

(xxvii) “Director General” means the Director General of the Organization;

(xxviii) “International Bureau” means the International Bureau of the Organization;

(xxix) “instrument of ratification” shall be construed as including instruments of acceptance or approval.

Article 2

Applicability of Other Protection Accorded by Laws of Contracting Parties and by Certain International Treaties

(1) [*Laws of Contracting Parties and Certain International Treaties*] The provisions of this Act shall not affect the application of any greater protection which may be accorded by the law of a Contracting Party, nor shall they affect in any way the protection accorded to works of art and works of applied art by international copyright treaties and conventions, or the protection accorded to industrial designs under the Agreement on Trade-Related Aspects of Intellectual Property Rights annexed to the Agreement Establishing the World Trade Organization.

(2) [*Obligation to Comply with the Paris Convention*] Each Contracting Party shall comply with the provisions of the Paris Convention which concern industrial designs.

CHAPTER I

INTERNATIONAL APPLICATION AND INTERNATIONAL REGISTRATION

Article 3

Entitlement to File an International Application

Any person that is a national of a State that is a Contracting Party or of a State member of an intergovernmental organization that is a Contracting Party, or that has a domicile, a habitual residence or a real and effective industrial or commercial establishment in the territory of a Contracting Party, shall be entitled to file an international application.

Article 4

Procedure for Filing the International Application

(1) [*Direct or Indirect Filing*] (a) The international application may be filed, at the option of the applicant, either directly with the International Bureau or through the Office of the applicant's Contracting Party.

(b) Notwithstanding subparagraph (a), any Contracting Party may, in a declaration, notify the Director General that international applications may not be filed through its Office.

(2) [*Transmittal Fee in Case of Indirect Filing*] The Office of any Contracting Party may require that the applicant pay a transmittal fee to it, for its own benefit, in respect of any international application filed through it.

Article 5

Contents of the International Application

(1) [*Mandatory Contents of the International Application*] The international application shall be in the prescribed language or one of the prescribed languages and shall contain or be accompanied by

- (i) a request for international registration under this Act;
- (ii) the prescribed data concerning the applicant;
- (iii) the prescribed number of copies of a reproduction or, at the choice of the applicant, of several different reproductions of the industrial design that is the subject of the international application, presented in the prescribed manner; however, where the industrial design is two-dimensional and a request for deferment of publication is made in accordance with paragraph (5), the international application may, instead of containing reproductions, be accompanied by the prescribed number of specimens of the industrial design;
- (iv) an indication of the product or products which constitute the industrial design or in relation to which the industrial design is to be used, as prescribed;
- (v) an indication of the designated Contracting Parties;
- (vi) the prescribed fees;
- (vii) any other prescribed particulars.

(2) [*Additional Mandatory Contents of the International Application*] (a) Any Contracting Party whose Office is an Examining Office and whose law, at the time it becomes party to this Act, requires that an application for the grant of protection to an industrial design contain any of the elements specified in subparagraph (b) in order for that application to be accorded a filing date under that law may, in a declaration, notify the Director General of those elements.

(b) The elements that may be notified pursuant to subparagraph (a) are the following:

- (i) indications concerning the identity of the creator of the industrial design that is the subject of that application;
- (ii) a brief description of the reproduction or of the characteristic features of the industrial design that is the subject of that application;
- (iii) a claim.

(c) Where the international application contains the designation of a Contracting Party that has made a notification under subparagraph (a), it shall also contain, in the prescribed manner, any element that was the subject of that notification.

(3) [*Other Possible Contents of the International Application*] The international application may contain or be accompanied by such other elements as are specified in the Regulations.

(4) [*Several Industrial Designs in the Same International Application*] Subject to such conditions as may be prescribed, an international application may include two or more industrial designs.

(5) [*Request for Deferred Publication*] The international application may contain a request for deferment of publication.

Article 6

Priority

(1) [*Claiming of Priority*] (a) The international application may contain a declaration claiming, under Article 4 of the Paris Convention, the priority of one or more earlier applications filed in or for any country party to that Convention or any Member of the World Trade Organization.

(b) The Regulations may provide that the declaration referred to in subparagraph (a) may be made after the filing of the international application. In such case, the Regulations shall prescribe the latest time by which such declaration may be made.

(2) [*International Application Serving as a Basis for Claiming Priority*] The international application shall, as from its filing date and whatever may be its subsequent fate, be equivalent to a regular filing within the meaning of Article 4 of the Paris Convention.

Article 7

Designation Fees

(1) [*Prescribed Designation Fee*] The prescribed fees shall include, subject to paragraph (2), a designation fee for each designated Contracting Party.

(2) [*Individual Designation Fee*] Any Contracting Party whose Office is an Examining Office and any Contracting Party that is an intergovernmental organization may, in a declaration, notify the Director General that, in connection with any international application in which it is designated, and in connection with the renewal of any international registration resulting from such an international application, the prescribed designation fee referred to in paragraph (1) shall be replaced by an individual designation fee, whose amount shall be indicated in the declaration and can be changed in further declarations. The said amount may be fixed by the said Contracting Party for the initial term of protection and for each term of renewal or for the maximum period of protection allowed by the Contracting Party concerned. However, it may not be higher than the equivalent of the amount which the Office of that Contracting Party would be entitled to receive from an applicant for a grant of protection for an equivalent period to the same number of industrial designs, that amount being diminished by the savings resulting from the international procedure.

(3) [*Transfer of Designation Fees*] The designation fees referred to in paragraphs (1) and (2) shall be transferred by the International Bureau to the Contracting Parties in respect of which those fees were paid.

Article 8

Correction of Irregularities

(1) [*Examination of the International Application*] If the International Bureau finds that the international application does not, at the time of its receipt by the International Bureau, fulfill the requirements of this Act and the Regulations, it shall invite the applicant to make the required corrections within the prescribed time limit.

(2) [*Irregularities Not Corrected*] (a) If the applicant does not comply with the invitation within the prescribed time limit, the international application shall, subject to subparagraph (b), be considered abandoned.

(b) In the case of an irregularity which relates to Article 5(2) or to a special requirement notified to the Director General by a Contracting Party in accordance with the Regulations, if the applicant does not comply with the invitation within the prescribed time limit, the international application shall be deemed not to contain the designation of that Contracting Party.

Article 9

Filing Date of the International Application

(1) [*International Application Filed Directly*] Where the international application is filed directly with the International Bureau, the filing date shall, subject to paragraph (3), be the date on which the International Bureau receives the international application.

(2) [*International Application Filed Indirectly*] Where the international application is filed through the Office of the applicant's Contracting Party, the filing date shall be determined as prescribed.

(3) [*International Application with Certain Irregularities*] Where the international application has, on the date on which it is received by the International Bureau, an irregularity which is prescribed as an irregularity entailing a postponement of the filing date of the international application, the filing date shall be the date on which the correction of such irregularity is received by the International Bureau.

Article 10¹⁵

International Registration, Date of the International Registration, Publication and Confidential Copies of the International Registration

(1) [*International Registration*] The International Bureau shall register each industrial design that is the subject of an international application immediately upon receipt by it of the international application or, where corrections are invited under Article 8, immediately upon receipt of the required corrections. The registration shall be effected whether or not publication is deferred under Article 11.

(2) [*Date of the International Registration*] (a) Subject to subparagraph (b), the date of the international registration shall be the filing date of the international application.

(b) Where the international application has, on the date on which it is received by the International Bureau, an irregularity which relates to Article 5(2), the date of the international registration shall be the date on which the correction of such irregularity is received by the International Bureau or the filing date of the international application, whichever is the later.

¹⁵ When adopting Article 10, the Diplomatic Conference understood that nothing in this Article precludes access to the international application or the international registration by the applicant or the holder or a person having the consent of the applicant or the holder.

(3) [*Publication*] (a) The international registration shall be published by the International Bureau. Such publication shall be deemed in all Contracting Parties to be sufficient publicity, and no other publicity may be required of the holder.

(b) The International Bureau shall send a copy of the publication of the international registration to each designated Office.

(4) [*Maintenance of Confidentiality Before Publication*] Subject to paragraph (5) and Article 11(4)(b), the International Bureau shall keep in confidence each international application and each international registration until publication.

(5) [*Confidential Copies*] (a) The International Bureau shall, immediately after registration has been effected, send a copy of the international registration, along with any relevant statement, document or specimen accompanying the international application, to each Office that has notified the International Bureau that it wishes to receive such a copy and has been designated in the international application.

(b) The Office shall, until publication of the international registration by the International Bureau, keep in confidence each international registration of which a copy has been sent to it by the International Bureau and may use the said copy only for the purpose of the examination of the international registration and of applications for the protection of industrial designs filed in or for the Contracting Party for which the Office is competent. In particular, it may not divulge the contents of any such international registration to any person outside the Office other than the holder of that international registration, except for the purposes of an administrative or legal proceeding involving a conflict over entitlement to file the international application on which the international registration is based. In the case of such an administrative or legal proceeding, the contents of the international registration may only be disclosed in confidence to the parties involved in the proceeding who shall be bound to respect the confidentiality of the disclosure.

Article 11

Deferment of Publication

(1) [*Provisions of Laws of Contracting Parties Concerning Deferment of Publication*] (a) Where the law of a Contracting Party provides for the deferment of the publication of an industrial design for a period which is less than the prescribed period, that Contracting Party shall, in a declaration, notify the Director General of the allowable period of deferment.

(b) Where the law of a Contracting Party does not provide for the deferment of the publication of an industrial design, the Contracting Party shall, in a declaration, notify the Director General of that fact.

(2) [*Deferment of Publication*] Where the international application contains a request for deferment of publication, the publication shall take place,

(i) where none of the Contracting Parties designated in the international application has made a declaration under paragraph (1), at the expiry of the prescribed period or,

(ii) where any of the Contracting Parties designated in the international application has made a declaration under paragraph (1)(a), at the expiry of the period notified in such declaration or, where there is more than one such designated Contracting Party, at the expiry of the shortest period notified in their declarations.

(3) [*Treatment of Requests for Deferment Where Deferment Is Not Possible Under Applicable Law*] Where deferment of publication has been requested and any of the Contracting Parties designated in the international application has made a declaration under paragraph (1)(b) that deferment of publication is not possible under its law,

(i) subject to item (ii), the International Bureau shall notify the applicant accordingly; if, within the prescribed period, the applicant does not, by notice in writing to the International Bureau, withdraw the designation of the said Contracting Party, the International Bureau shall disregard the request for deferment of publication;

(ii) where, instead of containing reproductions of the industrial design, the international application was accompanied by specimens of the industrial design, the International Bureau shall disregard the designation of the said Contracting Party and shall notify the applicant accordingly.

(4) [*Request for Earlier Publication or for Special Access to the International Registration*] (a) At any time during the period of deferment applicable under paragraph (2), the holder may request publication of any or all of the industrial designs that are the subject of the international registration, in which case the period of deferment in respect of such industrial design or designs shall be considered to have expired on the date of receipt of such request by the International Bureau.

(b) The holder may also, at any time during the period of deferment applicable under paragraph (2), request the International Bureau to provide a third party specified by the holder with an extract from, or to allow such a party access to, any or all of the industrial designs that are the subject of the international registration.

(5) [*Renunciation and Limitation*] (a) If, at any time during the period of deferment applicable under paragraph (2), the holder renounces the international registration in respect of all the designated Contracting Parties, the industrial design or designs that are the subject of the international registration shall not be published.

(b) If, at any time during the period of deferment applicable under paragraph (2), the holder limits the international registration, in respect of all of the designated Contracting Parties, to one or some of the industrial designs that are the subject of the international registration, the other industrial design or designs that are the subject of the international registration shall not be published.

(6) [*Publication and Furnishing of Reproductions*] (a) At the expiration of any period of deferment applicable under the provisions of this Article, the International Bureau shall, subject to the payment of the prescribed fees, publish the international registration. If such fees are not paid as prescribed, the international registration shall be canceled and publication shall not take place.

(b) Where the international application was accompanied by one or more specimens of the industrial design in accordance with Article 5(1)(iii), the holder shall submit the prescribed

number of copies of a reproduction of each industrial design that is the subject of that application to the International Bureau within the prescribed time limit. To the extent that the holder does not do so, the international registration shall be canceled and publication shall not take place.

Article 12

Refusal

(1) [*Right to Refuse*] The Office of any designated Contracting Party may, where the conditions for the grant of protection under the law of that Contracting Party are not met in respect of any or all of the industrial designs that are the subject of an international registration, refuse the effects, in part or in whole, of the international registration in the territory of the said Contracting Party, provided that no Office may refuse the effects, in part or in whole, of any international registration on the ground that requirements relating to the form or contents of the international application that are provided for in this Act or the Regulations or are additional to, or different from, those requirements have not been satisfied under the law of the Contracting Party concerned.

(2) [*Notification of Refusal*] (a) The refusal of the effects of an international registration shall be communicated by the Office to the International Bureau in a notification of refusal within the prescribed period.

(b) Any notification of refusal shall state all the grounds on which the refusal is based.

(3) [*Transmission of Notification of Refusal; Remedies*] (a) The International Bureau shall, without delay, transmit a copy of the notification of refusal to the holder.

(b) The holder shall enjoy the same remedies as if any industrial design that is the subject of the international registration had been the subject of an application for the grant of protection under the law applicable to the Office that communicated the refusal. Such remedies shall at least consist of the possibility of a re-examination or a review of the refusal or an appeal against the refusal.

(4)¹⁶ [*Withdrawal of Refusal*] Any refusal may be withdrawn, in part or in whole, at any time by the Office that communicated it.

Article 13

Special Requirements Concerning Unity of Design

(1) [*Notification of Special Requirements*] Any Contracting Party whose law, at the time it becomes party to this Act, requires that designs that are the subject of the same application

¹⁶ When adopting Article 12(4), Article 14(2)(b) and Rule 18(4), the Diplomatic Conference understood that a withdrawal of refusal by an Office that has communicated a notification of refusal may take the form of a statement to the effect that the Office concerned has decided to accept the effects of the international registration in respect of the industrial designs, or some of the industrial designs, to which the notification of refusal related. It was also understood that an Office may, within the period allowed for communicating a notification of refusal, send a statement to the effect that it has decided to accept the effects of the international registration even where it has not communicated such a notification of refusal.

conform to a requirement of unity of design, unity of production or unity of use, or belong to the same set or composition of items, or that only one independent and distinct design may be claimed in a single application, may, in a declaration, notify the Director General accordingly. However, no such declaration shall affect the right of an applicant to include two or more industrial designs in an international application in accordance with Article 5(4), even if the application designates the Contracting Party that has made the declaration.

(2) [*Effect of Declaration*] Any such declaration shall enable the Office of the Contracting Party that has made it to refuse the effects of the international registration pursuant to Article 12(1) pending compliance with the requirement notified by that Contracting Party.

(3) [*Further Fees Payable on Division of Registration*] Where, following a notification of refusal in accordance with paragraph (2), an international registration is divided before the Office concerned in order to overcome a ground of refusal stated in the notification, that Office shall be entitled to charge a fee in respect of each additional international application that would have been necessary in order to avoid that ground of refusal.

Article 14

Effects of the International Registration

(1) [*Effect as Application Under Applicable Law*] The international registration shall, from the date of the international registration, have at least the same effect in each designated Contracting Party as a regularly-filed application for the grant of protection of the industrial design under the law of that Contracting Party.

(2) [*Effect as Grant of Protection Under Applicable Law*] (a) In each designated Contracting Party the Office of which has not communicated a refusal in accordance with Article 12, the international registration shall have the same effect as a grant of protection for the industrial design under the law of that Contracting Party at the latest from the date of expiration of the period allowed for it to communicate a refusal or, where a Contracting Party has made a corresponding declaration under the Regulations, at the latest at the time specified in that declaration.

(b)¹⁷ Where the Office of a designated Contracting Party has communicated a refusal and has subsequently withdrawn, in part or in whole, that refusal, the international registration shall, to the extent that the refusal is withdrawn, have the same effect in that Contracting Party as a grant of protection for the industrial design under the law of the said Contracting Party at the latest from the date on which the refusal was withdrawn.

(c) The effect given to the international registration under this paragraph shall apply to the industrial design or designs that are the subject of that registration as received from the International Bureau by the designated Office or, where applicable, as amended in the procedure before that Office.

(3) [*Declaration Concerning Effect of Designation of Applicant's Contracting Party*] (a) Any Contracting Party whose Office is an Examining Office may, in a declaration, notify the

¹⁷ See footnote 16.

Director General that, where it is the applicant's Contracting Party, the designation of that Contracting Party in an international registration shall have no effect.

(b) Where a Contracting Party having made the declaration referred to in subparagraph (a) is indicated in an international application both as the applicant's Contracting Party and as a designated Contracting Party, the International Bureau shall disregard the designation of that Contracting Party.

Article 15

Invalidation

(1) [*Requirement of Opportunity of Defense*] Invalidation, by the competent authorities of a designated Contracting Party, of the effects, in part or in whole, in the territory of that Contracting Party, of the international registration may not be pronounced without the holder having, in good time, been afforded the opportunity of defending his rights.

(2) [*Notification of Invalidation*] The Office of the Contracting Party in whose territory the effects of the international registration have been invalidated shall, where it is aware of the invalidation, notify it to the International Bureau.

Article 16

Recording of Changes and Other Matters

Concerning International Registrations

(1) [*Recording of Changes and Other Matters*] The International Bureau shall, as prescribed, record in the International Register

(i) any change in ownership of the international registration, in respect of any or all of the designated Contracting Parties and in respect of any or all of the industrial designs that are the subject of the international registration, provided that the new owner is entitled to file an international application under Article 3,

(ii) any change in the name or address of the holder,

(iii) the appointment of a representative of the applicant or holder and any other relevant fact concerning such representative,

(iv) any renunciation, by the holder, of the international registration, in respect of any or all of the designated Contracting Parties,

(v) any limitation, by the holder, of the international registration, in respect of any or all of the designated Contracting Parties, to one or some of the industrial designs that are the subject of the international registration,

(vi) any invalidation, by the competent authorities of a designated Contracting Party, of the effects, in the territory of that Contracting Party, of the international registration in respect of any or all of the industrial designs that are the subject of the international registration,

(vii) any other relevant fact, identified in the Regulations, concerning the rights in any or all of the industrial designs that are the subject of the international registration.

(2) [*Effect of Recording in International Register*] Any recording referred to in items (i), (ii), (iv), (v), (vi) and (vii) of paragraph (1) shall have the same effect as if it had been made in the Register of the Office of each of the Contracting Parties concerned, except that a Contracting Party may, in a declaration, notify the Director General that a recording referred to in item (i) of paragraph (1) shall not have that effect in that Contracting Party until the Office of that Contracting Party has received the statements or documents specified in that declaration.

(3) [*Fees*] Any recording made under paragraph (1) may be subject to the payment of a fee.

(4) [*Publication*] The International Bureau shall publish a notice concerning any recording made under paragraph (1). It shall send a copy of the publication of the notice to the Office of each of the Contracting Parties concerned.

Article 17

Initial Term and Renewal of the International Registration and Duration of Protection

(1) [*Initial Term of the International Registration*] The international registration shall be effected for an initial term of five years counted from the date of the international registration.

(2) [*Renewal of the International Registration*] The international registration may be renewed for additional terms of five years, in accordance with the prescribed procedure and subject to the payment of the prescribed fees.

(3) [*Duration of Protection in Designated Contracting Parties*] (a) Provided that the international registration is renewed, and subject to subparagraph (b), the duration of protection shall, in each of the designated Contracting Parties, be 15 years counted from the date of the international registration.

(b) Where the law of a designated Contracting Party provides for a duration of protection of more than 15 years for an industrial design for which protection has been granted under that law, the duration of protection shall, provided that the international registration is renewed, be the same as that provided for by the law of that Contracting Party.

(c) Each Contracting Party shall, in a declaration, notify the Director General of the maximum duration of protection provided for by its law.

(4) [*Possibility of Limited Renewal*] The renewal of the international registration may be effected for any or all of the designated Contracting Parties and for any or all of the industrial designs that are the subject of the international registration.

(5) [*Recording and Publication of Renewal*] The International Bureau shall record renewals in the International Register and publish a notice to that effect. It shall send a copy of the publication of the notice to the Office of each of the Contracting Parties concerned.

Article 18

Information Concerning Published International Registrations

(1) [*Access to Information*] The International Bureau shall supply to any person applying therefor, upon the payment of the prescribed fee, extracts from the International Register, or information concerning the contents of the International Register, in respect of any published international registration.

(2) [*Exemption from Legalization*] Extracts from the International Register supplied by the International Bureau shall be exempt from any requirement of legalization in each Contracting Party.

CHAPTER II

ADMINISTRATIVE PROVISIONS

Article 19

Common Office of Several States

(1) [*Notification of Common Office*] If several States intending to become party to this Act have effected, or if several States party to this Act agree to effect, the unification of their domestic legislation on industrial designs, they may notify the Director General

(i) that a common Office shall be substituted for the national Office of each of them, and

(ii) that the whole of their respective territories to which the unified legislation applies shall be deemed to be a single Contracting Party for the purposes of the application of Articles 1, 3 to 18 and 31 of this Act.

(2) [*Time at Which Notification Is to Be Made*] The notification referred to in paragraph (1) shall be made,

(i) in the case of States intending to become party to this Act, at the time of the deposit of the instruments referred to in Article 27(2);

(ii) in the case of States party to this Act, at any time after the unification of their domestic legislation has been effected.

(3) [*Date of Entry into Effect of the Notification*] The notification referred to in paragraphs (1) and (2) shall take effect,

(i) in the case of States intending to become party to this Act, at the time such States become bound by this Act;

(ii) in the case of States party to this Act, three months after the date of the communication thereof by the Director General to the other Contracting Parties or at any later date indicated in the notification.

Article 20

Membership of the Hague Union

The Contracting Parties shall be members of the same Union as the States party to the 1934 Act or the 1960 Act.

Article 21

Assembly

(1) [*Composition*] (a) The Contracting Parties shall be members of the same Assembly as the States bound by Article 2 of the Complementary Act of 1967.

(b) Each member of the Assembly shall be represented in the Assembly by one delegate, who may be assisted by alternate delegates, advisors and experts, and each delegate may represent only one Contracting Party.

(c) Members of the Union that are not members of the Assembly shall be admitted to the meetings of the Assembly as observers.

(2) [*Tasks*] (a) The Assembly shall

(i) deal with all matters concerning the maintenance and development of the Union and the implementation of this Act;

(ii) exercise such rights and perform such tasks as are specifically conferred upon it or assigned to it under this Act or the Complementary Act of 1967;

(iii) give directions to the Director General concerning the preparations for conferences of revision and decide the convocation of any such conference;

(iv) amend the Regulations;

(v) review and approve the reports and activities of the Director General concerning the Union, and give the Director General all necessary instructions concerning matters within the competence of the Union;

(vi) determine the program and adopt the biennial budget of the Union, and approve its final accounts;

(vii) adopt the financial regulations of the Union;

(viii) establish such committees and working groups as it deems appropriate to achieve the objectives of the Union;

(ix) subject to paragraph (1)I, determine which States, intergovernmental organizations and non-governmental organizations shall be admitted to its meetings as observers;

(x) take any other appropriate action to further the objectives of the Union and perform any other functions as are appropriate under this Act.

(b) With respect to matters which are also of interest to other Unions administered by the Organization, the Assembly shall make its decisions after having heard the advice of the Coordination Committee of the Organization.

(3) [*Quorum*] (a) One-half of the members of the Assembly which are States and have the right to vote on a given matter shall constitute a quorum for the purposes of the vote on that matter.

(b) Notwithstanding the provisions of subparagraph (a), if, in any session, the number of the members of the Assembly which are States, have the right to vote on a given matter and are represented is less than one-half but equal to or more than one-third of the members of the Assembly which are States and have the right to vote on that matter, the Assembly may make decisions but, with the exception of decisions concerning its own procedure, all such decisions shall take effect only if the conditions set forth hereinafter are fulfilled. The International Bureau shall communicate the said decisions to the members of the Assembly which are States, have the right to vote on the said matter and were not represented and shall invite them to express in writing their vote or abstention within a period of three months from the date of the communication. If, at the expiration of this period, the number of such members having thus expressed their vote or abstention attains the number of the members which was lacking for attaining the quorum in the session itself, such decisions shall take effect provided that at the same time the required majority still obtains.

(4) [*Taking Decisions in the Assembly*] (a) The Assembly shall therefore take its decisions by consensus.

(b) Where a decision cannot be arrived at by consensus, the matter at issue shall be decided by voting. In such a case,

(i) each Contracting Party that is a State shall have one vote and shall vote only in its own name, and

(ii) any Contracting Party that is an intergovernmental organization may vote, in place of its Member States, with a number of votes equal to the number of its Member States which are party to this Act, and no such intergovernmental organization shall participate in the vote if any one of its Member States exercises its right to vote, and *vice versa*.

(c) On matters concerning only States that are bound by Article 2 of the Complementary Act of 1967, Contracting Parties that are not bound by the said Article shall not have the right to vote, whereas, on matters concerning only Contracting Parties, only the latter shall have the right to vote.

(5) [*Majorities*] (a) Subject to Articles 24(2) and 26(2), the decisions of the Assembly shall require two-thirds of the votes cast.

(b) Abstentions shall not be considered as votes.

(6) [*Sessions*] (a) The Assembly shall meet once in every second calendar year in ordinary session upon convocation by the Director General and, in the absence of exceptional circumstances, during the same period and at the same place as the General Assembly of the Organization.

(b) The Assembly shall meet in extraordinary session upon convocation by the Director General, either at the request of one-fourth of the members of the Assembly or on the Director General's own initiative.

(c) The agenda of each session shall be prepared by the Director General.

(7) [*Rules of Procedure*] The Assembly shall adopt its own rules of procedure.

Article 22

International Bureau

(1) [*Administrative Tasks*] (a) International registration and related duties, as well as all other administrative tasks concerning the Union, shall be performed by the International Bureau.

(b) In particular, the International Bureau shall prepare the meetings and provide the secretariat of the Assembly and of such committees of experts and working groups as may be established by the Assembly.

(2) [*Director General*] The Director General shall be the chief executive of the Union and shall represent the Union.

(3) [*Meetings Other than Sessions of the Assembly*] The Director General shall convene any committee and working group established by the Assembly and all other meetings dealing with matters of concern to the Union.

(4) [*Role of the International Bureau in the Assembly and Other Meetings*] (a) The Director General and persons designated by the Director General shall participate, without the right to vote, in all meetings of the Assembly, the committees and working groups established by the Assembly, and any other meetings convened by the Director General under the aegis of the Union.

(b) The Director General or a staff member designated by the Director General shall be *ex officio* secretary of the Assembly, and of the committees, working groups and other meetings referred to in subparagraph (a).

(5) [*Conferences*] (a) The International Bureau shall, in accordance with the directions of the Assembly, make the preparations for any revision conferences.

(b) The International Bureau may consult with intergovernmental organizations and international and national non-governmental organizations concerning the said preparations.

(c) The Director General and persons designated by the Director General shall take part, without the right to vote, in the discussions at revision conferences.

(6) [*Other Tasks*] The International Bureau shall carry out any other tasks assigned to it in relation to this Act.

Article 23

Finances

(1) [*Budget*] (a) The Union shall have a budget.

(b) The budget of the Union shall include the income and expenses proper to the Union and its contribution to the budget of expenses common to the Unions administered by the Organization.

(c) Expenses not attributable exclusively to the Union but also to one or more other Unions administered by the Organization shall be considered to be expenses common to the Unions. The share of the Union in such common expenses shall be in proportion to the interest the Union has in them.

(2) [*Coordination with Budgets of Other Unions*] The budget of the Union shall be established with due regard to the requirements of coordination with the budgets of the other Unions administered by the Organization.

(3) [*Sources of Financing of the Budget*] The budget of the Union shall be financed from the following sources:

- (i) fees relating to international registrations;
- (ii) charges due for other services rendered by the International Bureau in relation to the Union;
- (iii) sale of, or royalties on, the publications of the International Bureau concerning the Union;
- (iv) gifts, bequests and subventions;
- (v) rents, interests and other miscellaneous income.

(4) [*Fixing of Fees and Charges; Level of the Budget*] (a) The amounts of the fees referred to in paragraph (3)(i) shall be fixed by the Assembly on the proposal of the Director General. Charges referred to in paragraph 3(ii) shall be established by the Director General and shall be provisionally applied subject to approval by the Assembly at its next session.

(b) The amounts of the fees referred to in paragraph (3)(i) shall be so fixed that the revenues of the Union from fees and other sources shall be at least sufficient to cover all the expenses of the International Bureau concerning the Union.

(c) If the budget is not adopted before the beginning of a new financial period, it shall be at the same level as the budget of the previous year, as provided in the financial regulations.

(5) [*Working Capital Fund*] The Union shall have a working capital fund which shall be constituted by the excess receipts and, if such excess does not suffice, by a single payment made by each member of the Union. If the fund becomes insufficient, the Assembly shall decide to increase it. The proportion and the terms of payment shall be fixed by the Assembly on the proposal of the Director General.

(6) [*Advances by Host State*] (a) In the headquarters agreement concluded with the State on the territory of which the Organization has its headquarters, it shall be provided that, whenever the working capital fund is insufficient, such State shall grant advances. The

amount of those advances and the conditions on which they are granted shall be the subject of separate agreements, in each case, between such State and the Organization.

(b) The State referred to in subparagraph (a) and the Organization shall each have the right to denounce the obligation to grant advances, by written notification. Denunciation shall take effect three years after the end of the year in which it has been notified.

(7) [*Auditing of Accounts*] The auditing of the accounts shall be effected by one or more of the States members of the Union or by external auditors, as provided in the financial regulations. They shall be designated, with their agreement, by the Assembly.

Article 24

Regulations

(1) [*Subject Matter*] The Regulations shall govern the details of the implementation of this Act. They shall, in particular, include provisions concerning

- (i) matters which this Act expressly provides are to be prescribed;
- (ii) further details concerning, or any details useful in the implementation of, the provisions of this Act;
- (iii) any administrative requirements, matters or procedures.

(2) [*Amendment of Certain Provisions of the Regulations*] (a) The Regulations may specify that certain provisions of the Regulations may be amended only by unanimity or only by a four-fifths majority.

(b) In order for the requirement of unanimity or a four-fifths majority no longer to apply in the future to the amendment of a provision of the Regulations, unanimity shall be required.

(c) In order for the requirement of unanimity or a four-fifths majority to apply in the future to the amendment of a provision of the Regulations, a four-fifths majority shall be required.

(3) [*Conflict Between This Act and the Regulations*] In the case of conflict between the provisions of this Act and those of the Regulations, the former shall prevail.

CHAPTER III

REVISION AND AMENDMENT

Article 25

Revision of This Act

(1) [*Revision Conferences*] This Act may be revised by a conference of the Contracting Parties.

(2) [*Revision or Amendment of Certain Articles*] Articles 21, 22, 23 and 26 may be amended either by a revision conference or by the Assembly according to the provisions of Article 26.

Article 26

Amendment of Certain Articles by the Assembly

(1) [*Proposals for Amendment*] (a) Proposals for the amendment by the Assembly of Articles 21, 22, 23 and this Article may be initiated by any Contracting Party or by the Director General.

(b) Such proposals shall be communicated by the Director General to the Contracting Parties at least six months in advance of their consideration by the Assembly.

(2) [*Majorities*] Adoption of any amendment to the Articles referred to in paragraph (1) shall require a three-fourths majority, except that adoption of any amendment to Article 21 or to the present paragraph shall require a four-fifths majority.

(3) [*Entry into Force*] (a) Except where subparagraph (b) applies, any amendment to the Articles referred to in paragraph (1) shall enter into force one month after written notifications of acceptance, effected in accordance with their respective constitutional processes, have been received by the Director General from three-fourths of those Contracting Parties which, at the time the amendment was adopted, were members of the Assembly and had the right to vote on that amendment.

(b) Any amendment to Article 21(3) or (4) or to this subparagraph shall not enter into force if, within six months of its adoption by the Assembly, any Contracting Party notifies the Director General that it does not accept such amendment.

(c) Any amendment which enters into force in accordance with the provisions of this paragraph shall bind all the States and intergovernmental organizations which are Contracting Parties at the time the amendment enters into force, or which become Contracting Parties at a subsequent date.

CHAPTER IV

FINAL PROVISIONS

Article 27

Becoming Party to This Act

(1) [*Eligibility*] Subject to paragraphs (2) and (3) and Article 28,

(i) any State member of the Organization may sign and become party to this Act;

(ii) any intergovernmental organization which maintains an Office in which protection of industrial designs may be obtained with effect in the territory in which the constituting treaty of the intergovernmental organization applies may sign and become party to this Act, provided that at least one of the member States of the intergovernmental organization is a member of the Organization and provided that such Office is not the subject of a notification under Article 19.

(2) [*Ratification or Accession*] Any State or intergovernmental organization referred to in paragraph (1) may deposit

- (i) an instrument of ratification if it has signed this Act, or
- (ii) an instrument of accession if it has not signed this Act.

(3) [*Effective Date of Deposit*] (a) Subject to subparagraphs (b) to (d), the effective date of the deposit of an instrument of ratification or accession shall be the date on which that instrument is deposited.

(b) The effective date of the deposit of the instrument of ratification or accession of any State in respect of which protection of industrial designs may be obtained only through the Office maintained by an intergovernmental organization of which that State is a member shall be the date on which the instrument of that intergovernmental organization is deposited if that date is later than the date on which the instrument of the said State has been deposited.

(c) The effective date of the deposit of any instrument of ratification or accession containing or accompanied by the notification referred to in Article 19 shall be the date on which the last of the instruments of the States members of the group of States having made the said notification is deposited.

(d) Any instrument of ratification or accession of a State may contain or be accompanied by a declaration making it a condition to its being considered as deposited that the instrument of one other State or one intergovernmental organization, or the instruments of two other States, or the instruments of one other State and one intergovernmental organization, specified by name and eligible to become party to this Act, is or are also deposited. The instrument containing or accompanied by such a declaration shall be considered to have been deposited on the day on which the condition indicated in the declaration is fulfilled. However, when an instrument specified in the declaration itself contains, or is itself accompanied by, a declaration of the said kind, that instrument shall be considered as deposited on the day on which the condition specified in the latter declaration is fulfilled.

(e) Any declaration made under paragraph (d) may be withdrawn, in its entirety or in part, at any time. Any such withdrawal shall become effective on the date on which the notification of withdrawal is received by the Director General.

Article 28

Effective Date of Ratifications and Accessions

(1) [*Instruments to Be Taken into Consideration*] or the purposes of this Article, only instruments of ratification or accession that are deposited by States or intergovernmental organizations referred to in Article 27(1) and that have an effective date according to Article 27(3) shall be taken into consideration.

(2) [*Entry into Force of This Act*] this Act shall enter into force three months after six States have deposited their instruments of ratification or accession, provided that, according to the most recent annual statistics collected by the International Bureau, at least three of those States fulfil at least one of the following conditions:

(i) at least 3,000 applications for the protection of industrial designs have been filed in or for the State concerned, or

(ii) at least 1,000 applications for the protection of industrial designs have been filed in or for the State concerned by residents of States other than that State.

(3) [*Entry into Force of Ratifications and Accessions*] (a) Any State or intergovernmental organization that has deposited its instrument of ratification or accession three months or more before the date of entry into force of this Act shall become bound by this Act on the date of entry into force of this Act.

(b) Any other State or intergovernmental organization shall become bound by this Act three months after the date on which it has deposited its instrument of ratification or accession or at any later date indicated in that instrument.

Article 29

Prohibition of Reservations

No reservations to this Act are permitted.

Article 30

Declarations Made by Contracting Parties

(1) [*Time at Which Declarations May Be Made*] Any declaration under Articles 4(1)(b), 5(2)(a), 7(2), 11(1), 13(1), 14(3), 16(2) or 17(3)(c) may be made

(i) at the time of the deposit of an instrument referred to in Article 27(2), in which case it shall become effective on the date on which the State or intergovernmental organization having made the declaration becomes bound by this Act, or

(ii) after the deposit of an instrument referred to in Article 27(2), in which case it shall become effective three months after the date of its receipt by the Director General or at any later date indicated in the declaration but shall apply only in respect of any international registration whose date of international registration is the same as, or is later than, the effective date of the declaration.

(2) [*Declarations by States Having a Common Office*] Notwithstanding paragraph (1), any declaration referred to in that paragraph that has been made by a State which has, with another State or other States, notified the Director General under Article 19(1) of the substitution of a common Office for their national Offices shall become effective only if that other State or those other States makes or make a corresponding declaration or corresponding declarations.

(3) [*Withdrawal of Declarations*] Any declaration referred to in paragraph (1) may be withdrawn at any time by notification addressed to the Director General. Such withdrawal shall take effect three months after the date on which the Director General has received the notification or at any later date indicated in the notification. In the case of a declaration made under Article 7(2), the withdrawal shall not affect international applications filed prior to the coming into effect of the said withdrawal.

Article 31

Applicability of the 1934 and 1960 Acts

(1) [*Relations Between States Party to Both This Act and the 1934 or 1960 Acts*] This Act alone shall be applicable as regards the mutual relations of States party to both this Act and the 1934 Act or the 1960 Act. However, such States shall, in their mutual relations, apply the 1934 Act or the 1960 Act, as the case may be, to industrial designs deposited at the International Bureau prior to the date on which this Act becomes applicable as regards their mutual relations.

(2) [*Relations Between States Party to Both This Act and the 1934 or 1960 Acts and States Party to the 1934 or 1960 Acts Without Being Party to This Act*] (a) Any State that is party to both this Act and the 1934 Act shall continue to apply the 1934 Act in its relations with States that are party to the 1934 Act without being party to the 1960 Act or this Act.

(b) Any State that is party to both this Act and the 1960 Act shall continue to apply the 1960 Act in its relations with States that are party to the 1960 Act without being party to this Act.

Article 32

Denunciation of This Act

(1) [*Notification*] Any Contracting Party may denounce this Act by notification addressed to the Director General.

(2) [*Effective Date*] Denunciation shall take effect one year after the date on which the Director General has received the notification or at any later date indicated in the notification. It shall not affect the application of this Act to any international application pending and any international registration in force in respect of the denouncing Contracting Party at the time of the coming into effect of the denunciation.

Article 33

Languages of This Act; Signature

(1) [*Original Texts; Official Texts*] (a) This Act shall be signed in a single original in the English, Arabic, Chinese, French, Russian and Spanish languages, all texts being equally authentic.

(b) Official texts shall be established by the Director General, after consultation with the interested Governments, in such other languages as the Assembly may designate.

(2) [*Time Limit for Signature*] This Act shall remain open for signature at the headquarters of the Organization for one year after its adoption.

Article 34

Depositary

The Director General shall be the depositary of this Act.

DECLARATION

on direct filing

The President of the Council, when depositing this instrument of accession with the Director-General of WIPO, shall attach the following declaration to the instrument of accession:

“The European Community declares that international applications may not be filed through its Office.”

DECLARATION

on the individual fee system

The President of the Council, when depositing this instrument of accession with the Director-General of WIPO, shall attach the following declaration to the instrument of accession:

“The European Community declares that, in connection with each international registration in which it is designed, and in connection with the renewal of any international registration resulting from such an international application, the prescribed designation fee referred to in Article 7 (1) of the Geneva Act shall be replaced by an individual designation fee, whose amount shall be: ”¹⁸

DECLARATION

on the duration of protection in the European Community

The President of the Council, when depositing this instrument of accession with the Director-General of WIPO, shall attach the following declaration to the instrument of accession:

“The European Community declares that the maximum duration of protection provided for by its law is 25 years.”

¹⁸ On the basis of a financial analysis of the impact of the accession of the European Community to the Geneva Act, the European Commission will propose an amendment to Commission Regulation (EC) No 2246/2002 of 16 December 2002 on the fees payable to the Office for Harmonization in the Internal Market (Trade Marks and Designs) in respect of the registration of Community designs (OJ L 341, 17.12.2002, p. 54).

LEGISLATIVE FINANCIAL STATEMENT

Policy area: Internal Market for Goods and Services

Activity: Prepare access of the European Community to the Geneva Act on the international registration of designs

TITLE OF ACTION: PROPOSAL FOR A COUNCIL DECISION APPROVING THE ACCESSION OF THE EUROPEAN COMMUNITY TO THE GENEVA ACT OF THE HAGUE AGREEMENT CONCERNING THE INTERNATIONAL REGISTRATION OF INDUSTRIAL DESIGNS, ADOPTED IN GENEVA ON 2 JULY 1999.

1. BUDGET LINE(S) + HEADING(S)

2. OVERALL FIGURES

2.1. Total allocation for action (Part B): € million for commitment

Not applicable

2.2. Period of application:

(start and expiry years)

Start: Date of entry into force

Expiry: Indefinite

2.3. Overall multiannual estimate of expenditure:

(a) Schedule of commitment appropriations/payment appropriations (financial intervention) *(see point 6.1.1)*

None

(b) Technical and administrative assistance and support expenditure *(see point 6.1.2)*

None

(c) Overall financial impact of human resources and other administrative expenditure *(see points 7.2 and 7.3)*

€ million (to three decimal places)

	2006	2007	2008	2009	2010	2011	Total
Commitments/ payments	0.054	0.054	0.054	0.054	0.054	0.054	0.324

TOTAL a+b+c							
Commitments	0.054	0.054	0.054	0.054	0.054	0.054	0.324

2.4. Compatibility with financial programming and financial perspective

[X] Proposal is compatible with existing financial programming.

Proposal will entail reprogramming of the relevant heading in the financial perspective.

Proposal may require application of the provisions of the Interinstitutional Agreement.

2.5. Financial impact on revenue:

[X] Proposal has no financial implications (involves technical aspects regarding implementation of a measure)

OR

Proposal has financial impact – the effect on revenue is as follows:

Not applicable

3. BUDGET CHARACTERISTICS

Type of expenditure		New	EFTA contribution	Contributions from applicant countries	Heading in financial perspective
Non-comp	Diff	NO	NO	NO	No 5

4. LEGAL BASIS

Articles 308 EC in conjunction with Article 300(2) EC and Article 300(3) EC

5. DESCRIPTION AND GROUNDS

5.1. Need for Community intervention

5.1.1. Objectives pursued

The objective of the proposal is to establish a link between the Community design system and the international registration system established under the Geneva Act of the Hague System. This link will enable designers to file a single international application at the International Bureau of WIPO designating, amongst other Contracting Parties, the European Community in order to obtain protection under the Community design system.

5.1.2. Measures taken in connection with ex ante evaluation

The European Community already showed its great interest in the Hague System when it decided to take an active part in the international negotiations which led to the Diplomatic Conference held in Geneva in 1999, when the new act was adopted. Organizations representing the potential users of both the Community design system and the international registration system repeatedly expressed their strong interest in establishing a link between the two systems. In 2004 the Commission launched a consultation with interested parties (Member States, business and professional organisations, and private companies) on the possible impact of business on the accession of the EC to the Hague System. An overwhelming majority of the responses, bordering on unanimity, supported the idea that the Community should accede in the near future to the Geneva Act.

5.1.3. Measures taken following ex post evaluation

Not applicable

5.2. Action envisaged and budget intervention arrangements

The proposed Decision authorizes the President of the Council to deposit the instrument of accession to the Geneva Act with the Director-General of WIPO, and includes declarations which shall be made in the instrument of accession. The proposal also authorizes the Commission to represent the Community in the Assembly of the Hague Union after the accession of the Community to the Geneva Act. No financial assistance is involved.

5.3. Methods of implementation

The Commission will need to negotiate in the Hague Union Assembly on behalf of the Community following coordination in the relevant Council working party or at on-the-spot meetings convened in the course of the work within the framework of WIPO.

6. FINANCIAL IMPACT

6.1. Total financial impact on Part B - (over the entire programming period)

Not applicable

6.2. Calculation of costs by measure envisaged in Part B (over the entire programming period)

Not applicable

7. IMPACT ON STAFF AND ADMINISTRATIVE EXPENDITURE

7.1. Impact on human resources

Types of post	Staff to be assigned to management of the action using existing and/or additional resources	Total	Description of tasks deriving from the action
---------------	---	-------	---

		Number of permanent posts	Number of temporary posts		
Officials or temporary staff	A	0,5 A	0	0,5 A	<i>If necessary, a fuller description of the tasks may be annexed.</i> Preparing for and attending meetings of Council and Parliament to negotiate the proposal through the adoption. Preparing for and participating in meetings of the Hague Union and coordinate positions with the Member States.
	B C				
Other human resources		0	0	0	
Total		0,5	0	0,5	

7.2. Overall financial impact of human resources

Type of human resources	Amount (€)	Method of calculation *
Officials	54.000	Annual costs per official: 108.000 €
Temporary staff		
Other human resources (specify budget line)		
Total	54.000	

The amounts are total expenditure for twelve months.

7.3. Other administrative expenditure deriving from the action

Not applicable

I.	Annual total (7.2 + 7.3)	€54.000
II.	Duration of action	2006-2011
III.	Total cost of action (I x II)	€324.000

8. FOLLOW-UP AND EVALUATION

8.1. Follow-up arrangements

Not applicable

8.2. Arrangements and schedule for the planned evaluation

On-going evaluation will be possible through monitoring the volume of international registrations in which the Community design system is designated.

9. ANTI-FRAUD MEASURES

No financial assistance is involved.

COM(2005)689 final

2005/0274 (CNS)

Proposal for a

COUNCIL REGULATION

amending Regulation (EC) No 6/2002 and (EC) No 40/94 to give effect to the accession of the European Community to the Geneva Act of the Hague Agreement concerning the international registration of industrial designs {SEC(2005)1749}

(presented by the Commission)

EXPLANATORY MEMORANDUM

1. Introduction

On 12 December 2001, the Council adopted Regulation (EC) No 6/2002 on Community Designs (hereinafter referred to as “the Community Designs Regulation”).[1]

The Community Designs Regulation establishes the Community design system, which provides for the acquisition of protection for designs with unitary effect for the whole territory of the Community. According to the Regulation, a design may be protected either by an unregistered Community design, if the design is made available to the public in the manner provided for in the Regulation, or by a registered Community design, if registered under the procedure provided for in the Regulation.

The Community Designs Regulation entrusts the Office for the Harmonization in the Internal Market (Trade Marks and Designs), hereinafter referred to as “the Office”, [2] to handle the administration of the Community design. On 1 January 2003, the Office enabled applications for registered Community designs with the first date of filing being granted on 1 April 2003.

On 23 December 2003, the 1999 Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999 (hereinafter referred to as “the Geneva Act”) entered into force. The Geneva Act allows designers to obtain design protection in a number of countries through a single international deposit. Thus, under the Geneva Act, a single international application filed with the International Bureau of the World Intellectual Property Organization (WIPO) replaces a whole series of applications which, otherwise, should have been effected with different national or regional Offices.

One of the main innovations of the Geneva Act is that intergovernmental organizations which have a regional office for the purpose of registering designs with effect in the territory in which the constituting treaty of the organization applies, may accede. This innovation was introduced into the Geneva Act with the specific intention of allowing the Community to adhere to the international registration system after the entry into force of the Community design system.

In order to prepare for the accession of the Community to the Geneva Act, the Commission has elaborated two proposals, which are jointly presented to the Council. The first Commission proposal relates to the accession of the Community to the Geneva Act.[3]

This second proposal contains the measures which are necessary to give effect to the accession of the Community to the Geneva Act.

2. The structure of the Commission proposal

It is proposed that the measures giving effect to the accession of the Community to the Geneva Act be incorporated in the Community Design Regulation through amendment of existing provisions and addition of a new Title XIa on "International Registration of Designs". [4]

In principle, the substantive provisions applying to the international registration designating the Community are the same as the provisions which apply to Community designs.

Thus, international registrations designating the European Community and Community designs shall both be subject to the same law relating to designs (Title II), both shall be objects of property (Title III), may be subject to an application for a declaration of invalidity (Title VI), an appeal shall lie from the decision of the Invalidity Division (Title VII), and the jurisdiction and procedures in legal actions relating to Community designs shall be the same for international registrations designating the European Community as for Community designs (Title IX).

For these reasons, the new Title XIa contains many cross-references to other Articles of the Regulation.

The inclusion of this new title in the Regulation facilitates access to all the provisions which apply to a design protected for the entire territory of the European Community, be it through the registration of the design as a Community design or be it through an international registration of the design designating the European Community under the Geneva Act.

By means of the proposed structure, implementing measures, such as laid down in Commission Regulations (EC) No 2245/2002[5], No 2246/2002[6] and No 216/96[7] will apply in principle *mutatis mutandis*. Where necessary, the Commission will amend them, for instance regarding the examination as to the grounds for refusal referred to in Article 106e of this proposal.

3. The Geneva Act

The Geneva Act forms part of the Hague System, which is based on the Hague Agreement Concerning the International Registration of Industrial Designs. This Agreement is constituted by three different Acts: the London Act of 1934, the Hague Act of 1960 and the Geneva Act of 1999. The three Acts are autonomous and coexist with respect to their substantive provisions. Contracting parties may decide to become party to only one, to two or to all three of the Acts. They automatically become member of the Hague Union which at present has 42 Contracting States, amongst which 12 EU Member States.[8]

The system of international registration of designs arose from a need for simplicity and economy. In effect, it enables design owners originating from a Contracting State to obtain protection of their designs with a minimum of formality and expense.

The international application can be filed in one language (English or French), upon payment of a single set of fees. The applicant has to designate the Contracting States in which protection is sought. An international application is normally sent directly to the International Bureau. Upon receipt, the International Bureau checks that the international application complies with the prescribed formal requirements and then publishes the application – or better, the registration - in the International Designs Bulletin (on WIPO's internet website). Following publication, each national Office must identify the international registrations in which they have been designated, in order to proceed with the substantive examination, if any, provided for by its own legislation.

Any substantive aspect of the protection (including in particular the substantive examination carried out by each Office, the assessment of the conditions of protection and the scope of that protection) is thus entirely a matter of the legislation of each designated Contracting Party.

As a result of that examination, the Office may notify to the International Bureau a refusal of protection for its territory. However, an international registration may not be refused on grounds of non-compliance with formal requirements. Such requirements must be considered as already satisfied, following the examination carried out by the International Bureau.

Once the international application has been accepted it produces the same effect in each of the countries designated as if the design had been deposited there directly. The international registration is therefore equivalent to a national right in terms of its scope of protection and enforcement. At the same time, the international registration facilitates the maintenance of protection: there is a single application to renew and one simple procedure for recording any changes (e.g. in ownership or address).

The adoption of the Geneva Act in 1999 had a twofold objective, namely:

- to make the Hague System more attractive for applicants and to extend the system to new members; to that end, the 1999 Act has introduced a number of features into the Hague system with a view to facilitating the accession to the Hague Union of countries which administer design examination systems (such as USA and Japan);
- to provide for the establishment of a link between the international registration system and regional systems by providing that intergovernmental organizations may become a party to the Act.

The second objective opens the door for the accession of the European Community to the Hague System. The territory of the EU would then be regarded as a single country for the purposes of the Agreement, with the Community design rules as the relevant domestic legislation. The OHIM would become the Office responsible for the substantive examination of international applications in which the Community has been designated.

The Geneva Act system became fully operational on 1 April 2004. On that date, the Geneva Act and the modernised Common Regulations under the Hague Agreement, which simplify the entire proceedings, became effective.

The Community design system and the international registration system as established by the Hague Agreement can be considered as being complementary. The Community design system provides for a complete and unified regional designs registration system which covers the whole territory of the European Union. The Hague Agreement constitutes a treaty centralizing the procedures for obtaining protection of designs in the territory of the designated Contracting Parties.

4. Legal basis

Since the rules giving effect to the accession of the European Community to the Hague Agreement are incorporated in the Regulation through the inclusion of a new and separate Title within that Regulation and an amendment of existing provisions in the Regulation, the legal basis for this proposal must be the same as the legal basis of the Regulation, i.e. Article 308 of the Treaty.

5. The Articles

Article 1, paragraph 1

Article 1, paragraph 1, modifies Article 25(1)(d) by adding “or by a design right registered under the Geneva Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999 (...) and which has effect in the Community, or by an application for such a right” as a further earlier right available to be invoked as a ground of invalidity. Such an addition is needed to clarify that an international application or registration has the same value as prior design as a design right under national or Community design law.

Article 1, paragraph 2

The provisions giving effect to the accession of the European Community to the Geneva Act shall be incorporated in the Community Designs Regulation through inclusion of the new Title XIa on international registration of designs.

Section 1 – General provisions

Article 106a (Application of provisions)

As a general rule, Article 106a of this proposed amendment of the Regulation provides that in principle Council Regulation (EC) No 6/2002 on Community designs and the regulations implementing that Regulation shall apply to international registrations under the Geneva Act designating the Community.

Moreover, it is clarified that the International Register will take the place of the register maintained by the Office where international registrations designating the European Community are concerned. Any recording in the International Register related to an international registration designating the European Community shall have the same effects as if it had been made in the register maintained by the Office.

The same reasoning applies to publication: all publications in relation to an international application designating the Community shall be carried out by the International Bureau and shall have the same effects as publications by the Office. In addition, the reasoning applies to the language regime of Article 98 of the Regulation.

Section 2 – International Registrations Designating the European Community

Article 106b (Procedure for filing the international designation)

Article 4(1)(a) of the Geneva Act states that the international application may be filed, at the option of the applicant, either directly with the International Bureau or through the Office of the applicant's Contracting party. However, according to Article 4(1)(b) of the Geneva Act, a Contracting Party may notify that international applications may not be filed through its Office.

The Hague system draws most of its advantages from its simplicity and the location of the receiving office seems to be of minor importance for the application of designs. The European Community should therefore exclude the filing of an application through the Office in order to avoid useless duplication of work. Direct filing at WIPO is also to be preferred in order to avoid confusion by applicants between applications for registering Community designs and applications for international registrations. Such confusion would be all the more problematic in case of payment of the basic fee for an international application, which has to be paid in any event directly to the International Bureau and which is payable at the time of filing. If applicants would erroneously pay the fee to OHIM, this Office would have to return the fee. It is significant that at present WIPO does not receive applications filed through national offices even from those Contracting Parties who would permit such a procedure.

For this reason, the Commission proposes that the Community, in its instrument of accession, declares that international applications may not be filed through its Office. Accordingly, Article 106b specifies that international applications pursuant to Article 4(1) of the Geneva Act indicating the Community shall be filed directly at the International Bureau.

Article 106c (Designation fees)

1. The Geneva Act provides in Article 7 that the prescribed fees shall include a standard designation fee that has to be paid for each designated Contracting Party. In addition, any Contracting Party which is an intergovernmental organisation may declare that, for each application and for each renewal of an international registration in which it is designated, the standard designation fee is replaced by an individual designation fee, whose amount shall be indicated in the declaration and can be changed in further declarations. The fixed amount may not be higher than the equivalent of the amount which the Contracting Party would be entitled to receive for a national application and renewal, that amount being diminished by the savings resulting from the international procedure.

2. The Commission proposes that the Community, in its instrument of accession, declares that the prescribed designation fees referred to in Article 7(1) of the Geneva Act in relation to the application and the renewal are replaced by individual designation fees. These fees are payable to the International Bureau and shall be transferred by the International Bureau to OHIM.

3. The Commission will also propose an amendment to Regulation (EC) No 2246/2002 on the fees payable by OHIM, where the amounts of the individual designation fees will be fixed, in accordance with the requirements of the referred Article 7(2) and Rule 28 of the Common Regulations.

Article 106d (Effects of international registration designating the Community)

Paragraph 1

Pursuant to Article 48 of the Community Designs Regulation, an application for a registered Community design shall be registered by the Office as a registered Community design provided the requirements are fulfilled that an application for a registered Community design must satisfy and to the extent that the application has not been refused by virtue of Article 47 of the Community Designs Regulation.

Pursuant to Article 47, an application for a registered Community design shall be refused where the Office notices grounds for non-registrability, i.e. where the design for which protection is sought does not correspond to the definition under Article 3(a), or is contrary to public policy or accepted principles of morality.

The provision of Article 106d of this proposed amendment of the Regulation ensures that the commencement of protection of an international registration designating the Community is subject to the same conditions as apply to a registered Community design, i.e. an international registration designating the European Community shall not have the effect of a Community design registration in the territory of the European Community before the Office could examine the international registration for the grounds of non-registrability.

Paragraph 2

Article 106d(2) of this proposed amendment of the Regulation stipulates that where the Office does not refuse the effects of an international registration designating the European Community in its territory pursuant to Article 12(2) of the Geneva Act, or where any such refusal has been withdrawn, the effects of the international registration shall commence with the date of its registration pursuant to Article 10(2) of the Geneva Act and the effects shall be the same as the effects of a registered Community design.

Paragraph 3

While there is no need to republish the international registrations which are recorded in the International Register in the Register of the Office, Article 106d(3) of this proposed amendment of the Regulation obliges the Office to provide information about the registrations under the Geneva Act designating the European Community. This could for instance be effectively done by creating on the OHIM website a hyperlink to the Hague System. The modalities should be laid down in the Implementing Regulation.

Article 106e (Grounds for refusal)

Paragraph 1

The grounds for refusal set forth in Article 106e of this proposed amendment of the Regulation are identical to the grounds of non-registrability pursuant to Article 47(1), thereby ensuring that an international registration designating the Community is subject to the same examination as applications for registered Community designs.

Paragraph 2

The provision of Article 106e of this proposed amendment of the Regulation guarantees the holder of an international registration designating the Community the right to submit observations or to renounce the international registration in respect to the European Community in compliance with Article 12(3)(b) of the Geneva Act.

The corresponding provision in Article 47(2) stipulates furthermore that an applicant for a registered Community design shall be allowed an amendment of the application. However, this further option cannot be applied to an international registration because the grounds for refusal pursuant to paragraph 1 may only be overcome by an amendment of the design in question whereas the Geneva Act does not provide for an amendment of the design of an international registration after the design has been registered in the International Register.

The regular procedure would be as follows: the Office will examine ex officio as to the grounds for refusal. If the Office, in carrying out this examination, notices a ground for refusal, it will notify the International Bureau, including the grounds on which the refusal is based. Such notification will be issued within the six months from the publication of the international registration (Rule 18(1) of the Common Regulations). The International Bureau, without delay, transmits a copy of the notification of refusal to the holder (Article 12(3) of the Geneva Act). Within the time limit specified by the Office in the notification the holder is allowed to renounce of the international registration in respect of the Community or to submit observations in order to overcome the grounds for refusal. In the course of the examination as to the grounds of refusal the holder and the Office communicate directly with each other. Where the holder overcomes the ground(s) for refusal, the Office shall withdraw the refusal and notify the International Bureau accordingly.

Paragraph 3

Article 106e(3) specifies that the conditions for the examination as to the grounds for refusal shall be laid down in the implementing regulation.

Article 106f (Invalidation of the effects of an international registration)

Paragraph 1

Article 106f of this proposed amendment of the Regulation implements Article 15(1) of the Geneva Act allowing for a declaration of

invalidity of the effects of an international registration in the territory of the European Community.

This provision ensures that a declaration of invalidity of the effects of an international registration in the territory of the European Community shall be subject to the same provisions as apply to an application for a declaration of invalidity of a registered Community design. Third parties may pursue a declaration of invalidity of the effects of an international registration in the Community either by means of an application submitted to the Office according to Article 52 or by a counterclaim before a Community design court according to Article 81(d).

In case of seeking invalidation of the effects before the Office, Titles VI and VII apply. In particular, the holder may submit observations to the application for a declaration of invalidity, pursuant to Article 31 of the Implementing Regulation. The final decision of the Invalidity Division is subject to appeal (Article 55(1) of the Community Designs Regulation).

In this respect, Article 15(1) of the Geneva Act is observed. This provision requires that invalidation of the effects of the international registration may not be pronounced without the holder having, in good time, been afforded the opportunity of defending his rights.

Paragraph 2

Article 15(2) of the Geneva Act requires the Office of the Contracting Party in whose territory the effects of the international registration have been invalidated, where it is aware of the invalidation, to notify it to the International Bureau. This obligation has been copied in Article 106f(2). It is obvious that the Office will be aware of the invalidity if this is the result of an invalidity procedure at the Office, or if a Community design court informs the Office on a declaration of invalidity, in accordance with Article 86 (4) of the Community Designs Regulation.

Article 2

Article 97 of the Community Designs Regulation specifies that unless otherwise provided in the title on supplementary provisions concerning the Office, Title XII of the Regulation on the Community trade mark shall apply to the Office with regard to its tasks under this Regulation. Title XII of the Regulation on the Community trade mark includes Article 134(3) on the Office's revenues. This provision has been modified in light of the accession to the Madrid Protocol which created a new source of revenues, being the "total fees payable under the Madrid Protocol referred to in Article 140 of this Regulation for an international registration designating the European Communities...".

A similar modification of the Community trade mark Regulation is needed following the accession of the EC to the Geneva Act. The fees payable under the Geneva Act should be included as a new source of revenues for the Office.

Article 3

The Community shall become bound by the Geneva Act three months after that date on which it has deposited its instrument of accession with the Director-General of the International Bureau.

In this respect, it should be recalled that Article 2 of the Commission's proposal for a Council Decision approving the accession of the European Community to the Geneva Act to which reference was made earlier provides that following the adoption of that decision by the Council, the Council may deposit that instrument of accession with the Director-General of the International Bureau from the date on which the Council adopted the necessary measures to give effect to the accession of the Community to the Geneva Act.

2005/0274 (CNS)

Proposal for a

COUNCIL REGULATION

amending Regulation (EC) No 6/2002 and (EC) No 40/94 to give effect to the accession of the European Community to the Geneva Act of the Hague Agreement concerning the international registration of industrial designs

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 308 thereof,

Having regard to the proposal from the Commission[9],

Having regard to the opinion of the European Parliament[10],

Having regard to the opinion of the European Economic and Social Committee[11],

Whereas:

(1) Council Regulation (EC) No 6/2002 of 12 December 2001 on Community designs[12] created the Community design system whereby undertakings can by means of one procedural system obtain Community designs to which uniform protection is given and which produce their effects throughout the entire area of the Community.

(2) Following preparations initiated and carried out by the World Intellectual Property Organization (WIPO) with the participation of the Member States which are members of the Hague Union, the Member States which are not members of the Hague Union and the European Community, the Diplomatic Conference, convened for that purpose at Geneva, adopted the Geneva Act of the Hague Agreement concerning the international registration of industrial designs (hereinafter referred to as the "Geneva Act") on 2 July 1999.

(3) The Council, by Council Decision [...] approved the accession of the European Community to the Geneva Act of the Hague Agreement concerning the international registration of industrial designs[13] and authorised the President of the Council to deposit the instrument of accession with the Director-General of WIPO as from the date on which the Council has adopted the measures which are necessary to give effect to the accession of the Community to the Geneva Act. This Regulation contains those measures.

(4) The appropriate measures should be incorporated in Regulation (EC) No 6/2002 through the inclusion of a new title on "International registration of designs".

(5) The rules and procedures relating to international registrations designating the Community should, in principle, be the same as the rules and procedures which apply to Community designs applications. According to this principle, an international registration designating the Community should be subject to the examination as to the grounds for non-registrability before it takes the same effect as a registered Community design. Likewise, an international registration having the same effect as a registered Community design should be subject to the same rules on invalidation as a registered Community design.

(6) Regulation (EC) No 2002/6 should therefore be amended accordingly.

(7) The accession of the Community to the Geneva Act will create a new source of revenues for the Office for the Harmonization in the Internal Market (Trade Marks and Designs). Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark[14]

should therefore be amended accordingly.

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 6/2002 is amended as follows:

1. Article 25(1)(d) is replaced by the following:

“(d) if the Community design is in conflict with a prior design which has been made available to the public after the date of filing of the application or, if priority is claimed, the date of priority of the Community design, and which is protected from a date prior to the said date

i) by a registered Community design or an application for such a design, or

ii) by a registered design right of a Member State, or by an application for such a right, or

iii) by a design right registered under the Geneva Act of the Hague Agreement concerning the international registration of industrial designs, adopted in Geneva on 2 July 1999, hereinafter referred to as “the Geneva Act”, which was approved by Council Decision [...] [15] and which has effect in the Community, or by an application for such a right;”

2. The following title is inserted after title XI:

“TITLE XIa:

INTERNATIONAL REGISTRATION OF DESIGNS

SECTION 1

GENERAL PROVISIONS

Article 106a

Application of provisions

1. Unless otherwise specified in this title, this Regulation and any Regulations implementing this Regulation adopted pursuant to Article 109 shall apply, *mutatis mutandis*, to registrations in the international register maintained by the International Bureau of the World Intellectual Property Organization (hereinafter referred to as “international registration” and “the International Bureau”) designating the Community, under the Geneva Act.

2. Any recording of an international registration designating the Community in the International Register shall have the same effect as if it had been made in the register of Community designs of the Office, and any publication of an international registration designating the Community in the Bulletin of the International Bureau shall have the same effect as if it had been published in the Community Designs Bulletin.

SECTION 2

INTERNATIONAL REGISTRATIONS DESIGNATING THE COMMUNITY

Article 106b

Procedure for filing the international application

International applications pursuant to Article 4(1) of the Geneva Act shall be filed directly at the International Bureau.

Article 106c

Designation fees

The prescribed designation fees referred to in Article 7(1) of the Geneva Act are replaced by an individual designation fee.

Article 106d

Effects of international registration designating the European Community

1. An international registration designating the Community shall, from the date of its registration, have the same effect as an application for a registered Community design.
2. If no refusal has been notified or if any such refusal has been withdrawn, the international registration of a design designating the Community shall, from the date referred to in paragraph 1, have the same effect as the registration of a design as a registered Community design.
3. The Office shall provide information on international registrations referred to in paragraph 2, in accordance with the conditions laid down in the Implementing Regulation.

Article 106e

Grounds for refusal

1. The Office shall communicate to the International Bureau a notification of refusal not later than six months from the date of publication of the international registration, if in carrying out an examination of an international registration, the Office notices that the design for which protection is sought does not correspond to the definition under Article 3(a), or is contrary to public policy or to accepted principles of morality.

The notification shall state the grounds on which the refusal is based.

2. The refusal of the effects of an international registration in the Community shall not become final before the holder has been allowed the opportunity of renouncing the international registration in respect of the Community or of submitting observations.
3. The conditions for the examination as to the grounds for refusal shall be laid down in the Implementing Regulation.

Article 106f

Invalidation of the effects of an international registration

1. The effects of an international registration in the Community may be declared invalid partly or in whole in accordance with the procedure in Titles VI and VII or by a Community design court on the basis of a counterclaim in infringement proceedings.
2. If the Office is aware of the invalidation, it shall notify it to the International Bureau."

Article 2

Article 134(3) of Regulation (EC) No 40/94 is replaced by the following:

"3. Revenue shall comprise, without prejudice to other types of income, total fees payable under the fees regulations, total fees payable under the Madrid Protocol referred to in Article 140 of this Regulation for an international registration designating the European Communities and other payments made to Contracting Parties to the Madrid Protocol, total fees payable under the Geneva Act referred to in Article 106c of Regulation (EC) No 2002/6 for an international registration designating the European Community and other payments made to Contracting Parties to the Geneva Act, and, to the extent necessary, a subsidy entered against a specific heading of the general budget of the European Communities, Commission section".

Article 3

This Regulation shall enter into force on the date on which the Geneva Act enters into force with respect to the European Community.

The date of entry into force of this Regulation shall be published in the Official Journal of the European Union .

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Council

The President

4. LEGAL BASIS

Articles 308 EC

5. DESCRIPTION AND GROUNDS

5.1. Need for Community intervention

5.1.1. Objectives pursued

The proposal contains the measures which are necessary to give effect to the accession of the European Community to the Geneva Act. The appropriate measures should mainly be incorporated in Regulation (EC) No 6/2002 through the inclusion of a new title on "International registration of designs". The accession of the Community to the Geneva Act will create a new source of revenues for the Office for the Harmonization in the Internal Market (Trade Marks and Designs) - OHIM, and Regulation (EC) No 40/94 should therefore be amended accordingly.

5.1.2. Measures taken in connection with ex ante evaluation

The European Community already showed its great interest in the Hague System when it decided to take an active part in the international negotiations which led to the Diplomatic Conference held in Geneva in 1999, when the new act was adopted. Organizations representing the potential users of both the Community design system and the international registration system repeatedly expressed their strong interest in establishing a link between the two systems. In 2004 the Commission launched a consultation with interested parties (Member States, business and professional organisations, and private companies) on the possible impact on business of the accession of the EC to the Hague System. An overwhelming majority of the responses, bordering on unanimity, supported the idea that the Community should accede in the near future to the Geneva Act.

5.1.3. Measures taken following ex post evaluation

Not applicable

5.2. Action envisaged and budget intervention arrangements

The rules and procedures relating to international registrations designating the Community should, in principle, be the same as the rules and procedures which apply to Community designs applications. According to this principle, an international registration designating the Community should be subject to the examination as to the grounds for non-registrability before it takes the same effect as a registered Community design. Likewise, an international registration having the same effect as a registered Community design should be subject to the same rules on invalidation as a registered Community design. No financial assistance is involved.

5.3. Methods of implementation

OHIM will need to adapt its internal procedures and working methods in order to deal with the international applications at the International Bureau of WIPO in which the European Community is designated in order to obtain protection under the Community design

system. The Commission will need to negotiate in the Hague Union Assembly on behalf of the Community following coordination in the relevant Council working party or at on-the-spot meetings convened in the course of the work within the framework of WIPO.

6. FINANCIAL IMPACT

6.1. Total financial impact on Part B - (over the entire programming period)

Not applicable

6.2. Calculation of costs by measure envisaged in Part B (over the entire programming period)

Not applicable

7. IMPACT ON STAFF AND ADMINISTRATIVE EXPENDITURE

7.1. Impact on human resources

Types of post | Staff to be assigned to management of the action using existing and/or additional resources | Total | Description of tasks deriving from the action |

Number of permanent posts | Number of temporary posts |

Officials or temporary staff | A B C | 0,5 A | 0 | 0,5 A | If necessary, a fuller description of the tasks may be annexed. Coordination with OHIM. Preparing for and attending meetings of Council and Parliament to negotiate the proposal through the adoption. Preparing for and participating in meetings of the Hague Union and coordinate positions with the Member States. |

Other human resources | 0 | 0 | 0 |

Total | 0,5 | 0 | 0,5 |

7.2. Overall financial impact of human resources

Type of human resources | Amount (€) | Method of calculation * |

Officials Temporary staff | 54.000 | Annual costs per official: 108.00 € |

Other human resources (specify budget line) |

Total | 54.000 |

The amounts are total expenditure for twelve months.

7.3. Other administrative expenditure deriving from the action

Not applicable

The amounts are total expenditure for twelve months.

1 Specify the type of committee and the group to which it belongs.

I. Annual total (7.2 + 7.3) II. Duration of action III. Total cost of action (I x II) | €54.000 2006-2011 €324.000 |

8. FOLLOW-UP AND EVALUATION

8.1. Follow-up arrangements

Not applicable

8.2. Arrangements and schedule for the planned evaluation

On-going evaluation will be possible through monitoring the volume of international registrations in which the Community design system is designated.

9. ANTI-FRAUD MEASURES

No financial assistance is involved.

1. Background

1.1 Registration of designs

A design is the outward appearance of a product or part of it which results from the lines, contours, colour, shape, texture, materials and its ornamentation. The design or shape of a product can be synonymous with the branding and imaging of a company and is an asset with a monetary value. Protection for designs therefore encourages innovation and development of new products and investments in the production process.

Exclusive design rights enable a company to use the design in commerce, to take legal action against infringers and to claim damages. In the EU, designers wishing to exploit their design right have several options in terms of the territorial scope of protection.

First, designers can choose to apply for the registration of a national design, which would give them protection in the territory of the country concerned. However, identical designs may still be protected differently in the Member States, despite the fact that Directive 98/71/EC¹ contributes to remedying this situation by harmonising national design laws.

Second, designers can decide to make use of the system under Council Regulation (EC) No 6/2002² and apply for the registration of a Community design. The Community design provides for the acquisition of protection for designs with unitary effect for the whole territory of the European Community. The Office for the Harmonization in the Internal Market (OHIM) is responsible for administering the registration of Community designs.

A third option would be to lodge an application with the International Bureau of the World Intellectual Property Organization (WIPO) under the Hague System for the International Registration of Industrial Designs. Such application allows the obtaining of design protection in a selected number of countries through a single “international” deposit. Thus, under the Hague arrangement, a single international application filed with the International Bureau replaces a whole series of applications which, otherwise, should have been effected with different national (or regional) Offices.

1.2 The international registration system and its relationship with the Community design system

The present impact assessment covers options related to the establishment of a “link” between the international and the Community registration systems.

The Hague System is based on the Hague Agreement Concerning the International Registration of Industrial Designs. This Agreement is constituted by three different Acts: the London Act of 1934, the Hague Act of 1960 and the Geneva Act of 1999. The three Acts are autonomous and coexist with respect to their substantive provisions. Contracting parties may decide to become party to only one, to two or to all three of the Acts. They automatically

¹ Directive 98/71/EC of the European Parliament and of the Council of 13 October 1998 on the legal protection of designs, OJ L 289, 28.10.1998, p. 28.

² Council Regulation (EC) No 6/2002 of 12 December 2001 on Community designs, OJ L 3, 5.1.2002, p. 3.

become member of the Hague Union which at present has 42 Contracting States, amongst which 12 EU Member States.³

The system of international registration of designs arose from a need for simplicity and economy. In effect, it enables design owners originating from a Contracting State to obtain protection of their designs with a minimum of formality and expense.

The international applications can be filed in one language (English or French), upon payment of a single set of fees. The applicant has to designate the Contracting States in which protection is sought. An international application is normally sent directly to the International Bureau. Upon receipt, the International Bureau checks that the international application complies with the prescribed formal requirements and then publishes the application – or better, the registration - in the *International Designs Bulletin* (on WIPO's internet website). Following publication, each national Office must identify the international registrations in which they have been designated, in order to proceed with the substantive examination, if any, provided for by its own legislation.

Any substantive aspect of the protection (including in particular the substantive examination carried out by each Office, the assessment of the conditions of protection and the scope of that protection) is thus entirely a matter of the legislation of each designated Contracting Party.

As a result of that examination, the Office may notify to the International Bureau a refusal of protection for its territory. However, an international registration may not be refused on grounds of non-compliance with formal requirements. Such requirements must be considered as already satisfied, following the examination carried out by the International Bureau.

Once the international registration has been accepted, it produces the same effect in each of the countries designated as if the design had been deposited there directly. The international registration is therefore equivalent to a national right in terms of its scope of protection and enforcement. At the same time, the international registration facilitates the maintenance of protection: there is a single deposit to renew and one simple procedure for recording any changes (e.g. in ownership or address).

The adoption of the Geneva Act in 1999 had a twofold objective, namely:

- to make the Hague System more attractive for applicants and to extend the system to new members; to that end, the 1999 Act has introduced a number of features into the Hague system with a view to facilitating the accession to the Hague Union of countries which administer design examination systems (such as USA and Japan);
- to provide for the establishment of a *link* between the international registration system and regional systems by providing that intergovernmental organizations may become a party to the Act.

The second objective opens the door for the accession of the Community to the Hague System. The territory of the EU would then be regarded as a single country for the purposes

³ Belgium, Estonia, France, Germany, Greece, Hungary, Italy, Latvia, Luxembourg, Netherlands, Slovenia, Spain. Five Member States – out of 18 countries in total - have become party to the Geneva Act (Estonia, Hungary, Latvia, Slovenia and Spain). Updates will be published on the WIPO website: www.wipo.int.

of the Geneva Act, with the Community design rules as the relevant domestic legislation. The OHIM would become the Office responsible for the substantive examination of international applications in which the Community has been designated.

The European Community already showed its great interest in the Hague System when it decided to take an active part in the international negotiations which led to the Diplomatic Conference held in Geneva in 1999, when the new act was adopted. In this context, it should be noted that, during the seven Committees of experts which took place for the adoption of a new Act of the Hague Agreement, as well as during the Diplomatic Conference having adopted the 1999 Act and during the 2003 process for adoption of the common regulations, organizations representing the potential users of both the Community designs system and the international registration system repeatedly expressed their strong interest in establishing a link between the two systems.

The Community design system and the international registration system as established by the Hague Agreement can be considered as being complementary. The Community design system provides for a complete and unified regional designs registration system which covers the whole territory of the European Union. The Hague Agreement constitutes a treaty centralizing the procedures for obtaining protection of designs in the territory of the designated Contracting Parties.

2. Problem identification

Unlike the Community design system, which does not impose conditions related to the origin of the applicant, the Hague Agreement contains an important restriction based on nationality or residence. The right to file for an international registration is reserved for nationals and residents of a state that is party to the Hague Agreement. Companies can only apply for international registration if they are established in a Contracting State.⁴

The fact that only nationals of contracting states can apply for international registration creates a distortion of competition in the internal market. The nationals, residents and companies of the 12 EU Member States that have become party to the Hague Agreement can apply for a single application and receive protection under the design laws of, potentially, all the other Contracting Parties including the other 11 EU Member States which have adhered to the Hague system. Designers from the 13 EU Member States that have not adhered to the Hague system do not have that option and cannot benefit from the system of international registration.

This distortion would become much less if a “link” between the Community design system and the Hague Agreement was established.

Participation of the Community in the Geneva Act would create the opportunity for all EU citizens and companies to opt for the international system. The differentiation between designers from EU Contracting States and EU non-Contracting States would be eliminated.

⁴ According to Article 3 of the Geneva Act, “any person that is a national of a state that is a Contracting Party or of a State member of an international organization that is a Contracting Party, or that has a domicile, a habitual residence of a real and effective or commercial establishment in the territory of a Contracting Party, shall be entitled to file an international application”.

In addition, it would enable industry in the European Union to obtain through one single international application protection for their designs in the EU under the Community design system and in the territories of Contracting Parties to the 1999 Geneva Act in- and outside the European Union. At present, even design owners from countries that have adhered to the Hague Agreement need to make two applications: one for the international registration and one for the Community design registration. The advantage of the “link” is that designers could apply for international protection of their designs, including protection under the Community design mechanism, through the filing of one international application under the Hague Agreement.

3. Objective of the proposals

The main objective is therefore to promote a harmonious development of economic activities and to eliminate distortions of competition by creating equal opportunities for the designers throughout the EU, providing them all with access to the benefits of the international registration of designs. Essential to achieve the objective is the creation of a “link” between the Community design system and the WIPO system on international registrations of designs. Besides, the link between the Community design system and the Geneva Act would mean that designers in the EU and innovators in other contracting parties may make use of the Geneva Act to obtain Community designs at the same time as obtaining design protection in individual States.

4. Policy options

The first option is that the EC adheres to the Geneva Act. The EC would then also become a member of the Hague Union. Within this option, a further reflection could be made on the timing of the accession: now or in the future.

The second option is not to adhere to the Geneva Act and to continue without a link between the EC system and the Hague arrangement. Applicants from the EU and from other Contracting Parties would not benefit from both the advantages of the international registration and of the uniform protection of the Community Design system in one single application.

A third option is that the EC should encourage or oblige all Member States to become a party to the Hague System. This route would have as an advantage that the national design systems of the Member States become subject to international registrations. While this would to a certain extent contribute to the described objective of creating a level playing field, it would not make optimal use of the EC system. There would still be no link between the (increasingly important) Community design system and the Hague system, which is one of the main aims of the Geneva Act. This option will therefore not be considered further.

An accession of the EC to the Geneva Act would in any case be in line with the principles of subsidiarity and proportionality. In terms of subsidiarity, the objective of the proposed action cannot be efficiently achieved by the Member States by reason of the effect of the link between the Community Design system and the international registration system, which can only be achieved at Community level. In terms of proportionality, the proposals do not go beyond what is necessary to achieve the objectives.

5. Assessment

5.1 The expected benefits of EC accession to the Geneva Act

In January 2004, the European Commission launched a consultation with interested parties on the possible impact on business of the accession of the EC to the Hague system. A questionnaire was prepared focusing on the impact of the introduction of a link between the Community design and the international registration system, the effects in terms of reduction of costs, the incentive to encourage the marketing of EU products in foreign countries, a quantitative estimate of the potential use of the system and any possible concerns as to the fact that foreign countries could use the system to designate the EU.

A total of 53 responses to the questionnaire were received from (16) Member States, business and professional organisations, and private companies. The questionnaire and an exhaustive analysis of the results of the consultation are attached to this document as annexes.

On the basis of the analysis, the principle arguments in favour of the accession can be summarized as follows:

- the international registration of designs would result in simplified registration procedures and IP portfolio management;
- there will be a saving of costs: the applicant does not need to provide translations of the documents nor to keep watch on the different deadlines for renewal of a great number of national applications, which differ from one State to another; he will avoid paying a series of national fees and fees to agents in different countries;⁵
- simplified procedures would facilitate access to protection in third countries, which would encourage EC companies to trade with these countries in the knowledge that their designs are protected;
- the accession of the European Community would offer the same opportunities to all EU citizens irrespective of whether they are nationals of a Member State that is or is not a contracting party to the Hague Agreement;
- all this would have a positive impact on research, development and innovation activities;
- the accession of the European Community would encourage other important commercial partners to adhere, such as USA, Japan, Korea and China.

The establishment of the link between the two systems is therefore bound to contribute to the development of conditions favourable to trade between the European Community and the third countries concerned.

⁵ According to a study carried out for the OHIM in 2002, the complexity of the bureaucratic process of registration in several countries is considered to be the largest barrier to design registration for companies. See “Prospective study about the design registration demand at a European Union level – Executive summary”, May 2002, p. 24 (study available at <http://oami.eu.int/en/design/pdf/3830000.pdf>).

5.2 The potential disadvantages of EC accession to the Geneva Act

It is difficult to conceive that the accession of the EC to the Geneva Act would have serious negative effects on the designers or other stakeholders, whether they are established within or outside the European Union. The great majority of the respondents to the questionnaire prepared by the European Commission is of the opinion that the accession would not have any negative effect. Nonetheless, some respondents observed *potential* disadvantages, even though they appear to be unfounded. Three of these potential disadvantages need further reflection.

First, it was stressed that less competitive companies would suffer from the opportunity that foreign companies will have of designating the EU through the Hague system.

This observation is not convincing. The aim of the accession should be to facilitate access to new markets, increasing the competitiveness of EU companies. Their competitiveness cannot be sacrificed in favour of the protection of non competitive companies. Besides those companies are already exposed to the competition of foreign companies, which can already register Community designs.

A second remark made in the consultation concerns the limited membership to the Geneva Act. It was stated that not many countries have acceded to the Geneva Act.

This may be true at present - even though there are already 18 Contracting Parties. However, the Geneva Act only became operational on 1 April 2004 and several countries are considering or preparing accession. In addition, the accession of the EC is likely to encourage other countries to accede to the system. In any event, the most interesting feature of the Geneva Act is its unlimited scope of membership which will potentially extend worldwide, including the most important trading partners of the EU, such as United States of America, Japan and others.

A third assumed negative impact would be that the fee which third countries companies will have to pay to designate the EC will be very competitive; this may encourage them to massively designate the EC - to the detriment of the position of EC companies.

Such an argument is difficult to understand. The Geneva Act gives the Contracting Parties the possibility to provide that an individual designation fee has to be paid when designating it. The fee must be proportionate to the amount which the Office of that Contracting Party would be entitled to receive from an applicant for a national grant. Therefore, the accession of the EC to the Geneva Act cannot as such harm EC companies as far as the level of fees is concerned. In general, it can be said that the attractiveness of the EC system works both for foreign and EC companies in an identical way.

5.3 The timing of possible EC accession to the Geneva Act

Since the adoption of the Geneva Act, the accession of the European Community has become more and more advantageous.

The system became fully operational on 1 April 2004. On that date, both the Geneva Act and the modernised Common Regulations under the Hague Agreement, which simplify the entire proceedings, came into force.

The system is also becoming more attractive for applicants because an increasing number of countries are preparing accession to the Geneva Act, therefore extending the geographical coverage. Accession of the United States may take place in the second half of 2005. As the United States were not party to any of the previous Acts, their accession to the Geneva Act amounts to a substantial extension of the scope of protection of international registrations. Other important trading partners such as Japan are also considering accession in the future. Accession of the EC in the near future would stimulate them to prepare accession as well.

From the side of the Community design system, the creation of the link is also timely. The OHIM has been receiving applications for registered Community designs since 1 January 2003 with the first date of filing being granted on 1 April 2003. Since then, it has obtained good experience in dealing with the examination of applications and registration of Community designs and the system is perceived to be a success. The OHIM is therefore well prepared for the establishment of a link between the international registration system and the Community system.

The EC accession to the Geneva Act should be considered in the near future. Both the Community design system and the international registration system have shown their value for designers. Postponing the establishment of a link between the Community design and the international registration system would only imply an unnecessary delay in achieving the objective of creating a level playing field and reducing costs for supranational operating designers.

Finally, the recent accession of the European Community to a similar WIPO system in the field of trade marks, the Protocol to the Madrid Agreement for the international registration of trade marks,⁶ constitutes an important precedent that should pave the way to accession to a system that is much simpler than the Protocol.

In short, there are good reasons for the EC to accede to the Geneva Act now. Both the OHIM system at EC level and the Geneva Act system at WIPO level function well; benefits for industry could be achieved earlier; the existing distortions of competition would be eliminated earlier and EC accession would encourage other trading partners to adhere in the short term.

5.4 Financial implications

The financial impact of the EC accession to the Geneva Act can be measured from the point of view of the applicants and in the context of OHIM.

The issue of cost savings for the applicant has already been addressed. There is no need to provide for translations of the documents, renewals can take place through a single deposit; the applicant will avoid paying a series of national fees in different currencies and fees to several agents in different countries.

The applicant will also not be faced with an increase of fees in comparison with fees payable for a Community design. The Geneva Act provides that, for international registrations, this amount may not exceed the amount equivalent to what the office concerned would be entitled

⁶ See Council Regulation (EC) No 422/2004 of 19 February 2004 amending Regulation (EC) No 40/94 on the Community trade mark, OJ L 70, 9.3.2004, p. 1.

to receive from the applicant in the case of an application, or a renewal, requested directly with that Office, that amount being reduced by the savings resulting from the international procedure.

Another principle under the Geneva Act is that the payment of a fee is remitted in full to the Office of the designated Contracting Party concerned. If the Community should decide to replace the prescribed designation fees by individual designation fees (see below), the economic consequences for OHIM are therefore neutral. The Office will, in principle, receive the same amount as the fees under the registration of the Community design, this amount being corrected by the savings as a result of the international procedure.

5.5 Operational choices

The Geneva Act allows for a number of declarations to be made by a Contracting Party wherein the Director General of the International Bureau is notified of certain conditions to be applied to an international registration designating the Contracting Party. In this context, the impact of the most relevant declarations that the European Community could make must be assessed.

First, the Geneva Act enables Contracting Parties to decide whether an application for an international registration may be filed, at the option of the applicant, either directly with the International Bureau or indirectly through OHIM.

The European Community should exclude the filing of an application through the Office in order to avoid confusion by applicants between applications for registering Community designs and applications for international registrations. Furthermore, the Hague System draws most of its advantages from its simplicity. Presently, even from those Contracting Parties who would permit such a procedure, WIPO hardly receives applications filed through national offices as users see no need to add a stage between themselves and the registration. Such a stage only increases the risk of loss of files. Moreover, the clarity of the system would be diluted if filing through OHIM was allowed. Those who wish to file for a registered Community design can do this directly at OHIM or through national offices, whereas if the international route is sought it should begin in Geneva.

Second, the European Community should decide whether in connection with any application for an international registration in which it is designated, and in connection with the renewal of any international registration resulting from such an application, the prescribed designation fees could be replaced by individual designation fees to be transferred to the Office.

In terms of income, the choice between the standard designation fee and the individual designation fee will have budgetary consequences for the Office. The Community should therefore take advantage of this option and determine its own individual designation fees. Such determination will have to be made on the basis of a number of elements. Fees will have to be sufficient to cover the costs incurred by the procedures relating to designs the protection of which is requested in the EU. This means not only the costs relating to examination of such designs in OHIM but also other procedures like invalidities and appeals. To undertake such a cost analysis, the impact of the major conditions of the accession to the Hague Agreement will have to be examined. The Commission also needs to have a better idea as to the possible number of invalidities and appeals international designations could generate and thus the level of work involved for the OHIM.

5.6 The impact of accession to the Geneva Act on the number of design registrations

It is difficult to predict the possible success of the Geneva Act and its linkage to the Community design system. As stated before, both systems have become operational in relatively recent times. The first filings for the registered Community design became possible on 1 April 2003. The Geneva Act came into force on 23 December 2003 and has been operational since 1 April 2004 with still a rather limited number of Contracting Parties.

However, it is fair to expect that an increasing number of applicants will make use of the international registration system.

First, the success of the Community design shows that applicants highly appreciate the possibility of securing protection for a number of countries by a single filing. Statistics show that since 1 April 2003 the OHIM registered and published in total 130.368 designs: 40,622 in 2003, 57,762 in 2004 and 52,709 in 2005 (until 30 September).⁷ These very promising results are much better than predicted. In a study carried out for the OHIM in 2002 it was estimated that applications for a total of between 13,275 and 17,169 Community designs would be deposited in 2003.⁸

Second, as was pointed out by some respondents in the survey organized by the Commission in 2004, the present statistics on the applications for a Community design could be used as a basis for predictions of the number of international registrations. According to the estimates provided by one national federation of industry, international registrations in which the EC would be designated could be 50-60% of present Community design applications for large companies. SME's would count for up to 10% of the present Community design applications. On the basis of 2004 statistics, this calculation would mean that in international registrations large companies would designate the EC for about 25,000 designs and the SME's for up to 4,887 designs. However, it should be noticed that these predictions will depend on the amount of fees that finally will be fixed for international registrations designating the EC.

Third, the statistics published by WIPO on the operation of the Hague Agreement show that, overall, between 1985 and 2001 there has been a steady increase of registered deposits, with a total number of almost 2 million designs contained in the registered deposits in 2004.⁹ The number of designs contained in the registered deposits dropped considerably between 2002 and 2004.¹⁰ A clear reason for this is that EC companies, together with Swiss companies the most important users of the Hague System, designate in particular EU Member States. In recent years, these applicants have switched to the Community design system. The EC accession to the Geneva Act would no doubt increase volumes again since both systems can be applied for in a single international application.

Fourth, the accession to the Geneva Act of important commercial partners such as USA and Japan, together with the simplification of the registration procedure, will undoubtedly also increase the total number of design applications.

⁷ See <http://oami.eu.int/en/office/stats.htm>.

⁸ See study carried out for the OHIM, referred to in footnote 5, p. 33.

⁹ See <http://www.wipo.int/hague/en/stat/>.

¹⁰ From 20,705 designs in 2002 the number decreased to 13,152 designs in 2003 and 8,943 designs in 2004.

5.7 The economic sectors concerned

The top ten classes of goods most designated under the Community design system are furnishing (12,6% of applications), packages and containers for the transport or handling of goods (8,4%), clothing (7,3%), sanitary etc. (6,2%), household goods (5,6%), lighting apparatus (5,4%), recording, communication or information retrieval equipment (5,3%), building units and constructing elements (4,7%), adornment (4,5%) and tools and hardware (4,5%).¹¹

A look at the major user countries shows that for the Community design, the major users are Germany (24,6%), Italy (14,8%), the USA (8,9), the UK (8,3%), France (7,7%), Spain (6,4%), Japan (4,0%), the Netherlands (4%), Denmark (2,6%) and Switzerland (2,5%).¹²

The top 20 users of the Community design system until July 2005 are Colgate-Palmolive (US), Nike (US), Villeroy & Boch (Germany), Arte Espina (Netherlands), DaimlerChrysler (Germany), Sony (Japan), Mattel (US), Rehau (Germany), Schwinn (Germany), Interior's (France), Choo (UK), Nokia (Finland), Mars (US), Westfälische Textil-Gesellschaft (Germany), Eglo Leuchten (Austria), Massive (Belgium), Casio (Japan), Ecco (Denmark), Procter & Gamble (US) and Henkel (Germany).

For the Hague System, in 2004 the ten most designated classes of goods were clocks and watches (22,6%), adornment (12,5%), travel goods etc. (12,1%), means of transport or hoisting (10,6%), clothing (6,1%), recording, communication or information retrieval equipment (5,8%), furnishing (5,2%), tools and hardware (4,8%), lighting apparatus (4,1%) and games etc. (4,0%). The major user countries of the Hague System in the period 2003-2004 are European: Germany, Switzerland, the Benelux countries, Italy and Spain, in that order. The same holds true for the most designated States: in 2004 these were Switzerland, Italy, Germany, France, Benelux and Spain, in that order.

The top twenty users of the Hague System in 2003 were: Swatch (Switzerland), Interior's (France), DaimlerChrysler (Germany), Hermès (France), Unilever (Netherlands), Nokia (Finland), Hans Grohe (Germany), Salomon (France), Volkswagen (Germany), Philips Electronics (Netherlands), Villeroy and Boch (Germany), Rehau (Germany) Henkel (Germany), Stekelenburg (Netherlands), Braun (Germany), Sanford (Germany), Fonkel (Netherlands), Tefal (France), Robert Bosch (Germany) and Siemens (Germany).¹³

The overview demonstrates that an improvement of the system by creating the link between the Community design system and the Hague arrangement would benefit a wide range of industrial sectors. In particular, it can be foreseen that the sectors of textile and furniture, cars, jewellery, sanitary and mobile phones will be amongst the most beneficial sectors of industry. The survey also shows that both large companies and SMEs will benefit from accession, a conclusion that has been confirmed in the consultation carried out by the Commission. Furthermore, the advantages will not only be felt by Community industries but also by industries of third countries.

¹¹ Cumulative statistics until 31 March 2005. The classification of goods takes place on the basis of the Locarno classification system.

¹² Cumulative statistics until 31 March 2005.

¹³ See http://www.wipo.int/edocs/prdocs/en/2004/wipo_pr_2004_376.html.

6. Conclusion

The assessment of the options leads to the conclusion that in order to best achieve the outlined objectives, the EC should adhere to the Geneva Act.

The establishment of a link between the Community design system and the international registration system of the Hague Union would promote a harmonious development of economic activities, will eliminate distortions of competition, will be cost efficient and will increase the level of integration within the internal market. The accession of the EC to the Geneva Act will therefore make the Community design system more attractive. Similar advantages cannot be achieved without accession.

The result of the consultation carried out by the Commission could hardly be more self-evident. An overwhelming majority of the responses, bordering on unanimity, supports the idea that the EC should accede in the near future to the Hague Agreement.

ANNEXES

- 1. Analyses of the results of the Commission's consultation on the impact of the accession of the European Community to the Hague Agreement on International Designs (Summer 2004)**
- 2. Questionnaire on the impact of the accession of the European Community to the Hague Agreement on International Designs (January 2004)**

Annex 1

Analyses of the results of the Commission's consultation on the impact of the accession of the European Community to the Hague Agreement on International Designs (Summer 2004)

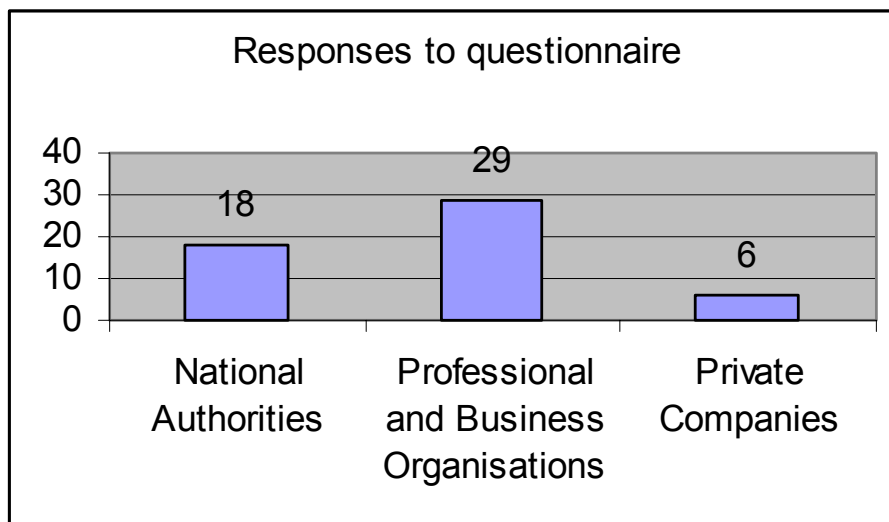

1. Introduction

On 30 January 2004 the European Commission (DG MARKET) launched a consultation, by means of a questionnaire sent to interested parties, on the possible impact on business of the accession of the European Community to the Hague system. The questionnaire focused on the impact of the introduction of a link between the Community design and the international registration system, the effects in terms of reduction of costs, the incentive to foster the marketing of EU products in foreign countries, a quantitative estimate of the potential use of the system and any possible concerns as to the fact that foreign countries could use the system to designate the EU.

All Member States (including the 10 new Member States) as well as some 90 business and professional organisations from Members States, Candidate Countries and two non-EC Countries (USA and Switzerland) were directly invited to submit their comments and opinions by the end of April. At the same time, the questionnaire was put on the Commission's website, inviting all interested parties to submit their views by the same deadline.

2. Response sources

A total of 53 replies to the questionnaire were received. They may be divided into three different groups: responses coming from national official authorities (including the Office for Harmonization in the Internal Market); responses from business and professional organisations; and replies from private companies.

Responses from national official authorities

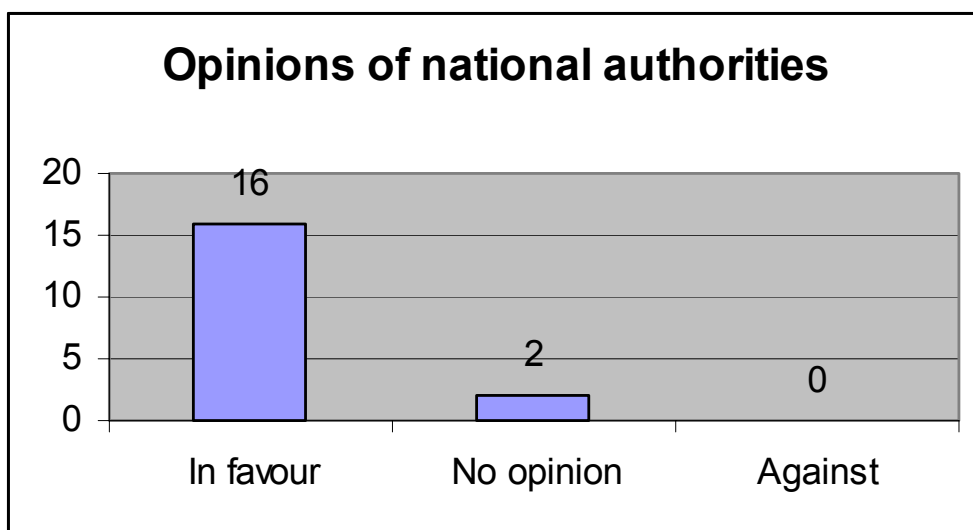

The following 16 Member States submitted their responses to the questionnaire, either *via* their Patent and Trademark Office or *via* their Ministry of Industry: Belgium, Cyprus, Czech Republic, Denmark, Germany, Hungary, Ireland, Italy, Luxembourg, the Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, and Sweden.

Furthermore, responses were received also from the Swiss Intellectual Property Office and from the Office for the Harmonization in the Internal Market.

It is important to point out that, at the moment when the survey was launched, only 10 out of the 25 Member States are contracting parties to the Hague Agreement. Seven out of those adherents sent their responses.

The very fact that 16 Member States answered the questionnaire on a subject in which only a part of them has experience shows a great interest in the accession of the European Community to the Hague Agreement.

Furthermore, 14 Member States support the accession of the EC to the Geneva Act. Two of them (Hungary and Sweden) consider it premature to give an opinion on this, although they stress that any mechanisms that facilitate access to protection in third countries could be seen as positive for EU design creators and rights holders. Also the Swiss Intellectual Property Office and the OHIM are in favour of the accession of the EC. Not a single Member State has shown its opposition to the accession.

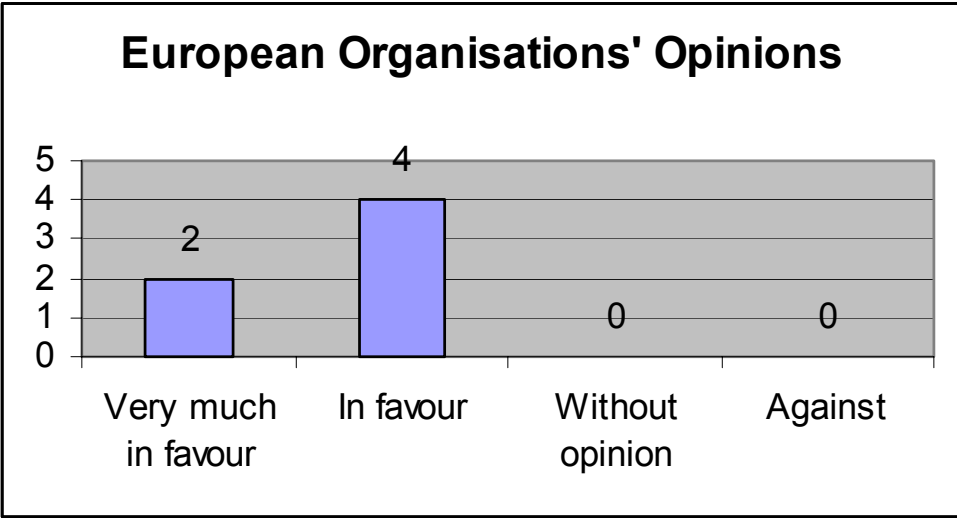

Responses from professional and business organisations

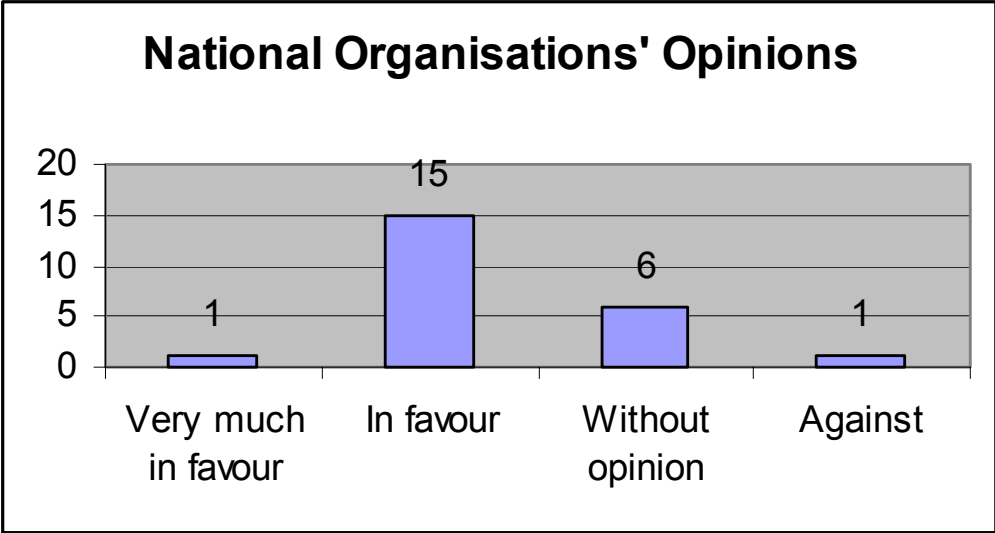

A total of 29 business and professional organisations answered, six of them representing industry and agents at a European-wide level (Association des Industries des Marques - AIM, The Bureau of European Designers Association - BEDA, European Community Trademark Association - ECTA, Fédération Européenne des Mandataires de l'Industrie en propriété Industrielle – FEMIPPI, The Association of European Trade Mark Owners – MARQUES, Union of and Employers' Confederations in Europe – UNICE).

The 23 nationally-based organisations (including the International Association for the Protection of Intellectual Property – AIPPI, the Association des Praticiens du Droit des Marques et des Modèles – APRAM, the Chartered Institute of Patent Agents – CIPA, the

Bundesverband der Deutschen Industrie – BDI, the Licensing Executives Society – LES, the Patentanwaltskammer, the Association of Swedish Patent Attorneys) represent 11 EU Member States (Belgium, Estonia, France, Germany, Greece, Italy, Latvia, Poland, Spain, Sweden and United Kingdom), plus Romania and Switzerland. The totality of the European organisations declared their support for the accession, two of them having also stressed to be very much in favour.

As to the nationally based organisations, 16 of them expressed their support for the accession, while 6 declared not to be able to take a definitive position. One negative answer came from the German Association of the Automotive Industry. However, two of the major German car producers (Daimler Chrysler and Volkswagen) have responded directly to the questionnaire giving their support to the accession.

Finally, only six answers were received from private companies. Such a low score should not be interpreted as a lack of interest by European companies involved in the design business. Instead, it could be explained by the fact that, in general, industries and agents have already expressed their views through the above mentioned business and professional organizations and therefore they have considered it redundant to file separate individual answers to the questionnaire. As a matter of fact, among the six answers received, three come from industries

and three from design agents. As to their geographical distribution, two are German, one is English, one Italian, one Danish and one Czech. All of them endorse the accession.

3 Response contents

The analyses of the answers to the questionnaire has shown that there is basically no difference in the arguments put forward in their responses by national authorities, business and professional organisations, and private companies. This allows to treat them all together, stressing possible differences whenever this appears to be necessary.

3.1. The nationals of which countries would benefit the most?

From a general point of view, it has been stressed that the accession would benefit companies from EU Member States which are currently contracting parties to the Geneva Act of the Hague Agreement as well as companies from Member States which are not contracting parties.

In fact, on the one hand, the EU accession will allow nationals of all Member States, including those that are not contracting parties to the Geneva Act¹⁴, to file an international deposit through the Hague system. On the other hand, the accession would also benefit the nationals of (the few) Members States that are already party to the Geneva Act. In this case, procedures will be simplified as it will be possible to seek the registration of a Community design and of other national designs by means of only one application at WIPO.

3.2. Which type of companies would benefit the most?

It appears from the answers received that both large companies and SMEs would benefit from the accession.

On the one hand, it is obvious that the companies that have the greater interest in the accession are those that operate world-wide and wish to protect their designs not only in the EU or individual EU Member States but also in non member countries.

On the other hand, the accession would entail simplified registration procedures and savings in the administration of design portfolios, which would greatly benefit SMEs with limited resources to handle registration proceedings in a variety of countries.

3.3. What would be the impact on EU design industry?

The stakeholders argue that the accession would have a positive impact on the EU design industry, mainly for the following reasons:

- The registration procedure would be simplified as one single application would be sufficient in order to seek protection in several (potentially unlimited) States, there would be no need to

¹⁴ It should be remembered that an international application can only designate countries which are bound by the same act as the applicant's State of origin. As the major commercial partners/competitors of the EU in the design field, as USA, Japan and Korea, are not likely to adhere to any other act than the Geneva Act, nationals of EU Member States which are not party to the Geneva Act will not be allowed to designate these countries (once they will have acceded), unless the European Community accedes to the Geneva Act.

appoint a representative in each of the designated States, no translation of the application (filed either in French or in English) would be required and only one set of fees would be paid in one currency (Swiss francs);

The above described simplification of the procedure would amount to a saving of costs;

The reduction of costs and simplification of procedure would encourage designers to seek protection outside the EU;

Competitiveness as well as research, development and innovation activities would be boosted as a consequence of a wider protection and of the potential to devote to those activities the money saved thanks to the simplified registration procedures.

However, all interested parties have stressed the fact that the current scope of the Geneva Act is limited to countries which are either EU Members (and can then already be covered filing directly at OHIM an application for a Community registered design) or countries of minor importance for the commercial penetration of EU companies (with the relevant exception of Switzerland).

In particular, the fact that the USA, Japan, China and Korea are not contracting parties to the Geneva Act does sap the majority of the interest in EU accession, which would represent only a limited added value to the current situation. Therefore, the impact on competitiveness would be of a lesser degree, until those countries enter the international registration system.

Nonetheless, it has been unanimously underlined that the accession of the EC would represent a major political step, which would urge also our commercial partners to accede to the Geneva Act. It was stressed that the same happened with respect to the Madrid Protocol for the international registration of trade marks.

Furthermore, the United States have already announced that it has started the internal steps necessary to launch the accession process.

3.4. What would be the main advantages and disadvantages?

Among the main advantages the foremost is the simplicity of the system, which would contribute to make easier to seek protection in third countries.

The great majority of the stakeholders believe that the accession would not have any negative effect on the European designers. Regarding the European Union's competitiveness at world level reference has been made to a statement of the Council of the European Union in the preamble of the Regulation on Community designs: "Enhanced protection for design not only promotes the contribution of individual designers to the sum of Community excellence in the field, but also encourages innovation and development of new products and investment in their production".

Moreover, it has been observed that the accession to the Geneva Act would not give rise to the problems that have characterized the accession to the Madrid Protocol.

More specifically, the problems of the linguistic regime and of the opting back clause that had blocked for many years the negotiations on EU accession to the Madrid Protocol will not exist in the case of the Geneva Act.

As regards the opting back, this problem cannot be raised in the present context for two reasons. Firstly, the Geneva Act, unlike the Madrid Protocol, does not allow subsequent designations. Secondly, in the Community design system, unlike the Community trademark system, no conversion into national designs is possible.

With regard to the language regime, it is important to remember the specific characteristic of the design system that the indication of the products to which the design is intended to be applied as well as the classification of the products do not affect the scope of protection of the design as such. This peculiarity, focusing on the sole reproduction of the design, unlike in the trademark system, removes any interest in the verbal elements of the design application. Furthermore, in the Madrid Protocol framework the linguistic problems stem from the fact that the international applications designating the EC are re-published in the Community trademarks Bulletin, while such a re-publication is not at all necessary in the Hague system, according to which the publication in the WIPO Gazette is a sufficient means of publicity. Contracting parties could re-publish international application if they wished to do so but, in practice, no country does this.

Nonetheless, in a very limited number of responses the possibility of some disadvantages exist has been evoked, namely:

- (a) applicants from countries where a novelty examination is carried out would take greater benefit than EU applicants, unless such countries come into line with the EU system (where there is no novelty assessment at the filing and registration stage);
- (b) less competitive companies will suffer from the possibility that third countries companies will have of designating the EU through the Hague system;
- (c) there is a limited membership to the Geneva Act;
- (d) the fee that third countries companies will have to pay to designate the EC will be so cheap as to encourage them to designate massively the EU;
- (e) the Hague system does not limit the number of views that can be filed for the same design, while the EC system foresees a limit of 7 views;
- (f) the Hague system does not allow assignments to a non-Hague national, limiting the commercial freedom and asset value.

The Commission believes that all these arguments are unfounded.

Sub (a). Companies from countries with a novelty examination system can already apply for the registration of a Community design, without any restriction. The accession to the Geneva Act would therefore not change this situation.

Sub (b). The aim of the accession should be to facilitate the accession to new markets, increasing the competitiveness of the EU companies. Their competitiveness cannot be sacrificed in favour of the protection of non competitive companies. Beside this, as we have explained sub (a), those companies are already exposed to the competition of foreign companies, which can already register Community designs.

Sub (c). As explained in paragraph 3.3, the accession of the EU is likely to urge other countries to accede the system, making it world-wide.

Sub (d). The Geneva Act gives the Contracting Parties the possibility to provide that an individual designation fee has to be paid when designating it. The fee must be proportionate to the amount which the Office of that Contracting Party would be entitled to receive from an applicant for a national grant. Therefore, the accession of the EC to the Geneva Act cannot as such harm EC companies as far as the level of fees is concerned. In general, it can be said that the attractiveness of the EC system works both for foreign and EC companies in an identical way.

Sub (e). This is a non-problem. Firstly, to fully reproduce an object there is no need to use more than seven views. Secondly, the OHIM already deals with applications containing more than seven views and its practice to discard the views exceeding the number of seven has raised no problems.

Sub (f). Finally, this argument is correct but it will lose its importance as fast as the most important commercial partners accede to the Geneva Act. In the meanwhile, it will be up to companies to evaluate their strategy and to check whether this can be an obstacle in using the international registration system.

3.5. How many international applications would be filed per year?

None of the concerned parties has been able to predict any estimate on this point. Nonetheless, it has been underlined that the accession of important commercial partners as USA and Japan, together with the simplification of the registration procedure, will without no doubt increase the total number of design application from EU design companies.

3.6. Would it be better to file applications directly at the WIPO International Bureau or via the OHIM?

The Hague system allows contracting parties to choose whether an international deposit can be filed only directly at WIPO or if an indirect deposit through the Office of origin would be possible.

Since very few applications are delivered personally, the location of the receiving office seems to be of minor importance. Whether an application is to be sent to Alicante or Geneva makes very little difference to the applicant.

Nonetheless, it seems the direct filing at WIPO should be preferred, avoiding useless duplication of work. This is notably true in the case of payment of the basic fee for an international application, which has to be paid in any event directly to the International Bureau and which is payable at the time of filing. Applicants might be misled and erroneously pay the fee to OHIM, the latter having to return the fee to the applicant.

4. Final considerations

The great number of responses sent by both Member States and business and professional organisations attest to the interest that the stakeholders attach to the accession of the European Community to the Hague Agreement. A less impressive number of responses were sent by

private companies active in the interested field, but this can easily be explained taking into consideration that private companies are also represented by the above mentioned business and professional organisations, which did massively participate in the consultation.

An overwhelming majority of the responses received, bordering on unanimity, support the idea that the European Community should accede in the near future to the Hague Agreement. The principle arguments brought in favour of the accession are: the international deposit of designs would result in simplifying registration procedures and portfolio management; the saving of costs would have a positive impact on research, development and innovation activities; simplified procedures would facilitate access to protection in third countries; the accession of the European Community would offer the same opportunities to all EU citizens irrespective of whether they are nationals of a Member State that is or is not a contracting party to the Hague Agreement; and the accession of the European Community would urge other important commercial partners to adhere, such as USA, Japan, Korea and China, making the system really world-wide and attractive.

The minor problems identified by a very limited number of subjects are, in the great majority of the cases, only the consequence of a misunderstanding of the system and cannot constitute valid reasons not to adhere to the Geneva Act.

Finally, the direct deposit at the International Bureau seems to be preferable to the indirect deposit through OHIM.

Annex 2

Questionnaire on the impact of the accession of the European Community to the Hague Agreement on International Designs (January 2004)

1. Introduction

The Hague Agreement Concerning the International Deposit of Designs offers owners of designs a simplified means of applying for protection of a design in several countries by submitting a single international application, replacing a whole series of applications, which, otherwise, would have had to be filed directly with each of the national offices concerned.

The European Community meets the conditions to become party to the Geneva Act (1999) of the Hague Agreement, which entered into force on December 23, 2003.

Whereas the Community design system provides for a complete and unified regional designs registration system which covers the whole territory of the European Union, the 1999 Act constitutes a treaty centralizing, with the International Bureau of WIPO, the procedures for obtaining protection of designs in the territory of the designated Contracting Parties.

On the other hand, any substantive aspect of the protection (including in particular the substantive examination carried out by each Office, the assessment of the conditions of protection and the scope of that protection) is entirely a matter of the legislation of each designated Contracting Party.

Therefore, both systems are complementary. The link between the Community design system and the 1999 Act implies that industry may make use of the Geneva Act to obtain Community designs at the same time as obtaining design protection in third States.

In other words, participation of the European Community in the 1999 Act would make it easier for design owners in the European Union to obtain protection for their designs in the European Union and in the territories of Contracting Parties to the 1999 Act outside the European Union through one single international application lodged at the International Bureau of WIPO.

To evaluate whether the Commission should initiate proposals to allow for accession of the European Community to the Geneva Act, the Commission would like to have the opinions and comments of the interested parties on the following questions:

2. Questionnaire

1. What, in your opinion, would be the impact, in your sector of activity or more generally, of the accession of the European Community to the Geneva Act (1999) of the Hague Agreement Concerning the International Deposit of Designs on:

- research and development activities and innovation in the field of design,*
- the European Union's competitiveness at world level?*

Where necessary, make a distinction according to the size of the company (large companies or SMEs) and the sectors concerned.

2. Which would be, in your opinion, the main advantages of the system as described in point 1 for the European Union companies? Would there be any disadvantages?

3. If the system described in point 1 was set up, how many international applications designating the European Community would you be likely to file per year?

In your opinion, what would be the total amount of international applications designating the European Community, coming either from a Member State or from a Third Country?

4. Would your reply to question 3 be different if the international application can not be filed through the Office for Harmonization of the Internal Market but only directly at the International Bureau?

5. On the basis of your replies to the previous questions, would you be in favour of the accession of the European Community to the Geneva Act as described in point 1?

6. If your reply to the previous question was negative, what changes would you suggest to make the system acceptable to you?

7. Do you have any further comments regarding the accession of the European Community to the Geneva Act?

3. Timetable

This consultative document is being sent to main interested parties. It will also be available on the website of the European Commission's Internal Market DG at the following address: http://europa.eu.int/comm/internal_market/en/intprop/indprop/index.htm and on the site of the Office for Harmonization in the Internal Market at the following address: <http://oami.eu.int/en/default.htm>.

Replies to the questions must be sent to the European Commission's Directorate-General for the Internal Market, either by writing to the following address: **European Commission, DG Internal Market (MARKT/E/2), rue de la Loi, 200 (C100 5/027), B-1049 Bruxelles**, or by e-mail to MARKTE2@cec.eu.int.

All comments must reach the Commission by 18 April at the latest.

For any further information on this consultation, please contact Mr G. Bertoli (tel. +32 (0)2 298 56 40; e-mail giuseppe.bertoli@cec.eu.int)

EUROPEAN COMMISSION
Internal Market DG

Brussels, 1 March 2002

**Summary report of replies to the questionnaire on the impact of the Community utility model with a view to updating the Green Paper on protection by the utility model in the internal market
(SEC(2001)1307)**

Summary

On 26 July 2001, the Commission published a staff working paper entitled "Consultations on the impact of the Community utility model in order to update the Green Paper on the Protection of Utility Models in the Single Market" (SEC(2001)1307).

The consultation exercise yielded 47 responses, mainly from governments and ministries in the Member States, professional associations and companies. This figure is fairly modest compared to other consultation exercises launched by the Commission in similar fields.

Three-quarters of the contributors state their opposition to a Community utility model. The reasons are many and varied, including the risk of restricting competition and adversely affecting the competitiveness of European companies, less legal certainty, unsatisfactory criteria (level of inventiveness, etc.). Moreover, it is felt that the utility model would respond to a need for local, or even national protection, but would not be justified at Community level.

Of the contributors opposed to a Community utility model, a majority advocate abandoning any initiative on it, while a number would like to see a resumption of work on the Directive aiming to approximate Member States' legislation on this form of protection.

On the other hand, the interested parties in favour of a Community utility model believe that it would be a useful complement to the patent system. The creation of a Community utility model would be particularly important for SMEs, whose minor technological innovations often have only a short lifetime and have not yet benefited from protection.

 - 3.2.2. Question-by-question analysis

1. INTRODUCTION: BACKGROUND

In 1995, the European Commission launched a wide-ranging consultation exercise on the need for Community action on utility models. It did so by means of a Green Paper on the Protection of Utility Models in the Single Market (COM(95)370 final). Several approaches were considered, including aligning national protection procedures and creating a Community protection right.

Most of the interested parties preferred the first option. Consequently, on 12 December 1997, the Commission presented a proposal for a Directive approximating the legal arrangements for the protection of inventions by utility model (COM(97)691 final). Following the opinion given by the Economic and Social Committee on this proposal on 27 May 1998 and the resolution adopted by the European Parliament on 12 March 1999, the Commission presented an amended proposal for a Directive on 25 June 1999 (COM(1999)309 final).

The work on this proposal was suspended in March 2000, because of the difficulty of reaching agreement on some basic problems raised by the proposal and the priority which the majority of Member States attached to a Community patent.

On 23 and 24 March 2001, however, the European Council in Stockholm, in the light of the conclusions of the European Councils of Lisbon and Feira, expressed concern about the modest progress which had been made with both the Community patent and the utility model. The Commission wished to bring its information up to date regarding the opinions of the interested parties on the introduction of a Community utility model.

On 26 July 2001, having received support from the Internal Market Council on 31 May 2001, the Commission published a staff working paper, "Consultations on the impact of the Community utility model in order to update the Green Paper on the Protection of Utility Models in the Single Market" (SEC(2001) 1307).

The interested parties were asked to submit their comments by 30 November 2001. The present note aims to identify the main results of the consultation exercise.

2. FEATURES OF A POSSIBLE COMMUNITY UTILITY MODEL

The interested parties expressed their views on the Commission's staff working paper, in particular point 4. It is appropriate at this juncture to recall the main features proposed for a Community utility model:

- Inventions of both products and methods would be protected (no requirement for defined or three-dimensional form).
- Inventions would need to satisfy the criteria of absolute novelty, suitability for industrial application and a certain degree of inventiveness, the latter being fixed at a level lower than for patents.
- Applications for a Community utility model would be subject only to a formal verification, and the utility model would be granted without prior examination of the conditions for obtaining protection with regard to novelty and inventive step.
- There would be no limit on the number of claims.

- A search report on the state of the art could be requested by the applicant or by third parties. The search report would be added to the file and would become compulsory in the event of legal proceedings.
- The rights conferred by a Community utility model would be identical to those conferred by a patent.
- The duration of protection would be a non-renewal maximum of ten-years from the date of filing of the application.
- Dual protection (application for a patent and for a utility model) would be permitted, but, in the event of a dispute, successive proceedings under both sets of protection arrangements would not be allowed.

Finally, the Community utility model would not replace national arrangements for the protection of utility models but, rather, would complement them.

3. ANALYSIS OF THE RESULTS OF THE CONSULTATION EXERCISE

3.1. General remarks

The European Commission received 47 written comments. This is a fairly modest number compared to other consultation exercises in similar fields, and in relation to the Green Paper of 1995, which attracted nearly 100 comments. It seems that, in the absence of major developments since the Green Paper, the "interested parties" were not particularly interested in expressing their views on the subject, as their positions had generally not changed much in the intervening period.

The answers fall into two groups: national (33 contributions) and multinational, e.g. from professional federations or trade associations (14 contributions). Although this distinction is not entirely watertight, it does make it possible to read the comments in the specific context in which they were made.

The interest aroused by this consultation exercise varied between Member States. The largest single number of replies was received from the United Kingdom (10), well ahead of France (five) and Germany (four) and Denmark (three). The Commission did not receive any comments from Belgium, Luxembourg or Portugal. It should be noted that Luxembourg, the United Kingdom and Sweden are the only three Member States not to have protection of the utility model type.

Nevertheless, these data should be analysed with some caution, because the consultation took different forms in the various Member States. In some, the interested parties were asked to make their views known to the Commission directly (as appears to have been the case in the UK, for example). Others preferred a single body to relay replies to the Commission (e.g. Spain and Sweden).

The contributions of organisations with a multinational character made it possible to obtain the opinion of companies of all sizes, including craftsmen, self-employed persons, SMEs and major companies. Some sectoral associations provided more specific insights into the consequences which a Community utility model would have on their respective sectors (e.g. the pharmaceutical, toy and sports industries).

In addition to these quantitative factors, the Commission notes the difficulty expressed by certain quarters of providing precise comments on several questions. The matters raised

in the Commission's working paper, particularly point 4, were sometimes judged too woolly (the objects liable for protection, the degree of inventiveness, etc.).

3.2. Substantive analysis

3.2.1. General assessment

Most of the interested parties are opposed to the introduction of a Community utility model. Of the 36 opponents, the majority wish the Commission to focus its efforts on adopting a Community patent.

Moreover, many fear that such a system would be in competition with the existing patent system, but without adequately addressing the needs of small and medium-sized enterprises. They believe that protection by utility model would often be sought for local purposes only.

A minority, however, is in favour of a Directive harmonising national legislation on the utility model as envisaged in the Commission's proposals of 1997 and 1999.

Those in favour of the working paper represent various sectors. It would therefore be wrong to state that the positive replies came from a specific category (institutional or commercial, small or large enterprises, etc.). Those in favour of a Community utility model believe that it would be a useful complement to a patent system which does little to meet the needs of certain companies, particularly SMEs.

3.2.2. Question-by-question analysis

This analysis is complicated to some extent by the fact that a number of comments were limited to an overall standpoint, without answering each question in detail.

Question 1

What, in your opinion, would be the impact, in your sector of activity or more generally, of the introduction of a Community utility model as described in point 4 on:

- research and development activities and innovation,*
- competition within the European Union,*
- the European Union's competitiveness at world level?*

Where necessary, make a distinction according to the size of company (large companies or SMEs) and the sectors concerned.

The first question is designed to gauge the likely effects of the introduction of a Community utility model, as described in point 4 of the working paper, in terms of research and development, innovation, competition within the European Union and the EU's competitiveness at world level.

As regards research and development, one-fifth of the answers suggest that the creation of a Community utility model would not have a major impact. Slightly less than half, on the other hand, state that it would have negative effects because of the resultant lack of legal certainty (cf. question 2).

Similarly, most respondents point out the harmful effects which introduction of a Community utility model would have on competition within the European Union and, more generally, on the competitiveness of European companies at world level. They repeatedly point to the risk of such an instrument being "hijacked" by large companies adopting an aggressive policy and filing an unconscionable number of applications. Moreover, they feel that the system described in point 4 of the working paper would strengthen the position of major companies in non-member countries, particularly America and Japan. They could easily make use of English-language documents used for registering their patent applications in the United States. This would harm the competitiveness of European companies. Such arrangements would have particularly negative repercussions for European SMEs and inventors: they would be significantly affected by barriers to entry to the single market, which represents their only market. The majority of contributors therefore state that a Community utility model, far from benefiting these companies, would be to their disadvantage.

The few replies which were in favour of a Community utility model, by contrast, stress the importance to SMEs of having a weapon of this kind in their arsenal, as the minor technological innovations which they tend to come up with often have a relatively short lifetime and have up till now not benefited from protection.

Question 2

What, in your opinion, would be the effect of a Community utility model on legal certainty for your company and for the European Union in general?

Next, the Commission wished to know the opinions of the interested parties about the impact which the creation of a Community utility model would have on their legal environment.

Most contributors say that the greatest weakness of the Community utility model is the lack of legal certainty. The principal reasons mentioned are the lack of prior examination, the non-obligatory character of searches, the lack of analysis of basic criteria (e.g. novelty, inventiveness, the required degree of which is often judged too low).

The proliferation of Community utility models would increase companies' costs. Risk analysis and the multiplication in the number of opposition procedures would be a drain on companies' resources, particularly the limited resources of small and medium-sized businesses. The advantages in terms of the speed of the registration procedure would thus be offset by the risks arising from a less certain legal environment.

This view is shared by some respondents who are generally in favour of a Community utility model. In order to mitigate these shortcomings, some respondents propose that a search report be made compulsory.

Question 3

If the system described in point 4 was set up, how many applications for utility models would you be likely to file per year?

In your opinion, what would be the total number of applications filed each year in the European Union?

The interested parties were asked to estimate the number of Community utility model applications likely to be filed per year if the system described in point 4 of the working paper were set up.

A large number of contributors pointed out the difficulty of giving precise figures. Several noted that the strategy adopted would depend on the cost and extent of the envisaged protection, but would also be influenced by the behaviour of competing companies.

There are basically two sets of views.

Some of the contributors stress that protection by utility model is sought mainly for national or even local territory, which means that a fairly limited number of applications would be filed at Community level.

However, the majority expect a large number of applications, most of them from non-European companies. The anticipated numbers range from a few dozen to a few hundred thousands for the European Union, on the assumption that the utility model has features which distinguish it from the patent.

Lastly, some commentators note that certain applications for Community utility models could be substitutes for or in addition to patent applications.

Question 4

Would the reply to question 3 be different if the registration for the Community utility model is made to a centralised office or to national patent offices? If so, please explain.

In the same vein, would the reply to question 3 be dependent upon the procedures, including those related to the linguistic regime:

- to be applied for filing and processing utility model applications; and/or*
- governing the grounds for opposition by third parties to granted utility models.*

If yes, please explain.

This question aimed to evaluate the importance attached by the interested parties to the place where Community utility models would be registered (a centralised office or national offices) and to procedures, including the language arrangements.

As regards the impact of centralised or decentralised registration, the answers were fairly muted: a quarter of the contributors do not think that this would have a major impact on the number of registrations.

Half of the contributors, however, argue that this would impact on the cost of the Community utility model and on the number of applications. There appears to be a difference of approach here between large companies on the one hand and SMEs on the other. Large companies generally prefer a centralised office, which would be more favourable in cost terms, although they recognise that decentralisation would make it possible to reduce the number of applications. Small and medium-sized enterprises lean more towards the option of national offices, which they perceive as being closer to them.

As regards procedures, most contributors state merely that costs must be kept under control.

The question of the language regime is widely thought to be crucial in terms of costs and the number of applications. The majority would prefer a restricted language regime akin to those in force at the Office for Harmonisation in the Internal Market (OHIM) or the European Patent Office (EPO), or even the use of a single language. A small number of contributors, on the other hand, feel that a procedure which could be conducted in all the official languages of the European Union would be more appropriate to the needs of applicants, especially small and medium-sized enterprises.

Question 5

On the basis of your replies to the previous questions, would you be in favour of the introduction in the European Union of a Community utility model as described in point 4?

This question aimed to summarise the position of the interested parties on the Community utility model as described in point 4 of the working paper.

Three-quarters of the contributors were against introduction of such an instrument. It should be pointed out, however, that the comments of ministries which had summarised the national answers reflect broadly favourable positions (Spain) or evenly balanced ones (Sweden) of the organisations consulted. Of all the multinational federations and associations which expressed an opinion, only two were in favour of this new instrument at Community level.

Question 6

If your reply to the previous question was negative because of the features described in point 4, what changes would you suggest to make the system acceptable to you?

Building on the previous question, the Commission wished to know which features of the proposed Community utility model the interested parties thought were unhelpful and what changes they wished to see.

Nearly one-quarter of all the organisations which were opposed to a Community utility model did not reply to this question. The majority consider this form of protection unsuited to the needs of European companies, whatever its features might be.

The comments are varied, but some suggestions crop up several times, such as those asking for:

- the criteria of novelty and inventiveness to be aligned with those of the patent;
- a shorter duration of protection;
- protection limited to the product described in the application, with no principle of equivalent effect;
- introduction of a prior examination;
- changes to the extent of protection.

Question 7

Have any new developments occurred since the Green Paper of 1995 which have led you to change your opinion on the Community utility model?

Please explain, as appropriate.

As its Green Paper dates from 1995, the Commission wished to know if any new developments had affected the interested parties' positions on the Community utility model.

The overwhelming majority, both among those who were in favour and those who were against the Community utility model, did not cite any relevant developments.

The main changes were legislative developments at Community or national level and the impact of those developments. This is particularly true of the proposal for a Directive on utility models of 1997 (COM(1997)691 final) and the amended proposal for a Directive of 1999 (COM(1999)309 final).

Question 8

Do you have any further comments regarding the Community utility model? If so, please give details.

The final question gave the interested parties an opportunity to make any comments which they thought relevant.

The comments are wide-ranging. Some contributors point out that this type of protection is of interest mainly at national or even local level, and that it should therefore not be provided at Community level. Some therefore ask for the abandonment of any initiative relating to the utility model at this level, believing that the Commission should focus its efforts on adopting the Community patent. Others would like to see a resumption of work to bring national laws on the utility model closer into line. Some interested parties are worried about the economic effects of a Community utility model.

Lastly, several respondents expressed the fear that a Community utility model might hinder the existing patent system and the establishment of technical standards, particularly with regard to the new information and communication technologies.

COMMISSION STAFF WORKING PAPER

Consultations on the impact of the Community utility model in order to update the Green Paper on the Protection of Utility Models in the Single Market (COM(95)370 final)

INTRODUCTION

In July 1995 the European Commission launched an exercise to consult interested parties in order to assess, on the basis of a number of possible options, the need for Community action in the field of utility models¹. Among the options put forward for a possible Community initiative in this field were the approximation of the national systems of protection and the creation of a Community system of protection.

The first option received the support of most of the parties consulted, while there was only limited support for the second. Consequently, the Commission presented a proposal for a Directive approximating the legal arrangements for the protection of inventions by utility model (COM(97)691). The Economic and Social Committee delivered its opinion on this proposal on 27 May 1998. The European Parliament adopted a legislative resolution on the proposal for a Directive on 12 March 1999, and the Commission presented an amended proposal for a Directive on 28 June 1999 (COM(1999)309).

Work on this amended proposal for a Directive has been suspended since March 2000, the majority of the Member States having considered that priority should be given to the Community patent.

In its conclusions, the Stockholm European Council on 23 and 24 March 2001 expressed its concern at the lack of progress on the Community patent and the utility model and urged the Council and the Commission to speed up their work in accordance with the Lisbon and Feira conclusions, with all due regard to the existing legislative framework.

As regards the amended proposal for a Directive, the situation remains unchanged compared with March 2000 and the suspension of work was recently confirmed.

In order to give appropriate effect to the conclusions of the European Council, the Commission has suggested updating the information it obtained from the interested parties on the possible creation of a Community utility model. On 31 March 2001 the Internal Market Council welcomed the Commission's intention of quickly organising consultations with a view to drawing up a basic document taking a closer look at the possible impact of a Community utility model in legal, practical and economic terms.

That is the purpose of this consultative document.

¹ Green Paper on the Protection of Utility Models in the Single Market, COM(95)370 final.

1. GENERAL

1.1. The concept of a utility model

A utility model is a registered right which confers on its proprietor exclusive protection for an invention. As with a patent, to be protected by a utility model, an invention must be new, involve an inventive step and lend itself to industrial application. The level of inventiveness required, however, is generally lower than that for patents. In addition, utility models are granted without prior examination to establish the conditions of novelty and degree of inventiveness that are required for obtaining protection. This means that protection can be obtained more quickly and at less cost than with a patent, but on the other hand it has less legal certainty.

1.2. Utility models in Europe and the world

At present, legal protection for inventions by means of utility models is available only at national level. With three exceptions – the United Kingdom, Sweden and Luxembourg – most EU Member States offer, under various names, utility-model protection. However, their legal systems vary widely. In the Member States that have utility-model protection the following designations are used:

Germany	:	Gebrauchsmuster
Austria	:	Gebrauchsmuster
Belgium	:	Brevet de courte durée/Octrooi van korte duur
Denmark	:	Brugsmodel
Spain	:	Modelo de utilidad
Finland	:	Hyödyllisyysmalli/Nyttighetsmodell
France	:	Certificat d'utilité
Greece	:	Πιστοποιητικό υπεδειγματούχου χρησιμότητας
Ireland	:	Short-term patent
Italy	:	Brevetto per modelli di utilità
Netherlands	:	Zesjarig octrooi
Portugal	:	Modelo de utilidade

This form of protection is also very widespread outside the European Union (Argentina, Australia, Brazil, Korea, Chile, China, Hungary, Japan, Poland etc.). The United States, on the other hand, has no such system of protection.

2. ADVANTAGES AND DISADVANTAGES

2.1. Advantages

Utility models are generally acknowledged to have the following advantages:

2.1.1. *Quick, simple registration*

It takes on average 6 months to grant a utility model, compared with 2 to 4 years for a patent, because as a rule there is no prior examination of novelty or inventive step. This first of all allows an applicant to get quick protection against copies and imitations, and this protection serves to strengthen the competitive position of companies, including SMEs, and improve the availability of their products, especially capital goods and consumer goods, on the market. Rapid registration also allows speedy economic exploitation of the invention, in particular through the granting of licences.

2.1.2. Flexible conditions for obtaining protection

Whereas, an inventive step and absolute novelty are required in order to obtain a patent, most systems of protection by utility model demand a lesser degree of inventiveness than that needed for a patent and provide for restrictions on novelty (e.g. in Spain, where only the national state of the art is taken into account), so that the conditions for obtaining a utility model are more flexible and easier to meet. The fact that the degree of inventiveness required is less than for a patent constitutes a major reason for seeking protection by utility model, since it means that inventions can be covered that represent minor technological advances, which are important not only for SMEs but also for large companies.

2.1.3. Low cost

In contrast to a patent, the utility model does not involve any investigation of novelty or inventive step, which makes it less expensive. This advantage is particularly important for companies that need protection that is as complete as possible against copies and imitations and have to apply for a large number of utility models. The question of cost is also a decisive element in the case of inventions whose commercial success is uncertain. This is especially true for SMEs, which do not for the most part have sufficient market information to forecast a new products' chances of success, whereas large companies have planning and forecasting tools that allow them to limit the risk of failure.

2.1.4. Temporary protection pending the grant of a patent

When an invention is eligible for protection under both systems, the quick registration of utility models makes it possible to cover the relatively long period it takes to grant a patent with prior examination. This temporary protection is of particular use in Member States where patents are subject to a full examination of novelty and inventive step and the procedure for granting a patent is thus a fairly long process.

The economic importance of protection by utility model is not the same for all businesses but depends on what is in the interest of each company. The interests of SMEs lie mainly in the savings to be made in terms of cost, time and administrative burden. Moreover, because of their limited financial and human resources, these companies' research and development activities often lead to technical inventions involving only a minor inventive step which do not

necessarily meet the conditions for patent protection. It is mostly a question of technical improvements which, as they accumulate and interact, have just as great an impact on the technology used in the sector concerned as do inventions in the strict sense.

The utility model may also be used in certain industries where there is a constant need for innovation, particularly in the form of minor technical inventions. The main sectors concerned are machinery construction, the electrical industry, precision engineering and optics, the toy industry and motor vehicle construction.

2.2. Disadvantages

Certain interested parties expressed doubts as to the economic value of protection by utility model, particularly for SMEs. The main supposed disadvantages of protection by utility model can be summarised as follows:

2.2.1. Too much legal uncertainty resulting in major costs

Legal uncertainty, arising from the lack of any prior examination of the basic conditions, could be harmful to SMEs. When they make improvements to a product or process, SMEs could come up against a utility model granted without any examination to someone else, resulting in costly litigation or even the loss of the sums they have invested in the improvements in question. Consequently, there would have to be additional expenditure on monitoring utility models, besides the need to assess them as regards validity and counterfeiting.

2.2.2. Risk of the proliferation of unexamined rights

Europe would open up its market to its main competitors without any reciprocity, and would be in danger of being swamped by foreign applications to be granted a right that is not examined, the validity of which can be tested only through litigation and which can be granted to practically all new products in view of the very low level of inventiveness required to obtain protection.

2.2.3. Negative impact on the whole system of patents in Europe

The utility model could even have a negative impact on the patent system in Europe, because it would lower the threshold of protection and institute a parallel system that would be cheaper but poorer. In addition, in the long term that could lower the standards of protection in Europe, thereby devaluing years of effort to provide Europe with appropriate standards for the protection of intellectual property. Lastly, the position of European companies vis-à-vis their competitors, mainly in the United States and Japan, could be seriously affected, since non-European companies could find this form of protection interesting in order to occupy the field in the EU in the face of their local competitors. In this connection it should be pointed out that some 300 000 patent applications are filed on average each year in the United States and some 450 000 in Japan.

2.2.4. Harmful effects for SMEs

The advantages of the utility model would in principle benefit all companies, not just SMEs. In practice it is likely to be used, to the detriment of SMEs, by those who already operate in the single market and are familiar with the system of intellectual property, with the consequence that large (European, Japanese or American) companies would find it easier to protect their products with utility models and thus block access to the market for European SMEs.

It must be said that none of the disadvantages described above has been observed in the Member States where protection by utility model is in place. Furthermore, the vast majority of users of utility models are local users who generally have little interest in protection at EU level.

3. POSITION OF THE INTERESTED PARTIES IN 1995 CONCERNING THE COMMUNITY UTILITY MODEL

In the 1995 consultation, about a third of the replies to the Green Paper were in favour of a Regulation setting up a Community utility model. The majority of the replies rejected this possibility for the following reasons:

- a single right would be too costly; a Regulation setting up a Community utility model would have to be based on Article 308 of the EC Treaty, which implies unanimity in the Council; in that context it would be difficult to imagine a possible solution to the question of translations; if the utility model had to be translated, for example, into the 11 official languages, that would mean completely exorbitant costs in relation to the needs of industry for quick, flexible and cheap protection;
- a single right would not correspond to the real needs of industry, particularly in the field of minor inventions; protection by utility model is rarely sought in more than 3 to 5 Member States and never in the whole EU.

4. POSITION OF THE COMMISSION'S SERVICES ON A POSSIBLE COMMUNITY UTILITY MODEL

According to the Commission's services, if there is to be a Community utility model it should have the following principal features:

- protection by a Community utility model would be available for inventions of both products and processes (no requirement for defined or three-dimensional form);
- inventions eligible for protection by a Community utility model would be new, inventive and suitable for industrial application;
- the level of inventiveness required would be lower than for patents;
- novelty would be absolute (defined in relation to the state of the art at international level);
- an application for a Community utility model would be subject to only a formal verification, and the utility model would be granted without any prior examination of the conditions for obtaining protection with regard to novelty and inventive step;
- there would be no limit on the number of claims;

- a search report on the state of the art could be requested by the applicant or by third parties; the search report would be added to the file and would become compulsory in the event of legal proceedings;
- the rights conferred by a Community utility model would be identical to those conferred by a patent;
- the duration of protection would be limited to a non-renewable maximum of 10 years from the date of filing of the application;
- dual protection, allowing one and the same invention to form the subject-matter of a patent application and a utility model application, would be permitted, but in the event of dispute, successive proceedings under both sets of protection arrangements would not be allowed.

Finally, it has to be stated that the Community utility model would not replace national arrangements for the protection of utility models but, rather, would complement them.

5. QUESTIONNAIRE

In the light of the above considerations, the Commission would like to have the opinions and comments of the interested parties on the following questions:

1. *What, in your opinion, would be the impact, in your sector of activity or more generally, of the introduction of a Community utility model as described in point 4 on:*
 - *research and development activities and innovation,*
 - *competition within the European Union,*
 - *the European Union's competitiveness at world level?*

Where necessary, make a distinction according to the size of company (large companies or SMEs) and the sectors concerned.
2. *What, in your opinion, would be the effect of a Community utility model on legal certainty for your company and for the European Union in general?*
3. *If the system described in point 4 was set up, how many applications for utility models would you be likely to file per year?*

In your opinion, what would be the total number of applications filed each year in the European Union?
4. *Would the reply to question 3 be different if the registration for the Community utility model is made to a centralised office or to national patent offices? If so, please explain.*

In the same vein, would the reply to question 3 be dependant upon the procedures, including those related to the linguistic regime:

 - *to be applied for filing and processing utility model applications; and/or*
 - *governing the grounds for opposition by third parties to granted utility models.*

If yes, please explain.

5. *On the basis of your replies to the previous questions, would you be in favour of the introduction in the European Union of a Community utility model as described in point 4?*
6. *If your reply to the previous question was negative because of the features described in point 4, what changes would you suggest to make the system acceptable to you?*
7. *Have any new developments occurred since the Green Paper of 1995, which have led you to change your opinion on the Community utility model?*

Please explain, as appropriate.
8. *Do you have any further comments regarding the Community utility model? If so, please give details.*

6. TIMETABLE

This consultative document is being sent to the main interested parties. It will also be available on the website of the European Commission's Internal Market DG at the following address:

http://europa.eu.int/comm/internal_market/en/intprop/indprop/index.htm.

Replies to the questions must be sent to the European Commission's Directorate-General for the Internal Market, either by writing to the following address: **European Commission, DG Internal Market (MARKT/E/2), rue de la Loi, 200 (C100 5/109), B-1049 Bruxelles**, or by e-mail to MARKT E2@cec.eu.int.

All comments must reach the Commission by **30 November 2001** at the latest.

For any further information on this consultation, please contact Mr P. Ravillard (tel. +32-2/295.27.69; fax +32-2/299.31.04; e-mail patrick.ravillard@cec.eu.int).

COMMISSION OF THE EUROPEAN COMMUNITIES

Brussels, 12.07.1999

Amended proposal for a

EUROPEAN PARLIAMENT AND COUNCIL DIRECTIVE

**approximating the legal arrangements for the protection of inventions by utility
model**

(presented by the Commission in accordance with Article 250(2)
of the EC Treaty)

EXPLANATORY MEMORANDUM

GENERAL

On 12 December 1997, the Commission submitted to the European Parliament and the Council a proposal for a Directive approximating the legal arrangements for the protection of inventions by utility model.¹

The Economic and Social Committee adopted its opinion on 27 May 1998².

In its Opinion, adopted at first reading during the part-session from 8 to 12 March 1999, the European Parliament approved the Commission's proposal subject to 34 amendments³. Parliament did not question the Commission's approach and the main features of the utility model as described in the original proposal were retained, i.e. the level of inventiveness required is not as great as it is in the case of patents, the substantive conditions for protectability are not subject to a preliminary examination and the protection period is limited to 10 years.

Parliament proposes that the Directive should define utility models with reference to structures, mechanisms or configurations, thereby excluding processes and substances from the scope of the Directive. On the other hand, it proposes including inventions involving computer programs. Another important proposal in the Parliament Opinion concerns the inventive step, which need not be as great as that required for a patent, by analogy with the European Patent Convention. Parliament's opinion also contains proposals aimed at increasing the legal certainty of utility models by extending the right to request a search report on the state of the art to third parties and making such reports obligatory in some cases. Parliament also proposes introducing a "one-stop shopping procedure", whereby applicants would need to lodge an application in only one Member State, which would then be responsible for forwarding the application to the other Member States in which protection is required. It also proposes an opposition procedure so that disputes can be settled more quickly than if they were referred to the courts. Finally, Parliament proposes reducing the fees payable by small and medium-sized firms, individual inventors and universities by 50% and extending the grounds for revocation to cases in which the proprietor of the utility model was not entitled to it.

The aim of this amended proposal is to take account as far as possible of the amendments proposed by the European Parliament, most of which contribute towards clarifying the text of the original proposal.

The Commission was able to accept 25 amendments proposed by the European Parliament, 20 in their entirety (Nos 3, 4, 5, 7, 9, 11, 13, 14, 19, 20, 21, 22, 25, 27, 28, 29, 31, 32, 33, and 34) possibly with a few minor modifications of a technical nature, and five in part (Nos 2, 6, 8, 10, and 26). It was unable to accept nine of the proposed amendments (Nos 1, 12, 15, 16, 17, 18, 23, 24 and 30).

¹ OJ C 36 of 3.2.98, p. 13.

² OJ C 235 of 27.7.98, p. 26.

³ Not yet published.

The amendments proposing the introduction of a "one-stop shopping procedure" (Nos 1, 6 (in part) and 17) were rejected on the grounds that this would go beyond the scope of the Directive, which was aimed at aligning the national provisions on utility models that most directly affected the operation of the Single Market, since a procedure of this kind does not correspond to a need expressed by the economic operators concerned in connection with the consultation initiated with the Green Paper of 1995. Furthermore, the introduction of a procedure of this kind would give rise to legal and practical difficulties and would not solve the problem of translations, for example. The workload of the national offices resulting from the administration of such a procedure should also be borne in mind. The Commission could, however, as part of the monitoring of the Directive and in the light of experience, look into the possibility of introducing a procedure of this kind should the need become apparent.

Amendment 18 - for an opposition procedure - was rejected on the grounds that it too goes beyond the scope of the harmonisation that is the aim of this Directive. This is a procedural question that should be left to the Member States in accordance with the principle of proportionality. As in the case of "one-stop shopping", the possibility of a procedure of this kind could be examined in connection with the monitoring of the Directive.

Several other amendments were also rejected, including those directly or indirectly concerning the field of application of the Directive (Nos 2 (in part), 6 (in part), 8, 23, and 24). These amendments propose excluding substances or processes from the scope of the Directive. This is an outmoded approach, however. It emerged from the consultation in connection with the Green Paper of 1995 that the vast majority of the parties concerned were in favour of substances and processes being included in the scope of utility models. Moreover, the "three-dimensional" requirement underlying the exclusion of substances and processes was becoming a thing of the past in the legislation of the various Member States, only four of which nowadays apply it as a condition for the granting of protection by means of a utility model.

The amendment proposing that the fees payable by small and medium-sized firms, individual inventors and universities should be reduced by 50% (No 12) was also rejected on the grounds that, although it reflects concerns that are laudable, it has no place in a Directive on harmonisation since the financial implications for the Member States would go beyond the scope of the Directive. The underlying principle has, however, been expressed in one of the recitals.

Other amendments rejected by the Commission include No 15, which calls for additional preliminary checks, since this calls into question the principle of not examining the substantive conditions for protectability. The amendments specifying "a practical or technical advantage" as a new condition for the granting of protection were also rejected (Nos 6 (in part), 10 and 16). This would constitute a new requirement for obtaining protection, whereas the technical or practical advantage should rather be regarded as explaining the reasons for the inventive step.

Finally, Amendment 30, according to which the subject-matter of the utility model is not protectable if the proprietor of the utility model is not entitled to obtain it, was also rejected, since in this case the genuine inventor would definitively lose his right to the utility model as the invention could no longer be regarded as new. Revocation

is therefore not desirable; instead, transfer to the genuine inventor should be permissible.

EXAMINATION OF THE RECITALS

General

In order to facilitate reading of the modified proposal, each recital has been numbered. Three recitals have been modified in the light of Parliament's Opinion and a new one has been added (see table below).

Recitals	Amendments
6	12
13	2 (in part)
14	3
19 (new)	4

Specific

Recital 6 has been expanded to take account of Amendment 12 concerning the reduction of the fees payable by small and medium-sized firms, individual inventors and universities.

The change to Recital 13 corresponds to Amendment 2 (in part), taking account of the deletion of the phrase excluding inventions involving computer programs.

The change to Recital 14 corresponds to Amendment 3 concerning the extension to third parties of the right to request a search report.

The new Recital 19 corresponds to Amendment 4 concerning the monitoring of this Directive by the Commission three years after its implementation in the Member States.

EXAMINATION OF THE PROVISIONS

General

On the basis of the European Parliament's Opinion, 20 Articles or paragraphs have been modified and three new Articles inserted into the amended proposal. These concern other forms of protection (Article 22), subsidiary application (Article 26) and monitoring of the Directive (Article 28). Modifications of a technical nature have also been made to Articles 18(1) and 27(1). In order to facilitate reading of the amendments in conjunction with the Articles to which they refer, the following correspondence table has been drawn up:

Articles	Amendments
1	6 (in part)
3(1) (ex (2))	34
3(2) (new)	7
4	8 (in part)
5(3)	9
6	6 (in part) and 10
8(1)	11
13(2) (deleted)	14
16(1)	19
16(3)	20
16(4)	21
18(1)	-
19(2)	22
20(1)	26
20(2)	26
20(4)	25
20(7) (new)	26
22 (new)	5
23 (ex 22)(2)	27
23 (ex 22)(3)	28
25 (ex 24)(1(a))	29
25 (ex 24)(2)	31
26 (new)	32
27(1)	-
28	33

Specific

Article 1

The title "Definitions" has been replaced by "Definition" in order to take account of the changes made to the contents of the article.

Article 1(1)

This paragraph has been modified to take account (in part) of Parliament's Amendment 6. It incorporates the principle set out in Article 3(1) of the original proposal concerning protectable inventions, specifying that the inventions covered may relate to substances or processes. The Commission rejects the reference to "a configuration, structure or mechanism" on the grounds that this would exclude substances and processes. Similarly, the reference to a practical or technical advantage, or another benefit to the user, for example in the field of education or entertainment, has not been incorporated here but transferred to Article 6, as an explanation of the concept of "inventive step".

Article 1(2)

Article 1(2) partly corresponds to Article 1 of the original proposal, but, in accordance with Parliament's proposed Amendment 6, the list of national names has been included to help interpretation.

Article 3

The title has been changed, since the contents of the original first paragraph of this article have been transferred to Article 1(1), so that the new Article 3 refers only to exceptions.

Article 3(1)

The original first paragraph has been deleted in view of the new definition incorporated into Article 1. The new Article 3(1) therefore corresponds to the old Article 3(2). Parliament's Amendment 34, to the effect that games should be eligible for utility model protection if they meet the requirements, has been incorporated into point (c).

Article 3(2)

This new paragraph, which corresponds to Parliament's Amendment 7, is based on the corresponding provisions of the European Patent Convention (Article 52(3)). Its purpose is to exclude from utility model protection only those items referred to as such in the previous paragraph.

Article 4

The title of Article 4 has been amended to distinguish it from that of Article 3 and to make it more appropriate to the contents of this Article, which deals with inventions that may not be protected by utility models. The deletion of point (d) - inventions involving computer programs - corresponds to Parliament's Amendment 8 (part).

Inventions involving computer programs may therefore be protected by utility models provided they meet the requirements set out in the Directive.

Article 5

Article 5(3)

The purpose of this modification is to make it clear that the contents of patent applications, in accordance with Parliament's Amendment 9, are considered as comprised in the state of the art, and that previous applications must cover the same territory as the application for a utility model if they are to be considered as comprised in the state of the art.

Article 6

This Article is the result of a combination of Parliament's Amendments 6 and 10.

Article 6(1)

This paragraph incorporates the idea behind Parliament's Amendment 10 - that an invention involves an inventive step if, having regard to the state of the art, it is not very obvious to a person skilled in the art. This wording, based on the definition of an inventive step set out in Article 56 of the European Patent Convention, makes it possible to establish that an inventive step is an essential requirement for utility model protection. However, the use of the word "very" indicates that the inventive step is not as great as that required for a patent. Similar wording can be found in national legislation on utility models. This article also incorporates the idea embodied in Parliament's Amendment 6 to the effect that the invention must exhibit an advantage.

Article 6(2)

The second paragraph of Article 6 goes into the concept of "advantage" referred to in the previous paragraph in terms of the aspects mentioned in Parliament's Amendment 6, i.e. a practical or technical advantage for use or manufacture of the product or process in question, or another benefit to the user, for example in the field of education or entertainment. The "other benefit" mentioned here makes it possible for the directive to cover, in particular, games and toys.

Article 8

Article 8(1)

The addition of the word "only", which corresponds to Parliament's Amendment 11, makes it possible to strictly limit the items that an application for a utility model must contain.

Article 13

Article 13(2) (deleted)

The purpose of Article 13(2) in the original proposal was to limit the number of claims to what was strictly necessary in view of the nature of the invention.

According to the Parliament (Amendment 14), this wording was too subjective and would probably have given rise to discrepancies between national legislation on this matter. It thought that claims should preferably be covered by Article 25 (revocation).

Article 16

Article 16(1)

The purpose of the modification, which corresponds to Parliament's Amendment 19, is to extend the right to request a search report to any interested party at their own cost. This modification increases legal certainty.

Article 16(3)

The addition, which corresponds to Parliament's Amendment 20, stipulates that the report must be added to the file - in other words, be made available to the public as an integral part of the documentation accompanying the granting of the utility model. This increases transparency and legal certainty.

Article 16(4)

The changes correspond to Parliament's Amendment 21 and stipulate that the Member States are obliged, and no longer merely entitled, to make a search report compulsory in the event of legal proceedings, unless the utility model has already been the subject of a search report. These changes are also in line with the wishes of the Economic and Social Committee.

Article 18

The title has been changed to take account of the rewording of the first paragraph of this article.

Article 18(1)

The purpose of the modification is to specify that this provision concerns the right of priority within a Member State. It also expands the original proposals by introducing the possibility for the applicant to change his application for a patent into an application for a utility model.

Article 19

Article 19(2)

The addition, which corresponds to Parliament's Amendment 22, stipulates that renewal of a utility model, on expiry of the first period of six months, shall not be granted unless a request for a search report has been made in respect of the invention concerned. The idea is to increase legal certainty by preventing unexamined utility models from remaining in force for too long.

Article 20

Article 20(1)

The deletion of the word "registered", in line with Parliament's Amendment 26, must be considered in the light of the new Article 20(7), according to which the utility model shall take full effect at the time when the grant is published.

Article 20(2)

As in the previous paragraph, the deletion of the word "registered", in line with Parliament's Amendment 26, must be considered in the light of the new Article 20(7), according to which the utility model shall take full effect at the time when the grant is published.

Article 20(4)

The purpose of these changes is to expand the concept of transfer, in accordance with Parliament's Amendment 25, and similarly to permit the transfer of utility model applications.

Article 20(7) (new)

This new paragraph, which corresponds to Parliament's Amendment 26, specifies the time at which utility models shall take full effect. This new provision is important, since the original proposal contained no provisions on this question.

Article 22 (new)

The purpose of this new article, which incorporates Parliament's Amendment 5 - expanding it by means of a minor technical modification to cover the topography of semi-conductor products - is to specify the relationship between utility models and other forms of protection.

Article 23

Article 23(2)

The change, which corresponds to Parliament's Amendment 27, withdraws the option left open to the Member States in the original proposal. With the new wording, a utility model which has been granted is deemed to be ineffective where a patent relating to the same invention has been granted and published. This change is also in line with the wishes of the Economic and Social Committee.

Article 23(3)

The change, which corresponds to Parliament's Amendment 28, takes account of the changes to the previous paragraph.

Article 25

Article 25(1)(a)

The change, which corresponds to Parliament's Amendment 29, takes account of the new version of Article 1.

Article 25(2)

The change, which corresponds to Parliament's Amendment 31, stipulates that limitation of a utility model in the form of an amendment to the claims, the description or the drawings is possible only if the national law so allows.

Article 26 (new)

This new article, which incorporates Parliament's Amendment 32 by means of a few minor technical modifications, makes it possible for national legislation on patents to be applied in the absence of specific national provisions applicable to utility models. This allows for reference to be made to patent law for procedural aspects so as to avoid the need to create specific procedures.

Article 27

Article 27(1)

The change regarding transposal is based on existing provisions in other Directives.

Article 28 (new)

This new article, which incorporates Parliament's Amendment 32 by means of a few minor technical modifications, provides for monitoring of the Directive by the Commission, as provided for in other Directives in force in the field of industrial property rights.

Amended proposal for a

EUROPEAN PARLIAMENT AND COUNCIL DIRECTIVE

approximating the legal arrangements for the protection of inventions by utility model

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community and in particular Article 95 thereof,

Having regard to the proposal from the Commission,⁴

Having regard to the opinion of the Economic and Social Committee⁵,

Acting in accordance with the procedure laid down in Article 251 of the Treaty⁶,

- (1) Whereas the Treaty commits the Community and Member States to creating the conditions for Community industry to be competitive and to promoting a better exploitation of the industrial potential of innovation, research and technological development policies;
- (2) Whereas technical inventions play an important role in that they make available improved, better quality products which are particularly effective in terms of, for example, ease of application or use, or which confer a practical or industrial advantage compared with the state of the art;
- (3) Whereas, because of differences between Member States' utility model laws, an invention may not be protected throughout the Community, at least not in the same way or for the same length of time, a state of affairs which is incompatible with a transparent, obstacle-free single market; whereas it is therefore necessary, with a view to the establishment and proper functioning of the single market, to approximate Member States' laws in this area;
- (4) Whereas it is important in this context to employ every possible means of increasing the competitiveness of Community industry in the field of research and development;

⁴ OJ C 36 of 3.2.98, p. 13.

⁵ OJ C 235 of 27.7.98, p. 26.

⁶ European Parliament Opinion of 12 March 1999.

- (5) Whereas small and medium-sized firms play a strategic role in relation to innovation and rapid response to market requirements;
- (6) Whereas there is a need for placing at the disposal of firms, and in particular small and medium-sized firms and researchers, an instrument which is cheap, rapid and easy to evaluate and apply; *whereas the fees should therefore be as reasonable as possible for small firms, individual inventors and universities;*
- (7) Whereas utility model protection is better suited than patent protection to technical inventions involving a specific level of inventiveness;
- (8) Whereas technical inventions should be suitably protected throughout the Community;
- (9) Whereas, in accordance with the principle of proportionality, the approximation may be limited to those national provisions which have the most direct impact on the functioning of the single market;
- (10) Whereas, if the objectives of the approximation are to be attained, the conditions for obtaining and retaining the rights conferred by a registered utility model should in principle be the same in all Member States; whereas to that end an exhaustive list of the requirements which a technical invention must satisfy if it is to be protected by a utility model must be drawn up;
- (11) Whereas these requirements are for the most part the same as those for patent protection; whereas the level of inventiveness required must nevertheless be different to allow for the specific nature of technical inventions protectable by utility model;
- (12) Whereas utility model protection must be available both to products and to processes;
- (13) *Whereas it is necessary to exclude from utility model protection not only those inventions which are normally excluded from patentability but also, in order to meet the needs of the industries concerned, inventions relating to chemical or pharmaceutical substances or processes;*
- (14) *Whereas a utility model application must satisfy requirements similar to those for patents; whereas, however, a utility model application gives rise only to a check to ensure that the formal conditions for protectability are satisfied without any preliminary examination to establish novelty or inventive step; whereas it may form the subject-matter of a search report on the state of the art only at the request of the applicant or any other interested party;*
- (15) Whereas it is essential, in order to safeguard the proper functioning of the single market and ensure that competition is not distorted, that registered utility models should henceforth confer upon their proprietor the same protection in all Member States and that the period of protection should be identical; whereas this period may not exceed 10 years;
- (16) Whereas the nature and scope of the rights conferred by a utility model must be spelled out; whereas the principle of Community exhaustion of rights must

apply in accordance with the case-law of the Court of Justice of the European Communities, but the principle of international exhaustion must be expressly excluded;

(17) Whereas rules must also be laid down on dual protection by patent and by utility model, and on the lapse and revocation of utility models;

(18) Whereas all Member States of the Community are bound by the Paris Convention for the Protection of Industrial Property; whereas the Community and all Member States are bound by the Agreement on Trade-related Aspects of Intellectual Property Rights concluded under the auspices of the World Trade Organisation; whereas the provisions of this Directive must be in complete harmony with those of the Paris Convention and of the above-mentioned Agreement; whereas Member States' other obligations stemming from the Convention and the Agreement are not affected by this Directive,

(19) Whereas the application of this Directive should be monitored and it should be kept up to date in order to safeguard, in the context of utility models, the proper functioning of the internal market and innovation by Community enterprises; whereas the Commission should propose the measures necessary for this purpose, which should include specific steps to facilitate and reduce the cost of registering utility models in more than one Member State,

HAVE ADOPTED THIS DIRECTIVE:

CHAPTER ONE

GENERAL PROVISIONS

Article 1

Definition

1. In accordance with the provisions of this Directive, utility model protection shall be available for new inventions involving products or processes that involve an inventive step and are susceptible of industrial application.

2. The following names are used in the Member States:

Belgium: Brevet de courte durée/Octrooi van korte duur

Denmark: Brugsmode

Germany: Gebrauchsmuster

Greece: Πιστοποιητικό υποδειγματός χρησιμότητας

Spain: Modelo de utilidad

France:	Certificat d'utilité
Ireland:	Short-term patent
Italy:	Brevetto per modelli di utilità
Netherlands:	Zesjarig octrooi
Austria:	Gebrauchsmuster
Portugal:	Modelo de utilidade
Finland:	Nyttighetsmodellagen

Article 2

Subject

This Directive seeks to approximate Member States' laws, regulations and administrative provisions on the protection of inventions by utility model.

CHAPTER II

SCOPE OF THE UTILITY MODEL

Article 3

Exceptions to protection

1. The following in particular shall not be regarded as inventions that are eligible for utility model protection:
 - (a) discoveries, scientific theories and mathematical methods;
 - (b) aesthetic creations;
 - (c) schemes, rules and methods for performing mental acts or doing business;
 - (d) presentations of information.
2. The items referred to in paragraph 1, shall be excluded from utility model protection only to the extent that the application for utility model protection relates to those items as such.

Article 4

Non-protectable inventions

Utility models shall not be granted in respect of:

- (a) inventions the exploitation of which would be contrary to public policy or morality, provided that the exploitation shall not be deemed to be so contrary merely because it is prohibited by law or regulation in some or all Member States;
- (b) inventions relating to biological material;
- (c) inventions relating to chemical or pharmaceutical substances or processes;

Article 5

Novelty

1. An invention shall be considered to be new if it does not form part of the state of the art.
2. The state of the art shall be held to comprise everything made available to the public by means of a written or oral description, by use, or in any other way, before the date of filing of the utility model application.
3. Additionally, the content of utility model and patent applications as filed in the Member State concerned or which designate that Member State, of which the dates of filing are prior to the date referred to in paragraph 2 and which were published on or after that date, shall be considered as comprised in the state of the art.

Article 6

Inventive step

1. For the purposes of this Directive, an invention shall be considered as involving an inventive step if it exhibits an advantage and, having regard to the state of the art, is not very obvious to a person skilled in the art.
2. The advantage referred to in the previous paragraph must be a practical or technical advantage for the use or manufacture of the product or process in question, or another benefit to the user, for example in the field of education or entertainment.

Article 7

Industrial application

1. An invention shall be considered as susceptible of industrial application if it can be made or used in any kind of industry, including agriculture.
2. Surgical or therapeutic treatment procedures applicable to the human body or to the bodies of animals and diagnostic procedures which are carried out on the human body or the bodies of animals shall not be considered to be

inventions susceptible of industrial application within the meaning of paragraph 1.

CHAPTER III

UTILITY MODEL APPLICATIONS

Article 8

Requirements of the application

1. A utility model application shall contain only:

- (a) a request for the grant of a utility model;
- (b) a description of the invention;
- (c) one or more claims;
- (d) any drawings referred to in the description or the claims;
- (e) an abstract.

2. A utility model application shall be subject to the payment of a filing fee and, where appropriate, a search fee.

Article 9

Date of filing

The date of filing of a utility model application shall be the date on which documents filed by the applicant contain:

- (a) an indication that a utility model is sought;
- (b) information identifying the applicant;
- (c) a description and one or more claims.

Article 10

Designation of the inventor

The utility model application shall designate the inventor. If the applicant is not the inventor or is not the sole inventor, the designation shall contain a statement indicating the origin of the right to the utility model.

Article 11

Unity of invention

The utility model application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept.

Article 12

Disclosure of the invention

The utility model application must disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art.

Article 13

The claims

The claims shall define the matter for which protection is sought. They shall be clear and concise and be supported by the description.

Article 14

The abstract

The abstract shall merely serve for use as technical information. It may not be taken into account for any other purpose, in particular not for the purpose of interpreting the scope of the protection sought nor for the purpose of applying Article 5(3).

Article 15

Examination as to formal requirements

1. The competent authority with which a utility model application has been lodged shall examine whether the application satisfies the formal requirements of Articles 8 and 10 and shall check whether it contains a description and an abstract.
2. If a date of filing cannot be accorded, the competent authority shall give the applicant an opportunity to correct the deficiencies in accordance with such conditions and within such period as it may fix. If the deficiencies are not remedied in due time, the application shall not be dealt with as a utility model application.
3. The competent authority referred to in paragraph 1 shall not carry out any examination to establish whether the requirements of Articles 5, 6 and 7 have been met.

Article 16

Search report

1. If a utility model application has been accorded a date of filing and is not deemed to have been withdrawn, the competent authority with which the application has been lodged shall, at the request of the applicant or any other interested party and at their own cost, draw up on the basis of the claims a

search report covering the relevant state of the art, with due regard to the description and any drawings.

2. The competent authority with which the application has been lodged may entrust the task of drawing up the search report to any authority which it considers competent to do so.
3. Immediately after it has been drawn up, the search report shall be transmitted to the applicant together with copies of any cited documents. The search report shall be made available to the public as part of the documentation accompanying the granting of the utility model.
4. In the provisions which they adopt in order to comply with this Directive, Member States shall provide that a search report is compulsory in the event of legal proceedings being brought to enforce the rights conferred by the utility model, unless it has already been the subject of a previous search report.

Article 17

Priority right

1. Any person who has duly filed an application for a utility model or a patent in or for one of the Member States, such State being a party to the Paris Convention for the Protection of Industrial Property, or his successors in title, shall enjoy, for the purpose of filing a utility model application in respect of the same invention in one or more other Member States a right of priority during a period of twelve months from the date of filing of the first application.
2. Any filing that is equivalent to a regular national filing under the domestic law of the Member State where it was made or under bilateral or multilateral agreements shall be recognised as giving rise to a right of priority.
3. By a regular national filing is meant any filing that is sufficient to establish the date on which the application was filed in the Member State concerned, whatever may be the outcome of the application.

Article 18

Internal priority and transformation

1. Any person who has duly filed a patent application in a Member State shall enjoy a right of priority during a period of twelve months for the purpose of filing a utility model application or changing his patent application into an application for a utility model in the same Member State in respect of the same invention, unless priority has already been claimed for the patent application.
2. The provisions of Article 17(2) and (3) shall apply *mutatis mutandis*.

CHAPTER IV

EFFECTS OF THE UTILITY MODEL

Article 19

Duration of protection

1. The duration of the utility model shall be six years from the date of filing of the application.
2. Six months before the period indicated in paragraph 1 elapses, the right-holder may submit to the competent authority an application for renewal of the utility model for a period of two years. This renewal shall not be granted unless a request for a search report has been made in respect of the invention concerned.
3. Six months before the period indicated in paragraph 2 elapses, the right-holder may submit a second and last application for renewal for a maximum period of two years.
4. In no circumstances may utility model protection last for more than ten years from the date of filing of the application.

Article 20

Rights conferred

1. Where the subject-matter of a utility model is a product, the utility model shall confer on its proprietor the right to prevent third parties not having his consent from making, using, offering for sale, selling, or importing for these purposes that product.
2. Where the subject-matter of a utility model is a process, the utility model shall confer on its proprietor the right to prevent third parties not having his consent from using the process and from using, offering for sale, selling, or importing for these purposes at least the product obtained directly by that process.
3. The rights conferred by a utility model in accordance with paragraphs 1 and 2 shall not extend to:
 - (a) acts done privately and for non-commercial purposes;
 - (b) acts done for experimental purposes relating to the subject-matter of the protected invention.
4. The proprietor of or applicant for a utility model shall have the right to assign, or transfer, the utility model or application by any legally recognised means and to conclude licensing agreements.

5. Member States may provide limited exceptions to the exclusive rights conferred by a utility model, provided that such exceptions do not unreasonably conflict with a normal exploitation of the utility model and do not unreasonably prejudice the legitimate interests of the proprietor of the utility model, taking account of the interests of third parties.
6. Where the law of a Member State allows for use of the subject-matter of a utility model other than that allowed under paragraph 5 without the authorisation of the right-holder, including use by the government or third parties authorised by the government, the provisions applicable to patents for similar use shall be complied with.
7. The right conferred by the utility model shall take full effect at the time when the grant is published.

Article 21

Community exhaustion of rights

1. The rights conferred by a utility model shall not extend to acts concerning a product covered by that utility model which are done after that product has been put on the market in the Community by the right-holder or with his consent.
2. The rights conferred by a utility model shall, however, extend to acts concerning a product covered by that utility model which are done after that product has been put on the market outside the Community by the right-holder or with his consent.

Article 22

Relationship with other forms of protection

The provisions of this Directive shall be without prejudice to any provisions of Community law or of the law of the Member State concerned relating to design rights, other distinctive signs, copyright, patents, typefaces, topography of semi-conductor products, civil liability or unfair competition.

CHAPTER V

DUAL PROTECTION, LAPSE AND REVOCATION

Article 23

Dual protection

1. The same invention may form the subject-matter, simultaneously or successively, of a patent application and a utility model application.
2. A utility model which has been granted shall be deemed to be ineffective where a patent relating to the same invention has been granted and published.

3. Member States shall take appropriate measures to prevent the proprietor, in the event of his rights being infringed, from instituting successive proceedings under both protection regimes.

Article 24

Lapse

A utility model shall lapse:

- (a) at the end of the period laid down in Article 19;
- (b) if its proprietor surrenders it;
- (c) if the fees referred to in Article 8(2) have not been paid in due time.

Article 25

Revocation

1. An application for revocation of a utility model may be filed only on the grounds that:
 - (a) the subject-matter of the utility model is not protectable pursuant to Articles 1(1) and 3 to 7 of this Directive;
 - (b) the utility model does not disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art;
 - (c) the subject-matter of the utility model extends beyond the content of the utility model application as filed;
 - (d) the protection conferred by the utility model has been extended.
2. If the grounds for revocation affect the utility model only partially, revocation shall be pronounced in the form of a corresponding limitation of the utility model. If the national law permits, the limitation may be effected in the form of an amendment to the claims, the description or the drawings.

Article 26

Secondary application

In the absence of specific provisions applicable to utility models, these shall be governed, mutatis mutandis, by the provisions laid down for patents for invention provided they are not incompatible with the specific characteristics of utility models.

CHAPTER VI

FINAL PROVISIONS

Article 27

Transposal

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive not later than two years after the date of its publication in the Official Journal of the European Communities. They shall immediately inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by the Member States.

2. Member States shall inform the Commission of the main provisions of national law which they adopt in the field governed by this Directive.

Article 28

Monitoring of the Directive

Within three years of the deadline for transposal laid down in Article 27, the Commission shall inform the European Parliament and the Council of the results of the application of the Directive and whether it should be adapted in order to safeguard, in the context of utility models, the proper functioning of the internal market and innovation by Community undertakings. It shall also propose any measures it deems necessary to improve it.

Article 29

Entry into force

This Directive shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Communities.

Article 30

Addressees

This Directive is addressed to the Member States.

COMMISSION OF THE EUROPEAN COMMUNITIES

Proposal for a

EUROPEAN PARLIAMENT AND COUNCIL DIRECTIVE

approximating the legal arrangements for the protection of inventions by utility model

(presented by the Commission)

EXPLANATORY MEMORANDUM

INTRODUCTION

PART ONE: BRINGING ABOUT A SINGLE MARKET IN THE PROTECTION OF INVENTIONS BY UTILITY MODEL

- A. Harmonising national rules on utility model protection
- B. Introducing rules on utility model protection in those countries where there are none
- C. Facilitating the free movement of goods
- D. Avoiding distortions of competition in the single market
- E. The need for action at Community level

PART TWO: ECONOMIC NEEDS IN THE LIGHT OF THE COMMUNITY OBJECTIVES

- A. The economic significance of utility model protection
 - 1. Utilisation of the utility model in the Community and the reasons therefor
 - 2. The significance of utility models compared with patents
 - 3. The significance of utility model protection by reference to the size of the firm or industry
- B. Enhancing the competitiveness of firms and promoting research and development
 - 1. The utility model and the competitiveness of firms
 - 2. Innovation

PART THREE: THE INTERESTS AT STAKE AND FORESEEABLE TRENDS

- A. The position with regard to industrial companies and independent inventors
- B. Changes in product life cycles, times to market and the lifetimes of inventions
- C. Changes in spending on research and development

PART FOUR: THE ACTION PROPOSED

- A. The utility model in practice
- B. Legal basis

PART FIVE: EXAMINATION OF THE PROVISIONS

EXPLANATORY MEMORANDUM

INTRODUCTION

- 1 A utility model is a registered right which confers exclusive protection for a technical invention. It resembles a patent in that the invention must be new it must possess “novelty” and must display a measure of inventive achievement it must involve an “inventive step”, though generally the level of inventiveness required is not as great as it is in the case of patents. Unlike patents, utility models are granted as a rule without a preliminary examination to establish novelty and inventive step. This means that protection can be obtained more rapidly and cheaply, but that the protection conferred is less secure.
- 2 In July 1995 the Commission presented a Green Paper on the protection of utility models in the single market.¹ The purpose of the Green Paper was to stimulate a wideranging debate on the need for Community action in this area given the impact which differences between national laws have on the smooth functioning of the single market, and to propose various options from which the Commission might choose in the light of the comments made.
- 3 Community action in this field would first of all make it possible to make the free movement of goods resulting from minor technical inventions in the Community more transparent and prevent differences between national laws or the lack of such laws from causing distortions of competition. Secondly, such action would improve the legal environment for Community firms, engaged as they are in an ongoing process of innovation and adaptation, and thus enhance their competitiveness in the world market through the protection of their inventions by utility model a device particularly attuned to serving the needs of small and mediumsized enterprises (SMEs).
- 4 This initiative is one of the measures envisaged in the first action plan for innovation in Europe, which was presented by the Commission in November 1996² with a view to establishing a framework favourable to innovation. It is stated in that action plan that the Commission will decide in the light of comments on its Green Paper on utility models whether to propose Community legislation in this field.
- 5 All the interested circles have played an active part in the debate. Nearly 90 contributions have been sent in response to the Green Paper, a sign of how

¹ Document COM(95) 370 final of 19 July 1995.

² “Innovation for growth and employment”, Document COM(96) 589 final of 20 November 1996, point 2.6.

important this issue is to all concerned. The European Parliament and the Economic and Social Committee have also made known their views on the subject. Hearings have been held by the Commission, including one attended by European trade associations on 23 September 1996 and another attended by Member States' experts on 4 November 1996, to assess the need for a Community initiative on utility models and to identify the content of such an initiative.

- 1 The exercise has revealed a real need for the protection of inventions by utility model in the Community, especially in certain industries (e.g. toy manufacture, clock and watchmaking, optics, microtechnology and micromechanics) and on the part of SMEs, patent protection being unsuited to certain types of invention such as minor technical inventions.
- 2 The majority of business circles concerned have come out in favour of a Community initiative in this field consisting in a harmonisation of national laws, including the introduction of a system of utility model protection in those Member States where there is none.

PART ONE: BRINGING ABOUT A SINGLE MARKET IN THE PROTECTION OF INVENTIONS BY UTILITY MODEL

A. HARMONISING NATIONAL RULES ON UTILITY MODEL PROTECTION

- 1 The primary objective of this proposal is to harmonise at Community level the effective protection afforded to technical inventions by national laws and in so doing to ensure the smooth functioning of the single market. Such inventions are currently covered by different protection rules where indeed such rules exist from one Member State of the Community to another.
- 2 These differences between protection arrangements, including the lack of any protection in some Member States, may discourage an inventor or a small firm from seeking protection in other Member States. The table below shows, for the period 1987/90 and for a few selected Member States, the average annual number of utility model applications from residents in the home country compared with the number of applications from other EC countries.³

	Applications from residents	Applications from nonresidents
Germany	13 608	1 494
Belgium	177	73
Spain	3 519	394
Greece	269	57
Portugal	56	45

(Source: Industrial Property Statistics, publications A and B, WIPO, and Belgian Patent Office)

According to a survey of businesses and independent inventors carried out as part of a general survey by the Ifo Institute of the economic impact of utility

³ There are no data on Greece for 1987, the utility model having been introduced in that country that year by Law No 1733/1987.

model protection in the European Union,⁴ the fact that the number of applications from other Member States is so small is due to the difficulties standing in the way of

⁴ Survey by the Ifo Institute of the economic impact of utility model protection in the European Union, Munich, May 1994.

crossborder applications. The differences between laws are so many administrative hurdles to be cleared by applicants, with difficulty in the case of independent inventors and SMEs, and they thus hamper industrial innovation and the completion of the single market.

- 1 Harmonisation will make it possible for equivalent national systems of utility model protection to coexist. A person applying for a utility model will be assured of finding an equivalent property right in the other Member States and will no longer come up against different sets of rules. If he seeks protection in another Member State, he will know what its scope is and what essential requirements have to be met in order to qualify for such protection. Harmonisation will also make it possible to reduce costs and simplify applications for protection in other Member States.
- 2 The approximation of national laws must necessarily include substantive provisions defining the scope of the present proposal and governing the matter for which protection is sought, the conditions with which applications must comply, the extent and duration of the protection, the exhaustion of rights and the grounds for lapse and revocation. The approximation of these provisions will help to reduce the number of conflicts and the resulting damage to the single market.

B. INTRODUCING RULES ON UTILITY MODEL PROTECTION IN THOSE COUNTRIES WHERE THERE ARE NONE

- 1 The approximation of the laws of the Member States of the Community will oblige those Member States which have no system of protection of inventions by utility model to endow themselves with this form of protection. This will be the case with the United Kingdom, Luxembourg and Sweden.
- 2 A survey of British firms and independent inventors carried out as part of the Ifo Institute's general survey referred to above has revealed the existence of a marked economic interest, especially among SMEs, in this new form of protection, supplementing as it does patent protection.

C. FACILITATING THE FREE MOVEMENT OF GOODS

- 1 Article 3(c) of the EC Treaty provides that the activities of the Community are to include an internal (i.e. single) market characterised by the abolition, as between Member States, of obstacles to, among other things, the free movement of goods. Article 7a of the Treaty provides that the internal market is to comprise an area without internal frontiers in which the free movement of goods is ensured. The national systems for the protection of inventions by utility model produce effects, however, which are entirely confined to the territory of the Member State in respect of which the protection is granted.

- 2 The utility model is a right which forms part of the protection of industrial and commercial property as referred to in Article 36 of the EC Treaty. The Court of Justice of the European Communities has had occasion to interpret Articles 30 and 36 of the EC Treaty in the light of the free movement of goods and has held that, whilst the Treaty does not affect the existence of rights recognised by the legislation of a Member State in matters of industrial and commercial property, the exercise of these rights may nevertheless, depending on the circumstances, be affected by the prohibitions in the Treaty, since derogations from the free movement of goods are admitted of only to the extent that they are justified for the purpose of safeguarding rights which constitute the specific subjectmatter of such property.⁵
- 3 Most Member States have their own system for the protection of inventions by utility model. Others, such as the United Kingdom, Luxembourg and Sweden, have decided to do without utility model protection altogether. These differences between systems of protection are outside the control of the rightholder and force him to avoid markets in which he cannot obtain equivalent protection for his invention.
- 4 The differences between national systems of protection make it more difficult, moreover, to obtain crossborder protection for inventions in the single market. According to a survey of firms and independent inventors carried out as part of the abovementioned general survey by the Ifo Institute, 50% on average of all firms questioned have experienced serious or some difficulties with crossborder applications for utility models in the single market, while 32% fell into the “don’t knows” category, so great are the differences between the various systems.

The extent of protection varies considerably from one national system to another, and an invention which qualifies for protection in one Member State may not qualify, at least not on the same terms, in another. This is the case, for example, with the inventive step, the level of inventiveness required in order that an invention might qualify for utility model protection. Some Member States (e.g. Belgium and France) require the same inventive step as for a patent, while others (Greece, Italy and Spain) are willing to accept a smaller inventive step. But even within those Member States in which a smaller inventive step is acceptable, “smaller” may be interpreted in many different ways. The condition as to novelty likewise does not have the same scope in all Member States. In Spain, for example, novelty is determined by reference to

⁵ See, for example, Case 192/73 *Van Zuylen Frères v Hag AG* [03.07.1974] ECR 731, and Case 15/74 *Centrafarm v Sterling Drug* [31.10.1974] ECR 1147.

the domestic state of the art, while in the other Member States the criterion adopted is that of the international state of the art, albeit with restrictions in some cases (Germany and Portugal).

The same applies to the duration, or term, of protection. This may be six years (e.g. Belgium and France), seven years (Greece), eight years (Finland), ten years (e.g. Austria, Denmark and Germany) or more (e.g. in Portugal, where the term is renewable indefinitely). This means that an invention may no longer be protected in one Member State, whereas in another it continues to enjoy protection for a longer period.

Procedure, including the application procedure, also differs from one Member State to another. In some cases, a preliminary examination is carried out to check for novelty and inventive step (Belgium and France), while in most other cases the only check that is carried out is one to ensure that the formal conditions for protectability are satisfied. All this uncertainty acts as a brake on the free movement of goods in the single market.

- 1 The differences which exist between national protection systems thus have an indirect effect on trade between Member States and on firms' capacity to treat the single market as just that, a single setting in which to do business. This state of affairs leads to a lack of transparency, and it does nothing to make the movement of goods any freer.

D. AVOIDING DISTORTIONS OF COMPETITION IN THE SINGLE MARKET

- 1 Article 3(g) of the EC Treaty calls for the establishment of a system ensuring that competition in the internal market is not distorted. This objective ties in with the phrase in Article 2 which requires "a harmonious and balanced development of economic activities" throughout the Community. If businesses are to take advantage of the fundamental freedoms laid down in the Treaty, the intellectual property rules must allow fair competition between them.
- 2 For businesses, and in particular for independent inventors and SMEs, the differences which exist at present between national protection systems and the consequent need for legal or expert advice are a source of administrative difficulty and a major cost factor. This restricts innovative activity on the part of businesses, isolates them and distorts competition. It may well be that businesses define their commercial policy in Member States' domestic markets on the basis of the protection their products are

afforded there. From the consumer's point of view, it follows that the products resulting from technical inventions may not be available throughout the Community.

The differences mentioned in point 16 also have a direct impact on competition in the single market.

- 1 In those Member States which require the same inventive step for a utility model as for a patent, adequate protection is unavailable for inventions incorporating only a small inventive step with the result that products may be copied or imitated with impunity. The position is even worse in those Member States where there is no utility model protection.
- 2 Copies and imitations are as a rule cheaper to make than the originals on which they are based. In those Member States in which the level of protection is low or nonexistent, a copy or an imitation may therefore have a bigger share of the market than the original. And in those countries where there is a high level of protection, it may well be that, as the single market becomes more and more integrated, counterfeit goods may be imported more easily.
- 3 This state of affairs is incompatible with the Community's objective of shielding the rights stemming from the creative efforts of European researchers and inventors and the substantial investment carried out by European businesses in this area from infringement by third parties. It, too, distorts competition. To restore the balance, businesses operating in the single market must be assured of a level playing field.

E. THE NEED FOR ACTION AT COMMUNITY LEVEL

- 1 There is a need among business circles, and especially among certain sectors of industry and SMEs, for protection at Community level of technical inventions by utility model. This need cannot be satisfied by action taken solely at the level of each Member State. Harmonisation of Member States' laws at Community level is therefore necessary. This will make it possible for one and the same invention to be protected in an identical manner throughout the Community.
- 2 In accordance with the principle of proportionality laid down in Article 3b of the EC Treaty, however, the measures envisaged must be proportionate to the primary objective pursued, namely that of making the functioning of the single market more transparent. The harmonisation of national laws, including the introduction of a

system of protection in those Member States where none yet exists, will therefore not have to cover every aspect of national laws affording inventions protection by utility model, but instead will have to be confined to approximating those essential provisions which have the most direct impact on the functioning of the single market.

- 1 The aim is not therefore to create, at Community level, a Community right to utility model protection which would make it possible to obtain protection for one and the same territory covering all Member States through a single application to a common office in accordance with a single procedure and a single law. Nor is the aim to introduce mutual recognition of national systems whereby a utility model registered in one Member State can produce effects in the other Member States if the applicant so requests. Both these approaches aroused only limited interest on the part of the sectors of business and industry concerned in the course of the consultation exercise set in train by the Commission with the Green Paper.

PART TWO: ECONOMIC NEEDS IN THE LIGHT OF THE COMMUNITY OBJECTIVES

A. THE ECONOMIC SIGNIFICANCE OF UTILITY MODEL PROTECTION

1. Utilisation of the utility model in the Community and the reasons therefor

- 1 The rate of utilisation of the utility model in the Community is a good instrument for measuring its economic significance to businesses. As far as national applications for protection are concerned, the number of applications in those countries which have a system of protection requiring a small inventive step is higher than in those countries which require the same inventive step as for a patent (e.g. 12 000 annual applications on average in Germany compared with only a few hundred a year in France). As far as crossborder applications are concerned, their number is very small owing to the difficulties caused by the heterogeneous nature of the various utility model systems in the Community.
- 2 As regards possible trends in the behaviour of applicants for utility models in the Community, a survey of patent agents carried out as part of the abovementioned general survey by the Ifo Institute has shown that an increase in applications for protection is likely in the event of the law in force being fundamentally changed. Simplification of the conditions for obtaining protection would lead in particular to more frequent recourse to the utility model irrespective of the size of the business concerned.

The sounding of opinions among the business community carried out by the Commission on the basis of the Green Paper has revealed, moreover, that there is a real economic need for the protection of technical inventions by utility model, especially on the part of SMEs and in certain industries (e.g. toy manufacture, clock and watchmaking, etc.).

- 1 The reasons given for seeking utility model protection, these being the features of this form of protection, are as follows:
 - quick, simple registration: an applicant has to wait an average of six months for a utility model compared with anything from two to four years for a patent, because as a rule no examination has to be carried out to establish novelty and inventive step. This enables, firstly, the applicant to be protected within a short space of time against copies and imitations, thereby consolidating the competitive position

of businesses, in particular SMEs, and helping to improve the quality of their products, especially capital and consumer goods, through marketing. Secondly, rapid registration may lead to rapid commercialisation of the invention, whether under licence or by the applicant himself.

- Flexible conditions for obtaining protection: whereas in the case of a patent the invention must involve an inventive step and be absolutely new, most utility model systems require a different level of inventiveness and less than absolute novelty (e.g. in Spain, where only the domestic state of the art is taken into account), with the result that the requirements for obtaining a utility model are more flexible and less stringent. The lower inventive step requirement is an important reason for seeking utility model protection as this makes it possible to cover inventions representing small technological advances, these being important not only to SMEs but also to large firms.
- Low cost: unlike patents, utility models are granted without any preliminary examination to establish novelty and inventive step. This makes them cheaper to obtain than patents. This is especially important to firms seeking to protect themselves as comprehensively as possible against the danger of copying and imitation, as they have to apply for a large number of utility models. Cost is also a decisive factor in the case of inventions the commercial success of which is uncertain. This is especially true in the case of SMEs, which tend not to have enough information on markets to be able to gauge the sales prospects of new products, whereas big companies can make use of tried and tested planning and forecasting machinery to help them limit the risk of failure.
- Temporary protection pending the grant of a patent: rapid registration means that a utility model can be used to bridge the relatively long period which passes before a patent, involving as it may a preliminary examination, is granted, always supposing that the invention qualifies for both forms of protection. Temporary protection is useful mainly in countries where a comprehensive examination is carried out in order to establish novelty and inventive step before a patent is granted and where the procedure is therefore fairly long.

2. The significance of utility models compared with patents

- 1 The significance of national systems of protection by utility model as compared with protection by patent depends primarily on the way the system is designed. A comparison of figures for applications for national patents (not registered with the European Patent Office), European patents and utility models in four Member States of the Community for the period 1987-91, except in the case of Italy where the only figures available were those for the period 1987-89 concerning applications for national patents and utility models (see table below), shows that, in those countries where the inventive step required for a utility model is smaller than what is needed for a patent (e.g. Germany, Italy and Spain), the number of applications for utility model protection is greater than in those countries where the inventive step requirement is the same as that for a patent (e.g. France).

Number of applications for patents/utility models by country selected	Applications for national patents	Applications for European patents	Applications for utility models
Germany	88 271	55 672	61 057
Spain	7 306	1 017	17 260
France	31 209	22 350	1 771
Italy	10 369	9 927	10 890

(Source: European Patent Office, Epidos/Inpadoc, position at 9.7.1993; Ifo patent statistics; and Ifo Institute Calculations)

- 1 This state of affairs is due to the fact that, in the systems where the inventive step looked for is smaller, the requirements which must be satisfied in order to qualify for protection are lower. Each of the two types of right therefore has its own *raison d'être*.
- 2 Utility model systems with the same requirements as patents have less appeal because they are in competition with patents, which many applicants prefer because of their greater security.

3. The significance of utility model protection by reference to the size of the firm or industry

- 1 Utility model protection is not equally important to all firms: it depends where the

firm's interests lie. A study carried out in Germany,⁶ but whose findings are applicable to all Member States of the Community, has shown that, while large firms with a turnover in excess of ECU 1.25 billion are interested in the utility model, there is higher demand for utility models among firms with an annual turnover of less than ECU 5 million. The interest shown by SMEs⁷ is due primarily to the savings in terms of cost, time and administration.

- 1 Owing to their limited financial and human resources, such firms' research and development activities often result in technical inventions involving a small inventive step which do not necessarily satisfy the requirements for patent protection. More often than not the inventions amount to technical improvements which, by their number and interaction, have just as big an impact as inventions proper on the technology used in the sector concerned.
- 2 According to studies⁸ carried out on the basis of utility model applications in the Community, the utility model is used in a number of industrial sectors in which there is a permanent need for innovation, especially in the form of minor technical inventions. The main sectors concerned are mechanical engineering, electrical engineering, precision instruments and optics and the automotive industry.

B. ENHANCING THE COMPETITIVENESS OF FIRMS AND PROMOTING RESEARCH AND DEVELOPMENT

1. The utility model and the competitiveness of firms

- 1 Clearly, a sustained inventive activity places firms at an advantage technologically and is an important factor from the point of view of their competitiveness. For a number of years now, the competitiveness of firms has been at the forefront of European policy. The capacity to innovate as a catalyst of competitiveness has

⁶ Study of the problems of the German patent system in relation to the innovative activities of industry, carried out in 1989 by the Ifo Institute for the Federal Ministry of Economic Affairs.

⁷ Commission Recommendation No 96/280/EC of 3 April 1996 concerning the definition of small and medium-sized enterprises defines SMEs as being enterprises which have fewer than 250 employees and have either an annual turnover not exceeding ECU 40 million or an annual balance sheet total not exceeding ECU 27 million, and which are not owned as to 25% or more of the capital or the voting rights by one enterprise or jointly by several enterprises falling outside the definition of an SME or a small enterprise (OJ No L 107, 30 April 1996).

⁸ European Patent Office, Vienna Suboffice, position at 8 January 1993, and survey of firms in Denmark, *AIPPI Yearbook* 1986, 14.

formed an integral part of European industrial policy since the early 1990s.⁹

- 1 Looked at from this point of view, owing to the features which distinguish it from the patent, such as the speed and simplicity of filing applications for protection, the utility model is an independent instrument of competitiveness at the service of firms, in particular SMEs, helping to safeguard or improve their market position and facilitate the economic and commercial exploitation of technical inventions.
- 2 The vast majority of industrial firms and independent inventors have indicated, in response to a survey carried out in a number of selected Member States as part of the abovementioned general survey by the Ifo Institute, that, among the positive effects of the utility model, an improved market position clearly occupies pride of place irrespective of company size. Business people are aware that they can hold on to a competitive lead only if they are able to keep their competitors from copying or imitating them for a certain time through effective legal protection measures such as the utility model.

Through their innovations in products and processes, they seek to display originality and to distance themselves from the competition, so that customers develop a positive image of their technological capability. The protection of inventions by utility model may thus help to strengthen the competitive position of European businesses in the world market.

2. Innovation

- 1 Innovation,¹⁰ in the sense of a number of technical improvements, is vital to industrial enterprises. Firms must constantly improve or renew their products if they are to keep or increase market shares. The development of new products improves firms' competitiveness regardless of the industrial sector concerned. The innovative activity of the European Community is not at present exploited sufficiently compared with that of its main trading partners, the United States and Japan. In the European Community, the share of GDP devoted to research, industry's research expenditure,

⁹ See e.g. Commission Communication to the Council and the European Parliament of 16 November 1990 on industrial policy, document COM(90) 556 final.

¹⁰ See the Commission's Green Paper on innovation, document COM(95) 688 final.

research expenditure per head of population, and the total number of research workers compared with the active population are lower than in Japan and the US.

The protection of inventions by utility model is a significant means of promoting technical innovation within European firms. As the European Parliament has stated:¹¹ “Legal protection of industrial property promotes innovative activity in the EU. It is important to ease the way from idea to product”.

- 1 While large firms do not consider that inventive activities can be developed much further beyond the mere renewal of products and that product life cycles cannot be shortened, SMEs, on the other hand, acknowledge that they must step up their inventive activities if they are to face up to the stiffer competition. Utility model protection therefore seems suited to small technological advances with a relatively short lifetime which are likely to develop in future. SMEs, which account for more than 99% of all European firms, 66% of all jobs and 65% of turnover in the European Community, will be the first to benefit.

¹¹ Report on the Green Paper presented by the Commission on the protection of utility models in the single market, document EP 214.304/def. of 26 June 1996.

PART THREE: THE INTERESTS AT STAKE AND FORESEEABLE TRENDS

A. THE POSITION WITH REGARD TO INDUSTRIAL COMPANIES AND INDEPENDENT INVENTORS

1 In a survey carried out in 1993 in five Member States of the Community, companies and independent inventors showed considerable interest in a specific form of protection for their minor technical inventions supplementing patent protection but subject to less stringent conditions, involving no preliminary examination and being less costly and of shorter duration (see table below).

Interest in utility model protection (as a percentage of the replies received)				
	Considerable	Moderate	Little	Don't know
By selected Member State				
Germany	46	30	16	8
Spain	41	25	12	22
France	22	51	13	13
Italy	26	42	19	13
United Kingdom	32	25	34	9
By size of firm				
Up to 100 employees	41	34	12	13
101 - 500 employees	48	28	17	7

501 - 1 000 employees	29	37	24	10
Over 1 000 employees	27	32	38	3
All classes	39	32	20	9

(Source: Ifo Institute survey in selected EU countries in 1993; European Commission calculations, 1994)

- 1 It is clear from this table that a fairly strong need is felt by firms for protection of this type. On average 39% of the firms questioned said they would be very interested, 32% said they would be moderately interested, and only 20% would have little interest. The breakdown by size of firm shows that interest in such protection is greatest among firms with up to 500 employees, while interest is somewhat lower among companies with over 1 000 employees.
- 2 The survey also shows that, regardless of what sales they may have at present in the single market, industrial companies and independent inventors want at least to keep open the option of expanding their market in the future, and are to a large extent interested in EUwide utility model protection for that reason.

B. CHANGES IN PRODUCT LIFE CYCLES, TIMES TO MARKET AND THE LIFETIMES OF INVENTIONS

- 1 Major changes are likely to occur in the near future, making it even more necessary to seek flexible forms of protection such as that by utility model. Product life cycles are shrinking worldwide, that is to say timelags between invention, marketing and the next generation of products are growing shorter. This shortening of product life cycles creates a need for rapidly obtainable protection; it is less important that the protection obtained should last for a long time, except in a number of industries such as pharmaceuticals.

In Japan, this phenomenon manifests itself in a special way. According to a survey by the Japan Institute of Intellectual Property,¹² the marketing of articles protected by utility model very often begins in the interval between application and publication. In the United States, according to a survey by the US Patent Office,¹³

¹² *Questionnaire relating to Legal Protection of the Fruits of R&D*, Japan Institute of Intellectual Property, 1991.

¹³ *Business Week, Science & Technology*, 3 August 1992, CHI Research Inc.

there is a tendency for new inventions to be developed more rapidly in all industries apart from fuel, food, chemicals and pharmaceuticals. The average lifetime of an invention today is not more than six years.

- 1 If one tries to bring these shorter product life cycles and invention lifetimes into relation with the industries which make most use of utility model protection (e.g. mechanical engineering, electrical engineering and the automotive industry), one finds a striking degree of correlation. It takes on average four years to obtain a

European patent. If we compare this figure with the average lifetime of inventions, we can conclude that demand for a form of protection which can be obtained quickly for shortlived inventions, separately from patent protection, will increase. The utility model provides the best way of meeting this demand.

C. CHANGES IN SPENDING ON RESEARCH AND DEVELOPMENT

- 1 Research and development (“R&D”) has become a focus of economic research. However, a survey of companies and independent inventors carried out as part of the abovementioned general survey by the Ifo Institute suggests that, especially in the case of hightech industries and big companies, R&D spending will increase little in future. Thus in mechanical engineering, vehicles and accessories, electrical engineering, precision instruments and optics and medical engineering, between 50% and 58% of respondents felt that the level of R&D spending would remain the same. Given the intensive efforts to cut costs currently being made in all branches of industry, a stable level of R&D spending is nevertheless to be welcomed.
- 2 There is, however, scope for increasing R&D spending, for example in the packaging and materials handling industry, in the wood products and furniture industry, and among manufacturers of domestic appliances. The inventions which will be made as a result will require suitable protection. This trend suggests that utility model protection will indeed grow more important in future.

PART FOUR: THE ACTION PROPOSED

A. THE UTILITY MODEL IN PRACTICE

- 1 A utility model is a registered right which confers exclusive protection for a technical invention. It differs from a design right in that the latter protects the external form of an object and not the underlying invention. It resembles a patent in that the invention must be new it must possess “novelty” and must display a measure of inventive achievement it must involve an “inventive step”, though generally the level of inventiveness required is not as great as it is in the case of patents. Unlike patents, utility models are granted without a preliminary examination to establish novelty and inventive step. This means that protection can be obtained more rapidly and cheaply, but that the protection conferred is less secure.

However, as the European Parliament has stated,¹⁴ “the imperfect legal certainty inherent in utility model protection should not be considered as an obstacle to its introduction in Community law given that the advantages of this protection outweigh its inconveniences”.

- 1 Utility model protection is at present entirely a matter of domestic law. In three Member States (the United Kingdom, Luxembourg and Sweden) no form of utility model protection exists. The other Member States, where such protection does exist, have different systems, which call the rights they confer by a variety of names: “utility model”, “utility certificate”, “sixyear patent”, “shortterm patent”, “petty patent”, “utility model certificate”, etc. As one might imagine from the range of terms used, the systems diverge widely, but they all provide protection for technical inventions alongside what is available under patent law. All the schemes in existence are intended to boost the innovative capacity of companies.
- 2 These differences between national systems are inconsistent with the objectives of free movement of goods and undistorted competition in the single market, and they discourage innovative activity in European companies. A high level of innovative activity gives a business a technological advantage, which is an important factor in its competitiveness.

¹⁴ Report on the Green Paper presented by the Commission on the protection of utility models in the single market, document EP 214.304/def. of 26 June 1996.

- 1 Interest in the protection of inventions by utility model has increased in the Community in recent years. A system of protection was thus introduced recently in five Member States of the Community (Ireland, Denmark, Greece, Austria and Finland), with the result that there is now such a system in twelve of the fifteen Member States.
- 2 This proposal for a Directive seeks to harmonise the basic rules governing *inter alia* the protectable matter, the requirements for protectability, and the extent and duration of protection; it does not introduce any single set of filing arrangements or provide for the setting up of a body with special responsibility for granting utility models at Community level. It does mean, however, that those Member States which do not yet have any system of utility model protection will have to introduce one into their domestic law.

The requirement that an invention must be embodied in threedimensional form, such as is to be found in some national protection systems (e.g. Finland, Greece, Italy, Portugal and Spain), has not been included as it does not correspond to present needs. This makes it possible to bring processes within the scope of the proposal. Biological material, chemical or pharmaceutical substances and inventions involving computer programs are expressly excluded from protection by the Directive itself.

- 1 As a result of the harmonisation, an applicant for a utility model will be sure to find an equivalent property right in every Member State and will no longer be confronted with a multitude of different regulations. If he seeks protection in another Member State, he will already be familiar with the basic requirements for obtaining it and with its scope. The arrangements will help to reduce costs and simplify applications for protection in other Member States, and in so doing stimulate innovation.
- 2 In order to limit the lack of legal certainty due to the granting of too many rights without any preliminary examination to establish novelty and inventive step, this proposal contains a list of exclusions from protectability comprising *inter alia* biological material, chemical or pharmaceutical substances or processes and computer programs. It places a limit on the duration of protection and provides for the drawing up of a search report at the applicant's request or, where a Member State so provides, in the event of legal proceedings being brought to enforce the rights conferred by the utility model. It does not rule out the possibility for Member States to provide for the payment of a larger fee for renewal of the property right.

B. LEGAL BASIS

- 1 The maintenance of different national systems of utility model protection in the Community is likely to hinder the free movement of goods and distort competition in the single market. Approximation of the basic national rules governing utility models will help to make the functioning of the single market more transparent, encourage innovation and technical progress at Community level and promote the movement of goods between Member States.
- 2 A harmonisation of national laws also reflects the interest shown by the sectors of business and industry concerned, which are largely in favour of harmonising national laws on utility model protection by means of a directive and introducing a system of protection in those Member States where one does not yet exist.
- 3 The Commission proposes that Article 100a of the EC Treaty be taken as the legal basis for this proposal. This was done in the case of other directives aligning national laws on intellectual and industrial property.¹⁵ This choice of legal basis has been sanctioned by the Court of Justice on a number of occasions.¹⁶

¹⁵ See e.g. Directive 89/104/EEC approximating the laws of the Member States relating to trade marks (OJ No L 40, 11.2.1989, p. 1); Directive 93/98/EEC harmonising the term of protection of copyright and certain related rights (OJ No L 290, 24.11.1993, p. 9); and Directive 96/9/EC on the legal protection of databases (OJ No L 77, 27.3.1996, p. 20).

¹⁶ See Opinion 1/94, Competence of the Community to conclude international agreements concerning services and the protection of intellectual property [15.11.1994] ECR I5267, and Case C350/92 *Spain v Council* [13.07.1995] ECR I1985.

PART FIVE: EXAMINATION OF THE PROVISIONS

- 1 The various national systems of utility model protection include provisions based on national patent law which correspond to the provisions of the European Patent Convention. For the sake of consistency, a number of articles in this proposal are also based on the corresponding provisions of that Convention.

Article 1

- 1 The concept of utility model must be clearly defined by reference to the various concepts employed in the Member States. It should be noted, however, that the Belgian and Dutch terms used are not the official ones but are taken from draft legislation. The definition will enable Member States to know precisely which domestic provisions are affected by this Directive.

Article 2

- 1 This article determines the proposal's object. The proposal seeks to approximate Member States' laws, regulations and administrative provisions on utility model protection. Those Member States which have no utility model system will accordingly have to introduce one along the lines of this Directive.

Article 3

- 1 This article specifies which inventions are protectable by utility model. Protectable inventions are inventions which are susceptible of industrial application, which are new and which involve an inventive step. The following are not regarded as inventions: discoveries, scientific theories and mathematical methods; aesthetic creations; schemes, rules and methods for performing mental acts, playing games or doing business; and presentations of information.

Article 4

- 1 This article sets out the exclusions from protectability by utility model. Besides the traditional exception concerning public policy and morality, a number of other things are excluded, namely: inventions relating to biological matter; inventions relating to chemical or pharmaceutical substances or processes; and inventions involving computer programs. The exclusion of biological, chemical and pharmaceutical inventions is justified by the fact that such matters, substances or processes call for lengthy preparation before being placed on the market and should therefore be given patent protection, which lasts longer than utility model protection. What is more, these sectors are complex ones in which property rights involving no examination as to novelty or inventive step are out of place. The exclusion of inventions involving computer programs is due to the fact that such inventions are

currently protected either by patent (inventions relating to software) or by copyright (computer programs as such).

Article 5

- 1 This article explains what is meant by novelty. An invention is considered to be new if it does not form part of the state of the art. In keeping with most national utility model systems, the novelty of an invention is to be determined by reference to the international state of the art (absolute novelty). The state of the art comprises everything made available to the public by means of a written or oral description, by use, or in any other way, before the date of filing of the utility model. Additionally, the content of utility model applications as filed, of which the dates of filing are prior to the date of the application for the utility model concerned and which were published on or after that date, are considered as comprised in the state of the art.

Article 6

- 1 This article explains what is meant by inventive step for the purposes of this Directive. Here, an invention is considered as involving an inventive step if, in the utility model application, the applicant indicates clearly and convincingly that, compared with the state of the art, it exhibits either particular effectiveness in terms of, for example, ease of application or use, or a practical or industrial advantage. This wording is designed to cover the wide variety of situations which are provided for in the various national systems and are encountered in practice and which, as a rule, involve a different inventive step from that which is required in the case of a patent. Examples are an invention making it possible to solve a technical problem and an invention relating to the effectiveness or ease of use of a product in that it increases the product's usefulness by making it more effective and easier to use.

Article 7

- 1 This article explains what is meant by an invention "susceptible of industrial application". An invention is so considered if it can be made or used in any kind of industry, including agriculture. Surgical or therapeutic treatment procedures applicable to the human body or the bodies of animals and diagnostic procedures which are carried out on the human body or the bodies of animals are not considered to be inventions susceptible of industrial application.

Article 8

- 1 Paragraph 1 of this article specifies the requirements which must be satisfied by a utility model application. Paragraph 2 stipulates that the application will be subject to the payment of a filing fee and, where appropriate, a search fee. The latter is payable only where a search report is drawn up at the applicant's request. Member States remain free to provide that the fees payable at the end of the first period of validity should be sufficiently high to dissuade utility model proprietors from retaining their rights where these are no longer of any commercial value.

Article 9

- 1 This article concerns the date of filing of a utility model application. The date of filing of the application is the date on which documents filed by the applicant contain an indication that a utility model is sought, information identifying the applicant, and a description and one or more claims.

Article 10

- 1 This article provides that the utility model application must designate the inventor. If the applicant is not the inventor or is not the sole inventor, the designation must contain a statement indicating the origin of the right to the utility model.

Article 11

- 1 This article on unity of invention stipulates that the utility model application must relate to one invention only or to a group of inventions so linked as to form a single general inventive concept.

Article 12

- 1 This article on disclosure of the invention provides that the utility model application must disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art.

Article 13

- 1 This article stipulates that the claims must define the matter for which protection is sought and that they must be clear and concise and be supported by the description. It stipulates, further, that the number of claims must be limited to that which is

strictly necessary having regard to the nature of the invention. This requirement makes it possible to limit the extent of the protection so as to compensate for the lack of any preliminary examination.

Article 14

- 1 This article on the abstract provides that the abstract is to serve merely for use as technical information and that it may not be taken into account for any other purpose such as, for example, interpreting the scope of the protection sought.

Article 15

- 1 This article on examination as to formal requirements provides that the examination must be confined to the formal requirements of Articles 8 and 10 of this Directive and that it may not cover the novelty, inventive step or industrial application of an invention.

Article 16

- 1 This article on the search report stipulates that the search report is to be drawn up only at the request of the applicant and that the task of drawing up the report may be entrusted to any authority deemed competent by the competent authority with which the application has been filed. Member States may provide that a search report is compulsory in the event of legal proceedings being brought to enforce the rights conferred by the utility model.

Article 17

- 1 This article on the priority right is based on paragraphs A and C of Article 4 of the Paris Convention. Any person who has duly filed an application for a utility model or a patent in one of the Member States, such State being a party to the Paris Convention, is to enjoy, for the purpose of filing a utility model application in the other Member States, a right of priority during a period of 12 months from the date of filing of the first application.

Article 18

- 1 This article seeks to permit a person who has filed a patent application, while the procedure is under way and for a limited period, to file in the same Member State, in addition to or in lieu of his patent application, an application for a utility model. This option must, of course, be ruled out where priority has been claimed for the patent application. The general provisions concerning the right of priority are applicable here.

Article 19

- 1 Unlike in the case of patents, where the term of protection is 20 years, the duration of the utility model is fixed at six years from the date of filing of the application. It may be renewed for two successive periods of two years, but may not exceed a maximum period of ten years from the date of filing of the application. The difference compared with the patent is marked in view of the short lifetime of technical inventions and the different level of inventiveness involved.

Article 20

- 1 Paragraphs 1 and 2 concern the rights conferred by the utility model where the protected matter is a product or a process. The provisions are based on Article 28(1) of the Agreement on Trade-related Aspects of Intellectual Property Rights (TRIPs) concluded under the auspices of the World Trade Organisation. Paragraph 3 concerns limitation of the effects of the utility model and is based on the relevant provisions of points (a) and (b) of Article 27 of the Community Patent Convention. Paragraph 4, which is based on Article 28(2) of the TRIPs Agreement, provides that the proprietor of a utility model has the right to assign it or transfer it by succession and to conclude licensing agreements. Paragraph 5 is based on Article 30 of the TRIPs Agreement. It stipulates that Member States may provide limited exceptions to the exclusive rights conferred by a utility model, provided that such exceptions do not unreasonably conflict with a normal exploitation of the utility model and do not unreasonably prejudice the legitimate interests of the proprietor of the utility model, taking account of the interests of third parties. Lastly, paragraph 6 provides that, where the law of a Member State allows for use other than that authorised under paragraph 5 without the authorisation of the rightholder (e.g. in the event of compulsory licences), the provisions applicable to patents for similar use must be complied with. The aim is to render the conditions laid down in Article 31 of the TRIPs Agreement applicable by analogy to utility models.

Article 21

- 1 This article on Community exhaustion of rights incorporates, in paragraph 1, the principle set forth in Article 28 of the Community Patent Convention. The rights conferred by a utility model do not extend to acts concerning a product covered by that utility model which are done after that product has been put on the market in the Community by the rightholder or with his consent. By marketing the protected product in a Member State, the rightholder has been able to benefit from the economic conditions which accompany the exclusivity he enjoys, and he has thus exhausted his parallel rights to protection in the

other Member States. To avoid any ambiguity, paragraph 2 states that the principle of international exhaustion is ruled out, which means that the rights conferred by the utility model do extend to acts concerning a product covered by that utility model after that product has been put on the market outside the Community by the rightholder or with his consent.

Article 22

- 1 Paragraph 1 of this article, which is concerned with dual protection, allows one and the same invention to form the subjectmatter, simultaneously or successively, of a patent application and a utility model application. Such dual protection is worthwhile where the user wishes to obtain temporary protection pending the grant of a patent, where he is not sure that the inventive step is sufficient for a patent, or where he wishes to be particularly well protected by two different systems for the same invention. So as not to place the rightholder in too strong a position, however, Member States may provide that a utility model which has been granted is deemed to be ineffective where a patent relating to the same invention has been granted and published (paragraph 2). Where they avail themselves of this opportunity, the Member States concerned must at least take appropriate measures to ensure that, where his rights are infringed, the rightholder cannot initiate successive proceedings under both sets of protection arrangements (paragraph 3). This provision is intended to prevent successive proceedings from being brought by a rightholder who, having failed to win his patent action, might seek to bring a fresh action on the strength of the utility model, or vice versa.

Article 23

- 1 This article on lapse of the utility model is based on the relevant provisions of Article 50 of the Community Patent Convention. The utility model lapses at the end of the period prescribed, if its proprietor surrenders it, or if the filing fee and any search fee have not been paid in due time.

Article 24

- 1 This article on the grounds for revocation of the utility model is based on the relevant provisions of Article 56 of the Community Patent Convention. An application for revocation may be filed only on the following grounds: the subjectmatter of the utility model is not protectable; the utility model does not disclose the invention in a manner sufficiently clear and complete for it to be carried out by the person skilled in the art; the subjectmatter of the utility model extends beyond the content of the application as filed; and the protection conferred has been extended.

Article 25

- 1 This proposal must be transposed into national law by 31 December 1999. Member States must inform the Commission thereof immediately. When Member States adopt the necessary provisions, these are to contain a reference to this Directive or are to be accompanied by such reference at the time of their official publication. Member States must communicate to the Commission the provisions of national law thus adopted.

Article 26

- 1 This article provides that, in accordance with Article 191(1) of the EC Treaty, the Directive is to enter into force on the twentieth day following that of its publication in the Official Journal of the European Communities.

Article 27

- 1 This article provides that the Directive is addressed to the Member States, including those which do not have any system of utility model protection.

Proposal for a

EUROPEAN PARLIAMENT AND COUNCIL DIRECTIVE

approximating the legal arrangements for the protection of inventions by utility model

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community and in particular Article 100a thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the Economic and Social Committee,

Acting in accordance with the procedure laid down in Article 189b of the Treaty,

Whereas the Treaty commits the Community and Member States to creating the conditions for Community industry to be competitive and to promoting a better exploitation of the industrial potential of innovation, research and technological development policies;

Whereas technical inventions play an important role in that they make available improved, better quality products which are particularly effective in terms of, for example, ease of application or use, or which confer a practical or industrial advantage compared with the state of the art;

Whereas, because of differences between Member States' utility model laws, an invention may not be protected throughout the Community, at least not in the same way or for the same length of time, a state of affairs which is incompatible with a transparent, obstaclefree single market; whereas it is therefore necessary, with a view to the establishment and proper functioning of the single market, to approximate Member States' laws in this area;

Whereas it is important in this context to employ every possible means of increasing the competitiveness of Community industry in the field of research and development;

Whereas small and mediumsized firms play a strategic role in relation to innovation and rapid response to market requirements;

Whereas there is a need for placing at the disposal of firms, and in particular small and mediumsized firms and researchers, an instrument which is cheap, rapid and easy to evaluate and apply;

Whereas utility model protection is better suited than patent protection to technical inventions involving a specific level of inventiveness;

Whereas technical inventions should be suitably protected throughout the Community;

Whereas, in accordance with the principle of proportionality, the approximation may be limited to those national provisions which have the most direct impact on the functioning of the single market;

Whereas, if the objectives of the approximation are to be attained, the conditions for obtaining and retaining the rights conferred by a registered utility model should in principle be the same in all Member States; whereas to that end an exhaustive list of the requirements which a technical invention must satisfy if it is to be protected by a utility model must be drawn up;

Whereas these requirements are for the most part the same as those for patent protection; whereas the level of inventiveness required must nevertheless be different to allow for the specific nature of technical inventions protectable by utility model;

Whereas utility model protection must be available both to products and to processes;

Whereas it is necessary to exclude from utility model protection not only those inventions which are normally excluded from patentability but also, in order to meet the needs of the industries concerned, inventions relating to chemical or pharmaceutical substances or processes and inventions involving computer programs;

Whereas a utility model application must satisfy requirements similar to those for patents; whereas, however, a utility model application gives rise only to a check to ensure that the formal conditions for protectability are satisfied without any preliminary examination to establish novelty or inventive step; whereas it may form the subjectmatter of a search report on the state of the art only at the applicant's request;

Whereas it is essential, in order to safeguard the proper functioning of the single market and ensure that competition is not distorted, that registered utility models should henceforth confer upon their proprietor the same protection in all Member States and that the period of protection should be identical; whereas this period may not exceed 10 years;

Whereas the nature and scope of the rights conferred by a utility model must be spelled out; whereas the principle of Community exhaustion of rights must apply in accordance with the caselaw of the Court of Justice of the European Communities, but the principle of international exhaustion must be expressly excluded;

Whereas rules must also be laid down on dual protection by patent and by utility model, and on the lapse and revocation of utility models;

Article 2

Object

This Directive seeks to approximate Member States' laws, regulations and administrative provisions on the protection of inventions by utility model.

CHAPTER II

SCOPE OF THE UTILITY MODEL

Article 3

Protectable inventions

1. Utility models shall be granted for any inventions which are susceptible of industrial application, which are new and which involve an inventive step.
2. The following in particular shall not be regarded as inventions within the meaning of paragraph 1:
 - (a) discoveries, scientific theories and mathematical methods;
 - (b) aesthetic creations;
 - (c) schemes, rules and methods for performing mental acts, playing games or doing business;
 - (d) presentations of information.

Article 4

Exclusions from protectability

Utility models shall not be granted in respect of:

- a) inventions the exploitation of which would be contrary to public policy or morality, provided that the exploitation shall not be deemed to be so contrary merely because it is prohibited by law or regulation in some or all Member States;
- b) inventions relating to biological material;
- c) inventions relating to chemical or pharmaceutical substances or processes;
- d) inventions involving computer programs.

Article 5

Novelty

1. An invention shall be considered to be new if it does not form part of the state of the art.
2. The state of the art shall be held to comprise everything made available to the public by means of a written or oral description, by use, or in any other way, before the date of filing of the utility model application.
3. Additionally, the content of utility model applications as filed, of which the dates of filing are prior to the date referred to in paragraph 2 and which were published on or after that date, shall be considered as comprised in the state of the art.

Article 6

Inventive step

For the purposes of this Directive, an invention shall be considered as involving an inventive step if, in the utility model application, the applicant indicates clearly and convincingly that, compared with the state of the art, it exhibits either

- (a) particular effectiveness in terms of, for example, ease of application or use; or
- (b) a practical or industrial advantage.

Article 7

Industrial application

1. An invention shall be considered as susceptible of industrial application if it can be made or used in any kind of industry, including agriculture.
2. Surgical or therapeutic treatment procedures applicable to the human body or to the bodies of animals and diagnostic procedures which are carried out on the human body or the bodies of animals shall not be considered to be inventions susceptible of industrial application within the meaning of paragraph 1.

CHAPTER III

UTILITY MODEL APPLICATIONS

Article 8

Requirements of the application

1. A utility model application shall contain:

- (a) a request for the grant of a utility model;
- (b) a description of the invention;
- (c) one or more claims;
- (d) any drawings referred to in the description or the claims;
- (e) an abstract.

2. A utility model application shall be subject to the payment of a filing fee and, where appropriate, a search fee.

Article 9

Date of filing

The date of filing of a utility model application shall be the date on which documents filed by the applicant contain:

- (a) an indication that a utility model is sought;
- (b) information identifying the applicant;
- (c) a description and one or more claims.

Article 10

Designation of the inventor

The utility model application shall designate the inventor. If the applicant is not the inventor or is not the sole inventor, the designation shall contain a statement indicating the origin of the right to the utility model.

Article 11

Unity of invention

The utility model application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept.

Article 12

Disclosure of the invention

The utility model application must disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art.

Article 13

The claims

1. The claims shall define the matter for which protection is sought. They shall be clear and concise and be supported by the description.
2. The number of claims shall be limited to that which is strictly necessary having regard to the nature of the invention.

Article 14

The abstract

The abstract shall merely serve for use as technical information. It may not be taken into account for any other purpose, in particular not for the purpose of interpreting the scope of the protection sought nor for the purpose of applying Article 5(3).

Article 15

Examination as to formal requirements

1. The competent authority with which a utility model application has been lodged shall examine whether the application satisfies the formal requirements of Articles 8 and 10 and shall check whether it contains a description and an abstract.
2. If a date of filing cannot be accorded, the competent authority shall give the applicant an opportunity to correct the deficiencies in accordance with such conditions and within such period as it may fix. If the deficiencies are not remedied in due time, the application shall not be dealt with as a utility model application.
3. The competent authority referred to in paragraph 1 shall not carry out any examination to establish whether the requirements of Articles 5, 6 and 7 have been met.

Article 16

Search report

1. If a utility model application has been accorded a date of filing and is not deemed to be withdrawn, the competent authority with which the application has been lodged shall, at the applicant's request, draw up on the basis of the claims a search report covering the relevant state of the art, with due regard to the description and any drawings.
2. The competent authority with which the application has been lodged may entrust the task of drawing up the search report to any authority which it considers competent to do so.
3. Immediately after it has been drawn up, the search report shall be transmitted to the applicant together with copies of any cited documents.

4. In the provisions which they adopt in order to comply with this Directive, Member States may provide that a search report is compulsory in the event of legal proceedings being brought to enforce the rights conferred by the utility model.

Article 17

Priority right

1. Any person who has duly filed an application for a utility model or a patent in or for one of the Member States, such State being a party to the Paris Convention for the Protection of Industrial Property, or his successors in title, shall enjoy, for the purpose of filing a utility model application in respect of the same invention in one or more other Member States a right of priority during a period of twelve months from the date of filing of the first application.

2. Any filing that is equivalent to a regular national filing under the domestic law of the Member State where it was made or under bilateral or multilateral agreements shall be recognised as giving rise to a right of priority.

3. By a regular national filing is meant any filing that is sufficient to establish the date on which the application was filed in the Member State concerned, whatever may be the outcome of the application.

Article 18

Internal priority

1. Any person who has duly filed a patent application shall enjoy, for the purpose of filing a utility model application in respect of the same invention, a right of priority during a period of twelve months, unless priority has already been claimed for the patent application.

2. The provisions of Article 17(2) and (3) shall apply *mutatis mutandis*.

CHAPTER IV

EFFECTS OF THE UTILITY MODEL

Article 19

Duration of protection

1. The duration of the utility model shall be six years from the date of filing of the application.

2. Six months before the period indicated in paragraph 1 elapses, the rightholder may submit to the competent authority an application for renewal of the utility model for a period of two years.

3. Six months before the period indicated in paragraph 2 elapses, the rightholder may submit a second and last application for renewal for a maximum period of two years.

4. In no circumstances may utility model protection last for more than ten years from the date of filing of the application.

Article 20

Rights conferred

1. Where the subjectmatter of a registered utility model is a product, the utility model shall confer on its proprietor the right to prevent third parties not having his consent from making, using, offering for sale, selling, or importing for these purposes that product.

2. Where the subjectmatter of a registered utility model is a process, the utility model shall confer on its proprietor the right to prevent third parties not having his consent from using the process and from using, offering for sale, selling, or importing for these purposes at least the product obtained directly by that process.

3. The rights conferred by a utility model in accordance with paragraphs 1 and 2 shall not extend to:

(a) acts done privately and for noncommercial purposes;

(b) acts done for experimental purposes relating to the subjectmatter of the protected invention.

4. The proprietor of a utility model shall have the right to assign, or transfer by succession, the utility model and to conclude licensing agreements.

5. Member States may provide limited exceptions to the exclusive rights conferred by a utility model, provided that such exceptions do not unreasonably conflict with a normal exploitation of the utility model and do not unreasonably prejudice the legitimate interests of the proprietor of the utility model, taking account of the interests of third parties.

6. Where the law of a Member State allows for use of the subjectmatter of a utility model other than that allowed under paragraph 5 without the authorisation of the rightholder, including use by the government or third parties authorised by the government, the provisions applicable to patents for similar use shall be complied with.

Article 21

Community exhaustion of rights

1. The rights conferred by a utility model shall not extend to acts concerning a product covered by that utility model which are done after that product or has

been put on the market in the Community by the rightholder or with his consent.

2. The rights conferred by a utility model shall, however, extend to acts concerning a product covered by that utility model which are done after that product has been put on the market outside the Community by the rightholder or with his consent.

CHAPTER V

DUAL PROTECTION, LAPSE AND REVOCATION

Article 22

Dual protection

1. The same invention may form the subjectmatter, simultaneously or successively, of a patent application and a utility model application.
2. Member States may provide that a utility model which has been granted is deemed to be ineffective where a patent relating to the same invention has been granted and published.
3. Member States which do not exercise the option referred to in the preceding paragraph shall take appropriate measures to prevent the proprietor, in the event of his rights being infringed, from instituting successive proceedings under both sets of protection arrangements.

Article 23

Lapse

A utility model shall lapse:

- (a) at the end of the period laid down in Article 19;
- (b) if its proprietor surrenders it;
- (c) if the fees referred to in Article 8(2) have not been paid in due time.

Article 24

Revocation

1. An application for revocation of a utility model may be filed only on the grounds that:
 - (a) the subjectmatter of the utility model is not protectable pursuant to Articles 3 to 7 of this Directive;
 - (b) the utility model does not disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art;

- (c) The subjectmatter of the utility model extends beyond the content of the utility model application as filed;
 - (d) the protection conferred by the utility model has been extended.
2. If the grounds for revocation affect the utility model only partially, revocation shall be pronounced in the form of a corresponding limitation of the utility model. The limitation may be effected in the form of an amendment to the claims, the description or the drawings.

CHAPTER VI

FINAL PROVISIONS

Article 25

Transposal

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 31 December 1999. They shall immediately inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by the Member States.

2. Member States shall inform the Commission of the main provisions of national law which they adopt in the field governed by this Directive.

Article 26

Entry into force

This Directive shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Communities.

Article 27

FINANCIAL STATEMENT

TITLE

Proposal for a European Parliament and Council Directive approximating the legal arrangements for the protection of inventions by utility model.

DESCRIPTION OF MEASURE

The purpose of the measure is to enhance the competitiveness of firms, in particular SMEs, and promote innovation by approximating Member States' laws, regulations and administrative provisions on utility model protection and by introducing such protection in those Member States where there is none.

The measure has no financial implications for the Community budget.

THE IMPACT OF THE PROPOSAL ON BUSINESS

(with special reference to SMEs)

1. WHY IS COMMUNITY LEGISLATION NECESSARY?

To harmonise at Community level Member States' provisions on utility models and to introduce such arrangements in those Member States where there are none, by pursuing the following objectives:

- (a) to improve the functioning of the single market in products resulting in particular from minor technical inventions by ensuring their free movement;
- (b) to prevent the distortions of competition which SMEs seeking to innovate are currently faced with;
- (c) to ensure that all firms and independent inventors enjoy better protection for their technical inventions through the approximation of national laws in this area;
- (d) to improve the competitiveness of European industry by supporting European research.

2. WHO WILL BE AFFECTED BY THE PROPOSAL?

All sectors of industry will in theory be affected. According to surveys carried out among business people, however, the sectors most affected are mechanical engineering, electrical engineering, precision instruments and optics and the automotive industry. On the other hand, some sectors, such as the chemical and pharmaceutical industries, will, at their request, not be affected by the proposal.

SMEs, especially those which innovate, will be particularly affected by the proposal.

3. WHAT WILL BUSINESS HAVE TO DO TO COMPLY WITH THE PROPOSAL?

Utility model protection will be granted to those firms which request it, provided all the requirements are met. Utility model applications are to be filed with the competent authorities (in practice, national patent offices). A filing fee, the amount of which is a matter for Member States' competent authorities will be payable.

4. WHAT ECONOMIC EFFECTS IS THE PROPOSAL LIKELY TO HAVE?

(a) On employment

Harmonisation of the national rules governing utility model protection will constitute, for innovative firms, an incentive to maintain, or even increase, their investment in research and development. It will help to establish a legal framework suited to the protection of innovation especially in the area of technical inventions, and will therefore have a favourable impact on employment, notably in the research field.

(b) On investment and the creation of new businesses

Harmonisation of utility model protection should increase the likelihood that the firms concerned will recover their costs and will thus encourage them to invest. The patent being the best means of encouraging research, it is clear that the utility model, which complements it in the case of minor technical inventions, will be regarded as an incentive to research in industry.

(c) On the competitiveness of businesses

Harmonisation will mean that SMEs and independent inventors will no longer have to cope with different protection systems in the Community and that there will be less need to consult industrial property experts or legal advisers. This will help resolve many an insurmountable administrative or financial difficulty. Full rein may thus be given to firms' inventiveness, strengthening their competitive position both domestically and internationally.

5. DOES THE PROPOSAL CONTAIN MEASURES TO TAKE ACCOUNT OF THE SPECIFIC SITUATION OF SMEs?

The measures contained in the proposal are specifically targeted at SMEs with a view both to improving their competitiveness by reducing the cost of protecting their inventions and to promoting technical innovation at their level.

6. CONSULTATION

In July 1995 the Commission drew up and published a Green Paper on the protection of utility models in the single market.¹⁷ It received nearly 90 replies from a whole range of interested parties. The European Parliament and the Economic and Social Committee

¹⁷ Document COM(95) 370 final of 19 July 1995.

have also had the opportunity to make known their views on the subject.¹⁸ In addition, the Commission held a hearing attended by European trade associations on 23 September 1996 and a meeting with Member States' experts on 4 November of that year to sound out their opinions.

¹⁸ EP: document EP 214.304/def. of 26 June 1996; ESC: document ESC 1372/95 of 26 February 1996.

**Commission Regulation (EC) No 1654/2005
of 10 October 2005
amending Regulation (EC) No 874/2004 laying down public policy rules concerning the
implementation and functions of the.eu Top Level Domain and the principles governing registration
(Text with EEA relevance)**

Commission Regulation (EC) No 1654/2005

of 10 October 2005

amending Regulation (EC) No 874/2004 laying down public policy rules concerning the implementation and functions of the.eu Top Level Domain and the principles governing registration

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 733/2002 of the European Parliament and of the Council of 22 April 2002 on the implementation of the .eu Top Level Domain [1], and in particular Article 5(1) thereof,

Having consulted the European Registry for Internet domains designated by Commission Decision 2003/375/EC [2],

Whereas:

- (1) Commission Regulation (EC) No 874/2004 [3] implements Regulation (EC) No 733/2002 by laying down the public policy rules concerning the implementation and functions of the.eu Top Level Domain and the principles governing registration.
- (2) Article 8 of Regulation (EC) No 874/2004 implements the public policy rules concerning geographical concepts by providing for a procedure to permit Member States, candidate countries and all the members of the European Economic Area to request the registration or the reservation of their name by their national governments. That provision does not fully guarantee the geopolitical and linguistic diversity of the European Union and the interest of both Member States and European citizens. This calls for the Commission to amend Regulation (EC) No 874/2004 accordingly.
- (3) The measures provided for in this Regulation are in accordance with the opinion of the Communications Committee established by Article 22(1) of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) [4],

HAS ADOPTED THIS REGULATION:

Article 1

Commission Regulation (EC) No 874/2004 shall be amended as follows:

1. Article 8 shall be replaced by the following:

"Article 8

Reservation of names by countries and alpha-2 codes representing countries

1. The list of names set out in the Annex to this Regulation shall only be reserved or registered as second level domain names directly under the .eu TLD by the countries indicated in the list.

2. Alpha-2 codes representing countries shall not be registered as second level domain names directly under the.eu TLD.";
2. in Article 12(1), the first subparagraph shall be replaced by the following:
"Phased registration shall not start before the requirement of the first paragraph of Article 6 is fulfilled.";
3. the Annex to this Regulation is added.

Article 2

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 10 October 2005.

Commission Regulation (EC) No 874/2004

of 28 April 2004

laying down public policy rules concerning the implementation and functions of the .eu Top Level Domain and the principles governing registration

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 733/2002 of the European Parliament and of the Council of 22 April 2002 on the implementation of the .eu Top Level Domain(1), and in particular Article 5(1) thereof,

Having consulted the Registry in accordance with Article 5(1) of Regulation (EC) No 733/2002,

Whereas:

- (1) The initial implementation stages of the .eu Top Level Domain (TLD), to be created pursuant to Regulation (EC) No 733/2002, have been completed by designating a legal entity, established within the Community to administer and manage the .eu TLD Registry function. The Registry, designated by Commission Decision 2003/375/EC(2), is required to be a non-profit organisation that should operate and provide services on a cost covering basis and at an affordable price.
- (2) Requesting a domain name should be possible through electronic means in a simple, speedy and efficient procedure, in all official languages of the Community, through accredited registrars.
- (3) Accreditation of registrars should be carried out by the Registry following a procedure that ensures fair and open competition between Registrars. The accreditation process should be objective, transparent and non-discriminatory. Only parties who meet certain basic technical requirements to be determined by the Registry should be eligible for accreditation.
- (4) Registrars should only accept applications for the registration of domain names filed after their accreditation and should forward them in the chronological order in which they were received.
- (5) To ensure better protection of consumers' rights, and without prejudice to any Community rules concerning jurisdiction and applicable law, the applicable law in disputes between registrars and registrants on matters concerning Community titles should be the law of one of the Member States.
- (6) Registrars should require accurate contact information from their clients, such as full name, address of domicile, telephone number and electronic mail, as well as information concerning a natural or legal person responsible for the technical operation of the domain name.
- (7) The Registry policy should promote the use of all the official languages of the Community.
- (8) Pursuant to Regulation (EC) No 733/2002, Member States may request that their official name and the name under which they are commonly known should not be registered directly under .eu TLD otherwise than by their national government. Countries that are expected to join the European Union later than May 2004 should be enabled to block their official names and the names under which they are commonly known, so that they can be registered at a later date.

-
- (9) A Member State should be authorised to designate an operator that will register as a domain name its official name and the name under which it is commonly known. Similarly, the Commission should be authorised to select domain names for use by the institutions of the Community, and to designate the operator of those domain names. The Registry should be empowered to reserve a number of specified domain names for its operational functions.
 - (10) In accordance with Article 5(2) of Regulation (EC) No 733/2002, a number of Member States have notified to the Commission and to other Member States a limited list of broadly-recognised names with regard to geographical and/or geopolitical concepts which affect their political or territorial organisation. Such lists include names that could either not be registered or which could be registered only under the second level domain in accordance with the public policy rules. The names included in these lists are not subject to the first-come first-served principle.
 - (11) The principle of first-come-first-served should be the basic principle for resolving a dispute between holders of prior rights during the phased registration. After the termination of the phased registration the principle of first come first served should apply in the allocation of domain names.
 - (12) In order to safeguard prior rights recognised by Community or national law, a procedure for phased registration should be put in place. Phased registration should take place in two phases, with the aim of ensuring that holders of prior rights have appropriate opportunities to register the names on which they hold prior rights. The Registry should ensure that validation of the rights is performed by appointed validation agents. On the basis of evidence provided by the applicants, validation agents should assess the right which is claimed for a particular name. Allocation of that name should then take place on a first-come, first-served basis if there are two or more applicants for a domain name, each having a prior right.
 - (13) The Registry should enter into an appropriate escrow agreement to ensure continuity of service, and in particular to ensure that in the event of re-delegation or other unforeseen circumstances it is possible to continue to provide services to the local Internet community with minimum disruption. The Registry should also comply with the relevant data protection rules, principles, guidelines and best practices, notably concerning the amount and type of data displayed in the WHOIS database. Domain names considered by a Member State court to be defamatory, racist or contrary to public policy should be blocked and eventually revoked once the court decision becomes final. Such domain names should be blocked from future registrations.
 - (14) In the event of the death or insolvency of a domain name holder, if no transfer has been initiated at the expiry of the registration period, the domain name should be suspended for 40 calendar days. If the heirs or administrators concerned have not registered the name during that period it should become available for general registration.
 - (15) Domain names should be open to revocation by the Registry on a limited number of specified grounds, after giving the domain name holder concerned an opportunity to take appropriate measures. Domain names should also be capable of revocation through an alternative dispute resolution (ADR) procedure.
 - (16) The Registry should provide for an ADR procedure which takes into account the international best practices in this area and in particular the relevant World Intellectual Property Organization (WIPO) recommendations, to ensure that speculative and abusive registrations are avoided as far as possible.
 - (17) The Registry should select service providers that have appropriate expertise on the basis of objective, transparent and non-discriminatory criteria. ADR should respect a minimum of uniform procedural rules, similar to the ones set out in the Uniform Dispute Resolution Policy adopted

by the Internet Corporation of Assigned Names and Numbers (ICANN).

- (18) In view of the impending enlargement of the Union it is imperative that the system of public policy rules set up by this Regulation enter into force without delay.
- (19) The measures provided for in this Regulation are in accordance with the opinion of the Communications Committee established by Article 22(1) of Directive 2002/21/EC of the European Parliament and of the Council(3),

HAS ADOPTED THIS REGULATION:

CHAPTER I SUBJECT MATTER

Article 1

Subject matter

This Regulation sets out the public policy rules concerning the implementation and functions of the.eu Top Level Domain (TLD) and the public policy principles on registration referred to in Article 5(1) of Regulation (EC) No 733/2002.

CHAPTER II PRINCIPLES ON REGISTRATION

Article 2

Eligibility and general principles for registration

An eligible party, as listed in Article 4(2)(b) of Regulation (EC) No 733/2002, may register one or more domain names under.eu TLD.

Without prejudice to Chapter IV, a specific domain name shall be allocated for use to the eligible party whose request has been received first by the Registry in the technically correct manner and in accordance with this Regulation. For the purposes of this Regulation, this criterion of first receipt shall be referred to as the "first-come-first-served" principle.

Once a domain name is registered it shall become unavailable for further registration until the registration expires without renewal, or until the domain name is revoked.

Unless otherwise specified in this Regulation, domain names shall be registered directly under the.eu TLD.

Domain name registration shall be valid only after the appropriate fee has been paid by the requesting party.

Domain names registered under the.eu TLD shall only be transferable to parties that are eligible for registration of.eu domain names.

Article 3

Requests for domain name registration

The request for domain name registration shall include all of the following:

-
- (a) the name and address of the requesting party;
 - (b) a confirmation by electronic means from the requesting party that it satisfies the general eligibility criteria set out in Article 4(2)(b) of Regulation (EC) No 733/2002;
 - (c) an affirmation by electronic means from the requesting party that to its knowledge the request for domain name registration is made in good faith and does not infringe any rights of a third party;
 - (d) an undertaking by electronic means from the requesting party that it shall abide by all the terms and conditions for registration, including the policy on the extra-judicial settlement of conflicts set out in Chapter VI.

Any material inaccuracy in the elements set out in points (a) to (d) shall constitute a breach of the terms of registration.

Any verification by the Registry of the validity of registration applications shall take place subsequently to the registration at the initiative of the Registry or pursuant to a dispute for the registration of the domain name in question, except for applications filed in the course of the phased registration procedure under Articles 10, 12, and 14.

Article 4

Accreditation of registrars

Only registrars accredited by the Registry shall be permitted to offer registration services for names under the.eu TLD.

The procedure for the accreditation of registrars shall be determined by the Registry and shall be reasonable, transparent and non-discriminatory, and shall ensure effective and fair conditions of competition.

Registrars are required to access and use the Registry's automated registration systems. The Registry may set further basic technical requirements for the accreditation of registrars.

The Registry may ask registrars for advance payment of registration fees, to be set annually by the Registry based on a reasonable market estimate.

The procedure, terms of accreditation of registrars and the list of accredited registrars shall be made publicly available by the Registry in readily accessible form.

Each registrar shall be bound by contract with the Registry to observe the terms of accreditation and in particular to comply with the public policy principles set out in this Regulation.

Article 5

Provisions for registrars

Without prejudice to any rule governing jurisdiction and applicable law, agreements between the Registrar and the registrant of a domain name cannot designate, as applicable law, a law other than the law of one of the Member States, nor can they designate a dispute-resolution body, unless selected by the Registry pursuant to Article 23, nor an arbitration court or a court located outside the Community.

A registrar who receives more than one registration request for the same name shall forward those requests to the Registry in the chronological order in which they were received.

Only applications received after the date of accreditation shall be forwarded to the Registry.

Registrars shall require all applicants to submit accurate and reliable contact details of at least one natural or legal person responsible for the technical operation of the domain name that is requested.

Registrars may develop label, authentication and trustmark schemes in order to promote consumer confidence in the reliability of information that is available under a domain name that is registered by them, in accordance with applicable national and Community law.

CHAPTER III LANGUAGES AND GEOGRAPHICAL CONCEPTS

Article 6

Languages

Registrations of .eu domain names shall start only after the Registry has informed the Commission that the filing of applications for the registration of .eu domain names and communications of decisions concerning registration is possible in all official languages of the Community, hereinafter referred to as "official languages".

For any communication by the Registry that affects the rights of a party in conjunction with a registration, such as the grant, transfer, cancellation or revocation of a domain, the Registry shall ensure that these communications are possible in all official languages.

The Registry shall perform the registration of domain names in all the alphabetic characters of the official languages when adequate international standards become available.

The Registry shall not be required to perform functions using languages other than the official languages.

Article 7

Procedure for reserved geographical and geopolitical names

For the procedure of raising objections to the lists of broadly recognised names in accordance with the third subparagraph of Article 5(2) of Regulation (EC) No 733/2002, objections shall be notified to the members of the Communications Committee established by Article 22(1) of Directive 2002/21/EC and to the Director-General of the Commission's Directorate-General Information Society. The members of the Communications Committee and the Director-General may designate other contact points for these notifications.

Objections and designations of contact points shall be notified in the form of electronic mail, delivery by courier or in person, or by postal delivery effected by way of registered letter and acknowledgement of receipt.

Upon the resolution of any objections, the Registry shall publish on its web site two lists of names. The one list shall contain the list of names that the Commission shall have notified as "not registrable". The other list shall contain the list of names that the Commission shall have notified to the Registry as "registrable only under a second level domain".

Article 8

Country names and alpha-2 codes representing countries

Member States (and acceding countries) may request that their official name and the name under which they are commonly known in one or more of the official languages (of the Community as extended in May 2004) shall not be registered directly under the.eu TLD by any person other than their national government. To that end, each Member State (or acceding country) shall send the Commission, within two months following the entry into force of this Regulation, a list of those names requiring to be reserved, as well as a designation of the body that will represent the national government in registering the names.

The Commission shall notify the Registry of the names that shall be reserved and the bodies that represent the national governments in registering the names.

Candidate countries that are not due to join the European Union in May 2004 and member countries of the European Economic Area that are not Member States may request that their official name and the name under which they are commonly known in their own language and in any of the official languages as from May 2004 shall not be registered directly under the.eu TLD. To that end, those countries may send the Commission, within two months following entry into force of this Regulation, a list of those names which are not to be registered.

The Commission shall notify the Registry of the names that shall not be registered.

Alpha-2 codes representing countries shall not be used to register domain names directly under the.eu TLD.

Article 9

Second level domain name for geographical and geopolitical names

Registration of geographical and geopolitical concepts as domain names in accordance with Article 5(2)(b) of Regulation (EC) No 733/2002 may be provided for by a Member State that has notified the names. This may be done under any domain name that has been registered by that Member State.

The Commission may ask the Registry to introduce domain names directly under the.eu TLD for use by the Community institutions and bodies. After the entry into force of this Regulation and not later than a week before the beginning of the phased registration period provided for in Chapter IV, the Commission shall notify the Registry of the names that are to be reserved and the bodies that represent the Community institutions and bodies in registering the names.

CHAPTER IV PHASED REGISTRATION*Article 10*

Eligible parties and the names they can register

1. Holders of prior rights recognised or established by national and/or Community law and public bodies shall be eligible to apply to register domain names during a period of phased registration before general registration of. eu domain starts.

"Prior rights" shall be understood to include, inter alia, registered national and community trademarks, geographical indications or designations of origin, and, in as far as they are protected under national law in the Member-State where they are held: unregistered trademarks, trade names, business identifiers, company names, family names, and distinctive titles of protected literary and artistic works.

"Public bodies" shall include: institutions and bodies of the Community, national and local governments, governmental bodies, authorities, organisations and bodies governed by public law, and international and intergovernmental organisations.

2. The registration on the basis of a prior right shall consist of the registration of the complete name for which the prior right exists, as written in the documentation which proves that such a right exists.

3. The registration by a public body may consist of the complete name of the public body or the acronym that is generally used. Public bodies that are responsible for governing a particular geographic territory may also register the complete name of the territory for which they are responsible, and the name under which the territory is commonly known.

Article 11

Special characters

As far as the registration of complete names is concerned, where such names comprise a space between the textual or word elements, identity shall be deemed to exist between such complete names and the same names written with a hyphen between the word elements or combined in one word in the domain name applied for.

Where the name for which prior rights are claimed contains special characters, spaces, or punctuations, these shall be eliminated entirely from the corresponding domain name, replaced with hyphens, or, if possible, rewritten.

Special character and punctuations as referred to in the second paragraph shall include the following:

~ @ >REFERENCE TO A GRAPHIC> \$ % ^ & * () + = < > { } [...] | \ / : ; ' , . ?

Without prejudice to the third paragraph of Article 6, if the prior right name contains letters which have additional elements that cannot be reproduced in ASCII code, such as ä, é or ñ, the letters concerned shall be reproduced without these elements (such as a, e, n), or shall be replaced by conventionally accepted spellings (such as ae). In all other respects, the domain name shall be identical to the textual or word elements of the prior right name.

Article 12

Principles for phased registration

1. Phased registration shall not start before 1 May 2004 and only when the requirement of the first paragraph of Article 6 is fulfilled and the period provided for in Article 8 has expired.

The Registry shall publish the date on which phased registration shall start at least two months in advance and shall inform all accredited Registrars accordingly.

The Registry shall publish on its website two months before the beginning of the phased registration a detailed description of all the technical and administrative measures that it shall use to ensure a proper, fair and technically sound administration of the phased registration period.

2. The duration of the phased registration period shall be four months. General registration of domain names shall not start prior to the completion of the phased registration period.

Phased registration shall be comprised of two parts of two months each.

During the first part of phased registration, only registered national and Community trademarks, geographical indications, and the names and acronyms referred to in Article 10(3), may be applied for as domain names by holders or licensees of prior rights and by the public bodies mentioned in Article 10(1).

During the second part of phased registration, the names that can be registered in the first part as well as names based on all other prior rights can be applied for as domain names by holders of prior rights on those names.

3. The request to register a domain name based on a prior right under Article 10(1) and (2) shall include a reference to the legal basis in national or Community law for the right to the name, as well as other relevant information, such as trademark registration number, information concerning publication in an official journal or government gazette, registration information at professional or business associations and chambers of commerce.

4. The Registry may make the requests for domain name registration subject to payment of additional fees, provided that these serve merely to cover the costs generated by the application of this Chapter. The Registry may charge differential fees depending upon the complexity of the process required to validate prior rights.

5. At the end of the phased registration an independent audit shall be performed at the expense of the Registry and shall report its findings to the Commission. The auditor shall be appointed by the Registry after consulting the Commission. The purpose of the audit shall be to confirm the fair, appropriate and sound operational and technical administration of the phased registration period by the Registry.

6. To resolve a dispute over a domain name the rules provided in Chapter VI shall apply.

Article 13

Selection of validation agents

Validation agents shall be legal persons established within the territory of the Community. Validation agents shall be reputable bodies with appropriate expertise. The Registry shall select the validation agents in an objective, transparent and non-discriminatory manner, ensuring the widest possible geographical diversity. The Registry shall require the validation agent to execute the validation in an objective, transparent and non-discriminatory manner.

Member States shall provide for validation concerning the names mentioned in Article 10(3). To that end, the Member States shall send to the Commission within two months following entry into force of this Regulation, a clear indication of the addresses to which documentary evidence is to be sent for verification. The Commission shall notify the Registry of these addresses.

The Registry shall publish information about the validation agents at its website.

Article 14

Validation and registration of applications received during phased registration

All claims for prior rights under Article 10(1) and (2) must be verifiable by documentary evidence which demonstrates the right under the law by virtue of which it exists.

The Registry, upon receipt of the application, shall block the domain name in question until validation has taken place or until the deadline passes for receipt of documentation. If the Registry receives more than one claim for the same domain during the phased registration period, applications shall be dealt with in strict chronological order.

The Registry shall make available a database containing information about the domain names applied for under the procedure for phased registration, the applicants, the Registrar that submitted the application, the deadline for submission of validation documents, and subsequent claims on the names.

Every applicant shall submit documentary evidence that shows that he or she is the holder of the prior right claimed on the name in question. The documentary evidence shall be submitted to a validation agent indicated by the Registry. The applicant shall submit the evidence in such a way that it shall be received by the validation agent within forty days from the submission of the application for the domain name. If the documentary evidence has not been received by this deadline, the application for the domain name shall be rejected.

Validation agents shall time-stamp documentary evidence upon receipt.

Validation agents shall examine applications for any particular domain name in the order in which the application was received at the Registry.

The relevant validation agent shall examine whether the applicant that is first in line to be assessed for a domain name and that has submitted the documentary evidence before the deadline has prior rights on the name. If the documentary evidence has not been received in time or if the validation agent finds that the documentary evidence does not substantiate a prior right, he shall notify the Registry of this.

If the validation agent finds that prior rights exist regarding the application for a particular domain name that is first in line, he shall notify the Registry accordingly.

This examination of each claim in chronological order of receipt shall be followed until a claim is found for which prior rights on the name in question are confirmed by a validation agent.

The Registry shall register the domain name, on the first come first served basis, if it finds that the applicant has demonstrated a prior right in accordance with the procedure set out in the second, third and fourth paragraphs.

CHAPTER V RESERVATIONS, WHOIS DATA AND IMPROPER REGISTRATIONS

Article 15

Escrow agreement

1. The Registry shall, at its own expense, enter into an agreement with a reputable trustee or other escrow agent established within the territory of the Community designating the Commission as the beneficiary of the escrow agreement. The Commission shall give its consent to that agreement

before it is concluded. The Registry shall submit to the escrow agent on a daily basis an electronic copy of the current content of the.eu database.

2. The agreement shall provide that the data shall be held by the escrow agent on the following terms and conditions:

- (a) the data shall be received and held in escrow, undergoing no procedure other than verification that it is complete, consistent, and in proper format, until it is released to the Commission;
- (b) the data shall be released from escrow upon expiration without renewal or upon termination of the contract between the Registry and the Commission for any of the reasons described therein and irrespectively of any disputes or litigation between the Commission and the Registry;
- (c) in the event that the escrow is released, the Commission shall have the exclusive, irrevocable, royalty-free right to exercise or to have exercised all rights necessary to re-designate the Registry;
- (d) if the contract with the Registry is terminated the Commission, with the cooperation of the Registry, shall take all necessary steps to transfer the administrative and operational responsibility for the.eu TLD and any reserve funds to such party as the Commission may designate: in that event, the Registry shall make all efforts to avoid disruption of the service and shall in particular continue to update the information that is subject to the escrow until the time of completion of the transfer.

Article 16

WHOIS database

The purpose of the WHOIS database shall be to provide reasonably accurate and up to date information about the technical and administrative points of contact administering the domain names under the.eu TLD.

The WHOIS database shall contain information about the holder of a domain name that is relevant and not excessive in relation to the purpose of the database. In as far as the information is not strictly necessary in relation to the purpose of the database, and if the domain name holder is a natural person, the information that is to be made publicly available shall be subject to the unambiguous consent of the domain name holder. The deliberate submission of inaccurate information, shall constitute grounds for considering the domain name registration to have been in breach of the terms of registration.

Article 17

Names reserved by the Registry

The following names shall be reserved for the operational functions of the Registry:

eurid.eu, registry.eu, nic.eu, dns.eu, internic.eu, whois.eu, das.eu, coc.eu, eurethix.eu, eurethics.eu, euthics.eu

Article 18

Improper registrations

Where a domain name is considered by a Court of a Member State to be defamatory, racist or contrary to public policy, it shall be blocked by the Registry upon notification of a Court decision and shall be revoked upon notification of a final court decision. The Registry shall block from future registration those names which have been subject to such a court order for as long as such order remains valid.

Article 19

Death and winding up

1. If the domain name holder dies during the registration period of the domain name, the executors of his or her estate, or his or her legal heirs, may request transfer of the name to the heirs along with submission of the appropriate documentation. If, on expiry of the registration period, no transfer has been initiated, the domain name shall be suspended for a period of 40 calendar days and shall be published on the Registry's website. During this period the executors or the legal heirs may apply to register the name along with submission of the appropriate documentation. If the heirs have not registered the name during that 40-day period, the domain name shall thereafter become available for general registration.

2. If the domain name holder is an undertaking, a legal or natural person, or an organisation that becomes subject to insolvency proceedings, winding up, cessation of trading, winding up by court order or any similar proceeding provided for by national law, during the registration period of the domain name, then the legally appointed administrator of the domain name holder may request transfer to the purchaser of the domain name holders assets along with submission of the appropriate documentation. If, on expiry of the registration period, no transfer has been initiated, the domain name shall be suspended for a period of forty calendar days and shall be published on the registry's website. During this period the administrator may apply to register the name along with submission of appropriate documentation. If the administrator has not registered the name during that 40-day period, the domain name shall thereafter become available for general registration.

CHAPTER VI REVOCATION AND SETTLEMENT OF CONFLICTS

Article 20

Revocation of domain names

The Registry may revoke a domain name at its own initiative and without submitting the dispute to any extrajudicial settlement of conflicts, exclusively on the following grounds:

- (a) outstanding unpaid debts owed to the Registry;
- (b) holder's non-fulfilment of the general eligibility criteria pursuant to Article 4(2)(b) of Regulation (EC) 733/2002;
- (c) holder's breach of the terms of registration under Article 3.

The Registry shall lay down a procedure in accordance with which it may revoke domain names on these grounds. This procedure shall include a notice to the domain name holder and shall afford him an opportunity to take appropriate measures.

Revocation of a domain name, and where necessary its subsequent transfer, may also be effected in accordance with a decision issued by an extrajudicial settlement body.

Article 21

Speculative and abusive registrations

1. A registered domain name shall be subject to revocation, using an appropriate extra-judicial or judicial procedure, where that name is identical or confusingly similar to a name in respect of which a right is recognised or established by national and/or Community law, such as the rights mentioned in Article 10(1), and where it:

- (a) has been registered by its holder without rights or legitimate interest in the name; or
- (b) has been registered or is being used in bad faith.

2. A legitimate interest within the meaning of point (a) of paragraph 1 may be demonstrated where:

- (a) prior to any notice of an alternative dispute resolution (ADR) procedure, the holder of a domain name has used the domain name or a name corresponding to the domain name in connection with the offering of goods or services or has made demonstrable preparation to do so;
- (b) the holder of a domain name, being an undertaking, organisation or natural person, has been commonly known by the domain name, even in the absence of a right recognised or established by national and/or Community law;
- (c) the holder of a domain name is making a legitimate and non-commercial or fair use of the domain name, without intent to mislead consumers or harm the reputation of a name on which a right is recognised or established by national and/or Community law.

3. Bad faith, within the meaning of point (b) of paragraph 1 may be demonstrated, where:

- (a) circumstances indicate that the domain name was registered or acquired primarily for the purpose of selling, renting, or otherwise transferring the domain name to the holder of a name in respect of which a right is recognised or established by national and/or Community law or to a public body; or
- (b) the domain name has been registered in order to prevent the holder of such a name in respect of which a right is recognised or established by national and/or Community law, or a public body, from reflecting this name in a corresponding domain name, provided that:
 - (i) a pattern of such conduct by the registrant can be demonstrated; or
 - (ii) the domain name has not been used in a relevant way for at least two years from the date of registration; or
- (iii) in circumstances where, at the time the ADR procedure was initiated, the holder of a domain name in respect of which a right is recognised or established by national and/or Community law or the holder of a domain name of a public body has declared his/its intention to use the domain name in a relevant way but fails to do so within six months of the day on which the ADR procedure was initiated;

- (c) the domain name was registered primarily for the purpose of disrupting the professional activities of a competitor; or
 - (d) the domain name was intentionally used to attract Internet users, for commercial gain, to the holder of a domain name website or other on-line location, by creating a likelihood of confusion with a name on which a right is recognised or established by national and/or Community law or a name of a public body, such likelihood arising as to the source, sponsorship, affiliation or endorsement of the website or location or of a product or service on the website or location of the holder of a domain name; or
 - (e) the domain name registered is a personal name for which no demonstrable link exists between the domain name holder and the domain name registered.
4. The provisions in paragraphs 1, 2 and 3 may not be invoked so as to obstruct claims under national law.

Article 22

Alternative dispute resolution (ADR) procedure

1. An ADR procedure may be initiated by any party where:

- (a) the registration is speculative or abusive within the meaning of Article 21; or
- (b) a decision taken by the Registry conflicts with this Regulation or with Regulation (EC) No 733/2002.

2. Participation in the ADR procedure shall be compulsory for the holder of a domain name and the Registry.

3. A fee for the ADR shall be paid by the complainant.

4. Unless otherwise agreed by the parties, or specified otherwise in the registration agreement between registrar and domain name holder, the language of the administrative proceeding shall be the language of that agreement. This rule shall be subject to the authority of the panel to determine otherwise, having regard to the circumstances of the case.

5. The complaints and the responses to those complaints must be submitted to an ADR provider chosen by the complainant from the list referred to in the first paragraph of Article 23. That submission shall be made in accordance with this Regulation and the published supplementary procedures of the ADR provider.

6. As soon as a request for ADR is properly filed with the ADR provider and the appropriate fee is paid, the ADR provider shall inform the Registry of the identity of the complainant and the domain name involved. The Registry shall suspend the domain name involved from cancellation or transfer until the dispute resolution proceedings or subsequent legal proceedings are complete and the decision has been notified to the Registry.

7. The ADR provider shall examine the complaint for compliance with its rules of procedure, with the provisions of this Regulation and with Regulation (EC) No 733/2002, and, unless non-compliance is established, shall forward the complaint to the respondent within five working days following receipt of the fees to be paid by the complainant.

8. Within 30 working days of the date of receipt of the complaint the respondent shall submit a response to the provider.

9. Any written communication to a complainant or respondent shall be made by the preferred means stated by the complainant or respondent, respectively, or in the absence of such specification electronically via the Internet, provided that a record of transmission is available.

All communications concerning the ADR procedure to the holder of a domain name that is subject to an ADR procedure shall be sent to the address information that is available to the Registrar that maintains the registration of the domain name in accordance with the terms and conditions of registration.

10. Failure of any of the parties involved in an ADR procedure to respond within the given deadlines or appear to a panel hearing may be considered as grounds to accept the claims of the counterparty.

11. In the case of a procedure against a domain name holder, the ADR panel shall decide that the domain name shall be revoked, if it finds that the registration is speculative or abusive as defined in Article 21. The domain name shall be transferred to the complainant if the complainant applies for this domain name and satisfies the general eligibility criteria set out in Article 4(2)(b) of Regulation (EC) No 733/2002.

In the case of a procedure against the Registry, the ADR panel shall decide whether a decision taken by the Registry conflicts with this Regulation or with Regulation (EC) No 733/2002. The ADR panel shall decide that the decision shall be annulled and may decide in appropriate cases that the domain name in question shall be transferred, revoked or attributed, provided that, where necessary, the general eligibility criteria set out in Article 4(2)(b) of Regulation (EC) No 733/2002 are fulfilled.

The decision of the ADR panel shall state the date for implementation of the decision.

Decisions of the panel are taken by simple majority. The alternative dispute panel shall issue its decision within one month from the date of receipt of the response by the ADR provider. The decision shall be duly motivated. The decisions of the panel shall be published.

12. Within three working days after receiving the decision from the panel, the provider shall notify the full text of the decision to each party, the concerned registrar(s) and the Registry. The decision shall be notified to the Registry and the complainant by registered post or other equivalent electronic means.

13. The results of ADR shall be binding on the parties and the Registry unless court proceedings are initiated within 30 calendar days of the notification of the result of the ADR procedure to the parties.

Article 23

Selection of providers and panellists for alternative dispute resolution

1. The Registry may select ADR providers, who shall be reputable bodies with appropriate expertise in an objective, transparent and non-discriminatory manner. A list of the ADR providers shall be published on the Registry's website.

2. A dispute which is submitted to the ADR procedure shall be examined by arbitrators appointed to a panel of one or three members.

The panellists shall be selected in accordance to the internal procedures of the selected ADR providers. They shall have appropriate expertise and shall be selected in an objective, transparent and non-discriminatory manner. Each provider shall maintain a publicly available list of panellists

and their qualifications.

A panellist shall be impartial and independent and shall have, before accepting appointment, disclosed to the provider any circumstances giving rise to justifiable doubt as to their impartiality or independence. If, at any stage during the administrative proceedings, new circumstances arise that could give rise to justifiable doubt as to the impartiality or independence of the panellist, that panellist shall promptly disclose such circumstances to the provider.

In such event, the provider shall appoint a substitute panellist.

CHAPTER VII FINAL PROVISIONS

Article 24

Entry into force

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 28 April 2004.

**Regulation (EC) No 733/2002 of the European Parliament and of the Council
of 22 April 2002
on the implementation of the.eu Top Level Domain (Text with EEA relevance)**

Regulation (EC) No 733/2002 of the European Parliament and of the Council
of 22 April 2002

on the implementation of the.eu Top Level Domain

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 156 thereof,

Having regard to the proposal from the Commission(1),

Having regard to the opinion of the Economic and Social Committee(2),

Following consultation of the Committee of the Regions,

Acting in accordance with the procedure laid down in Article 251 of the Treaty(3),

Whereas:

- (1) The creation of the.eu Top Level Domain (TLD) is included as one of the targets to accelerate electronic commerce in the e-Europe initiative as endorsed by the European Council at its meeting in Lisbon on 23 and 24 March 2000.
- (2) The communication from the Commission to the Council and the European Parliament on the organisation and management of the Internet refers to the creation of the.eu TLD and the Council resolution of 3 October 2000 on the organisation and management of the Internet(4) charges the Commission to encourage the coordination of policies in relation to the management of the Internet.
- (3) TLDs are an integral part of the Internet infrastructure. They are an essential element of the global interoperability of the World Wide Web ("WWW" or "the Web"). The connection and presence permitted by the allocation of domain names and the related addresses allow users to locate computers and websites on the Web. TLDs are also an integral part of every Internet e-mail address.
- (4) The.eu TLD should promote the use of, and access to, the Internet networks and the virtual market place based on the Internet, in accordance with Article 154(2) of the Treaty, by providing a complementary registration domain to existing country code Top Level Domains (ccTLDs) or global registration in the generic Top Level Domains, and should in consequence increase choice and competition.
- (5) The.eu TLD should improve the interoperability of trans-European networks, in accordance with Articles 154 and 155 of the Treaty, by ensuring the availability of.eu name servers in the Community. This will affect the topology and technical infrastructure of the Internet in Europe which will benefit from an additional set of name servers in the Community.
- (6) Through the.eu TLD, the Internal market should acquire higher visibility in the virtual market place based on the Internet. The.eu TLD should provide a clearly identified link with the Community, the associated legal framework, and the European market place. It should enable undertakings, organisations and natural persons within the Community to register in a specific domain which will make this link obvious. As such, the.eu TLD will not only be a key building block for electronic commerce in Europe but will also support the objectives of Article 14 of the Treaty.

-
- (7) The.eu TLD can accelerate the benefits of the information society in Europe as a whole, play a role in the integration of future Member States into the European Union, and help combat the risk of digital divide with neighbouring countries. It is therefore to be expected that this Regulation will be extended to the European Economic Area and that amendments may be sought to the existing arrangements between the European Union and European third countries, with a view to accommodating the requirements of the.eu TLD so that entities in those countries may participate in it.
 - (8) This Regulation is without prejudice to Community law in the field of personal data protection. This Regulation should be implemented in compliance with the principles relating to privacy and the protection of personal data.
 - (9) Internet management has generally been based on the principles of non-interference, self-management and self-regulation. To the extent possible and without prejudice to Community law, these principles should also apply to the.eu ccTLD. The implementation of the.eu TLD may take into consideration best practices in this regard and could be supported by voluntary guidelines or codes of conduct where appropriate.
 - (10) The establishment of the.eu TLD should contribute to the promotion of the European Union image on the global information networks and bring an added value to the Internet naming system in addition to the national ccTLDs.
 - (11) The objective of this Regulation is to establish the conditions of implementation of the.eu TLD, to provide for the designation of a Registry and establish the general policy framework within which the Registry will function. National ccTLDs are not covered by this Regulation.
 - (12) The Registry is the entity charged with the organisation, administration and management of the.eu TLD, including maintenance of the corresponding databases and the associated public query services, the accreditation of Registrars, the registration of domain names applied for by accredited Registrars, the operation of the TLD name servers and the dissemination of TLD zone files. Public query services associated with the TLD are referred to as "Who is" queries. "Who is"-type databases should be in conformity with Community law on data protection and privacy. Access to these databases provides information on a domain name holder and is an essential tool in boosting user confidence.
 - (13) After publishing a call for expressions of interest in the Official Journal of the European Communities, the Commission should, on the basis of an open, transparent and non-discriminatory selection procedure, designate a Registry. The Commission should enter into a contract with the selected Registry which should specify the conditions applying to the Registry for the organisation, administration and management of the.eu TLD and which should be limited in time and renewable.
 - (14) The Commission, acting on behalf of the Community, has requested the delegation of the EU code for the purpose of creating an Internet ccTLD. On 25 September 2000, the Internet Corporation for Assigned Names and Numbers (ICANN) issued a resolution providing that "alpha-2 codes are delegable as ccTLDs only in cases where the ISO 3166 Maintenance Agency, on its exceptional reservation list, has issued a reservation of the code that covers any application of ISO 3166-1 that needs a coded representation in the name of the country, territory or area involved". Such conditions are met by the EU code which is therefore "delegable" to the Community.
 - (15) ICANN is at present responsible for coordinating the delegation of codes representing ccTLD to Registries. The Council resolution of 3 October 2000 encourages the implementation of the principles applied to ccTLD Registries adopted by the Governmental Advisory Committee (GAC). The Registry should enter into a contract with ICANN respecting the GAC principles.

-
- (16) The adoption of a public policy addressing speculative and abusive registration of domain names should provide that holders of prior rights recognised or established by national and/or Community law and public bodies will benefit from a specific period of time (a "sunrise period") during which the registration of their domain names is exclusively reserved to such holders of prior rights recognised or established by national and/or Community law and public bodies.
- (17) Domain names should not be revoked arbitrarily. A revocation may, however, be obtained in particular should a domain name be manifestly contrary to public order. The revocation policy should nevertheless provide for a timely and efficient mechanism.
- (18) Rules should be adopted on the question of bona vacantia to address the status of domain names the registration of which is not renewed or which, for example because of succession law, are left without holder.
- (19) The new.eu TLD registry should not be empowered to create second-level domains using alpha-2 codes representing countries.
- (20) Within the framework established by this Regulation, the public policy rules concerning the implementation and functions of the.eu TLD and the public policy principles on registration, various options including the "first come, first served" method should be considered when registration policy is formulated.
- (21) When reference is made to interested parties, provision should be made for consultation encompassing, in particular, public authorities, undertakings, organisations and natural persons. The Registry could establish an advisory body to organise such consultation.
- (22) The measures necessary for the implementation of this Regulation, including criteria for the selection procedure of the Registry, the designation of the Registry, as well as the adoption of public policy rules, should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission(5).
- (23) Since the objective of the proposed action, namely to implement the.eu TLD, cannot be sufficiently achieved by the Member States and can therefore, by reason of the scale and effects of the action, be better achieved at Community level, the Community may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective,

HAVE ADOPTED THIS REGULATION:

Article 1

Objective and scope

1. The objective of this Regulation is to implement the.eu country code Top Level Domain (ccTLD) within the Community. The Regulation sets out the conditions for such implementation, including the designation of a Registry, and establishes the general policy framework within which the Registry will function.
2. This Regulation shall apply without prejudice to arrangements in Member States regarding national ccTLDs.

Article 2

Definitions

For the purposes of this Regulation:

- (a) "Registry" means the entity entrusted with the organisation, administration and management of the.eu TLD including maintenance of the corresponding databases and the associated public query services, registration of domain names, operation of the Registry of domain names, operation of the Registry TLD name servers and dissemination of TLD zone files;
- (b) "Registrar" means a person or entity that, via contract with the Registry, provides domain name registration services to registrants.

Article 3

Characteristics of the Registry

1. The Commission shall:

- (a) establish, in accordance with the procedure referred to in Article 6(3), the criteria and the procedure for the designation of the Registry;
- (b) designate, in accordance with the procedure referred to in Article 6(2), the Registry after publishing a call for expressions of interest in the Official Journal of the European Communities and after the procedure for such call has been completed;
- (c) enter into, in accordance with the procedure referred to in Article 6(2), a contract which shall specify the conditions according to which the Commission supervises the organisation, administration and management of the.eu TLD by the Registry. The contract between the Commission and the Registry shall be limited in time and renewable.

The Registry may not accept registrations until the registration policy is in place.

- 2. The Registry shall be a non-profit organisation, formed in accordance with the law of a Member State and having its registered office, central administration and principal place of business within the Community.
- 3. Having obtained the prior consent of the Commission, the Registry shall enter into the appropriate contract providing for the delegation of the.eu ccTLD code. To this effect the relevant principles adopted by the Governmental Advisory Committee shall be taken into account.
- 4. The.eu TLD Registry shall not act itself as Registrar.

Article 4

Obligations of the Registry

- 1. The Registry shall observe the rules, policies and procedures laid down in this Regulation and the contracts referred to in Article 3. The Registry shall observe transparent and non-discriminatory procedures.

2. The Registry shall:

- (a) organise, administer and manage the.eu TLD in the general interest and on the basis of principles of quality, efficiency, reliability and accessibility;
- (b) register domain names in the.eu TLD through any accredited.eu Registrar requested by any:
 - (i) undertaking having its registered office, central administration or principal place of business within the Community, or
 - (ii) organisation established within the Community without prejudice to the application of national law, or
 - (iii) natural person resident within the Community;
- (c) impose fees directly related to costs incurred;
- (d) implement the extra-judicial settlement of conflicts policy based on recovery of costs and a procedure to resolve promptly disputes between domain name holders regarding rights relating to names including intellectual property rights as well as disputes in relation to individual decisions by the Registry. This policy shall be adopted in accordance with Article 5(1) and take into consideration the recommendations of the World Intellectual Property Organisation. The policy shall provide adequate procedural guarantees for the parties concerned, and shall apply without prejudice to any court proceeding;
- (e) adopt procedures for, and carry out, accreditation of.eu Registrars and ensure effective and fair conditions of competition among.eu Registrars;
- (f) ensure the integrity of the databases of domain names.

Article 5

Policy framework

1. After consulting the Registry and following the procedure referred to in Article 6(3), the Commission shall adopt public policy rules concerning the implementation and functions of the.eu TLD and the public policy principles on registration. Public policy shall include:

- (a) an extra-judicial settlement of conflicts policy;
- (b) public policy on speculative and abusive registration of domain names including the possibility of registrations of domain names in a phased manner to ensure appropriate temporary opportunities for the holders of prior rights recognised or established by national and/or Community law and for public bodies to register their names;
- (c) policy on possible revocation of domain names, including the question of bona vacantia,
- (d) issues of language and geographical concepts;
- (e) treatment of intellectual property and other rights.

2. Within three months of the entry into force of this Regulation, Member States may notify to the Commission and to the other Member States a limited list of broadly-recognised names with regard to geographical and/or geopolitical concepts which affect their political or territorial organisation that may either:

- (a) not be registered, or

(b) be registered only under a second level domain according to the public policy rules.

The Commission shall notify to the Registry without delay the list of notified names to which such criteria apply. The Commission shall publish the list at the same time as it notifies the Registry.

Where a Member State or the Commission within 30 days of publication raises an objection to an item included in a notified list, the Commission shall take measures, in accordance with the procedure referred to in Article 6(3), to remedy the situation.

3. Before starting registration operations, the Registry shall adopt the initial registration policy for the.eu TLD in consultation with the Commission and other interested parties. The Registry shall implement in the registration policy the public policy rules adopted pursuant to paragraph 1 taking into account the exception lists referred to in paragraph 2.

4. The Commission shall periodically inform the Committee referred to in Article 6 on the activities referred to in paragraph 3 of this Article.

Article 6

Committee

1. The Commission shall be assisted by the Communications Committee established by Article 22(1) of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive)(6). Until the Communications Committee is established pursuant to Decision 1999/468/EC, the Commission shall be assisted by the Committee established by Article 9 of Council Directive 90/387/EEC of 28 June 1990 on the establishment of the internal market for telecommunication services through the implementation of open network provision(7).

2. Where reference is made to this paragraph, Articles 3 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

3. Where reference is made to this paragraph, Articles 5 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months.

4. The Committee shall adopt its rules of procedure.

Article 7

Reservation of rights

The Community shall retain all rights relating to the.eu TLD including, in particular, intellectual property rights and other rights to the Registry databases required to ensure the implementation of this Regulation and the right to re-designate the Registry.

Article 8

Implementation report

The Commission shall submit a report to the European Parliament and the Council on the implementation, effectiveness and functioning of the.eu TLD one year after the adoption of this Regulation and thereafter every two years.

Article 9

Entry into force

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Communities.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Luxembourg, 22 April 2002.

Industrial Property

[↔ Industrial Property ↔ Domain Name](#)

Domain Name

For the last few years the European Commission has worked very hard on the creation of the TLD (top level domain) “.eu”. In 1999, following requests from the industry and Internet stakeholders in Europe, the European Commission initiated the process to create the .EU domain name as part of the eEurope Action Plan approved by the European Council in Feira (Portugal).

This initiative resulted in the adoption, on 22 April 2002, of the Council Regulation ([EC](#)) No 733/2002 on the Implementation of the Internet Level Domain ".eu" . This Regulation paved the way for the creation of the .eu TLD, intended to be the response of the European Union to the increasing importance of electronic commerce in particular and the information society in general, as an element of competitiveness and growth.

The intention of the .eu TLD is not to replace the existing national ccTLDs in the EU, but to complement them and to give its users the additional option of having a pan-European Internet identity for their web sites and e-mail addresses. The .eu TLD will however be managed and operated by a private sector, the Registry, a non-profit organisation.

The Commission Regulation ([EC](#)) No 874/2004 laying down public policy rules concerning the implementation and functions of the .eu Top Level Domain and the principles governing registration, was adopted on 28 April 2004 (including an Alternative Dispute Resolution (ADR) Policy) to be implemented by the Registry.

It will be run by a private, non-profit organization known as [EURid](#).

Strategy for the enforcement of intellectual property rights in third countries

Strategy for the enforcement of intellectual property rights in third countries

(2005/C 129/03)

INTRODUCTION

Violations of intellectual property rights (IPR) continue to increase, having reached, in recent years, industrial proportions. This happens despite the fact that, by now, most of the WTO members have adopted legislation implementing minimum standards of IPR enforcement. It is, therefore, essential for the European Union to increasingly focus on vigorous and effective implementation of the enforcement legislation.

This Strategy intends to be a contribution to the improvement of the situation in third countries. It is a logical sequence of recent initiatives like the Enforcement Directive [1], that will harmonize enforcement legislation within the European Union, and the revision of the Customs Regulation [2], that provides action against counterfeit or pirated goods at the Community's border.

The purposes of the Strategy are to:

- Provide a long-term line of action for the Commission with the goal of achieving a significant reduction of the level of IPR violations in third countries;
- Describe, prioritise and coordinate the mechanisms available to the Commission services for achieving their goal [3];
- Inform right-holders and other entities concerned of the means and actions already available and to be implemented, and raise their awareness for the importance of their participation.
- Enhance cooperation with right-holders and other private entities concerned, by seeking their input on the identification of priorities and establishing public-private partnerships in fields like technical assistance, information to the public, etc.

This Strategy does not intend to:

- Impose unilateral solutions to the problem - It is clear that, ultimately, any proposed solutions will only be effective if they are prioritised and considered to be important by the recipient country. The Commission is ready to assist in the creation of such conditions.
- Propose a one-size-fits-all approach to promoting IPR enforcement - It will be necessary to have a flexible approach that takes into account different needs, level of development, membership or not of the World Trade Organisation (WTO), and main problems in terms of IPR (country of production, transit or consumption of infringing goods) of the countries in question.
- Copy other models of IPR enforcement or create alliances against certain countries - The Commission is ready and willing to improve cooperation and to create synergies with countries sharing its concerns and facing similar problems. It is, however, important that this strategy remains primarily focussed on positive and constructive efforts.

PROPOSED ACTIONS TO ADDRESS THE PROBLEM

1. Identifying the priority countries

It is important to identify a limited number of countries on which the efforts of the Commission in the framework of the present strategy should be concentrated (cf. Annex I, section 4). The human and financial resources allocated to the enforcement of IPR [4] being limited, it is unrealistic to pretend that our action can extend equally to all, or even most, of the countries where piracy

B2>52005XC0526(01)

and counterfeiting occur. Therefore, a mechanism to assess which are the most problematic countries/regions, or those where the action of the Community is most urgently required, will be an essential tool for the successful implementation of this strategy.

At the end of 2002, the Commission launched a survey to assess the situation in third countries regarding violations and enforcement of IPR [5]. By identifying with more accuracy the problems, the survey provided a diagnostic that allowed the Commission to develop the present strategy. At the same time, it gave substantial information to help identify those countries on which the priorities should be focused and to which the bulk of our limited resources should be allocated.

Specific actions:

- Put in place a mechanism that will periodically conduct an exercise similar to the "Survey on Enforcement of Intellectual Property Rights in Third Countries", based on a questionnaire distributed to entities like Commission Delegations, Embassies of Member States, right-holders and associations, Chambers of Commerce, etc. Replies will be analysed and results made available to the public. Such results, in conjunction with other reliable sources of information available to the Commission [6], should be the basis for renewing the list of the priority countries for the subsequent period.

2. Multilateral/Bilateral agreements

The Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPs) [7] has a detailed chapter dedicated to the setting of minimum standards of IPR enforcement and technical cooperation. It also provides for a structure responsible for monitoring the implementation of the provisions of the Agreement and for consultation between Members, i.e. the TRIPs Council. Finally, it puts in place a dispute prevention and settlement mechanism. These characteristics make TRIPs one of the most adequate and effective instruments to address problems related to IPR violations.

The numerous bilateral agreements established by the European Community contain a chapter dedicated to IP. This chapter usually establishes that a very high standard of protection of IP (including the enforcement thereof) must be achieved. Most agreements also include a clause allowing for technical cooperation in this field. These clauses must be carefully monitored and effectively implemented, notably with respect to the more "problematic" countries.

The institutional structures of these multilateral and bilateral agreements (TRIPs Council, Association Councils, the World Intellectual Property Organisation - WIPO, etc.) can be used to monitor and discuss legislation and enforcement problems from a very early stage. They allow for a structured political dialogue and can act as fora to submit new initiatives or to act as "early warning" for arising problems, before there is a need to adopt stricter measures.

It is also envisaged to make the enforcement clauses in future bilateral or bi-regional agreements more operational and to clearly define what the EU regards as the highest international standards in this area and what kind of efforts it expects from its trading partners.

Specific actions:

- The EU will consult other trading partners regarding the possibility of launching an initiative in the TRIPs Council highlighting the fact that the implementation of TRIPs requirements in national laws has proven to be insufficient to combat piracy and counterfeiting, and that the TRIPs Agreement itself has several shortcomings.
- For example, the TRIPs Council could consider in the future a number of actions to tackle the situation, including the extension of the obligation to make available customs measures to goods in transit and for export [8].
- Ensure a continued effort in the monitoring of the TRIPs compliance of legislation, in particular

B3>52005XC0526(01)

in the "priority" countries.

- Revisit the approach to the IPR chapter of bilateral agreements, including the clarification and strengthening of the enforcement clauses. Although in designing the rules for each specific negotiation it is important to take into account the situation and the capacity of our partners, instruments such as the new EU Directive harmonising the enforcement of IPR within the Community, as well as the new customs' Regulation on counterfeit and pirated goods may constitute an important source of inspiration and a useful benchmark.

- Raise more systematically enforcement concerns at Summit meetings and in the Councils/Committees created in the framework of these bilateral agreements. In order to allow the Commission to obtain an effective reaction from its counterparts, it is essential that it receives credible and detailed information from right-holders, either directly or via the EC Delegation or the embassies of the Member States in the countries concerned.

3. Political dialogue

The Commission must make clear to its trading partners that effective protection of IP, at least at the level set in TRIPs, is absolutely essential, and that the first step for fighting piracy and counterfeiting is an adequate level of enforcement at the source, i.e. in the countries where these goods are produced and exported. The Commission will also emphasize that effective enforcement is in most cases of mutual interest, be it for health or consumer reasons, or more broadly for these countries attractiveness to foreign investment. In its contacts, at different levels with the authorities of the countries concerned, the Commission must strongly convey the message that it is willing to assist them in raising the level of enforcement, but also that it will not refrain from using the instruments at its disposal in cases where deficient enforcement is harming its right-holders.

In addition, the Commission is increasing its cooperation with countries heavily affected by this type of practices and that share the Community's concerns, like Japan. This will result in an increased exchange of information and even in participation in joint initiatives in third countries. In addition, such "joint ventures" should produce a rationalisation of resources between countries sharing identical concerns and pursuing parallel initiatives.

Finally, the EC Delegations in the "problematic" countries can play an important role, by establishing close links with the local enforcement entities, with the Community right-holders operating in these countries and with the embassies of EU Member States and other countries concerned.

Specific actions:

- The message "improve your enforcement" should be repeated, as frequently and at as high a level as possible, in the Commission's contacts with authorities of the countries in question and in all appropriate fora, notably the WTO and WIPO. It must be perceived as a priority concern.

- This commitment to include IPR enforcement in the political dialogue is illustrated by the following initiatives:

- At the EU - Japan Summit of 2003, the Commission and Japan agreed to establish an improved dialogue in a number of areas, including IPR. An "EU - Japan Joint Initiative for IPR Enforcement in Asia" was established, focusing on elements like (a) the close follow-up of the progress of Asian countries in the field; (b) coordinating technical assistance programmes and responsibilities; (c) enhancing EU-Japan efforts to raise awareness in the fight against piracy and counterfeiting and to promote the strengthening of IPR enforcement; (d) exploring the possibility to cooperate in other areas of IPR. The initiative is implemented by an Annual Work Plan containing specific activities.

- The Commission and China agreed in the margins of the 2003 EU-China Summit to hold, at least

B4>52005XC0526(01)

once a year, a "EU-China Dialogue on Intellectual Property". Among other issues, the discussions should focus on efforts to combat piracy and counterfeiting, institutional reforms, enforcement-related areas such as central and sub-central enforcement by customs, police, administrative and judiciary bodies, public awareness of consumers and right-holders. The first meeting took place in October 2004.

- Basic training will be provided to officials in priority Delegations so that they can offer a minimum of information to entities with enforcement problems. The idea is to create some networking between Commission officials in Delegations and to establish closer teamwork between Delegations and the Headquarters. Teamwork will facilitate the compilation of information and the definition of targeted actions for the different countries and/or for a regional approach.

4. Incentives/Technical cooperation

Most of the countries with deficient enforcement will claim a lack of resources and the existence of more pressing priorities than protecting IP rights. IP enforcement is a complex and multi-disciplinary activity. It involves drafting legislation, training judges, police forces, customs officials and other experts, setting up agencies or task-forces, public awareness raising, etc. Most of these needs can be, and to some extent already have been, addressed by the Commission via technical cooperation programmes, but it is important to do more and better.

Technical assistance is an activity favoured by the EU for its contribution towards poverty alleviation and development. It is thus important to show that adequate IPR enforcement can contribute to this goal by making a link with investment opportunities, transfer of technology and know-how, protection of traditional knowledge, improvement of health and safety standards, etc.

It will be necessary to have a flexible approach that takes into account the recipient country's different needs, level of development, membership or not of the World Trade Organisation (WTO), and main problems in terms of IPR (country of production, transit or consumption of fake goods). Any cooperation programmes will only be effective if they are prioritised and indeed felt as important in the recipient country.

It is also relevant to share information and to ensure a minimum level of synergy between the main providers of technical assistance, such as WIPO, the World Customs Organisation (WCO), the Member States and third countries like Japan, the US and others.

Finally, the following difficulties must be stressed:

- (a) In most cases, technical cooperation is "demand driven", i.e. it requires a request by the beneficiary of the action. It is important to turn it into a "dialogue driven" request, by discussing its importance and benefits for the recipient.
- (b) It is a mid to long-term solution, with few immediate results. However, the present strategy is a long term one, and adequate enforcement is a goal that will not be achieved only by immediate actions, in particular in the case of least-developed countries, not yet bound by TRIPs requirements.
- (c) Implementing the programmes implies a complex administrative process. This is why further strengthening coordination between the Commission services responsible for the different aspects of IPR enforcement and between the Commission and third parties is an essential component of the present strategy.

Specific actions:

- Ensure that, at least, the countries identified as priorities are given the option to include intellectual property in the trade-related technical assistance programmes or to obtain specific IP programmes.
- In particular, the Commission would like to extend technical assistance to Latin America, since

B5>52005XC0526(01)

it is a region where enforcement can certainly be improved and where no programme is in place.

- There are a number of programmes that cover IPR. Some, like ECAP [9] I and II, for the ASEAN countries, or even the recently concluded EU-China IPR programme are specifically destined to provide assistance on IPR. Others are generally designed to cover trade related issues, but may include IPR among their objectives - WTO II [10] and Small Project Facility [11], for China; technical cooperation programmes under the framework of the Cotonou Agreement for the African, Caribbean and Pacific (ACP) countries; or the CARDS [12] programme, for the countries of the Balkans. The Commission will ensure that the component of IPR enforcement is adequately covered by these programmes.

- In the case of "production" countries, the focus in any cooperation programmes must shift from assistance in drafting legislation to a more enforcement-oriented strategy, including training programmes for judges, police, and customs.

- It must be pointed out that this practice is already being successfully implemented in the specific field of customs (DG TAXUD). There are a number of customs cooperation agreements that, inter alia, cover an essential tool of IPR enforcement (customs controls of fake goods). These agreements with countries like India and China (a new one is soon to be concluded) produce positive results in terms of training and of passing on our experience and methods to these countries. Furthermore, they illustrate how one can build on the existing TRIPs requirements (cf. the control of exports and goods in transit, in addition to the control of imports). It is likely that a similar agreement may be established with Japan still in 2004.

- Exchange ideas and information with other key providers of technical cooperation, like WIPO, the US, Japan and certain EU Member States, with the aim of avoiding duplication of efforts and sharing of best-practices.

- Improve the dialogue mechanisms with: (a) the WCO (under the coordination of DG TAXUD) to assess the compatibility of their technical assistance with our positions and the complementarity with our programmes; (b) WIPO and other providers of assistance (the European Patent Office, the Office of the EU Trademarks and Designs, etc.) to share information and to better coordinate strategies.

- Technical cooperation is also an important element of the TRIPs Agreement (Article 67) and it "fits" into the objectives of the Doha Development Agenda. It can be considered to take an enforcement-oriented initiative in this framework.

5. Dispute Settlement/Sanctions

No rule can be really effective without the threat of a sanction. Countries where IP violations are systematic, and where no government action to address the problem is effectively taken, could be publicly identified. As a last resort, consideration should be given to resorting to dispute settlement mechanisms provided for in multilateral and bilateral agreements.

The existing Trade Barriers Regulation (TBR) mechanism [13] could be a starting-point. TBR is a legal instrument that gives the right to Community enterprises and industries to lodge a complaint, which obliges the Commission to investigate and evaluate whether there is evidence of violation of international trade rules resulting in adverse trade effects. The result is that the procedure will lead to either a mutually agreed solution to the problem or recourse to dispute settlement.

The TBR has a broad scope of application, covering not only goods but also, to some extent, intellectual property rights and services, when the violation of rules concerning these rights has an impact on trade between the EC and a third country.

Resort to other trade related mechanisms could also be considered. For instance, the EU includes

B6>52005XC0526(01)

similar instruments in an increasing number of bilateral agreements that will be triggered in cases of non-compliance with the required high(est) standards of IP protection.

Deficient enforcement derives more frequently from the way the rules are (not) de facto implemented by the competent authorities than from an absence of legislation or a blatant contradiction of legislation with TRIPs requirements. However, when such deficiencies become systemic, they can substantiate a dispute settlement case.

Specific actions:

- Remind right-holders of the possibility to make use of the TBR mechanism in cases of evidence of violation of TRIPs or of the high(est) standards as agreed in bilateral agreements between the EC and third countries. This mechanism is launched by the lodging of a complaint.
- The Commission is ready, in clearly justified cases, to make ex officio use of the WTO dispute settlement mechanism and of the similar dispute settlement tools included in our bilateral agreements in case of non-compliance with the mutually accepted standards of IP protection.
- Consider other mechanisms which could be used to reduce the level of IPR violations in third countries.

6. Creation of public-private partnerships

There are numerous companies and associations which have been active in the fight against piracy/counterfeiting for many years. They constitute an invaluable source of information, but also a key partner for any awareness raising initiatives. Some of these entities are already present, and very active, in most problematic countries.

Other than the specific actions now proposed, there are within the Commission other examples of initiatives to create public-private partnerships that are directly or indirectly linked with IPR enforcement.

One of these projects involved the creation of Innovation Relay Centres, to support companies dealing with transfers of technology [14]. This project includes people with extensive experience in the IPR area (licensing, transfer of IP rights, etc) and could be used to collect information about enforcement problems in third countries. So far the network only covers the EU, but consideration is being given to extending it to third countries. There is a pilot project with an office in Chile.

There is also already in place the "IPR Help-Desk" [15], a project sponsored by the Commission to support creativity and innovation. The purpose of the Help-Desk is not to handle complaints but to provide information to the EU industry. It may therefore give guidance to companies facing violations of their rights in third countries.

Finally, the Commission has a long experience of involving private operators in their seminars and training programmes covering, in particular, border enforcement of IPR.

Specific actions:

- Support the creation of local IP networks involving companies, associations and chambers of commerce. This practice is already being implemented in certain key countries and will be actively supported by DG TRADE.
- Improve cooperation with companies and associations that are active in the fight against piracy/counterfeiting, inter alia by exchanging information about future initiatives and ensuring the cross-participation of experts from the Commission and from private entities in events organised by the other party.

7. Awareness raising/Drawing on our own experience

B7>52005XC0526(01)

Providing better information to the public is another very relevant dimension of the Strategy. This can be divided into the following components:

- (a) Raising the awareness of users/consumers in third countries. This must be done from two perspectives:
 - (a) to promote the benefits of IPR in terms of promotion of creativity, investment, transfer of technology, protection of traditions and quality;
 - (b) to inform about the dangers of IPR violations to public health, consumer protection, public security, etc.
- (b) Raising the awareness of right-holders. Again from two different perspectives:
 - (a) the risks incurred by trading in certain countries where IPR enforcement is ineffective and the minimum precautions that must be adopted, like registering the IP right in those countries (frequently, small and medium sized companies do not even apply for the protection of their intellectual property in third countries where they are producing or selling their goods);
 - (b) the need to use the means available in these third countries to enforce their rights. Countries which are members of the WTO (with the exception of least-developed countries) must have implemented minimum standards of IP protection and enforcement since 2000. It is clear that the first steps to protect and enforce IPRs must be taken by the right-holders themselves, and that they must use, to the maximum extent, the available mechanisms before being entitled to legitimately complain about the effectiveness of such protection and enforcement.

Specific actions:

- The Commission does not have the resources to pursue alone extensive awareness raising campaigns in third countries. However, this activity could be implemented by some of the abovementioned means, i.e. by inclusion in existing technical cooperation programmes and by public-private partnerships.
- The Commission services sponsored the drafting of a "Guidebook on Enforcement of Intellectual Property Rights". This Guidebook is mainly intended to assist public authorities of developing and least developed countries in their efforts to put in place systems and procedures for the effective enforcement of IPR. In particular, the guidebook considers the most common difficulties confronting those countries in the enforcement of IPR and provides guidance on how to achieve effective and long-lasting protection for such rights. The guidebook identifies useful resources which may be of assistance to authorities and right-holders facing difficulties.
- The Guidebook will be publicly available through the Commission website.

8. Institutional cooperation

The Commission services responsible for the different aspects of IPR enforcement will step up their coordination and cooperation with a view to enhancing the role of the Commission. Without creating an additional layer of bureaucracy, it is necessary to:

- (a) further improve information exchange and coordination between the services in charge of the different aspects of IPR enforcement;
- (b) simplify the identification and the access of external entities (right-holders, third country authorities, etc.) to the service responsible for the specific issue concerning them.

Specific actions:

- Inter-service meetings will be regularly organised to follow up the initiatives being implemented in the framework of the present strategy and to discuss the results obtained, as well as the inclusion of new initiatives. Furthermore, increased cooperation between the services involved with technical assistance issues will be introduced in order to promote IPR enforcement-related assistance to relevant third countries.
- In order to help third parties understand the distribution of tasks among the different Commission

B8>52005XC0526(01)

services:

- A new Commission webpage will be created, presenting: (a) the existing legislation to enforce IPR; (b) a vademecum on enforcement, including the Commission contact points for the various types of IP rights and aspects of their enforcement, as well as links to the various web-pages of the different services dealing with it.

- Cross-links will be inserted in the existing web-pages of each service dealing with certain aspects of IPR or certain sectors.

- Ensure coordination with other Commission initiatives linked with IPR, such as the Innovation Relay Centres and the IPR Help-Desk, and their effective contribution to the objective of the present Strategy by collecting and distributing information vis-à-vis the private sector.

[1] Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004, is available at:http://europa.eu.int/eur-lex/pri/en/oj/dat/2004/l_195/l_19520040602en00160025.pdf

[2] Council Regulation (EC) No 1383/2003 of 22 July 2003, is available at:http://europa.eu.int/comm/taxation_customs/customs/counterfeit_piracy/files/co_unterfeit_en.pdf

[3] This Strategy has no direct supplementary financial implications on the budget of the European Commission.

[4] Reference to intellectual property rights in this paper is made in its wider meaning, i.e., including copyright and related rights, but also trademarks, patents, designs, geographical indications, undisclosed information, etc.

[5] The complete results of the "Survey on Enforcement of Intellectual Property Rights in Third Countries", including a detailed report per country, for all the countries for which sufficient information was received, are available at:http://europa.eu.int/comm/trade/issues/sectoral/intell_property/survey_en.htm

[6] A valuable source of information about the origin, the itinerary and the nature of counterfeit and pirated goods destined to, or in transit via the Community are the annual statistics about the goods originating from third countries seized by Customs at the Community border. The report is released by DG TAXUD. The figures for 2003 can be found at:http://europa.eu.int/comm/taxation_customs/customs/counterfeit_piracy/index_en.htm

[7] Agreement on Trade-Related Aspects of Intellectual Property, Annex 1C to the Agreement establishing the World Trade Organisation (TRIPs, Marrakesh 1994).

[8] Article 51 of the TRIPs Agreement only stipulates the obligation for Members to have in place customs measures for imported goods.

[9] EC-ASEAN IPR Programme comprises a regional and a national component and covers all areas of IPR. It has a value of EUR 5 million. An additional EUR 2 million is planned, to take account of the inclusion of Laos, Cambodia and Vietnam. The project started in 2000 and has a duration of 5 years

[10] WTO II is the largest WTO related support programme in China, with a value of EUR 15 million over 5 years - to which China has indicated willingness to contribute with an additional 30 %. A chapter on IPR will be proposed. The programme should be launched before the end of 2004.

[11] Project designed to support small initiatives in China. With a total value of EUR 9,6 million, and a duration of 5 years, the initiatives are demand-driven, but the inclusion of IPR related projects will be actively encouraged.

[12] In the framework of the Community Assistance for Reconstruction, Development and Stabilisation (CARDS) programme for the Western Balkans, a project called "Industrial and Intellectual Property

B9>52005XC0526(01)

Rights" was launched in July 2003. The project will have a duration of 36 months and a value of EUR 2,25 million.

[13] Council Regulation (EC) No 3286/94 of 22 December 1994 laying down Community procedures in the field of the common commercial policy in order to ensure the exercise of the Community's rights under international trade rules, in particular those established under the auspices of the WTO.<http://europa.eu.int/comm/trade/issues/respectrules/tbr/legis/adgreg06a.htm>

ANNEX I

BACKGROUND

1. What is the problem?

The TRIPs Agreement establishes for the first time a single, comprehensive, multilateral set of rules covering all kinds of IPR. It contains also a detailed chapter setting minimum standards of IPR enforcement to be adopted by all members of the WTO.

However, despite the fact that, by now, most of the WTO members have adopted legislation implementing such minimum standards [1], the levels of piracy and counterfeiting continue to increase every year. These activities have, in recent years, assumed industrial proportions, because they offer considerable profit prospects with often a limited risk for the perpetrators.

It has thus become clearly insufficient to limit the efforts of the EC to merely monitoring the creation of general legislative frameworks in WTO member countries. It is essential that the EC increasingly focuses on vigorous and effective implementation of the enforcement legislation.

"37. The European Council calls upon the Commission and Member States to improve exploitation of intellectual property rights by taking forward measures against counterfeiting and piracy, which discourages the development of a market for digital goods and services; to protect patents on **computer implemented inventions**..."

[3] made a strong call for the increase in the fight against piracy and counterfeiting. As a consequence, the Commission (DG JAI) intends to launch a legislative initiative in 2004 in the form of a proposal for a Council Framework Decision on approximation of national legislation and sanctions on counterfeiting and piracy.

The situation is, however, different outside the borders of the Community. The internal instruments available to Community right-holders in the case of violations of their rights within the Community or in the case of imports of fake goods into the EU are not usable when these violations occur in third countries and the resulting goods are either consumed domestically or exported to other third countries. Although such violations occur outside, they directly affect Community right-holders.

2. Why and how much does it matter? To whom?

(a) European Community

Violation of IPR, which is reflected in the presence on the market of increasing volumes of pirated

B10>52005XC0526(01)

and counterfeit goods, has a very negative impact in a number of different areas. The Community, being a market that traditionally invests heavily in IP-protected goods and services and receives considerable added-value for this effort, is particularly affected by poor enforcement of IP, even when it takes place in third countries, and even if the pirated/counterfeit goods or services are not destined for the Community market. These are some of the adverse effects of IP violations:

Economic and social: Deprives right-holders of the revenue from their investment in R&D, marketing, creative effort, quality control, etc. Negatively affects market-share, sales volume, reputation, employment and ultimately the viability of certain IP-based activities/companies. High levels of IPR violations also discourage foreign investment and transfer of technology.

Health and consumer protection: Pirated and counterfeit goods are usually produced by anonymous entities that pay no heed to health, safety and quality requirements and provide no after-sales assistance, guarantees, operating instructions, etc... Illustrating this problem are growing seizures of fake medications, food (and even bottled water), car and plane parts, electrical appliances and toys.

Public order and security: A growing concern in recent years is the increased involvement of criminal organisations and sometimes even of terrorist groups in major international trafficking of counterfeit and pirated goods. This is explained by the particularly lucrative nature of these activities and by the lower risk [4] compared with other lucrative criminal activities. The scale of the problem and the sums of money involved render the situation regarding piracy as complex to tackle as drug trafficking or money laundering. Europol, Interpol and a number of police forces in the Community have created departments dealing specifically with it.

Fiscal: Being an illegal and clandestine practice by nature, and having lower prices it frequently deprives the state from tax revenue (VAT, revenue taxes, customs duties). This issue is particularly sensitive in countries where there are economic sectors under strict state control, like tobacco, alcoholic drinks, fuel, etc.

(b) Third countries

Why should third countries with little tradition in the IPR field, a restricted number of right-holders, and sometimes with a significant share of its industry and commerce benefiting from the violations, care?

The reply to this question is not entirely different from the one given for the Community (see above). The consequences of IPR violations in terms of consumer and health protection, organised crime and loss of fiscal revenue are relatively obvious and directly felt both in the Community and in the third countries where such violations predominantly occur. Consequently, these countries (should) have an immediate interest in combating piracy and counterfeiting.

Regarding the first point however (economic and social consequences), some will say that by enforcing the protection of IP rights held by Community companies, third countries will not obtain any direct benefit. It would appear, on the contrary, that they are using their resources to protect the investment of foreign entities (an argument frequently raised by certain countries). To counter this reasoning, the EC must get across the message that effective enforcement of IP rights (even if these belong to third parties) is an essential tool to attract foreign investment and the transfer of technology and know-how, as well as to protect local right-holders in developing and least-developed countries who are already suffering the misappropriation of their intellectual property [5]. It is a matter of good governance and international credibility, not to mention the need to comply with WTO and other international and bilateral commitments. In the mid-to-long term, it will also encourage domestic authors, inventors and investors and contribute to the development of these countries.

B11>52005XC0526(01)

Under-estimating the value of intellectual property rights contributes to ineffective enforcement. To enhance this aspect of the intellectual property rights system, it would be useful for some (fast) developing countries to assess the value of the industries based primarily on intellectual property rights [6]. This could lead to an appreciation of the value of intellectual property rights in terms of a country's economic environment, as well as in respect to economic, social and cultural growth and development.

There are, however, recent examples of countries where the emergence of a competitive and increasingly sophisticated economy is making evident the need to efficiently protect IP against domestic and external violations.

In some of the most "problematic" countries the authorities appear to be fully aware of the importance of IPR for the development of the country and domestic right-holders demand enforcement of IPR as rigorously as foreign right-holders. The problem is that the piracy/counterfeiting industry is an important element of their economy. It is therefore clear that there is a broader picture which cannot be tackled merely under the IP angle. Only a comprehensive policy involving authorities at national, regional and local level can provide a solution.

3. Which IP rights are violated and which sectors are most affected?

Most of them. One frequent misconception is that piracy and counterfeiting mainly affect some luxury, sports and clothing brands, music and software CDs/DVDs, and little else. The reality is that virtually every IP is being violated on a considerable scale and that the variety of fake products ranges from cereal boxes to plants and seeds, from aeroplane spare parts to sunglasses, from cigarettes to medications, from AA batteries to entire petrol stations. Big software producers are as likely to be harmed as small makers of a certain type of tea. The annual statistics published by the Commission's customs services regarding the number and the nature of seized pirated and counterfeit goods originating from third countries provide detailed and reliable information about the dimension and the growth of the problem [7].

The Commission considers that the vast majority of the problems affecting holders of the different types of intellectual property rights are common and consequently, are most effectively addressed by an integrated strategy. The strategy now proposed aims at improving enforcement against violations of all kinds of IP (copyright, trademarks, geographical indications, patents, designs, etc.).

4. How to define the "priority" countries?

There are several different criteria to define the most problematic countries in terms of enforcement of IPR [8]. These can be split into: (a) source countries; (b) transit countries, and (c) target countries. For each of these groups of countries, the type of measures most adequate to address the situation will differ.

(a) Source countries

These are the countries where production of pirated and counterfeit goods, both for domestic consumption and for export, reaches worrying dimensions. In cases of digital piracy via the internet, the origin of the IPR violation can be particularly difficult to detect.

In these countries it is particularly important to improve the effectiveness and the coordination of the police, the courts, the customs and the administration in general. It is also essential to ensure that the legal framework provides for deterrent sanctions.

(b) Transit countries

For the full picture, one should, however, not focus exclusively on countries violating IPR due to the massive production of counterfeited products occurring in their territories, but also on

B12>52005XC0526(01)

those often acting as a hub. This category includes countries appearing as major places of origin of fake goods seized in the Community, the problem occurring mainly because of the flow of fake products in transit and not because of domestic production of such goods. The large volume of goods originating in these countries is nevertheless indicative of deficient enforcement, at least at the level of border controls. Organised crime networks will take advantage of such weaknesses to establish different traffic routes, hiding the real origin of the goods.

Improving the availability of border measures and the effectiveness of customs authorities in particular regarding the transit of goods should help to substantially reduce the volume of traffic.

(c) Target countries

It is also important to consider, in any strategy to reduce the violations of IPR, the countries identified as the main final destinations of exports of fake goods or serving primarily as a market for such products.

Substantial volumes of sales of fake goods occur in almost all countries. The difficulty of defining countries that are main markets for pirated goods is that it is a very widespread problem, albeit for a variety of (sometimes contradictory) reasons: because they are too poor to buy IP-protected products, because such practice is accepted or at least not condemned, because they produce them in large quantities, because there is sometimes no way to distinguish between real and fake, or because fakes are cheaper. This is why it is necessary to concentrate resources on the main markets of the legitimate Community right-holders most affected by IPR violations.

Dealing with the consumption of pirated and counterfeit goods requires an effort in terms of building up public awareness about the negative impact and the risks of such practice. It also requires more effective customs controls of imported goods and a more effective reaction by the police and courts against those networks and individuals involved in large scale trading in such goods.

5. What is the situation in the Community?

Generally speaking, the Community and its Member States are acknowledged for protecting and enforcing IPR to very high standards, as the *acquis*, and in particular the recent efforts described in point 1 above, can demonstrate. Also in practical terms, reports like the one published annually by DG TAXUD [9] give a clear idea of the results achieved by the authorities of each Member State in terms of seizures of fake goods at the borders.

However, within the Community the level of enforcement is different among Member States. Some Member States still need to do more towards improving the current situation and cutting down remaining production and sale of pirated or counterfeit goods. The new Directive harmonising the enforcement of intellectual property rights within the Community will help to improve the situation.

6. Who are the key actors of IPR enforcement in the Commission?

Different Directorates-General (DGs) of the Commission are competent as regards the distinct aspects of IPR enforcement. In simple terms:

- DG Trade handles the external dimension (multilateral and bilateral) of the issue, i.e. enforcement in third countries. It also represents the European Community at the WTO and notably at the TRIPs Council.
- DG Internal Market (MARKT) is responsible for EU intellectual and industrial property policy and legislation and represents and leads negotiations on behalf of the European Community in various committees in WIPO. DG MARKT was the author of the above mentioned Enforcement Directive.
- DG Agriculture (AGRI) is responsible for internal and external EU policy and for EU legislation concerning geographical indications in agriculture and leads negotiations in these matters

B13>52005XC0526(01)

- DG Taxation and Customs Union (TAXUD) regulates the enforcement of IPR at the Community's external borders. DG TAXUD drafted the above mentioned Customs Regulation.
- DG Justice and Home Affairs (JAI) has shared regulatory responsibilities when IPR enforcement is linked with law enforcement both within and outside the Community. Specific "field" operations in the same area will be handled by the European Anti-Fraud Office (OLAF).
- DG Development (DEV) and DG External Relations (RELEX) coordinate, both centrally and via the EU Delegations in third countries, Community assistance to developing countries and least-developed countries, including in the area of Trade, while the Europe Aid Cooperation Office (AIDCO) manages any technical assistance programmes.
- Finally, DG Enterprise (ENTR), as manager of the IPR Help Desk [10], and with its close contacts with the industry (i.e. with a very important number of IP right-holders), is a key partner.

This is a very crucial point for the efficacy of the present Strategy. DG TRADE and other DGs with external responsibilities have an important and well defined role in terms of improving the enforcement of IPR in third countries. However, the most "operational" responsibilities of the fight against piracy and counterfeiting lie with Member States or with other DGs. The most visible and/or immediate results in this fight will always be achieved by the customs authorities, the police, national courts, the harmonisation of laws and procedures and the creation of information exchange mechanisms at Community level. In these (mainly domestic) areas DG TRADE can only provide a limited contribution. The situation is, however, different with regard to enforcement in third countries. In this case, DG TRADE and the Commission services with external responsibilities in these matters, with the cooperation of the EC Delegations in third countries, can certainly play a key role in achieving the implementation of the tasks proposed in the present Strategy.

[1] Least Developed Countries have until 2006, at least, to adapt their legislation to the TRIPs requirements.

[2] Copy available upon request sent to MARKT-E4@cec.eu.int

[3]

[4] In many countries other very lucrative criminal activities like drug trafficking carry considerable risks (even the death penalty) and are combated with considerable resources, while the trafficking of fake goods is seen as a relatively harmless practice.

[5] Cf. the cases of counterfeits of certain brands of rice wine in China or of a well-known local fish sauce brand in Vietnam.

[6] The Commission services published a study in 2003 entitled The economic importance of copyright (http://www.europa.eu.int/comm/internal_market/en/intprop/index.htm). Some countries, such as the USA and Finland produce such documents, namely for the copyright industries ("Copyright industries in the US Economy - Stephen E. Siwek & Gale Mosteller, prepared for the International Intellectual Property Alliance and The Economic Importance of Copyright Industries in Finland, the Finnish Copyright Society").

[7] http://europa.eu.int/comm/taxation_customs/customs/counterfeit_piracy/index_en.htm

[8] "Priority countries" can be identified on the basis of the following criteria:

- Information received from Community right-holders and other sources (Delegations, etc.) regarding IPR violations.
- Data regarding customs seizures of fake goods at the Community's borders.
- Relevance of the countries in terms of actual or potential volume of trade with the Community. The inclusion of a country in one or more of the categories reflects the level of relevance of

B14>52005XC0526(01)

the situation in that particular country from the Community perspective. Countries with reduced importance in terms of trade were not considered a priority. In any event, the situation in this area is constantly changing, therefore it will require continuous monitoring and updating.

Strategy for the enforcement of intellectual property rights in third countries

(2005/C 129/03)

INTRODUCTION

Violations of intellectual property rights (IPR) continue to increase, having reached, in recent years, industrial proportions. This happens despite the fact that, by now, most of the WTO members have adopted legislation implementing minimum standards of IPR enforcement. It is, therefore, essential for the European Union to increasingly focus on vigorous and effective implementation of the enforcement legislation.

This Strategy intends to be a contribution to the improvement of the situation in third countries. It is a logical sequence of recent initiatives like the Enforcement Directive [1], that will harmonize enforcement legislation within the European Union, and the revision of the Customs Regulation [2], that provides action against counterfeit or pirated goods at the Community's border.

The purposes of the Strategy are to:

- Provide a long-term line of action for the Commission with the goal of achieving a significant reduction of the level of IPR violations in third countries;
- Describe, prioritise and coordinate the mechanisms available to the Commission services for achieving their goal [3];
- Inform right-holders and other entities concerned of the means and actions already available and to be implemented, and raise their awareness for the importance of their participation.
- Enhance cooperation with right-holders and other private entities concerned, by seeking their input on the identification of priorities and establishing public-private partnerships in fields like technical assistance, information to the public, etc.

This Strategy does not intend to:

- Impose unilateral solutions to the problem - It is clear that, ultimately, any proposed solutions will only be effective if they are prioritised and considered to be important by the recipient country. The Commission is ready to assist in the creation of such conditions.
- Propose a one-size-fits-all approach to promoting IPR enforcement - It will be necessary to have a flexible approach that takes into account different needs, level of development, membership or not of the World Trade Organisation (WTO), and main problems in terms of IPR (country of production, transit or consumption of infringing goods) of the countries in question.
- Copy other models of IPR enforcement or create alliances against certain countries - The Commission is ready and willing to improve cooperation and to create synergies with countries sharing its concerns and facing similar problems. It is, however, important that this strategy remains primarily focussed on positive and constructive efforts.

PROPOSED ACTIONS TO ADDRESS THE PROBLEM

1. Identifying the priority countries

It is important to identify a limited number of countries on which the efforts of the Commission in the framework of the present strategy should be concentrated (cf. Annex I, section 4). The human and financial resources allocated to the enforcement of IPR [4] being limited, it is unrealistic to pretend that our action can extend equally to all, or even most, of the countries where piracy and counterfeiting occur. Therefore, a mechanism to assess which are the most problematic countries/regions, or those where the action of the Community is most urgently required, will be an essential tool for the successful implementation of this strategy.

At the end of 2002, the Commission launched a survey to assess the situation in third countries regarding violations and enforcement of IPR [5]. By identifying with more accuracy the problems, the survey provided a diagnostic that allowed the Commission to develop the present strategy. At the same time, it gave substantial information to help identify those countries on which the priorities should be focused and to which the bulk of our limited resources should be allocated.

Specific actions:

- Put in place a mechanism that will periodically conduct an exercise similar to the "Survey on Enforcement of Intellectual Property Rights in Third Countries", based on a questionnaire distributed to entities like Commission Delegations, Embassies of Member States, right-holders and associations, Chambers of Commerce, etc. Replies will be analysed and results made available to the public. Such results, in conjunction with other reliable sources of information available to the Commission [6], should be the basis for renewing the list of the priority countries for the subsequent period.

2. Multilateral/Bilateral agreements

The Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPs) [7] has a detailed chapter dedicated to the setting of minimum standards of IPR enforcement and technical cooperation. It also provides for a structure responsible for monitoring the implementation of the provisions of the Agreement and for consultation between Members, i.e. the TRIPs Council. Finally, it puts in place a dispute prevention and settlement mechanism. These characteristics make TRIPs one of the most adequate and effective instruments to address problems related to IPR violations.

The numerous bilateral agreements established by the European Community contain a chapter dedicated to IP. This chapter usually establishes that a very high standard of protection of IP (including the enforcement thereof) must be achieved. Most agreements also include a clause allowing for technical cooperation in this field. These clauses must be carefully monitored and effectively implemented, notably with respect to the more "problematic" countries.

The institutional structures of these multilateral and bilateral agreements (TRIPs Council, Association Councils, the World Intellectual Property Organisation - WIPO, etc.) can be used to monitor and discuss legislation and enforcement problems from a very early stage. They allow for a structured political dialogue and can act as fora to submit new initiatives or to act as "early warning" for arising problems, before there is a need to adopt stricter measures.

It is also envisaged to make the enforcement clauses in future bilateral or bi-regional agreements more operational and to clearly define what the EU regards as the highest international standards in this area and what kind of efforts it expects from its trading partners.

Specific actions:

- The EU will consult other trading partners regarding the possibility of launching an initiative in the TRIPs Council highlighting the fact that the implementation of TRIPs requirements in national laws has proven to be insufficient to combat piracy and counterfeiting, and that the TRIPs Agreement itself has several shortcomings.

B16>52005XC0526(01)

-
- For example, the TRIPs Council could consider in the future a number of actions to tackle the situation, including the extension of the obligation to make available customs measures to goods in transit and for export [8].
 - Ensure a continued effort in the monitoring of the TRIPs compliance of legislation, in particular in the "priority" countries.
 - Revisit the approach to the IPR chapter of bilateral agreements, including the clarification and strengthening of the enforcement clauses. Although in designing the rules for each specific negotiation it is important to take into account the situation and the capacity of our partners, instruments such as the new EU Directive harmonising the enforcement of IPR within the Community, as well as the new customs' Regulation on counterfeit and pirated goods may constitute an important source of inspiration and a useful benchmark.
 - Raise more systematically enforcement concerns at Summit meetings and in the Councils/Committees created in the framework of these bilateral agreements. In order to allow the Commission to obtain an effective reaction from its counterparts, it is essential that it receives credible and detailed information from right-holders, either directly or via the EC Delegation or the embassies of the Member States in the countries concerned.

3. Political dialogue

The Commission must make clear to its trading partners that effective protection of IP, at least at the level set in TRIPs, is absolutely essential, and that the first step for fighting piracy and counterfeiting is an adequate level of enforcement at the source, i.e. in the countries where these goods are produced and exported. The Commission will also emphasize that effective enforcement is in most cases of mutual interest, be it for health or consumer reasons, or more broadly for these countries attractiveness to foreign investment. In its contacts, at different levels with the authorities of the countries concerned, the Commission must strongly convey the message that it is willing to assist them in raising the level of enforcement, but also that it will not refrain from using the instruments at its disposal in cases where deficient enforcement is harming its right-holders.

In addition, the Commission is increasing its cooperation with countries heavily affected by this type of practices and that share the Community's concerns, like Japan. This will result in an increased exchange of information and even in participation in joint initiatives in third countries. In addition, such "joint ventures" should produce a rationalisation of resources between countries sharing identical concerns and pursuing parallel initiatives.

Finally, the EC Delegations in the "problematic" countries can play an important role, by establishing close links with the local enforcement entities, with the Community right-holders operating in these countries and with the embassies of EU Member States and other countries concerned.

Specific actions:

- The message "improve your enforcement" should be repeated, as frequently and at as high a level as possible, in the Commission's contacts with authorities of the countries in question and in all appropriate fora, notably the WTO and WIPO. It must be perceived as a priority concern.
- This commitment to include IPR enforcement in the political dialogue is illustrated by the following initiatives:
 - At the EU - Japan Summit of 2003, the Commission and Japan agreed to establish an improved dialogue in a number of areas, including IPR. An "EU - Japan Joint Initiative for IPR Enforcement in Asia" was established, focusing on elements like (a) the close follow-up of the progress of Asian countries in the field; (b) coordinating technical assistance programmes and responsibilities; (c) enhancing EU-Japan efforts to raise awareness in the fight against piracy and counterfeiting

B17>52005XC0526(01)

and to promote the strengthening of IPR enforcement; (d) exploring the possibility to cooperate in other areas of IPR. The initiative is implemented by an Annual Work Plan containing specific activities.

- The Commission and China agreed in the margins of the 2003 EU-China Summit to hold, at least once a year, a "EU-China Dialogue on Intellectual Property". Among other issues, the discussions should focus on efforts to combat piracy and counterfeiting, institutional reforms, enforcement-related areas such as central and sub-central enforcement by customs, police, administrative and judiciary bodies, public awareness of consumers and right-holders. The first meeting took place in October 2004.

- Basic training will be provided to officials in priority Delegations so that they can offer a minimum of information to entities with enforcement problems. The idea is to create some networking between Commission officials in Delegations and to establish closer teamwork between Delegations and the Headquarters. Teamwork will facilitate the compilation of information and the definition of targeted actions for the different countries and/or for a regional approach.

4. Incentives/Technical cooperation

Most of the countries with deficient enforcement will claim a lack of resources and the existence of more pressing priorities than protecting IP rights. IP enforcement is a complex and multi-disciplinary activity. It involves drafting legislation, training judges, police forces, customs officials and other experts, setting up agencies or task-forces, public awareness raising, etc. Most of these needs can be, and to some extent already have been, addressed by the Commission via technical cooperation programmes, but it is important to do more and better.

Technical assistance is an activity favoured by the EU for its contribution towards poverty alleviation and development. It is thus important to show that adequate IPR enforcement can contribute to this goal by making a link with investment opportunities, transfer of technology and know-how, protection of traditional knowledge, improvement of health and safety standards, etc.

It will be necessary to have a flexible approach that takes into account the recipient country's different needs, level of development, membership or not of the World Trade Organisation (WTO), and main problems in terms of IPR (country of production, transit or consumption of fake goods). Any cooperation programmes will only be effective if they are prioritised and indeed felt as important in the recipient country.

It is also relevant to share information and to ensure a minimum level of synergy between the main providers of technical assistance, such as WIPO, the World Customs Organisation (WCO), the Member States and third countries like Japan, the US and others.

Finally, the following difficulties must be stressed:

- (a) In most cases, technical cooperation is "demand driven", i.e. it requires a request by the beneficiary of the action. It is important to turn it into a "dialogue driven" request, by discussing its importance and benefits for the recipient.
- (b) It is a mid to long-term solution, with few immediate results. However, the present strategy is a long term one, and adequate enforcement is a goal that will not be achieved only by immediate actions, in particular in the case of least-developed countries, not yet bound by TRIPs requirements.
- (c) Implementing the programmes implies a complex administrative process. This is why further strengthening coordination between the Commission services responsible for the different aspects of IPR enforcement and between the Commission and third parties is an essential component of the present strategy.

Specific actions:

B18>52005XC0526(01)

-
- Ensure that, at least, the countries identified as priorities are given the option to include intellectual property in the trade-related technical assistance programmes or to obtain specific IP programmes.
 - In particular, the Commission would like to extend technical assistance to Latin America, since it is a region where enforcement can certainly be improved and where no programme is in place.
 - There are a number of programmes that cover IPR. Some, like ECAP [9] I and II, for the ASEAN countries, or even the recently concluded EU-China IPR programme are specifically destined to provide assistance on IPR. Others are generally designed to cover trade related issues, but may include IPR among their objectives - WTO II [10] and Small Project Facility [11], for China; technical cooperation programmes under the framework of the Cotonou Agreement for the African, Caribbean and Pacific (ACP) countries; or the CARDS [12] programme, for the countries of the Balkans. The Commission will ensure that the component of IPR enforcement is adequately covered by these programmes.
 - In the case of "production" countries, the focus in any cooperation programmes must shift from assistance in drafting legislation to a more enforcement-oriented strategy, including training programmes for judges, police, and customs.
 - It must be pointed out that this practice is already being successfully implemented in the specific field of customs (DG TAXUD). There are a number of customs cooperation agreements that, inter alia, cover an essential tool of IPR enforcement (customs controls of fake goods). These agreements with countries like India and China (a new one is soon to be concluded) produce positive results in terms of training and of passing on our experience and methods to these countries. Furthermore, they illustrate how one can build on the existing TRIPs requirements (cf. the control of exports and goods in transit, in addition to the control of imports). It is likely that a similar agreement may be established with Japan still in 2004.
 - Exchange ideas and information with other key providers of technical cooperation, like WIPO, the US, Japan and certain EU Member States, with the aim of avoiding duplication of efforts and sharing of best-practices.
 - Improve the dialogue mechanisms with: (a) the WCO (under the coordination of DG TAXUD) to assess the compatibility of their technical assistance with our positions and the complementarity with our programmes; (b) WIPO and other providers of assistance (the European Patent Office, the Office of the EU Trademarks and Designs, etc.) to share information and to better coordinate strategies.
 - Technical cooperation is also an important element of the TRIPs Agreement (Article 67) and it "fits" into the objectives of the Doha Development Agenda. It can be considered to take an enforcement-oriented initiative in this framework.

5. Dispute Settlement/Sanctions

No rule can be really effective without the threat of a sanction. Countries where IP violations are systematic, and where no government action to address the problem is effectively taken, could be publicly identified. As a last resort, consideration should be given to resorting to dispute settlement mechanisms provided for in multilateral and bilateral agreements.

The existing Trade Barriers Regulation (TBR) mechanism [13] could be a starting-point. TBR is a legal instrument that gives the right to Community enterprises and industries to lodge a complaint, which obliges the Commission to investigate and evaluate whether there is evidence of violation of international trade rules resulting in adverse trade effects. The result is that the procedure will lead to either a mutually agreed solution to the problem or recourse to dispute settlement.

The TBR has a broad scope of application, covering not only goods but also, to some extent, intellectual

B19>52005XC0526(01)

property rights and services, when the violation of rules concerning these rights has an impact on trade between the EC and a third country.

Resort to other trade related mechanisms could also be considered. For instance, the EU includes similar instruments in an increasing number of bilateral agreements that will be triggered in cases of non-compliance with the required high(est) standards of IP protection.

Deficient enforcement derives more frequently from the way the rules are (not) de facto implemented by the competent authorities than from an absence of legislation or a blatant contradiction of legislation with TRIPs requirements. However, when such deficiencies become systemic, they can substantiate a dispute settlement case.

Specific actions:

- Remind right-holders of the possibility to make use of the TBR mechanism in cases of evidence of violation of TRIPs or of the high(est) standards as agreed in bilateral agreements between the EC and third countries. This mechanism is launched by the lodging of a complaint.
- The Commission is ready, in clearly justified cases, to make ex officio use of the WTO dispute settlement mechanism and of the similar dispute settlement tools included in our bilateral agreements in case of non-compliance with the mutually accepted standards of IP protection.
- Consider other mechanisms which could be used to reduce the level of IPR violations in third countries.

6. Creation of public-private partnerships

There are numerous companies and associations which have been active in the fight against piracy/counterfeiting for many years. They constitute an invaluable source of information, but also a key partner for any awareness raising initiatives. Some of these entities are already present, and very active, in most problematic countries.

Other than the specific actions now proposed, there are within the Commission other examples of initiatives to create public-private partnerships that are directly or indirectly linked with IPR enforcement.

One of these projects involved the creation of Innovation Relay Centres, to support companies dealing with transfers of technology [14]. This project includes people with extensive experience in the IPR area (licensing, transfer of IP rights, etc) and could be used to collect information about enforcement problems in third countries. So far the network only covers the EU, but consideration is being given to extending it to third countries. There is a pilot project with an office in Chile.

There is also already in place the "IPR Help-Desk" [15], a project sponsored by the Commission to support creativity and innovation. The purpose of the Help-Desk is not to handle complaints but to provide information to the EU industry. It may therefore give guidance to companies facing violations of their rights in third countries.

Finally, the Commission has a long experience of involving private operators in their seminars and training programmes covering, in particular, border enforcement of IPR.

Specific actions:

- Support the creation of local IP networks involving companies, associations and chambers of commerce. This practice is already being implemented in certain key countries and will be actively supported by DG TRADE.
- Improve cooperation with companies and associations that are active in the fight against piracy/counterfeiting, inter alia by exchanging information about future initiatives and ensuring the cross-participation

B20>52005XC0526(01)

of experts from the Commission and from private entities in events organised by the other party.

7. Awareness raising/Drawing on our own experience

Providing better information to the public is another very relevant dimension of the Strategy. This can be divided into the following components:

- (a) Raising the awareness of users/consumers in third countries. This must be done from two perspectives:
 - (a) to promote the benefits of IPR in terms of promotion of creativity, investment, transfer of technology, protection of traditions and quality;
 - (b) to inform about the dangers of IPR violations to public health, consumer protection, public security, etc.
- (b) Raising the awareness of right-holders. Again from two different perspectives:
 - (a) the risks incurred by trading in certain countries where IPR enforcement is ineffective and the minimum precautions that must be adopted, like registering the IP right in those countries (frequently, small and medium sized companies do not even apply for the protection of their intellectual property in third countries where they are producing or selling their goods);
 - (b) the need to use the means available in these third countries to enforce their rights. Countries which are members of the WTO (with the exception of least-developed countries) must have implemented minimum standards of IP protection and enforcement since 2000. It is clear that the first steps to protect and enforce IPRs must be taken by the right-holders themselves, and that they must use, to the maximum extent, the available mechanisms before being entitled to legitimately complain about the effectiveness of such protection and enforcement.

Specific actions:

- The Commission does not have the resources to pursue alone extensive awareness raising campaigns in third countries. However, this activity could be implemented by some of the abovementioned means, i.e. by inclusion in existing technical cooperation programmes and by public-private partnerships.
- The Commission services sponsored the drafting of a "Guidebook on Enforcement of Intellectual Property Rights". This Guidebook is mainly intended to assist public authorities of developing and least developed countries in their efforts to put in place systems and procedures for the effective enforcement of IPR. In particular, the guidebook considers the most common difficulties confronting those countries in the enforcement of IPR and provides guidance on how to achieve effective and long-lasting protection for such rights. The guidebook identifies useful resources which may be of assistance to authorities and right-holders facing difficulties.
- The Guidebook will be publicly available through the Commission website.

8. Institutional cooperation

The Commission services responsible for the different aspects of IPR enforcement will step up their coordination and cooperation with a view to enhancing the role of the Commission. Without creating an additional layer of bureaucracy, it is necessary to:

- (a) further improve information exchange and coordination between the services in charge of the different aspects of IPR enforcement;
- (b) simplify the identification and the access of external entities (right-holders, third country authorities, etc.) to the service responsible for the specific issue concerning them.

Specific actions:

- Inter-service meetings will be regularly organised to follow up the initiatives being implemented in the framework of the present strategy and to discuss the results obtained, as well as the inclusion of new initiatives. Furthermore, increased cooperation between the services involved with technical

B21>52005XC0526(01)

assistance issues will be introduced in order to promote IPR enforcement-related assistance to relevant third countries.

- In order to help third parties understand the distribution of tasks among the different Commission services:
- A new Commission webpage will be created, presenting: (a) the existing legislation to enforce IPR; (b) a vademecum on enforcement, including the Commission contact points for the various types of IP rights and aspects of their enforcement, as well as links to the various web-pages of the different services dealing with it.
- Cross-links will be inserted in the existing web-pages of each service dealing with certain aspects of IPR or certain sectors.
- Ensure coordination with other Commission initiatives linked with IPR, such as the Innovation Relay Centres and the IPR Help-Desk, and their effective contribution to the objective of the present Strategy by collecting and distributing information vis-à-vis the private sector.

[1] Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004, is available at:http://europa.eu.int/eur-lex/pri/en/oj/dat/2004/l_195/l_19520040602en00160025.pdf

[2] Council Regulation (EC) No 1383/2003 of 22 July 2003, is available at:http://europa.eu.int/comm/taxation_customs/customs/counterfeit_piracy/files/co_unterfeit_en.pdf

[3] This Strategy has no direct supplementary financial implications on the budget of the European Commission.

[4] Reference to intellectual property rights in this paper is made in its wider meaning, i.e., including copyright and related rights, but also trademarks, patents, designs, geographical indications, undisclosed information, etc.

[5] The complete results of the "Survey on Enforcement of Intellectual Property Rights in Third Countries", including a detailed report per country, for all the countries for which sufficient information was received, are available at:http://europa.eu.int/comm/trade/issues/sectoral/intell_property/survey_en.htm

[6] A valuable source of information about the origin, the itinerary and the nature of counterfeit and pirated goods destined to, or in transit via the Community are the annual statistics about the goods originating from third countries seized by Customs at the Community border. The report is released by DG TAXUD. The figures for 2003 can be found at:http://europa.eu.int/comm/taxation_customs/customs/counterfeit_piracy/index_en.htm

[7] Agreement on Trade-Related Aspects of Intellectual Property, Annex 1C to the Agreement establishing the World Trade Organisation (TRIPs, Marrakesh 1994).

[8] Article 51 of the TRIPs Agreement only stipulates the obligation for Members to have in place customs measures for imported goods.

[9] EC-ASEAN IPR Programme comprises a regional and a national component and covers all areas of IPR. It has a value of EUR 5 million. An additional EUR 2 million is planned, to take account of the inclusion of Laos, Cambodia and Vietnam. The project started in 2000 and has a duration of 5 years

[10] WTO II is the largest WTO related support programme in China, with a value of EUR 15 million over 5 years - to which China has indicated willingness to contribute with an additional 30 %. A chapter on IPR will be proposed. The programme should be launched before the end of 2004.

[11] Project designed to support small initiatives in China. With a total value of EUR 9,6 million, and a duration of 5 years, the initiatives are demand-driven, but the inclusion of IPR related

B22>52005XC0526(01)

projects will be actively encouraged.

[12] In the framework of the Community Assistance for Reconstruction, Development and Stabilisation (CARDS) programme for the Western Balkans, a project called "Industrial and Intellectual Property Rights" was launched in July 2003. The project will have a duration of 36 months and a value of EUR 2,25 million.

[13] Council Regulation (EC) No 3286/94 of 22 December 1994 laying down Community procedures in the field of the common commercial policy in order to ensure the exercise of the Community's rights under international trade rules, in particular those established under the auspices of the WTO.<http://europa.eu.int/comm/trade/issues/respectrules/tbr/legis/adgreg06a.htm>

[14] This project is managed by DG ENTR. For more information see:<http://europa.eu.int/comm/enterprise/innovation/networks.htm>

ANNEX I

BACKGROUND

1. What is the problem?

The TRIPs Agreement establishes for the first time a single, comprehensive, multilateral set of rules covering all kinds of IPR. It contains also a detailed chapter setting minimum standards of IPR enforcement to be adopted by all members of the WTO.

However, despite the fact that, by now, most of the WTO members have adopted legislation implementing such minimum standards [1], the levels of piracy and counterfeiting continue to increase every year. These activities have, in recent years, assumed industrial proportions, because they offer considerable profit prospects with often a limited risk for the perpetrators.

It has thus become clearly insufficient to limit the efforts of the EC to merely monitoring the creation of general legislative frameworks in WTO member countries. It is essential that the EC increasingly focuses on vigorous and effective implementation of the enforcement legislation.

"37. The European Council calls upon the Commission and Member States to improve exploitation of intellectual property rights by taking forward measures against counterfeiting and piracy, which discourages the development of a market for digital goods and services; to protect patents on [computer implemented inventions...](#)"

[3] made a strong call for the increase in the fight against piracy and counterfeiting. As a consequence, the Commission (DG JAI) intends to launch a legislative initiative in 2004 in the form of a proposal for a Council Framework Decision on approximation of national legislation and sanctions on counterfeiting and piracy.

The situation is, however, different outside the borders of the Community. The internal instruments available to Community right-holders in the case of violations of their rights within the Community or in the case of imports of fake goods into the EU are not usable when these violations occur in third countries and the resulting goods are either consumed domestically or exported to other third countries. Although such violations occur outside, they directly affect Community right-holders.

2. Why and how much does it matter? To whom?

B23>52005XC0526(01)

(a) European Community

Violation of IPR, which is reflected in the presence on the market of increasing volumes of pirated and counterfeit goods, has a very negative impact in a number of different areas. The Community, being a market that traditionally invests heavily in IP-protected goods and services and receives considerable added-value for this effort, is particularly affected by poor enforcement of IP, even when it takes place in third countries, and even if the pirated/counterfeit goods or services are not destined for the Community market. These are some of the adverse effects of IP violations:

Economic and social: Deprives right-holders of the revenue from their investment in R&D, marketing, creative effort, quality control, etc. Negatively affects market-share, sales volume, reputation, employment and ultimately the viability of certain IP-based activities/companies. High levels of IPR violations also discourage foreign investment and transfer of technology.

Health and consumer protection: Pirated and counterfeit goods are usually produced by anonymous entities that pay no heed to health, safety and quality requirements and provide no after-sales assistance, guarantees, operating instructions, etc... Illustrating this problem are growing seizures of fake medications, food (and even bottled water), car and plane parts, electrical appliances and toys.

Public order and security: A growing concern in recent years is the increased involvement of criminal organisations and sometimes even of terrorist groups in major international trafficking of counterfeit and pirated goods. This is explained by the particularly lucrative nature of these activities and by the lower risk [4] compared with other lucrative criminal activities. The scale of the problem and the sums of money involved render the situation regarding piracy as complex to tackle as drug trafficking or money laundering. Europol, Interpol and a number of police forces in the Community have created departments dealing specifically with it.

Fiscal: Being an illegal and clandestine practice by nature, and having lower prices it frequently deprives the state from tax revenue (VAT, revenue taxes, customs duties). This issue is particularly sensitive in countries where there are economic sectors under strict state control, like tobacco, alcoholic drinks, fuel, etc.

(b) Third countries

Why should third countries with little tradition in the IPR field, a restricted number of right-holders, and sometimes with a significant share of its industry and commerce benefiting from the violations, care?

The reply to this question is not entirely different from the one given for the Community (see above). The consequences of IPR violations in terms of consumer and health protection, organised crime and loss of fiscal revenue are relatively obvious and directly felt both in the Community and in the third countries where such violations predominantly occur. Consequently, these countries (should) have an immediate interest in combating piracy and counterfeiting.

Regarding the first point however (economic and social consequences), some will say that by enforcing the protection of IP rights held by Community companies, third countries will not obtain any direct benefit. It would appear, on the contrary, that they are using their resources to protect the investment of foreign entities (an argument frequently raised by certain countries). To counter this reasoning, the EC must get across the message that effective enforcement of IP rights (even if these belong to third parties) is an essential tool to attract foreign investment and the transfer of technology and know-how, as well as to protect local right-holders in developing and least-developed countries who are already suffering the misappropriation of their intellectual property [5]. It is a matter of good governance and international credibility, not to mention the need to comply with WTO and

B24>52005XC0526(01)

other international and bilateral commitments. In the mid-to-long term, it will also encourage domestic authors, inventors and investors and contribute to the development of these countries.

Under-estimating the value of intellectual property rights contributes to ineffective enforcement. To enhance this aspect of the intellectual property rights system, it would be useful for some (fast) developing countries to assess the value of the industries based primarily on intellectual property rights [6]. This could lead to an appreciation of the value of intellectual property rights in terms of a country's economic environment, as well as in respect to economic, social and cultural growth and development.

There are, however, recent examples of countries where the emergence of a competitive and increasingly sophisticated economy is making evident the need to efficiently protect IP against domestic and external violations.

In some of the most "problematic" countries the authorities appear to be fully aware of the importance of IPR for the development of the country and domestic right-holders demand enforcement of IPR as rigorously as foreign right-holders. The problem is that the piracy/counterfeiting industry is an important element of their economy. It is therefore clear that there is a broader picture which cannot be tackled merely under the IP angle. Only a comprehensive policy involving authorities at national, regional and local level can provide a solution.

3. Which IP rights are violated and which sectors are most affected?

Most of them. One frequent misconception is that piracy and counterfeiting mainly affect some luxury, sports and clothing brands, music and software CDs/DVDs, and little else. The reality is that virtually every IP is being violated on a considerable scale and that the variety of fake products ranges from cereal boxes to plants and seeds, from aeroplane spare parts to sunglasses, from cigarettes to medications, from AA batteries to entire petrol stations. Big software producers are as likely to be harmed as small makers of a certain type of tea. The annual statistics published by the Commission's customs services regarding the number and the nature of seized pirated and counterfeit goods originating from third countries provide detailed and reliable information about the dimension and the growth of the problem [7].

The Commission considers that the vast majority of the problems affecting holders of the different types of intellectual property rights are common and consequently, are most effectively addressed by an integrated strategy. The strategy now proposed aims at improving enforcement against violations of all kinds of IP (copyright, trademarks, geographical indications, patents, designs, etc.).

4. How to define the "priority" countries?

There are several different criteria to define the most problematic countries in terms of enforcement of IPR [8]. These can be split into: (a) source countries; (b) transit countries, and (c) target countries. For each of these groups of countries, the type of measures most adequate to address the situation will differ.

(a) Source countries

These are the countries where production of pirated and counterfeit goods, both for domestic consumption and for export, reaches worrying dimensions. In cases of digital piracy via the internet, the origin of the IPR violation can be particularly difficult to detect.

In these countries it is particularly important to improve the effectiveness and the coordination of the police, the courts, the customs and the administration in general. It is also essential to ensure that the legal framework provides for deterrent sanctions.

(b) Transit countries

B25>52005XC0526(01)

For the full picture, one should, however, not focus exclusively on countries violating IPR due to the massive production of counterfeited products occurring in their territories, but also on those often acting as a hub. This category includes countries appearing as major places of origin of fake goods seized in the Community, the problem occurring mainly because of the flow of fake products in transit and not because of domestic production of such goods. The large volume of goods originating in these countries is nevertheless indicative of deficient enforcement, at least at the level of border controls. Organised crime networks will take advantage of such weaknesses to establish different traffic routes, hiding the real origin of the goods.

Improving the availability of border measures and the effectiveness of customs authorities in particular regarding the transit of goods should help to substantially reduce the volume of traffic.

(c) Target countries

It is also important to consider, in any strategy to reduce the violations of IPR, the countries identified as the main final destinations of exports of fake goods or serving primarily as a market for such products.

Substantial volumes of sales of fake goods occur in almost all countries. The difficulty of defining countries that are main markets for pirated goods is that it is a very widespread problem, albeit for a variety of (sometimes contradictory) reasons: because they are too poor to buy IP-protected products, because such practice is accepted or at least not condemned, because they produce them in large quantities, because there is sometimes no way to distinguish between real and fake, or because fakes are cheaper. This is why it is necessary to concentrate resources on the main markets of the legitimate Community right-holders most affected by IPR violations.

Dealing with the consumption of pirated and counterfeit goods requires an effort in terms of building up public awareness about the negative impact and the risks of such practice. It also requires more effective customs controls of imported goods and a more effective reaction by the police and courts against those networks and individuals involved in large scale trading in such goods.

5. What is the situation in the Community?

Generally speaking, the Community and its Member States are acknowledged for protecting and enforcing IPR to very high standards, as the *acquis*, and in particular the recent efforts described in point 1 above, can demonstrate. Also in practical terms, reports like the one published annually by DG TAXUD [9] give a clear idea of the results achieved by the authorities of each Member State in terms of seizures of fake goods at the borders.

However, within the Community the level of enforcement is different among Member States. Some Member States still need to do more towards improving the current situation and cutting down remaining production and sale of pirated or counterfeit goods. The new Directive harmonising the enforcement of intellectual property rights within the Community will help to improve the situation.

6. Who are the key actors of IPR enforcement in the Commission?

Different Directorates-General (DGs) of the Commission are competent as regards the distinct aspects of IPR enforcement. In simple terms:

- DG Trade handles the external dimension (multilateral and bilateral) of the issue, i.e. enforcement in third countries. It also represents the European Community at the WTO and notably at the TRIPs Council.
- DG Internal Market (MARKT) is responsible for EU intellectual and industrial property policy and legislation and represents and leads negotiations on behalf of the European Community in various committees in WIPO. DG MARKT was the author of the above mentioned Enforcement Directive.

B26>52005XC0526(01)

- DG Agriculture (AGRI) is responsible for internal and external EU policy and for EU legislation concerning geographical indications in agriculture and leads negotiations in these matters
- DG Taxation and Customs Union (TAXUD) regulates the enforcement of IPR at the Community's external borders. DG TAXUD drafted the above mentioned Customs Regulation.
- DG Justice and Home Affairs (JAI) has shared regulatory responsibilities when IPR enforcement is linked with law enforcement both within and outside the Community. Specific "field" operations in the same area will be handled by the European Anti-Fraud Office (OLAF).
- DG Development (DEV) and DG External Relations (RELEX) coordinate, both centrally and via the EU Delegations in third countries, Community assistance to developing countries and least-developed countries, including in the area of Trade, while the Europe Aid Cooperation Office (AIDCO) manages any technical assistance programmes.
- Finally, DG Enterprise (ENTR), as manager of the IPR Help Desk [10], and with its close contacts with the industry (i.e. with a very important number of IP right-holders), is a key partner.

This is a very crucial point for the efficacy of the present Strategy. DG TRADE and other DGs with external responsibilities have an important and well defined role in terms of improving the enforcement of IPR in third countries. However, the most "operational" responsibilities of the fight against piracy and counterfeiting lie with Member States or with other DGs. The most visible and/or immediate results in this fight will always be achieved by the customs authorities, the police, national courts, the harmonisation of laws and procedures and the creation of information exchange mechanisms at Community level. In these (mainly domestic) areas DG TRADE can only provide a limited contribution. The situation is, however, different with regard to enforcement in third countries. In this case, DG TRADE and the Commission services with external responsibilities in these matters, with the cooperation of the EC Delegations in third countries, can certainly play a key role in achieving the implementation of the tasks proposed in the present Strategy.

[1] Least Developed Countries have until 2006, at least, to adapt their legislation to the TRIPs requirements.

[2] Copy available upon request sent to MARKT-E4@cec.eu.int

[3]

[4] In many countries other very lucrative criminal activities like drug trafficking carry considerable risks (even the death penalty) and are combated with considerable resources, while the trafficking of fake goods is seen as a relatively harmless practice.

[5] Cf. the cases of counterfeits of certain brands of rice wine in China or of a well-known local fish sauce brand in Vietnam.

[6] The Commission services published a study in 2003 entitled The economic importance of copyright (http://www.europa.eu.int/comm/internal_market/en/intprop/index.htm). Some countries, such as the USA and Finland produce such documents, namely for the copyright industries ("Copyright industries in the US Economy - Stephen E. Siwek & Gale Mosteller, prepared for the International Intellectual Property Alliance and The Economic Importance of Copyright Industries in Finland, the Finnish Copyright Society").

[7] http://europa.eu.int/comm/taxation_customs/customs/counterfeit_piracy/index_en.htm

[8] "Priority countries" can be identified on the basis of the following criteria:

- Information received from Community right-holders and other sources (Delegations, etc.) regarding IPR violations.
- Data regarding customs seizures of fake goods at the Community's borders.

B27>52005XC0526(01)

- Relevance of the countries in terms of actual or potential volume of trade with the Community. The inclusion of a country in one or more of the categories reflects the level of relevance of the situation in that particular country from the Community perspective. Countries with reduced importance in terms of trade were not considered a priority. In any event, the situation in this area is constantly changing, therefore it will require continuous monitoring and updating.

IP/06/532

Brussels, 26 April 2006

Counterfeiting and piracy: Commission proposes criminal law provisions to combat intellectual property offences

The Commission has today adopted a proposal for a directive to combat intellectual property offences that amends the proposal approved by it on 12 July 2005. It is thus responding to the Court ruling of 13 September 2005 in Case C-176/03, according to which the criminal law provisions necessary for the effective implementation of Community law are a matter for Community law^[1]. Accordingly, the proposal for a Council framework decision to strengthen the criminal law framework to combat intellectual property offences^[2] has been withdrawn and its provisions incorporated into the amended proposal for a directive.

According to Commission Vice-President Franco Frattini, who is responsible for justice, freedom and security matters, the new provisions proposed by the Commission represent the criminal law dimension of the fight against counterfeiting and piracy in Europe. Effective approximation of Member States' criminal legislation in this field is the minimum needed to pursue together a major campaign aimed at eradicating these phenomena, which are causing serious harm to the economy. Nowadays, criminal organisations are focusing on these activities, which are often more lucrative than other forms of trafficking and on which the authorities do not crack down as much. Counterfeiters and pirates undermine legitimate businesses and pose a threat to innovation. What is more, in many cases the counterfeit goods are prejudicial to public health and safety. For the most recent statistics on counterfeiting listed by Member State please see the link:

http://europa.eu.int/comm/taxation_customs/customs/customs_controls/counterfeit_piracy/statistics/index_en.htm

The proposed measures are designed to bring Member States' criminal legislation more closely into alignment and to improve European cooperation so as to combat more effectively counterfeiting and piracy, which are frequently committed by criminal organisations, often pose a risk to health and safety, and seriously harm the interests of many sectors in the European economy.

The arrangements will have to be applied to all types of intellectual property right infringements. In the directive, all intentional infringements of an intellectual property right on a commercial scale, including attempting, aiding and abetting such infringements, are treated as criminal offences. The minimum sentence is a term of four years' imprisonment where the infringement is committed under the aegis of a criminal organisation or carries a serious risk to the health and safety of individuals. The amount of the fine will have to be at least EUR 100 000 or EUR 300 000 where there is a link with a criminal organisation or any risk to health and safety. Member States may impose heavier penalties or fines.

Amended proposal for a Directive of the European Parliament and of the Council on criminal measures aimed at ensuring the enforcement of intellectual property rights

[pic] | COMMISSION OF THE EUROPEAN COMMUNITIES |

Brussels, 26.4.2006

COM(2006) 168 final

2005/0127 (COD)

Amended proposal for a

DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

on criminal measures aimed at ensuring the enforcement of intellectual property rights

(presented by the Commission)

EXPLANATORY MEMORANDUM

JUSTIFICATION FOR THE PROPOSAL

This proposal for a Directive amends the proposal for a Parliament and Council Directive on criminal measures aimed at ensuring the enforcement of intellectual property rights (2005/0127 COD). It puts into effect the Communication from the Commission of 23 November 2005 (COM(2005) 583 final) on the implications of the Court's judgment of 13 September 2005 (Case C [176/03](#) Commission v Council). It was held in that judgment that provisions of criminal law required for the effective implementation of Community law come under the EC Treaty. The Commission states in its Communication that it will make the necessary changes to pending proposals as and when required. It specifically mentions the proposal for a Parliament and Council Directive on criminal measures aimed at ensuring the enforcement of intellectual property rights and the proposal for a Council Framework Decision to strengthen the criminal law framework to combat intellectual property offences (COM(2005) 276 final). Consequently, the proposal for a Framework Decision has been withdrawn and a proposal drawn up amending the proposal for a Directive on criminal measures.

The provisions in the proposal for a Framework Decision relating to penalties and extended powers of confiscation have now been incorporated in the new proposal for a Directive.

The only provisions that have not been taken over are those relating to jurisdiction and the coordination of proceedings, contained in Article 5 of the proposal for a Framework Decision. The Commission plans to take a horizontal approach to this subject under its Green Paper on conflicts of jurisdiction and the principle of *ne bis in idem* in criminal proceedings, adopted on 23 December 2005 [1]. It does not consider it essential to lay down specific arrangements for the protection of intellectual property.

Counterfeiting and piracy, and infringements of intellectual property in general, are a constantly growing phenomenon which nowadays has an international dimension, since they are a serious threat to national economies and governments. The disparities between the national systems of penalties, apart from hampering the proper functioning of the internal market, make it difficult to combat counterfeiting and piracy effectively. In addition to the economic and social consequences, counterfeiting and piracy also pose problems for consumer protection, particularly when health and safety are at stake. Increasing use of the Internet enables pirated products to be distributed instantly around the globe. Finally, this phenomenon appears to be increasingly linked to organised crime. Combating this phenomenon is therefore of vital importance for the Community. Counterfeiting and pirating have become lucrative activities in the same way as other large-scale criminal activities such as drug trafficking. There are high potential profits to be made without risk of serious legal penalties.

Additional provisions to strengthen and improve the fight against counterfeiting and piracy are therefore necessary to supplement Directive 2004/48/EC of 29 April 2004 on the enforcement of intellectual property rights. In addition to the civil and administrative measures, procedures and remedies provided for in Directive 2004/48/EC, criminal penalties also constitute, in appropriate cases, a means of enforcing intellectual property rights[2].

A start was made on harmonisation with the entry into force of the TRIPS agreement which lays down minimum provisions on means of enforcing trade-related intellectual property rights. These include the implementation of criminal procedures and criminal penalties, but there are still major disparities in the legal situation in the Community which do not allow the holders of intellectual property rights to benefit from an equivalent level of protection throughout the Community. As regards criminal penalties, there are considerable differences, particularly as regards the level of punishment laid down by national legislation.

As regards impact on fundamental rights, it should be emphasised that the direct objective of this initiative is to implement Article 17(2) of the Charter of Fundamental Rights which states that Intellectual property shall be protected; it does this by approximation of legislation while respecting the different legal traditions and systems of the Member States as well as other fundamental rights and principles recognised by the Charter. The level of sentences has been chosen pursuant to the seriousness of the different forms of wrongful conduct, in accordance with Article 49(3) of the Charter to the effect that sentences should not be disproportionate to the offence.

Since this objective may be better achieved at Community level, the Community may take measures in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty.

Content of the proposal

Article 1

This Article sets out the subject-matter and scope of the Directive, which concerns the measures necessary to ensure the enforcement of intellectual property rights. As in Directive 2004/48/EC on the enforcement of intellectual property rights, the expression "intellectual property rights" encompasses all intellectual property rights. Just like Article 17(2) of the Charter of Fundamental Rights of the European Union, which provides that intellectual property shall be protected, this is a horizontal measure.

The Directive is to apply to any infringement of intellectual property rights as provided for by Community law and/or by the national law of the Member States, in the same way as Directive 2004/48/EC. Commission statement 2005/295/EC on Article 2 of Directive 2004/48/EC lists these rights, with the aim of providing greater legal certainty regarding the scope of the Directive[3]. The Directive is to apply without prejudice to more stringent provisions in the Member States.

Article 2

This Article defines the concept of a legal person for the purposes of the Directive.

Article 3

This Article obliges Member States to consider all intentional infringements of an intellectual property right on a commercial scale as a criminal offence. It also covers attempting, aiding or abetting and inciting such offences. The commercial scale criterion is borrowed from Article 61 of the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement), concluded on 15 April 1994 and signed by all the members of the World Trade Organisation. Article 61 obliges Members to provide for criminal procedures and penalties to be applied at least in cases of wilful trademark counterfeiting or copyright piracy on a commercial scale. Remedies available shall include imprisonment and/or monetary fines sufficient to provide a deterrent, consistently with the level of penalties applied for crimes of a corresponding gravity. In appropriate cases, remedies available shall also include the seizure, forfeiture and destruction of the infringing goods and of any materials and implements the predominant use of which has been in the commission of the offence. Members may provide for criminal procedures and penalties to be applied in other cases of infringement of intellectual property rights, in particular where they are committed wilfully and on a commercial scale.

The infringement must be intentional, that is to say that the act must be deliberate, whether it is an actual infringement, an attempt at infringement, or aiding and abetting or inciting such an offence. This does not affect specific liability systems such as the system laid down for Internet service providers in Articles 12 to 15 of Directive 2000/31/EC on electronic commerce[4].

Article 4

This article concerns the nature of penalties: besides imprisonment for natural persons, the Directive lays down a range of penalties to be imposed on both natural and legal persons, such as fines and the seizure of goods belonging to the offender, including the infringing goods and the materials, implements or media used predominantly for the manufacture or distribution of the goods in question. Other penalties are provided for specific cases: destruction of infringing goods and goods principally used in the manufacture of the goods in question, total or partial closure, on either a permanent or a temporary basis, of the establishment or shop primarily used to commit the infringement. Provision is also made for a permanent or temporary ban on engaging in commercial activities, placement under judicial supervision or judicial winding-up, and a ban on access to public assistance or subsidies. Finally, the publication of judicial decisions is provided for. This can serve as a means of dissuasion and as a channel of information both for right holders and for the public at large.

Article 5

This article concerns the level of criminal penalties: offences must incur a maximum term of at least four years' imprisonment when they are committed under the aegis of a criminal organisation. The same applies where the offences carry a health or safety risk. The threshold of four years' imprisonment was chosen because it broadly corresponds to the criterion used to identify a serious offence. It is the threshold selected in Joint Action 98/733/JHA and in the proposal for a Council Framework Decision on the fight against organised crime (COM(2005) 6 final) and in the United Nations Convention against Organised Transnational Crime. For natural persons or legal entities who commit the offences listed in Article 3, the penalties include criminal and non-criminal fines to a maximum of at least EUR 100 000 for cases other than the most serious cases and to a maximum of at least EUR 300 000 for offences carried out under the aegis of a criminal organisation or which carry a health or safety risk. It must be possible for this factor to be taken into account

where the risk is deemed to be present, even where the dangerous product has not yet caused any damage. A risk to personal health or safety exists where the counterfeit product placed on the market directly exposes people to a risk of illness or accident.

Article 6

This article provides for the full or partial confiscation of goods belonging to persons convicted of offences committed in the circumstances set out in Article 5. It refers to the provisions of Article 3 of Council Framework Decision 2005/212/JHA of 24 February 2005 on Confiscation of Crime-Related Proceeds, Instrumentalities and Property [5].

Article 7

The Framework Decision of 13 June 2002 provides the structure needed to set up joint investigation teams. To facilitate criminal investigations into intellectual property offences, the Member States must allow the holders of intellectual property rights concerned, or their representatives, and experts to assist the investigations carried out by these teams. It is very difficult to carry out investigations in this area and it is often essential to have the active participation of the victims, of representatives of the holder of the intellectual property rights or of experts in order to reach conclusions, and in particular to establish that products have been counterfeited. In the event of doubt, the victims or their representatives will thus be able to confirm rapidly whether the products discovered in an investigation have indeed been counterfeited. This will facilitate the search by joint investigation teams for evidence of intellectual property offences. Member States have a good deal of latitude in this regard.

Article 8

The purpose of this article is to ensure that investigations into, or prosecution of, counterfeiting and piracy offences are not dependent on a report or accusation made by a person subjected to the offence, at least if the acts were committed in the territory of the Member State. Such a measure is necessary to ensure that the conditions are right for carrying out investigations into intellectual property offences. It is often the case that stocks of suspected counterfeit products are discovered, but it is sometimes difficult to contact or even identify quickly the holder of the rights in the internal market. The victims of counterfeiting may be located in any part of the Community territory and may be small or medium-sized enterprises and not just large enterprises selling well-known products. Investigations would be hampered if a prior complaint by the victim were required. Intellectual property offences are often committed without the knowledge of the holder of the rights, and the absence of a complaint does not amount to negligence on the victim's part.

Article 9

This Article concerns the measures for transposing the Directive into the internal law of the Member States. The deadline of eighteen months is modelled on the provisions of other Directives.

Article 10

This Article lays down that the Directive enters into force on the twentieth day following its publication in the Official Journal, pursuant to the provisions of Article 254(1) of the EC Treaty.

Article 11

This Article lays down that this Directive is addressed to the Member States.

2005/0127 (COD)

Amended proposal for a

DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

on criminal measures aimed at ensuring the enforcement of intellectual property rights

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 95 thereof,

Having regard to the proposal from the Commission[6],

Having regard to the opinion of the European Economic and Social Committee[7],

Having regard to the opinion of the Committee of the Regions[8],

Acting in accordance with the procedure laid down in Article 251 of the Treaty[9],

- (1) The Green Paper on the fight against counterfeiting and piracy in the Single Market presented by the Commission on 15 October 1998 noted that counterfeiting and piracy had grown into an international phenomenon with major repercussions at economic and social level and in terms of consumer protection, especially as regards public health and safety. An action plan was drawn up as part of the follow-up to the Green Paper and was included in a communication on the same subject from the Commission to the Council, the European Parliament and the Economic and Social Committee on 30 November 2000.
- (2) In its conclusions, the Brussels European Council of 20 and 21 March 2003 invited the Commission and the Member States to improve exploitation of intellectual property rights by taking forward measures against counterfeiting and piracy.
- (3)(1) At international level, all Member States, as well as the Community itself, as regards matters within its competence, are bound by the Agreement on Trade-Related Aspects of Intellectual Property (the "TRIPS Agreement"), concluded in the framework of the World Trade Organisation and approved by Council Decision 94/800/EC[10]. The TRIPS Agreement contains, in particular, provisions on criminal matters which are common standards applicable at international level, but the disparities between Member States are still too great, and they do not permit effective combating of intellectual property offences, particularly the most serious ones. This causes a loss of confidence in the Internal Market in business circles, with a consequent reduction in investment in innovation and creation.
- (4) The Commission also adopted in November 2004, an Intellectual Property Rights Enforcement

Strategy towards third countries.

(5)(2) Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights[11] lays down measures, procedures and civil and administrative remedies. A sufficiently dissuasive set of penalties applicable throughout the Community is needed to make the provisions laid down in this Directive complete. Certain criminal provisions need to be harmonised so that counterfeiting and piracy in the internal market can be combated effectively. The Community legislator has the power to take the criminal-law measures that are necessary to guarantee the full effectiveness of the rules it lays down on the protection of intellectual property.

(6) Building on the Commission Communication on a customs response to counterfeiting and piracy adopted in October 2005 [12] , the Council has adopted a Resolution on 13 March 2006, whereby it underlines that the Lisbon Strategy objectives "can only be achieved through a well-functioning internal market with adequate measures to encourage investment in the knowledge-based economy and recognises the threat posed by the serious growth in counterfeiting and piracy to the Union's knowledge-based economy and in particular to health and safety (...)".

(7) The level of sentencing for natural and legal persons who have committed such offences must be harmonised. In particular, the rules on prison sentences, fines and confiscation must be harmonised.

(8) Provisions must be laid down to facilitate criminal investigations. The Member States must ensure that the holders of intellectual property rights concerned, or their representatives, and experts are allowed to assist the investigations carried out by joint investigation teams.

(9) To facilitate investigations or criminal proceedings concerning intellectual property offences, these may not be dependent on a report or accusation made by a person subjected to the offence.

(10)(3) This Directive does not affect specific liability systems such as that laid down for Internet service providers in Articles 12 to 15 of Directive 2000/31/EC on electronic commerce[13].

(11)(4) As the objective of this Directive cannot be achieved adequately by the Member States acting alone and could better be achieved by action at Community level, the Community may take measures in accordance with the principle of subsidiarity as declared by Article 5 of the Treaty establishing the European Community. In accordance with the principle of proportionality, as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective.

(12)(5) This Directive respects fundamental rights and observes the principles recognised by the Charter of Fundamental Rights of the European Union. In particular, this Directive seeks to ensure full respect for intellectual property, in accordance with Article 17(2) of the Charter,

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Objective and scope

This Directive lays down the criminal measures necessary to ensure the enforcement of intellectual property rights.

These measures shall apply to intellectual property rights provided for in Community legislation and/or national legislation in the Member States.

Article 2

Definition

For the purposes of this Directive, legal person means any legal entity having such status under the applicable national law, except for States or any other public bodies acting in the exercise of their prerogative of public power, as well as public international organisations.

Article 3

Offences

Member States shall ensure that all intentional infringements of an intellectual property right on a commercial scale, and attempting, aiding or abetting and inciting such infringements, are treated as criminal offences.

Article 4

Nature of penalties

1. For the offences referred to in Article 3, the Member States shall provide for the following penalties:

- a) for natural persons: custodial sentences;
- b) for natural and legal persons:
 - i) fines;
 - ii) confiscation of the object, instruments and products stemming from infringements or of goods whose value corresponds to those products.

2. For the offences referred to in Article 3, the Member States shall provide that the following penalties are also available in appropriate cases:

- (a) destruction of the goods infringing an intellectual property right;
- (b) total or partial closure, on a permanent or temporary basis, of the establishment used primarily to commit the offence;
- (c) a permanent or temporary ban on engaging in commercial activities;
- (d) placing under judicial supervision;
- (e) judicial winding-up;
- (f) a ban on access to public assistance or subsidies;
- (g) publication of judicial decisions.

Article 5

Level of penalties

3. Each Member State shall take the necessary measures to ensure that, when committed by natural persons, the offences referred to in Article 3 are punishable by a maximum sentence of at least four years' imprisonment when committed under the aegis of a criminal organisation within the meaning of Framework Decision.... on the fight against organised crime, or where they carry a health or safety risk.

4. Member States shall take the necessary measures to ensure that, when committed by natural persons or legal entities, the offences referred to in Article 3 are punishable by effective, proportionate and dissuasive penalties. These penalties shall include criminal and non-criminal fines:

- (a) to a maximum of at least EUR 100 000 for cases other than the most serious cases;
- (b) to a maximum of at least EUR 300 000 for cases referred to in paragraph 1.

Article 6

Extended powers of confiscation

The Member States shall take the necessary measures to allow the total or partial confiscation of goods belonging to convicted natural or legal persons in accordance with Article 3 of Framework Decision 2005/212/JHA of 24 February 2005 on Confiscation of Crime-Related Proceeds, Instrumentalities and Property, at least where the offences are committed under the aegis of a criminal organisation, within the meaning of Framework Decision.... on the fight against organised crime, or where they carry a health or safety risk.

Article 7

Joint investigation teams

The Member States must ensure that the holders of intellectual property rights concerned, or their representatives, and experts, are allowed to assist the investigations carried out by joint investigation teams into the offences referred to in Article 3.

Article 8

Initiation of criminal proceedings

Member States shall ensure that the possibility of initiating investigations into, or prosecution of, offences covered by Article 3 are not dependent on a report or accusation made by a person subjected to the offence, at least if the acts were committed in the territory of the Member State.

Article 59

Transposal

5. Member States shall bring into force the provisions necessary to comply with this Directive

by..... at the latest [eighteen months after the date of its adoption]. They shall forthwith communicate to the Commission the text of those provisions and a correlation table between those provisions and this Directive. When Member States adopt these provisions, they shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

6. Member States shall communicate to the Commission the provisions of national law which they adopt in the field covered by this Directive.

Article 610

Entry into force

This Decision shall enter into force on the day following its publication in the Official Journal of the European Union.

Article 711

This Directive is addressed to the Member States.

Done at Brussels,

For the European Parliament For the Council

The President The President

Communication from the Commission to the European Parliament and the Council on the implications of the Court's judgment of 13 September 2005 (Case C 176/03 Commission v Council) /* COM/2005/0583 final */

[pic] | COMMISSION OF THE EUROPEAN COMMUNITIES |

Brussels, 23.11.2005

COM(2005) 583 final

COMMUNICATION FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND THE COUNCIL

on the implications of the Court's judgment of 13 September 2005 (Case C-176/03 Commission v Council)

COMMUNICATION FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND THE COUNCIL

on the implications of the Court's judgment of 13 September 2005 (Case C-176/03 Commission v Council)

1. The judgment of 13 September 2005 in Case C-176/03 Commission v Council clarifies the distribution of powers between the first and third pillars as regards provisions of criminal law. This clarification removes any doubts about a question which has long been controversial. The Commission's aim with this Communication is to explain the conclusions to be drawn from it. A list of the instruments affected by the implications of the judgment is in the annex . One of the aims of this Communication is to suggest a method to correct the situation with regard to texts which were, in the light of the Court's ruling, not adopted on the proper legal basis. It also aims at setting the direction of the future use of the Commission's right of initiative.

1. CONTENT AND SCOPE OF THE JUDGMENT OF 13 SEPTEMBER 2005 IN CASE C-176/03 (COMMISSION V COUNCIL)

1.1. Content of the judgment of 13 September 2005 in Case C-176/03

2. The Commission had asked the Court to annul Council Framework Decision 2003/80/JHA of 27 January 2003 on the protection of the environment through criminal law[1], which required the Member States to provide for criminal sanctions in the case of the offences against environmental law set out in the Framework Decision, on the grounds that the power to impose such an obligation on the Member States is a matter for a Community instrument and the Commission had in fact proposed the adoption of such an instrument[2].

3. The Court found that although "as a general rule, neither criminal law nor the rules of criminal procedure fall within the Community's competence"[3], "the last-mentioned finding does not prevent the Community legislature, when the application of effective, proportionate and dissuasive criminal penalties by the competent national authorities is an essential measure for combating serious environmental offences , from taking measures which relate to the criminal law of the Member States which it considers necessary in order to ensure that the rules which it lays down on environmental protection are fully effective "[4].

4. Consequently, Articles 1 to 7 of the Framework Decision – which deal with the definition of offences, the principle of the obligation to impose criminal penalties, the rules on participation and instigation, the level of penalties, accompanying penalties and the specific rules on the liability of legal persons – which, "on account of both their aim and their content", "have as their main purpose the protection of the environment", "could have been properly adopted on the basis of Article 175 EC"[5]. "In those circumstances, the entire framework decision, being indivisible, infringes Article 47 EU as it encroaches on the powers which Article 175 EC confers on the Community"[6], and should be annulled. Art 47 EU establishes the primacy of

Community law over Title VI of the TEU.

5. It should be noted that the Court went further than the proposals of its Advocate-General, who took the view that the Community legislature had the power to establish the principle of the use of criminal penalties against serious environmental offences but not to lay down in detail and in concrete terms what the arrangements should be.

1.2. Scope of the judgment of 13 September 2005

6. The Court refers in its analysis to the traditional criterion of the aim and content of the act in order to establish whether the legal basis is correct. In this case, the Community policy concerned is environmental protection. However the judgment lays down principles going far beyond the case in question. The same arguments can be applied in their entirety to the other common policies and to the four freedoms (freedom of movement of persons, goods, services and capital).

7. However, the judgment makes it clear that criminal law as such does not constitute a Community policy, since Community action in criminal matters may be based only on implicit powers associated with a specific legal basis. Hence, appropriate measures of criminal law can be adopted on a Community basis only at sectoral level and only on condition that there is a clear need to combat serious shortcomings in the implementation of the Community's objectives and to provide for criminal law measures to ensure the full effectiveness of a Community policy or the proper functioning of a freedom.

8. From the point of view of subject matter, in addition to environmental protection the Court's reasoning can therefore be applied to all Community policies and freedoms which involve binding legislation with which criminal penalties should be associated in order to ensure their effectiveness.

9. The Court makes no distinction according to the nature of the criminal law measures. Its approach is functional. The basis on which the Community legislature may provide for measures of criminal law is the necessity to ensure that Community rules and regulations are complied with.

10. The Commission will have to determine, when submitting proposals, whether this test of necessity, is met on a case by case basis. When for a given sector, the Commission considers that criminal law measures are required in order to ensure that Community law is fully effective, these measures may, depending on the needs of the sector in question, include the actual principle of resorting to criminal penalties, the definition of the offence - that is, the constituent element of the offence - and, where appropriate the nature and level of the criminal penalties applicable^[7], or other aspects relating to criminal law. It is the specific requirement of the Community policy or freedom in question which constitutes the link with the legal basis of the EC Treaty which provides the justification for such measures. Again it is on a case by case basis, depending on necessity, that the Commission will determine the degree of Community involvement in the criminal field, whilst giving priority as much as possible to horizontal measures not specific to the relevant sector. Thus, Member States' freedom to choose the penalties they apply may be limited by the Community legislature, if the effectiveness of Community law so requires.

2. EFFECTS OF THE COURT JUDGMENT

2.1. General situation following the judgment

11. The clarification by the Court judgment of the distribution of powers between the first and the third pillar has led to the following situation:

- The provisions of criminal law required for the effective implementation of Community law are a matter for the TEC. This system brings to an end the double-text mechanism (directive or regulation and framework decision) which has been used on several occasions in the past. In other words, either a criminal law provision specific to the matter in hand is needed to ensure the effectiveness of Community law, and it is adopted under the first pillar only, or there does not appear to be a need to resort to the criminal law at Union level - or there are already adequate horizontal provisions - and specific legislation is not introduced at European level.

- The horizontal criminal law provisions aimed at encouraging police and judicial cooperation in the broad sense, including measures on the mutual recognition of judicial decisions, measures based on the principle of availability, and measures on the harmonisation of criminal law in connection with the creation of the area of freedom, security and justice not linked to the implementation of Community policies or fundamental freedoms, fall within Title

VI of the TEU. Specifically, it follows from the judgment of the Court that those aspects of criminal law and criminal procedure which require a horizontal approach do not in principle fall within the scope of Community law. This would normally be the case for questions linked to general rules of criminal law and criminal procedure as well as those related to police and judicial cooperation in criminal matters.

2.2. Consistency of the Union's criminal law policy

Although the Community legislature may use the criminal law to achieve its objectives, it may do so only if two conditions – necessity and consistency - are met.

12. Necessity. Any use of measures of criminal law must be justified by the need to make the Community policy in question effective. In principle, responsibility for the proper application of Community law lies with the Member States. In some cases, however, it is necessary to direct the action of the Member States by specifying explicitly (i) the type of behaviour which constitutes a criminal offence and/or (ii) the type of penalties to be applied and/or (iii) other criminal-law measures appropriate to the area concerned. Checks must be carried out to establish necessity and the observance of the principles of subsidiarity and proportionality at each of these stages.

13. Consistency. The criminal-law measures adopted at sectoral level on a Community basis must respect the overall consistency of the Union's system of criminal law, whether adopted on the basis of the first or the third pillar, to ensure that criminal provisions do not become fragmented and ill-matched. If a sector seems to require specific rules in order to implement the objectives of the EC Treaty, the relationship between these specific rules and the horizontal rules should if necessary be clarified. Care must also be taken to ensure that the Member States or the persons concerned are not required to comply with conflicting obligations. When using its right of initiative, the Commission will take the utmost care to ensure that this consistency is preserved. Parliament and the Council must also take account of this requirement in their own internal organisation.

2.3. Consequences of the judgment for acts adopted and proposals pending.

14. As a result of the Court's judgment the framework decisions in annex are entirely or partly incorrect, since all or some of their provisions were adopted on the wrong legal basis. It is important for a number of reasons to regularise these texts quickly by re-establishing the correct legal bases. Firstly, even when the period for lodging an appeal has expired the institutions have a duty to restore their legality. This duty lies in the first instance with the Commission, as the guardian of the Treaties and the only body with the power to propose Community acts. However, an equal responsibility rests with the European Parliament and the Council, which are responsible for adopting these acts. The second reason concerns the imperatives of legal security, since the wrong legal basis of the framework decisions could, in some cases, undermine the national implementing legislation.

15. The Commission decided on 23 November to appeal to the Court of Justice for the annulment of the Council Framework Decision 2005/667/JHA of 12 July 2005 to strengthen the criminal-law framework for the enforcement of the law against ship-source pollution. This is the only case where the Commission has had the possibility to introduce an appeal for annulment for reasons of procedural deadlines. In this case, the Commission considers that from a legal point of view the decision to appeal would complete the package of appropriate measures to correct the situation in relation to the above mentioned framework decision. Ensuring that the rights of the Commission are preserved, the appeal seeks to restore legality and provide the necessary legal certainty. The appeal will be withdrawn once the proposal aiming at correcting the legal basis for the framework decision in question is adopted.

16. There are several ways in which existing law can be rectified in the light of the judgment. One approach would be to review the existing instruments with the sole purpose of bringing them into line with the distribution of powers between the first and the third pillar as laid down in the Court judgment. In such a case, the Commission's proposals would not contain any provisions which differed in substance from those of the acts adopted, even where the Commission felt that these acts were not satisfactory. This option offers a quick and easy solution. It allows the substance of Community legislation to remain unchanged and ensures legal certainty with regard to provisions that are important to the realisation of an area of freedom, security and justice. This solution would work only if Parliament and the Council agree not to open discussions of substance during this special procedure. Such an approach accordingly requires the prior agreement of the three institutions.

17. If such an agreement could not be reached, the Commission would make use of its power

of proposal in order not only to restore the correct legal bases to acts which have been adopted but also to prioritise substantive solutions in line with what it judges the Community interest to be.

18. This alternative is redundant in the case of pending proposals. The Commission will therefore make the necessary changes to its proposals as and when required. These proposals will then follow the full decision-making procedure applicable to their legal basis.

19. A list of the acts adopted and pending proposals potentially affected by the Court Decision and which require amendment is attached to this communication.

ANNEX

List of texts affected by the CJEC judgment in Case C- 176/03

Text | Legal basis to be used (TEC) |

Acts adopted |

Act annulled: Council Framework Decision 2003/80/JHA of 27 January 2003 on the protection of the environment through criminal law (OJ L 29, 5.2.2005, p. 55) | Article 175(1)[8] |

Council framework Decision of 29 May 2000 on increasing protection by criminal penalties and other sanctions against counterfeiting in connection with the introduction of the euro (OJ L 140, 14.6.2000, p. 1) and Council Framework Decision of 6 December 2001 amending Framework Decision 2000/383/JHA on increasing protection by criminal penalties and other sanctions against counterfeiting in connection with the introduction of the euro (OJ L 329, 14.12.2001, p 3). | Article 123(4) |

Council Framework Decision 2001/413/JHA combating fraud and counterfeiting of non-cash means of payment (OJ L 149, 2.6.2001, p. 1) | Article 57(2) and Article 95 |

Council Directive 91/308/EEC of 10 June 1991 on prevention of the use of the financial system for the purpose of money laundering (OJ L 166, 28.6.1991, p. 77) and Council Framework Decision 2001/500/JHA of 26 June 2001 on money laundering, the identification, tracing, freezing, seizing and confiscation of instrumentalities and the proceeds of crime (OJ L 182, 5.7.2001, p.1) and | Article 47(2) and Article 95 |

Directive defining the facilitation of unauthorised entry, transit and residence and Council framework Decision on the strengthening of the penal framework to prevent the facilitation of unauthorised entry, transit and residence of 28 November 2002 (OJ L 328, 5.12.2002, pp. 17 and 1). | Articles 61(a) and 63(3)(b) |

Council Framework Decision 2003/568/JHA of 22 July 2003 on combating corruption in the private sector (OJ L 192, 31.7.2003, p. 54) | Article 95 |

Council Framework Decision 2005/222/JHA of 24 February 2005 on attacks against information systems (OJ L 69, 16.3.2005, p. 67) | Article 95 |

Directive 2005/35/EC of the European Parliament and of the Council of 7 September 2005 on ship-source pollution and on the introduction of penalties for infringements and Council Framework Decision 2005/667/JHA of 12 July 2005 to strengthen the criminal-law framework for the enforcement of the law against ship-source pollution (OJ L 255, 30.9.2005, pp. 11 and 164) | Article 80(2) [] |

Proposals pending[9] |

Proposal for a Directive of the European Parliament and of the Council on the criminal-law protection of the Community's financial interests (PIF), (OJ C 240E, 28.8.2001, p. 125)[10] | Article 280(4) |

Proposal for a European Parliament and Council Directive on criminal measures aimed at ensuring the enforcement of intellectual property rights and for a Council framework decision to strengthen the criminal law framework to combat intellectual property offences (COM (2005) 276 final) | Article 95 |

[1] OJ L 29, 5.2.2003, p. 55.

[2] Proposal for a Directive of the European Parliament and of the Council on the protection of the environment through criminal law (COM (2001) 139 of 13 March 2001, OJ C 180 E, 26.6.2001, and amended proposal (COM (2002) 544)).

[3] Paragraph 47

[4] Paragraph 48

[5] Paragraph 51

[6] Paragraph 53

[7] In particular, by reference to the four levels of approximation of penalties habitually used following conclusions of the JHA Council meeting of 24 and 25 April 2002).

[8] Using this legal basis, the Commission had tabled a proposal for a Directive on the protection of the environment through criminal law (COM (2001) 139 of 13.3.2001, OJ C 180 E, 26.6.2001) and amended proposal (COM (2002) 544).

[9] For the record: Proposal for a Council Framework Decision on combating racism and xenophobia (COM proposal of 29.11.2001, OJ C 75 E, 23.6.2002, p. 269): the text of the proposed framework decision is in conformity with the distribution of powers between the pillars as set out in the Court judgment of 13 September 2005. If it was planned to introduce criminal penalties to combat discrimination, however, a Directive on the basis of Article 13 TEU would be necessary.

- Initiative of the Hellenic Republic with a view to adopting a Council Framework Decision concerning the prevention and control of trafficking in human organs and tissues (OJ C 100, 26.4.2003, p.27), currently stalled, and the initiative of the Federal Republic of Germany with a view to the adoption of a Council Framework Decision on criminal law protection against fraudulent or other unfair anti-competitive conduct in relation to the award of public contracts in the common market (OJ C 253, 4.9.2000, p 3).

[10] The situation here is different in that the conventions on the protection of the European Community's financial interests are not directly called into question as a result of the judgment. Nevertheless, none of these instruments (the convention and the three protocols) has been ratified by all 25 Member States.

**Judgment of the Court (Grand Chamber)
of 13 September 2005**

Commission of the European Communities v Council of the European Union. Action for annulment - Articles 29 EU, 31(e) EU, 34 EU and 47 EU - Framework Decision 2003/80/JHA - Protection of the environment - Criminal penalties - Community competence - Legal basis - Article 175 EC. Case C-176/03.

In Case C-176/03,

APPLICATION for annulment pursuant to Article 35 EU brought on 15 April 2003,

Commission of the European Communities, represented by M. Petite, J.F. Pasquier and W. Bogensberger, acting as Agents, with an address for service in Luxembourg,

applicant,

supported by:

European Parliament, represented by G. Garzon Clariana, H. Duintjer Tebbens and A. Baas, and M. Gomez-Leal, acting as Agents, with an address for service in Luxembourg,

intervener,

v

Council of the European Union, represented by J.C. Piris, J. Schutte and K. Michoel, acting as Agents, with an address for service in Luxembourg,

defendant,

supported by:

Kingdom of Denmark, represented by J. Molde, acting as Agent,

Federal Republic of Germany, represented by W.D. Plessing and A. Dittrich, acting as Agents,

Hellenic Republic, represented by E.M. Mamouna and M. Tassopoulou, acting as Agents, with an address for service in Luxembourg,

Kingdom of Spain, represented by N. Díaz Abad, acting as Agent, with an address for service in Luxembourg,

French Republic, represented by G. de Bergues, F. Alabrune and E. Puisais, acting as Agents,

Ireland, represented by D. O'Hagan, acting as Agent, and P. Gallagher, E. Fitzsimons SC and E. Regan BL, with an address for service in Luxembourg,

Kingdom of the Netherlands, represented by H.G. Sevenster and C. Wissels, acting as Agents,

Portuguese Republic, represented by L. Fernandes and A. Fraga Pires, acting as Agents,

Republic of Finland, represented by A. Guimaraes-Purokoski, acting as Agent, with an address for service in Luxembourg,

Kingdom of Sweden, represented by A. Kruse, K. Wistrand and A. Falk, acting as Agents,

United Kingdom of Great Britain and Northern Ireland, represented by C. Jackson, acting as Agent, and R. Plender QC,

interveners,

THE COURT (Grand Chamber),

composed of V. Skouris, President, P. Jann, C.W.A. Timmermans, A. Rosas, R. Silva de Lapuerta

and A. Borg Barthet, Presidents of Chambers, R. Schintgen (Rapporteur), N. Colneric, S. von Bahr, J. N. Cunha Rodrigues, G. Arestis, M. Ilei and J. Malenovsku, Judges,

Advocate General: D. Ruiz-Jarabo Colomer,

Registrar: K. Sztranc, Administrator,

having regard to the written procedure and further to the hearing on 5 April 2005,

after hearing the Opinion of the Advocate General at the sitting on 26 May 2005,

gives the following

Judgment

On those grounds, the Court (Grand Chamber) hereby:

1. Annuls Council Framework Decision 2003/80/JHA of 27 January 2003 on the protection of the environment through criminal law;
2. Orders the Council of the European Union to pay the costs;
3. Orders the Kingdom of Denmark, the Federal Republic of Germany, the Hellenic Republic, the Kingdom of Spain, the French Republic, Ireland, the Kingdom of the Netherlands, the Portuguese Republic, the Republic of Finland, the Kingdom of Sweden, the United Kingdom of Great Britain and Northern Ireland and the European Parliament to bear their own costs.

1. By its application the Commission of the European Communities is seeking annulment of Council Framework Decision 2003/80/JHA of 27 January 2003 on the protection of the environment through criminal law (OJ 2003 L 29, p. 55; the framework decision').

Legal framework and background

2. On 27 January 2003, on the initiative of the Kingdom of Denmark, the Council of the European Union adopted the framework decision.
3. Based on Title VI of the Treaty on European Union, in particular Articles 29 EU, 31(e) EU and 34(2)(b) EU, as worded prior to the entry into force of the Treaty of Nice, the framework decision constitutes, as is clear from the first three recitals in its preamble, the instrument by which the European Union intends to respond with concerted action to the disturbing increase in offences posing a threat to the environment.
4. The framework decision lays down a number of environmental offences, in respect of which the Member States are required to prescribe criminal penalties.
5. Thus, Article 2 of the framework decision, entitled 'Intentional offences', provides:

Each Member State shall take the necessary measures to establish as criminal offences under its domestic law

- (a) the discharge, emission or introduction of a quantity of substances or ionising radiation into air, soil or water which causes death or serious injury to any person;
- (b) the unlawful discharge, emission or introduction of a quantity of substances or ionising radiation into air, soil or water which causes or is likely to cause their lasting or substantial deterioration or death or serious injury to any person or substantial damage to protected monuments, other protected objects, property, animals or plants;
- (c) the unlawful disposal, treatment, storage, transport, export or import of waste, including hazardous waste, which causes or is likely to cause death or serious injury to any person or

substantial damage to the quality of air, soil, water, animals or plants;

- (d) the unlawful operation of a plant in which a dangerous activity is carried out and which, outside the plant, causes or is likely to cause death or serious injury to any person or substantial damage to the quality of air, soil, water, animals or plants;
- (e) the unlawful manufacture, treatment, storage, use, transport, export or import of nuclear materials or other hazardous radioactive substances which causes or is likely to cause death or serious injury to any person or substantial damage to the quality of air, soil, water, animals or plants;
- (f) the unlawful possession, taking, damaging, killing or trading of or in protected wild fauna and flora species or parts thereof, at least where they are threatened with extinction as defined under national law;
- (g) the unlawful trade in ozone-depleting substances,
when committed intentionally.'

6. Article 3 of the framework decision, entitled 'Negligent offences', provides:

Each Member State shall take the necessary measures to establish as criminal offences under its domestic law, when committed with negligence, or at least serious negligence, the offences enumerated in Article 2.'

7. Article 4 of the framework decision states that each Member State is to take the necessary measures to ensure that participating in or instigating the conduct referred to in Article 2 is punishable.

8. Article 5(1) of the framework decision provides that the penalties thus laid down must be effective, proportionate and dissuasive' including, at least in serious cases, penalties involving deprivation of liberty which can give rise to extradition'. Article 5(2) adds that the criminal penalties may be accompanied by other penalties or measures'.

9. Article 6 of the framework decision governs the liability, as the result of an act or omission, of legal persons and Article 7 sets out the sanctions to which they are to be subject, which include criminal or non-criminal fines and may include other sanctions'.

10. Finally, Article 8 of the framework decision concerns jurisdiction and Article 9 deals with prosecutions brought by a Member State which does not extradite its own nationals.

11. The Commission objected in the various Council bodies to the legal basis relied on by the Council to require the Member States to impose criminal penalties on persons committing environmental offences. In its submission, the correct legal basis in that respect was Article 175(1) EC and it had indeed put forward, on 15 March 2001, a proposal for a Directive of the European Parliament and of the Council on the protection of the environment through criminal law (OJ 2001 C 180 E, p. 238, the proposed directive'), based on Article 175 EC, the annex to which listed the Community law measures to which the offences set out in Article 3 of the proposal relate.

12. On 9 April 2002, the European Parliament expressed its view on both the proposed directive, at first reading, and on the draft framework decision.

13. It concurred with the Commission's view of the scope of the Community's competence, whilst calling on the Council (i) to use the framework decision as a measure complementing the directive that would take effect in relation to the protection of the environment through criminal law solely in respect of judicial cooperation and (ii) to refrain from adopting the framework decision before adoption of the proposed directive (see texts adopted by the Parliament on 9 April 2002 bearing references A50099/2002 (first reading) and A50080/2002).

14. The Council did not adopt the proposed directive, but the fifth and seventh recitals to the framework decision are worded as follows:

- (5) The Council considered it appropriate to incorporate into the present Framework decision a number of substantive provisions contained in the proposed Directive, in particular those defining the conduct which Member States have to establish as criminal offences under their domestic law.

...

- (7) The Council has considered this proposal but has come to the conclusion that the majority required for its adoption by the Council cannot be obtained. The said majority considered that the proposal went beyond the powers attributed to the Community by the Treaty establishing the European Community and that the objectives could be reached by adopting a Framework-Decision on the basis of Title VI of the Treaty on European Union. The Council also considered that the present Framework Decision, based on Article 34 of the Treaty on European Union, is a correct instrument to impose on the member States the obligation to provide for criminal sanctions. The amended proposal submitted by the Commission was not of a nature to allow the Council to change its position in this respect.'

15. The Commission appended the following statement to the minutes of the Council meeting at which the framework decision was adopted:

The Commission takes the view that the Framework Decision is not the appropriate legal instrument by which to require Member States to introduce sanctions of a criminal nature at national level in the case of offences detrimental to the environment.

As the Commission pointed out on several occasions within Council bodies, it considers that in the context of the competences conferred on it for the purpose of attaining the objectives stated in Article 2 of the Treaty establishing the European Community, the Community is competent to require the Member States to impose sanctions at national level - including criminal sanctions if appropriate - where that proves necessary in order to attain a Community objective.

This is the case for environmental matters which are the subject of Title XIX of the Treaty establishing the European Community.

Furthermore, the Commission points out that its proposal for a Directive on the protection of the environment through criminal law has not been appropriately examined under the codecision procedure.

If the Council adopts the Framework Decision despite this Community competence, the Commission reserves all the rights conferred on it by the Treaty.'

The action

16. By order of the President of the Court of 29 September 2003, the Kingdom of Denmark, the Federal Republic of Germany, the Hellenic Republic, the Kingdom of Spain, the French Republic, Ireland, the Kingdom of the Netherlands, the Portuguese Republic, the Republic of Finland, the Kingdom of Sweden and the United Kingdom of Great Britain and Northern Ireland, on the one hand, and the Parliament, on the other, were granted leave to intervene in support of the form of order sought by the Council and the Commission respectively.

17. By order of 17 March 2004, the President of the Court dismissed the application brought by the European Economic and Social Committee for leave to intervene in support of the form of order sought by the Commission.

Arguments of the parties

18. The Commission challenges the Council's choice of Article 34 EU, in conjunction with Articles 29 EU and 31(e) EU, as the legal basis for Articles 1 to 7 of the framework decision. It submits that the purpose and content of the latter are within the scope of the Community's powers on the environment, as they are stated in Article 3(1) EC and Articles 174 to 176 EC.

19. Although it does not claim that the Community legislature has a general competence in criminal matters, the Commission submits that the legislature is competent, under Article 175 EC, to require the Member States to prescribe criminal penalties for infringements of Community environmental protection legislation if it takes the view that that is a necessary means of ensuring that the legislation is effective. The harmonisation of national criminal laws, in particular of the constituent elements of environmental offences to which criminal penalties attach, is designed to be an aid to the Community policy in question.

20. The Commission recognises that there is no precedent in this area. It relies, however, in support of its argument, on the case-law of the Court concerning the duty of loyal cooperation and the principles of effectiveness and equivalence (see, *inter alia*, Case 50/76 *Amsterdam Bulb* [1977] ECR 137, paragraph 33, Case C186/98 *Nunes and de Matos* [1999] ECR I4883, paragraphs 12 and 14, and the order of 13 July 1990 in Case C2/88 *IMM Zwartveld and Others* [1990] ECR I3365, paragraph 17).

21. Likewise, a number of regulations adopted in the sphere of fisheries and transport policy either require the Member States to bring criminal proceedings or impose restrictions on the types of penalties which those States may impose. The Commission refers, in particular, to two Community measures which require the Member States to introduce penalties which are necessarily criminal in nature, although that qualification has not been expressly employed (see Article 14 of Council Directive 91/308/EEC of 10 June 1991 on prevention of the use of the financial system for the purpose of money laundering (OJ 1991 L 166, p. 77) and Articles 1 to 3 of Council Directive 2002/90/EC of 28 November 2002 defining the facilitation of unauthorised entry, transit and residence (OJ 2002 L 328, p. 17)).

22. In addition, the Commission submits that the framework decision must in any event be annulled in part on the ground that Articles 5(2), 6 and 7 thereof leave the Member States free to prescribe penalties other than criminal penalties, even to choose between criminal and other penalties, which undeniably falls within the Community's competence.

23. However, the Commission does not maintain that the framework decision as a whole should have been the subject-matter of a directive. In particular, it does not dispute that Title VI of the Treaty on European Union is the appropriate legal basis for the provisions of the decision which deal with jurisdiction, extradition and prosecutions of persons who have committed offences. However, given that those provisions are incapable of existing independently, it must apply for annulment of the framework decision in its entirety.

24. The Commission also puts forward a ground of challenge alleging abuse of process. In that regard, it relies on the fifth and seventh recitals in the preamble to the framework decision, which show that the choice of an instrument under Title VI of the Treaty was based on considerations of expediency, since the proposed directive had failed to obtain the majority required for its adoption because a majority of Member States had refused to recognise that the Community had the necessary powers to require the Member States to prescribe criminal penalties for environmental offences.

25. The Parliament concurs with the Commission's arguments. It submits, more specifically, that the Council confused the Community's power to adopt the proposed directive and the power, not claimed by the Community, to adopt the framework decision in its entirety. The matters upon which the Council relies in support of its argument are, in reality, considerations of expediency concerning the choice

of whether or not to impose solely criminal penalties, considerations which should have been dealt with in the legislative procedure on the basis of Articles 175 EC and 251 EC.

26. The Council and the Member States which have intervened in these proceedings, with the exception of the Kingdom of the Netherlands, submit that, as the law currently stands, the Community does not have power to require the Member States to impose criminal penalties in respect of the conduct covered by the framework decision.

27. Not only is there no express conferral of power in that regard, but, given the considerable significance of criminal law for the sovereignty of the Member States, there are no grounds for accepting that this power can have been implicitly transferred to the Community at the time when specific substantive competences, such as those exercised under Article 175 EC, were conferred on it.

28. Articles 135 EC and 280 EC, which expressly reserve to the Member States the application of national criminal law and the administration of justice, confirm that interpretation.

29. That interpretation is also borne out by the fact that the Treaty on European Union devotes a specific title to judicial cooperation in criminal matters (see Articles 29 EU, 30 EU and 31(e) EU), which expressly confers on the European Union competence in criminal matters, in particular as regards the determination of the constituent elements of the relevant offences and penalties. The Commission's position is therefore contradictory, since it amounts, on the one hand, to claiming that the authors of the Treaty on European Union and the EC Treaty intended to confer by implication on the Community competence in criminal matters and, on the other, to disregarding the fact that the same authors expressly attributed such a competence to the European Union.

30. None of the judgments or secondary legislation to which the Commission refers lends support to its argument.

31. First, the Court has never obliged the Member States to adopt criminal penalties. According to its case-law, it is certainly the responsibility of the Member States to ensure that infringements of Community law are penalised under conditions, both procedural and substantive, which are analogous to those applicable to infringements of national law of a similar nature and importance, and the penalty must, moreover, be effective, dissuasive and proportionate to the infringement; furthermore, the national authorities must proceed with respect to infringements of Community law with the same diligence as that which they bring to bear in implementing corresponding national laws (see, in particular, Case 68/88 *Commission v Greece* [1989] ECR 2965, paragraphs 24 and 25). However, the Court has not held, either expressly or by implication, that the Community is competent to harmonise the criminal laws applicable in the Member States. It has rather held that the choice of penalties is a matter for the Member States.

32. Second, legislative practice is in keeping with that interpretation. The various pieces of secondary legislation restate the traditional form of words, by virtue of which effective, proportionate and dissuasive sanctions' are to be prescribed (see, for example, Article 3 of Directive 2002/90), but do not call into question the freedom of the Member States to choose between proceeding under administrative or criminal law. On the rare occasions when the Community legislature has specified that the Member States are to bring criminal or administrative proceedings, it has merely stated expressly the choice which was open to them in any event.

33. Furthermore, whenever the Commission has proposed to the Council that a Community measure having implications for criminal matters be adopted, the Council has detached the criminal part of that measure so that it may be dealt with in a framework decision (see Council Regulation (EC) No 974/98 of 3 May 1998 on the introduction of the euro (OJ 1998 L 139, p. 1), which had to be supplemented by Council Framework Decision 2000/383/JHA of 29 May 2000 on increasing protection

by criminal penalties and other sanctions against counterfeiting in connection with the introduction of the euro (OJ 2000 L 140, p. 1); see also Directive 2002/90, supplemented by Council Framework Decision 2002/946/JHA of 28 November 2002 on the strengthening of the penal framework to prevent the facilitation of unauthorised entry, transit and residence (OJ 2002 L 328, p. 1)).

34. In this instance, regard being had to both its purpose and content, the framework decision concerns the harmonisation of criminal law. The mere fact that it seeks to combat environmental offences is not such as to found the Community's competence. In fact, the framework decision supplements Community law on environmental protection.

35. In addition, the Council contends that the plea alleging abuse of process is based on an incorrect reading of the preamble to the framework decision.

36. The Kingdom of the Netherlands, whilst supporting the form of order sought by the Council, adopts a slightly more qualified argument than the Council. It contends that, in exercising the powers conferred on it by the EC Treaty, the Community may require the Member States to provide for the possibility of punishing certain conduct under national criminal law, provided that the penalty is inseparably linked to the relevant substantive Community provisions and that it can actually be shown that imposing penalties under criminal law in that way is necessary for the achievement of the objectives of the Treaty in the area concerned (see Case C240/90 *Germany v Commission* [1992] ECR I5383). That could be the case if the enforcement of a harmonising rule based, for example, on Article 175 EC gave rise to a need for criminal penalties.

37. Conversely, if it is apparent from the content and nature of the proposed measure that it is intended essentially to bring about a general harmonisation of criminal laws and that the system of penalties is not inseparably linked to the area of Community law concerned, Articles 29 EU, 31(e) EU and 34(2)(b) EU are the correct legal basis for the measure. That is the case in this instance. It is clear from the purpose and content of the framework decision that it is intended, generally, to secure harmonisation of criminal laws in the Member States. The fact that rules adopted under the EC Treaty may be concerned is not decisive.

Findings of the Court

38. Article 47 EU provides that nothing in the Treaty on European Union is to affect the EC Treaty. That requirement is also found in the first paragraph of Article 29 EU, which introduces Title VI of the Treaty on European Union.

39. It is the task of the Court to ensure that acts which, according to the Council, fall within the scope of Title VI of the Treaty on European Union do not encroach upon the powers conferred by the EC Treaty on the Community (see Case C170/96 *Commission v Council* [1998] ECR I-2763, paragraph 16).

40. It is therefore necessary to ascertain whether Articles 1 to 7 of the framework decision affect the powers of the Community under Article 175 EC inasmuch as those articles could, as the Commission maintains, have been adopted on the basis of the last-mentioned provision.

41. On that point, it is common ground that protection of the environment constitutes one of the essential objectives of the Community (see Case 240/83 *ADBHU* [1985] ECR 531, paragraph 13, Case 302/86 *Commission v Denmark* [1988] ECR 4607, paragraph 8, Case C213/96 *Outokumpu* [1998] ECR I1777, paragraph 32). In that regard, Article 2 EC states that the Community has as its task to promote a high level of protection and improvement of the quality of the environment' and, to that end, Article 3(1)(l) EC provides for the establishment of a policy in the sphere of the environment'.

42. Furthermore, in the words of Article 6 EC [e]nvironmental protection requirements must be

integrated into the definition and implementation of the Community policies and activities', a provision which emphasises the fundamental nature of that objective and its extension across the range of those policies and activities.

43. Articles 174 EC to 176 EC comprise, as a general rule, the framework within which Community environmental policy must be carried out. In particular, Article 174(1) EC lists the objectives of the Community's action on the environment and Article 175 EC sets out the procedures to be followed in order to achieve those objectives. The Community's powers are, in general, exercised in accordance with the procedure laid down in Article 251 EC, following consultation of the Economic and Social Committee and the Committee of the Regions. However, in relation to certain spheres referred to in Article 175(2) EC, the Council takes decisions alone, acting unanimously on a proposal from the Commission after consulting the Parliament and the two abovementioned bodies.

44. As the Court has previously held, the measures referred to in the three indents of the first subparagraph of Article 175(2) EC all imply the involvement of the Community institutions in areas such as fiscal policy, energy policy or town and country planning policy, in which, apart from Community policy on the environment, either the Community has no legislative powers or unanimity within the Council is required (Case C36/98 *Spain v Council* [2001] ECR I779, paragraph 54).

45. Moreover, it must be borne in mind that, according to the Court's settled case-law, the choice of the legal basis for a Community measure must rest on objective factors which are amenable to judicial review, including in particular the aim and the content of the measure (see, *inter alia*, Case C-300/89 *Commission v Council* [1991] ECR I-2867, *Titanium dioxide*, paragraph 10, and Case C336/00 *Huber* [2002] ECR I7699, paragraph 30).

46. As regards the aim of the framework decision, it is clear both from its title and from its first three recitals that its objective is the protection of the environment. The Council was concerned at the rise in environmental offences and their effects which are increasingly extending beyond the borders of the States in which the offences are committed', and, having found that those offences constitute a threat to the environment' and a problem jointly faced by the Member States', concluded that a tough response' and concerted action to protect the environment under criminal law' were called for.

47. As to the content of the framework decision, Article 2 establishes a list of particularly serious environmental offences, in respect of which the Member States must impose criminal penalties. Articles 2 to 7 of the decision do indeed entail partial harmonisation of the criminal laws of the Member States, in particular as regards the constituent elements of various criminal offences committed to the detriment of the environment. As a general rule, neither criminal law nor the rules of criminal procedure fall within the Community's competence (see, to that effect, Case 203/80 *Casati* [1981] ECR 2595, paragraph 27, and Case C226/97 *Lemmens* [1998] ECR I3711, paragraph 19).

48. However, the last-mentioned finding does not prevent the Community legislature, when the application of effective, proportionate and dissuasive criminal penalties by the competent national authorities is an essential measure for combating serious environmental offences, from taking measures which relate to the criminal law of the Member States which it considers necessary in order to ensure that the rules which it lays down on environmental protection are fully effective.

49. It should also be added that in this instance, although Articles 1 to 7 of the framework decision determine that certain conduct which is particularly detrimental to the environment is to be criminal, they leave to the Member States the choice of the criminal penalties to apply, although, in accordance with Article 5(1) of the decision, the penalties must be effective, proportionate and dissuasive.

50. The Council does not dispute that the acts listed in Article 2 of the framework decision

include infringements of a considerable number of Community measures, which were listed in the annex to the proposed directive. Moreover, it is apparent from the first three recitals to the framework decision that the Council took the view that criminal penalties were essential for combating serious offences against the environment.

51. It follows from the foregoing that, on account of both their aim and their content, Articles 1 to 7 of the framework decision have as their main purpose the protection of the environment and they could have been properly adopted on the basis of Article 175 EC.

52. That finding is not called into question by the fact that Articles 135 EC and 280(4) EC reserve to the Member States, in the spheres of customs cooperation and the protection of the Community's financial interests respectively, the application of national criminal law and the administration of justice. It is not possible to infer from those provisions that, for the purposes of the implementation of environmental policy, any harmonisation of criminal law, even as limited as that resulting from the framework decision, must be ruled out even where it is necessary in order to ensure the effectiveness of Community law.

53. In those circumstances, the entire framework decision, being indivisible, infringes Article 47 EU as it encroaches on the powers which Article 175 EC confers on the Community.

54. There is therefore no need to examine the Commission's argument that the framework decision should in any event be annulled in part in so far as Articles 5(2), 6 and 7 leave the Member States free also to provide for penalties other than criminal penalties, even to choose between criminal penalties and other penalties, matters allegedly falling undeniably within the Community's competence.

55. In the light of all the foregoing, the framework decision must be annulled.

Costs

56. Under Article 69(2) of the Rules of Procedure, the unsuccessful party is to be ordered to pay the costs if they have been applied for in the successful party's pleadings. Since the Commission has applied for costs and the Council has been unsuccessful, the Council must be ordered to pay the costs. Pursuant to the first paragraph of Article 69(4), the interveners in these proceedings must bear their own costs.

**Council Resolution
of 13 March 2006
on a customs response to latest trends in counterfeiting and piracy**

Council Resolution

of 13 March 2006

on a customs response to latest trends in counterfeiting and piracy

(2006/C 67/01)

THE COUNCIL OF THE EUROPEAN UNION,

1. RECALLING the objectives set by the Lisbon Strategy, as relaunched by the European Council of 22 and 23 March 2005, for the Union "to renew the basis of its competitiveness, increase its growth potential and its productivity and strengthen social cohesion, placing the main emphasis on knowledge, innovation and the optimisation of human capital";

2. UNDERLINING that the strategic objective set by the European Council can only be achieved through a well-functioning internal market with adequate measures to encourage investment in the knowledge-based economy;

3. RECOGNISES the threat posed by the serious growth in counterfeiting and piracy to the Union's knowledge-based economy and in particular to health and safety, as well as the key responsibility of customs in protecting the economy and consumers from this threat;

4. EMPHASIZES that efficient and uniform customs controls to protect legitimate business from unfair competition and knowledge theft are essential to protect Community interests and to counter the risk of distortion of competition. With customs being responsible for the large majority of fake goods seized and having seen customs seizures in the EU increase in the last five years by more than 1000 %, further practical improvements in customs controls will strengthen the protection offered to the economy and consumers;

5. STRESSES the need to ensure that customs controls and co-operation measures provide maximum protection to the economy and consumers from this dangerous traffic and RECOGNISES that this represents a major challenge which requires improved customs techniques. Meeting this challenge represents, at the same time, a valuable contribution toward promoting fair trade, safeguarding Community and national revenues, protecting consumers and combating organised crime and money laundering;

6. WELCOMES the Commission Communication on a customs response to counterfeiting and piracy [1] (hereinafter the Communication), in particular

- the concrete actions to improve customs controls, in particular via the increased exchange of risk management techniques and information, and to strengthen international co-operation, notably with main exporting countries and relevant international organisations;

- the need to build and promote a strong customs-business partnership, based on commitment from both sides, in tackling the problem of counterfeit and pirated goods;

- the approach taken to tackling the growing problem of fake goods, in particular those which pose a health and safety risk, via a comprehensive EU Action Plan building on the Communication's concrete actions;

7. INVITES the Commission to

- present appropriate proposals to support the implementation of the approach set out in the Communication, paying special attention to enhancing the information exchange both between customs and between customs and operators involved in combating counterfeiting and piracy;

- to report on the implementation of the Communication and the actions set out therein as part of the annual report foreseen in Article 23 of Council Regulation (EC) No 1383/2003 [2];

8. INVITES the Commission and the Member States, within their respective competencies, to implement the comprehensive approach set out in the Communication thereby further improving customs controls and co-operation in order to combat the growing menace of counterfeiting and piracy.

[1] COM(2005) 479 final.

**Council Regulation (EC) No 1383/2003
of 22 July 2003**

**concerning customs action against goods suspected of infringing certain intellectual property rights
and the measures to be taken against goods found to have infringed such rights**

Council Regulation (EC) No 1383/2003

of 22 July 2003

concerning customs action against goods suspected of infringing certain intellectual property rights and the measures to be taken against goods found to have infringed such rights

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 133 thereof,

Having regard to the proposal from the Commission,

Whereas:

- (1) To improve the working of the system concerning the entry into the Community and the export and re-export from the Community of goods infringing certain intellectual property rights introduced by Council Regulation (EC) No 3295/94 of 22 December 1994 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods(1), conclusions should be drawn from experience of its application. In the interests of clarity, Regulation (EC) No 3295/94 should be repealed and replaced.
- (2) The marketing of counterfeit and pirated goods, and indeed all goods infringing intellectual property rights, does considerable damage to law-abiding manufacturers and traders and to right-holders, as well as deceiving and in some cases endangering the health and safety of consumers. Such goods should, in so far as is possible, be kept off the market and measures adopted to deal effectively with this unlawful activity without impeding the freedom of legitimate trade. This objective is consistent with efforts under way at international level.
- (3) In cases where counterfeit goods, pirated goods and, more generally, goods infringing an intellectual property right originate in or come from third countries, their introduction into the Community customs territory, including their transshipment, release for free circulation in the Community, placing under a suspensive procedure and placing in a free zone or warehouse, should be prohibited and a procedure set up to enable the customs authorities to enforce this prohibition as effectively as possible.
- (4) Customs authorities should also be able to take action against counterfeit goods, pirated goods and goods infringing certain intellectual property rights which are in the process of being exported, re-exported or leaving the Community customs territory.
- (5) Action by the customs authorities should involve, for the period necessary to determine whether suspect goods are indeed counterfeit goods, pirated goods or goods infringing certain intellectual property rights, suspending release for free circulation, export and re-export or, in the case of goods placed under a suspensive procedure, placed in a free zone or a free warehouse, in the process of being re-exported with notification, introduced into the customs territory or leaving that territory, detaining those goods.
- (6) The particulars of the application for action, such as its period of validity and form, need to be defined and harmonised in all Member States. The same applies to the conditions governing the acceptance of applications by the customs authorities and the service designated to receive, process and register them.

- (7) Even where no application has yet been lodged or approved, the Member States should be authorised to detain the goods for a certain period to allow right-holders to lodge an application for action with the customs authorities.
- (8) Proceedings initiated to determine whether an intellectual property right has been infringed under national law will be conducted with reference to the criteria used to establish whether goods produced in that Member State infringe intellectual property rights. This Regulation does not affect the Member States' provisions on the competence of the courts or judicial procedures.
- (9) To make the Regulation easier to apply for customs administrations and right-holders alike, provision should also be made for a more flexible procedure allowing goods infringing certain intellectual property rights to be destroyed without there being any obligation to initiate proceedings to establish whether an intellectual property right has been infringed under national law.
- (10) It is necessary to lay down the measures applicable to goods which have been found to be counterfeit, pirated or generally to infringe certain intellectual property rights. Those measures should not only deprive those responsible for trading in such goods of the economic benefits of the transaction and penalise them but should also constitute an effective deterrent to further transactions of the same kind.
- (11) To avoid disrupting the clearance of goods carried in travellers' personal baggage, it is appropriate, except where certain material indications suggest commercial traffic is involved, to exclude from the scope of this Regulation goods that may be counterfeit, pirated or infringe certain intellectual property rights when imported from third countries within the limits of the duty-free allowance accorded by Community rules.
- (12) In the interests of this Regulation's effectiveness, it is important to ensure the uniform application of the common rules it lays down and to reinforce mutual assistance between the Member States and between the Member States and the Commission, in particular by recourse to Council Regulation (EC) No 515/97 of 13 March 1997 on mutual assistance between the administrative authorities of the Member States and cooperation between the latter and the Commission to ensure the correct application of the law on customs and agricultural matters(2).
- (13) In the light of the experience gained in the implementation of this Regulation, inter alia, consideration should be given to the possibility of increasing the number of intellectual property rights covered.
- (14) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission(3).
- (15) Regulation (EC) No 3295/94 should be repealed,

HAS ADOPTED THIS REGULATION:

CHAPTER I SUBJECT MATTER AND SCOPE

Article 1

1. This Regulation sets out the conditions for action by the customs authorities when goods are suspected of infringing an intellectual property right in the following situations:

- (a) when they are entered for release for free circulation, export or re-export in accordance with Article 61 of Council Regulation (EC) No 2913/92 of 12 October 1992 establishing the Community

Customs Code(4);

- (b) when they are found during checks on goods entering or leaving the Community customs territory in accordance with Articles 37 and 183 of Regulation (EEC) No 2913/92, placed under a suspensive procedure within the meaning of Article 84(1)(a) of that Regulation, in the process of being re-exported subject to notification under Article 182(2) of that Regulation or placed in a free zone or free warehouse within the meaning of Article 166 of that Regulation.

2. This Regulation also fixes the measures to be taken by the competent authorities when the goods referred to in paragraph 1 are found to infringe intellectual property rights.

Article 2

1. For the purposes of this Regulation, "goods infringing an intellectual property right" means:

(a) "counterfeit goods", namely:

- (i) goods, including packaging, bearing without authorisation a trademark identical to the trademark validly registered in respect of the same type of goods, or which cannot be distinguished in its essential aspects from such a trademark, and which thereby infringes the trademark-holder's rights under Community law, as provided for by Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trademark(5) or the law of the Member State in which the application for action by the customs authorities is made;
- (ii) any trademark symbol (including a logo, label, sticker, brochure, instructions for use or guarantee document bearing such a symbol), even if presented separately, on the same conditions as the goods referred to in point (i);
- (iii) packaging materials bearing the trademarks of counterfeit goods, presented separately, on the same conditions as the goods referred to in point (i);

(b) "pirated goods", namely goods which are or contain copies made without the consent of the holder of a copyright or related right or design right, regardless of whether it is registered in national law, or of a person authorised by the right-holder in the country of production in cases where the making of those copies would constitute an infringement of that right under Council Regulation (EC) No 6/2002 of 12 December 2001 on Community designs(6) or the law of the Member State in which the application for customs action is made;

(c) goods which, in the Member State in which the application for customs action is made, infringe:

- (i) a patent under that Member State's law;
- (ii) a supplementary protection certificate of the kind provided for in Council Regulation (EEC) No 1768/92(7) or Regulation (EC) No 1610/96 of the European Parliament and of the Council(8);
- (iii) a national plant variety right under the law of that Member State or a Community plant variety right of the kind provided for in Council Regulation (EC) No 2100/94(9);
- (iv) designations of origin or geographical indications under the law of that Member State or Council Regulations (EEC) No 2081/92(10) and (EC) No 1493/1999(11);
- (v) geographical designations of the kind provided for in Council Regulation (EEC) No 1576/89(12).

2. For the purposes of this Regulation, "right-holder" means:

(a) the holder of a trademark, copyright or related right, design right, patent, supplementary protection

certificate, plant variety right, protected designation of origin, protected geographical indication and, more generally, any right referred to in paragraph 1; or

(b) any other person authorised to use any of the intellectual property rights mentioned in point (a), or a representative of the right-holder or authorised user.

3. Any mould or matrix which is specifically designed or adapted for the manufacture of goods infringing an intellectual property right shall be treated as goods of that kind if the use of such moulds or matrices infringes the right-holder's rights under Community law or the law of the Member State in which the application for action by the customs authorities is made.

Article 3

1. This Regulation shall not apply to goods bearing a trademark with the consent of the holder of that trademark or to goods bearing a protected designation of origin or a protected geographical indication or which are protected by a patent or a supplementary protection certificate, by a copyright or related right or by a design right or a plant variety right and which have been manufactured with the consent of the right-holder but are placed in one of the situations referred to in Article 1(1) without the latter's consent.

It shall similarly not apply to goods referred to in the first subparagraph and which have been manufactured or are protected by another intellectual property right referred to in Article 2(1) under conditions other than those agreed with the right-holder.

2. Where a traveller's personal baggage contains goods of a non-commercial nature within the limits of the duty-free allowance and there are no material indications to suggest the goods are part of commercial traffic, Member States shall consider such goods to be outside the scope of this Regulation.

CHAPTER II APPLICATIONS FOR ACTION BY THE CUSTOMS AUTHORITIES

Section 1 Measures prior to an application for action by the customs authorities

Article 4

1. Where the customs authorities, in the course of action in one of the situations referred to in Article 1(1) and before an application has been lodged by a right-holder or granted, have sufficient grounds for suspecting that goods infringe an intellectual property right, they may suspend the release of the goods or detain them for a period of three working days from the moment of receipt of the notification by the right-holder and by the declarant or holder of the goods, if the latter are known, in order to enable the right-holder to submit an application for action in accordance with Article 5.

2. In accordance with the rules in force in the Member State concerned, the customs authorities may, without divulging any information other than the actual or supposed number of items and their nature and before informing the right-holder of the possible infringement, ask the right-holder to provide them with any information they may need to confirm their suspicions.

Section 2 The lodging and processing of applications for customs action

Article 5

1. In each Member State a right-holder may apply in writing to the competent customs department for action by the customs authorities when goods are found in one of the situations referred to in Article 1(1) (application for action).

2. Each Member State shall designate the customs department competent to receive and process applications for action.

3. Where electronic data interchange systems exist, the Member States shall encourage right-holders to lodge applications electronically.

4. Where the applicant is the right-holder of a Community trademark or a Community design right, a Community plant variety right or a designation of origin or geographical indication or a geographical designation protected by the Community, an application may, in addition to requesting action by the customs authorities of the Member State in which it is lodged, request action by the customs authorities of one or more other Member States.

5. The application for action shall be made out on a form established in accordance with the procedure referred to in Article 21(2); it must contain all the information needed to enable the goods in question to be readily recognised by the customs authorities, and in particular:

- (i) an accurate and detailed technical description of the goods;
- (ii) any specific information the right-holder may have concerning the type or pattern of fraud;
- (iii) the name and address of the contact person appointed by the right-holder.

The application for action must also contain the declaration required of the applicant by Article 6 and proof that the applicant holds the right for the goods in question.

In the situation described in paragraph 4 the application for action shall indicate the Member State or States in which customs action is requested as well as the names and addresses of the right-holder in each of the Member States concerned.

By way of indication and where known, right-holders should also forward any other information they may have, such as:

- (a) the pre-tax value of the original goods on the legitimate market in the country in which the application for action is lodged;
- (b) the location of the goods or their intended destination;
- (c) particulars identifying the consignment or packages;
- (d) the scheduled arrival or departure date of the goods;
- (e) the means of transport used;
- (f) the identity of the importer, exporter or holder of the goods;
- (g) the country or countries of production and the routes used by traffickers;
- (h) the technical differences, if known, between the authentic and suspect goods.

6. Details may also be required which are specific to the type of intellectual property right referred to in the application for action.

7. On receiving an application for action, the competent customs department shall process that

application and notify the applicant in writing of its decision within 30 working days of its receipt.

The right-holder shall not be charged a fee to cover the administrative costs occasioned by the processing of the application.

8. Where the application does not contain the mandatory information listed in paragraph 5, the competent customs department may decide not to process the application for action; in that event it shall provide reasons for its decision and include information on the appeal procedure. The application can only be re-submitted when duly completed.

Article 6

1. Applications for action shall be accompanied by a declaration from the right-holder, which may be submitted either in writing or electronically, in accordance with national legislation, accepting liability towards the persons involved in a situation referred to in Article 1(1) in the event that a procedure initiated pursuant to Article 9(1) is discontinued owing to an act or omission by the right-holder or in the event that the goods in question are subsequently found not to infringe an intellectual property right.

In that declaration the right-holder shall also agree to bear all costs incurred under this Regulation in keeping goods under customs control pursuant to Article 9 and, where applicable, Article 11.

2. Where an application is submitted under Article 5(4), the right-holder shall agree in the declaration to provide and pay for any translation necessary; this declaration shall be valid in every Member State in which the decision granting the application applies.

Article 7

Articles 5 and 6 shall apply *mutatis mutandis* to requests for an extension.

Section 3 Acceptance of the application for action

Article 8

1. When granting an application for action, the competent customs department shall specify the period during which the customs authorities are to take action. That period shall not exceed one year. On expiry of the period in question, and subject to the prior discharge of any debt owed by the right-holder under this Regulation, the department which took the initial decision may, at the right-holder's request, extend that period.

The right-holder shall notify the competent customs department referred to in Article 5(2), if his right ceases to be validly registered or expires.

2. The decision granting the right-holder's application for action shall immediately be forwarded to those customs offices of the Member State or States likely to be concerned by the goods alleged in the application to infringe an intellectual property right.

When an application for action submitted in accordance with Article 5(4) is granted, the period during which the customs authorities are to take action shall be set at one year; on expiry of the

period in question, the department which processed the initial application shall, on the right-holder's written application, extend that period. The first indent of Article 250 of Regulation (EEC) No 2913/92 shall apply *mutatis mutandis* to the decision granting that application and to decisions extending or repealing it.

Where an application for action is granted, it is for the applicant to forward that decision, with any other information and any translations that may be necessary, to the competent customs department of the Member State or States in which the applicant has requested customs action. However, with the applicant's consent, the decision may be forwarded directly by the customs department which has taken the decision.

At the request of the customs authorities of the Member States concerned, the applicant shall provide any additional information necessary for the implementation of the decision.

3. The period referred to in the second subparagraph of paragraph 2 shall run from the date of adoption of the decision granting the application. The decision will not enter into force in the recipient Member State or States until it has been forwarded in accordance with the third subparagraph of paragraph 2 and the right-holder has fulfilled the formalities referred to in Article 6.

The decision shall then be sent immediately to the national customs offices likely to have to deal with the goods suspected of infringing intellectual property rights.

This paragraph shall apply *mutatis mutandis* to a decision extending the initial decision.

CHAPTER III CONDITIONS GOVERNING ACTION BY THE CUSTOMS AUTHORITIES AND BY THE AUTHORITY COMPETENT TO DECIDE ON THE CASE

Article 9

1. Where a customs office to which the decision granting an application by the right-holder has been forwarded pursuant to Article 8 is satisfied, after consulting the applicant where necessary, that goods in one of the situations referred to in Article 1(1) are suspected of infringing an intellectual property right covered by that decision, it shall suspend release of the goods or detain them.

The customs office shall immediately inform the competent customs department which processed the application.

2. The competent customs department or customs office referred to in paragraph 1 shall inform the right-holder and the declarant or holder of the goods within the meaning of Article 38 of Regulation (EEC) No 2913/92 of its action and is authorised to inform them of the actual or estimated quantity and the actual or supposed nature of the goods whose release has been suspended or which have been detained, without being bound by the communication of that information to notify the authority competent to take a substantive decision.

3. With a view to establishing whether an intellectual property right has been infringed under national law, and in accordance with national provisions on the protection of personal data, commercial and industrial secrecy and professional and administrative confidentiality, the customs office or department which processed the application shall inform the right-holder, at his request and if known, of the names and addresses of the consignee, the consignor, the declarant or the holder of the goods and the origin and provenance of goods suspected of infringing an intellectual property right.

The customs office shall give the applicant and the persons involved in any of the situations referred to in Article 1(1) the opportunity to inspect goods whose release has been suspended or which have been detained.

When examining goods, the customs office may take samples and, according to the rules in force in the Member State concerned, hand them over or send them to the right-holder, at his express request, strictly for the purposes of analysis and to facilitate the subsequent procedure. Where circumstances allow, subject to the requirements of Article 11(1) second indent where applicable, samples must be returned on completion of the technical analysis and, where applicable, before goods are released or their detention is ended. Any analysis of these samples shall be carried out under the sole responsibility of the right-holder.

Article 10

The law in force in the Member State within the territory of which the goods are placed in one of the situations referred to in Article 1(1) shall apply when deciding whether an intellectual property right has been infringed under national law.

That law shall also apply to the immediate notification of the customs department or office referred to in Article 9(1) that the procedure provided for in Article 13 has been initiated, unless the procedure was initiated by that department or office.

Article 11

1. Where customs authorities have detained or suspended the release of goods which are suspected of infringing an intellectual property right in one of the situations covered by Article 1(1), the Member States may provide, in accordance with their national legislation, for a simplified procedure, to be used with the right-holder's agreement, which enables customs authorities to have such goods abandoned for destruction under customs control, without there being any need to determine whether an intellectual property right has been infringed under national law. To this end, Member States shall, in accordance with their national legislation, apply the following conditions:

- that the right-holder inform the customs authorities in writing within 10 working days, or three working days in the case of perishable goods, of receipt of the notification provided for in Article 9, that the goods concerned by the procedure infringe an intellectual property right referred to in Article 2(1) and provide those authorities with the written agreement of the declarant, the holder or the owner of the goods to abandon the goods for destruction. With the agreement of the customs authorities, this information may be provided directly to customs by the declarant, the holder or the owner of the goods. This agreement shall be presumed to be accepted when the declarant, the holder or the owner of the goods has not specifically opposed destruction within the prescribed period. This period may be extended by a further ten working days where circumstances warrant it;
- that destruction be carried out, unless otherwise specified in national legislation, at the expense and under the responsibility of the right-holder, and be systematically preceded by the taking of samples for keeping by the customs authorities in such conditions that they constitute evidence admissible in legal proceedings in the Member State in which they might be needed.

2. In all other cases, for example where the declarant, holder or owner objects to or contests the destruction of the goods, the procedure laid down in Article 13 shall apply.

Article 12

A right-holder receiving the particulars cited in the first subparagraph of Article 9(3) shall use that information only for the purposes specified in Articles 10, 11 and 13(1).

Any other use, not permitted by the national legislation of the Member State where the situation arose, may, on the basis of the law of the Member State in which the goods in question are located, cause the right-holder to incur civil liability and lead to the suspension of the application for action, for the period of validity remaining before renewal, in the Member State in which the events have taken place.

In the event of a further breach of this rule, the competent customs department may refuse to renew the application. In the case of an application of the kind provided for in Article 5(4), it must also notify the other Member States indicated on the form.

Article 13

1. If, within 10 working days of receipt of the notification of suspension of release or of detention, the customs office referred to in Article 9(1) has not been notified that proceedings have been initiated to determine whether an intellectual property right has been infringed under national law in accordance with Article 10 or has not received the right-holder's agreement provided for in Article 11(1) where applicable, release of the goods shall be granted, or their detention shall be ended, as appropriate, subject to completion of all customs formalities.

This period may be extended by a maximum of 10 working days in appropriate cases.

2. In the case of perishable goods suspected of infringing an intellectual property right, the period referred to in paragraph 1 shall be three working days. That period may not be extended.

Article 14

1. In the case of goods suspected of infringing design rights, patents, supplementary protection certificates or plant variety rights, the declarant, owner, importer, holder or consignee of the goods shall be able to obtain the release of the goods or an end to their detention on provision of a security, provided that:

- (a) the customs office or department referred to in Article 9(1) has been notified, in accordance with Article 13(1), that a procedure has been initiated within the period provided for in Article 13(1) to establish whether an intellectual property right has been infringed under national law;
- (b) the authority empowered for this purpose has not authorised precautionary measures before the expiry of the time limit laid down in Article 13(1);
- (c) all customs formalities have been completed.

2. The security provided for in paragraph 1 must be sufficient to protect the interests of the right-holder.

Payment of the security shall not affect the other legal remedies available to the right-holder.

Where the procedure to determine whether an intellectual property right has been infringed under national law has been initiated other than on the initiative of the holder of a design right, patent, supplementary protection certificate or plant variety right, the security shall be released if the person initiating the said procedure does not exercise his right to institute legal proceedings within 20 working days of the date on which he receives notification of the suspension of release or detention.

Where the second subparagraph of Article 13(1) applies, this period may be extended to a maximum of 30 working days.

Article 15

The conditions of storage of the goods during the period of suspension of release or detention shall be determined by each Member State but shall not give rise to costs for the customs administrations.

CHAPTER IV PROVISIONS APPLICABLE TO GOODS FOUND TO INFRINGE AN INTELLECTUAL PROPERTY RIGHT

Article 16

Goods found to infringe an intellectual property right at the end of the procedure provided for in Article 9 shall not be:

- allowed to enter into the Community customs territory,
- released for free circulation,
- removed from the Community customs territory,
- exported,
- re-exported,
- placed under a suspensive procedure or
- placed in a free zone or free warehouse.

Article 17

1. Without prejudice to the other legal remedies open to the right-holder, Member States shall adopt the measures necessary to allow the competent authorities:

- (a) in accordance with the relevant provisions of national law, to destroy goods found to infringe an intellectual property right or dispose of them outside commercial channels in such a way as to preclude injury to the right-holder, without compensation of any sort and, unless otherwise specified in national legislation, at no cost to the exchequer;
- (b) to take, in respect of such goods, any other measures effectively depriving the persons concerned of any economic gains from the transaction.

Save in exceptional cases, simply removing the trademarks which have been affixed to counterfeit goods without authorisation shall not be regarded as effectively depriving the persons concerned

of any economic gains from the transaction.

2. Goods found to infringe an intellectual property right may be forfeited to the exchequer. In that event, paragraph 1(a) shall apply.

CHAPTER V PENALTIES

Article 18

Each Member State shall introduce penalties to apply in cases of violation of this Regulation. Such penalties must be effective, proportionate and dissuasive.

CHAPTER VI LIABILITY OF THE CUSTOMS AUTHORITIES AND THE RIGHT-HOLDER

Article 19

1. Save as provided by the law of the Member State in which an application is lodged or, in the case of an application under Article 5(4), by the law of the Member State in which goods infringing an intellectual property right are not detected by a customs office, the acceptance of an application shall not entitle the right-holder to compensation in the event that such goods are not detected by a customs office and are released or no action is taken to detain them in accordance with Article 9(1).

2. The exercise by a customs office or by another duly empowered authority of the powers conferred on them in order to fight against goods infringing an intellectual property right shall not render them liable towards the persons involved in the situations referred to in Article 1(1) or the persons affected by the measures provided for in Article 4 for damages suffered by them as a result of the authority's intervention, except where provided for by the law of the Member State in which the application is made or, in the case of an application under Article 5(4), by the law of the Member State in which loss or damage is incurred.

3. A right-holder's civil liability shall be governed by the law of the Member State in which the goods in question were placed in one of the situations referred to in Article 1(1).

CHAPTER VII FINAL PROVISIONS

Article 20

The measures necessary for the application of this Regulation shall be adopted in accordance with the procedure referred to in Article 21(2).

Article 21

1. The Commission shall be assisted by the Customs Code Committee.

2. Where reference is made to this paragraph, Articles 4 and 7 of Decision 1999/468/EC shall apply.

The period laid down in Article 4(3) of Decision 1999/468/EC shall be set at three months.

Article 22

Member States shall communicate all relevant information on the application of this Regulation to the Commission.

The Commission shall forward this information to the other Member States.

The provisions of Regulation (EC) No 515/97 shall apply *mutatis mutandis*.

The details of the information procedure shall be drawn up under the implementing provisions in accordance with the procedure referred to in Article 21(2).

Article 23

On the basis of the information referred to in Article 22, the Commission shall report annually to the Council on the application of this Regulation. This report may, where appropriate, be accompanied by a proposal to amend the Regulation.

Article 24

Regulation (EC) No 3295/94 is repealed with effect from 1 July 2004.

References to the repealed Regulation shall be construed as references to this Regulation.

Article 25

This Regulation shall enter into force on the seventh day following that of its publication in the Official Journal of the European Union.

It shall apply with effect from 1 July 2004.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 22 July 2003.

For the Council

The President

G. Alemanno

**Corrigendum to Directive 2004/48/EC of the European Parliament and of the Council
of 29 April 2004
on the enforcement of intellectual property rights (OJ L 157, 30.4.2004)**

Corrigendum to Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights (Official Journal of the European Union L 157 of 30 April 2004)

Directive 2004/48/EC should read as follows:

Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights (Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 95 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Economic and Social Committee(1),

After consulting the Committee of the Regions,

Acting in accordance with the procedure laid down in Article 251 of the Treaty(2),

Whereas:

- (1) The achievement of the internal market entails eliminating restrictions on freedom of movement and distortions of competition, while creating an environment conducive to innovation and investment. In this context, the protection of intellectual property is an essential element for the success of the internal market. The protection of intellectual property is important not only for promoting innovation and creativity, but also for developing employment and improving competitiveness.
- (2) The protection of intellectual property should allow the inventor or creator to derive a legitimate profit from his/her invention or creation. It should also allow the widest possible dissemination of works, ideas and new know-how. At the same time, it should not hamper freedom of expression, the free movement of information, or the protection of personal data, including on the Internet.
- (3) However, without effective means of enforcing intellectual property rights, innovation and creativity are discouraged and investment diminished. It is therefore necessary to ensure that the substantive law on intellectual property, which is nowadays largely part of the *acquis communautaire*, is applied effectively in the Community. In this respect, the means of enforcing intellectual property rights are of paramount importance for the success of the Internal Market.
- (4) At international level, all Member States, as well as the Community itself as regards matters within its competence, are bound by the Agreement on trade-related aspects of intellectual property (the TRIPS Agreement), approved, as part of the multilateral negotiations of the Uruguay Round, by Council Decision 94/800/EC(3) and concluded in the framework of the World Trade Organisation.
- (5) The TRIPS Agreement contains, in particular, provisions on the means of enforcing intellectual property rights, which are common standards applicable at international level and implemented in all Member States. This Directive should not affect Member States' international obligations, including those under the TRIPS Agreement.
- (6) There are also international conventions to which all Member States are parties and which also contain provisions on the means of enforcing intellectual property rights. These include, in particular, the Paris Convention for the Protection of Industrial Property, the Berne Convention for the Protection of Literary and Artistic Works, and the Rome Convention for the Protection

B2>32004L0048R(01)

of Performers, Producers of Phonograms and Broadcasting Organisations.

- (7) It emerges from the consultations held by the Commission on this question that, in the Member States, and despite the TRIPS Agreement, there are still major disparities as regards the means of enforcing intellectual property rights. For instance, the arrangements for applying provisional measures, which are used in particular to preserve evidence, the calculation of damages, or the arrangements for applying injunctions, vary widely from one Member State to another. In some Member States, there are no measures, procedures and remedies such as the right of information and the recall, at the infringer's expense, of the infringing goods placed on the market.
- (8) The disparities between the systems of the Member States as regards the means of enforcing intellectual property rights are prejudicial to the proper functioning of the Internal Market and make it impossible to ensure that intellectual property rights enjoy an equivalent level of protection throughout the Community. This situation does not promote free movement within the internal market or create an environment conducive to healthy competition.
- (9) The current disparities also lead to a weakening of the substantive law on intellectual property and to a fragmentation of the internal market in this field. This causes a loss of confidence in the internal market in business circles, with a consequent reduction in investment in innovation and creation. Infringements of intellectual property rights appear to be increasingly linked to organised crime. Increasing use of the Internet enables pirated products to be distributed instantly around the globe. Effective enforcement of the substantive law on intellectual property should be ensured by specific action at Community level. Approximation of the legislation of the Member States in this field is therefore an essential prerequisite for the proper functioning of the internal market.
- (10) The objective of this Directive is to approximate legislative systems so as to ensure a high, equivalent and homogeneous level of protection in the internal market.
- (11) This Directive does not aim to establish harmonised rules for judicial cooperation, jurisdiction, the recognition and enforcement of decisions in civil and commercial matters, or deal with applicable law. There are Community instruments which govern such matters in general terms and are, in principle, equally applicable to intellectual property.
- (12) This Directive should not affect the application of the rules of competition, and in particular Articles 81 and 82 of the Treaty. The measures provided for in this Directive should not be used to restrict competition unduly in a manner contrary to the Treaty.
- (13) It is necessary to define the scope of this Directive as widely as possible in order to encompass all the intellectual property rights covered by Community provisions in this field and/or by the national law of the Member State concerned. Nevertheless, that requirement does not affect the possibility, on the part of those Member States which so wish, to extend, for internal purposes, the provisions of this Directive to include acts involving unfair competition, including parasitic copies, or similar activities.
- (14) The measures provided for in Articles 6(2), 8(1) and 9(2) need to be applied only in respect of acts carried out on a commercial scale. This is without prejudice to the possibility for Member States to apply those measures also in respect of other acts. Acts carried out on a commercial scale are those carried out for direct or indirect economic or commercial advantage; this would normally exclude acts carried out by end- consumers acting in good faith.
- (15) This Directive should not affect substantive law on intellectual property, Directive 95/46/EC of 24 October 1995 of the European Parliament and of the Council on the protection of individuals with regard to the processing of personal data and on the free movement of such data(4), Directive

B3>32004L0048R(01)

1999/93/EC of the European Parliament and of the Council of 13 December 1999 on a Community framework for electronic signatures(5) and Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the internal market(6).

- (16) The provisions of this Directive should be without prejudice to the particular provisions for the enforcement of rights and on exceptions in the domain of copyright and related rights set out in Community instruments and notably those found in Council Directive 91/250/EEC of 14 May 1991 on the legal protection of computer programs(7) or in Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society(8).
- (17) The measures, procedures and remedies provided for in this Directive should be determined in each case in such a manner as to take due account of the specific characteristics of that case, including the specific features of each intellectual property right and, where appropriate, the intentional or unintentional character of the infringement.
- (18) The persons entitled to request application of those measures, procedures and remedies should be not only the rightholders but also persons who have a direct interest and legal standing in so far as permitted by and in accordance with the applicable law, which may include professional organisations in charge of the management of those rights or for the defence of the collective and individual interests for which they are responsible.
- (19) Since copyright exists from the creation of a work and does not require formal registration, it is appropriate to adopt the rule laid down in Article 15 of the Berne Convention, which establishes the presumption whereby the author of a literary or artistic work is regarded as such if his/her name appears on the work. A similar presumption should be applied to the owners of related rights since it is often the holder of a related right, such as a phonogram producer, who will seek to defend rights and engage in fighting acts of piracy.
- (20) Given that evidence is an element of paramount importance for establishing the infringement of intellectual property rights, it is appropriate to ensure that effective means of presenting, obtaining and preserving evidence are available. The procedures should have regard to the rights of the defence and provide the necessary guarantees, including the protection of confidential information. For infringements committed on a commercial scale it is also important that the courts may order access, where appropriate, to banking, financial or commercial documents under the control of the alleged infringer.
- (21) Other measures designed to ensure a high level of protection exist in certain Member States and should be made available in all the Member States. This is the case with the right of information, which allows precise information to be obtained on the origin of the infringing goods or services, the distribution channels and the identity of any third parties involved in the infringement.
- (22) It is also essential to provide for provisional measures for the immediate termination of infringements, without awaiting a decision on the substance of the case, while observing the rights of the defence, ensuring the proportionality of the provisional measures as appropriate to the characteristics of the case in question and providing the guarantees needed to cover the costs and the injury caused to the defendant by an unjustified request. Such measures are particularly justified where any delay would cause irreparable harm to the holder of an intellectual property right.
- (23) Without prejudice to any other measures, procedures and remedies available, rightholders should have the possibility of applying for an injunction against an intermediary whose services are being used by a third party to infringe the rightholder's industrial property right. The conditions

B4>32004L0048R(01)

and procedures relating to such injunctions should be left to the national law of the Member States. As far as infringements of copyright and related rights are concerned, a comprehensive level of harmonisation is already provided for in Directive 2001/29/EC. Article 8(3) of Directive 2001/29/EC should therefore not be affected by this Directive.

- (24) Depending on the particular case, and if justified by the circumstances, the measures, procedures and remedies to be provided for should include prohibitory measures aimed at preventing further infringements of intellectual property rights. Moreover there should be corrective measures, where appropriate at the expense of the infringer, such as the recall and definitive removal from the channels of commerce, or destruction, of the infringing goods and, in appropriate cases, of the materials and implements principally used in the creation or manufacture of these goods. These corrective measures should take account of the interests of third parties including, in particular, consumers and private parties acting in good faith.
- (25) Where an infringement is committed unintentionally and without negligence and where the corrective measures or injunctions provided for by this Directive would be disproportionate, Member States should have the option of providing for the possibility, in appropriate cases, of pecuniary compensation being awarded to the injured party as an alternative measure. However, where the commercial use of counterfeit goods or the supply of services would constitute an infringement of law other than intellectual property law or would be likely to harm consumers, such use or supply should remain prohibited.
- (26) With a view to compensating for the prejudice suffered as a result of an infringement committed by an infringer who engaged in an activity in the knowledge, or with reasonable grounds for knowing, that it would give rise to such an infringement, the amount of damages awarded to the rightholder should take account of all appropriate aspects, such as loss of earnings incurred by the rightholder, or unfair profits made by the infringer and, where appropriate, any moral prejudice caused to the rightholder. As an alternative, for example where it would be difficult to determine the amount of the actual prejudice suffered, the amount of the damages might be derived from elements such as the royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question. The aim is not to introduce an obligation to provide for punitive damages but to allow for compensation based on an objective criterion while taking account of the expenses incurred by the rightholder, such as the costs of identification and research.
- (27) To act as a supplementary deterrent to future infringers and to contribute to the awareness of the public at large, it is useful to publicise decisions in intellectual property infringement cases.
- (28) In addition to the civil and administrative measures, procedures and remedies provided for under this Directive, criminal sanctions also constitute, in appropriate cases, a means of ensuring the enforcement of intellectual property rights.
- (29) Industry should take an active part in the fight against piracy and counterfeiting. The development of codes of conduct in the circles directly affected is a supplementary means of bolstering the regulatory framework. The Member States, in collaboration with the Commission, should encourage the development of codes of conduct in general. Monitoring of the manufacture of optical discs, particularly by means of an identification code embedded in discs produced in the Community, helps to limit infringements of intellectual property rights in this sector, which suffers from piracy on a large scale. However, these technical protection measures should not be misused to protect markets and prevent parallel imports.
- (30) In order to facilitate the uniform application of this Directive, it is appropriate to provide

B5>32004L0048R(01)

for systems of cooperation and the exchange of information between Member States, on the one hand, and between the Member States and the Commission on the other, in particular by creating a network of correspondents designated by the Member States and by providing regular reports assessing the application of this Directive and the effectiveness of the measures taken by the various national bodies.

- (31) Since, for the reasons already described, the objective of this Directive can best be achieved at Community level, the Community may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective.
- (32) This Directive respects the fundamental rights and observes the principles recognised in particular by the Charter of Fundamental Rights of the European Union. In particular, this Directive seeks to ensure full respect for intellectual property, in accordance with Article 17(2) of that Charter,

HAVE ADOPTED THIS DIRECTIVE:

CHAPTER I

OBJECTIVE AND SCOPE

Article 1

Subject matter

This Directive concerns the measures, procedures and remedies necessary to ensure the enforcement of intellectual property rights. For the purposes of this Directive, the term "intellectual property rights" includes industrial property rights.

Article 2

Scope

1. Without prejudice to the means which are or may be provided for in Community or national legislation, in so far as those means may be more favourable for rightholders, the measures, procedures and remedies provided for by this Directive shall apply, in accordance with Article 3, to any infringement of intellectual property rights as provided for by Community law and/or by the national law of the Member State concerned.

2. This Directive shall be without prejudice to the specific provisions on the enforcement of rights and on exceptions contained in Community legislation concerning copyright and rights related to copyright, notably those found in Directive 91/250/EEC and, in particular, Article 7 thereof or in Directive 2001/29/EC and, in particular, Articles 2 to 6 and Article 8 thereof.

3. This Directive shall not affect:

- (a) the Community provisions governing the substantive law on intellectual property, Directive 95/46/EC, Directive 1999/93/EC or Directive 2000/31/EC, in general, and Articles 12 to 15 of Directive 2000/31/EC in particular;

B6>32004L0048R(01)

-
- (b) Member States' international obligations and notably the TRIPS Agreement, including those relating to criminal procedures and penalties;
- (c) any national provisions in Member States relating to criminal procedures or penalties in respect of infringement of intellectual property rights.

CHAPTER II

MEASURES, PROCEDURES AND REMEDIES

Section 1

General provisions

Article 3

General obligation

1. Member States shall provide for the measures, procedures and remedies necessary to ensure the enforcement of the intellectual property rights covered by this Directive. Those measures, procedures and remedies shall be fair and equitable and shall not be unnecessarily complicated or costly, or entail unreasonable time-limits or unwarranted delays.

2. Those measures, procedures and remedies shall also be effective, proportionate and dissuasive and shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse.

Article 4

Persons entitled to apply for the application of the measures, procedures and remedies

Member States shall recognise as persons entitled to seek application of the measures, procedures and remedies referred to in this chapter:

- (a) the holders of intellectual property rights, in accordance with the provisions of the applicable law;
- (b) all other persons authorised to use those rights, in particular licensees, in so far as permitted by and in accordance with the provisions of the applicable law;
- (c) intellectual property collective rights-management bodies which are regularly recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of the applicable law;
- (d) professional defence bodies which are regularly recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of the applicable law.

Article 5

Presumption of authorship or ownership

B7>32004L0048R(01)

For the purposes of applying the measures, procedures and remedies provided for in this Directive,

- (a) for the author of a literary or artistic work, in the absence of proof to the contrary, to be regarded as such, and consequently to be entitled to institute infringement proceedings, it shall be sufficient for his/her name to appear on the work in the usual manner;
- (b) the provision under (a) shall apply *mutatis mutandis* to the holders of rights related to copyright with regard to their protected subject matter.

Section 2

Evidence

Article 6

Evidence

1. Member States shall ensure that, on application by a party which has presented reasonably available evidence sufficient to support its claims, and has, in substantiating those claims, specified evidence which lies in the control of the opposing party, the competent judicial authorities may order that such evidence be presented by the opposing party, subject to the protection of confidential information. For the purposes of this paragraph, Member States may provide that a reasonable sample of a substantial number of copies of a work or any other protected object be considered by the competent judicial authorities to constitute reasonable evidence.

2. Under the same conditions, in the case of an infringement committed on a commercial scale Member States shall take such measures as are necessary to enable the competent judicial authorities to order, where appropriate, on application by a party, the communication of banking, financial or commercial documents under the control of the opposing party, subject to the protection of confidential information.

Article 7

Measures for preserving evidence

1. Member States shall ensure that, even before the commencement of proceedings on the merits of the case, the competent judicial authorities may, on application by a party who has presented reasonably available evidence to support his/her claims that his/her intellectual property right has been infringed or is about to be infringed, order prompt and effective provisional measures to preserve relevant evidence in respect of the alleged infringement, subject to the protection of confidential information. Such measures may include the detailed description, with or without the taking of samples, or the physical seizure of the infringing goods, and, in appropriate cases, the materials and implements used in the production and/or distribution of these goods and the documents relating thereto. Those measures shall be taken, if necessary without the other party having been heard, in particular where any delay is likely to cause irreparable harm to the rightholder or where there is a demonstrable risk of evidence being destroyed.

Where measures to preserve evidence are adopted without the other party having been heard, the parties affected shall be given notice, without delay after the execution of the measures at the latest. A review, including a right to be heard, shall take place upon request of the parties affected with a view to deciding, within a reasonable period after the notification of the measures, whether

B8>32004L0048R(01)

the measures shall be modified, revoked or confirmed.

2. Member States shall ensure that the measures to preserve evidence may be subject to the lodging by the applicant of adequate security or an equivalent assurance intended to ensure compensation for any prejudice suffered by the defendant as provided for in paragraph 4.

3. Member States shall ensure that the measures to preserve evidence are revoked or otherwise cease to have effect, upon request of the defendant, without prejudice to the damages which may be claimed, if the applicant does not institute, within a reasonable period, proceedings leading to a decision on the merits of the case before the competent judicial authority, the period to be determined by the judicial authority ordering the measures where the law of a Member State so permits or, in the absence of such determination, within a period not exceeding 20 working days or 31 calendar days, whichever is the longer.

4. Where the measures to preserve evidence are revoked, or where they lapse due to any act or omission by the applicant, or where it is subsequently found that there has been no infringement or threat of infringement of an intellectual property right, the judicial authorities shall have the authority to order the applicant, upon request of the defendant, to provide the defendant appropriate compensation for any injury caused by those measures.

5. Member States may take measures to protect witnesses' identity.

Section 3

Right of information

Article 8

Right of information

1. Member States shall ensure that, in the context of proceedings concerning an infringement of an intellectual property right and in response to a justified and proportionate request of the claimant, the competent judicial authorities may order that information on the origin and distribution networks of the goods or services which infringe an intellectual property right be provided by the infringer and/or any other person who:

- (a) was found in possession of the infringing goods on a commercial scale;
- (b) was found to be using the infringing services on a commercial scale;
- (c) was found to be providing on a commercial scale services used in infringing activities;

or

- (d) was indicated by the person referred to in point (a), (b) or (c) as being involved in the production, manufacture or distribution of the goods or the provision of the services.

2. The information referred to in paragraph 1 shall, as appropriate, comprise:

- (a) the names and addresses of the producers, manufacturers, distributors, suppliers and other previous holders of the goods or services, as well as the intended wholesalers and retailers;
- (b) information on the quantities produced, manufactured, delivered, received or ordered, as well as the price obtained for the goods or services in question.

3. Paragraphs 1 and 2 shall apply without prejudice to other statutory provisions which:

B9>32004L0048R(01)

-
- (a) grant the rightholder rights to receive fuller information;
 - (b) govern the use in civil or criminal proceedings of the information communicated pursuant to this Article;
 - (c) govern responsibility for misuse of the right of information;
- or
- (d) afford an opportunity for refusing to provide information which would force the person referred to in paragraph 1 to admit to his/her own participation or that of his/her close relatives in an infringement of an intellectual property right;
- or
- (e) govern the protection of confidentiality of information sources or the processing of personal data.

Section 4

Provisional and precautionary measures

Article 9

Provisional and precautionary measures

1. Member States shall ensure that the judicial authorities may, at the request of the applicant:

- (a) issue against the alleged infringer an interlocutory injunction intended to prevent any imminent infringement of an intellectual property right, or to forbid, on a provisional basis and subject, where appropriate, to a recurring penalty payment where provided for by national law, the continuation of the alleged infringements of that right, or to make such continuation subject to the lodging of guarantees intended to ensure the compensation of the rightholder; an interlocutory injunction may also be issued, under the same conditions, against an intermediary whose services are being used by a third party to infringe an intellectual property right; injunctions against intermediaries whose services are used by a third party to infringe a copyright or a related right are covered by Directive 2001/29/EC;
- (b) order the seizure or delivery up of the goods suspected of infringing an intellectual property right so as to prevent their entry into or movement within the channels of commerce.

2. In the case of an infringement committed on a commercial scale, the Member States shall ensure that, if the injured party demonstrates circumstances likely to endanger the recovery of damages, the judicial authorities may order the precautionary seizure of the movable and immovable property of the alleged infringer, including the blocking of his/her bank accounts and other assets. To that end, the competent authorities may order the communication of bank, financial or commercial documents, or appropriate access to the relevant information.

3. The judicial authorities shall, in respect of the measures referred to in paragraphs 1 and 2, have the authority to require the applicant to provide any reasonably available evidence in order to satisfy themselves with a sufficient degree of certainty that the applicant is the rightholder and that the applicant's right is being infringed, or that such infringement is imminent.

4. Member States shall ensure that the provisional measures referred to in paragraphs 1 and 2 may, in appropriate cases, be taken without the defendant having been heard, in particular where any delay would cause irreparable harm to the rightholder. In that event, the parties shall be so informed

B10>32004L0048R(01)

without delay after the execution of the measures at the latest.

A review, including a right to be heard, shall take place upon request of the defendant with a view to deciding, within a reasonable time after notification of the measures, whether those measures shall be modified, revoked or confirmed.

5. Member States shall ensure that the provisional measures referred to in paragraphs 1 and 2 are revoked or otherwise cease to have effect, upon request of the defendant, if the applicant does not institute, within a reasonable period, proceedings leading to a decision on the merits of the case before the competent judicial authority, the period to be determined by the judicial authority ordering the measures where the law of a Member State so permits or, in the absence of such determination, within a period not exceeding 20 working days or 31 calendar days, whichever is the longer.

6. The competent judicial authorities may make the provisional measures referred to in paragraphs 1 and 2 subject to the lodging by the applicant of adequate security or an equivalent assurance intended to ensure compensation for any prejudice suffered by the defendant as provided for in paragraph 7.

7. Where the provisional measures are revoked or where they lapse due to any act or omission by the applicant, or where it is subsequently found that there has been no infringement or threat of infringement of an intellectual property right, the judicial authorities shall have the authority to order the applicant, upon request of the defendant, to provide the defendant appropriate compensation for any injury caused by those measures.

Section 5

Measures resulting from a decision on the merits of the case

Article 10

Corrective measures

1. Without prejudice to any damages due to the rightholder by reason of the infringement, and without compensation of any sort, Member States shall ensure that the competent judicial authorities may order, at the request of the applicant, that appropriate measures be taken with regard to goods that they have found to be infringing an intellectual property right and, in appropriate cases, with regard to materials and implements principally used in the creation or manufacture of those goods. Such measures shall include:

- (a) recall from the channels of commerce;
 - (b) definitive removal from the channels of commerce;
- or
- (c) destruction.

2. The judicial authorities shall order that those measures be carried out at the expense of the infringer, unless particular reasons are invoked for not doing so.

3. In considering a request for corrective measures, the need for proportionality between the seriousness of the infringement and the remedies ordered as well as the interests of third parties shall be taken into account.

B11>32004L0048R(01)

Article 11

Injunctions

Member States shall ensure that, where a judicial decision is taken finding an infringement of an intellectual property right, the judicial authorities may issue against the infringer an injunction aimed at prohibiting the continuation of the infringement. Where provided for by national law, non-compliance with an injunction shall, where appropriate, be subject to a recurring penalty payment, with a view to ensuring compliance. Member States shall also ensure that rightholders are in a position to apply for an injunction against intermediaries whose services are used by a third party to infringe an intellectual property right, without prejudice to Article 8(3) of Directive 2001/29/EC.

Article 12

Alternative measures

Member States may provide that, in appropriate cases and at the request of the person liable to be subject to the measures provided for in this section, the competent judicial authorities may order pecuniary compensation to be paid to the injured party instead of applying the measures provided for in this section if that person acted unintentionally and without negligence, if execution of the measures in question would cause him/her disproportionate harm and if pecuniary compensation to the injured party appears reasonably satisfactory.

Section 6

Damages and legal costs

Article 13

Damages

1. Member States shall ensure that the competent judicial authorities, on application of the injured party, order the infringer who knowingly, or with reasonable grounds to know, engaged in an infringing activity, to pay the rightholder damages appropriate to the actual prejudice suffered by him/her as a result of the infringement.

When the judicial authorities set the damages:

- (a) they shall take into account all appropriate aspects, such as the negative economic consequences, including lost profits, which the injured party has suffered, any unfair profits made by the infringer and, in appropriate cases, elements other than economic factors, such as the moral prejudice caused to the rightholder by the infringement;
- or
- (b) as an alternative to (a), they may, in appropriate cases, set the damages as a lump sum on the basis of elements such as at least the amount of royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question.

2. Where the infringer did not knowingly, or with reasonable grounds know, engage in infringing

B12>32004L0048R(01)

activity, Member States may lay down that the judicial authorities may order the recovery of profits or the payment of damages, which may be pre-established.

Article 14

Legal costs

Member States shall ensure that reasonable and proportionate legal costs and other expenses incurred by the successful party shall, as a general rule, be borne by the unsuccessful party, unless equity does not allow this.

Section 7

Publicity measures

Article 15

Publication of judicial decisions

Member States shall ensure that, in legal proceedings instituted for infringement of an intellectual property right, the judicial authorities may order, at the request of the applicant and at the expense of the infringer, appropriate measures for the dissemination of the information concerning the decision, including displaying the decision and publishing it in full or in part. Member States may provide for other additional publicity measures which are appropriate to the particular circumstances, including prominent advertising.

CHAPTER III

SANCTIONS BY MEMBER STATES

Article 16

Sanctions by Member States

Without prejudice to the civil and administrative measures, procedures and remedies laid down by this Directive, Member States may apply other appropriate sanctions in cases where intellectual property rights have been infringed.

CHAPTER IV

CODES OF CONDUCT AND ADMINISTRATIVE COOPERATION

Article 17

Codes of conduct

Member States shall encourage:

(a) the development by trade or professional associations or organisations of codes of conduct at

B13>32004L0048R(01)

Community level aimed at contributing towards the enforcement of the intellectual property rights, particularly by recommending the use on optical discs of a code enabling the identification of the origin of their manufacture;

- (b) the submission to the Commission of draft codes of conduct at national and Community level and of any evaluations of the application of these codes of conduct.

Article 18

Assessment

1. Three years after the date laid down in Article 20(1), each Member State shall submit to the Commission a report on the implementation of this Directive.

On the basis of those reports, the Commission shall draw up a report on the application of this Directive, including an assessment of the effectiveness of the measures taken, as well as an evaluation of its impact on innovation and the development of the information society. That report shall then be transmitted to the European Parliament, the Council and the European Economic and Social Committee. It shall be accompanied, if necessary and in the light of developments in the Community legal order, by proposals for amendments to this Directive.

2. Member States shall provide the Commission with all the aid and assistance it may need when drawing up the report referred to in the second subparagraph of paragraph 1.

Article 19

Exchange of information and correspondents

For the purpose of promoting cooperation, including the exchange of information, among Member States and between Member States and the Commission, each Member State shall designate one or more national correspondents for any question relating to the implementation of the measures provided for by this Directive. It shall communicate the details of the national correspondent(s) to the other Member States and to the Commission.

CHAPTER V

FINAL PROVISIONS

Article 20

Implementation

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 29 April 2006. They shall forthwith inform the Commission thereof.

When Member States adopt these measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2. Member States shall communicate to the Commission the texts of the provisions of national law

B14>32004L0048R(01)

which they adopt in the field governed by this Directive.

Article 21

Entry into force

This Directive shall enter into force on the 20th day following that of its publication in the Official Journal of the European Union.

Article 22

Addressees

This Directive is addressed to the Member States.

Done at Strasbourg, 29 April 2004.

For the European Parliament

The President

P. Cox

For the Council

The President

M. Mc Dowell

- (1) OJ C 32, 5.2.2004, p. 15.

Corrigendum to Directive [2004/48/EC](#) of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights (Official Journal of the European Union L 157 of 30 April 2004)

Directive [2004/48/EC](#) should read as follows:

Directive [2004/48/EC](#) of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights (Text with EEA relevance)

B15>32004L0048R(01)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 95 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Economic and Social Committee(1),

After consulting the Committee of the Regions,

Acting in accordance with the procedure laid down in Article 251 of the Treaty(2),

Whereas:

- (1) The achievement of the internal market entails eliminating restrictions on freedom of movement and distortions of competition, while creating an environment conducive to innovation and investment. In this context, the protection of intellectual property is an essential element for the success of the internal market. The protection of intellectual property is important not only for promoting innovation and creativity, but also for developing employment and improving competitiveness.
- (2) The protection of intellectual property should allow the inventor or creator to derive a legitimate profit from his/her invention or creation. It should also allow the widest possible dissemination of works, ideas and new know-how. At the same time, it should not hamper freedom of expression, the free movement of information, or the protection of personal data, including on the Internet.
- (3) However, without effective means of enforcing intellectual property rights, innovation and creativity are discouraged and investment diminished. It is therefore necessary to ensure that the substantive law on intellectual property, which is nowadays largely part of the *acquis communautaire*, is applied effectively in the Community. In this respect, the means of enforcing intellectual property rights are of paramount importance for the success of the Internal Market.
- (4) At international level, all Member States, as well as the Community itself as regards matters within its competence, are bound by the Agreement on trade-related aspects of intellectual property (the TRIPS Agreement), approved, as part of the multilateral negotiations of the Uruguay Round, by Council Decision 94/800/EC(3) and concluded in the framework of the World Trade Organisation.
- (5) The TRIPS Agreement contains, in particular, provisions on the means of enforcing intellectual property rights, which are common standards applicable at international level and implemented in all Member States. This Directive should not affect Member States' international obligations, including those under the TRIPS Agreement.
- (6) There are also international conventions to which all Member States are parties and which also contain provisions on the means of enforcing intellectual property rights. These include, in particular, the Paris Convention for the Protection of Industrial Property, the Berne Convention for the Protection of Literary and Artistic Works, and the Rome Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organisations.
- (7) It emerges from the consultations held by the Commission on this question that, in the Member States, and despite the TRIPS Agreement, there are still major disparities as regards the means of enforcing intellectual property rights. For instance, the arrangements for applying provisional measures, which are used in particular to preserve evidence, the calculation of damages, or the arrangements for applying injunctions, vary widely from one Member State to another. In some Member States, there are no measures, procedures and remedies such as the right of information and the recall, at the infringer's expense, of the infringing goods placed on the market.
- (8) The disparities between the systems of the Member States as regards the means of enforcing

B16>32004L0048R(01)

intellectual property rights are prejudicial to the proper functioning of the Internal Market and make it impossible to ensure that intellectual property rights enjoy an equivalent level of protection throughout the Community. This situation does not promote free movement within the internal market or create an environment conducive to healthy competition.

- (9) The current disparities also lead to a weakening of the substantive law on intellectual property and to a fragmentation of the internal market in this field. This causes a loss of confidence in the internal market in business circles, with a consequent reduction in investment in innovation and creation. Infringements of intellectual property rights appear to be increasingly linked to organised crime. Increasing use of the Internet enables pirated products to be distributed instantly around the globe. Effective enforcement of the substantive law on intellectual property should be ensured by specific action at Community level. Approximation of the legislation of the Member States in this field is therefore an essential prerequisite for the proper functioning of the internal market.
- (10) The objective of this Directive is to approximate legislative systems so as to ensure a high, equivalent and homogeneous level of protection in the internal market.
- (11) This Directive does not aim to establish harmonised rules for judicial cooperation, jurisdiction, the recognition and enforcement of decisions in civil and commercial matters, or deal with applicable law. There are Community instruments which govern such matters in general terms and are, in principle, equally applicable to intellectual property.
- (12) This Directive should not affect the application of the rules of competition, and in particular Articles 81 and 82 of the Treaty. The measures provided for in this Directive should not be used to restrict competition unduly in a manner contrary to the Treaty.
- (13) It is necessary to define the scope of this Directive as widely as possible in order to encompass all the intellectual property rights covered by Community provisions in this field and/or by the national law of the Member State concerned. Nevertheless, that requirement does not affect the possibility, on the part of those Member States which so wish, to extend, for internal purposes, the provisions of this Directive to include acts involving unfair competition, including parasitic copies, or similar activities.
- (14) The measures provided for in Articles 6(2), 8(1) and 9(2) need to be applied only in respect of acts carried out on a commercial scale. This is without prejudice to the possibility for Member States to apply those measures also in respect of other acts. Acts carried out on a commercial scale are those carried out for direct or indirect economic or commercial advantage; this would normally exclude acts carried out by end- consumers acting in good faith.
- (15) This Directive should not affect substantive law on intellectual property, Directive 95/46/EC of 24 October 1995 of the European Parliament and of the Council on the protection of individuals with regard to the processing of personal data and on the free movement of such data(4), Directive 1999/93/EC of the European Parliament and of the Council of 13 December 1999 on a Community framework for electronic signatures(5) and Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the internal market(6).
- (16) The provisions of this Directive should be without prejudice to the particular provisions for the enforcement of rights and on exceptions in the domain of copyright and related rights set out in Community instruments and notably those found in Council Directive 91/250/EEC of 14 May 1991 on the legal protection of computer programs(7) or in Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society(8).

B17>32004L0048R(01)

-
- (17) The measures, procedures and remedies provided for in this Directive should be determined in each case in such a manner as to take due account of the specific characteristics of that case, including the specific features of each intellectual property right and, where appropriate, the intentional or unintentional character of the infringement.
- (18) The persons entitled to request application of those measures, procedures and remedies should be not only the rightholders but also persons who have a direct interest and legal standing in so far as permitted by and in accordance with the applicable law, which may include professional organisations in charge of the management of those rights or for the defence of the collective and individual interests for which they are responsible.
- (19) Since copyright exists from the creation of a work and does not require formal registration, it is appropriate to adopt the rule laid down in Article 15 of the Berne Convention, which establishes the presumption whereby the author of a literary or artistic work is regarded as such if his/her name appears on the work. A similar presumption should be applied to the owners of related rights since it is often the holder of a related right, such as a phonogram producer, who will seek to defend rights and engage in fighting acts of piracy.
- (20) Given that evidence is an element of paramount importance for establishing the infringement of intellectual property rights, it is appropriate to ensure that effective means of presenting, obtaining and preserving evidence are available. The procedures should have regard to the rights of the defence and provide the necessary guarantees, including the protection of confidential information. For infringements committed on a commercial scale it is also important that the courts may order access, where appropriate, to banking, financial or commercial documents under the control of the alleged infringer.
- (21) Other measures designed to ensure a high level of protection exist in certain Member States and should be made available in all the Member States. This is the case with the right of information, which allows precise information to be obtained on the origin of the infringing goods or services, the distribution channels and the identity of any third parties involved in the infringement.
- (22) It is also essential to provide for provisional measures for the immediate termination of infringements, without awaiting a decision on the substance of the case, while observing the rights of the defence, ensuring the proportionality of the provisional measures as appropriate to the characteristics of the case in question and providing the guarantees needed to cover the costs and the injury caused to the defendant by an unjustified request. Such measures are particularly justified where any delay would cause irreparable harm to the holder of an intellectual property right.
- (23) Without prejudice to any other measures, procedures and remedies available, rightholders should have the possibility of applying for an injunction against an intermediary whose services are being used by a third party to infringe the rightholder's industrial property right. The conditions and procedures relating to such injunctions should be left to the national law of the Member States. As far as infringements of copyright and related rights are concerned, a comprehensive level of harmonisation is already provided for in Directive 2001/29/EC. Article 8(3) of Directive 2001/29/EC should therefore not be affected by this Directive.
- (24) Depending on the particular case, and if justified by the circumstances, the measures, procedures and remedies to be provided for should include prohibitory measures aimed at preventing further infringements of intellectual property rights. Moreover there should be corrective measures, where appropriate at the expense of the infringer, such as the recall and definitive removal from the channels of commerce, or destruction, of the infringing goods and, in appropriate cases, of the materials and implements principally used in the creation or manufacture of these goods.

B18>32004L0048R(01)

These corrective measures should take account of the interests of third parties including, in particular, consumers and private parties acting in good faith.

- (25) Where an infringement is committed unintentionally and without negligence and where the corrective measures or injunctions provided for by this Directive would be disproportionate, Member States should have the option of providing for the possibility, in appropriate cases, of pecuniary compensation being awarded to the injured party as an alternative measure. However, where the commercial use of counterfeit goods or the supply of services would constitute an infringement of law other than intellectual property law or would be likely to harm consumers, such use or supply should remain prohibited.
- (26) With a view to compensating for the prejudice suffered as a result of an infringement committed by an infringer who engaged in an activity in the knowledge, or with reasonable grounds for knowing, that it would give rise to such an infringement, the amount of damages awarded to the rightholder should take account of all appropriate aspects, such as loss of earnings incurred by the rightholder, or unfair profits made by the infringer and, where appropriate, any moral prejudice caused to the rightholder. As an alternative, for example where it would be difficult to determine the amount of the actual prejudice suffered, the amount of the damages might be derived from elements such as the royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question. The aim is not to introduce an obligation to provide for punitive damages but to allow for compensation based on an objective criterion while taking account of the expenses incurred by the rightholder, such as the costs of identification and research.
- (27) To act as a supplementary deterrent to future infringers and to contribute to the awareness of the public at large, it is useful to publicise decisions in intellectual property infringement cases.
- (28) In addition to the civil and administrative measures, procedures and remedies provided for under this Directive, criminal sanctions also constitute, in appropriate cases, a means of ensuring the enforcement of intellectual property rights.
- (29) Industry should take an active part in the fight against piracy and counterfeiting. The development of codes of conduct in the circles directly affected is a supplementary means of bolstering the regulatory framework. The Member States, in collaboration with the Commission, should encourage the development of codes of conduct in general. Monitoring of the manufacture of optical discs, particularly by means of an identification code embedded in discs produced in the Community, helps to limit infringements of intellectual property rights in this sector, which suffers from piracy on a large scale. However, these technical protection measures should not be misused to protect markets and prevent parallel imports.
- (30) In order to facilitate the uniform application of this Directive, it is appropriate to provide for systems of cooperation and the exchange of information between Member States, on the one hand, and between the Member States and the Commission on the other, in particular by creating a network of correspondents designated by the Member States and by providing regular reports assessing the application of this Directive and the effectiveness of the measures taken by the various national bodies.
- (31) Since, for the reasons already described, the objective of this Directive can best be achieved at Community level, the Community may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective.

B19>32004L0048R(01)

(32) This Directive respects the fundamental rights and observes the principles recognised in particular by the Charter of Fundamental Rights of the European Union. In particular, this Directive seeks to ensure full respect for intellectual property, in accordance with Article 17(2) of that Charter,

HAVE ADOPTED THIS DIRECTIVE:

CHAPTER I

OBJECTIVE AND SCOPE

Article 1

Subject matter

This Directive concerns the measures, procedures and remedies necessary to ensure the enforcement of intellectual property rights. For the purposes of this Directive, the term "intellectual property rights" includes industrial property rights.

Article 2

Scope

1. Without prejudice to the means which are or may be provided for in Community or national legislation, in so far as those means may be more favourable for rightholders, the measures, procedures and remedies provided for by this Directive shall apply, in accordance with Article 3, to any infringement of intellectual property rights as provided for by Community law and/or by the national law of the Member State concerned.

2. This Directive shall be without prejudice to the specific provisions on the enforcement of rights and on exceptions contained in Community legislation concerning copyright and rights related to copyright, notably those found in Directive 91/250/EEC and, in particular, Article 7 thereof or in Directive 2001/29/EC and, in particular, Articles 2 to 6 and Article 8 thereof.

3. This Directive shall not affect:

- (a) the Community provisions governing the substantive law on intellectual property, Directive 95/46/EC, Directive 1999/93/EC or Directive 2000/31/EC, in general, and Articles 12 to 15 of Directive 2000/31/EC in particular;
- (b) Member States' international obligations and notably the TRIPS Agreement, including those relating to criminal procedures and penalties;
- (c) any national provisions in Member States relating to criminal procedures or penalties in respect of infringement of intellectual property rights.

CHAPTER II

MEASURES, PROCEDURES AND REMEDIES

Section 1

General provisions

Article 3

General obligation

1. Member States shall provide for the measures, procedures and remedies necessary to ensure the enforcement of the intellectual property rights covered by this Directive. Those measures, procedures and remedies shall be fair and equitable and shall not be unnecessarily complicated or costly, or entail unreasonable time-limits or unwarranted delays.

2. Those measures, procedures and remedies shall also be effective, proportionate and dissuasive and shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse.

Article 4

Persons entitled to apply for the application of the measures, procedures and remedies

Member States shall recognise as persons entitled to seek application of the measures, procedures and remedies referred to in this chapter:

- (a) the holders of intellectual property rights, in accordance with the provisions of the applicable law;
- (b) all other persons authorised to use those rights, in particular licensees, in so far as permitted by and in accordance with the provisions of the applicable law;
- (c) intellectual property collective rights-management bodies which are regularly recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of the applicable law;
- (d) professional defence bodies which are regularly recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of the applicable law.

Article 5

Presumption of authorship or ownership

For the purposes of applying the measures, procedures and remedies provided for in this Directive,

- (a) for the author of a literary or artistic work, in the absence of proof to the contrary, to be regarded as such, and consequently to be entitled to institute infringement proceedings, it shall be sufficient for his/her name to appear on the work in the usual manner;
- (b) the provision under (a) shall apply *mutatis mutandis* to the holders of rights related to copyright with regard to their protected subject matter.

Section 2

Evidence

Article 6

Evidence

1. Member States shall ensure that, on application by a party which has presented reasonably available evidence sufficient to support its claims, and has, in substantiating those claims, specified evidence which lies in the control of the opposing party, the competent judicial authorities may order that such evidence be presented by the opposing party, subject to the protection of confidential information. For the purposes of this paragraph, Member States may provide that a reasonable sample of a substantial number of copies of a work or any other protected object be considered by the competent judicial authorities to constitute reasonable evidence.

2. Under the same conditions, in the case of an infringement committed on a commercial scale Member States shall take such measures as are necessary to enable the competent judicial authorities to order, where appropriate, on application by a party, the communication of banking, financial or commercial documents under the control of the opposing party, subject to the protection of confidential information.

Article 7

Measures for preserving evidence

1. Member States shall ensure that, even before the commencement of proceedings on the merits of the case, the competent judicial authorities may, on application by a party who has presented reasonably available evidence to support his/her claims that his/her intellectual property right has been infringed or is about to be infringed, order prompt and effective provisional measures to preserve relevant evidence in respect of the alleged infringement, subject to the protection of confidential information. Such measures may include the detailed description, with or without the taking of samples, or the physical seizure of the infringing goods, and, in appropriate cases, the materials and implements used in the production and/or distribution of these goods and the documents relating thereto. Those measures shall be taken, if necessary without the other party having been heard, in particular where any delay is likely to cause irreparable harm to the rightholder or where there is a demonstrable risk of evidence being destroyed.

Where measures to preserve evidence are adopted without the other party having been heard, the parties affected shall be given notice, without delay after the execution of the measures at the latest. A review, including a right to be heard, shall take place upon request of the parties affected with a view to deciding, within a reasonable period after the notification of the measures, whether the measures shall be modified, revoked or confirmed.

2. Member States shall ensure that the measures to preserve evidence may be subject to the lodging by the applicant of adequate security or an equivalent assurance intended to ensure compensation for any prejudice suffered by the defendant as provided for in paragraph 4.

3. Member States shall ensure that the measures to preserve evidence are revoked or otherwise cease to have effect, upon request of the defendant, without prejudice to the damages which may be claimed, if the applicant does not institute, within a reasonable period, proceedings leading to a decision on the merits of the case before the competent judicial authority, the period to be determined by the judicial authority ordering the measures where the law of a Member State so permits or, in the absence of such determination, within a period not exceeding 20 working days or 31 calendar

B22>32004L0048R(01)

days, whichever is the longer.

4. Where the measures to preserve evidence are revoked, or where they lapse due to any act or omission by the applicant, or where it is subsequently found that there has been no infringement or threat of infringement of an intellectual property right, the judicial authorities shall have the authority to order the applicant, upon request of the defendant, to provide the defendant appropriate compensation for any injury caused by those measures.

5. Member States may take measures to protect witnesses' identity.

Section 3

Right of information

Article 8

Right of information

1. Member States shall ensure that, in the context of proceedings concerning an infringement of an intellectual property right and in response to a justified and proportionate request of the claimant, the competent judicial authorities may order that information on the origin and distribution networks of the goods or services which infringe an intellectual property right be provided by the infringer and/or any other person who:

- (a) was found in possession of the infringing goods on a commercial scale;
- (b) was found to be using the infringing services on a commercial scale;
- (c) was found to be providing on a commercial scale services used in infringing activities;

or

- (d) was indicated by the person referred to in point (a), (b) or (c) as being involved in the production, manufacture or distribution of the goods or the provision of the services.

2. The information referred to in paragraph 1 shall, as appropriate, comprise:

- (a) the names and addresses of the producers, manufacturers, distributors, suppliers and other previous holders of the goods or services, as well as the intended wholesalers and retailers;
- (b) information on the quantities produced, manufactured, delivered, received or ordered, as well as the price obtained for the goods or services in question.

3. Paragraphs 1 and 2 shall apply without prejudice to other statutory provisions which:

- (a) grant the rightholder rights to receive fuller information;
- (b) govern the use in civil or criminal proceedings of the information communicated pursuant to this Article;
- (c) govern responsibility for misuse of the right of information;

or

- (d) afford an opportunity for refusing to provide information which would force the person referred to in paragraph 1 to admit to his/her own participation or that of his/her close relatives in an infringement of an intellectual property right;

or

B23>32004L0048R(01)

(e) govern the protection of confidentiality of information sources or the processing of personal data.

Section 4

Provisional and precautionary measures

Article 9

Provisional and precautionary measures

1. Member States shall ensure that the judicial authorities may, at the request of the applicant:

- (a) issue against the alleged infringer an interlocutory injunction intended to prevent any imminent infringement of an intellectual property right, or to forbid, on a provisional basis and subject, where appropriate, to a recurring penalty payment where provided for by national law, the continuation of the alleged infringements of that right, or to make such continuation subject to the lodging of guarantees intended to ensure the compensation of the rightholder; an interlocutory injunction may also be issued, under the same conditions, against an intermediary whose services are being used by a third party to infringe an intellectual property right; injunctions against intermediaries whose services are used by a third party to infringe a copyright or a related right are covered by Directive 2001/29/EC;
- (b) order the seizure or delivery up of the goods suspected of infringing an intellectual property right so as to prevent their entry into or movement within the channels of commerce.

2. In the case of an infringement committed on a commercial scale, the Member States shall ensure that, if the injured party demonstrates circumstances likely to endanger the recovery of damages, the judicial authorities may order the precautionary seizure of the movable and immovable property of the alleged infringer, including the blocking of his/her bank accounts and other assets. To that end, the competent authorities may order the communication of bank, financial or commercial documents, or appropriate access to the relevant information.

3. The judicial authorities shall, in respect of the measures referred to in paragraphs 1 and 2, have the authority to require the applicant to provide any reasonably available evidence in order to satisfy themselves with a sufficient degree of certainty that the applicant is the rightholder and that the applicant's right is being infringed, or that such infringement is imminent.

4. Member States shall ensure that the provisional measures referred to in paragraphs 1 and 2 may, in appropriate cases, be taken without the defendant having been heard, in particular where any delay would cause irreparable harm to the rightholder. In that event, the parties shall be so informed without delay after the execution of the measures at the latest.

A review, including a right to be heard, shall take place upon request of the defendant with a view to deciding, within a reasonable time after notification of the measures, whether those measures shall be modified, revoked or confirmed.

5. Member States shall ensure that the provisional measures referred to in paragraphs 1 and 2 are revoked or otherwise cease to have effect, upon request of the defendant, if the applicant does not institute, within a reasonable period, proceedings leading to a decision on the merits of the case before the competent judicial authority, the period to be determined by the judicial authority ordering the measures where the law of a Member State so permits or, in the absence of such determination, within a period not exceeding 20 working days or 31 calendar days, whichever is the longer.

B24>32004L0048R(01)

6.The competent judicial authorities may make the provisional measures referred to in paragraphs 1 and 2 subject to the lodging by the applicant of adequate security or an equivalent assurance intended to ensure compensation for any prejudice suffered by the defendant as provided for in paragraph 7.

7.Where the provisional measures are revoked or where they lapse due to any act or omission by the applicant, or where it is subsequently found that there has been no infringement or threat of infringement of an intellectual property right, the judicial authorities shall have the authority to order the applicant, upon request of the defendant, to provide the defendant appropriate compensation for any injury caused by those measures.

Section 5

Measures resulting from a decision on the merits of the case

Article 10

Corrective measures

1.Without prejudice to any damages due to the rightholder by reason of the infringement, and without compensation of any sort, Member States shall ensure that the competent judicial authorities may order, at the request of the applicant, that appropriate measures be taken with regard to goods that they have found to be infringing an intellectual property right and, in appropriate cases, with regard to materials and implements principally used in the creation or manufacture of those goods. Such measures shall include:

- (a) recall from the channels of commerce;
 - (b) definitive removal from the channels of commerce;
- or
- (c) destruction.

2.The judicial authorities shall order that those measures be carried out at the expense of the infringer, unless particular reasons are invoked for not doing so.

3.In considering a request for corrective measures, the need for proportionality between the seriousness of the infringement and the remedies ordered as well as the interests of third parties shall be taken into account.

Article 11

Injunctions

Member States shall ensure that, where a judicial decision is taken finding an infringement of an intellectual property right, the judicial authorities may issue against the infringer an injunction aimed at prohibiting the continuation of the infringement. Where provided for by national law, non-compliance with an injunction shall, where appropriate, be subject to a recurring penalty payment, with a view to ensuring compliance. Member States shall also ensure that rightholders are in a position to apply for an injunction against intermediaries whose services are used by a third party to infringe an intellectual property right, without prejudice to Article 8(3) of Directive 2001/29/EC.

B25>32004L0048R(01)

Article 12

Alternative measures

Member States may provide that, in appropriate cases and at the request of the person liable to be subject to the measures provided for in this section, the competent judicial authorities may order pecuniary compensation to be paid to the injured party instead of applying the measures provided for in this section if that person acted unintentionally and without negligence, if execution of the measures in question would cause him/her disproportionate harm and if pecuniary compensation to the injured party appears reasonably satisfactory.

Section 6

Damages and legal costs

Article 13

Damages

1. Member States shall ensure that the competent judicial authorities, on application of the injured party, order the infringer who knowingly, or with reasonable grounds to know, engaged in an infringing activity, to pay the rightholder damages appropriate to the actual prejudice suffered by him/her as a result of the infringement.

When the judicial authorities set the damages:

- (a) they shall take into account all appropriate aspects, such as the negative economic consequences, including lost profits, which the injured party has suffered, any unfair profits made by the infringer and, in appropriate cases, elements other than economic factors, such as the moral prejudice caused to the rightholder by the infringement;

or

- (b) as an alternative to (a), they may, in appropriate cases, set the damages as a lump sum on the basis of elements such as at least the amount of royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question.

2. Where the infringer did not knowingly, or with reasonable grounds know, engage in infringing activity, Member States may lay down that the judicial authorities may order the recovery of profits or the payment of damages, which may be pre-established.

Article 14

Legal costs

Member States shall ensure that reasonable and proportionate legal costs and other expenses incurred by the successful party shall, as a general rule, be borne by the unsuccessful party, unless equity does not allow this.

Section 7

B26>32004L0048R(01)

Publicity measures

Article 15

Publication of judicial decisions

Member States shall ensure that, in legal proceedings instituted for infringement of an intellectual property right, the judicial authorities may order, at the request of the applicant and at the expense of the infringer, appropriate measures for the dissemination of the information concerning the decision, including displaying the decision and publishing it in full or in part. Member States may provide for other additional publicity measures which are appropriate to the particular circumstances, including prominent advertising.

CHAPTER III

SANCTIONS BY MEMBER STATES

Article 16

Sanctions by Member States

Without prejudice to the civil and administrative measures, procedures and remedies laid down by this Directive, Member States may apply other appropriate sanctions in cases where intellectual property rights have been infringed.

CHAPTER IV

CODES OF CONDUCT AND ADMINISTRATIVE COOPERATION

Article 17

Codes of conduct

Member States shall encourage:

- (a) the development by trade or professional associations or organisations of codes of conduct at Community level aimed at contributing towards the enforcement of the intellectual property rights, particularly by recommending the use on optical discs of a code enabling the identification of the origin of their manufacture;
- (b) the submission to the Commission of draft codes of conduct at national and Community level and of any evaluations of the application of these codes of conduct.

Article 18

Assessment

1. Three years after the date laid down in Article 20(1), each Member State shall submit to the Commission a report on the implementation of this Directive.

B27>32004L0048R(01)

On the basis of those reports, the Commission shall draw up a report on the application of this Directive, including an assessment of the effectiveness of the measures taken, as well as an evaluation of its impact on innovation and the development of the information society. That report shall then be transmitted to the European Parliament, the Council and the European Economic and Social Committee. It shall be accompanied, if necessary and in the light of developments in the Community legal order, by proposals for amendments to this Directive.

2. Member States shall provide the Commission with all the aid and assistance it may need when drawing up the report referred to in the second subparagraph of paragraph 1.

Article 19

Exchange of information and correspondents

For the purpose of promoting cooperation, including the exchange of information, among Member States and between Member States and the Commission, each Member State shall designate one or more national correspondents for any question relating to the implementation of the measures provided for by this Directive. It shall communicate the details of the national correspondent(s) to the other Member States and to the Commission.

CHAPTER V

FINAL PROVISIONS

Article 20

Implementation

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 29 April 2006. They shall forthwith inform the Commission thereof.

When Member States adopt these measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2. Member States shall communicate to the Commission the texts of the provisions of national law which they adopt in the field governed by this Directive.

Article 21

Entry into force

This Directive shall enter into force on the 20th day following that of its publication in the Official Journal of the European Union.

Article 22

Addressees

STATEMENT BY THE COMMISSION**concerning Article 2 of Directive 2004/48/EC of the European Parliament and of the Council on the enforcement of intellectual property rights**

(2005/295/EC)

Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights⁽¹⁾ states in Article 2(1) that the Directive applies to any infringement of intellectual property rights as provided for by Community law and/or by the national law of the Member State concerned.

The Commission considers that at least the following intellectual property rights are covered by the scope of the Directive:

- copyright,
- rights related to copyright,
- *sui generis* right of a database maker,
- rights of the creator of the topographies of a semiconductor product,
- trademark rights,
- design rights,
- patent rights, including rights derived from supplementary protection certificates,
- geographical indications,
- utility model rights,
- plant variety rights,
- trade names, in so far as these are protected as exclusive property rights in the national law concerned.

⁽¹⁾ OJ L 157, 30.4.2004, p. 45. Directive as corrected and republished in OJ L 195, 2.6.2004. p. 16.

Proposed Directive on enforcement of intellectual property rights: frequently asked questions

Reference: MEMO/03/20 Date: 30/01/2003

HTML: EN FR DE

PDF: EN FR DE

DOC: EN FR DE

MEMO/03/20

Brussels, 30th January 2003

Proposed Directive on enforcement of intellectual property rights: frequently asked questions

(see also IP/03/144)

What are the main objectives of the proposed Directive?

The proposed Directive seeks to create a **level playing field** for the enforcement of intellectual property rights in different EU countries, by bringing enforcement measures into line across the EU, especially in those countries where the enforcement of intellectual property rights is currently weakest.

The proposal also aims to establish a general framework for the exchange of information between the responsible national authorities.

The proposed Directive maintains a balance between helping holders of intellectual property defend their rights and protecting users from unfair litigation (so-called rights of **due process**).

What is the main content of the proposed Directive?

The proposed Directive covers infringements of all intellectual property rights (both copyright and industrial property, such as trademarks or designs) which under European law have been harmonised within the EU.

It concentrates on infringements carried out for commercial purposes or which cause significant harm to rightholders.

The proposed Directive is based on best practice in the Member States. The measures it would extend throughout the EU include, among others, injunctions to halt the sale of counterfeit or pirate goods, provisional measures such as precautionary seizures of suspected offenders' bank accounts, evidence-gathering powers for judicial authorities and powers to force offenders to pay damages to rightholders to compensate for lost income.

What is the difference between counterfeiting and piracy?

The TRIPS Agreement on enforcement of intellectual property rights, negotiated in the World Trade Organisation, contains the following definitions:

"Counterfeit trademark goods shall mean any goods, including packaging, bearing without authorisation a trademark which is identical to the trademark validly registered in respect of such goods, or which cannot be distinguished in its essential aspects from such a trademark and which thereby infringes the rights of the owner of the trademark in question under the law of the country of importation."

This can be interpreted as being something made in imitation of something else with the intent to deceive.

"Pirated copyright goods shall mean any goods which are copies made without the consent of the rightholder or person duly authorised by the rightholder in the country of production and which are made directly or indirectly from an article where the making of that copy would have constituted an infringement of a copyright or a related right under the law of the country of importation".

This can be interpreted as an illegal copy of something that already exists.

Why is the proposed Directive necessary given that most so-called counterfeiters and pirates are merely trying to cater for public demand for goods at affordable prices?

The proposed Directive deals with the **enforcement** of intellectual property rights and so it does not deal directly with the **substance** of IPRs (i.e. to what extent intellectual property is protected in law). That is already covered by an existing EU legal framework. (The measures concerned are listed in the annex to the proposed Directive).

However, it is obvious that a property right is not worth having if it is unenforceable. For example, there is little point being the legal owner of a car if there are no means available to stop people stealing it.

Intellectual property rights need to be protected and enforced within carefully defined limits, for reasons which vary according to the different types of intellectual property.

These reasons are, for the main rights concerned:

- for **patents**, the point is to protect the **inventive idea**. This allows the inventor to generate income from their invention which thus gives a powerful incentive for inventors to create new inventions. In addition, patents are published and so information about new technical developments can be disseminated to other people who can make use of them
- for **trade marks**, the point is to protect the **link between producer and product** e.g. the logo, packaging. This has two advantages, it allows consumers to identify the origin of the products they buy and hence choose the level of quality and safety they are prepared to pay for. Secondly, it gives a powerful incentive for rightholders to invest in their specific products and improve their quality and image.
- for **copyright**, the point is to protect the **expression** of a creative work such as a book, a piece of music, or a film. This allows the creator of the work and other rightholders, to market creative content. IP serves to make available such content on appropriate terms. It also stimulates future creation and ensures the availability of high quality content for others to enjoy. Put simply, if an artist could not participate actively in the marketing of his or her work and get a share of the financial benefits, they would in most cases not be able to create and invest in their creation. If an intermediary like a film or record company did not get paid, they would not be able to produce and distribute it. Many major works enjoyed by millions would never see the light of day.

Will the proposed Directive affect current definitions of "fair use" ?

No. The term "fair use" comes from American practice. However, all EU Member States have certain exceptions to the rights in place, including for private copying or library use, which would roughly correspond to the idea of fair use. The proposed Directive would not affect the scope of intellectual property law as established by existing EU and national law but only the enforcement of that law.

Will people still be able to lend CDs to a friend?

Yes. There is a framework of EU law in place which does not make private lending subject to copyright protection.

How would the proposed Directive affect copying of material in schools and libraries?

It would not (see also 'fair use' answer above).

Most Member States have exceptions in place in their national law regarding the copying of material in schools and libraries. In most cases therefore such use would be exempted from intellectual property rights and would not lead to an infringement in the first place.

Will this Directive mean that young people using file swapping software via their PCs will be held liable for IPR infringement?

The proposed Directive would **not** introduce tougher sanctions against individuals downloading the odd track for non-commercial purposes, though it would not stop Member State authorities from introducing and applying tougher laws.

The scope of this proposal covers infringements carried out for commercial purposes or which cause significant harm to the rightholder.

File swapping may be considered a copyright infringement depending on the national law in question.

This proposal only covers illegal acts, where authorisation has not been given by the rightholder or where the appropriate remuneration has not been paid for the use of that piece of intellectual property.

Exchanging illegal content over the internet is an illegal act, or an infringement of copyright if it relates to music files.

Although considerable injury to rightholders can be caused by an individual via his/her computer linked to the internet, it is not in the interest of rightholders to spend a lot of time and money in litigation to catch offenders who are simply sharing a few files with a handful of friends.

The proposed Directive aims to strike a fair balance between the interests of rightholders and legitimate users of intellectual property on the one hand and the wider opportunities the internet offers to consumers on the other, by focusing on commercial infringements or those which most damage rightholders' interests. It is *not* aimed at allowing the prosecution of large numbers of individuals using peer to peer (P2P) networks for casual file swapping.

For criminal sanctions to apply, the infringement must be 'serious'. An infringement is considered 'serious' if carried out intentionally and for commercial purposes.

Although the Directive also includes references to proportionality, i.e. for the punishment to fit the crime, it is up to national judges to decide on sentencing on a case by case basis.

Will this Directive mean that people buying a fake watch from a market stall will be held liable for IPR infringement ?

No. The act of buying is not subject to any intellectual property right.

How is this Directive compatible with TRIPS?

All EU Member States are bound by the rules of the TRIPS Agreement.

It is explicitly stated in the Directive that:

- none of its provisions in any way detracts from Member States' obligations under TRIPS;
- it does not set a limit on how far each Member State can go if it wants to go further than either TRIPS or indeed the provisions of the proposed Directive itself.

The proposed Directive goes further than TRIPS, particularly for those infringements which pose the greatest threats to rightholders, namely infringements of IPRs which are either committed for commercial reasons or which cause 'significant harm' to the rightholder.

These "TRIPS plus" elements are:

- a right of representation for collecting societies and trade associations

- a power for the authorities to seize documentary evidence relating to the suspected infringement (as well as the suspect goods themselves)
- an obligation for courts to provide information on the source of infringing goods ('right of information')
- "interlocutory injunctions" (in advance of a decision on the merits of a case) to prevent suspected offenders and also intermediaries from profiting from an infringement
- the seizure of offenders' bank accounts and other assets and profits to ensure payment of due damages
- the recall of infringing goods at the offender's own expense
- the choice for the rightholder of either lump sum damages (up to double normal royalties or licence fees) or compensation for lost profits
- payment of legal costs (and 'other expenses') by the offender where an infringement is established
- the publication of court decisions
- the winding up of companies found guilty of the most serious infringements
- the banning of machines used to produce counterfeit security features for goods covered by industrial property rights (e.g. trade marks).

In which Member States would this proposal make the biggest difference?

The proposed Directive would make a difference in all Member States. Apart from its specific provisions, the proposed Directive is also a **political signal** which will encourage national courts to apply sanctions and remedies more vigorously.

The more national laws within the EU are brought into line with one another, the more 'common ground' that is developed. These similarities will make it easier for cross-border litigation in the future.

The Directive is based on **existing best practice** and that is not the preserve of one single Member State. In addition, provisions in national law are often complex and fall within many different legislative acts, so the Commission is not in a position to give an authoritative overview of what currently applies where. The key point is that once this proposed Directive is implemented, there will be a single legal framework applicable across the EU.

But here are some examples of provisions of the proposed Directive and of Member States in which they already do or do not apply.

The notion of a **lump sum for damages** equivalent to double the licence fee (to cover for administrative expenses such as those caused by research and identification) exists in very few Member States, for example Greece, Ireland, Austria and the UK.

Compensation to the rightholder for loss of profits does not exist in, for example Netherlands, Spain or the UK.

A right for judicial authorities to require disclosure of information on origins of products and distribution networks is already available in for example Belgium, Germany, Denmark, Luxembourg, the Netherlands and the UK.

There is nothing at present in any national law to prevent **professional organisations from initiating court proceedings** on behalf of rightholders, but the proposed Directive will formalise the situation.

The right for the authorities to seize documentary evidence exists in a number of Member States such as Germany, Spain, France and Ireland

Freezing injunctions (blocking of bank accounts and assets) exist in very few EU countries, for example the UK.

What figures are available for the impact of counterfeiting and piracy on the EU economy?

It is by definition very difficult to produce exact figures, as counterfeit and pirated goods fall outside the mainstream economy. But **counterfeiting** is estimated by industry sources to reduce EU GDP by 8 billion euros annually, with individual companies losing a total of between 45 and 65 billion euros.

Annual losses in revenue are estimated at 7.2 % for perfume and toiletries, 5.8 % for pharmaceuticals and 11.5 % for the toy and sports sector. ⁽¹⁾

40% of software in use worldwide is believed to be **pirated**, and 37% in the EU (= loss of revenue of 2.9 billion euros annually). ⁽²⁾

Worldwide, **36% of all music CDs and cassettes** sold are **pirated** (total sales of pirated goods is 5 billion units).

How much has piracy and counterfeiting increased recently?

The industry estimates that software piracy has increased by 3% in 2001 in the EU and is now at 37% of software in use.

The number of optical disks (CDs, DVDs etc) and cassettes seized by EU customs officers rose from 9 million items in 2000 to nearly 40 million items in 2001. (Illegal copies of optical discs and cassettes account for 42% of all items seized).

Why such an increase?

Technology is available which allows large scale perfect copying of software and optical disks and cassettes at extremely low cost.

This represents a very advantageous cost benefit ratio for those looking to get the highest profit with the lowest investment, easy and wide distribution and low risk of detection and penalty.

What is the link between this proposal and the Commission's proposal for a Regulation to strengthen customs' powers to act against counterfeited and pirate goods, presented on 20 January?

Both pieces of legislation cover the enforcement of intellectual property rights. The proposed Regulation on customs powers applies to seizure of suspected infringing goods at the EU's **external** borders (see IP/03/75) whereas the proposed Directive covers goods and services circulating **within** the EU.

In order to coordinate the EU's internal and external policies to enforce IPRs the two proposals have been presented within a short time of each other.

However, the two proposals have to undergo separate adoption procedures due to the different legal bases in the EC Treaty.

How would EU copyright and industrial property rights enforcement under the proposed Directive compare with that in third countries, e.g. the US?

Under US law, sanctions and remedies apply to all infringements including those committed by private persons. It may be tougher on file sharing activities, depending on interpretation by the courts.

All signatories, including EU Member States are bound by the TRIPS Agreement. That agreement is implemented through various provisions in EU and national law.

This proposed Directive is fully compatible with TRIPS and also contains certain elements of added value (see question on TRIPS compatibility above).

Does the Directive cover technology used to gain access to electronic pay services such as satellite TV?

No. The proposed Directive covers the enforcement of intellectual property rights, including that associated with the content used by TV stations, but not the "lock and key" technical conditional access devices pay-TV companies use to protect access to their services.

That technology is covered, irrespective of the intellectual property background, by the Conditional Access Directive (98/84/EC) on the legal protection of conditional access services. The Commission is currently preparing a communication on the implementation of this Directive.

Will this Directive impede the development of the internet, by for example allowing injunctions to be served on service providers?

The proposed Directive would not impede the legitimate development of the Internet. On the contrary, by improving security for all stakeholders, including rightholders, it would encourage the use of the Internet as a genuinely creative medium, as opposed to a tool for piracy, which means in effect the theft from rightholders of not only the financial remuneration on which they depend but also the right to control the distribution of the work they have created.

It must be possible for rightholders to pursue infringements of intellectual property rights regardless of the means by which those rights

are infringed or the form of the infringing material. The proposed Directive aims to strike a fair balance between the interests of rightholders and legitimate users of intellectual property on the one hand and the wider opportunities the internet offers to all its users on the other, by focusing on commercial infringements or those which most damage rightholders' interests.

Where injunctions *are* served on service providers, the injunctions will be limited in scope to preventing infringing acts and not those which are perfectly legal (such as the exchange of non-protected material). Judges will be bound to observe the principle of proportionality i.e. the measures applied will be appropriate to the scale of the infringement and will not go further than is necessary to prevent the infringement in question.

In the case of Internet service providers (ISPs, who provide Internet access services rather than P2P networks *per se* e.g. Yahoo, AOL), it is already established practice in the EU that, once informed of the presence of illegal material, ISPs disconnect illegal web sites (such as those that disseminate child pornography, racist material etc). There is therefore no reason why the same principle cannot apply to IPR infringements.

It is Internet offenders who themselves undermine the profitability and hence development of Internet services providing legal dissemination of IPR-protected material. E-Commerce will only be successful if Internet traders are able to make a legitimate profit on their activities. Internet-based offenders therefore retard the development of business on the Internet.

How would the system of "interlocutory injunctions" in the proposal work?

The proposed Directive envisages the use of interlocutory injunctions (among other measures) by Member States' courts to order intermediaries such as Internet service providers - to desist from participating in infringements of intellectual property rights. This measure applies for infringements 'for commercial purposes or which cause significant harm to the rightholder'. This does not prejudice the provisions on injunctions in Article 8(3) of the Directive on Copyright and Related Rights in the Information Society (2001/29/EC), which is already in force.

Similar measures have been used against peer-to-peer (P2P) networks in the US, most notably Napster. There are now a number of law suits in preparation or litigation, notably by the RIAA (Recording Industry Association of America) in the US regarding similar services such as Kazaa BV, Audiogalaxy, MP3Board, StreamCast Networks, Grokster and Madster.

The proposed Directive would curtail those peer to peer networks which seriously damage rightholders. How do those networks function?

Peer to peer (P2P) networks work by setting up an infrastructure which allows individual users (people at home or in the office connected to the Internet) to locate other users who have files they are interested in and then to download these files from the other user's computer via the Internet. These are often copyright-protected music or video files.

Some file sharing services therefore encourage users to infringe copyright. That is illegal and should be stopped.

Napster maintained a central database of the location of individual computer files (although it did not store the infringing files itself). It was thus possible for the rightholders to demonstrate that Napster had knowledge of the material which was being infringed and for the courts to order Napster to delete references from the database to protected material. In the case of Kazaa *et al*, this is more difficult as the relevant databases are generally stored on user's individual computers (Kazaa merely distributes the software which makes this

possible).

The revenues of P2P networks, such as Napster and Kazaa, do not normally come from direct charges made on users for downloading files. Instead, their services are normally free but users have to pass through web sites which carry advertising.

P2P networks therefore make money in only an indirect way from the content they provide access to (much as free circulation newspapers). Nevertheless it is the file sharing services which attract the users in the first place and are thus essential to the business model.

Does this Directive overprotect intellectual property by taking on board the most repressive legislation found in EU Member States?

It is not right to say that the proposal simply takes on board the most 'repressive' legislation of each EU country. The Directive takes on board the best measures already adopted in various EU countries. Those are not always the most draconian and there are a number of measures currently available in certain EU countries which have not been included.

The proposed Directive seeks to create a **level playing field** for the enforcement of intellectual property rights in different EU countries. It is therefore an essential part of the Directive that enforcement measures are in general strengthened, especially in those countries where the enforcement of intellectual property rights is currently weakest.

However, the proposed Directive also maintains a balance between helping holders of intellectual property defend their rights and protecting users from unfair litigation (so-called rights of **due process**).

What safeguards does the Directive provide against unfair litigation and damage caused to innocent parties as a result ?

The proposal has a number of **safeguard clauses**:

- the proposal restates the general principles of intellectual property rights law, namely that procedures should be fair, not unnecessarily complicated, slow or costly and should not create barriers to 'legitimate trade'
- any penalties applied to offenders should be '**effective, proportionate and deterrent**' i.e. the penalty should fit the crime
- where the Directive allows for seizure of suspect goods for evidence, the company or person whose goods have been seized can ask for a review of the seizure. Furthermore, the judge can make the rightholder pay a refundable guarantee which will be forfeit if the case brought is unfounded
- where the Directive allows for a court to force someone involved in handling infringing goods to reveal who they bought the illegal goods from, this can only be done under certain conditions (e.g. where this would not incriminate the person giving the information, so-called right to avoid **self-incrimination**)
- where the Directive allows for 'interlocutory injunctions' (an injunction in advance of a decision on the merits of the case), the company or person who has been ordered to stop participating in the suspected infringement can ask for a review of the

injunction. Furthermore, the judge can make the rightholder pay a refundable guarantee which will be forfeit if the case brought is unfounded. In this case, the judge can also order the rightholder to compensate the suspected offender who is found innocent for any loss they have suffered as a result of the injunction

- where the Directive allows for various measures following a decision on the merits of a case (e.g. recall, destruction of goods or disposal outside commercial channels), this will not be applied where the offender has acted in **good faith** (i.e. neither intentionally nor through negligence) and can agree a fair settlement with the rightholder whose rights have been infringed
- legal costs are awarded also to the alleged offender, if they are found to be innocent

The full text of the proposed Directive is available at:

**Council Regulation (EC) No 3295/94
of 22 December 1994**

**laying down measures to prohibit the release for free circulation, export, re-export or entry for a
suspensive procedure of counterfeit and pirated goods**

COUNCIL REGULATION (EC) No 3295/94 of 22 December 1994 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 113 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

Whereas Council Regulation (EEC) No 3842/86 of 1 December 1986 laying down measures to prohibit the release for free circulation of counterfeit goods (4) has been in force since 1 January 1988; whereas conclusions should be drawn from the experience gained during the early years of its implementation with a view to improving the operation of the system it set up;

Whereas the marketing of counterfeit goods and pirated goods causes considerable injury to law-abiding manufacturers and traders and to holders of the copyright or neighbouring rights and misleads consumers; whereas such goods should as far as possible be prevented from being placed on the market and measures should be adopted to that end to deal effectively with this unlawful activity without impeding to freedom of legitimate trade; whereas this objective is also being pursued through efforts being made along the same lines at international level;

Whereas, in so far as counterfeit or pirated goods and similar products are imported from third countries, it is important to prohibit their release for free circulation in the Community or their entry for a suspensive procedure and to set up an appropriate procedure enabling the customs authorities to act to ensure that such a prohibition can be properly enforced;

Whereas action by the customs authorities to prohibit the release for free circulation of counterfeit or pirated goods or their entry for a suspensive procedure should also apply to the export or re-export of such goods from the Community;

Whereas, as regards suspensive procedures and re-export subject to notification, action by the customs authorities will take place only where suspected counterfeit or pirated goods are discovered during a check;

Whereas the Community takes into account the terms of the GATT agreement on trade-related intellectual property issues, including a trade in counterfeit goods, in particular the measures to be taken at the frontier;

Whereas provision should be made that the customs authorities are empowered to take decisions on applications for action to be taken that are submitted to them;

Whereas action by the customs authorities should consist either in suspending the release for free circulation, export or re-export of goods suspected of being counterfeit or pirated or in detaining such goods when they are entered for a suspensive procedure or re-exported subject to notification for as long as is necessary to enable it to be determined whether the goods are actually counterfeit or pirated;

Whereas it is appropriate to authorize the Member States to detain the goods in question for a

certain period even before an application by the right holder has been lodged or approved in order to allow him to lodge an application for action by the customs authorities;

Whereas the competent authority should decide cases submitted to it by reference to the criteria which are used to determine whether goods produced in the Member State concerned infringe intellectual property rights; whereas Member States' provisions on the competence of the judicial authorities and procedures are not affected by this Regulation;

Whereas it is necessary to determine the measures to be applied to the goods in question where it is established that they are counterfeit or pirated; whereas those measures should not only deprive those responsible for trading in such goods of the economic benefits of the transaction and penalize them but also constitute an effective deterrent to further transactions of the same kind;

Whereas in order to avoid serious disruption to the clearing of goods contained in travellers' personal luggage, it is necessary to exclude from the scope of this Regulation goods which may be counterfeit or pirated which are imported from third countries within the limits laid down by Community rules in respect of relief from customs duty;

Whereas uniform application of the common rules laid down by this Regulation must be ensured and to that end a Community procedure must be established enabling measures implementing these rules to be adopted within appropriate periods and mutual assistance between the Member States, of the one part, and between the Member States and the Commission, of the other part, to be strengthened so as to ensure greater effectiveness;

Whereas it will be appropriate to consider the possibility of increasing the number of intellectual property rights covered by this Regulation in the light, inter alia, of the experience gained in its implementation;

Whereas Regulation (EEC) No 3842/86 should therefore be repealed,

HAS ADOPTED THIS REGULATION:

CHAPTER I General

Article 1

1. This Regulation shall lay down:

(a) the conditions under which the customs authorities shall take action where goods suspected of being counterfeit or pirated are:

- entered for free circulation, export or re-export,

- found when checks are made on goods placed under a suspensive procedure within the meaning of Article 84 (1) (a) of Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code (5), or re-exported subject to notification; and

(b) the measures which shall be taken by the competent authorities with regard to those goods where it has been established that they are indeed counterfeit or pirated.

2. For the purposes of this Regulation:

(a) 'counterfeit goods' means:

- goods, including the packaging thereof, being without authorization a trade mark which is identical to the trade mark validly registered in respect of the same type of goods, or which cannot be distinguished

in its essential aspects from such trade mark, and which thereby infringes the rights of the holder of the trade mark in question under Community law or the law of the Member State in which the application for action by the customs authorities is made,

- any trade mark symbol (logo, label, sticker, brochure, instructions for use or guarantee document) whether presented separately or not, in the same circumstances as the goods referred to in the first indent,

- packaging materials bearing the trade marks of counterfeit goods, presented separately in the same circumstances as the goods referred to in the first indent;

- (b) 'pirated goods' means goods which are or embody copies made without the consent of the holder of the copyright or neighbouring rights, or of the holder of a design right, whether registered under national law or not, or of a person duly authorized by the holder in the country of production, where the making of those copies infringes the right in question under Community law or the law of the Member State in which the application for action by the customs authorities is made;
- (c) 'holder of a right' means the holder of a trade mark, as referred to in (a), and/or one of the rights referred to in (b), or any other person authorized to use the trade mark and/or rights, or their representative;
- (d) 'declaration for release for free circulation, for export or for re-export' means declarations made in accordance with Article 61 of Regulation (EEC) No 2913/92.

3. Any mould or matrix which is specifically designed or adapted for the manufacture of a counterfeit trade mark or of goods bearing such a trade mark or of pirated goods shall be treated as 'counterfeit or pirated goods', as appropriate, provided that the use of such moulds or matrices infringes the rights of the holder of a right under Community law or the law of the Member State in which the application for action by the customs authorities is made.

4. This Regulation shall not apply to goods which bear a trade mark with the consent of the holder of that trade mark or which are protected by a copyright or neighbouring right or a design right and which have been manufactured with the consent of the holder of the right but are placed in one of the situations referred to in paragraph 1 (a) without the latter's consent.

Nor shall it apply to goods referred to in the first subparagraph which have been manufactured or bear a trade mark under conditions other than those agreed with the holders of the rights in question.

CHAPTER II Prohibition of the release for free circulation, export, re-export or of the placing under a suspensive procedure of counterfeit goods and pirated goods

Article 2

The release for free circulation, export, re-export or placing under a suspensive procedure of goods found to be counterfeit or pirated on completion of the procedure provided for in Article 6 shall be prohibited.

CHAPTER III Application for action by the customs authorities

Article 3

1. In each Member State, the holder of a right may lodge an application in writing with the competent service of the customs authority for action by the customs authorities where the goods are placed in one of the situations referred to in

Article 1

(1) (a).

2. The application referred to in paragraph 1 shall include:

- a sufficiently detailed description of the goods to enable the customs authorities to recognize them,
- proof that the applicant is the holder of the right for the goods in question.

The holder of the right must also provide all other pertinent information available to him to enable the competent customs service to take a decision in full knowledge of the facts without, however, that information being a condition of admissibility of the application.

By way of indication, in the case of pirated goods, that information shall, wherever possible, include:

- the place where the goods are situated or the intended destination,
- particulars identifying the consignment or packages,
- the scheduled date of arrival or departure of the goods,
- the means of transport used,
- the identity of the importer, exporter or holder.

3. The application must specify the length of the period during which the customs authorities are requested to take action.

4. The applicant may be charged a fee to cover the administrative costs incurred in dealing with the application. The fee shall not be disproportionate to the service provided.

5. The competent customs service with which an application drawn up pursuant to paragraph 2 has been lodged shall deal with the application and shall forthwith notify the applicant in writing of its decision.

Where that service grants the application, the service shall specify the period during which the customs authorities shall take action. That period may, upon application by the holder of the right, be extended by the service which took the initial decision.

Any refusal to grant an application shall give the reasons for refusal and may form the subject of an appeal.

6. Member States may require the holder of a right, where his application has been granted, or where action as referred to in Article 1 (1) (a) has been taken pursuant to Article 6 (1), to provide a security:

- to cover any liability on his part vis-à-vis the persons involved in one of the operations referred to in Article 1 (1) (a) where the procedure initiated pursuant to Article 6 (1) is discontinued owing to an act or omission by the holder of the right or where the goods in question are subsequently found not to be counterfeit or pirated,

- to ensure payment of the costs incurred in accordance with this Regulation, in keeping the goods under customs control pursuant to Article 6.

7. The holder of the right shall be obliged to inform the service referred to in paragraph 1 should the right cease to be validly registered or should it expire.

8. Each Member State shall designate the service within the customs authority competent to receive and deal with the applications referred to in this Article.

Article 4

Where, in the course of checks made under one of the customs procedures referred to in Article 1 (1) (a) and before an application by the holder of the right has been lodged or approved, it appears evident to the customs office that goods are counterfeit or pirated, the customs authority may, in accordance with the rules in force in the Member States concerned, notify the holder of the right, where known, of a possible infringement thereof. The customs authority shall be authorized to suspend release of the goods or detain them for a period of three working days to enable the holder of the right to lodge an application for action in accordance with Article 3.

Article 5

The decision granting the application by the holder of the right shall be forwarded immediately to the customs offices of the Member State which are liable to be concerned with the goods alleged in the application to be counterfeit or pirated.

CHAPTER IV Conditions governing action by the customs authorities and by the authority competent to take a substantive decision

Article 6

1. Where a customs office to which the decision granting an application by the holder of a right has been forwarded pursuant to Article 5 is satisfied, after consulting the applicant where necessary, that goods placed in one of the situations referred to in Article 1 (1) (a) correspond to the description of the counterfeit or pirated goods contained in that decision, it shall suspend release of the goods or detain them.

The customs office shall immediately inform the service which dealt with the application in accordance with Article 3. That service or the customs office, shall forthwith inform the declarant and the person who applied for action to be taken. In accordance with national provisions on the protection of personal data, commercial and industrial secrecy and professional and administrative confidentiality, the customs office or the service which dealt with the application shall notify the holder of the right, at his request, of the name and address of the declarant and, if known, of those of the consignee so as to enable the holder of the right to ask the competent authorities to take a substantive decision. The customs office shall afford the applicant and the persons involved in any of the operations referred to in Article 1 (1) (a) the opportunity to inspect the goods whose release has been suspended or which have been detained.

When examining the goods the customs office may take samples in order to expedite the procedure.

2. The law in force in the Member State within the territory of which the goods are placed in one of the situations referred to in Article 1 (1) (a) shall apply as regards:

- (a) referral to the authority competent to take a substantive decision and immediate notification of the customs service or office referred to in paragraph 1 of that referral, unless referral is effected by that service or office;
- (b) reaching the decision to be taken by that authority. In the absence of Community rules in this regard, the criteria to be used in reaching that decision shall be the same as those used to determine whether goods produced in the Member State concerned infringe the rights of the holder. Reasons shall be given for decisions adopted by the competent authority.

Article 7

1. If, within 10 working days of notification of suspension of release or of detention, the customs office referred to in Article 6 (1) has not been informed that the matter has been referred to the authority competent to take a substantive decision on the case in accordance with Article 6 (2) or that the duly empowered authority has adopted interim measures, the goods shall be released, provided that all the customs formalities have been complied with and the detention order has been revoked.

This period may be extended by a maximum of 10 working days in appropriate cases.

2. In the case of goods suspected of infringing design rights, the owner, the importer or the consignee of the goods shall be able to have the goods in question released or their detention revoked against provision of a security, provided that:

- the customs service or office referred to in Article 6 (1) has been informed, within the time limit referred to in paragraph 1, that the matter has been referred to the authority competent to take a substantive decision referred to in said paragraph 1,
- on expiry of the time limit, the authority empowered for this purpose has not imposed interim measures, and
- all the customs formalities have been completed.

The security must be sufficient to protect the interests of the holder of the right. Payment of the security shall be without prejudice to the other remedies open to the holder of the right. Where the matter has been referred to the authority competent to take a substantive decision other than on the initiative of the holder of the right, the security shall be released if that person does not exercise his right to institute legal proceedings within 20 working days of the date on which he is notified of the suspension of release or detention. Where the second subparagraph of paragraph 1 applies, this period may be extended to a maximum of 30 working days.

3. The conditions governing storage of the goods during the period of suspension of release or detention shall be determined by each Member State.

CHAPTER V Provisions applicable to goods found to be counterfeit or pirated goods

Article 8

1. Without prejudice to the other rights of action open to the holder of a trade mark which is

found to have been counterfeited or the holder of a copyright or neighbouring right or of a design right which is found to have been pirated, Member States shall adopt the measures necessary to allow the competent authorities:

- (a) as a general rule, and in accordance with the relevant provisions of national law, to destroy goods found to be counterfeit or pirated, or dispose of them outside commercial channels in such a way as to preclude injury to the holder of the right, without compensation of any sort and at no cost to the exchequer;
- (b) to take, in respect of such goods, any other measures which effectively deprive the persons concerned of the economic benefits of the transaction.

The following in particular shall not be regarded as having such effect:

- re-exporting the counterfeit or pirated goods in the unaltered state,
- other than in exceptional cases, simply removing the trade marks which have been affixed to the counterfeit goods without authorization,
- placing the goods under a different customs procedure.

2. The counterfeit or pirated goods may be handed over to the exchequer. In that event, paragraph 1 (a) shall apply.

3. In addition to the information given pursuant to the second subparagraph of Article 6 (1) and under the conditions laid down therein, the customs office or the competent service shall inform the holder of the right, upon request, of the names and addresses of the consignor, of the importer or exporter and of the manufacturer of the goods found to be counterfeit or pirated and of the quantity of the goods in question.

CHAPTER VI Final provisions

Article 9

1. Save as provided by the law of the Member State in which the application is made, the acceptance of an application drawn up in accordance with Article 3 (2) shall not entitle the holder of a right to compensation where counterfeit or pirated goods are not detected by a customs office and are released or no action is taken to detain them in accordance with Article 6 (1).

2. Save as provided by the law of the Member State in which the application is made, exercise by a customs office or by another duly empowered authority of the powers conferred on them in regard to combating counterfeit or pirated goods shall not render them liable to the persons involved in the operations referred to in Article 1 (1) (a) or Article 4, in the event of their suffering loss or damage as a result of their action.

3. The civil liability of the holder of a right shall be governed by the law of the Member State in which the goods in question were placed in one of the situations referred to in Article 1 (1) (a).

Article 10

This Regulation shall not apply to goods of a non-commercial nature contained in travellers' personal

luggage within the limits laid down in respect of relief from customs duty.

Article 11

Moreover, each Member State shall introduce penalties to apply in the event of infringements of Article 2. Such penalties must be sufficiently severe to encourage compliance with the relevant provisions.

Article 12

The provisions necessary for the application of this Regulation shall be adopted in accordance with the procedure laid down in Article 13 (3) and (4).

Article 13

1. The Commission shall be assisted by the Committee set up under Article 247 of Regulation (EEC) No 2913/92.
2. The Committee shall examine any matter concerning implementation of this Regulation which its chairman may raise, either on his own initiative or at the request of the representative of a Member State.
3. The representative of the Commission shall submit to the Committee a draft of the measures to be taken. The Committee shall deliver its opinion on the draft within a time limit which the chairman may lay down according to the urgency of the measures to be taken. The opinion shall be delivered by the majority laid down in Article 148 (2) of the Treaty in the case of decisions which the Council is required to adopt on a proposal from the Commission. The votes of the representatives of the Member States within the Committee shall be weighted in the manner set out in that Article. The chairman shall not vote.
4. The Commission shall adopt measures which shall apply immediately. However, if the measures are not in accordance with the opinion of the Committee, they shall be communicated by the Commission to the Council forthwith. In the event:
 - the Commission shall defer application of the measures which it has decided for not more than three months from the date of their communication,
 - the Council, acting by a qualified majority, may take a different decision within the time limit provided for in the first indent.

Article 14

Member States shall communicate all relevant information on the application of this Regulation to the Commission.

The Commission shall communicate that information to the other Member States.

For the purpose of the application of this Regulation, the provisions of Regulation (EEC) No 1468/81 of 19 May 1981 on mutual assistance between the administrative authorities of the Member States and cooperation between the latter and the Commission to ensure the correct application of the law on customs or agricultural matters (6) shall apply *mutatis mutandis*.

The details of the information procedure shall be drawn up in the framework of the implementing provisions in accordance with Article 13 (2), (3) and (4).

Article 15

Within two years of the entry into force of this Regulation, the Commission shall, on the basis of the information referred to in Article 14, report to the European Parliament and the Council on the operation of the system particularly with regard to the economic and social consequences of counterfeiting and shall propose any amendments or additions required, within a period of two years from the implementation of this Regulation.

Article 16

Regulation (EEC) No 3842/86 shall be repealed as from the date of implementation of this Regulation.

Article 17

This Regulation shall enter into force on the third day following its publication in the Official Journal of the European Communities.

It shall apply from 1 July 1995.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 22 December 1994.

**Commission Regulation (EC) No 1367/95
of 16 June 1995**

**laying down provisions for the implementation of Council Regulation (EC) No 3295/94 laying down
measures to prohibit the release for free circulation, export, re-export or entry for a suspensive
procedure of counterfeit and pirated goods**

COMMISSION REGULATION (EC) No 1367/95 of 16 June 1995 laying down provisions for the implementation of Council Regulation (EC) No 3295/94 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 3295/94 of 22 December 1994 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods, and in particular Articles 12, 13 and 14 thereof (1),

Whereas Regulation (EC) No 3295/94 introduced common rules with a view to prohibiting the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods and dealing effectively with the illegal marketing of such goods without impeding the freedom of legitimate trade;

Whereas the nature of the proof of ownership of intellectual property required by the second indent of the first subparagraph of Article 3 (2) of Regulation (EC) No 3295/94 should be established;

Whereas Article 14 of Regulation (EC) No 3295/94 provides that Member States are to communicate to the Commission all relevant information for applying that Regulation and that the Commission is to communicate that information to the other Member States; whereas the procedure for exchanging that information should be laid down;

Whereas Commission Regulation (EEC) No 3077/87 (2) should be repealed;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Customs Code Committee,

HAS ADOPTED THIS REGULATION:

Article 1

For the purposes of Article 1 (2) (c) of Regulation (EC) No 3295/94, hereinafter referred to as 'the basic Regulation' the holder of a right or any other person authorized to use the right may be represented by a natural or legal person; such a person includes a collecting society which has as its sole or principal purpose the management or administration of copyrights or neighbouring rights.

Article 2

The proof that the applicant holds one of the rights referred to in points (a) and (b) of Article 1 (2) of the basic Regulation, which must be submitted when applying for action in accordance with the second indent of the first subparagraph of Article 3 (2) of that Regulation, shall be as follows:

- (a) where the holder of the right applies himself:
- in the case of a right that is registered or for which an application has been lodged (trademark or design right): proof of registration with the relevant office or lodging of the application,
 - in the case of a copyright, neighbouring rights or design right that is unregistered or for which an application has not been lodged: any proof of authorship or of his status as original holder;
- (b) where the application is made by any other person authorized to use one of the rights referred to in points (a) and (b) of Article 1 (2) of the basic Regulation in addition to the proof required under (a) hereof: the document by virtue of which the person is authorized to use the right in question;
- (c) where a representative of the holder or of any other person authorized to use one of the rights referred to in points (a) and (b) of Article 1 (2) of the basic Regulation applies: in addition to the proof required under (a) and (b) hereof, proof of authorization to act.

Article 3

The pertinent information referred to in the second subparagraph of Article 3 (2) of the basic Regulation shall include particulars of the goods, notably their value and their packaging, plus any information that could help distinguish them from goods for which there is a protected right. Under the terms of the second subparagraph of Article 3 (2), this information should be as detailed as possible to enable the customs authorities, using risk analysis, to identify suspect consignments accurately and without excessive effort.

Article 4

If an application is lodged in accordance with Article 4 of the basic Regulation before expiry of the time-limit of three days, the time-limits referred to in Article 7 of the Regulation shall be counted from the day of receipt of the request for action.

If the customs authority suspends release of the goods or detains them in accordance with Article 4 of the basic Regulation, it shall forthwith inform the declarant.

Article 5

1. Each Member State shall, at the earliest opportunity, send the Commission details of:
 - (a) the laws, regulations or administrative provisions which it adopts in implementation of this Regulation. It shall likewise inform the Commission of any provisions of its national law which preclude informing the holder as provided for in the second subparagraph of Article 6 (1) and in Article 8 (3) of the basic Regulation;
 - (b) the competent customs department responsible for receiving and handling the holder's written application, referred to in Article 3 (8) of the basic Regulation.
2. To enable the Commission to monitor the effective application of the procedure laid down by

the basic Regulation and draw up, in due course, the report referred to in Article 15 thereof, each Member State shall send the Commission:

- (a) at the end of each calendar year, a list of all the written applications under Article 3 (1) of the basic Regulation, together with the name and address of the holder, a brief description of the goods and, where relevant, the trademark, and the action taken in response to the application;
- (b) at the end of each quarter, a list of specific cases in which goods have been detained or their release suspended. The information provided on each case must include:
 - the name and address of the holder of the right and a brief description of the goods and, where relevant, the trademark, and
 - the customs situation, country of consignment or destination, description, quantity and declared value of the goods the release of which has been suspended or which have been detained, and the date of such suspension or detention.

3. The Commission shall, in an appropriate manner, communicate to all Member States such information as it receives pursuant to this Article. Details of cases provided for in point (b) of paragraph 2 shall be sent quarterly to the Member States by the Commission.

4. Details communicated pursuant to paragraphs 1, 2 and 3 may be used only for the purposes established by the basic Regulation.

Article 6

Regulation (EEC) No 3077/87 is hereby repealed with effect from 1 July 1995.

Article 7

This Regulation shall enter into force on the third day following its publication in the Official Journal of the European Communities.

It shall apply from 1 July 1995.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 16 June 1995.

**Council Regulation (EC) No 241/1999
of 25 January 1999**

amending Regulation (EC) No 3295/94 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods

COUNCIL REGULATION (EC) No 241/1999 of 25 January 1999 amending Regulation (EC) No 3295/94 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 113 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

- (1) Whereas, pursuant to Article 15 of Regulation (EC) No 3295/94 (4), conclusions should be drawn from the experience gained during the early years of its implementation with a view to improving the operation of the system it set up;
- (2) Whereas the marketing of goods infringing patents or supplementary protection certificates for medicinal products as provided for in Council Regulation (EEC) No 1768/92 of 18 June 1992 concerning the creation of a supplementary protection certificate for medicinal products (5) or supplementary protection certificates for plant protection products, as provided for in Regulation (EC) No 1610/96 of the European Parliament and of the Council of 23 July 1996 concerning the creation of a supplementary protection certificate for plant protection products (6) causes serious injury to their holders and constitutes an unfair and unlawful business activity; whereas such goods should as far as possible be prevented from being placed on the market and measures should be adopted to that end to deal effectively with this unlawful activity without impeding the freedom of legitimate trade; whereas this objective is also being pursued through efforts being made along the same lines at international level;
- (3) Whereas, in order to guarantee the integrity of the Community's external frontier, the customs authorities should be permitted to take action against goods infringing certain intellectual property rights and associated goods whatever their customs status; whereas the release for free circulation in the Community, entry for a suspensive procedure, re-export or placing in a free zone or free warehouse of such goods should therefore be prohibited; whereas moreover the customs authorities should be authorised to take action as soon as the said goods are brought into the Community;
- (4) Whereas, as regards suspensive procedures, free zones and free warehouses, re-export subject to notification and temporary storage, the customs authorities will act only where goods suspected to be goods infringing certain intellectual property rights are discovered during a check;
- (5) Whereas Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trademark (7) has established a system whereby right holders can, by means of a single procedure, obtain Community trade marks enjoying uniform protection and producing their effects throughout the Community;
- (6) Whereas to enhance the Community dimension of the said trade mark the administrative procedure for obtaining customs protection should be simplified;
- (7) Whereas the holders of such trade marks should have access to a system whereby the granting of a single application for action by the competent authority in one Member State can bind one

or more other Member States as well; whereas developments in the area of electronic data interchange in administrative procedures must be taken into consideration, in particular as far as the transmission of decisions and information is concerned;

- (8) Whereas a single period of validity should be set in the interests of the uniform application of such decisions in the Member States concerned,

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 3295/94 is hereby amended as follows:

1. the title shall be replaced by the following:

'Council Regulation (EC) No 3295/94 of 22 December 1994 laying down measures concerning the entry into the Community and the export and re-export from the Community of goods infringing certain intellectual property rights`;

2. Article 1 shall be replaced by the following:

'Article 1

1. This Regulation lays down:

- (a) the conditions under which the customs authorities shall take action where goods suspected of being goods referred to in paragraph 2(a) are:

- entered for free circulation, export or re-export, in accordance with Article 61 of Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code (*),
- found in the course of checks on goods under customs supervision within the meaning of Article 37 of Council Regulation (EEC) No 2913/92, placed under a suspensive procedure within the meaning of Article 84(1)(a) of that Regulation, re-exported subject to notification or placed in a free zone or free warehouse within the meaning of Article 166 thereof;

and

- (b) the measures which shall be taken by the competent authorities with regard to those goods where it has been established that they are indeed goods referred to in paragraph 2(a).

2. For the purposes of this Regulation:

- (a) "goods infringing an intellectual property right" means

- "counterfeit goods", namely:
 - goods, including the packaging thereof, bearing without authorisation a trade mark which is identical to the trade mark validly registered in respect of the same type of goods, or which cannot be distinguished in its essential aspects from such trade mark, and which thereby infringes the rights of the holder of the trade mark in question under Community law or the law of the Member State where the application for action by the customs authorities is made,
 - any trade mark symbol (logo, label, sticker, brochure, instructions for use, guarantee document) whether presented separately or not, in the same circumstances as the goods referred to in the

first indent,

- packaging materials bearing the trade marks of counterfeit goods, presented separately in the same circumstances as the goods referred to in the first indent;
 - "pirated goods", namely: goods which are or embody copies made without the consent of the holder of the copyright or neighbouring rights, or of the holder of a design right, whether registered under national law or not, or of a person duly authorised by the holder in the country of production, where the making of those copies infringes the right in question under Community law or the law of the Member State in which the application for action by the customs authorities is made;
 - goods infringing, in the Member State in which the application for action by the customs authorities is made, a patent under the law of that Member State or a supplementary protection certificate as provided for by Council Regulation (EEC) No 1768/92 (***) or Regulation (EC) No 1610/96 of the European Parliament and of the Council (****);
- (b) "holder of a right" means the holder of a trade mark, a patent or a certificate and/or one of the rights referred to in (a), or any other person authorised to use that trademark, patent, certificate and/or right, or a representative thereof;
- (c) "Community trademark" means the trademark defined in Article 1 of Council Regulation (EC) No 40/94 (****);
- (d) "certificate" means the supplementary protection certificate provided for by Regulation (EEC) No 1768/92 or by Regulation (EC) No 1610/96.

3. Any mould or matrix which is specifically designed or adapted for the manufacture of a counterfeit trade mark or of goods bearing such a trade mark, for the manufacture of goods infringing a patent or a certificate or for the manufacture of pirated goods shall be treated as goods referred to in paragraph 2(a), provided that the use of such moulds or matrices infringes the rights of the holder of the right in question under Community law or the law of the Member State in which the application for action by the customs authorities is made.

4. This Regulation shall not apply to goods which bear a trade mark with the consent of the holder of that trade mark or which are protected by a patent or a certificate, by a copyright or neighbouring right or by a design right and which have been manufactured with the consent of the holder of the right but are placed in one of the situations referred to in paragraph 1(a) without the latter's consent.

It shall similarly not apply to goods referred to in the first subparagraph which have been manufactured or bear a trade mark under conditions other than those agreed with the holder of the rights in question.

(*) OJ L 302, 19. 10. 1992, p. 1.

(**) OJ L 182, 2. 7. 1992, p. 1.

(***) OJ L 198, 8. 8. 1996, p. 30.

(****) OJ L 11, 4. 1. 1994, p. 1.`;

3. the title of Chapter II shall be replaced by the following:

'Prohibition of the entry, release for free circulation, export, re-export, placing under a suspensive procedure, or placing in a free zone or free warehouse, of goods infringing certain intellectual property rights`;

4. Article 2 shall be replaced by the following:

'Article 2

The entry into the Community, release for free circulation, export, re-export, placing under a suspensive procedure or placing in a free zone or free warehouse of goods found to be goods referred to in Article 1(2)(a) on completion of the procedure provided for in Article 6 shall be prohibited.`;

5. Article 3 shall be amended as follows:

(a) the following two subparagraphs shall be added to paragraph 1:

'Where the applicant holds a Community trade mark, the application may seek action not only by the customs authorities of the Member State in which the application is lodged but by the customs authorities of one or more other Member States as well.

Where electronic data interchange systems exist, Member States may provide that the application for customs action can be made by using a data processing technique.`;

(b) the third subparagraph of paragraph 2 shall be replaced by the following:

'By way of indication, in the case of pirated goods or of goods infringing patents or certificates, that information shall, wherever possible, include:``;

(c) paragraphs 3 and 4 shall be replaced by the following:

'3. Save where the second subparagraph of paragraph 1 is applied, the application must specify the length of the period during which the customs authorities are requested to take action.

Applications under the second subparagraph of paragraph 1 shall indicate the Member State or States in which the customs authorities are requested to take action.

4. The applicant may be charged a fee to cover the administrative costs incurred in dealing with the application.

The applicant or his representative may also be charged a fee in each of the Member States where the decision granting the application is effective, to cover the costs incurred in implementing the said decision.

Such fees shall not be disproportionate to the service provided.`;

(d) the following third subparagraph shall be inserted in paragraph 5:

'Where an application is submitted under the second subparagraph of paragraph 1 the said period shall be set at one year, but may be extended for a further year, at the right-holder's request, by the service which took the original decision`;

(e) in the first indent of paragraph 6, the words 'counterfeit or pirated goods` shall be replaced by the words 'goods referred to in Article 1(2)(a)`;

(f) the following text shall be added as the last subparagraph of paragraph 6:

'Where an application is submitted under the second subparagraph of paragraph 1, the security shall be provided in each of the Member States in which it is required and the decision granting the application is effective.`;

(g) paragraph 7 shall be amended as follows:

'7. The holder of the right is required to inform the service referred to in paragraph 1 and, where appropriate, the service or services referred to in the second subparagraph of Article 5(2), if

his right should happen no longer to be validly registered or to have expired.`;

(h) the following paragraph 9 shall be added:

'9. Paragraphs 1 to 8 shall apply mutatis mutandis to the extension of the decision on the original application.`;

6. in Article 4, the words 'counterfeit or pirated goods` shall be replaced by the words 'goods referred to in Article 1(2)(a)`;

7. Article 5 shall be replaced by the following:

'Article 5

1. The decision granting the application by the holder of the right shall be forwarded immediately to the customs offices of the Member State which are liable to be concerned with the goods alleged in the application to be goods referred to in Article 1(2)(a).

2. Where an application is submitted under the second subparagraph of Article 3(1), the first indent of Article 250 of Regulation (EEC) No 2913/92 shall apply mutatis mutandis to the decision granting the said application and the decisions extending or repealing it.

When the decision granting the said application has been taken, it shall be up to the applicant to forward that decision together, where appropriate, with any other useful information and any translations to the customs-authority service referred to in the first subparagraph of Article 3(1) in the Member State or States where the applicant has requested that action be taken. However, with the agreement of the applicant, the information and translations may be forwarded directly by the customs-authority service which took the decision. The applicant shall provide additional information as deemed necessary for the execution of the decision, at the request of the customs authorities of the other Member States concerned.

The period referred to in the third subparagraph of Article 3(5) shall run from the date on which the decision granting the application was taken. The said decision shall not enter into force in the Member State or States to which it is addressed until the submission referred to in the second subparagraph has been made and, where appropriate, until the fee referred to in the second subparagraph of Article 3(4) has been paid and the security referred to in Article 3(6) has been provided. However, the period of validity of the said decision may not, in any circumstances, exceed the period of one year from the date of adoption of the decision granting the original application.

The said decision shall then be forwarded immediately to the national customs offices liable to be concerned with the alleged counterfeit goods to which it relates.

This paragraph shall apply mutatis mutandis to any decision to extend the original decision.`;

8. in the first subparagraph of Article 6(1), the words 'counterfeit or pirated goods` shall be replaced by the words 'goods referred to in Article 1(2)(a)`;

9. Article 7(2) shall be replaced by the following:

'2. In the case of goods suspected of infringing patents, certificates or design rights, the owner, importer or consignee of the goods shall be able to have the goods in question released or their detention revoked against provision of a security, provided that:

(a) the customs service or office referred to in Article 6(1) has been informed, within the time limit referred to in paragraph 1 of this Article, that the matter has been referred to the authority

competent to take a substantive decision referred to in the aforesaid paragraph 1;

- (b) on expiry of the time limit, the authority empowered for this purpose has not imposed interim measures; and
- (c) all the customs formalities have been completed.

The security must be sufficient to protect the interests of the holder of the right. Provision of the security shall be without prejudice to the other remedies open to the holder of the right. Where the matter has been referred to the authority competent to take a substantive decision other than on the initiative of the holder of the patent, certificate or design right, the security shall be released if that person does not exercise his right to institute legal proceedings within 20 working days of the date on which he is notified of the suspension of release or detention. Where the second subparagraph of paragraph 1 applies, this period may be extended to a maximum of 30 working days.;

10. the title of Chapter V shall be replaced by the following:

'Provisions applicable to goods found to be goods infringing an intellectual property right';

11. Article 8 shall be replaced by the following:

'Article 8

1. Without prejudice to the other forms of legal recourse open to the right-holder, Member States shall adopt the measures necessary to allow the competent authorities:

- (a) as a general rule, and in accordance with the relevant provisions of national law, to destroy goods found to be goods referred to in Article 1(2)(a), or dispose of them outside the channels of commerce in such a way as to preclude injury to the holder of the right, without compensation of any sort and without cost to the Exchequer;
- (b) to take, in respect of such goods, any other measures having the effect of effectively depriving the persons concerned of the economic benefits of the transaction.

Save in exceptional cases, simply removing the trademarks which have been affixed to the counterfeit goods without authorisation shall not be regarded as having such effect.

2. The goods referred to in Article 1(2)(a) may be handed over to the Exchequer. In that case, paragraph 1(a) shall apply.

3. In addition to the information given pursuant to the second subparagraph of Article 6(1) and under the conditions laid down therein, the customs office or the competent service shall inform the holder of the right, upon request, of the names and addresses of the consignor, of the importer or exporter and of the manufacturer of the goods found to be goods referred to in Article 1(2)(a) and of the quantity of the goods in question.;

12. in Article 9, paragraphs 1 and 2 shall be replaced by the following:

'1. Save as provided by the law of the Member State in which an application in accordance with Article 3(2) is lodged or, in the case of an application under the second subparagraph of Article 3(1), by the law of the Member State in which goods referred to in Article 1(2)(a) escape detection by a customs office, the acceptance of an application shall not entitle the holder of a right to compensation where such goods are not detected by a customs office and are released or no action is taken to detain them in accordance with Article 6(1).

2. Save as provided by the law of the Member State in which the application is made or, in the case of an application under the second subparagraph of Article 3(1), by the law of the Member State in which loss or damage is incurred, exercise by a customs office or by another duly empowered authority of the powers conferred on them in regard to taking measures against goods referred to in Article 1(2)(a) shall not render them liable towards the persons involved in the operations referred to in Article 1(1)(a) or Article 4, in the event of their suffering loss or damage as a result of their action.`;

13. in Article 11, the second sentence shall be replaced by the following:

'Such penalties shall be effective and proportionate and constitute an effective deterrent.`

Article 2

This Regulation shall enter into force on the day following its publication in the Official Journal of the European Communities.

This Regulation shall enter into force on 1 July 1999.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 25 January 1999.

For the Council

The President

J. FISCHER

**Commission Regulation (EC) No 2549/1999
of 2 December 1999**

amending Regulation (EC) No 1367/95 laying down provisions for the implementation of Council Regulation (EC) No 3295/94 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods

COMMISSION REGULATION (EC) No 2549/1999

of 2 December 1999

amending Regulation (EC) No 1367/95 laying down provisions for the implementation of Council Regulation (EC) No 3295/94 laying down measures to prohibit the release for free circulation, export, re-export or entry for a suspensive procedure of counterfeit and pirated goods

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 3295/94 of 22 December 1994 laying down measures concerning the entry into the Community and the export and re-export from the Community of goods infringing certain intellectual property rights(1), as amended by Regulation (EC) No 241/1999(2),

Whereas:

- (1) In order to ensure a uniform form for applications for action related to a Community trade mark as defined in Council Regulation (EC) No 40/94 of 20 December 1993 on the Community trade mark(3), as amended by Regulation (EC) No 3288/94(4), it is necessary to determine the conditions of establishment, issue and use, required in order for the form to be easily recognised and used throughout the Community. It is appropriate for this purpose to establish the model to which that form must conform.
- (2) The form should be drawn up in one of the official languages of the Community.
- (3) Commission Regulation (EC) No 1367/95(5) should be amended accordingly.
- (4) The measures provided for in this Regulation are in accordance with the opinion of the Customs Code Committee established by Article 247 of Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code(6), as last amended by Regulation (EC) No 955/1999 of the European Parliament and of the Council(7),

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 1367/95 is amended as follows:

1. The title is replaced by the following:

"Commission Regulation (EC) No 1367/95 of 16 June 1995 laying down provisions for the implementation of Council Regulation (EC) No 3295/94 laying down measures concerning the entry into the Community and the export and re-export from the Community of goods infringing certain intellectual property rights."

2. In Article 1, "For the purposes of Article 1(2)(c) of Regulation (EC) No 3295/94" is replaced by "For the purposes of Article 1(2)(b) of Regulation (EC) No 3295/94".

3. Article 2 is replaced by the following:

"Article 2

The evidence that the applicant holds an intellectual property right referred to in Article 1(2)(a) of the basic Regulation, which must be submitted when applying for action in accordance with the second indent of the first subparagraph of Article 3(2) of that Regulation, shall be as follows:

- (a) where the holder of the right makes himself the application:
- in the case of a right that is registered or for which an application has been lodged, proof of registration with the relevant office or lodging of the application,
 - in the case of a copyright, neighbouring right or design right which is not registered or for which an application has not been lodged, any evidence of authorship or of his status as original holder;
- (b) where the application is made by any other person authorised to use one of the rights referred to in Article 1(2)(a) of the basic Regulation, in addition to the proof required under point (a) of this Article, the document by virtue of which the person is authorised to use the right in question;
- (c) where a representative of the holder or of any other person authorised to use one of the rights referred to in Article 1(2)(a) of the basic Regulation applies, in addition to the proof required under points (a) and (b) of this Article, proof of authorisation to act."

4. The following Article 2a is inserted:

"Article 2a

1. The form on which the application for action referred to in Article 3(1), second subparagraph, of the basic Regulation, as well as the Decision granting the application referred to in Article 3(5) of the basic Regulation, shall conform to the specimen shown in the Annex to this Regulation.

Where additional pages are to be used, as referred to in the second subparagraph of paragraph 8, they shall be considered to be an integral part of the form.

The form shall be used in accordance with the provisions of the basic Regulation and of this implementing Regulation.

2. (a) the form shall be printed on white paper, without mechanical pulp, dressed for writing purposes and weighing not less than 55 g/m²;

(b) the forms shall measure 210 millimetres x 297 millimetres, with a maximum tolerance as to length of 5 mm less and 8 mm more.

3. Without prejudice to the implementation of the provisions set out in Article 3(1), third subparagraph, of the basic Regulation, Member States shall print or have printed forms which bear an indication of the name and address of the printer or a sign allowing its identification.

4. Forms shall be printed and filled out in an official language of the Community designated by the competent authorities of the Member State in which the application for action is submitted.

5. Except in the case where the form is made available to the applicant in an electronic format, at one or more publicly available sites directly accessible via a computer, the application for action form shall be provided, on request, by the appropriate service of the customs authority referred to in Article 3(1) of the basic Regulation.

6. Forms shall be filled in by mechanical means or legibly by hand; in the latter case, they shall be filled in using ink and in block capitals. Whatever the process used, forms shall not contain erasures, overwritten words or other alterations.

Should the form be completed by computer, it may subsequently be reproduced by private printing methods.

7. The form shall be composed of two copies:

- one copy, marked number 1, for the Member State to which the application for action is submitted, and
- one copy, marked number 2, for the holder of the Community trade mark.

8. The applicant shall complete boxes 1 to 9 of the form, sign both copies and attach to it the justification and other relevant information referred to in Article 3(2) of the basic Regulation.

Should the space in box 4 of the form be insufficient, the applicant may provide, on additional pages, further details to assist in the identification of the goods. In this case, the applicant shall indicate the number of additional pages used in the space provided in box 4 of the form.

9. The duly completed and signed form, accompanied by a number of extracts corresponding to the number of Member States indicated in box 8 of the form, as well as the evidence and information referred to in paragraph 8, shall be submitted to the appropriate service of the customs authority referred to in Article 3(1) of the basic Regulation.

10. When the appropriate service of the customs authority referred to in Article 3(1) of the basic Regulation approves an application for action, it shall indicate the final date of validity of the decision and affix its signature and stamp. The copy for the holder of the Community trade mark as well as the validated extracts shall then be returned to the applicant.

When the request for assistance is rejected by the appropriate service of the customs authority referred to in Article 3(1) of the basic Regulation, it shall indicate not only the reasons for the refusal, but also the contact details of the authority to which an appeal can be made and shall affix its stamp and signature. The copy for the holder of the Community trade mark shall then be returned to the interested party.

In all cases, the copy of the form for the Member State in which the application for action is submitted shall be retained and preserved in its files for at least two years from the date of issue.

11. Only in cases where the extract of a decision granting the application is addressed to the Member State(s) where the applicant has requested that action be taken in accordance with Article 5(2), second subparagraph, second sentence, the Member State which receives this extract shall complete without delay the part 'acknowledgement of receipt' of the form by indicating the date of receipt, and return a photocopy of this extract to the relevant authority indicated in box 3."

5. In Article 5, the following paragraph 5 shall be added:

"5. The Commission shall publish in the 'C' series of the Official Journal of the European Communities the list of the services within the customs authority which are referred to in Article 3(8) of the basic Regulation."

6. The text in the Annex to this Regulation is added as an Annex.

Article 2

This Regulation shall enter into force on the seventh day following that of its publication in the Official Journal of the European Communities.

It shall apply as from 1 July 1999.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 2 December 1999.

**Commission Regulation (EC) No 772/2004
of 27 April 2004
on the application of Article 81(3) of the Treaty to categories of technology transfer agreements
(Text with EEA relevance)**

Commission Regulation (EC) No 772/2004

of 27 April 2004

on the application of Article 81(3) of the Treaty to categories of technology transfer agreements

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation No 19/65/EEC of 2 March 1965 on application of Article 85(3) of the Treaty to certain categories of agreements and concerted practices(1), and in particular Article 1 thereof,

Having published a draft of this Regulation(2),

After consulting the Advisory Committee on Restrictive Practices and Dominant Positions,

Whereas:

- (1) Regulation No 19/65/EEC empowers the Commission to apply Article 81(3) of the Treaty by Regulation to certain categories of technology transfer agreements and corresponding concerted practices to which only two undertakings are party which fall within Article 81(1).
- (2) Pursuant to Regulation No 19/65/EEC, the Commission has, in particular, adopted Regulation (EC) No 240/96 of 31 January 1996 on the application of Article 85(3) of the Treaty to certain categories of technology transfer agreements(3).
- (3) On 20 December 2001 the Commission published an evaluation report on the transfer of technology [block exemption](#) Regulation (EC) No 240/96(4). This generated a public debate on the application of Regulation (EC) No 240/96 and on the application in general of Article 81(1) and (3) of the Treaty to technology transfer agreements. The response to the evaluation report from Member States and third parties has been generally in favour of reform of Community competition policy on technology transfer agreements. It is therefore appropriate to repeal Regulation (EC) No 240/96.
- (4) This Regulation should meet the two requirements of ensuring effective competition and providing adequate legal security for undertakings. The pursuit of these objectives should take account of the need to simplify the regulatory framework and its application. It is appropriate to move away from the approach of listing exempted clauses and to place greater emphasis on defining the categories of agreements which are exempted up to a certain level of market power and on specifying the restrictions or clauses which are not to be contained in such agreements. This is consistent with an economics-based approach which assesses the impact of agreements on the relevant market. It is also consistent with such an approach to make a distinction between agreements between competitors and agreements between non-competitors.
- (5) Technology transfer agreements concern the licensing of technology. Such agreements will usually improve economic efficiency and be pro-competitive as they can reduce duplication of research and development, strengthen the incentive for the initial research and development, spur incremental innovation, facilitate diffusion and generate product market competition.
- (6) The likelihood that such efficiency-enhancing and pro-competitive effects will outweigh any

anti-competitive effects due to restrictions contained in technology transfer agreements depends on the degree of market power of the undertakings concerned and, therefore, on the extent to which those undertakings face competition from undertakings owning substitute technologies or undertakings producing substitute products.

- (7) This Regulation should only deal with agreements where the licensor permits the licensee to exploit the licensed technology, possibly after further research and development by the licensee, for the production of goods or services. It should not deal with licensing agreements for the purpose of subcontracting research and development. It should also not deal with licensing agreements to set up technology pools, that is to say, agreements for the pooling of technologies with the purpose of licensing the created package of **intellectual** property rights to third parties.
- (8) For the application of Article 81(3) by regulation, it is not necessary to define those technology transfer agreements that are capable of falling within Article 81(1). In the individual assessment of agreements pursuant to Article 81(1), account has to be taken of several factors, and in particular the structure and the dynamics of the relevant technology and product markets.
- (9) The benefit of the **block exemption** established by this Regulation should be limited to those agreements which can be assumed with sufficient certainty to satisfy the conditions of Article 81(3). In order to attain the benefits and objectives of technology transfer, the benefit of this Regulation should also apply to provisions contained in technology transfer agreements that do not constitute the primary object of such agreements, but are directly related to the application of the licensed technology.
- (10) For technology transfer agreements between competitors it can be presumed that, where the combined share of the relevant markets accounted for by the parties does not exceed 20 % and the agreements do not contain certain severely anti-competitive restraints, they generally lead to an improvement in production or distribution and allow consumers a fair share of the resulting benefits.
- (11) For technology transfer agreements between non-competitors it can be presumed that, where the individual share of the relevant markets accounted for by each of the parties does not exceed 30 % and the agreements do not contain certain severely anti-competitive restraints, they generally lead to an improvement in production or distribution and allow consumers a fair share of the resulting benefits.
- (12) There can be no presumption that above these market-share thresholds technology transfer agreements do fall within the scope of Article 81(1). For instance, an exclusive licensing agreement between non-competing undertakings does often not fall within the scope of Article 81(1). There can also be no presumption that, above these market-share thresholds, technology transfer agreements falling within the scope of Article 81(1) will not satisfy the conditions for exemption. However, it can also not be presumed that they will usually give rise to objective advantages of such a character and size as to compensate for the disadvantages which they create for competition.
- (13) This Regulation should not exempt technology transfer agreements containing restrictions which are not indispensable to the improvement of production or distribution. In particular, technology transfer agreements containing certain severely anti-competitive restraints such as the fixing of prices charged to third parties should be excluded from the benefit of the **block exemption** established by this Regulation irrespective of the market shares of the undertakings concerned. In the case of such hardcore restrictions the whole agreement should be excluded from the benefit of the **block exemption**.
- (14) In order to protect incentives to innovate and the appropriate application of **intellectual** property rights, certain restrictions should be excluded from the **block exemption**. In particular

exclusive grant back obligations for severable improvements should be excluded. Where such a restriction is included in a licence agreement only the restriction in question should be excluded from the benefit of the [block exemption](#).

- (15) The market-share thresholds, the non-exemption of technology transfer agreements containing severely anti-competitive restraints and the excluded restrictions provided for in this Regulation will normally ensure that the agreements to which the [block exemption](#) applies do not enable the participating undertakings to eliminate competition in respect of a substantial part of the products in question.
- (16) In particular cases in which the agreements falling under this Regulation nevertheless have effects incompatible with Article 81(3), the Commission should be able to withdraw the benefit of the [block exemption](#). This may occur in particular where the incentives to innovate are reduced or where access to markets is hindered.
- (17) Council Regulation (EC) No 1/2003 of 16 December 2002 on the implementation of the rules on competition laid down in Articles 81 and 82 of the Treaty(5) empowers the competent authorities of Member States to withdraw the benefit of the [block exemption](#) in respect of technology transfer agreements having effects incompatible with Article 81(3), where such effects are felt in their respective territory, or in a part thereof, and where such territory has the characteristics of a distinct geographic market. Member States must ensure that the exercise of this power of withdrawal does not prejudice the uniform application throughout the common market of the Community competition rules or the full effect of the measures adopted in implementation of those rules.
- (18) In order to strengthen supervision of parallel networks of technology transfer agreements which have similar restrictive effects and which cover more than 50 % of a given market, the Commission should be able to declare this Regulation inapplicable to technology transfer agreements containing specific restraints relating to the market concerned, thereby restoring the full application of Article 81 to such agreements.
- (19) This Regulation should cover only technology transfer agreements between a licensor and a licensee. It should cover such agreements even if conditions are stipulated for more than one level of trade, by, for instance, requiring the licensee to set up a particular distribution system and specifying the obligations the licensee must or may impose on resellers of the products produced under the licence. However, such conditions and obligations should comply with the competition rules applicable to supply and distribution agreements. Supply and distribution agreements concluded between a licensee and its buyers should not be exempted by this Regulation.
- (20) This Regulation is without prejudice to the application of Article 82 of the Treaty,

HAS ADOPTED THIS REGULATION:

Article 1

Definitions

1. For the purposes of this Regulation, the following definitions shall apply:

- (a) "agreement" means an agreement, a decision of an association of undertakings or a concerted practice;
- (b) "technology transfer agreement" means a patent licensing agreement, a know-how licensing agreement, a software copyright licensing agreement or a mixed patent, know-how or software copyright licensing

agreement, including any such agreement containing provisions which relate to the sale and purchase of products or which relate to the licensing of other **intellectual** property rights or the assignment of **intellectual** property rights, provided that those provisions do not constitute the primary object of the agreement and are directly related to the production of the contract products; assignments of patents, know-how, software copyright or a combination thereof where part of the risk associated with the exploitation of the technology remains with the assignor, in particular where the sum payable in consideration of the assignment is dependent on the turnover obtained by the assignee in respect of products produced with the assigned technology, the quantity of such products produced or the number of operations carried out employing the technology, shall also be deemed to be technology transfer agreements;

- (c) "reciprocal agreement" means a technology transfer agreement where two undertakings grant each other, in the same or separate contracts, a patent licence, a know-how licence, a software copyright licence or a mixed patent, know-how or software copyright licence and where these licences concern competing technologies or can be used for the production of competing products;
- (d) "non-reciprocal agreement" means a technology transfer agreement where one undertaking grants another undertaking a patent licence, a know-how licence, a software copyright licence or a mixed patent, know-how or software copyright licence, or where two undertakings grant each other such a licence but where these licences do not concern competing technologies and cannot be used for the production of competing products;
- (e) "product" means a good or a service, including both intermediary goods and services and final goods and services;
- (f) "contract products" means products produced with the licensed technology;
- (g) "**intellectual** property rights" includes industrial property rights, know-how, copyright and neighbouring rights;
- (h) "patents" means patents, patent applications, utility models, applications for registration of utility models, designs, topographies of semiconductor products, supplementary protection certificates for medicinal products or other products for which such supplementary protection certificates may be obtained and plant breeder's certificates;
- (i) "know-how" means a package of non-patented practical information, resulting from experience and testing, which is:
 - (i) secret, that is to say, not generally known or easily accessible,
 - (ii) substantial, that is to say, significant and useful for the production of the contract products, and
 - (iii) identified, that is to say, described in a sufficiently comprehensive manner so as to make it possible to verify that it fulfils the criteria of secrecy and substantiality;
- (j) "competing undertakings" means undertakings which compete on the relevant technology market and/or the relevant product market, that is to say:
 - (i) competing undertakings on the relevant technology market, being undertakings which license out competing technologies without infringing each others' **intellectual** property rights (actual competitors on the technology market); the relevant technology market includes technologies which are regarded by the licensees as interchangeable with or substitutable for the licensed technology, by reason of the technologies' characteristics, their royalties and their intended use,
 - (ii) competing undertakings on the relevant product market, being undertakings which, in the absence of the technology transfer agreement, are both active on the relevant product and geographic

market(s) on which the contract products are sold without infringing each others' **intellectual** property rights (actual competitors on the product market) or would, on realistic grounds, undertake the necessary additional investments or other necessary switching costs so that they could timely enter, without infringing each others' **intellectual** property rights, the(se) relevant product and geographic market(s) in response to a small and permanent increase in relative prices (potential competitors on the product market); the relevant product market comprises products which are regarded by the buyers as interchangeable with or substitutable for the contract products, by reason of the products' characteristics, their prices and their intended use;

- (k) "selective distribution system" means a distribution system where the licensor undertakes to license the production of the contract products only to licensees selected on the basis of specified criteria and where these licensees undertake not to sell the contract products to unauthorised distributors;
- (l) "exclusive territory" means a territory in which only one undertaking is allowed to produce the contract products with the licensed technology, without prejudice to the possibility of allowing within that territory another licensee to produce the contract products only for a particular customer where this second licence was granted in order to create an alternative source of supply for that customer;
- (m) "exclusive customer group" means a group of customers to which only one undertaking is allowed actively to sell the contract products produced with the licensed technology;
- (n) "severable improvement" means an improvement that can be exploited without infringing the licensed technology.

2. The terms "undertaking", "licensor" and "licensee" shall include their respective connected undertakings.

"Connected undertakings" means:

- (a) undertakings in which a party to the agreement, directly or indirectly:
 - (i) has the power to exercise more than half the voting rights, or
 - (ii) has the power to appoint more than half the members of the supervisory board, board of management or bodies legally representing the undertaking, or
- (iii) has the right to manage the undertaking's affairs;
- (b) undertakings which directly or indirectly have, over a party to the agreement, the rights or powers listed in (a);
- (c) undertakings in which an undertaking referred to in (b) has, directly or indirectly, the rights or powers listed in (a);
- (d) undertakings in which a party to the agreement together with one or more of the undertakings referred to in (a), (b) or (c), or in which two or more of the latter undertakings, jointly have the rights or powers listed in (a);
- (e) undertakings in which the rights or the powers listed in (a) are jointly held by:
 - (i) parties to the agreement or their respective connected undertakings referred to in (a) to (d), or
 - (ii) one or more of the parties to the agreement or one or more of their connected undertakings referred to in (a) to (d) and one or more third parties.

Article 2

Exemption

Pursuant to Article 81(3) of the Treaty and subject to the provisions of this Regulation, it is hereby declared that Article 81(1) of the Treaty shall not apply to technology transfer agreements entered into between two undertakings permitting the production of contract products.

This exemption shall apply to the extent that such agreements contain restrictions of competition falling within the scope of Article 81(1). The exemption shall apply for as long as the **intellectual** property right in the licensed technology has not expired, lapsed or been declared invalid or, in the case of know-how, for as long as the know-how remains secret, except in the event where the know-how becomes publicly known as a result of action by the licensee, in which case the exemption shall apply for the duration of the agreement.

Article 3

Market-share thresholds

1. Where the undertakings party to the agreement are competing undertakings, the exemption provided for in Article 2 shall apply on condition that the combined market share of the parties does not exceed 20 % on the affected relevant technology and product market.
2. Where the undertakings party to the agreement are not competing undertakings, the exemption provided for in Article 2 shall apply on condition that the market share of each of the parties does not exceed 30 % on the affected relevant technology and product market.
3. For the purposes of paragraphs 1 and 2, the market share of a party on the relevant technology market(s) is defined in terms of the presence of the licensed technology on the relevant product market(s). A licensor's market share on the relevant technology market shall be the combined market share on the relevant product market of the contract products produced by the licensor and its licensees.

Article 4

Hardcore restrictions

1. Where the undertakings party to the agreement are competing undertakings, the exemption provided for in Article 2 shall not apply to agreements which, directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object:
 - (a) the restriction of a party's ability to determine its prices when selling products to third parties;
 - (b) the limitation of output, except limitations on the output of contract products imposed on the licensee in a non-reciprocal agreement or imposed on only one of the licensees in a reciprocal agreement;
 - (c) the allocation of markets or customers except:
 - (i) the obligation on the licensee(s) to produce with the licensed technology only within one or

more technical fields of use or one or more product markets,

- (ii) the obligation on the licensor and/or the licensee, in a non-reciprocal agreement, not to produce with the licensed technology within one or more technical fields of use or one or more product markets or one or more exclusive territories reserved for the other party,
 - (iii) the obligation on the licensor not to license the technology to another licensee in a particular territory,
 - (iv) the restriction, in a non-reciprocal agreement, of active and/or passive sales by the licensee and/or the licensor into the exclusive territory or to the exclusive customer group reserved for the other party,
 - (v) the restriction, in a non-reciprocal agreement, of active sales by the licensee into the exclusive territory or to the exclusive customer group allocated by the licensor to another licensee provided the latter was not a competing undertaking of the licensor at the time of the conclusion of its own licence,
 - (vi) the obligation on the licensee to produce the contract products only for its own use provided that the licensee is not restricted in selling the contract products actively and passively as spare parts for its own products,
 - (vii) the obligation on the licensee, in a non-reciprocal agreement, to produce the contract products only for a particular customer, where the licence was granted in order to create an alternative source of supply for that customer;
- (d) the restriction of the licensee's ability to exploit its own technology or the restriction of the ability of any of the parties to the agreement to carry out research and development, unless such latter restriction is indispensable to prevent the disclosure of the licensed know-how to third parties.
2. Where the undertakings party to the agreement are not competing undertakings, the exemption provided for in Article 2 shall not apply to agreements which, directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object:
- (a) the restriction of a party's ability to determine its prices when selling products to third parties, without prejudice to the possibility of imposing a maximum sale price or recommending a sale price, provided that it does not amount to a fixed or minimum sale price as a result of pressure from, or incentives offered by, any of the parties;
 - (b) the restriction of the territory into which, or of the customers to whom, the licensee may passively sell the contract products, except:
 - (i) the restriction of passive sales into an exclusive territory or to an exclusive customer group reserved for the licensor,
 - (ii) the restriction of passive sales into an exclusive territory or to an exclusive customer group allocated by the licensor to another licensee during the first two years that this other licensee is selling the contract products in that territory or to that customer group,
 - (iii) the obligation to produce the contract products only for its own use provided that the licensee is not restricted in selling the contract products actively and passively as spare parts for its own products,
 - (iv) the obligation to produce the contract products only for a particular customer, where the licence was granted in order to create an alternative source of supply for that customer,
 - (v) the restriction of sales to end-users by a licensee operating at the wholesale level of trade,

- (vi) the restriction of sales to unauthorised distributors by the members of a selective distribution system;
- (c) the restriction of active or passive sales to end-users by a licensee which is a member of a selective distribution system and which operates at the retail level, without prejudice to the possibility of prohibiting a member of the system from operating out of an unauthorised place of establishment.
3. Where the undertakings party to the agreement are not competing undertakings at the time of the conclusion of the agreement but become competing undertakings afterwards, paragraph 2 and not paragraph 1 shall apply for the full life of the agreement unless the agreement is subsequently amended in any material respect.

Article 5

Excluded restrictions

1. The exemption provided for in Article 2 shall not apply to any of the following obligations contained in technology transfer agreements:

- (a) any direct or indirect obligation on the licensee to grant an exclusive licence to the licensor or to a third party designated by the licensor in respect of its own severable improvements to or its own new applications of the licensed technology;
- (b) any direct or indirect obligation on the licensee to assign, in whole or in part, to the licensor or to a third party designated by the licensor, rights to its own severable improvements to or its own new applications of the licensed technology;
- (c) any direct or indirect obligation on the licensee not to challenge the validity of **intellectual** property rights which the licensor holds in the common market, without prejudice to the possibility of providing for termination of the technology transfer agreement in the event that the licensee challenges the validity of one or more of the licensed **intellectual** property rights.

2. Where the undertakings party to the agreement are not competing undertakings, the exemption provided for in Article 2 shall not apply to any direct or indirect obligation limiting the licensee's ability to exploit its own technology or limiting the ability of any of the parties to the agreement to carry out research and development, unless such latter restriction is indispensable to prevent the disclosure of the licensed know-how to third parties.

Article 6

Withdrawal in individual cases

1. The Commission may withdraw the benefit of this Regulation, pursuant to Article 29(1) of Regulation (EC) No 1/2003, where it finds in any particular case that a technology transfer agreement to which the exemption provided for in Article 2 applies nevertheless has effects which are incompatible with Article 81(3) of the Treaty, and in particular where:

- (a) access of third parties' technologies to the market is restricted, for instance by the cumulative effect of parallel networks of similar restrictive agreements prohibiting licensees from using third parties' technologies;

- (b) access of potential licensees to the market is restricted, for instance by the cumulative effect of parallel networks of similar restrictive agreements prohibiting licensors from licensing to other licensees;
- (c) without any objectively valid reason, the parties do not exploit the licensed technology.

2. Where, in any particular case, a technology transfer agreement to which the exemption provided for in Article 2 applies has effects which are incompatible with Article 81(3) of the Treaty in the territory of a Member State, or in a part thereof, which has all the characteristics of a distinct geographic market, the competition authority of that Member State may withdraw the benefit of this Regulation, pursuant to Article 29(2) of Regulation (EC) No 1/2003, in respect of that territory, under the same circumstances as those set out in paragraph 1 of this Article.

Article 7

Non-application of this Regulation

1. Pursuant to Article 1a of Regulation No 19/65/EEC, the Commission may by regulation declare that, where parallel networks of similar technology transfer agreements cover more than 50 % of a relevant market, this Regulation is not to apply to technology transfer agreements containing specific restraints relating to that market.

2. A regulation pursuant to paragraph 1 shall not become applicable earlier than six months following its adoption.

Article 8

Application of the market-share thresholds

1. For the purposes of applying the market-share thresholds provided for in Article 3 the rules set out in this paragraph shall apply.

The market share shall be calculated on the basis of market sales value data. If market sales value data are not available, estimates based on other reliable market information, including market sales volumes, may be used to establish the market share of the undertaking concerned.

The market share shall be calculated on the basis of data relating to the preceding calendar year.

The market share held by the undertakings referred to in point (e) of the second subparagraph of Article 1(2) shall be apportioned equally to each undertaking having the rights or the powers listed in point (a) of the second subparagraph of Article 1(2).

2. If the market share referred to in Article 3(1) or (2) is initially not more than 20 % respectively 30 % but subsequently rises above those levels, the exemption provided for in Article 2 shall continue to apply for a period of two consecutive calendar years following the year in which the 20 % threshold or 30 % threshold was first exceeded.

Article 9

Repeal

Regulation (EC) No 240/96 is repealed.

References to the repealed Regulation shall be construed as references to this Regulation.

Article 10

Transitional period

The prohibition laid down in Article 81(1) of the Treaty shall not apply during the period from 1 May 2004 to 31 March 2006 in respect of agreements already in force on 30 April 2004 which do not satisfy the conditions for exemption provided for in this Regulation but which, on 30 April 2004, satisfied the conditions for exemption provided for in Regulation (EC) No 240/96.

Article 11

Period of validity

This Regulation shall enter into force on 1 May 2004.

It shall expire on 30 April 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 27 April 2004.

For the Commission

Mario Monti

Member of the Commission
